(Exact name of registrant as specified in its charter)

Delaware
(State of incorporation)

95-3666267
(IRS employer identification number)

10990 Wilshire Boulevard
Los Angeles, California 90024
(310) 231-4000

(Address and telephone number of principal executive offices)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of August 31, 2011. There were 77,132,675 shares of the registrant's common stock, par value \$1.00 per share, outstanding on August 31, 2011. The registrant's grantor stock ownership trust held an additional 10,920,444 shares of the registrant's common stock on that date.

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation and Significant Accounting Policies

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, certain information and footnote disclosures normally included in the annual financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted.

In the opinion of KB Home (the Company), the accompanying unaudited consolidated financial statements contain all adjustments (consisting only of normal recurring accruals) necessary to present fairly the Company s consolidated financial position as of August 31, 2011, the results of its consolidated operations for the nine months and three months ended August 31, 2011 and 2010, and its consolidated cash flows for the nine months ended August 31, 2011 and 2010. The results of consolidated operations for the nine months and three months ended August 31, 2011 are not necessarily indicative of the results to be expected for the full year, due to seasonal variations in operating results and other factors. The consolidated balance sheet at November 30, 2010 has been taken from the audited consolidated financial statements as of that date. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended November 30, 2010, which are contained in the Company s Annual Report on Form 10-K for that period.

Use of Estimates

The accompanying unaudited consolidated financial statements have been prepared in conformity with GAAP and, therefore, include amounts based on informed estimates and judgments of management. Actual results could differ from these estimates.

Cash and Cash Equivalents and Restricted Cash

The Company considers all highly liquid short-term debt instruments purchased with an original maturity of three months or less to be cash equivalents. The Company s cash equivalents totaled \$377.8 million at August 31, 2011 and \$797.2 million at November 30, 2010. The majority of the Company s cash and cash equivalents were invested in money market accounts and U.S. government securities.

Restricted cash of \$113.2 million at August 31, 2011 consisted of \$65.0 million of cash deposited with various financial institutions that is required as collateral for the Company s cash-collateralized letter of credit facilities (the LOC Facilities), \$26.8 million required as collateral for a surety bond and \$21.4 million of cash deposited in an escrow account pursuant to a consensual plan of reorganization for one of the Company s unconsolidated joint ventures. Restricted cash of \$115.5 million at November 30, 2010 consisted of \$88.7 million of cash collateral for the LOC Facilities and \$26.8 million of cash collateral for a surety bond.

Loss per share

Basic and diluted loss per share were calculated as follows (in thousands, except per share amounts):

	Nine Months Ended August		Three Months Ended August	
	31,		31,	
	2011	2010	2011	2010
Numerator:				
Net loss	\$ (192,679)	\$ (86,810)	\$ (9,649)	\$ (1,397)
Denominator:				
Basic and diluted average shares outstanding	77,004	76,866	77,047	76,909
Basic and diluted loss per share	\$ (2.50)	\$ (1.13)	\$ (.13)	\$ (.02)

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation and Significant Accounting Policies (continued)

All outstanding stock options were excluded from the diluted loss per share calculations for the nine months and three months ended August 31, 2011 and 2010 because the effect of their inclusion would be antidilutive, or would decrease the reported loss per share.

Comprehensive loss

The Company's comprehensive loss was \$9.6 million for the three months ended August 31, 2011 and \$1.4 million for the three months ended August 31, 2010. The Company's comprehensive loss was \$192.7 million for the nine months ended August 31, 2011 and \$86.8 million for the nine months ended August 31, 2010. The accumulated balances of other comprehensive loss in the consolidated balance sheets as of August 31, 2011 and November 30, 2010 were comprised solely of adjustments recorded directly to accumulated other comprehensive loss in accordance with Accounting Standards Codification Topic No. 715, Compensation - Retirement Benefits (ASC 715). ASC 715 requires an employer to recognize the funded status of defined postretirement benefit plans as an asset or liability on the balance sheet and requires any unrecognized prior service costs and actuarial gains/losses to be recognized in accumulated other comprehensive income (loss).

2. Stock-Based Compensation

The Company measures and recognizes compensation expense associated with its grants of equity-based awards in accordance with Accounting Standards Codification Topic No. 718, Compensation - Stock Compensation (ASC 718). ASC 718 requires that public companies measure and recognize compensation expense at an amount equal to the fair value of share-based payments granted under compensation arrangements over the vesting period.

Stock Options

In accordance with ASC 718, the Company estimates the grant-date fair value of its stock options using the Black-Scholes option-pricing model, which takes into account assumptions regarding an expected dividend yield, a risk-free interest rate, an expected volatility factor for the market price of the Company's common stock and an expected term of the stock options. The following table summarizes the stock options outstanding and stock options exercisable as of August 31, 2011, as well as stock options activity during the nine months then ended:

	Options	Weighted Average Exercise Price
Options outstanding at beginning of period	8,798,613	\$ 24.19
Granted	20,000	9.54
Exercised		
Cancelled	(275,363)	21.44
Options outstanding at end of period	8,543,250	24.24
Options exercisable at end of period	6,123,062	28.46

As of August 31, 2011, the weighted average remaining contractual life of stock options outstanding and stock options exercisable was 7.1 years and 6.5 years, respectively. There was \$3.3 million of total unrecognized compensation cost related to unvested stock option awards as of August 31, 2011. For the three months ended August 31, 2011 and 2010, stock-based compensation expense associated with stock options totaled \$1.5 million and \$1.4 million, respectively. For the nine months ended August 31, 2011 and 2010, stock-based compensation expense associated with stock options totaled \$4.2 million and \$4.3 million, respectively. Stock options outstanding and stock options exercisable had no aggregate intrinsic value as of August 31, 2011. (The intrinsic

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

2. Stock-Based Compensation (continued)

value of a stock option is the amount by which the market value of a share of the underlying common stock exceeds the exercise price of the stock option.)

Other Stock-Based Awards

From time to time, the Company grants restricted stock, phantom shares and stock appreciation rights (SARs) to various employees. In some cases, the Company has granted phantom shares and SARs that can be settled only in cash and are therefore accounted for as liability awards. The Company recognized income of \$.5 million in the three months ended August 31, 2011 and \$5.3 million in the three months ended August 31, 2010 related to restricted stock, phantom shares and SARs awards. The Company recognized total compensation expense of \$.9 million in the nine months ended August 31, 2011 and total compensation income of \$1.0 million in the nine months ended August 31, 2010 related to these stock-based awards. Some of the stock-based awards outstanding at August 31, 2010 were SARs that could be settled only in cash. In the third and fourth quarters of 2010, the Company offered to eligible officers and employees the opportunity to replace cash-settled SARs previously granted to them with options to purchase shares of the Company s common stock. Each stock option issued to replace a SAR had an exercise price equal to the replaced SAR s exercise price, and the same number of underlying shares, vesting schedule and expiration date as each such SAR. The offers did not include a re-pricing or any other changes impacting the value of the awards to the participating officers and employees, and no additional grants or awards were made to the participants as part of the offers. All of the SARs the Company received through the offers were canceled, and with forfeitures due to employee departures, the Company has canceled virtually all of its previously granted cash-settled SARs.

Approval of an Amendment to the KB Home 2010 Equity Incentive Plan

At the Company s Annual Meeting of Stockholders held on April 7, 2011, the Company s stockholders approved an amendment to the KB Home 2010 Equity Incentive Plan (the Plan Amendment) to increase the number of shares of the Company s common stock that may be issued under the KB Home 2010 Equity Incentive Plan by an additional 4,000,000 shares. The Plan Amendment was filed as an exhibit to the Company s Quarterly Report on Form 10-Q for the quarter ended February 28, 2011.

3. Segment Information

As of August 31, 2011, the Company had identified five reporting segments, comprised of four homebuilding reporting segments and one financial services reporting segment, within its consolidated operations in accordance with Accounting Standards Codification Topic No. 280, Segment Reporting. As of August 31, 2011, the Company s homebuilding reporting segments conducted ongoing operations in the following states:

West Coast: California

Southwest: Arizona and Nevada

Central: Colorado and Texas

Southeast: Florida, Maryland, North Carolina and Virginia

The Company s homebuilding reporting segments are engaged in the acquisition and development of land primarily for residential purposes and offer a wide variety of homes that are designed to appeal to first-time, move-up and active adult homebuyers.

The Company s homebuilding reporting segments were identified based primarily on similarities in economic and geographic characteristics, product types, regulatory environments, methods used to sell and construct homes and land acquisition characteristics. The Company evaluates segment performance primarily based on segment pretax results.

The Company s financial services reporting segment provides title and insurance services to the Company s homebuyers. This segment also provided mortgage banking services to the Company s homebuyers indirectly

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

3. Segment Information (continued)

through KBA Mortgage, LLC (KBA Mortgage), a joint venture of a subsidiary of the Company and a subsidiary of Bank of America, N.A., with each partner having a 50% ownership interest in the venture. The Bank of America, N.A. subsidiary partner operated KBA Mortgage. The Company accounted for KBA Mortgage as an unconsolidated joint venture in the financial services reporting segment of the Company's consolidated financial statements. The Company's financial services reporting segment conducts operations in the same markets as the Company's homebuilding reporting segments. From its formation in 2005 until June 30, 2011, KBA Mortgage provided mortgage banking services to a significant proportion of the Company's homebuyers. During the first quarter of 2011, the Bank of America, N.A. subsidiary partner in KBA Mortgage approached the Company about exiting the joint venture due to the desire of Bank of America, N.A. to cease participating in joint venture structures in its business. As a result, effective June 27, 2011, KBA Mortgage stopped accepting loan applications, and it ceased offering mortgage banking services to the Company's homebuyers after June 30, 2011. After June 30, 2011, Bank of America, N.A. is processing and closing only the residential consumer mortgage loans that KBA Mortgage originated for the Company's homebuyers on or before June 26, 2011. The Company entered into a marketing services agreement with MetLife Home Loans, a division of MetLife Bank, N.A., effective June 27, 2011. Under the agreement, MetLife Home Loans personnel, located onsite at several of the Company's new home communities, can offer (i) financing options and mortgage loan products to the Company's homebuyers, (ii) to prequalify homebuyers for residential consumer mortgage loans, and (iii) to commence the loan origination process for homebuyers who elect to use MetLife Home Loans. The Company makes marketing materials and other information regarding MetLife Home Loans' financing options and mortgage loan products available to its homebuyers and is compensated solely for the fair market value of these services. MetLife Home Loans and MetLife Bank, N.A. are not affiliates of the Company or any of its subsidiaries. The Company's homebuyers are under no obligation to use MetLife Home Loans and may select any lender of their choice to obtain mortgage financing for the purchase of a home. The Company does not have any ownership, joint venture or other interests in or with MetLife Home Loans or MetLife Bank, N.A. or with respect to the revenues or income that may be generated from MetLife Home Loans providing mortgage banking services to, or originating residential consumer mortgage loans for, the Company's homebuyers. The Company expects that its agreement with MetLife Home Loans will help its homebuyers obtain reliable mortgage banking services to purchase a home.

The Company's reporting segments follow the same accounting policies used for the Company's consolidated financial statements. Operational results of each segment are not necessarily indicative of the results that would have occurred had the segment been an independent, stand-alone entity during the periods presented, nor are they indicative of the results to be expected in future periods.

The following tables present financial information relating to the Company's reporting segments (in thousands):

	Nine Months Ended August		Three Months Ended August

6. **Inventories (continued)**

- (a) Amounts for the nine months ended August 31, 2011 include a \$3.6 million gain on the early extinguishment of secured debt. Amounts for the nine months ended August 31, 2010 include \$1.8 million of debt issuance costs written off in connection with the Company's voluntary reduction of the aggregate commitment under an unsecured revolving credit facility (the Credit Facility) from \$650.0 million to \$200.0 million during the first quarter of 2010 and the voluntary termination of the Credit Facility effective March 31, 2010.
- (b) Inventory impairment charges are recognized against all inventory costs of a community, such as land, land improvements, costs of home construction and capitalized interest. Capitalized interest amounts presented in the table reflect the gross amount of capitalized interest as impairment charges recognized are not generally allocated to specific components of inventory.

7. **Inventory Impairments and Land Option Contract Abandonments**

Each land parcel or community in the Company's owned inventory is assessed to determine if indicators of potential impairment exist. Impairment indicators are assessed separately for each land parcel or community on a quarterly basis and include, but are not limited to the following: significant decreases in sales rates, average selling prices, volume of homes delivered, gross margins on homes delivered or projected margins on homes in backlog or future housing sales; significant increases in budgeted land development and construction costs or cancellation rates; or projected losses on expected future land sales. If indicators of potential impairment exist for a land parcel or community, the identified asset is evaluated for recoverability in accordance with Accounting Standards Codification Topic No. 360, Property, Plant, and Equipment (ASC 360). The Company evaluated 33 land parcels or communities for recoverability during each of the three-month periods ended August 31, 2011 and 2010. The Company evaluated 97 land parcels or communities and 88 land parcels or communities for recoverability during the nine months ended August 31, 2011 and 2010, respectively. Some of these land parcels or communities evaluated during the nine months ended August 31, 2011 and 2010 were evaluated in more than one quarterly period.

When an indicator of potential impairment is identified for a land parcel or community, the Company tests the asset for recoverability by comparing the carrying value of the asset to the undiscounted future net cash flows expected to be generated by the asset. The undiscounted future net cash flows are impacted by then-current conditions and trends in the market in which an asset is located as well as factors known to the Company at the time the cash flows are calculated. The undiscounted future net cash flows consider recent trends in the Company's sales, backlog and cancellation rates. Among the trends considered with respect to the three-month and nine-month periods ended August 31, 2011 and 2010 were the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit, as discussed further below under

Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. Also taken into account were the Company's future expectations related to the following: market supply and demand, including estimates concerning average selling prices; sales and cancellation rates; and anticipated land development, construction and overhead costs to be incurred. With respect to the three-month and nine-month periods ended August 31, 2011, these expectations reflected the Company's experience that market conditions for its assets in inventory where impairment indicators were identified have been generally stable in 2010 and into 2011, with no significant deterioration or improvement identified as to revenue and cost drivers, excluding the temporary, though significant impact of the expiration of the federal homebuyer tax credit. Based on this experience, and taking into account the year-over-year increase in net orders in the third quarter of 2011 and the year-over-year increase in the number of new home communities, the Company's inventory assessments considered an expected improved sales pace for the remainder of 2011.

Given the inherent challenges and uncertainties in forecasting future results, the Company's inventory assessments at the time they are made generally assume the continuation of then-current market conditions, subject to identifying information suggesting a sustained deterioration or improvement in such conditions or other significant changes.

Therefore, for most of its assets in inventory where impairment indicators are

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

7. Inventory Impairments and Land Option Contract Abandonments (continued)

identified, the Company's quarterly inventory assessments for the remainder of 2011, at the time made, will anticipate sales rates, average selling prices and costs to generally continue at or near then-current levels through an affected asset's estimated remaining life. These estimates, trends and expectations are specific to each land parcel or community and may vary among land parcels or communities.

In its inventory assessments during the third quarter of 2011, the Company determined that the declines in its sales and backlog levels that it experienced in the third and fourth quarters of 2010 did not reflect a sustained change in market conditions preventing recoverability. Rather, the Company considered that they reflected the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit. Also contributing to these declines in the Company's sales and backlog levels were strategic community count reductions the Company made in select markets in prior periods to align its operations with market activity levels.

A real estate asset is considered impaired when its carrying value is greater than the undiscounted future net cash flows the asset is expected to generate. Impaired real estate assets are written down to fair value, which is primarily based on the estimated future cash flows discounted for inherent risk associated with each asset. The discount rates used in the Company's estimated discounted cash flows were 17% and 18% during the three months ended August 31, 2011 and 2010, respectively, and ranged from 17% to 20% during the nine-month periods ended August 31, 2011 and 2010. These discounted cash flows are impacted by the following: the risk-free rate of return; expected risk premium based on estimated land development, construction and delivery timelines; market risk from potential future price erosion; cost uncertainty due to development or construction cost increases; and other risks specific to the asset or conditions in the market in which the asset is located at the time the assessment is made. These factors are specific to each land parcel or community and may vary among land parcels or communities.

Based on the results of its evaluations, the Company recognized pretax, noncash inventory impairment charges of \$.3 million in the three months ended August 31, 2011 associated with one community with a post-impairment fair value of \$1.1 million. In the three months ended August 31, 2010, the Company recognized \$1.4 million of pretax, noncash inventory impairment charges associated with one community with a post-impairment fair value of \$2.7 million. In the nine months ended August 31, 2011, the Company recognized pretax, noncash inventory impairment charges of \$21.4 million associated with nine land parcels or communities with a post-impairment fair value of \$29.9 million. These charges included an \$18.1 million adjustment to the fair value of real estate collateral in the Company's Southwest homebuilding reporting segment that the Company took back on a note receivable in the second quarter of 2011. In the nine months ended August 31, 2010, the Company recognized \$8.2 million of pretax, noncash inventory impairment charges associated with five land parcels or communities with a post-impairment fair value of \$6.6 million. The inventory impairments the Company recorded during the three-month and nine-month periods ended August 31, 2011 and 2010 reflected declining asset values in certain markets due to unfavorable economic and competitive conditions.

As of August 31, 2011, the aggregate carrying value of the Company's inventory that had been impacted by pretax, noncash inventory impairment charges was \$366.8 million, representing 56 land parcels or communities. As of November 30, 2010, the aggregate carrying value of the Company's inventory that had been impacted by pretax, noncash inventory impairment charges was \$418.5 million, representing 72 land parcels or communities.

The Company's inventory held under land option and other similar contracts is assessed to determine whether it continues to meet the Company's internal investment and marketing standards. Assessments are made separately for each such land parcel on a quarterly basis and are affected by the following, among other factors: current and/or anticipated sales rates, average selling prices and home delivery volume; estimated land development and construction costs; and projected profitability on expected future housing or land sales. When a decision is made to not exercise certain land option and other similar contracts due to market conditions and/or changes in marketing strategy, the Company writes off the costs, including non-refundable deposits and pre-acquisition costs, related to the abandoned

projects. Based on the results of its assessments, the Company recognized pretax, noncash land option contract abandonment charges of \$.8 million corresponding to 209 lots in the three months ended August 31, 2011 and \$1.9 million of such charges corresponding to 284 lots in the three months ended

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

7. Inventory Impairments and Land Option Contract Abandonments (continued)

August 31, 2010. In the nine months ended August 31, 2011 and 2010, the Company recognized pretax, noncash land option contract abandonment charges of \$2.1 million corresponding to 467 lots and \$8.5 million corresponding to 685 lots, respectively. The charges for land option contract abandonments reflected the Company's termination of land option contracts on projects that no longer met its investment standards or marketing strategy.

Inventory impairment and land option contract abandonment charges are included in construction and land costs in the Company's consolidated statements of operations.

The estimated remaining life of each land parcel or community in the Company's inventory depends on various factors, such as the total number of lots remaining; the expected timeline to acquire and entitle land and develop lots to build homes; the anticipated future sales and cancellation rates; and the expected timeline to build and deliver homes sold. While it is difficult to determine a precise timeframe for any particular inventory asset, the Company estimates its inventory assets' remaining operating lives under current and expected future market conditions to range generally from one year to in excess of 10 years. Based on current market conditions and expected delivery timelines, the Company expects to realize, on an overall basis, the majority of its current inventory balance within three to five years.

Due to the judgment and assumptions applied in the estimation process with respect to inventory impairments, land option contract abandonments and the remaining operating lives of the Company's inventory assets, it is possible that actual results could differ substantially from those estimated.

8. Fair Value Disclosures

Accounting Standards Codification Topic No. 820, Fair Value Measurements and Disclosures, provides a framework for measuring the fair value of assets and liabilities under GAAP and establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The fair value hierarchy can be summarized as follows:

Level 1 Fair value determined based on quoted prices in active markets for identical assets or liabilities.

Level 2 Fair value determined using significant observable inputs, such as quoted prices for similar assets or liabilities or quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data, by correlation or other means.

Level 3 Fair value determined using significant unobservable inputs, such as pricing models, discounted cash flows, or similar techniques.

Fair value measurements are used for inventories on a nonrecurring basis when events and circumstances indicate the carrying value may not be recoverable. The following table presents the Company's assets measured at fair value on a nonrecurring basis during the nine months ended August 31, 2011 and the year ended November 30, 2010 (in thousands):

Description	Hierarchy	Fair Value	
		August 31, 2011 (a)	November 30, 2010 (a)
Long-lived assets held and used	Level 2	\$ 75	\$ 1,877
Long-lived assets held and used	Level 3	29,788	9,693
Total		\$ 29,863	\$ 11,570

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

8. Fair Value Disclosures (continued)

- (a) Amount represents the aggregate fair values for land parcels or communities for which the Company recognized inventory impairment charges during the reporting period, as of the date that the fair value measurements were made. The carrying value for these land parcels and communities may have subsequently increased or decreased from the fair value reflected due to activity that has occurred since the measurement date.

In accordance with the provisions of ASC 360, long-lived assets held and used with a carrying value of \$51.3 million were written down to their fair value of \$29.9 million during the nine months ended August 31, 2011, resulting in pretax, noncash inventory impairment charges of \$21.4 million. Long-lived assets held and used with a carrying value of \$21.4 million were written down to their fair value of \$11.6 million during the year ended November 30, 2010, resulting in pretax, noncash inventory impairment charges of \$9.8 million.

The fair values for long-lived assets held and used that were determined using Level 2 inputs were based on an executed contract. The fair values for long-lived assets held and used that were determined using Level 3 inputs were primarily based on the estimated future cash flows discounted for inherent risk associated with each asset. These discounted cash flows are impacted by the following: the risk-free rate of return; expected risk premium based on estimated land development, construction and delivery timelines; market risk from potential future price erosion; cost uncertainty due to development or construction cost increases; and other risks specific to the asset or conditions in the market in which the asset is located at the time the assessment is made. These factors are specific to each land parcel or community and may vary among land parcels or communities.

The Company's financial instruments consist of cash and cash equivalents, restricted cash, mortgages and notes receivable, senior notes, and mortgages and land contracts due to land sellers and other loans. Fair value measurements of financial instruments are determined by various market data and other valuation techniques as appropriate. When available, the Company uses quoted market prices in active markets to determine fair value.

The following table presents the carrying values and estimated fair values of the Company's financial instruments, except those for which the carrying values approximate fair values (in thousands):

	August 31, 2011		November 30, 2010	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial Liabilities:				
Senior notes due 2011 at 6 3/8%	\$	\$	\$ 99,916	\$ 101,500
Senior notes due 2014 at 5 3/4%	249,609	236,875	249,498	246,250
Senior notes due 2015 at 5 7/8%	299,221	261,000	299,068	289,500
Senior notes due 2015 at 6 1/4%	449,782	389,250	449,745	435,375
Senior notes due 2017 at 9.1%	260,732	237,175	260,352	279,575
Senior notes due 2018 at 7 1/4%	298,978	254,250	298,893	286,500

The fair values of the Company's senior notes are estimated based on quoted market prices. The Company repaid \$100.0 million in aggregate principal amount of the Company's 6 3/8% senior notes (the "\$100 Million Senior Notes") upon their August 15, 2011 maturity.

The carrying amounts reported for cash and cash equivalents, restricted cash, mortgages and notes receivable, and mortgages and land contracts due to land sellers and other loans approximate fair values.

(Unaudited)

9. Variable Interest Entities

The Company participates in joint ventures from time to time that conduct land acquisition, development and/or other homebuilding activities. Its investments in these joint ventures may create a variable interest in a variable interest entity (VIE), depending on the contractual terms of the arrangement. The Company analyzes its joint ventures in accordance with Accounting Standards Codification Topic No. 810, Consolidation (ASC 810), to determine whether they are VIEs and, if so, whether the Company is the primary beneficiary. All of the Company's joint ventures at August 31, 2011 and November 30, 2010 were determined under the provisions of ASC 810 to be unconsolidated joint ventures and were accounted for using the equity method, either because they were not VIEs or, if they were VIEs, the Company was not the primary beneficiary of the VIEs.

In the ordinary course of its business, the Company enters into land option and other similar contracts to procure rights to land parcels for the construction of homes. The use of such land option and other similar contracts generally allows the Company to reduce the market risks associated with direct land ownership and development, to reduce the Company's capital and financial commitments, including interest and other carrying costs, and to minimize the amount of the Company's land inventories in its consolidated balance sheets. Under such contracts, the Company typically pays a specified option deposit or earnest money deposit in consideration for the right to purchase land in the future, usually at a predetermined price. Under the requirements of ASC 810, certain of these contracts may create a variable interest for the Company, with the land seller being identified as a VIE.

In compliance with ASC 810, the Company analyzes its land option and other similar contracts to determine whether the corresponding land sellers are VIEs and, if so, whether the Company is the primary beneficiary. Although the Company does not have legal title to the underlying land, ASC 810 requires the Company to consolidate a VIE if the Company is determined to be the primary beneficiary. As a result of its analyses, the Company determined that, as of August 31, 2011 and November 30, 2010, it was not the primary beneficiary of any VIEs from which it is purchasing land under land option and other similar contracts. In determining whether it is the primary beneficiary, the Company considers, among other things, whether it has the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. Such activities would include, among other things, determining or limiting the scope or purpose of the VIE, selling or transferring property owned or controlled by the VIE, or arranging financing for the VIE. The Company also considers whether it has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE.

As of August 31, 2011, the Company had cash deposits totaling \$2.6 million associated with land option and other similar contracts that it determined to be unconsolidated VIEs, having an aggregate purchase price of \$110.6 million, and had cash deposits totaling \$13.0 million associated with land option and other similar contracts that the Company determined were not VIEs, having an aggregate purchase price of \$219.3 million. As of November 30, 2010, the Company had cash deposits totaling \$2.6 million associated with land option and other similar contracts that the Company determined to be unconsolidated VIEs, having an aggregate purchase price of \$86.1 million, and had cash deposits totaling \$12.2 million associated with land option and other similar contracts that the Company determined were not VIEs, having an aggregate purchase price of \$274.3 million.

The Company's exposure to loss related to its land option and other similar contracts with third parties and unconsolidated entities consisted of its non-refundable deposits, which totaled \$15.6 million at August 31, 2011 and \$14.8 million at November 30, 2010 and are included in inventories in the Company's consolidated balance sheets. In addition, the Company had outstanding letters of credit of \$2.0 million at August 31, 2011 and \$4.2 million at November 30, 2010 in lieu of cash deposits under certain land option or other similar contracts.

The Company also evaluates its land option and other similar contracts involving financing arrangements in accordance with Accounting Standards Codification Topic No. 470, Debt (ASC 470), and, as a result of its evaluations, increased inventories, with a corresponding increase to accrued expenses and other liabilities, in its consolidated balance sheets by \$25.1 million at August 31, 2011 and \$15.5 million at November 30, 2010.

10. Investments in Unconsolidated Joint Ventures

The Company has investments in unconsolidated joint ventures that conduct land acquisition, development

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

10. Investments in Unconsolidated Joint Ventures (continued)

and/or other homebuilding activities in various markets where the Company's homebuilding operations are located. The Company's partners in these unconsolidated joint ventures are unrelated homebuilders, and/or land developers and other real estate entities, or commercial enterprises. The Company entered into these unconsolidated joint ventures in previous years to reduce or share market and development risks and to increase the number of its owned and controlled homesites. In some instances, participation in these unconsolidated joint ventures has enabled the Company to acquire and develop land that it might not otherwise have had access to due to a project's size, financing needs, duration of development or other circumstances. While the Company has viewed its participation in these unconsolidated joint ventures as potentially beneficial to its homebuilding activities, it does not view such participation as essential and has unwound its participation in a number of these unconsolidated joint ventures in the past few years.

The Company typically has obtained rights to purchase portions of the land held by the unconsolidated joint ventures in which it currently participates. When an unconsolidated joint venture sells land to the Company's homebuilding operations, the Company defers recognition of its share of such unconsolidated joint venture earnings until a home sale is closed and title passes to a homebuyer, at which time the Company accounts for those earnings as a reduction of the cost of purchasing the land from the unconsolidated joint venture.

The Company and its unconsolidated joint venture partners make initial and/or ongoing capital contributions to these unconsolidated joint ventures, typically on a pro rata basis equal to their respective equity interests. The obligations to make capital contributions are governed by each such unconsolidated joint venture's respective operating agreement and related governing documents.

Each unconsolidated joint venture is obligated to maintain financial statements in accordance with GAAP. The Company shares in the profits and losses of its unconsolidated joint ventures generally in accordance with its respective equity interests. In some instances, the Company recognizes profits and losses related to its investment in an unconsolidated joint venture that differ from its respective equity interest in the unconsolidated joint venture. This may arise from impairments recognized by the Company related to its investment that differ from the recognition of impairments by the unconsolidated joint venture with respect to the unconsolidated joint venture's assets; differences between the Company's basis in assets it has transferred to the unconsolidated joint venture and the unconsolidated joint venture's basis in those assets; the deferral of the unconsolidated joint venture's profits from land sales to the Company; or other items.

With respect to the Company's investment in unconsolidated joint ventures, its equity in loss of unconsolidated joint ventures included pretax, noncash impairment charges of \$53.7 million for the nine months ended August 31, 2011 to write off the Company's remaining investment in South Edge, LLC ("South Edge"), an unconsolidated joint venture in the Company's Southwest homebuilding reporting segment. KB HOME Nevada Inc., a wholly-owned subsidiary of the Company, is a member of South Edge. The Company wrote off its remaining investment in South Edge based on the Company's determination that South Edge was no longer able to perform its activities as originally intended due to a court decision in the first quarter of 2011, which is discussed further below. There were no such impairment charges for the three months ended August 31, 2011 or the three months and nine months ended August 31, 2010. Due to the Company's write-off of its investment in South Edge, the information from the combined condensed statements of operations of the Company's unconsolidated joint ventures for the three months ended August 31, 2011 and the combined condensed balance sheet information for the Company's unconsolidated joint ventures as of August 31, 2011, in each case as presented in the tables below, does not include South Edge.

The following table presents information from the combined condensed statements of operations of the Company's unconsolidated joint ventures (in thousands):

10. Investments in Unconsolidated Joint Ventures (continued)

- (a) During the first quarter of 2011, the Company wrote off its remaining investment in South Edge. The Company also recorded an estimate of the probable net payment obligation it would pay to the administrative agent (the Administrative Agent) for lenders to South Edge related to a limited several repayment guaranty (the Springing Guaranty). The Company updated its estimate in the second and third quarters of 2011. Therefore, data related to South Edge is not reflected in the table as of August 31, 2011.

The Company's unconsolidated joint ventures finance land and inventory investments for a project through a variety of arrangements. To finance their respective land acquisition and development activities, certain of the Company's unconsolidated joint ventures have obtained loans from third-party lenders that are secured by the underlying property and related project assets. Of the Company's unconsolidated joint ventures at November 30, 2010, only South Edge had outstanding debt, which was secured by a lien on South Edge's assets, with a principal balance of \$327.9 million. As of August 31, 2011, the principal balance of South Edge's outstanding debt remained at \$327.9 million.

In certain instances, the Company and/or its partner(s) in an unconsolidated joint venture have provided completion and/or carve-out guarantees to the unconsolidated joint venture's lenders. A completion guaranty refers to the physical completion of improvements for a project and/or the obligation to contribute equity to an unconsolidated joint venture to enable it to fund its completion obligations. The Company's potential responsibility under its completion guarantees, if triggered, is highly dependent on the facts of a particular case. A carve-out guaranty refers to the payment of losses a lender suffers due to certain bad acts or omissions by an unconsolidated joint venture or its partners, such as fraud or misappropriation, or due to environmental liabilities arising with respect to the relevant project.

In addition to completion and carve-out guarantees, the Company provided the Springing Guaranty to the Administrative Agent in connection with secured loans made to South Edge that comprise its outstanding debt. By its terms, the Springing Guaranty's obligations arise after the occurrence of an involuntary bankruptcy proceeding or an involuntary bankruptcy petition filed against South Edge that is not dismissed within 60 days or for which an order or decree approving or ordering any such proceeding or petition is entered. On February 3, 2011, a bankruptcy court entered an order for relief on a Chapter 11 involuntary bankruptcy petition (the Petition) filed against South Edge and appointed a Chapter 11 trustee for South Edge. Although the Company believes that there are potential offsets or defenses to prevent or minimize the enforcement of the Springing Guaranty, as a result of the February 3, 2011 order for relief on the Petition, the Company considers it probable that it became responsible to pay certain amounts to the Administrative Agent related to the Springing Guaranty. Therefore, the Company's consolidated financial statements at August 31, 2011 reflect a net payment obligation of \$226.4 million, representing the Company's estimate of the probable amount that it would pay to the Administrative Agent (on behalf of the South Edge lenders) related to the Springing Guaranty and to pay for certain fees, expenses and charges and for certain allowed general unsecured claims in the South Edge bankruptcy case. This estimate is based on the terms of a consensual agreement, effective June 10, 2011, among the Company, KB HOME Nevada Inc., the Administrative Agent, several of the lenders to South Edge, and certain of the other South Edge members and their respective parent companies (together with the Company and KB HOME Nevada Inc., the Participating Members) regarding a proposed consensual plan of reorganization for South Edge (the Plan). As a result of recording its probable net payment obligation at February 28, 2011, and taking into account accruals the Company had previously established with respect to South Edge and factoring in an offset for the estimated fair value of the South Edge land the Company expects to acquire as a result of satisfying the payment obligation, the Company recognized a charge of \$22.8 million in the first quarter of 2011 that was reflected as a loss on loan guaranty in its consolidated statements of operations. This charge was in addition to the joint venture impairment charge of \$53.7 million that the Company recognized in the first quarter of 2011 to write off its investment in South Edge. In the second quarter of 2011, in updating its estimate of its probable net payment obligation to reflect the terms of the consensual agreement effective June 10, 2011 regarding the Plan, the Company recorded an additional loss on loan guaranty of \$14.6 million. The consensual agreement effective June 10, 2011 and

the Plan are discussed further below in Note 15. Legal Matters. The Company's probable net obligation related to South Edge may change if new information subsequently becomes available.

(Unaudited)

10. Investments in Unconsolidated Joint Ventures (continued)

Based on the terms of the Plan, the Company anticipates acquiring approximately 600 developable acres of the land owned by South Edge. Therefore, the Company considers its probable net payment obligation to be partially offset by \$75.2 million, the estimated fair value of its share of the South Edge land at August 31, 2011. The Company calculated this estimated fair value using a present value methodology and assuming that it would develop the land, build and sell homes on most of the land, and sell the remainder of the developed land. This fair value estimate at August 31, 2011 reflected the Company's expectations of the price it would receive for its share of the South Edge land in the land's then-current state in an orderly (not a forced) transaction under then-prevailing market conditions. This fair value estimate also reflected judgments and key assumptions concerning (a) housing market supply and demand conditions, including estimates of average selling prices; (b) estimates of potential future home sales and cancellation rates; (c) anticipated entitlements and development plans for the land; (d) anticipated land development, construction and overhead costs to be incurred; and (e) a risk-free rate of return and an expected risk premium, in each case in relation to an expected 15-year life for the South Edge project.

Among the key assumptions used in the present value methodology was the anticipated appreciation in revenues and costs over the expected life of the South Edge project. For revenues, the Company applied an annual appreciation factor of 5% to the average selling prices for its homes to be delivered at the South Edge project in the current quarter to estimate the average selling prices of homes expected to be sold during the relevant 15-year period. This appreciation factor reflected the following considerations: that average selling prices in the southern Nevada market will increase over the period within a range of long-term historical trends; that average selling prices will rebound from the current depressed levels; that recent negative media coverage of the bankruptcy process and other legal and development matters involving South Edge have depressed selling prices at the South Edge project relative to the Company's experience at communities located near South Edge; that the South Edge project is a premium master planned community in the land-constrained southern Nevada market, factors that are anticipated to increase the average selling prices of homes at the project at a rate greater than other homes in the area over the life of the project; and that the uniqueness of the South Edge project in the southern Nevada market and the size of the Company's share of the South Edge land can be leveraged to effectively manage home sales and pricing strategies to maximize revenues and profits. The following appreciation considerations were applied to costs: a factor of 10% was applied to the cost estimates in the current quarter for the development work expected to be completed over the life of the project, representing the potential cost increases and other uncertainties inherent in estimating development costs; and a factor of 1% was applied to home construction costs for anticipated inflation of such costs, taking into account historical trends and current market conditions. In addition, incremental increases in overhead costs that would be incurred in connection with the sale of each home were assessed as a function of the 5% appreciation factor applied to the average selling prices. These revenue and cost appreciation factors were determined using judgment and assumptions believed to be appropriate based on the information known to the Company at the time. Due to the judgment and assumptions applied in the estimation process with respect to the fair value of the Company's share of the South Edge land at August 31, 2011, including as to the anticipated appreciation in revenues and costs over the life of the South Edge project, it is possible that actual results could differ substantially from those estimated. The Company will continue to review and update as appropriate its fair value estimates of its share of the South Edge land to reflect changes in relevant market conditions and other applicable factors.

The ultimate outcome of the South Edge bankruptcy, including whether the Plan becomes effective, is uncertain. The Company believes, however, that it will realize the value of its share of the South Edge land in the bankruptcy proceeding in accordance with the Plan. If the Plan becomes effective, the Company anticipates that it would (a) acquire its share of the South Edge land as a result of a bankruptcy court-approved disposition of the land to a newly created entity in which the Company would expect to be a part owner, and (b) without further payment, satisfy or assume the respective liens of the Administrative Agent and the South Edge lenders on the land. If, on the other hand, the Plan does not become effective and instead the Company assumes the lenders' lien position through payment

on its Springing Guaranty obligation to the Administrative Agent, the Company would become a secured lender with respect to its share of the South Edge land and would expect to have first claim on the value generated from the land.

10. Investments in Unconsolidated Joint Ventures (continued)

If the Company is not able to realize some or all of the value of its share of the South Edge land, it may be required to recognize an additional expense. Based on the Company's current estimates, this additional expense could range from near zero to potentially as much as \$75 million.

11. Other Assets

Other assets consisted of the following (in thousands):

	August 31, 2011	November 30, 2010
Operating properties (a)	\$	\$ 71,938
Cash surrender value of insurance contracts	59,920	59,103

Senior notes due 2018 at 7 1/4%	298,978	298,893
Total	\$ 1,586,703	\$ 1,775,529

During the nine months ended August 31, 2011, the Company repaid debt that was secured by a multi-level residential building, which the Company sold during the period. As the secured debt was repaid at a discount prior to its scheduled maturity, the Company recognized a gain of \$3.6 million on the early extinguishment of secured debt during the nine months ended August 31, 2011.

The Company repaid \$100.0 million in aggregate principal amount of the \$100 Million Senior Notes upon their August 15, 2011 maturity.

Following its voluntary termination of the Credit Facility effective March 31, 2010, the Company entered into the LOC Facilities with various financial institutions to obtain letters of credit in the ordinary course of operating its business. As of August 31, 2011, \$64.3 million of letters of credit were outstanding under the LOC Facilities. The LOC Facilities require the Company to deposit and maintain cash with the issuing financial institutions as collateral for its letters of credit outstanding. As of August 31, 2011, the amount of cash maintained for the LOC Facilities totaled \$65.0 million and was included in restricted cash on the Company's consolidated balance sheet as of that date. The Company may maintain, revise or, if necessary or desirable, enter into additional or expanded letter of credit facilities with the same or other financial institutions.

The termination of the Credit Facility also released and discharged six of the Company's subsidiaries from guaranteeing obligations with respect to the Company's senior notes (the Released Subsidiaries). Each of the Released Subsidiaries does not guaranty any other indebtedness of the Company. Each Released Subsidiary may be required to again provide a guaranty with respect to the Company's senior notes if it becomes a significant subsidiary, as defined under Rule 1-02(w) of Regulation S-X, or if it is determined to be in the best interests of the Company and the relevant subsidiary. Three of the Company's subsidiaries (the Guarantor Subsidiaries) continue to provide a guaranty with respect to the Company's senior notes.

The indenture governing the Company's senior notes does not contain any financial maintenance covenants. Subject to specified exceptions, the indenture contains certain restrictive covenants that, among other things, limit the Company's ability to incur secured indebtedness, or engage in sale-leaseback transactions involving property or assets above a certain specified value. Unlike the Company's other senior notes, the terms governing the Company's \$265.0 million of 9.1% senior notes due 2017 (the \$265 Million Senior Notes) contain certain limitations related to mergers, consolidations, and sales of assets.

As of August 31, 2011, the Company was in compliance with the applicable terms of its covenants under the Company's senior notes, the indenture, and mortgages and land contracts due to land sellers and other loans. The Company's ability to secure future debt financing may depend in part on its ability to remain in such compliance.

14. Commitments and Contingencies

Commitments and contingencies include typical obligations of homebuilders for the completion of contracts and

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

14. Commitments and Contingencies (continued)

those incurred in the ordinary course of business.

Warranty. The Company provides a limited warranty on all of its homes. The specific terms and conditions of these limited warranties vary depending upon the market in which the Company does business. The Company generally provides a structural warranty of 10 years, a warranty on electrical, heating, cooling, plumbing and other building systems each varying from two to five years based on geographic market and state law, and a warranty of one year for other components of the home. The Company estimates the costs that may be incurred under each limited warranty and records a liability in the amount of such costs at the time the revenue associated with the sale of each home is recognized. Factors that affect the Company's warranty liability include the number of homes delivered, historical and anticipated rates of warranty claims, and cost per claim. The Company's primary assumption in estimating the amounts it accrues for warranty costs is that historical claims experience is a strong indicator of future claims experience. The Company periodically assesses the adequacy of its recorded warranty liabilities, which are included in accrued expenses and other liabilities in the consolidated balance sheets, and adjusts the amounts as necessary based on its assessment. The Company's assessment includes the review of its actual warranty costs incurred to identify trends and changes in its warranty claims experience, and considers the Company's construction quality and customer service initiatives and outside events. While the Company believes the warranty liability reflected in its consolidated balance sheets to be adequate, unanticipated changes in the legal environment, local weather, land or environmental conditions, quality of materials or methods used in the construction of homes, or customer service practices could have a significant impact on its actual warranty costs in the future and such amounts could differ from the Company's current estimates.

The changes in the Company's warranty liability are as follows (in thousands):

	Nine Months Ended August		Three Months Ended August	
	31,		31,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 93,988	\$ 135,749	\$ 82,630	\$ 117,753
Warranties issued	3,236	3,720	1,255	1,783
Payments	(20,483)	(35,210)	(6,012)	(17,958)
Adjustments	(6,242)	(2,329)	(7,374)	352
Balance at end of period	\$ 70,499	\$ 101,930	\$ 70,499	\$ 101,930

The warranty adjustments of approximately \$7.4 million for the three months ended August 31, 2011 that were recorded as reductions to construction and land costs in the consolidated statements of operations, mainly resulted from trends in the Company's overall warranty claims experience on homes previously delivered.

The Company's overall warranty liability of \$70.5 million at August 31, 2011 included \$5.9 million for estimated remaining repair costs associated with 112 homes that have been identified as containing or suspected of containing allegedly defective drywall manufactured in China. These homes are located in Florida and were primarily delivered in 2006 and 2007. The Company's overall warranty liability of \$94.0 million at November 30, 2010 included \$11.3 million for estimated remaining repair costs associated with 296 such identified affected homes. The decrease in the liability for estimated remaining repair costs associated with identified affected homes during the nine months ended August 31, 2011 reflected the lower number of identified affected homes with unresolved repairs at August 31, 2011 compared to November 30, 2010. During the nine months ended August 31, 2011, repairs were resolved on 211 identified affected homes, and the Company identified 27 additional affected homes. For these purposes, the Company considers repairs for identified affected homes to be resolved when all repairs are complete and all repair costs are

fully paid. Repairs for identified affected homes are considered unresolved if repairs are not complete and/or there are repair costs remaining to be paid.

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

14. Commitments and Contingencies (continued)

The drywall used in the construction of the Company's homes is purchased and installed by subcontractors. The Company's subcontractors obtained drywall material from multiple domestic and foreign sources through late 2008. In late 2008, the Company directed its subcontractors to obtain only domestically sourced drywall. The Company has identified homes that contain or may contain allegedly defective drywall manufactured in China primarily by responding to homeowner-initiated warranty claims or customer service questions regarding such material or regarding conditions or items in a home that may be affected by such material. Additionally, in certain communities where there had been a high number of affected homes identified through the warranty/customer service process, the Company proactively undertook community-wide reviews that identified more affected homes. The Company completed all such community-wide reviews at the end of May 2011. The Company's customer service personnel or, in some instances, third-party consultants handle these matters. Because of the testing process required to determine the origin of drywall material obtained before December 2008, the source of drywall for homes that have not been the subject of a customer service/warranty request or community-wide review is unknown. As a result, the Company is unable to readily identify the total number of homes that may contain the allegedly defective drywall material manufactured in China.

While the Company continues to respond to individual warranty/customer service requests as they are made, the number of additional affected homes newly identified each quarter has fallen significantly since the third quarter of 2009 to a nominal amount. Based on the significantly reduced individual warranty/customer service request rate, the completion of its community-wide reviews and the domestic sourcing of drywall material since late 2008, the Company anticipates that it has identified substantially all potentially affected homes and will receive at most only nominal additional claims in future periods.

During the nine months ended August 31, 2011 and 2010, the Company paid \$11.8 million and \$19.4 million, respectively, to repair identified affected homes, and estimated its additional repair costs with respect to the newly identified affected homes to be \$6.3 million and \$19.5 million, respectively. Since first identifying affected homes in 2009, the Company has identified a total of 464 affected homes and has resolved repairs on 352 of those homes through August 31, 2011. As of August 31, 2011, the Company has paid \$38.6 million of the total estimated repair costs of \$44.5 million associated with the identified affected homes.

In assessing its overall warranty liability, the Company evaluates the costs related to identified homes affected by the allegedly defective drywall material and other home warranty-related items on a combined basis. While the Company has considered the repair costs related to the identified affected homes in conjunction with its quarterly assessments of its overall warranty liability since the third quarter of 2009, the Company has experienced favorable trends in its actual warranty costs incurred with respect to other home warranty-related items. These favorable trends reflect the Company's ongoing focus on construction quality and customer service, among other things. Based on its assessments, the Company determined that its overall warranty liability at each reporting date was sufficient with respect to the Company's then-estimated remaining repair costs associated with identified affected homes and its overall warranty obligations on homes delivered. In light of these assessments, the Company did not incur charges in the nine months ended August 31, 2011 or in its 2010 fiscal year with respect to repair costs associated with the identified affected homes. Additionally, based on the trends in the Company's actual warranty costs incurred, the Company's assessment for the quarter ended August 31, 2011 resulted in the recording of warranty adjustments of approximately \$7.4 million as reductions to construction and land costs. The overall warranty liability has decreased since the third quarter of 2009 in part because of the payments the Company has made to resolve repairs on identified affected homes and in part due to the decrease in the number of homes the Company has delivered over the past several years.

Depending on the number of additional affected homes identified, if any, and the actual costs the Company incurs to repair identified affected homes in future periods, including costs to provide affected homeowners with temporary housing, the Company may revise the estimated amount of its liability with respect to this issue, which could result in an increase or decrease in the Company's overall warranty liability.

As of August 31, 2011, the Company has been named as a defendant in 10 lawsuits relating to the allegedly defective drywall material, and it may in the future be subject to other similar litigation or claims that could cause the Company to incur significant costs. Given the preliminary stages of the proceedings, the Company has

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

14. Commitments and Contingencies (continued)

not concluded whether the outcome of any of these lawsuits will be material to its consolidated financial statements. The Company intends to seek and is undertaking efforts, including legal proceedings, to obtain reimbursement from various sources for the costs it has incurred or expects to incur to investigate and complete repairs and to defend itself in litigation associated with this drywall material. At this stage of its efforts, however, the Company has not recorded any amounts for potential recoveries as of August 31, 2011.

Guarantees. In the normal course of its business, the Company issues certain representations, warranties and guarantees related to its home sales and land sales that may be affected by Accounting Standards Codification Topic No. 460, Guarantees. Based on historical evidence, the Company does not believe any potential liability with respect to these representations, warranties or guarantees would be material to its consolidated financial statements.

Insurance. The Company has, and requires the majority of its subcontractors to have, general liability insurance (including construction defect and bodily injury coverage) and workers' compensation insurance. These insurance policies protect the Company against a portion of its risk of loss from claims related to its homebuilding activities, subject to certain self-insured retentions, deductibles and other coverage limits. In Arizona, California, Colorado and Nevada, the Company's general liability insurance takes the form of a wrap-up policy, where eligible subcontractors are enrolled as insureds on each project. The Company self-insures a portion of its overall risk through the use of a captive insurance subsidiary. The Company records expenses and liabilities based on the estimated costs required to cover its self-insured retention and deductible amounts under its insurance policies, and on the estimated costs of potential claims and claim adjustment expenses that are above its coverage limits or that are not covered by its policies. These estimated costs are based on an analysis of the Company's historical claims and include an estimate of construction defect claims incurred but not yet reported. The Company's estimated liabilities for such items were \$95.7 million at both August 31, 2011 and November 30, 2010. These amounts are included in accrued expenses and other liabilities in the Company's consolidated balance sheets. The Company's expenses associated with self-insurance totaled \$2.1 million for the three months ended August 31, 2011 and \$1.6 million for the three months ended August 31, 2010. For the nine months ended August 31, 2011 and 2010, the Company's expenses associated with self-insurance totaled \$6.7 million and \$5.2 million, respectively.

Performance Bonds and Letters of Credit. The Company is often required to obtain performance bonds and letters of credit in support of its obligations to various municipalities and other government agencies in connection with community improvements such as roads, sewers and water, and to support similar development activities by certain of its unconsolidated joint ventures. At August 31, 2011, the Company had \$392.4 million of performance bonds and \$64.3 million of letters of credit outstanding. At November 30, 2010, the Company had \$414.3 million of performance bonds and \$87.5 million of letters of credit outstanding. If any such performance bonds or letters of credit are called, the Company would be obligated to reimburse the issuer of the performance bond or letter of credit. The Company does not believe that a material amount of any currently outstanding performance bonds or letters of credit will be called. Performance bonds do not have stated expiration dates. Rather, the Company is released from the performance bonds as the underlying performance is completed. The expiration dates of some letters of credit coincide with the expected completion dates of the related projects or obligations. Most letters of credit, however, are issued with an initial term of one year and are typically extended on a year-to-year basis until the related performance obligation is completed.

Land Option Contracts. In the ordinary course of its business, the Company enters into land option and other similar contracts to procure rights to land parcels for the construction of homes. At August 31, 2011, the Company had total deposits of \$17.6 million, comprised of \$15.6 million of cash deposits and \$2.0 million of letters of credit, to purchase land having an aggregate purchase price of \$329.8 million. The Company's land option and other similar contracts generally do not contain provisions requiring the Company's specific performance.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

15. Legal Matters*South Edge, LLC Litigation*

On December 9, 2010, certain lenders to South Edge filed the Petition against South Edge in the United States Bankruptcy Court, District of Nevada, titled *JPMorgan Chase Bank, N.A. v. South Edge, LLC (Case No. 10-32968-bam)*. The petitioning lenders were JPMorgan Chase Bank, N.A., Wells Fargo Bank, N.A., and Crédit Agricole Corporate and Investment Bank. KB HOME Nevada Inc., the Company's wholly-owned subsidiary, is a member of South Edge together with unrelated homebuilders and a third-party property development firm.

The Petition alleged that South Edge failed to undertake certain development-related activities and to repay amounts due on secured loans that the petitioning lenders (as part of a lending syndicate) made to South Edge in 2004 and 2007, totaling \$585.0 million in initial aggregate principal amount (the Loans), that the petitioning lenders were undersecured, and that South Edge was generally not paying its debts as they became due. The Loans were used by South Edge to partially finance both the purchase of certain real property located near Las Vegas, Nevada and the development of a residential community on that property. The Loans are secured by the underlying property and related South Edge assets. As of August 31, 2011, the outstanding principal balance of the Loans was \$327.9 million.

The petitioning lenders also filed a motion to appoint a Chapter 11 trustee for South Edge, and asserted that, among other actions, the trustee can enforce alleged obligations of the South Edge members to purchase land parcels from South Edge, which would likely result in repayment of the Loans, or enforce alleged obligations of the South Edge members to make capital contributions to the South Edge bankruptcy estate. On February 3, 2011, the bankruptcy court entered an order for relief on the Petition and appointed a Chapter 11 trustee for South Edge. The Chapter 11 trustee may or may not pursue remedies proposed by the petitioning lenders, including attempted enforcement of alleged obligations of the South Edge members as described above.

As a result of the February 3, 2011 order for relief on the Petition, the Company considers it probable that it became responsible to pay certain amounts to the Administrative Agent related to the Springing Guaranty that the Company provided in connection with the Loans, as discussed further above in Note 10. Investments in Unconsolidated Joint Ventures. Each of KB HOME Nevada Inc., the other members of South Edge and their parent companies provided a similar repayment guaranty to the Administrative Agent.

Effective June 10, 2011, the Company and the other Participating Members of South Edge became parties to a consensual agreement together with the Administrative Agent and several of the lenders to South Edge, as discussed above in Note 10. Investments in Unconsolidated Joint Ventures. The Chapter 11 trustee for South Edge has expressed its consent to the agreement. Each of the parties has agreed to use commercially reasonable efforts to support the Plan, to obtain bankruptcy court approval of a disclosure statement that will accompany the Plan, to obtain bankruptcy court confirmation of the Plan following, and subject to, the bankruptcy court's approval of a disclosure statement, to obtain the requisite support of the South Edge lenders to the Plan, and to consummate the Plan promptly after confirmation, in each case by certain specified dates. Under the agreement, the effective date of the Plan following its confirmation is to occur on or before November 30, 2011, though it may be extended by the Participating Members and the Administrative Agent jointly by up to 30 days, depending on the date of Plan confirmation.

Pursuant to the terms of the Plan, the Company would pay to the South Edge lenders an amount between approximately \$214 million and \$225 million on the effective date of the Plan. The Company has deposited \$21.4 million of this amount in an escrow account, which is reflected as restricted cash in its consolidated balance sheet as of August 31, 2011. The other Participating Members also would pay certain amounts to the South Edge lenders on the effective date of the Plan and have similarly deposited amounts into an escrow account. The exact sum that the Company and the other Participating Members would pay to the South Edge lenders depends on the outcome of proceedings the Chapter 11 trustee for South Edge has commenced against, among others, a South Edge member that is not a Participating Member in order to determine the amount of pledged infrastructure development funds that can be applied to the South Edge debt. In addition to their payments to the South Edge lenders, each of the Company and the other Participating Members would each be responsible for certain fees, expenses and charges and for certain

allowed general unsecured claims, and would

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

15. Legal Matters (continued)

receive the benefit of potential contributions and recoveries that would, in the aggregate, affect their respective costs related to the Plan. Taking all of this into account, the Company estimates that its probable net payment obligation under the terms of the consensual agreement effective June 10, 2011 regarding the Plan is \$226.4 million, though it could possibly be as high as \$240 million.

If the Plan becomes effective, the Company anticipates that it would (a) acquire its share of the land owned by South Edge (amounting to at least approximately 65% of the land and as much as approximately 68%) as a result of a bankruptcy court-approved disposition of the land to a newly created entity in which the Company would expect to be a part owner, and (b) without further payment, satisfy or assume the respective liens of the Administrative Agent and the South Edge lenders on the land. In addition, if the Plan becomes effective, the Company anticipates that all South Edge-related claims, potential guaranty obligations (including the Company's potential Springing Guaranty obligation), and litigation between the Administrative Agent (on behalf of itself and the South Edge lenders) and the Participating Members would be resolved, although lenders holding less than 8% ownership in the Loans made to South Edge that are not currently expected to consent to the Plan and members of South Edge that are not Participating Members may assert certain claims against the Company, which claims the Company would vigorously dispute.

The agreement may be terminated by the Administrative Agent or the Participating Members upon the occurrence of certain specified events, including a failure to meet the specified dates on which the above-described activities in support of the Plan are to occur. On September 8, 2011, the bankruptcy court approved a disclosure statement designed to implement the Plan, and a hearing to confirm the Plan is scheduled for October 17, 2011. As of the date of this report, the Company believes that the other Participating Members, the Administrative Agent and the South Edge lenders that are party to the agreement are able to and will fulfill their respective obligations as contemplated under the Plan if it becomes effective.

The Administrative Agent had previously filed lawsuits in December 2008 against the South Edge members and their respective parent companies (including the Company and KB HOME Nevada Inc.) (*JP Morgan Chase Bank, N.A. v. KB HOME Nevada, et al., U.S. District Court, District of Nevada (Case No. 08-CV-01711 PMP)* and consolidated and related actions) (the Lender Litigation). The Lender Litigation seeks to enforce completion guarantees provided to the Administrative Agent in connection with the Loans, seeks to compel the South Edge members (including KB HOME Nevada Inc.) to purchase land parcels from South Edge, seeks to compel the South Edge members to provide certain financial support to South Edge, and also seeks various damages based on other guarantees and claims. The Lender Litigation has been stayed in light of the South Edge bankruptcy and, as stated above, would be resolved between the Administrative Agent (on behalf of itself and the South Edge lenders consenting to the Plan) and the Participating Members if the Plan becomes effective.

A separate arbitration proceeding was also commenced in May 2009 to address one South Edge member's claims for specific performance by the other members to purchase land parcels from and to make certain capital contributions to South Edge or, in the alternative, damages. On July 6, 2010, the arbitration panel issued a decision denying the specific performance and damages claim asserted on behalf of South Edge, but the panel awarded the claimant damages of \$36.8 million against all of the respondents. Motions to partially vacate the award were denied and judgment was entered on the award, which the respondents have appealed to the United States Courts of Appeal for the Ninth Circuit, titled *Focus South Group, LLC, et al. v. KB HOME Nevada Inc, et al., (Case No. 10-17562)*. The appeal is pending. If the appeals of the arbitration panel's July 6, 2010 decision ultimately are not successful, the Company has estimated that its probable maximum share of the \$36.8 million awarded as damages to the claimant in the arbitration is approximately \$25.5 million. This estimate is based on KB HOME Nevada Inc.'s interest in South Edge in relation to that of the other four respondents in the arbitration and the Company's assumption that liability for the awarded amount would be joint and several among the five respondents. Although the appeal remains pending, the Company has since the third quarter of 2010 segregated an accrual for \$25.5 million for this matter from its previously

established reserve balances relating to South Edge. The ultimate amount of the Company's share, however, could be subject to negotiations and/or potential arbitration among all of the respondents in the arbitration. The accrual for this matter is separate from the accrual the Company established with respect to its probable net payment obligation related to South Edge.

15. Legal Matters (continued)

The ultimate resolution of the South Edge bankruptcy, the Lender Litigation and the appeal of the arbitration panel decision, and the time at which any resolution is reached with respect to each matter, are uncertain and involve multiple factors, including whether the Plan becomes effective, as described above, the actions of the Chapter 11 trustee for South Edge, and court decisions. Further, the ultimate resolution of the South Edge bankruptcy (including with respect to the Company's anticipated net payment obligation related to South Edge), the Lender Litigation and the appeal of the arbitration panel decision could have a material effect on the Company's liquidity, as further discussed below under Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources.

In addition to the specific proceedings described above, the Company is involved in other litigation and regulatory proceedings incidental to its business that are in various procedural stages. The Company believes that the accruals it has recorded for probable and reasonably estimable losses with respect to these proceedings are adequate and that, as of August 31, 2011, it was not reasonably possible that an additional material loss had been incurred in an amount in excess of the estimated amounts already recognized on the Company's consolidated financial statements. The Company evaluates its accruals for litigation and regulatory proceedings at least quarterly and, as appropriate, adjusts them to reflect (i) the facts and circumstances known to the Company at the time, including information regarding negotiations, settlements, rulings and other relevant events and developments; (ii) the advice and analyses of counsel; and (iii) the assumptions and judgment of management. Similar factors and considerations are used in establishing new accruals for proceedings as to which losses have become probable and reasonably estimable at the time an evaluation is made. Based on its experience, the Company believes that the amounts that may be claimed or alleged against it in these proceedings are not a meaningful indicator of its potential liability. The outcome of any of these proceedings, including the defense and other litigation-related costs and expenses the Company may incur, however, is inherently uncertain and could differ significantly from the estimate reflected in a related accrual, if made. Therefore, it is possible that the ultimate outcome of any proceeding, if in excess of a related accrual or if no accrual had been made, could be material to the Company's consolidated financial statements.

16. Stockholders' Equity

At August 31, 2011, the Company was authorized to repurchase 4,000,000 shares of its common stock under a board-approved share repurchase program. The Company did not repurchase any of its common stock under this program in the nine months ended August 31, 2011. The Company has not repurchased common shares pursuant to a common stock repurchase plan for the past several years and any resumption of such stock repurchases will be at the discretion of the Company's board of directors.

During the three months ended February 28, 2011, the Company's board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on February 17, 2011 to stockholders of record on February 3, 2011. During the three months ended May 31, 2011, the Company's board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on May 19, 2011 to stockholders of record on May 5, 2011. During the three months ended August 31, 2011, the Company's board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on August 18, 2011 to stockholders of record on August 4, 2011. A cash dividend of \$.0625 per share of common stock was also declared and paid during each of the three-month periods ended February 28, 2010, May 31, 2010 and August 31, 2010. The declaration and payment of future cash dividends on the Company's common stock are at the discretion of the Company's board of directors, and depend upon, among other things, the Company's expected future earnings, cash flows, capital requirements, debt structure and any adjustments thereto, operational and financial investment strategy and general financial condition, as well as general business conditions.

17. Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2010-06, Improving Disclosures About Fair Value Measurements (ASU 2010-06), which provides

Table of Contents

KB HOME
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

17. Recent Accounting Pronouncements (continued)

amendments to Accounting Standards Codification Subtopic No. 820-10, Fair Value Measurements and Disclosures Overall (ASC 820-10). ASU 2010-06 requires additional disclosures and clarifications of existing disclosures for recurring and nonrecurring fair value measurements. The revised guidance was effective for the Company in the second quarter of 2010, except for the Level 3 activity disclosures, which are effective for fiscal years beginning after December 15, 2010. ASU 2010-06 concerns disclosure only and will not have a material impact on the Company's consolidated financial position or results of operations.

In December 2010, the FASB issued Accounting Standards Update No. 2010-29, Disclosure of Supplementary Pro Forma Information for Business Combinations (ASU 2010-29), which addresses diversity in practice about the interpretation of the pro forma revenue and earnings disclosure requirements for business combinations. The amendments in ASU 2010-29 specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in ASU 2010-29 also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments in ASU 2010-29 are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The Company believes the adoption of this guidance concerns disclosure only and will not have a material impact on its consolidated financial position or results of operations.

In May 2011, the FASB issued Accounting Standards Update No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS (ASU 2011-04), which changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements in order to improve consistency in the application and description of fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). ASU 2011-04 clarifies how the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets and are not relevant when measuring the fair value of financial assets or of liabilities. In addition, the guidance expanded the disclosures for the unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The revised guidance is effective for interim and annual periods beginning after December 15, 2011 and early application by public entities is prohibited. The Company is currently evaluating the potential impact of adopting this guidance on its consolidated financial position and results of operations.

In June 2011, the FASB issued Accounting Standards Update No. 2011-05, Presentation of Comprehensive Income (ASU 2011-05). The amendments in ASU 2011-05 allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in ASU 2011-05 do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU 2011-05 should be applied retrospectively. For public entities, the amendments in ASU 2011-05 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company believes the adoption of this guidance concerns disclosure only and will not have a material impact on its consolidated

financial position or results of operations.

18. Income Taxes

The Company had no income tax benefit or expense for the three months ended August 31, 2011 and an income tax benefit of \$5.3 million for the three months ended August 31, 2010. For the nine months ended August 31, 2011, the Company's income tax expense totaled \$.1 million, compared to an income tax benefit of \$5.0 million for the nine months ended August 31, 2010. Due to the effects of its deferred tax asset valuation allowances, carrybacks of its net operating losses (NOLs), and changes in its unrecognized tax benefits, the Company's effective tax rates for the three-month and nine-month periods ended August 31, 2011 and 2010 are not meaningful items as the Company's income tax amounts are not directly correlated to the amount of its pretax losses for those periods.

In accordance with Accounting Standards Codification Topic No. 740, Income Taxes (ASC 740), the Company evaluates its deferred tax assets quarterly to determine if valuation allowances are required. ASC 740 requires that companies assess whether valuation allowances should be established based on the consideration of all available evidence using a more likely than not standard. During the three months ended August 31, 2011, the Company recorded a valuation allowance of \$2.5 million against net deferred tax assets generated from the loss for the period. During the three months ended August 31, 2010, the Company recorded a net reduction of \$2.4 million to the valuation allowance against net deferred tax assets. The net reduction was comprised of a \$5.4 million federal income tax benefit from the increased carryback of the Company's 2009 net operating loss to offset earnings it generated in 2004 and 2005, partially offset by a \$3.0 million valuation allowance recorded against the net deferred tax assets generated from the loss for the period. For the nine months ended August 31, 2011, the Company recorded valuation allowances of \$73.3 million against the net deferred tax assets generated from losses for the period. For the nine months ended August 31, 2010, the Company recorded a net increase of \$31.6 million to the valuation allowance against net deferred tax assets. The net increase was comprised of a \$37.0 million valuation allowance recorded against the net deferred tax assets generated from the loss for the period, partially offset by the \$5.4 million federal income tax benefit from the increased carryback of the Company's 2009 net operating loss to offset earnings it generated in 2004 and 2005.

The Company's net deferred tax assets totaled \$1.1 million at both August 31, 2011 and November 30, 2010. The deferred tax asset valuation allowance increased to \$844.4 million at August 31, 2011 from \$771.1 million at November 30, 2010. This increase reflected the impact of the \$73.3 million valuation allowance recorded during the nine months ended August 31, 2011.

During the three months ended August 31, 2011, the Company did not have a change to its total gross unrecognized tax benefits. During the nine months ended August 31, 2011, net reductions to the Company's total gross unrecognized tax benefits were \$.3 million. The total amount of unrecognized tax benefits, including interest and penalties, was \$6.6 million as of August 31, 2011. The Company anticipates that total unrecognized tax benefits will decrease by approximately \$2.0 million during the 12 months from this reporting date due to various state filings associated with the resolution of the federal audit.

The benefits of the Company's NOLs, built-in losses and tax credits would be reduced or potentially eliminated if the Company experienced an ownership change under Internal Revenue Code Section 382 (Section 382). Based on the Company's analysis performed as of August 31, 2011, the Company does not believe that it has experienced an ownership change as defined by Section 382, and, therefore, the NOLs, built-in losses and tax credits the Company has generated should not be subject to a Section 382 limitation as of this reporting date.

19. Supplemental Disclosure to Consolidated Statements of Cash Flows

The following are supplemental disclosures to the consolidated statements of cash flows (in thousands):

Increase (decrease) in consolidated inventories not owned	9,596	(37,633)
Acquired property securing note receivable	40,000	

20. Supplemental Guarantor Information

The Company's obligation to pay principal, premium, if any, and interest under its senior notes are guaranteed on a joint and several basis by the Guarantor Subsidiaries. The guarantees are full and unconditional and the Guarantor Subsidiaries are 100% owned by the Company. The Company has determined that separate, full financial statements of the Guarantor Subsidiaries would not be material to investors and therefore only supplemental financial information for the Guarantor Subsidiaries is presented.

In connection with the Company's voluntary termination of the Credit Facility effective March 31, 2010, the Released Subsidiaries were released and discharged from guaranteeing any obligations with respect to the Company's senior notes. Accordingly, the supplemental financial information presented below reflects the relevant subsidiaries that were Guarantor Subsidiaries as of the respective periods then ended.

21. Subsequent Event

On September 20, 2011, the Company filed an automatically effective universal shelf registration statement (the 2011 Shelf Registration) with the SEC. The 2011 Shelf Registration registers the offering of debt and equity securities that the Company may issue from time to time in amounts to be determined.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
Results of Operations**OVERVIEW**

Revenues are generated from our homebuilding operations and our financial services operations. The following table presents a summary of our consolidated results of operations for the nine months and three months ended August 31, 2011 and 2010 (in thousands, except per share amounts):

	Nine Months Ended August		Three Months Ended August	
	2011	31, 2010	2011	31, 2010
Revenues:				
Homebuilding	\$ 829,816	\$ 1,133,846	\$ 364,532	\$ 498,821
Financial services	6,178	5,187	2,784	2,182
Total	\$ 835,994	\$ 1,139,033	\$ 367,316	\$ 501,003
Pretax income (loss):				
Homebuilding	\$ (195,900)	\$ (100,304)	\$ (10,716)	\$ (9,121)
Financial services	3,321	8,494	1,067	2,424

Net loss	\$ (192,679)	\$ (86,810)	\$ (9,649)	\$ (1,397)
Basic and diluted loss per share	\$ (2.50)	\$ (1.13)	\$ (.13)	\$ (.02)

Despite historically high levels of housing affordability and low interest rates for residential consumer mortgage loans, housing market conditions were difficult in the third quarter of 2011, reflecting an oversupply of homes available for sale that has persisted throughout the year and significantly restrained consumer demand for housing. The oversupply of homes available for sale has stemmed largely from a sizeable and generally rising inventory of lender-owned homes that were acquired through foreclosures and short sales, a factor that is expected to continue in the fourth quarter of 2011 and into 2012. Consumer demand was affected by, among other things, turbulent macroeconomic conditions and the inability of policymakers to effectively respond to such conditions, a generally weak and uncertain employment environment, low confidence levels, tight residential consumer mortgage lending standards and reduced credit availability for residential consumer mortgage loans. Compounding the negative supply and demand environment in the third quarter was intense competition for home sales among homebuilders and sellers of resale and foreclosed homes. While select markets for new homes are showing signs of stability, we do not anticipate a full housing recovery without broad, sustainable employment growth and increased consumer confidence. In adapting our business to navigate through the challenges of the general downturn in the U.S. housing market that began in 2006, we have focused on the following three primary integrated strategic goals: achieve profitability at the scale of prevailing market conditions; generate cash and maintain a strong balance sheet; and position our business to capitalize on future growth opportunities. In pursuit of these goals, we have in recent years and throughout the first three quarters of 2011 continued to execute on our KBnxt operational business model; improved and refined our product offerings to compete with resale homes and to meet the affordability demands and sustainability concerns of our core customers—first-time, move-up and active adult homebuyers; aligned our overhead to prevailing market activity levels through a dedicated effort to control costs while maintaining a solid growth platform; improved our

operating efficiencies; made opportunistic investments in our business; and acquired attractively priced new land interests meeting our investment standards in desirable markets with perceived strong growth prospects, primarily in California and Texas. We expect to continue to execute on these initiatives during the fourth quarter of 2011.

Although we posted a net loss for the third quarter of 2011, we continued to make progress on our primary strategic goals and achieved encouraging operational and financial results. We narrowed our net loss substantially from the second quarter of 2011 and generated sequential improvement in certain key financial metrics, including our housing gross margin and our selling, general and administrative expenses as a percentage of housing revenues. In the 2011 third quarter, the number of homes we delivered, our revenues and our margins

Table of Contents

decreased on a year-over-year basis, reflecting prevailing market conditions and strategic actions we have taken in earlier periods to align our operations with those conditions. However, we succeeded in substantially reducing our selling, general and administrative expenses and increasing our net orders and backlog in the 2011 third quarter compared to the year-earlier quarter. In addition, we made investments in land and land development to support future growth in our new home communities, deliveries and revenues. As in previous quarters in 2011, the majority of our investments in land and land development were made in California and Texas, and we expect to continue to target most of our inventory-related investments in those states in the fourth quarter and into 2012. While the scope and timing of a sustained housing market recovery remains uncertain, we believe that our focus on growing our new home communities in relatively healthy housing markets and on executing on initiatives that support our three primary goals will help position us operationally and financially to support our current business operations and to take advantage of future opportunities in housing markets as they arise.

Our total revenues of \$367.3 million for the three months ended August 31, 2011 decreased 27% from \$501.0 million for the three months ended August 31, 2010, mainly due to lower housing revenues. Housing revenues declined 27% to \$364.4 million in the third quarter of 2011 from \$496.9 million in the year-earlier quarter, reflecting a 31% decrease in the number of homes delivered, which was partly offset by a 6% increase in the average selling price. We use the term "home" in this discussion and analysis to refer to a single-family residence, whether it is a single-family home or other type of residential property. We delivered 1,603 homes in the third quarter of 2011 at an average selling price of \$227,400, compared with 2,320 homes delivered at an average selling price of \$214,200 in the year-earlier quarter.

We delivered fewer homes in the third quarter of 2011 as compared to the year-earlier quarter, primarily due to our relatively low backlog level at the beginning of the quarter. At the start of our 2011 third quarter, the number of homes in our backlog was down 24% from the previous year, reflecting the year-over-year decline in net orders we experienced in the first two quarters of 2011 due to generally weak housing market conditions and to the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit. To a lesser extent, the number of homes in our backlog at the beginning of the 2011 third quarter was also negatively affected by the strategic community count reductions we made in select markets in prior periods to align our operations with prevailing housing market activity. In light of our more recent investments in land and land development to support future growth, we anticipate continuing to gradually increase the number of new home communities in the fourth quarter and into 2012, as further discussed below under "Outlook."

Our average selling price for the three months ended August 31, 2011 increased relative to the year-earlier period, primarily due to a change in the proportion of homes delivered from higher-priced communities and a shift in product mix. The year-over-year increase in our average selling price in the three months ended August 31, 2011 reflected increases of 6%, 3% and 15% in our Southwest, Central and Southeast homebuilding reporting segments, respectively, partly offset by a decrease of 5% in our West Coast homebuilding reporting segment.

Included in our total revenues were financial services revenues of \$2.8 million in the third quarter of 2011 and \$2.2 million in the third quarter of 2010. The increase in financial services revenues in the three months ended August 31, 2011 compared to the year-earlier period reflected revenues associated with our marketing services agreement with MetLife Home Loans, which became effective in the third quarter of 2011, and higher title services revenues. The revenues associated with our marketing services agreement represent the fair market value of the services we provided in connection with the agreement.

We posted a net loss of \$9.6 million, or \$.13 per diluted share, for the three months ended August 31, 2011, compared to a net loss of \$1.4 million, or \$.02 per diluted share, for the corresponding period of 2010. Our 2011 third quarter net loss included pretax, noncash charges of \$1.2 million for inventory impairments and land option contract abandonments, compared to \$3.4 million of similar charges in the year-earlier quarter. Our third quarter net loss improved substantially from the net loss of \$68.5 million, or \$.89 per diluted share, reported in the second quarter of 2011.

Our homebuilding operations posted operating income of \$1.4 million for the three months ended August 31, 2011 and \$8.4 million for the three months ended August 31, 2010. The year-over-year decrease in homebuilding operating income reflected lower gross profits, which were partly offset by lower selling, general and administrative expenses.

Table of Contents

The decrease in gross profits in the third quarter of 2011 from the year-earlier quarter resulted from fewer homes delivered and a lower housing gross margin. Our housing gross margin decreased to 16.9% in the third quarter of 2011 from 17.5% in the year-earlier quarter. Our 2011 third quarter housing gross margin included \$7.4 million of favorable warranty adjustments that resulted from trends in our overall warranty claims experience on homes previously delivered, which were partly offset by \$1.2 million of inventory impairment and land option contract abandonment charges. In the year-earlier quarter, the housing gross margin included \$3.4 million of such charges. Our housing gross margin, excluding inventory impairment and land option contract abandonment charges, was 17.2% in the third quarter of 2011, compared to 18.2% in the year-earlier quarter. The year-over-year decrease in our housing gross margin, excluding inventory impairment and land option contract abandonment charges, was largely the result of reduced leverage from a lower volume of homes delivered and a shift in product mix, partly offset by the warranty adjustments. However, our 2011 third quarter housing gross margin, excluding inventory impairment and land option contract abandonment charges, continued to improve on a sequential basis, up from 13.4% and 14.9% in the first and second quarters of 2011, respectively.

Our selling, general and administrative expenses of \$60.2 million for the three months ended August 31, 2011 decreased by \$18.4 million, or 23%, from \$78.6 million for the year-earlier period, reflecting our ongoing efforts to streamline our organizational structure and reduce overhead costs while maintaining a solid growth platform, the recovery of legal expenses from insurance carriers, and fewer homes delivered. As a percentage of housing revenues, selling, general and administrative expenses of 16.5% for the three months ended August 31, 2011 improved on a sequential basis from 25.4% in the first quarter and 23.2% in the second quarter of 2011. In the third quarter of 2010, this ratio was 15.8%.

Total revenues for the nine months ended August 31, 2011 were \$836.0 million, down 27% from \$1.14 billion for the year-earlier period. Included in our total revenues were financial services revenues of \$6.2 million for the first nine months of 2011 and \$5.2 million for the year-earlier period. Our net loss for the nine months ended August 31, 2011 totaled \$192.7 million, or \$2.50 per diluted share, including pretax, noncash charges of \$23.5 million for inventory impairments and land option contract abandonments. Our net loss for the nine months ended August 31, 2011 also included a pretax, noncash joint venture impairment charge of \$53.7 million and a loss on loan guaranty of \$37.3 million, both related to our investment in South Edge. For the nine months ended August 31, 2010, we incurred a net loss of \$86.8 million, or \$1.13 per diluted share, including pretax, noncash charges of \$16.7 million for inventory impairments and land option contract abandonments.

We ended the 2011 third quarter with a total of \$590.6 million of cash and cash equivalents and restricted cash, of which \$113.2 million was restricted. Our debt balance of \$1.59 billion at August 31, 2011 decreased from \$1.78 billion at November 30, 2010 due to the repayment of \$100.0 million in aggregate principal amount of our \$100 Million Senior Notes upon their August 15, 2011 maturity, and the repayment of secured debt. Our ratio of debt to total capital was 78.6% at August 31, 2011 and 73.8% at November 30, 2010. Our ratio of net debt to total capital, which reflects our cash position, was 69.8% at August 31, 2011, compared to 54.5% at November 30, 2010.

Our total backlog at August 31, 2011 was comprised of 2,657 homes, representing projected future housing revenues of approximately \$559.3 million, compared to a backlog at August 31, 2010 of 2,169 homes, representing projected future housing revenues of approximately \$455.3 million. The number of homes in our backlog increased 22% year over year, reflecting an increase in our net orders in the third quarter of 2011 relative to the year-earlier quarter. Net orders from our homebuilding operations increased 40% to 1,838 in the third quarter of 2011 from 1,314 in the third quarter of 2010. Net orders rose in each of our homebuilding reporting segments, with increases ranging from 22% in our Central homebuilding reporting segment to 73% in our West Coast homebuilding reporting segment. The favorable year-over-year net order comparisons in the third quarter of 2011 partly reflected activity from recently opened communities as well as depressed net orders in the year-earlier period stemming from the impact of the April 30, 2010 expiration of the federal homebuyer tax credit. Reflecting the land and land development investments we have made since 2009 to maintain a solid growth platform, we opened over 60 new home communities in the first half of 2011 and an additional 33 communities in the third quarter of 2011. Given construction cycle times, we anticipate delivering homes and realizing revenues from the net orders generated in these newly opened communities in the coming quarters. Our cancellation rate as a percentage of gross orders was 29% in the third quarter of 2011 and

33% in the third quarter of 2010.

Table of Contents**HOMEBUILDING**

The following table presents a summary of certain financial and operational data for our homebuilding operations (dollars in thousands, except average selling price):

	Nine Months Ended August		Three Months Ended August	
	2011	31, 2010	2011	31, 2010

--	--------	-------	-----	------

We have grouped our homebuilding activities into four reporting segments, which we identify in this report as West Coast, Southwest, Central and Southeast. As of August 31, 2011, our homebuilding reporting segments consisted of ongoing operations located in the following states: West Coast California; Southwest Arizona and Nevada; Central Colorado and Texas; and Southeast Florida, Maryland, North Carolina and Virginia. The following tables present homes delivered, net orders and cancellation rates (based on gross orders) by reporting segment and with respect to our unconsolidated joint ventures for the three-month and nine-month periods ended August 31, 2011 and 2010, and our ending backlog at August 31, 2011 and 2010:

Segment	Three Months Ended August 31,					
	Homes Delivered		Net Orders		Cancellation Rates

Unconsolidated joint ventures		20	\$	\$ 7,480

Revenues. Homebuilding revenues totaled \$364.5 million for the third quarter of 2011, decreasing by \$134.3 million, or 27%, from \$498.8 million for the third quarter of 2010 due to declines in housing and land sale revenues. Housing revenues of \$364.4 million for the three months ended August 31, 2011 decreased by \$132.5 million, or 27%, from \$496.9 million for the year-earlier period, reflecting a 31% decrease in the number of homes delivered, partially offset by a 6% increase in the average selling price. We delivered 1,603 homes in the three months ended August 31, 2011, down from 2,320 homes delivered in the year-earlier period. The decrease in homes delivered was partly due to our relatively low backlog level at the beginning of our 2011 third quarter, which was down 24% on a year-over-year basis. The lower beginning backlog reflected softness in net orders in the first and second quarters of 2011 as a result of generally weak housing market conditions, the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit, and the strategic

community count reductions we made in select markets in prior periods to align our operations with prevailing housing market activity.

Our overall average selling price of \$227,400 for the three months ended August 31, 2011 increased from \$214,200 for the three months ended August 31, 2010, primarily due to changes in the proportion of homes delivered from higher-priced communities and a shift in product mix. The increase reflected higher average selling prices in three of our four homebuilding reporting segments. Year over year, average selling prices for the three months ended August 31, 2011 increased 6% in our Southwest homebuilding reporting segment, 3% in our Central homebuilding reporting segment and 15% in our Southeast homebuilding reporting segment. In our West Coast homebuilding reporting segment, the average selling price for the three months ended August 31, 2011 decreased 5% from the three months ended August 31, 2010.

Homebuilding revenues of \$829.8 million for the nine months ended August 31, 2011 decreased by \$304.0 million, or 27%, from \$1.13 billion for the year-earlier period, reflecting lower housing and land sale revenues. Housing revenues for the nine months ended August 31, 2011 totaled \$829.7 million, down 27% from \$1.13 billion for the corresponding period of 2010, due to a 30% decrease in the number of homes delivered, partly offset by a 4% increase in the average selling price. We delivered 3,817 homes in the nine months ended August 31, 2011, down from 5,428 homes delivered in the year-earlier period. The year-over-year decrease in the number of homes delivered reflected the lower backlog levels at the beginning of 2011 as

Table of Contents

compared to the year-earlier period for the reasons described above with respect to the third quarter of 2011. Our average selling price for the nine months ended August 31, 2011 increased to \$217,400 from \$208,100 for the nine months ended August 31, 2010. The year-over-year increase in the average selling price primarily reflected changes in the proportion of homes delivered from higher-priced communities and a shift in product mix.

For the three months ended August 31, 2011, land sale revenues totaled \$.1 million, compared to land sale revenues of \$1.9 million for the three months ended August 31, 2010. For the nine months ended August 31, 2011, revenues from land sales totaled \$.2 million, compared to \$4.4 million for the corresponding period of 2010. Generally, land sale revenues fluctuate with our decisions to maintain or decrease our land ownership position in certain markets based upon the volume of our holdings, our marketing strategy, the strength and number of competing developers entering particular markets at given points in time, the availability of land in markets we serve and prevailing market conditions.

Operating Income (Loss). Our homebuilding business generated operating income of \$1.4 million for the three months ended August 31, 2011 and \$8.4 million for the three months ended August 31, 2010. Within our homebuilding operations, the year-over-year decline in operating income for the three months ended August 31, 2011 reflected lower gross profits compared to the year-earlier quarter, partly offset by reduced selling, general and administrative expenses. The decrease in gross profits for the three months ended August 31, 2011 resulted from fewer homes delivered and a lower housing gross margin.

Our housing gross margin decreased by .6 percentage points to 16.9% in the third quarter of 2011 from 17.5% in the year-earlier quarter. The housing gross margin for the third quarter of 2011 included \$7.4 million of favorable warranty adjustments resulting from trends in our overall warranty claims experience on homes previously delivered, which were partly offset by \$1.2 million of inventory impairment and land option contract abandonment charges. In the year-earlier quarter, we had \$3.4 million of inventory impairment and land option contract abandonment charges. Our housing gross margin, excluding inventory impairment and land option contract abandonment charges, was 17.2% in the third quarter of 2011 and 18.2% in the third quarter of 2010. The year-over-year decrease in our housing gross margin, excluding inventory impairment and land option contract abandonment charges, was largely the result of reduced leverage from the lower volume of homes delivered and a shift in product mix, partly offset by the warranty adjustments. On a sequential basis, our 2011 third quarter housing gross margin, excluding inventory impairment and land option contract abandonment charges, continued to improve, up from 13.4% and 14.9% in the first and second quarters of 2011, respectively.

Our land sales generated break-even results in the three-month periods ended August 31, 2011 and 2010.

Selling, general and administrative expenses totaled \$60.2 million in the three months ended August 31, 2011, decreasing by \$18.4 million, or 23%, from \$78.6 million in the year-earlier period. The year-over-year decrease was mainly due to our ongoing efforts to streamline our organizational structure and reduce overhead costs while maintaining a solid growth platform, the recovery of legal expenses from insurance carriers, and fewer homes delivered. As a percentage of housing revenues, selling, general and administrative expenses were 16.5%, improving on a sequential basis from 25.4% in the first quarter and 23.2% in the second quarter of 2011. In the three months ended August 31, 2010, this ratio was 15.8%.

Our homebuilding business posted operating losses of \$103.9 million for the nine months ended August 31, 2011 and \$45.1 million for the nine months ended August 31, 2010, due to losses from housing operations. Within our homebuilding operations, our operating loss for the first nine months of 2011 increased by \$58.8 million from the year-earlier period due to higher pretax, noncash inventory impairment and land option contract abandonment charges, lower gross profits compared to the year-earlier period and a \$37.3 million loss on loan guaranty. The decrease in gross profits for the nine months ended August 31, 2011 reflected fewer homes delivered and a lower housing gross margin. The loss on loan guaranty resulted from recording our estimate of our probable net payment obligation related to the Springing Guaranty during the first quarter of 2011 and updating this estimate in the second quarter of 2011 to reflect the terms of the consensual agreement effective June 10, 2011 regarding the Plan. The \$37.3 million loss on loan guaranty was in addition to the pretax, noncash joint venture impairment charge we recognized in the first quarter of 2011 to write off our remaining investment in South Edge.

Table of Contents

In the first nine months of 2011, our housing gross margin decreased by 4.0 percentage points to 12.7% from 16.7% in the year-earlier period. For the nine months ended August 31, 2011, our housing gross margin included \$23.5 million of inventory impairments and land option contract abandonments, which were partly offset by \$6.2 million of favorable net warranty adjustments, largely due to the \$7.4 million of favorable warranty adjustments recorded in the 2011 third quarter. For the nine months ended August 31, 2010, our housing gross margin included inventory impairments and land option contract abandonments of \$16.7 million. Our housing gross margin, excluding inventory impairment and land option contract abandonment charges, was 15.6% in the nine months ended August 31, 2011 and 18.2% in the nine months ended August 31, 2010. The year-over-year decrease in our housing gross margin, excluding inventory impairment and land option contract abandonment charges, reflected the same factors described above for the 2011 third quarter.

Selling, general and administrative expenses decreased by \$61.5 million, or 26%, to \$172.3 million in the nine months ended August 31, 2011 from \$233.8 million in the corresponding period of 2010 primarily due to our ongoing efforts to streamline our organizational structure and reduce overhead costs while maintaining a solid growth platform, the recovery of legal expenses from insurance carriers and fewer homes delivered. As a percentage of housing revenues, selling, general and administrative expenses of 20.8% in the first nine months of 2011 were nearly flat with the 20.7% posted in the year-earlier period.

Our land sales generated break-even results in the nine months ended August 31, 2011 and 2010.

Interest Income. Interest income, which is generated from short-term investments and mortgages receivable, totaled \$.1 million for the three months ended August 31, 2011 and \$.6 million for the year-earlier period. For the nine months ended August 31, 2011, interest income totaled \$.8 million compared to \$1.6 million for the corresponding period of 2010. Generally, increases and decreases in interest income are attributable to changes in the interest-bearing average balances of short-term investments and mortgages receivable, as well as fluctuations in interest rates.

Interest Expense. Interest expense results principally from borrowings to finance land purchases, housing inventory and other operating and capital needs. Our interest expense, net of amounts capitalized, totaled \$12.3 million for the three months ended August 31, 2011 and \$16.2 million for the three months ended August 31, 2010. For the nine months ended August 31, 2011 and 2010, our interest expense, net of amounts capitalized, totaled \$36.9 million and \$52.1 million, respectively. Interest expense for the nine months ended August 31, 2011 included a \$3.6 million gain on the early extinguishment of secured debt. Interest expense for the nine months ended August 31, 2010 included \$1.8 million of debt issuance costs written off in connection with our voluntary reduction of the aggregate commitment under the Credit Facility from \$650.0 million to \$200.0 million and the subsequent voluntary termination of the Credit Facility. The percentage of interest capitalized rose to 58% in the three months ended August 31, 2011 from 46% in the year-earlier period. For the nine months ended August 31, 2011, the percentage of interest capitalized increased to 54% from 44% for the year-earlier period. The year-over-year increases in the percentage of interest capitalized in the three-month and nine-month periods of 2011 were due to an increase in the amount of inventory qualifying for interest capitalization. Gross interest incurred decreased to \$29.1 million for the three months ended August 31, 2011 from \$30.0 million for the year-earlier period. For the nine months ended August 31, 2011, gross interest incurred decreased to \$84.5 million from \$91.9 million in the corresponding period of 2010 as a result of a lower average debt level in 2011 and the \$3.6 million gain on the early extinguishment of secured debt included in 2011, compared to the write-off of \$1.8 million of debt issuance costs included in 2010.

Equity in Income (Loss) of Unconsolidated Joint Ventures. Our equity in income of unconsolidated joint ventures was \$.1 million for the three months ended August 31, 2011, compared to equity in loss of unconsolidated joint ventures of \$2.0 million for the three months ended August 31, 2010. Our unconsolidated joint ventures delivered no homes in the three months ended August 31, 2011 and 24 homes in the year-earlier period. Our unconsolidated joint ventures posted no combined revenues in the third quarter of 2011 compared to \$10.4 million in the year-earlier quarter. Our unconsolidated joint ventures generated combined income of \$.1 million in the third quarter of 2011 and combined losses of \$4.2 million in the third quarter of 2010.

For the nine months ended August 31, 2011, our equity in loss of unconsolidated joint ventures increased to \$55.9 million from \$4.7 million for the nine months ended August 31, 2010. The increased loss in the nine months ended August 31, 2011 was primarily due to our recognition of a pretax, noncash charge of \$53.7 million to write off

our remaining investment in South Edge based on the February 3, 2011 court decision discussed below under Off-Balance Sheet Arrangements, Contractual Obligations and Commercial

Table of Contents

Commitments and Part II Item 1. Legal Proceedings. Given the court decision, we wrote off our investment in South Edge as the joint venture was no longer able to perform its activities as originally intended.

Activities performed by our unconsolidated joint ventures generally include acquiring, developing and selling land, and, in some cases, constructing and delivering homes. Our unconsolidated joint ventures delivered one home in the first nine months of 2011 and 79 homes in the first nine months of 2010. Our unconsolidated joint ventures posted combined revenues of \$.2 million for the nine months ended August 31, 2011 compared to \$110.5 million for the same period of 2010. The year-over-year decrease in unconsolidated joint venture revenues in 2011 was primarily due to the sale of land by an unconsolidated joint venture in our Southeast homebuilding reporting segment in 2010. Our unconsolidated joint ventures generated combined losses of \$4.5 million for the nine months ended August 31, 2011 and \$13.7 million for the corresponding period of 2010.

NON-GAAP FINANCIAL MEASURES

This report contains information about our housing gross margin, excluding inventory impairment and land option contract abandonment charges, and our ratio of net debt to total capital, both of which are not calculated in accordance with GAAP. We believe these non-GAAP financial measures are relevant and useful to investors in understanding our operations and the leverage employed in our operations, and may be helpful in comparing us with other companies in the homebuilding industry to the extent they provide similar information. However, because the housing gross margin, excluding inventory impairment and land option contract abandonment charges, and the ratio of net debt to total capital are not calculated in accordance with GAAP, these financial measures may not be completely comparable to other companies in the homebuilding industry and, thus, should not be considered in isolation or as an alternative to operating performance measures prescribed by GAAP. Rather, these non-GAAP financial measures should be used to supplement their respective most directly comparable GAAP financial measures in order to provide a greater understanding of the factors and trends affecting our operations.

Housing Gross Margin, Excluding Inventory Impairment and Land Option Contract Abandonment Charges. The following table reconciles our housing gross margin calculated in accordance with GAAP to the non-GAAP financial measure of our housing gross margin, excluding inventory impairment and land option contract abandonment charges (dollars in thousands):

	Nine Months Ended August		Three Months Ended August	
	2011	31, 2010	2011	31, 2010
Housing revenues	\$ 829,663	\$ 1,129,477	\$ 364,457	\$ 496,898
Housing construction and land costs	(723,886)	(940,840)	(302,834)	(409,890)
Housing gross margin	105,777	188,637	61,623	87,008
Add: Inventory impairment and land option contract abandonment charges	23,456	16,739	1,162	3,377
Housing gross margin, excluding inventory impairment and land option contract abandonment charges	\$ 129,233	\$ 205,376	\$ 62,785	\$ 90,385
Housing gross margin as a percentage of housing revenues	12.7%	16.7%	16.9%	17.5%
Housing gross margin, excluding inventory impairment and land option contract	15.6%	18.2%	17.2%	18.2%

abandonment charges, as a percentage of
housing revenues

Housing gross margin, excluding inventory impairment and land option contract abandonment charges, is a non-GAAP financial measure, which we calculate by dividing housing revenues less housing construction and land costs before pretax, noncash inventory impairment and land option contract abandonment charges associated with housing operations recorded during a given period, by housing revenues. The most directly comparable GAAP financial measure is housing gross margin. We believe housing gross margin, excluding inventory impairment and land option contract abandonment charges, is a relevant and useful financial measure to investors

Table of Contents

in evaluating our performance as it measures the gross profit we generated specifically on the homes delivered during a given period and enhances the comparability of housing gross margin between periods. This financial measure assists us in making strategic decisions regarding product mix, product pricing and construction pace. We also believe investors will find housing gross margin, excluding inventory impairment and land option contract abandonment charges, relevant and useful because it represents a profitability measure that may be compared to a prior period without regard to variability of charges for inventory impairments or land option contract abandonments.

Ratio of Net Debt to Total Capital. The following table reconciles our ratio of debt to total capital calculated in accordance with GAAP to the non-GAAP financial measure of our ratio of net debt to total capital (dollars in thousands):

	August 31, 2011	November 30, 2010
Mortgages and notes payable	\$ 1,586,703	\$ 1,775,529
Stockholders' equity	431,967	631,878
 Total capital	 \$ 2,018,670	 \$ 2,407,407
 Ratio of debt to total capital	 78.6%	 73.8%
 Mortgages and notes payable	 \$ 1,586,703	 \$ 1,775,529
Less: Cash and cash equivalents and restricted cash	(590,592)	(1,019,878)
Net debt	996,111	755,651
Stockholders' equity	431,967	631,878
 Total capital	 \$ 1,428,078	 \$ 1,387,529
 Ratio of net debt to total capital	 69.8%	 54.5%

The ratio of net debt to total capital is a non-GAAP financial measure, which we calculate by dividing mortgages and notes payable, net of homebuilding cash and cash equivalents and restricted cash, by total capital (mortgages and notes payable, net of homebuilding cash and cash equivalents and restricted cash, plus stockholders' equity). The most directly comparable GAAP financial measure is the ratio of debt to total capital. We believe the ratio of net debt to total capital is a relevant and useful financial measure to investors in understanding the leverage employed in our operations and as an indicator of our ability to obtain external financing.

HOMEBUILDING SEGMENTS

The following table presents financial information related to our homebuilding reporting segments for the periods indicated (in thousands):

West Coast. Our West Coast homebuilding reporting segment generated total revenues of \$175.4 million for the three months ended August 31, 2011, down 17% from \$211.3 million for the year-earlier period, with revenues in both periods generated entirely from housing operations. Housing revenues for the third quarter of 2011 decreased from the year-earlier quarter due to a 13% decrease in homes delivered and a 5% decline in the average selling price. This segment delivered 524 homes in the three months ended August 31, 2011, down from 600 homes delivered in the year-earlier period, primarily due to this segment having 21% fewer homes in backlog at the beginning of the 2011 third quarter, on a year-over-year basis. The year-over-year decrease in backlog was due to lower net orders in the first two quarters of 2011, reflecting the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit. The average selling price

decreased to \$334,800 in the third quarter of 2011 from \$352,200 in the third quarter of 2010, primarily due to a change in product mix.

This segment posted pretax income of \$3.3 million for the three months ended August 31, 2011 and \$15.0 million for the three months ended August 31, 2010. Pretax income declined in the third quarter of 2011 compared to the year-earlier quarter due to a decrease in gross profits and an increase in selling, general and administrative expenses. The gross margin decreased to 17.5% in the third quarter of 2011 from 19.0% in the year-earlier quarter, primarily due to a shift in product mix and reduced leverage from the lower volume of homes delivered, which were partly offset by favorable warranty adjustments. Pretax, noncash charges for inventory impairments totaled \$.3 million in the third quarter of 2011, compared to pretax, noncash charges for inventory impairments and land option contract abandonments of \$2.1 million in the year-earlier quarter. Selling, general and administrative expenses increased by \$1.7 million, or 9%, to \$19.5 million in the third quarter of 2011 from \$17.8 million in the corresponding quarter of 2010, primarily due to increased advertising expenses associated with new home community openings.

For the nine months ended August 31, 2011, revenues from our West Coast homebuilding reporting segment totaled \$354.3 million, down from \$483.4 million for the year-earlier period. The revenues for the first nine

Table of Contents

months of both 2011 and 2010 were generated entirely from housing operations. For the nine months ended August 31, 2011, housing revenues declined 27% from the year-earlier period due to a 24% decrease in homes delivered and a 4% decline in the average selling price. Homes delivered decreased to 1,101 in the nine months ended August 31, 2011 from 1,440 in the nine months ended August 31, 2010, reflecting lower backlog levels at the beginning of each quarter of 2011. The average selling price declined to \$321,800 in the first nine months of 2011 from \$335,700 in the year-earlier period for the reasons described above with respect to the three-month period ended August 31, 2011.

Pretax income from this segment totaled \$9.9 million for the nine months ended August 31, 2011 and \$31.1 million for the nine months ended August 31, 2010. The year-over-year decrease in pretax income was primarily due to lower gross profits, partly offset by decreases in selling, general and administrative expenses. The gross margin decreased to 17.5% in the first nine months of 2011 from 21.6% in the year-earlier period for the reasons described above with respect to the three-month period ended August 31, 2011. Pretax, noncash charges for inventory impairments and land option contract abandonments were \$1.8 million in the nine months ended August 31, 2011 and \$3.3 million in the year-earlier period. Selling, general and administrative expenses decreased by \$15.5 million, or 31%, to \$35.1 million in the first nine months of 2011 from \$50.6 million in the first nine months of 2010, largely due to a gain on the sale of a multi-level residential building we operated as a rental property and our efforts to reduce overhead costs.

Southwest. Total revenues from our Southwest homebuilding reporting segment decreased 29% to \$39.5 million for the three months ended August 31, 2011 from \$55.9 million for the year-earlier period, due to lower housing and land sale revenues. All of the revenues for the three months ended August 31, 2011 were generated entirely from housing operations. Housing revenues for the 2011 third quarter decreased 27% to \$39.5 million from \$54.0 million for the year-earlier quarter due to a 31% decrease in the number of homes delivered, partly offset by a 6% increase in the average selling price. We delivered 232 homes at an average selling price of \$170,200 in the third quarter of 2011 compared to 337 homes delivered at an average selling price of \$160,200 in the year-earlier quarter. The year-over-year decrease in the number of homes delivered was largely due to this segment having 26% fewer homes in backlog at the start of the 2011 third quarter compared to the start of the 2010 third quarter, which reflected lower net orders driven by weak housing market conditions and a highly competitive environment in the first two quarters of 2011. The increase in the average selling price reflected a shift in product mix. This segment generated no land sale revenues for the third quarter of 2011 and \$1.9 million of land sale revenues for the year-earlier quarter.

This segment posted pretax income of \$3.2 million for the three months ended August 31, 2011, compared to a pretax loss of \$1.8 million for the three months ended August 31, 2010. The pretax results for the third quarter of 2011 improved compared to the year-earlier quarter primarily due to a reduction in selling, general and administrative expenses. The gross margin decreased to 25.0% in the third quarter of 2011 from 26.4% in the third quarter of 2010, reflecting reduced leverage from the lower number of homes delivered, which was partly offset by favorable warranty adjustments. Selling, general and administrative expenses decreased by \$5.5 million, or 44%, to \$7.1 million in the three months ended August 31, 2011 from \$12.6 million in the year-earlier quarter, mainly due to overhead cost reductions, and a lower volume of homes delivered in this segment.

For the nine months ended August 31, 2011, total revenues from our Southwest homebuilding reporting segment decreased 39% to \$91.4 million from \$149.4 million for the year-earlier period, reflecting lower housing and land sale revenues. Housing revenues decreased 37% to \$91.4 million from \$145.5 million for the year-earlier period due to a 37% decrease in the number of homes delivered. We delivered 573 homes in the nine months ended August 31, 2011 compared to 912 homes delivered in the year-earlier period with the decrease in homes delivered reflecting lower backlog levels at the beginning of each quarter of 2011. The average selling price of \$159,500 in the first nine months of 2011 remained flat with the year-earlier period. This segment posted no land sale revenues for the first nine months of 2011 compared to \$3.9 million of land sale revenues for the year-earlier period.

Pretax losses from this segment totaled \$113.6 million for the nine months ended August 31, 2011 and \$11.8 million for the corresponding period of 2010. The pretax loss increased for the first nine months of 2011 compared to the year-earlier period largely due to the \$53.7 million noncash joint venture impairment charge we incurred in writing off our investment in South Edge and the \$37.3 million loss on loan guaranty also related to South Edge. The gross margin decreased to 3.0% in the nine months ended August 31, 2011 from 24.1% in the nine months ended

August 31, 2010, primarily reflecting pretax, noncash inventory impairment and land option contract abandonment charges. These charges totaled \$19.0 million in the nine months ended August 31, 2011, compared to \$1.0 million of such charges in the year-earlier period, primarily due to an \$18.1 million adjustment

Table of Contents

to the fair value of real estate collateral that we took back on a note receivable in the second quarter of 2011. Selling, general and administrative expenses decreased by \$15.5 million, or 44%, to \$19.8 million in the first nine months of 2011 from \$35.3 million in the year-earlier period as a result of overhead cost reductions, a drop in legal expenses and the lower volume of homes delivered.

Central. Total revenues from our Central homebuilding reporting segment decreased 27% to \$102.7 million for the three months ended August 31, 2011 from \$140.0 million for the corresponding period of 2010, due to a decline in housing revenues. In the third quarter of 2011, housing revenues decreased 27% to \$102.6 million from \$140.0 million in the year-earlier quarter as a result of a 29% decrease in homes delivered, partly offset by a 3% increase in the average selling price. In the third quarter of 2011, we delivered 611 homes at an average selling price of \$168,000 compared to 855 homes delivered in the third quarter of 2010 at an average selling price of \$163,800. The year-over-year decrease in the number of homes delivered was partly due to the 16% lower backlog at the start of the 2011 third quarter compared to the year-earlier quarter, which was driven by a decline in net orders in the first two quarters of 2011 primarily reflecting the impact of the April 30, 2010 expiration of the federal homebuyer tax credit. The higher average selling price reflected a change in product mix. This segment generated land sale revenues of \$.1 million for the third quarter of 2011 and no land sale revenues for the year-earlier quarter.

This segment generated pretax losses of \$2.2 million for the three months ended August 31, 2011, compared to pretax income of \$5.4 million for the year-earlier period. In the third quarter of 2011, the pretax loss was mainly due to lower gross profits reflecting fewer homes delivered in this segment and a lower gross margin. The gross margin decreased to 15.5% in the third quarter of 2011 from 18.3% in the third quarter of 2010, primarily reflecting reduced leverage from the lower volume of homes delivered, which was partly offset by favorable warranty adjustments. Selling, general and administrative expenses totaled \$16.6 million in the three months ended August 31, 2011, down 7% from \$17.8 million in the three months ended August 31, 2010. This decrease reflected overhead cost reductions and the decline in the number of homes delivered.

For the nine months ended August 31, 2011, our Central homebuilding reporting segment posted total revenues of \$247.5 million, down 21% from \$314.8 million for the year-earlier period, reflecting lower housing revenues. Housing revenues decreased 21% to \$247.4 million for the first nine months of 2011 from \$314.3 million for the year-earlier period, mainly due to a 25% decrease in homes delivered, partly offset by a 5% increase in the average selling price. We delivered 1,449 homes in the nine months ended August 31, 2011 compared to 1,934 homes delivered in the year-earlier period, reflecting lower backlog levels at the start of each of the first three quarters of 2011 due largely to the strategic community count reductions we made in prior periods to align our operations in this segment with prevailing housing market activity. The average selling price rose to \$170,700 in the first nine months of 2011 from \$162,500 in the year-earlier period, primarily due to a change in product mix. Land sale revenues totaled \$.1 million for the nine months ended August 31, 2011 and \$.5 million for the nine months ended August 31, 2010.

Pretax losses from this segment totaled \$12.4 million for the nine months ended August 31, 2011 and \$3.7 million for the corresponding period of 2010. The pretax loss for the first nine months of 2011 included \$1.1 million of noncash inventory impairment and land option contract abandonment charges, compared to \$6.3 million of land option contract abandonment charges in the year-earlier period. The gross margin decreased to 14.4% in the nine months ended August 31, 2011 from 16.1% in the year-earlier period for the reasons described above with respect to the three-month period ended August 31, 2011. Selling, general and administrative expenses of \$42.9 million in the first nine months of 2011 decreased by \$2.9 million, or 6%, from \$45.8 million in the corresponding period of 2010, primarily due to overhead cost reductions and the lower volume of homes delivered.

Southeast. Our Southeast homebuilding reporting segment generated total revenues of \$46.9 million for the third quarter of 2011, down 49% from \$91.6 million for the year-earlier quarter. Revenues in both periods were generated solely from housing operations. The decrease in housing revenues reflected a 55% year-over-year decrease in homes delivered, partly offset by a 15% year-over-year increase in the average selling price. We delivered 236 homes in the third quarter of 2011, down from 528 homes delivered in the year-earlier quarter, mainly due to this segment having 41% fewer homes in backlog at the start of the third quarter of 2011 as compared to the year-earlier period, reflecting lower net orders in the first half of 2011. The average selling price increased to \$198,800 in the third quarter of 2011 from \$173,400 in the year-earlier quarter, reflecting a change in product mix and a higher number of homes delivered

from our higher-priced communities in the Washington D.C. metro market in 2011.

Table of Contents

Pretax losses from this segment totaled \$7.2 million for the three months ended August 31, 2011 and \$10.9 million for the year-earlier period. The loss from this segment narrowed for the three months ended August 31, 2011 from the year-earlier period, reflecting a decrease in selling, general and administrative expenses, partly offset by lower gross profits stemming from the decrease in homes delivered. The gross margin increased to 13.2% in the third quarter of 2011 from 9.3% in the third quarter of 2010. There were no noncash inventory impairment or land option contract abandonment charges in the third quarter of 2011, compared to noncash charges for land option contract abandonments of \$1.2 million in the third quarter of 2010. Selling, general and administrative expenses decreased by 36% to \$9.5 million in the third quarter of 2011 from \$14.9 million in the year-earlier quarter reflecting overhead cost reductions as well as the lower volume of homes delivered.

For the first nine months of 2011, total revenues from our Southeast homebuilding reporting segment totaled \$136.6 million, down 27% from \$186.3 million for the year-earlier period. Revenues in each period were generated solely from housing operations. Housing revenues for the first nine months of 2011 declined year over year due to a 39% decrease in the number of homes delivered, partly offset by a 21% increase in the average selling price. We delivered 694 homes in the nine months ended August 31, 2011 compared to 1,142 homes delivered in the corresponding period of 2010, largely due to lower backlog levels at the beginning of each quarter of 2011. The lower backlog levels in the 2011 period were due in part to a strategic reduction in our market presence in the Carolinas. The average selling price rose to \$196,800 in the first nine months of 2011 from \$163,100 in the year-earlier period for the reasons described above with respect to the three-month period ended August 31, 2011.

This segment posted pretax losses of \$30.2 million for the nine months ended August 31, 2011 and \$42.1 million for the nine months ended August 31, 2010. The pretax loss for the nine months ended August 31, 2011 narrowed on a year-over-year basis due to an increase in the gross margin, and a decrease in selling, general and administrative expenses. In the nine months ended August 31, 2011, noncash charges for inventory impairments and land option contract abandonments totaled \$1.6 million, compared to \$6.1 million in the year-earlier period. The gross margin improved to 6.7% in the nine months ended August 31, 2011, from 2.3% in the nine months ended August 31, 2010, largely due to the increase in the average selling price. Selling, general and administrative expenses of \$27.5 million in the first nine months of 2011 decreased by \$5.1 million, or 16%, from \$32.6 million in the first nine months of 2010 for the reasons described above with respect to the three-month period ended August 31, 2011.

FINANCIAL SERVICES

Our financial services segment provides title and insurance services to our homebuyers. This segment also provided mortgage banking services to our homebuyers indirectly through KBA Mortgage, a joint venture of a subsidiary of ours and a subsidiary of Bank of America, N.A., with each partner having a 50% ownership interest in the venture. The Bank of America, N.A. subsidiary partner operated KBA Mortgage. We accounted for KBA Mortgage as an unconsolidated joint venture in the financial services reporting segment of our consolidated financial statements. From its formation in 2005 until June 30, 2011, KBA Mortgage provided mortgage banking services to a significant proportion of our homebuyers. During the first quarter of 2011, the Bank of America, N.A. subsidiary partner in KBA Mortgage approached us about exiting the joint venture due to the desire of Bank of America, N.A. to cease participating in joint venture structures in its business. As a result, effective June 27, 2011, KBA Mortgage stopped accepting loan applications, and it ceased offering mortgage banking services to our homebuyers after June 30, 2011. After June 30, 2011, Bank of America, N.A. is processing and closing only the residential consumer mortgage loans that KBA Mortgage originated for our homebuyers on or before June 26, 2011. We entered into a marketing services agreement with MetLife Home Loans, a division of MetLife Bank, N.A., effective June 27, 2011. Under the agreement, MetLife Home Loans personnel, located onsite at several of our new home communities, can offer (i) financing options and mortgage loan products to our homebuyers, (ii) to prequalify homebuyers for residential consumer mortgage loans, and (iii) to commence the loan origination process for homebuyers who elect to use MetLife Home Loans. We make marketing materials and other information regarding MetLife Home Loans financing options and mortgage loan products available to our homebuyers and are compensated solely for the fair market value of these services. MetLife Home Loans and MetLife Bank, N.A. are not affiliates of ours or any of our subsidiaries. Our homebuyers are under no obligation to use MetLife Home Loans and may select any lender of their choice to obtain mortgage financing for the purchase of a home. We do not have any ownership, joint venture or other interests

in or with MetLife Home Loans or MetLife Bank, N.A. or with respect to the revenues or income that may be generated from MetLife Home Loans providing mortgage banking services to, or originating residential consumer mortgage loans for, our homebuyers. We expect that our agreement with MetLife Home Loans will help our homebuyers obtain reliable mortgage banking services to purchase a home.

Table of Contents

The following table presents a summary of selected financial and operational data for our financial services segment (dollars in thousands):

	Nine Months Ended August 31,		Three Months Ended August 31,	
	2011	2010	2011	2010
Revenues	\$ 6,178	\$ 5,187	\$ 2,784	\$ 2,182
Expenses	(2,481)	(2,639)	(829)	(754)
Equity in income (loss) of unconsolidated joint venture	(376)	5,946	(888)	996
Pretax income	\$ 3,321	\$ 8,494	\$ 1,067	\$ 2,424
Total originations (a):				
Loans	1,633	4,353	234	1,827
Principal	\$ 315,899	\$ 810,609	\$ 44,744	\$ 347,372
Percentage of homebuyers using KBA Mortgage	66%	83%	57%	83%
Loans sold to third parties (a):				
Loans	1,862	4,545	452	2,089
Principal	\$ 370,599	\$ 826,756	\$ 93,445	\$ 386,619

(a) Loan originations and sales occur within KBA Mortgage, which stopped accepting loan applications effective June 27, 2011 and ceased offering mortgage banking services to our homebuyers after June 30, 2011.

Revenues. Financial services revenues totaled \$2.8 million for the three months ended August 31, 2011 and \$2.2 million for the three months ended August 31, 2010, and included revenues from interest income, title services and insurance commissions. Financial services revenues for the three months ended August 31, 2011 also included revenues from our marketing services agreement with MetLife Home Loans, which became effective in late June 2011. The revenues associated with the marketing services agreement represent the fair market value of the services we provided in connection with the agreement. In the first nine months of 2011, financial services revenues totaled \$6.2 million compared to \$5.2 million in the corresponding year-earlier period. The year-over-year increases in financial services revenues in the three-month and nine-month periods ended August 31, 2011 resulted mainly from the revenues associated with the new marketing services agreement with MetLife Home Loans and higher revenues from title services.

Expenses. General and administrative expenses totaled \$.8 million in each of the three-month periods ended August 31, 2011 and 2010. In the first nine months of 2011, general and administrative expenses decreased slightly to \$2.5 million, compared to \$2.6 million in the year-earlier period.

Equity in Income (Loss) of Unconsolidated Joint Venture. The equity in loss of unconsolidated joint venture of \$.9 million for the three months ended August 31, 2011 and the equity in income of unconsolidated joint venture of \$1.0 million for the three months ended August 31, 2010 both relate to our 50% interest in KBA Mortgage. For the nine months ended August 31, 2011, the equity in loss of unconsolidated joint venture totaled \$.4 million, compared to equity in income of unconsolidated joint venture of \$5.9 million for the nine months ended August 31, 2010. KBA Mortgage originated 234 loans in the third quarter of 2011 compared to 1,827 loans in the year-earlier quarter. In the first nine months of 2011, KBA Mortgage originated 1,633 loans, down from 4,353 loans originated in the year-earlier period. The percentage of our homebuyers using KBA Mortgage as a loan originator decreased to 57% for the three months ended August 31, 2011 from 83% for the three months ended August 31, 2010. For the nine months ended August 31, 2011, the rate was 66% compared to 83% for the year-earlier period.

The unconsolidated joint venture results for the three-month and nine-month periods ended August 31, 2011 mainly reflected KBA Mortgage's ceasing to accept loan applications effective June 27, 2011 and ceasing to offer mortgage banking services to our homebuyers after June 30, 2011. Consequently, the results generated in our financial services segment from our equity in income (loss) of the unconsolidated mortgage banking joint venture (i.e., KBA Mortgage), declined substantially in the quarter ending August 31, 2011 compared to the quarters ending May 31, 2011 and February 28, 2011. Our marketing services agreement with MetLife Home

Table of Contents

Loans will not result in any income for us based on an equity interest. We will be compensated solely for the fair market value of the services we provide.

INCOME TAXES

We had no income tax benefit or expense for the three months ended August 31, 2011 and an income tax benefit of \$5.3 million for the three months ended August 31, 2010. For the nine months ended August 31, 2011, our income tax expense totaled \$.1 million, compared to an income tax benefit of \$5.0 million for the nine months ended August 31, 2010. Due to the effects of our deferred tax asset valuation allowances, carrybacks of our NOLs, and changes in our unrecognized tax benefits, our effective tax rates for the three-month and nine-month periods ended August 31, 2011 and 2010 are not meaningful items as our income tax amounts are not directly correlated to the amount of our pretax losses for those periods.

In accordance with ASC 740, we evaluate our deferred tax assets quarterly to determine if valuation allowances are required. During the three months ended August 31, 2011, we recorded a valuation allowance of \$2.5 million against net deferred tax assets generated from the loss for the period. During the three months ended August 31, 2010, we recorded a net reduction of \$2.4 million to the valuation allowance against net deferred tax assets. The net reduction was comprised of a \$5.4 million federal income tax benefit from the increased carryback of our 2009 net operating loss to offset earnings we generated in 2004 and 2005, partially offset by a \$3.0 million valuation allowance recorded against the net deferred tax assets generated from the loss for the period. For the nine months ended August 31, 2011, we recorded valuation allowances of \$73.3 million against the net deferred tax assets generated from losses for the period. For the nine months ended August 31, 2010, we recorded a net increase of \$31.6 million to the valuation allowance against net deferred tax assets. The net increase was comprised of a \$37.0 million valuation allowance recorded against the net deferred tax assets generated from the loss for the period, partially offset by the \$5.4 million federal income tax benefit from the increased carryback of our 2009 net operating loss to offset earnings we generated in 2004 and 2005.

Our net deferred tax assets totaled \$1.1 million at both August 31, 2011 and November 30, 2010. The deferred tax asset valuation allowance increased to \$844.4 million at August 31, 2011 from \$771.1 million at November 30, 2010. This increase reflected the net impact of the \$73.3 million valuation allowance recorded during the nine months ended August 31, 2011.

The benefits of our NOLs, built-in losses and tax credits would be reduced or potentially eliminated if we experienced an ownership change under Section 382. Based on our analysis performed as of August 31, 2011, we do not believe that we have experienced an ownership change as defined by Section 382, and, therefore, the NOLs, built-in losses and tax credits we have generated should not be subject to a Section 382 limitation as of this reporting date.

Liquidity and Capital Resources

Overview. We historically have funded our homebuilding and financial services activities with internally generated cash flows and external sources of debt and equity financing.

During the period from 2006 through 2009, amid the general downturn in the housing market, we focused on generating cash by exiting or reducing our investments in certain markets, selling land positions and interests, and improving the financial performance of our homebuilding operations. The cash generated from these efforts improved our liquidity, enabled us to reduce debt levels and strengthened our consolidated financial position. While continuing to manage our use of cash to operate our business to position our operations to capitalize on future growth opportunities, from 2009 through the first nine months of 2011, we made strategic acquisitions of attractive land assets that met our investment and marketing standards and invested in land development to maintain a solid growth platform in our targeted markets. We invested approximately \$409 million in land and land development in the first nine months of 2011, and expect that our total land and land development investment for our 2011 fiscal year will be approximately \$550 million, nearly the same as our total investment for our 2010 fiscal year, which was approximately \$560 million. While we have made a significant investment in land and land development in 2011 to support our strategic goals, we ended our 2011 third quarter with \$590.6 million of cash and cash equivalents and restricted cash, with \$113.2 million of this

Table of Contents

amount comprised of restricted cash. We had \$1.02 billion of cash and cash equivalents and restricted cash at November 30, 2010. The majority of our unrestricted cash and cash equivalents at August 31, 2011 was invested in money market accounts and U.S. government securities. Our cash, cash equivalents and restricted cash decreased by \$144.7 million during the third quarter of 2011, primarily due to the repayment of the \$100 Million Senior Notes upon their August 15, 2011 maturity.

As discussed further below, on or around November 30, 2011 we anticipate that we will need to satisfy a net payment obligation related to South Edge. We estimate that the probable amount of this net payment obligation is \$226.4 million based on the terms of the consensual agreement effective June 10, 2011 regarding the Plan. At the same time, we currently expect to have higher home deliveries, higher housing gross margins, and lower selling, general and administrative expenses as a percentage of housing revenues in the second half of 2011 compared to the first half of 2011. Therefore, excluding our anticipated net payment obligation related to South Edge, we expect to have positive operating cash flow for the second half of this year on an overall basis. Considering the above factors as a whole, and by maintaining a disciplined approach to land and land development investments, we believe that at our 2011 fiscal year-end we will have a balance of cash and cash equivalents and restricted cash of over \$500 million after funding our anticipated 2011 operating needs (including our anticipated net payment obligation related to South Edge, if satisfied on or before November 30, 2011). We will continue to evaluate our future cash requirements and financing opportunities available in the capital markets. Depending on housing market conditions, resource allocation priorities and developments relating to South Edge, we plan to use a portion of our unrestricted cash and cash equivalents in 2011 to acquire additional land assets and increase our new home communities to support our primary strategic goal of achieving profitability. Our land acquisition and new home community opening plans are further discussed below under Outlook.

Capital Resources. At August 31, 2011, we had \$1.59 billion of mortgages and notes payable outstanding compared to \$1.78 billion outstanding at November 30, 2010, reflecting the repayment of the \$100 Million Senior Notes upon their August 15, 2011 maturity and the repayment of secured debt during the first nine months of 2011.

Our financial leverage, as measured by the ratio of debt to total capital, was 78.6% at August 31, 2011, compared to 73.8% at November 30, 2010. Our ratio of net debt to total capital at August 31, 2011 was 69.8%, compared to 54.5% at November 30, 2010.

Following our voluntary termination of the Credit Facility effective March 31, 2010, we entered into the LOC Facilities with various financial institutions to obtain letters of credit in the ordinary course of operating our business. As of August 31, 2011, \$64.3 million of letters of credit were outstanding under the LOC Facilities. The LOC Facilities require us to deposit and maintain cash with the issuing financial institutions as collateral for our letters of credit outstanding. As of August 31, 2011, the amount of cash maintained for the LOC Facilities totaled \$65.0 million and was included in restricted cash in our consolidated balance sheet as of that date. We may maintain, revise or, if necessary or desirable, enter into additional or expanded letter of credit facilities with the same or other financial institutions.

In addition to the cash deposits maintained for the LOC Facilities, restricted cash on our consolidated balance sheet at August 31, 2011 included \$26.8 million required as collateral for a surety bond and \$21.4 million of cash deposited in an escrow account pursuant to a consensual plan of reorganization for one of our unconsolidated joint ventures.

The indenture governing our senior notes does not contain any financial maintenance covenants. Subject to specified exceptions, the indenture contains certain restrictive covenants that, among other things, limit our ability to incur secured indebtedness, or engage in sale-leaseback transactions involving property or assets above a certain specified value. Unlike our other senior notes, the terms governing our \$265 Million Senior Notes contain certain limitations related to mergers, consolidations, and sales of assets.

As of August 31, 2011, we were in compliance with the applicable terms of our covenants under our senior notes, the indenture, and mortgages and land contracts due to land sellers and other loans. Our ability to secure future debt financing may depend in part on our ability to remain in such compliance.

Table of Contents

As further described below under Part II Item 1. Legal Proceedings, on February 3, 2011, the bankruptcy court entered an order for relief on the Petition and appointed a Chapter 11 trustee for South Edge. As a result of this court decision and based on the terms of the consensual agreement effective June 10, 2011 regarding the Plan, we estimate that our probable net payment obligation related to South Edge is \$226.4 million, though we estimate that our net payment obligation could range between approximately \$214 million and \$240 million. The ultimate payment we may make will depend on a number of factors, including whether the Plan becomes effective. Our estimate of our probable net payment obligation related to South Edge may change if new information subsequently becomes available.

Depending on available terms, we finance certain land acquisitions with purchase-money financing from land sellers or with other forms of financing from third parties. At August 31, 2011, we had outstanding mortgages and land contracts due to land sellers and other loans payable in connection with such financing of \$28.4 million, secured primarily by the underlying property.

Consolidated Cash Flows. Operating, investing and financing activities in total used net cash of \$428.2 million in the nine months ended August 31, 2011 and \$254.4 million in the nine months ended August 31, 2010.

Operating Activities. Operating activities used net cash of \$309.9 million in the nine months ended August 31, 2011 and \$164.1 million in the corresponding period of 2010. The year-over-year change in net operating cash flows was primarily due to a \$190.7 million federal income tax refund we received during the nine months ended August 31, 2010. There was no such refund received in the nine months ended August 31, 2011.

Our uses of cash for operating activities in the first nine months of 2011 included a net loss of \$192.7 million, a net increase in inventories of \$177.8 million (excluding the property we took back on a \$40.0 million note receivable; inventory impairment and land option contract abandonment charges; and an increase of \$9.6 million in consolidated inventories not owned) in conjunction with our land asset acquisition activities, a net decrease in accounts payable, accrued expenses and other liabilities of \$47.0 million, a net increase in receivables of \$10.9 million and other operating uses of \$1.6 million.

In the first nine months of 2010, our uses of cash for operating activities included a net increase in inventories of \$149.0 million (excluding inventory impairment and land option contract abandonment charges; \$53.1 million of inventories acquired through seller financing; and a decrease of \$37.6 million in consolidated inventories not owned), a net decrease in accounts payable, accrued expenses and other liabilities of \$147.3 million, a net loss of \$86.8 million, and other operating uses of \$2.8 million. The cash used in the first nine months of 2010 was partly offset by a net decrease in receivables of \$182.8 million, mainly due to the \$190.7 million federal income tax refund we received during the period.

Investing Activities. Investing activities provided net cash of \$78.6 million in the nine months ended August 31, 2011 and used net cash of \$2.2 million in the year-earlier period. The year-over-year change in net investing cash flows was primarily due to proceeds of \$80.6 million received in the first nine months of 2011 from the sale of a multi-level residential building we operated as a rental property. The cash provided was partly offset by \$1.9 million used for investments in unconsolidated joint ventures and \$.1 million used for net purchases of property and equipment. In the first nine months of 2010, we used cash of \$1.5 million for investments in unconsolidated joint ventures and \$.7 million for net purchases of property and equipment.

Financing Activities. Financing activities used net cash of \$196.8 million in the first nine months of 2011 and \$88.1 million in the first nine months of 2010. The year-over-year change resulted primarily from the repayment of the \$100 Million Senior Notes and an increase in net payments on mortgages and land contracts due to land sellers and other loans in 2011 compared to 2010. In the first nine months of 2011, cash was used for the repayment of the \$100 Million Senior Notes at their scheduled August 15, 2011 maturity, and for net payments on mortgages and land contracts due to land sellers and other loans of \$86.1 million, primarily related to the repayment of debt secured by the multi-level residential building we sold during the period. Uses of cash in the first nine months of 2011 also included dividend payments on our common stock of \$14.4 million. The cash used was partially offset by a \$2.3 million decrease in our restricted cash balance and \$1.4 million of cash provided from the issuance of common stock under employee stock plans.

In the first nine months of 2010, cash was used for net payments of \$73.4 million on mortgages and land contracts due to land sellers and other loans, dividend payments on common stock of \$14.4 million, an

Table of Contents

increase in our restricted cash balance of \$2.1 million, and repurchases of common stock of \$.4 million in connection with the satisfaction of employee withholding taxes on vested restricted stock. The cash used was partially offset by \$1.6 million provided from the issuance of common stock under employee stock plans and \$.6 million from excess tax benefits associated with the exercise of stock options.

During the three months ended February 28, 2011, our board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on February 17, 2011 to stockholders of record on February 3, 2011. During the three months ended May 31, 2011, our board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on May 19, 2011 to stockholders of record on May 5, 2011. During the three months ended August 31, 2011, our board of directors declared a cash dividend of \$.0625 per share of common stock, which was paid on August 18, 2011 to stockholders of record on August 4, 2011. A cash dividend of \$.0625 per share of common stock was also declared and paid during each of the three-month periods ended February 28, 2010, May 31, 2010 and August 31, 2010. The declaration and payment of future cash dividends on our common stock are at the discretion of our board of directors, and depend upon, among other things, our expected future earnings, cash flows, capital requirements, debt structure and any adjustments thereto, operational and financial investment strategy and general financial condition, as well as general business conditions.

Shelf Registration Statement. We have an automatically effective universal shelf registration statement on file with the SEC. The 2011 Shelf Registration, which was filed on September 20, 2011, registers the offering of debt and equity securities that we may issue from time to time in amounts to be determined.

Share Repurchase Program. At August 31, 2011, we were authorized to repurchase 4,000,000 shares of our common stock under a board-approved share repurchase program. We did not repurchase any shares of our common stock under this program in 2011. We have not repurchased common shares pursuant to a common stock repurchase plan for the past several years and any resumption of such stock repurchases will be at the discretion of our board of directors. In the present environment, we are managing our use of cash for investments to maintain and grow our business. Based on our current capital position, and notwithstanding our anticipated net payment obligation related to South Edge, we believe we will have adequate resources and sufficient access to external financing sources to satisfy our current and reasonably anticipated future requirements for funds to acquire capital assets and land, to construct homes, to finance our financial services operations, and to meet any other needs in the ordinary course of our business. Although our land acquisition and land development activities in the fourth quarter of 2011 and into 2012 will remain subject to market conditions, we are analyzing potential acquisitions and will use our present financial position and a portion of our unrestricted cash resources to purchase assets in desirable, long-term markets when the prices, timing and strategic fit meet our investment and marketing standards. In the fourth quarter of 2011, we may also use or redeploy our unrestricted cash and cash equivalents or engage in other financial transactions, including capital markets transactions, though there is no plan to issue equity.

Off-Balance Sheet Arrangements, Contractual Obligations and Commercial Commitments

We have investments in unconsolidated joint ventures that conduct land acquisition, development and/or other homebuilding activities in various markets where our homebuilding operations are located. Our partners in these unconsolidated joint ventures are unrelated homebuilders, and/or land developers and other real estate entities, or commercial enterprises. We entered into these unconsolidated joint ventures in previous years to reduce or share market and development risks and to increase the number of our owned and controlled homesites. In some instances, participation in these unconsolidated joint ventures has enabled us to acquire and develop land that we might not otherwise have had access to due to a project's size, financing needs, duration of development or other circumstances. While we have viewed our participation in these unconsolidated joint ventures as potentially beneficial to our homebuilding activities, we do not view such participation as essential and have unwound our participation in a number of these unconsolidated joint ventures in the past few years.

We typically have obtained rights to purchase portions of the land held by the unconsolidated joint ventures in which we currently participate. When an unconsolidated joint venture sells land to our homebuilding operations, we defer recognition of our share of such unconsolidated joint venture earnings until a home sale is

Table of Contents

closed and title passes to a homebuyer, at which time we account for those earnings as a reduction of the cost of purchasing the land from the unconsolidated joint venture.

We and our unconsolidated joint venture partners make initial and/or ongoing capital contributions to these unconsolidated joint ventures, typically on a pro rata basis equal to their respective equity interests. The obligations to make capital contributions are governed by each such unconsolidated joint venture's respective operating agreement and related governing documents. We also share in the profits and losses of these unconsolidated joint ventures generally in accordance with our respective equity interests. These unconsolidated joint ventures had total assets of \$192.9 million at August 31, 2011 and \$789.4 million at November 30, 2010. Our investment in these unconsolidated joint ventures totaled \$51.3 million at August 31, 2011 and \$105.6 million at November 30, 2010.

Our unconsolidated joint ventures finance land and inventory investments for a project through a variety of arrangements. To finance their respective land acquisition and development activities, certain of our unconsolidated joint ventures have obtained loans from third-party lenders that are secured by the underlying property and related project assets. Of our unconsolidated joint ventures at November 30, 2010, only South Edge had outstanding debt, which was secured by a lien on South Edge's assets, with a principal balance of \$327.9 million. As of August 31, 2011, the principal balance of South Edge's outstanding debt remained at \$327.9 million.

In certain instances, we and/or our partner(s) in an unconsolidated joint venture have provided completion and/or carve-out guarantees to the unconsolidated joint venture's lenders. A completion guaranty refers to the physical completion of improvements for a project and/or the obligation to contribute equity to an unconsolidated joint venture to enable it to fund its completion obligations. Our potential responsibility under our completion guarantees, if triggered, is highly dependent on the facts of a particular case. A carve-out guaranty refers to the payment of losses a lender suffers due to certain bad acts or omissions by an unconsolidated joint venture or its partners, such as fraud or misappropriation, or due to environmental liabilities arising with respect to the relevant project.

In addition to completion and carve-out guarantees, we provided the Springing Guaranty to the Administrative Agent in connection with secured loans made to South Edge that comprise its outstanding debt. By its terms, the Springing Guaranty's obligations arise after the occurrence of an involuntary bankruptcy proceeding or an involuntary bankruptcy petition filed against South Edge that is not dismissed within 60 days or for which an order or decree approving or ordering any such proceeding or petition is entered. On February 3, 2011, a bankruptcy court entered an order for relief on the Petition filed against South Edge and appointed a Chapter 11 trustee for South Edge. Although we believe that there are potential offsets or defenses to prevent or minimize the enforcement of the Springing Guaranty, as a result of the February 3, 2011 order for relief on the Petition, we consider it probable that we became responsible to pay certain amounts to the Administrative Agent related to the Springing Guaranty. Therefore, our consolidated financial statements at August 31, 2011 reflect a net payment obligation of \$226.4 million, representing our estimate of the probable amount that we would pay to the Administrative Agent (on behalf of the South Edge lenders) related to the Springing Guaranty and to pay for certain fees, expenses and charges and for certain allowed general unsecured claims in the South Edge bankruptcy case. This estimate is based on the terms of a consensual agreement, effective June 10, 2011, regarding the Plan. As a result of recording our probable net payment obligation at February 28, 2011, and taking into account accruals we had previously established with respect to South Edge and factoring in an offset for the estimated fair value of the South Edge land we expect to acquire as a result of satisfying the payment obligation, as discussed below, we recognized a charge of \$22.8 million in the first quarter of 2011 that was reflected as a loss on loan guaranty in our consolidated statements of operations. This charge was in addition to the joint venture impairment charge of \$53.7 million that we recognized in the first quarter of 2011 to write off our investment in South Edge. In the second quarter of 2011, in updating our estimate of our probable net payment obligation to reflect the terms of the consensual agreement effective June 10, 2011 regarding the Plan, we recorded an additional loss on loan guaranty of \$14.6 million. The consensual agreement effective June 10, 2011 and the Plan are discussed further below under Part II Item 1. Legal Proceedings. Our probable net obligation related to South Edge may change if new information subsequently becomes available.

Based on the terms of the Plan, we anticipate acquiring approximately 600 developable acres of the land owned by South Edge. Therefore, we consider our probable net payment obligation to be partially offset by \$75.2 million, the estimated fair value of our share of the South Edge land at August 31, 2011. We calculated this estimated fair value

using a present value methodology and assuming that we would develop the land, build and

Table of Contents

sell homes on most of the land, and sell the remainder of the developed land. This fair value estimate at August 31, 2011 reflected our expectations of the price we would receive for our share of the South Edge land in the land's then-current state in an orderly (not a forced) transaction under then-prevailing market conditions. This fair value estimate also reflected judgments and key assumptions concerning (a) housing market supply and demand conditions, including estimates of average selling prices; (b) estimates of potential future home sales and cancellation rates; (c) anticipated entitlements and development plans for the land; (d) anticipated land development, construction and overhead costs to be incurred; and (e) a risk-free rate of return and an expected risk premium, in each case in relation to an expected 15-year life for the South Edge project.

Among the key assumptions used in the present value methodology was the anticipated appreciation in revenues and costs over the expected life of the South Edge project, which is further discussed in Note 10. Investments in Unconsolidated Joint Ventures in the Notes to Consolidated Financial Statements in this report. Due to the judgment and assumptions applied in the estimation process with respect to the fair value of our share of the South Edge land at August 31, 2011, including as to the anticipated appreciation in revenues and costs over the life of the South Edge project, it is possible that actual results could differ substantially from those estimated. We will continue to review and update as appropriate our fair value estimates of our share of the South Edge land to reflect changes in relevant market conditions and other applicable factors.

The ultimate outcome of the South Edge bankruptcy, including whether the Plan becomes effective, is uncertain. We believe, however, that we will realize the value of our share of the South Edge land in the bankruptcy proceeding in accordance with the Plan. If the Plan becomes effective, we anticipate that we would (a) acquire our share of the South Edge land as a result of a bankruptcy court-approved disposition of the land to a newly created entity in which we would expect to be a part owner, and (b) without further payment, satisfy or assume the respective liens of the Administrative Agent and the South Edge lenders on the land. If, on the other hand, the Plan does not become effective and instead we assume the lenders' lien position through payment on our Springing Guaranty obligation to the Administrative Agent, we would become a secured lender with respect to our share of the South Edge land and would expect to have first claim on the value generated from the land.

If we are not able to realize some or all of the value of our share of the South Edge land, we may be required to recognize an additional expense. Based on our current estimates, this additional expense could range from near zero to potentially as much as \$75 million.

Our investments in joint ventures may create a variable interest in a VIE, depending on the contractual terms of the arrangement. We analyze our joint ventures in accordance with ASC 810 to determine whether they are VIEs and, if so, whether we are the primary beneficiary. All of our joint ventures at August 31, 2011 and November 30, 2010 were determined under the provisions of ASC 810 to be unconsolidated joint ventures and were accounted for using the equity method, either because they were not VIEs or, if they were VIEs, we were not the primary beneficiary of the VIEs.

In the ordinary course of our business, we enter into land option and other similar contracts to procure rights to land parcels for the construction of homes. The use of such land option and other similar contracts generally allows us to reduce the market risks associated with direct land ownership and development, to reduce our capital and financial commitments, including interest and other carrying costs, and to minimize the amount of our land inventories in our consolidated balance sheets. Under such contracts, we typically pay a specified option deposit or earnest money deposit in consideration for the right to purchase land in the future, usually at a predetermined price. Under the requirements of ASC 810, certain of these contracts may create a variable interest for us, with the land seller being identified as a VIE.

In compliance with ASC 810, we analyze our land option and other similar contracts to determine whether the corresponding land sellers are VIEs and, if so, whether we are the primary beneficiary. Although we do not have legal title to the underlying land, ASC 810 requires us to consolidate a VIE if we are determined to be the primary beneficiary. As a result of our analyses, we determined that, as of August 31, 2011 and November 30, 2010, we were not the primary beneficiary of any VIEs from which we are purchasing land under land option and other similar contracts. In determining whether we are the primary beneficiary, we consider, among other things, whether we have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. Such

activities would include, among other things, determining or limiting the scope or purpose of the VIE, selling or transferring property owned or controlled by the VIE, or arranging financing for the VIE. We also consider whether we have the obligation to absorb losses of the VIE or the right to receive benefits from the VIE.

Table of Contents

As of August 31, 2011, we had cash deposits totaling \$2.6 million associated with land option and other similar contracts that we determined to be unconsolidated VIEs, having an aggregate purchase price of \$110.6 million, and had cash deposits totaling \$13.0 million associated with land option and other similar contracts that we determined were not VIEs, having an aggregate purchase price of \$219.3 million. As of November 30, 2010, we had cash deposits totaling \$2.6 million associated with land option and other similar contracts that we determined to be unconsolidated VIEs, having an aggregate purchase price of \$86.1 million, and had cash deposits totaling \$12.2 million associated with land option and other similar contracts that we determined were not VIEs, having an aggregate purchase price of \$274.3 million.

We also evaluate our land option and other similar contracts involving financing arrangements in accordance with ASC 470, and, as a result of our evaluations, increased inventories, with a corresponding increase to accrued expenses and other liabilities, in our consolidated balance sheets by \$25.1 million at August 31, 2011 and \$15.5 million at November 30, 2010.

Critical Accounting Policies

The preparation of our consolidated financial statements requires the use of judgment in the application of accounting policies and estimates of uncertain matters. There have been no significant changes to our critical accounting policies and estimates during the nine months ended August 31, 2011 from those disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended November 30, 2010. Below is supplemental information regarding our critical accounting policy for inventory impairments and land option contract abandonments.

As discussed in Note 7. Inventory Impairments and Land Option Contract Abandonments in the Notes to Consolidated Financial Statements in this report, each land parcel or community in our owned inventory is assessed to determine if indicators of potential impairment exist. Impairment indicators are assessed separately for each land parcel or community on a quarterly basis and include, but are not limited to the following: significant decreases in sales rates, average selling prices, volume of homes delivered, gross margins on homes delivered or projected margins on homes in backlog or future housing sales; significant increases in budgeted land development and construction costs or cancellation rates; or projected losses on expected future land sales. If indicators of potential impairment exist for a land parcel or community, the identified asset is evaluated for recoverability in accordance with ASC 360. We evaluated 33 land parcels or communities for recoverability during each of the three-month periods ended August 31, 2011 and 2010. We evaluated 97 land parcels or communities and 88 land parcels or communities for recoverability during the nine months ended August 31, 2011 and 2010, respectively. Some of these land parcels or communities evaluated during the nine months ended August 31, 2011 and 2010 were evaluated in more than one quarterly period.

When an indicator of potential impairment is identified for a land parcel or community, we test the asset for recoverability by comparing the carrying value of the asset to the undiscounted future net cash flows expected to be generated by the asset. The undiscounted future net cash flows are impacted by then-current conditions and trends in the market in which an asset is located as well as factors known to us at the time the cash flows are calculated. The undiscounted future net cash flows consider recent trends in our sales, backlog and cancellation rates. Among the trends considered with respect to the three-month and nine-month periods ended August 31, 2011 and 2010 were the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit. Also taken into account were our future expectations related to the following: market supply and demand, including estimates concerning average selling prices; sales and cancellation rates; and anticipated land development, construction and overhead costs to be incurred. With respect to the three-month and nine-month periods ended August 31, 2011, these expectations reflected our experience that market conditions for our assets in inventory where impairment indicators were identified have been generally stable in 2010 and into 2011, with no significant deterioration or improvement identified as to revenue and cost drivers, excluding the temporary, though significant impact of the expiration of the federal homebuyer tax credit. Based on this experience, and taking into account the year-over-year increase in net orders in the third quarter of 2011 and the year-over-year increase in the number of new home communities, our inventory assessments considered an expected improved sales pace for the remainder of 2011.

Table of Contents

Given the inherent challenges and uncertainties in forecasting future results, our inventory assessments at the time they are made generally assume the continuation of then-current market conditions, subject to identifying information suggesting a sustained deterioration or improvement in such conditions or other significant changes. Therefore, for most of our assets in inventory where impairment indicators are identified, our quarterly inventory assessments for the remainder of 2011, at the time made, will anticipate sales rates, average selling prices and costs to generally continue at or near then-current levels through an affected asset's estimated remaining life. These estimates, trends and expectations are specific to each land parcel or community and may vary among land parcels or communities.

In our inventory assessments during the third quarter of 2011, we determined that the declines in our sales and backlog levels that we experienced in the third and fourth quarters of 2010 did not reflect a sustained change in market conditions preventing recoverability. Rather, we considered that they reflected the after effects of a temporary surge in demand in the first two quarters of 2010 that was motivated by the April 30, 2010 expiration of the federal homebuyer tax credit. Also contributing to these declines in our sales and backlog levels were strategic community count reductions we made in select markets in prior periods to align our operations with market activity levels.

A real estate asset is considered impaired when its carrying value is greater than the undiscounted future net cash flows the asset is expected to generate. Impaired real estate assets are written down to fair value, which is primarily based on the estimated future cash flows discounted for inherent risk associated with each asset. The discount rates used in our estimated discounted cash flows were 17% and 18% during the three months ended August 31, 2011 and 2010, respectively, and ranged from 17% to 20% during the nine-month periods ended August 31, 2011 and 2010. These discounted cash flows are impacted by the following: the risk-free rate of return; expected risk premium based on estimated land development, construction and delivery timelines; market risk from potential future price erosion; cost uncertainty due to development or construction cost increases; and other risks specific to the asset or conditions in the market in which the asset is located at the time the assessment is made. These factors are specific to each land parcel or community and may vary among land parcels or communities.

Based on the results of our evaluations, we recognized pretax, noncash inventory impairment charges of \$.3 million in the three months ended August 31, 2011 associated with one community with a post-impairment fair value of \$1.1 million. In the three months ended August 31, 2010, we recognized \$1.4 million of pretax, noncash inventory impairment charges associated with one community with a post-impairment fair value of \$2.7 million. In the nine months ended August 31, 2011, we recognized pretax, noncash inventory impairment charges of \$21.4 million associated with nine land parcels or communities with a post-impairment fair value of \$29.9 million. These charges included an \$18.1 million adjustment to the fair value of real estate collateral in our Southwest homebuilding reporting segment that we took back on a note receivable in the second quarter of 2011. In the nine months ended August 31, 2010, we recognized \$8.2 million of pretax, noncash inventory impairment charges associated with five land parcels or communities with a post-impairment fair value of \$6.6 million. The inventory impairments we recorded during the three-month and nine-month periods ended August 31, 2011 and 2010 reflected declining asset values in certain markets due to unfavorable economic and competitive conditions.

As of August 31, 2011, the aggregate carrying value of our inventory that had been impacted by pretax, noncash inventory impairment charges was \$366.8 million, representing 56 land parcels or communities. As of November 30, 2010, the aggregate carrying value of our inventory that had been impacted by pretax, noncash inventory impairment charges was \$418.5 million, representing 72 land parcels or communities.

Our inventory held under land option and other similar contracts is assessed to determine whether it continues to meet our internal investment and marketing standards. Assessments are made separately for each such land parcel on a quarterly basis and are affected by the following, among other factors: current and/or anticipated sales rates, average selling prices and home delivery volume; estimated land development and construction costs; and projected profitability on expected future housing or land sales. When a decision is made to not exercise certain land option and other similar contracts due to market conditions and/or changes in marketing strategy, we write off the costs, including non-refundable deposits and pre-acquisition costs, related to the abandoned projects. Based on the results of our assessments, we recognized pretax, noncash land option contract abandonment charges of \$.8 million corresponding to 209 lots in the three months ended August 31, 2011 and \$1.9 million of such charges corresponding to 284 lots in the three months ended August 31, 2010.

Table of Contents

In the nine months ended August 31, 2011 and 2010, we recognized pretax, noncash land option contract abandonment charges of \$2.1 million corresponding to 467 lots and \$8.5 million corresponding to 685 lots, respectively. The charges for land option contract abandonments reflected our termination of land option contracts on projects that no longer met our investment standards or marketing strategy.

Inventory impairment and land option contract abandonment charges are included in construction and land costs in our consolidated statements of operations.

The estimated remaining life of each land parcel or community in our inventory depends on various factors, such as the total number of lots remaining; the expected timeline to acquire and entitle land and develop lots to build homes; the anticipated future sales and cancellation rates; and the expected timeline to build and deliver homes sold. While it is difficult to determine a precise timeframe for any particular inventory asset, we estimate our inventory assets remaining operating lives under current and expected future market conditions to range generally from one year to in excess of 10 years. Based on current market conditions and expected delivery timelines, we expect to realize, on an overall basis, the majority of our current inventory balance within three to five years. The following table presents our inventory balance as of August 31, 2011, based on our current estimated timeframe as to when the last home within an applicable land parcel or community will be delivered (in millions):

Less than 2 years	3-5 years	6-10 years	Greater than 10 years	Total
\$1,046.6	\$ 403.7	\$ 326.5	\$ 123.8	\$ 1,900.6

Due to the judgment and assumptions applied in the estimation process with respect to inventory impairments, land option contract abandonments and the remaining operating lives of our inventory assets, it is possible that actual results could differ substantially from those estimated.

We believe that the carrying value of our inventory balance as of August 31, 2011 is recoverable. Our considerations in making this determination include the factors and trends incorporated into our impairment analyses, and as applicable, the regulatory environment, the competition from other homebuilders, the inventory levels and sales activity of resale and foreclosure homes, and the local economic conditions where an asset is located. However, if conditions in the overall housing market or in specific markets worsen in the future beyond our current expectations, if future changes in our marketing strategy significantly affect any key assumptions used in our fair value calculations, or if there are material changes in the other items we consider in assessing recoverability, we may recognize pretax, noncash charges in future periods for inventory impairments or land option contract abandonments, or both, related to our current inventory assets. Any such pretax, noncash charges could be material to our consolidated financial statements.

Recent Accounting Pronouncements

In January 2010, the FASB issued ASU 2010-06, which provides amendments to ASC 820-10. ASU 2010-06 requires additional disclosures and clarifications of existing disclosures for recurring and nonrecurring fair value measurements. The revised guidance was effective for us in the second quarter of 2010, except for the Level 3 activity disclosures, which are effective for fiscal years beginning after December 15, 2010. ASU 2010-06 concerns disclosure only and will not have a material impact on our consolidated financial position or results of operations.

In December 2010, the FASB issued ASU 2010-29, which addresses diversity in practice about the interpretation of the pro forma revenue and earnings disclosure requirements for business combinations. The amendments in ASU 2010-29 specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in ASU 2010-29 also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments in ASU 2010-29 are effective prospectively for business combinations for which the acquisition date is on or after the

Table of Contents

beginning of the first annual reporting period beginning on or after December 15, 2010. We believe the adoption of this guidance concerns disclosure only and will not have a material impact on our consolidated financial position or results of operations.

In May 2011, the FASB issued ASU 2011-04, which changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements in order to improve consistency in the application and description of fair value between U.S. GAAP and IFRS. ASU 2011-04 clarifies how the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets and are not relevant when measuring the fair value of financial assets or liabilities. In addition, the guidance expanded the disclosures for the unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The revised guidance is effective for interim and annual periods beginning after December 15, 2011 and early application by public entities is prohibited. We are currently evaluating the potential impact of adopting this guidance on our consolidated financial position and results of operations.

In June 2011, the FASB issued ASU 2011-05. The amendments in ASU 2011-05 allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in ASU 2011-05 do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU 2011-05 should be applied retrospectively. For public entities, the amendments in ASU 2011-05 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We believe the adoption of this guidance concerns disclosure only and will not have a material impact on our consolidated financial position or results of operations.

Outlook

At August 31, 2011, our backlog totaled 2,657 homes, representing projected future housing revenues of approximately \$559.3 million. By comparison, at August 31, 2010, our backlog totaled 2,169 homes, representing projected future housing revenues of approximately \$455.3 million. The 22% year-over-year increase in the number of homes in our backlog was mainly due to the increase in our net orders in the third quarter of 2011 compared to 2010. The 23% year-over-year increase in the projected future housing revenues in our backlog at August 31, 2011 reflected the higher number of homes in backlog across all of our homebuilding reporting segments.

Net orders generated by our homebuilding operations increased 40% to 1,838 in the three months ended August 31, 2011 from the 1,314 net orders generated in the corresponding period of 2010. Net orders rose in each of our four homebuilding reporting segments, with increases ranging from 22% in our Central homebuilding reporting segment to 73% in our West Coast homebuilding reporting segment. The favorable year-over-year net order comparison in the third quarter of 2011 partly reflected activity from recently opened communities as well as the depressed net order level in the year-earlier quarter stemming from the April 30, 2010 expiration of the federal tax credit for first-time homebuyers. As a percentage of gross orders, our third quarter cancellation rate decreased to 29% in 2011 from 33% in 2010.

During the first nine months of 2011, we and the homebuilding industry continued to face difficult market conditions that have persisted to varying degrees since the housing market downturn began in 2006. We believe it is likely that market conditions will remain challenging in the fourth quarter of 2011 and into 2012. Although turbulent macroeconomic conditions, weak growth in employment and low consumer confidence are currently hindering a broader housing market recovery, we are seeing some encouraging signs of stability in certain markets that are located close to active employment centers, that feature a relative balance of housing

Table of Contents

supply and demand, and that offer historically high affordability levels. Therefore, in the short term, we are managing our business to these current market realities while also positioning our operations to take advantage of anticipated future growth driven by demographic trends and improved economic conditions as they unfold.

For the fourth quarter of 2011, we will continue to focus on pursuing the integrated strategic actions we have taken in the past few years to transform our business with the changing housing market dynamics, including following the principles of our KBnxt operational business model; increasing the number of our new home communities; making targeted inventory investments in attractive markets to maintain a solid growth platform; driving additional operational efficiencies and overhead cost reductions; maintaining a strong balance sheet; and remaining attentive to market conditions and the needs of our core customers. We believe the year-over-year growth in net orders and backlog we generated in the third quarter of 2011, and the sequential improvement during the year in our housing gross margin and selling, general and administrative expenses as a percentage of housing revenues, demonstrate that our strategic focus is working and that it is helping us make tangible progress towards our top priority of restoring and maintaining the profitability of our homebuilding operations. Presently, at the forefront of our strategic actions are our ongoing initiatives to own or control well-priced finished or partially finished lots that meet our investment and marketing standards, and to open new home communities, in select locations that are expected to offer attractive near term and long term sales growth. We invested approximately \$409 million in land and land development in the first nine months of 2011, and expect that our total land and land development investment for our 2011 fiscal year will be approximately \$550 million, nearly the same as our total investment for our 2010 fiscal year, which was approximately \$560 million. We opened over 90 new home communities in the first nine months of 2011, bringing our total community count, net of communities closed out, at the end of the third quarter to 233, a 10% increase from the prior year. We expect to open approximately 20 additional communities in the fourth quarter of this year. Continuing a strategic emphasis that began in 2009, during the first nine months of 2011, the majority of our land and land development investments and many of our new home community openings have been weighted to California and Texas, which we see as having relatively stronger growth prospects than other areas of the country. Substantially all of the new home communities opened this year feature, or will feature, our value-engineered product and, with the improved operating efficiencies we have implemented, they are expected to generate revenues at a lower cost basis compared to our older communities, helping to restore the profitability of our homebuilding operations. In addition, we have seen our homebuyer profile at several of the communities we have opened this year shift to higher income first-time and move-up consumers, which has resulted in our generating increased revenues from homes delivered from these communities relative to our older communities.

We currently expect our net orders, home deliveries, overall average selling price, revenues and housing gross margin in the fourth quarter of 2011 to increase sequentially, and our selling, general and administrative expenses as a percentage of housing revenues to decrease sequentially, in each case as compared to our third quarter results, generating a corresponding improvement in our operating leverage and bringing our financial metrics into better balance while also driving stronger bottom line results for the second half of the year as compared to the first half. We also expect to end 2011 with a higher number of homes in backlog than we had at year-end 2010. Due to the relatively weak financial results we have experienced in the first three quarters, though, we do not anticipate a net profit for 2011. However, we believe that we will achieve profitability in the fourth quarter of 2011, assuming housing markets remain at or close to current activity levels.

Despite the progress we have made over the past several quarters and our current expectations for the fourth quarter of 2011, our ability to generate positive results from our strategic initiatives, including achieving and maintaining profitability and increasing the number of homes delivered, remains constrained by, among other things, the current unbalanced supply and demand conditions in many housing markets, which are unlikely to abate soon given the present economic and employment environment; by low levels of consumer confidence; by the cautiousness of qualified homebuyers in making home purchase decisions, which we believe is, among other things, moderating the pace of sales at our new home communities; by tight residential consumer mortgage lending standards; and by the reduction in or unwinding of government programs and incentives designed to support homeownership and/or home purchases, including as to applicable limits and standards for government-insured residential consumer mortgage loans. The pace and the extent to which we acquire new land interests, invest in land development and open new home

communities will depend significantly on market and economic conditions, including actual and expected sales rates, and the availability of desirable land assets. It may also depend on the ultimate resolution of the bankruptcy proceedings and related matters

Table of Contents

impacting South Edge (including our anticipated net payment obligation, as discussed above), and on our using or redeploying our unrestricted cash and cash equivalents and/or our engaging in capital market transactions.

Nonetheless, we believe that at our 2011 fiscal year-end we will have a balance of cash and cash equivalents and restricted cash of over \$500 million after funding our anticipated 2011 operating needs (including our anticipated net payment obligation related to South Edge, if satisfied on or before November 30, 2011). While we will continue to evaluate our future cash requirements and financing opportunities available in the capital markets, there is no plan to issue equity.

We continue to believe that a meaningful improvement in housing market conditions will require a sustained decrease in unsold homes, selling price stabilization, reduced mortgage delinquency and foreclosure rates, and a significantly improved economic climate, particularly with respect to job growth and consumer and credit market confidence that support a decision to buy a home. We cannot predict when or the extent to which these events may occur. Moreover, if conditions in our served markets decline further, we may need to take additional pretax, noncash charges for inventory and joint venture impairments and land option contract abandonments, and we may decide that we need to reduce, slow or even abandon our present land acquisition and development and new home community opening plans for those markets. Our present land acquisition and development and new home community opening plans may also be curtailed by the outcome of matters involving South Edge, as noted above. Our results could also be adversely affected if general economic conditions do not notably improve or actually decline, if job losses accelerate or weak employment levels persist, if residential consumer mortgage delinquencies, short sales and foreclosures increase, if residential consumer mortgage lending becomes less available or more expensive, or if consumer confidence weakens, any or all of which could further delay a recovery in housing markets or result in further deterioration in operating conditions, and if competition for home sales intensifies. Despite these difficulties and risks, we believe we are favorably positioned financially and operationally to succeed in advancing our primary strategic goals, particularly in view of longer-term demographic, economic and population-growth trends that we expect will once again drive future demand for homeownership.

Forward-Looking Statements

Investors are cautioned that certain statements contained in this document, as well as some statements by us in periodic press releases and other public disclosures and some oral statements by us to securities analysts and stockholders during presentations, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the Act). Statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as expects, anticipates, intends, plans, believes, estimates, similar expressions constitute forward-looking statements. In addition, any statements concerning future financial or operating performance (including future revenues, homes delivered, net orders, selling prices, expenses, expense ratios, margins, earnings or earnings per share, or growth or growth rates), future market conditions, future interest rates, and other economic conditions, ongoing business strategies or prospects, future dividends and changes in dividend levels, the value of backlog (including amounts that we expect to realize upon delivery of homes included in backlog and the timing of those deliveries), potential future acquisitions and the impact of completed acquisitions, future share repurchases and possible future actions, which may be provided by us, are also forward-looking statements as defined by the Act. Forward-looking statements are based on current expectations and projections about future events and are subject to risks, uncertainties, and assumptions about our operations, economic and market factors, and the homebuilding industry, among other things. These statements are not guarantees of future performance, and we have no specific policy or intention to update these statements.

Actual events and results may differ materially from those expressed or forecasted in forward-looking statements due to a number of factors. The most important risk factors that could cause our actual performance and future events and actions to differ materially from such forward-looking statements include, but are not limited to: general economic, employment and business conditions; adverse market conditions that could result in additional impairments or abandonment charges and operating losses, including an oversupply of unsold homes, declining home prices and increased foreclosure and short sale activity, among other things; conditions in the capital and credit markets (including residential consumer mortgage lending standards, the availability of residential consumer mortgage financing and mortgage foreclosure rates); material prices and availability; labor costs and availability; changes in

interest rates; inflation; our debt level, including our ratio of debt to

Table of Contents

total capital, and our ability to adjust our debt level and structure; weak or declining consumer confidence, either generally or specifically with respect to purchasing homes; competition for home sales from other sellers of new and existing homes, including sellers of homes obtained through foreclosures or short sales; weather conditions, significant natural disasters and other environmental factors; government actions, policies, programs and regulations directed at or affecting the housing market (including, but not limited to, the Dodd-Frank Act, tax credits, tax incentives and/or subsidies for home purchases, tax deductions for residential consumer mortgage interest payments and property taxes, tax exemptions for profits on home sales, and programs intended to modify existing mortgage loans and to prevent mortgage foreclosures), the homebuilding industry, or construction activities; the availability and cost of land in desirable areas and our ability to identify and acquire such land; our warranty claims experience with respect to homes previously delivered and actual warranty costs incurred; legal or regulatory proceedings or claims, including the involuntary bankruptcy and other legal proceedings involving South Edge described in this report; the confirmation by the bankruptcy court of a consensual plan of reorganization for South Edge and the implementation of such a plan in accordance with the terms of the consensual agreement effective June 10, 2011 among us, the Administrative Agent, several of the lenders to South Edge, and certain of the other members of South Edge and their respective parent companies; the ability and/or willingness of participants in our unconsolidated joint ventures to fulfill their obligations; our ability to access capital; our ability to use the net deferred tax assets we have generated; our ability to successfully implement our current and planned product, geographic and market positioning (including, but not limited to, our efforts to expand our inventory base/pipeline with desirable land positions or interests at reasonable cost and to expand the number of our new home communities), revenue growth and cost reduction strategies; consumer traffic to our new home communities and consumer interest in our product designs, including *The Open Series* ; the impact of KBA Mortgage ceasing to accept loan applications effective June 27, 2011 and ceasing to offer mortgage banking services to our homebuyers after June 30, 2011; the manner in which our homebuyers are offered and obtain residential consumer mortgage loans and mortgage banking services; and other events outside of our control. Please see our periodic reports and other filings with the SEC for a further discussion of these and other risks and uncertainties applicable to our business.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

We enter into debt obligations primarily to support general corporate purposes, including the operations of our subsidiaries. We are subject to interest rate risk on our senior notes. For fixed rate debt, changes in interest rates generally affect the fair value of the debt instrument, but not our earnings or cash flows. Under our current policies, we do not use interest rate derivative instruments to manage our exposure to changes in interest rates.

The following table presents principal cash flows by scheduled maturity, weighted average interest rates and the estimated fair value of our long-term debt obligations as of August 31, 2011 (dollars in thousands):

Fiscal Year of Expected Maturity	Fixed Rate Debt	Weighted Average Interest Rate
2011	\$	%
2012		
2013		
2014	249,609	5.8
2015	749,003	6.1
Thereafter	559,710	8.1
 Total	 \$ 1,558,322	 6.8%
 Fair value at August 31, 2011	 \$ 1,378,550	

For additional information regarding our market risk, refer to Item 7A, Quantitative and Qualitative Disclosures About Market Risk in our Annual Report on Form 10-K for the year ended November 30, 2010.

Item 4. Controls and Procedures

We have established disclosure controls and procedures to ensure that information we are required to disclose in the reports we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and accumulated and communicated to management, including the President and Chief Executive Officer (the "Principal Executive Officer") and Executive Vice President and Chief Financial Officer (the "Principal Financial Officer"), as appropriate, to allow timely decisions regarding required disclosure. Under the supervision and with the participation of senior management, including our Principal Executive Officer and our Principal Financial Officer, we evaluated our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934. Based on this evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were effective as of August 31, 2011.

There were no changes in our internal control over financial reporting during the quarter ended August 31, 2011 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings***South Edge, LLC Litigation*

On December 9, 2010, certain lenders to South Edge filed the Petition against South Edge in the United States Bankruptcy Court, District of Nevada, titled *JPMorgan Chase Bank, N.A. v. South Edge, LLC (Case No. 10-32968-bam)*. The petitioning lenders were JPMorgan Chase Bank, N.A., Wells Fargo Bank, N.A., and Crédit Agricole Corporate and Investment Bank. KB HOME Nevada Inc., our wholly-owned subsidiary, is a member of South Edge together with unrelated homebuilders and a third-party property development firm.

The Petition alleged that South Edge failed to undertake certain development-related activities and to repay amounts due on the Loans, that the petitioning lenders were undersecured, and that South Edge was generally not paying its debts as they became due. The Loans were used by South Edge to partially finance both the purchase of certain real property located near Las Vegas, Nevada and the development of a residential community on that property. The Loans are secured by the underlying property and related South Edge assets. As of August 31, 2011, the outstanding principal balance of the Loans was \$327.9 million.

The petitioning lenders also filed a motion to appoint a Chapter 11 trustee for South Edge, and asserted that, among other actions, the trustee can enforce alleged obligations of the South Edge members to purchase land parcels from South Edge, which would likely result in repayment of the Loans, or enforce alleged obligations of the South Edge members to make capital contributions to the South Edge bankruptcy estate. On February 3, 2011, the bankruptcy court entered an order for relief on the Petition and appointed a Chapter 11 trustee for South Edge. The Chapter 11 trustee may or may not pursue remedies proposed by the petitioning lenders, including attempted enforcement of alleged obligations of the South Edge members as described above.

As a result of the February 3, 2011 order for relief on the Petition, we consider it probable that we became responsible to pay certain amounts to the Administrative Agent related to the Springing Guaranty that we provided in connection with the Loans, as discussed further above under Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Off-Balance Sheet Arrangements, Contractual Obligations and Commercial Commitments. Each of KB HOME Nevada Inc., the other members of South Edge and their parent companies provided a similar repayment guaranty to the Administrative Agent.

Effective June 10, 2011, we and the other Participating Members of South Edge became parties to a consensual agreement together with the Administrative Agent and several of the lenders to South Edge, as discussed above under Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Off-Balance Sheet Arrangements, Contractual Obligations and Commercial Commitments. The Chapter 11 trustee for South Edge has expressed its consent to the agreement. Each of the parties has agreed to use commercially reasonable efforts to support the Plan, to obtain bankruptcy court approval of a disclosure statement that will accompany the Plan, to obtain bankruptcy court confirmation of the Plan following, and subject to, the bankruptcy court's approval of a disclosure statement, to obtain the requisite support of the South Edge lenders to the Plan, and to consummate the Plan promptly after confirmation, in each case by certain specified dates. Under the agreement, the effective date of the Plan following its confirmation is to occur on or before November 30, 2011, though it may be extended by the Participating Members and the Administrative Agent jointly by up to 30 days, depending on the date of Plan confirmation.

Pursuant to the terms of the Plan, we would pay to the South Edge lenders an amount between approximately \$214 million and \$225 million on the effective date of the Plan. We have deposited \$21.4 million of this amount in an escrow account, which is reflected as restricted cash in our consolidated balance sheet as of August 31, 2011. The other Participating Members also would pay certain amounts to the South Edge lenders on the effective date of the Plan and have similarly deposited amounts into an escrow account. The exact sum that we and the other Participating Members would pay to the South Edge lenders depends on the outcome of proceedings the Chapter 11 trustee for South Edge has commenced against, among others, a South Edge member that is not a Participating Member in order to determine the amount of pledged infrastructure development funds that can be applied to the South Edge debt. In addition to their payments to the South Edge lenders, we and the other Participating Members would each be responsible for certain fees, expenses and charges and for certain allowed general unsecured claims, and would receive the benefit of potential contributions and recoveries that would, in the aggregate, affect our respective costs

related to the Plan. Taking all of this into account, we

Table of Contents

estimate that our probable net payment obligation under the terms of the consensual agreement effective June 10, 2011 regarding the Plan is \$226.4 million, though it could possibly be as high as \$240 million.

If the Plan becomes effective, we anticipate that we would (a) acquire our share of the land owned by South Edge (amounting to at least approximately 65% of the land and as much as approximately 68%) as a result of a bankruptcy court-approved disposition of the land to a newly created entity in which we would expect to be a part owner, and (b) without further payment, satisfy or assume the respective liens of the Administrative Agent and the South Edge lenders on the land. In addition, if the Plan becomes effective, we anticipate that all South Edge-related claims, potential guaranty obligations (including our potential Springing Guaranty obligation), and litigation between the Administrative Agent (on behalf of itself and the South Edge lenders) and the Participating Members would be resolved, although lenders holding less than 8% ownership in the Loans made to South Edge that are not currently expected to consent to the Plan and members of South Edge that are not Participating Members may assert certain claims against us, which claims we would vigorously dispute.

The agreement may be terminated by the Administrative Agent or the Participating Members upon the occurrence of certain specified events, including a failure to meet the specified dates on which the above-described activities in support of the Plan are to occur. On September 8, 2011, the bankruptcy court approved a disclosure statement designed to implement the Plan, and a hearing to confirm the Plan is scheduled for October 17, 2011. As of the date of this report, we believe that the other Participating Members, the Administrative Agent and the South Edge lenders that are party to the agreement are able to and will fulfill their respective obligations as contemplated under the Plan if it becomes effective.

The Administrative Agent had previously filed the Lender Litigation. The Lender Litigation seeks to enforce completion guarantees provided to the Administrative Agent in connection with the Loans, seeks to compel the South Edge members (including KB HOME Nevada Inc.) to purchase land parcels from South Edge, seeks to compel the South Edge members to provide certain financial support to South Edge, and also seeks various damages based on other guarantees and claims. The Lender Litigation has been stayed in light of the South Edge bankruptcy and, as stated above, would be resolved between the Administrative Agent (on behalf of itself and the South Edge lenders consenting to the Plan) and the Participating Members if the Plan becomes effective.

A separate arbitration proceeding was also commenced in May 2009 to address one South Edge member's claims for specific performance by the other members to purchase land parcels from and to make certain capital contributions to South Edge or, in the alternative, damages. On July 6, 2010, the arbitration panel issued a decision denying the specific performance and damages claim asserted on behalf of South Edge, but the panel awarded the claimant damages of \$36.8 million against all of the respondents. Motions to partially vacate the award were denied and judgment was entered on the award, which the respondents have appealed to the United States Courts of Appeal for the Ninth Circuit, titled *Focus South Group, LLC, et al. v. KB HOME Nevada Inc, et al.*, (Case No. 10-17562). The appeal is pending. If the appeals of the arbitration panel's July 6, 2010 decision ultimately are not successful, we have estimated that our probable maximum share of the \$36.8 million awarded as damages to the claimant in the arbitration is approximately \$25.5 million. This estimate is based on KB HOME Nevada Inc.'s interest in South Edge in relation to that of the other four respondents in the arbitration and our assumption that liability for the awarded amount would be joint and several among the five respondents. Although the appeal remains pending, we have since the third quarter of 2010 segregated an accrual for \$25.5 million for this matter from our previously established reserve balances relating to South Edge. The ultimate amount of our share, however, could be subject to negotiations and/or potential arbitration among all of the respondents in the arbitration. The accrual for this matter is separate from the accrual we established with respect to our probable net payment obligation related to South Edge.

The ultimate resolution of the South Edge bankruptcy, the Lender Litigation and the appeal of the arbitration panel decision, and the time at which any resolution is reached with respect to each matter, are uncertain and involve multiple factors, including whether the Plan becomes effective, the actions of the Chapter 11 trustee for South Edge, and court decisions. Further, the ultimate resolution of the South Edge bankruptcy (including with respect to our anticipated net payment obligation related to South Edge), the Lender Litigation and the appeal of the arbitration panel decision could have a material effect on our liquidity, as further discussed above under Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources.

In addition to the specific proceedings described above, we are involved in other litigation and regulatory proceedings incidental to our business that are in various procedural stages. We believe that the accruals we have recorded for probable and reasonably estimable losses with respect to these proceedings are adequate and that, as

Table of Contents

of August 31, 2011, it was not reasonably possible that an additional material loss had been incurred in an amount in excess of the estimated amounts already recognized on our consolidated financial statements. We evaluate our accruals for litigation and regulatory proceedings at least quarterly and, as appropriate, adjust them to reflect (i) the facts and circumstances known to us at the time, including information regarding negotiations, settlements, rulings and other relevant events and developments; (ii) the advice and analyses of counsel; and (iii) the assumptions and judgment of management. Similar factors and considerations are used in establishing new accruals for proceedings as to which losses have become probable and reasonably estimable at the time an evaluation is made. Based on our experience, we believe that the amounts that may be claimed or alleged against us in these proceedings are not a meaningful indicator of our potential liability. The outcome of any of these proceedings, including the defense and other litigation-related costs and expenses we may incur, however, is inherently uncertain and could differ significantly from the estimate reflected in a related accrual, if made. Therefore, it is possible that the ultimate outcome of any proceeding, if in excess of a related accrual or if no accrual had been made, could be material to our consolidated financial statements.

Item 1A. Risk Factors

There have been no material changes to the risk factors we previously disclosed in our Annual Report on Form 10-K for the year ended November 30, 2010.
