CVRD: first turbine of the Candonga Hydroelectric Power Plant starts operation

Rio de Janeiro, September 8, 2004 Companhia Vale do Rio Doce (CVRD) announces that Candonga Hydroelectric Power Plant (Candonga) started commercial energy generation, with the start-up of the operation of its first turbine. Candonga's other two turbines will be operating by November 2004.

Candonga belongs to Consórcio Candonga (Candonga Consortium), in which CVRD has a 50% stake. CVRD invested US\$ 46 million and its construction started in June 2001.

The plant is located on the Doce river, between the municipalities of Rio Doce and Santa Cruz do Escalvado, Zona da Mata region, in the state of Minas Gerais. It has an installed capacity of 140 MW and generation capacity of 64.5 average MW, equivalent to 565,020 MWh per annum. Candonga is the fourth CVRD hydroelectric power plant to come on stream, and the others, Igarapava (210 MW), Funil (180 MW) and Porto Estrela (112 MW) are also located in the state of Minas Gerais. During its construction, 2,000 workers were hired, the majority from the surrounding communities.

CVRD's take in the Candonga hydroelectric power plant production will be directed to the Company's operating facilities in the states of Minas Gerais and Espírito Santo.

This project is in line with CVRD's strategy to invest in hydroelectric power generation, since electric energy is an important input for the Company's operations.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
