Table of Contents

**UNITED STATES SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549**

**Form 10-K**

- o** **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.**  
**For the fiscal year ended December 31, 2006**
- o** **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.**  
**For the transition period from            to**

**Commission file number 000-50350**

**NETGEAR, Inc.**

*(Exact name of registrant as specified in its charter)*

**Delaware**

*(State or other jurisdiction of  
incorporation or organization)*

**77-0419172**

*(I.R.S. Employer  
Identification No.)*

**4500 Great America Parkway,  
Santa Clara, California**

*(Address of principal executive offices)*

**95054**

*(Zip Code)*

**(Registrant's telephone number, including area code)  
(408) 907-8000**

**Securities registered pursuant to Section 12(b) of the Act:  
Common Stock, par value \$0.001**

**Securities registered pursuant to 12(g) of the Act:  
None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Edgar Filing: NETGEAR, INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer (as defined in Rule 12b-2 of the Act).

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act.) Yes  No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the Registrant as of July 2, 2006, was approximately \$643,599,531. Such aggregate market value was computed by reference to the closing price of the common stock as reported on the Nasdaq National Market on June 30, 2006 (the last business day of the Registrant's most recently completed fiscal second quarter).

The number of outstanding shares of the registrant's Common Stock, \$0.001 par value, was 34,323,928 shares as of February 16, 2007.

#### **DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the Proxy Statement for the Registrant's 2007 Annual Meeting of Stockholders are incorporated by reference in Part III of this Form 10-K.

**PART I**

This Form 10-K, including Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 below, includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts contained in this Form 10-K, including statements regarding our future financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. The words believe, may, will, estimate, continue, anticipate, intend, should, plan, expect and similar words, when used in relation to us, are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions described in Risk Factors in Part I, Item 1A below, and elsewhere in this Form 10-K, including, among other things: the future growth of the small business and home markets; speed of adoption of wireless networking worldwide; our business strategies and development plans; our successful introduction of new products and technologies; future operating expenses and financing requirements; and competition and competitive factors in the small business and home markets. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Form 10-K may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. All forward-looking statements in this Form 10-K are based on information available to us as of the date hereof and we assume no obligation to update any such forward-looking statements. The following discussion should be read in conjunction with our consolidated financial statements and the accompanying notes contained in this Form 10-K.

**Item 1. Business**

**General**

We design, develop and market networking products for home users and for small business, which we define as a business with fewer than 250 employees. We are focused on satisfying the ease-of-use, quality, reliability, performance and affordability requirements of these users. Our product offerings enable users to connect and communicate across local area networks and the World Wide Web and share Internet access, peripherals, files, digital multimedia content and applications among multiple personal computers, or PCs, and other Internet-enabled devices. We sell our products primarily through a global sales channel network, which includes traditional retailers, online retailers, direct market resellers, or DMRs, value added resellers, or VARs, and broadband service providers. A discussion of factors potentially affecting our operations is set forth in Risk Factors, under Part I, Item 1A of this Form 10-K.

We were incorporated in Delaware on January 8, 1996. Our principal executive offices are located at 4500 Great America Parkway, Santa Clara, California 95054, and our telephone number at that location is (408) 907-8000. We file reports, proxy statements and other information with the Securities and Exchange Commission, or SEC, in accordance with the Securities Exchange Act of 1934, as amended, or the Exchange Act. You may read and copy our reports, proxy statements and other information filed by us at the public reference room of the SEC located at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information about the public reference rooms. Our filings are also available to the public over the Internet at the SEC's website at <http://www.sec.gov>, and, as soon as practicable after such reports are filed with the SEC, free of charge through a hyperlink on our Internet website at <http://www.netgear.com>. Information contained on the website is not a part of this Form 10-K.

**Markets**

Our objective is to be the leading provider of innovative networking products to the small business and home markets. A number of factors are driving today's increasing demand for networking products within small businesses and homes. As the number of computing devices, such as PCs, has increased in recent years, networks are being deployed in order to share information and resources among users and devices. This information and resource sharing occurs internally, through a local area network, or LAN, or externally, via the Internet. To take

## **Table of Contents**

advantage of complex applications, advanced communication capabilities and rich multimedia content, users are upgrading their Internet connections by deploying high-speed broadband access technologies. Users also seek the convenience and flexibility of operating their PCs, laptops and related computing devices in a more mobile, or wireless, manner. Finally, as the usage of networks, including the Internet, has increased, users have become much more focused on the security of their connections and the protection of the data within their networks.

Small business and home users demand a complete set of wired and wireless networking and broadband solutions that are tailored to their specific needs and budgets and also incorporate the latest networking technologies. These users require the continual introduction of new and refined products. Small business and home users often lack extensive IT resources and technical knowledge and therefore demand plug-and-play or easy-to-install and use solutions. These users seek reliable products that require little or no maintenance, and are supported by effective technical support and customer service. We believe that these users also prefer the convenience of obtaining a networking solution from a single company with whom they are familiar; as these users expand their networks, they tend to be loyal purchasers of that brand. In addition, purchasing decisions of users in the small business and home markets are also driven by the affordability of networking products. To provide reliable, easy-to-use products at an attractive price, we believe a successful supplier must have a company-wide focus on the unique requirements of these markets and the operational discipline and cost-efficient company infrastructure and processes that allow for efficient product development, manufacturing and distribution.

## **Sales Channels**

We sell our products through multiple sales channels worldwide, including traditional retailers, online retailers, wholesale distributors, DMRs, VARs, and broadband service providers.

*Retailers.* Our retail channel primarily supplies products that are sold into the home market. We sell directly to, or enter into consignment arrangements with, a number of our traditional retailers. The remaining traditional retailers, as well as our online retailers, are fulfilled through wholesale distributors, the largest of which are Ingram Micro, Inc. and Tech Data Corporation. We work directly with our retail channels on market development activities, such as co-advertising, in-store promotions and demonstrations, instant rebate programs, event sponsorship and sales associate training, as well as establishing store within a store websites and banner advertising.

*DMRs and VARs.* We primarily sell into the small business market through an extensive network of DMRs and VARs. Our DMRs include companies such as CDW and Insight. VARs include our network of registered Powershift Partners, or resellers who achieve prescribed quarterly sales goals and as a result may receive sales incentives, marketing support and other program benefits from us. Our products are also resold by a large number of smaller VARs whose sales are not large enough to qualify them for our Powershift Partner program. Our DMRs and VARs generally purchase our products through our wholesale distributors, primarily Ingram Micro, Inc. and Tech Data Corporation.

*Broadband Service Providers.* We also supply our products directly to broadband service providers in the United States and internationally, who distribute our products to their small business and home subscribers.

We derive the majority of our net revenue from international sales. International sales as a percentage of net revenue grew from 56% in 2005 to 62% in 2006. Sales in Europe, Middle-East and Africa, or EMEA, grew from \$200.0 million in 2005 to \$298.2 million in 2006, representing an increase of approximately 49% during that period. We continue to penetrate new markets such as Brazil, Eastern Europe, India, and the Middle-East. The table below sets forth our net revenue by major geographic region.

	<b>Year Ended December 31,</b>				
	<b>2004</b>	<b>Percentage Change</b>	<b>2005</b>	<b>Percentage Change</b>	<b>2006</b>
	<b>(In thousands, except percentage data)</b>				
United States	\$ 186,836	7%	\$ 199,208	11%	\$ 220,440
EMEA	159,615	25%	199,951	49%	298,234
Asia Pacific and rest of world	36,688	38%	50,451	9%	54,896
Total	\$ 383,139	17%	\$ 449,610	28%	\$ 573,570

**Table of Contents**

Revenues from significant customers as a percentage of our total revenues for the years ended December 31, 2004, 2005 and 2006 were as follows:

	<b>Year Ended December 31,</b>		
	<b>2004</b>	<b>2005</b>	<b>2006</b>
Ingram Micro, Inc.	27%	25%	19%
Tech Data Corporation	18%	17%	16%

**Product Offerings**

Our product line consists of wired and wireless devices that enable Ethernet networking, broadband access, and network connectivity. These products are available in multiple configurations to address the needs of our customers in each geographic region in which our products are sold.

*Ethernet networking.* Ethernet is the most commonly used wired network protocol for connecting devices in today's home and small-office networks. Products that enable Ethernet networking include:

switches, which are multiple port devices used to network PCs and peripherals;

network interface cards, adapters and bridges, that enable PCs and other equipment to be connected to a network;

peripheral servers, such as print servers that manage printing on a network, and disk servers which manage shared disks on the network; and

VPN firewalls, which provide secure remote network access and anti-virus and anti-spam capabilities.

*Broadband Access.* Broadband is a transmission medium capable of moving more information and at a higher speed over public networks than traditional narrowband frequencies. Products that enable broadband access include:

routers, which are used to connect two networks together, such as the home or office network and the Internet;

gateways, or routers with an integrated modem, for Internet access;

IP telephony products, used for transmitting voice communications over a network; and

wireless gateways, or gateways that include an integrated wireless access point.

*Network Connectivity.* Products that enable network connectivity and resource sharing include:

wireless access points, which provide a wireless link between a wired network and wireless devices;

wireless network interface cards and adapters, which enable devices to be connected to the network wirelessly;

media adapters, which connect PCs, stereos, TVs and other equipment to a network;

wi-fi phones, which enable users to make voice calls over the Internet;

network attached storage, which enables file sharing and remote storage over a local area network; and

powerline adapters and bridges, which enable devices to be connected to the network over existing electrical wiring.

We design our products to meet the specific needs of both the small business and home markets, tailoring various elements of the product design, including component specification, physical characteristics such as casing, design and coloration, and specific user interface features to meet the needs of these markets. We also leverage many of our technological developments, high volume manufacturing, technical support and engineering infrastructure across our markets to maximize business efficiencies.

## **Table of Contents**

Our products that target the small business market are designed with an industrial appearance, including metal cases, and for some product categories, the ability to mount the product within standard data networking racks. These products typically include higher port counts, higher data transfer rates and other performance characteristics designed to meet the needs of a small business user. For example, we offer data transfer rates up to ten Gigabit per second for our business products to meet the higher capacity requirements of business users. Some of these products are also designed to support transmission modes such as fiber optic cabling, which is common in more sophisticated business environments. Security requirements within our products for small business broadband access include firewall and virtual private network capabilities that allow for secure interactions between remote offices and business headquarter locations. Our connectivity product offerings for the small business market include enhanced security and remote configurability often required in a business setting.

Our products for the home user are designed with pleasing visual and physical aesthetics that are more desirable in a home environment. For example, our RangeMax series of routers have distinctive blue antenna-indicator LEDs in a circular dome atop a sleek white plastic casing. Our connectivity offerings for use in the home are generally at a lower price than higher security and configurability wireless offerings for the small business market. Our products for facilitating broadband access in the home are available with features such as parental control capabilities and firewall security, to allow for safer, more controlled Internet usage in families with children. Our broadband products designed for the home market also contain advanced installation software that guides a less sophisticated data networking user through the installation process with their broadband service provider, using a graphical user interface and simple point and click operations. Our connectivity product offerings for the home include powerline data transmission modes which allow home users to take advantage of their existing electrical wiring infrastructure for transmitting data among network components.

## **Competition**

The small business and home networking markets are intensely competitive and subject to rapid technological change. We expect competition to continue to intensify. Our principal competitors include:

within the small business networking market, companies such as 3Com, Allied Telesyn, the Linksys division of Cisco Systems, Dell Computer, D-Link, Hewlett-Packard, Nortel Networks, and SonicWall, Inc.; and

within the home networking market, companies such as Belkin Corporation, D-Link, and the Linksys division of Cisco Systems.

Other current competitors include numerous local vendors such as Siemens Corporation and AVM in Europe, Corega International SA and Melco, Inc./Buffalo Technology in Japan and TP-Link in China, and broadband equipment suppliers such as ARRIS Group, Inc., Motorola, Inc., Sagem Corporation, Scientific Atlanta, a Cisco company, Terayon Communications Systems, Inc., Thomson Corporation and 2Wire, Inc. Our potential competitors include consumer electronics vendors and telecommunications equipment vendors who could integrate networking capabilities into their line of products, and our channel customers who may decide to offer self-branded networking products. We also face competition from service providers who may bundle a free networking device with their broadband service offering, which would reduce our sales if we are not the supplier of choice to those service providers.

Many of our existing and potential competitors have longer operating histories, greater name recognition and substantially greater financial, technical, sales, marketing and other resources. As a result, they may have more advanced technology, larger distribution channels, stronger brand names, better customer service and access to more customers than we do. For example, Dell Computer has significant brand name recognition and has an advertising

presence substantially greater than ours. Similarly, Cisco Systems is well recognized as a leader in providing networking solutions to businesses and has substantially greater financial resources than we do. Several of our competitors, such as the Linksys division of Cisco Systems and D-Link, offer a range of products that directly compete with most of our product offerings. Several of our other competitors primarily compete in a more limited manner. For example, Hewlett-Packard sells networking products primarily targeted at larger businesses or enterprises. However, the competitive environment in which we operate changes rapidly. Other large companies with significant resources could become direct competitors, either through acquiring a competitor or through internal efforts.

## **Table of Contents**

We believe that the principal competitive factors in the small business and home markets for networking products include product breadth, size and scope of the sales channel, brand name, timeliness of new product introductions, product performance, features, functionality and reliability, price, ease-of-installation, maintenance and use, and customer service and support.

To remain competitive, we believe we must invest significant resources in developing new products, enhancing our current products, expanding our sales channels and maintaining customer satisfaction worldwide.

## **Research and Development**

As of December 31, 2006, we had 62 employees engaged in research and development. We believe that our success depends on our ability to develop products that meet the changing user needs and to anticipate and proactively respond to evolving technology in a timely and cost-effective manner. Accordingly, we have made investments in our research and development department in order to effectively evaluate new technologies and develop and test new products. Our research and development employees work closely with our technology and manufacturing partners to bring our products to market in a timely, high quality and cost-efficient manner.

We identify and qualify new technologies, and we work closely with our various technology suppliers and manufacturing partners to develop products using one of the two manufacturing methodologies described below.

*ODM.* Under the original design manufacturer, or ODM, methodology, which we use for most of our product development activities, we define the product concept and specification and perform the technology selection. We then coordinate with our technology suppliers while they develop the chipsets, software and detailed circuit designs. Once prototypes are completed, we work with our partners to complete the debugging and systems integration and testing. Our ODMs are responsible for conducting all of the regulatory agency approval processes required for each product. After completion of the final tests, agency approvals and product documentation, the product is released for production.

*OEM.* Under the original equipment manufacturer, or OEM, methodology, which we use for a limited number of products, we define the product specification and then purchase the product from OEM suppliers that have existing products fitting our design requirements. Once a technology supplier's product is selected, we work with the OEM supplier to complete the cosmetic changes to fit into our mechanical and packaging design, as well as our documentation and graphical user interface, or GUI, standard. The OEM supplier completes regulatory approvals on our behalf. When all design verification and regulatory testing is completed, the product is released for production.

Our internal research and development efforts focus on improving the reliability, functionality, cost and performance of our partner's designs. In addition, we define the industrial design, GUI, documentation and installation process of our products. In August 2006, we acquired SkipJam Corp. ( SkipJam ), a developer of networkable media devices for integrating television into the home network and to the Internet for entertainment content streaming. Our total research and development expenses were \$18.4 million in 2006, \$12.8 million in 2005 and \$10.3 million in 2004.

## **Manufacturing**

Our primary manufacturers are ASUSTek Computer, Inc., Cameo Communications Inc., Delta Networks Incorporated, Gemtek Technology Co., Hon Hai Precision Industry Co., Ltd. (more commonly known as Foxconn Corporation), and SerComm Corporation, all of which are headquartered in Taiwan. The actual manufacturing of our products occurs primarily in mainland China, and is supplemented with manufacturing in Taiwan on a select basis. We distribute our manufacturing among these key suppliers to avoid excessive concentration with a single supplier. In

addition to their responsibility for the manufacturing of our products, our manufacturers purchase all necessary parts and materials to produce complete, finished goods. To maintain quality standards for our suppliers, we have established our own product testing and quality organization based in Hong Kong and mainland China. They are responsible for auditing and inspecting product quality on the premises of our ODMs and OEMs.

We currently outsource warehousing and distribution logistics to four third-party providers who are responsible for warehousing, distribution logistics and order fulfillment. In addition, these parties are also responsible for

## **Table of Contents**

some re-packaging of our products including bundling components to form kits, inserting appropriate documentation and adding power adapters. APL Logistics Americas, Ltd. in City of Industry, California serves the Americas region, Kerry Logistics Ltd. in Hong Kong serves the Asia Pacific region, and Furness Logistics BV and ModusLink BV in the Netherlands serve the EMEA region.

## **Sales and Marketing**

As of December 31, 2006, we had 187 employees engaged in sales and marketing. We work directly with our customers on market development activities, such as co-advertising, in-store promotions and demonstrations, instant rebate programs, event sponsorship and sales associate training. We also participate in major industry trade shows and marketing events. Our marketing department is comprised of our product marketing and corporate marketing groups.

Our product marketing group focuses on product strategy, product development roadmaps, the new product introduction process, product lifecycle management, demand assessment and competitive analysis. The group works closely with our sales and research and development groups to align our product development roadmap to meet customer technology demands from a strategic perspective. The group also ensures that product development activities, product launches, channel marketing program activities, and ongoing demand and supply planning occur in a well-managed, timely basis in coordination with our development, manufacturing, and sales groups, as well as our ODM, OEM and sales channel partners.

Our corporate marketing group is responsible for defining and building our corporate brand. The group focuses on defining our mission, brand promise and marketing messages on a worldwide basis. This group also defines the marketing approaches in the areas of advertising, public relations, events, channel programs and our web delivery mechanisms. These marketing messages and approaches are customized for both the small business and home markets through a variety of delivery mechanisms designed to effectively reach end-users in a cost-efficient manner.

We conduct much of our international sales and marketing operations through NETGEAR International, Inc. and NETGEAR International Ltd., our wholly-owned subsidiaries which have formed sales and marketing subsidiaries and branch offices worldwide.

## **Technical Support**

We provide technical support to our customers through a combination of limited number of permanent employees and extensive use of subcontracted, out-sourcing resources. Although we design our products to require minimal technical support, if a customer requires assistance, we generally provide free, high-quality technical advice worldwide over the phone and Internet for a specified period of time, generally less than one year. We currently subcontract first level and the majority of second level technical support for our products and as of December 31, 2006, we were utilizing approximately 720 part-time and full-time individuals to answer customers technical questions. First level technical support represents the first team member a customer will reach with questions; and, typically, these individuals are able to answer routine technical questions. If they are unable to resolve the issue, the first level support member will forward the customer to our more highly trained second level support group. The most difficult or unique questions are forwarded to NETGEAR employees. This 20 person in-house staff provides the most sophisticated support when customer issues require escalation.

In addition to providing third level technical support, these internal NETGEAR employees design our technical support database and are responsible for training and managing our outsourced sub-contractors. We utilize the information gained from customers by our technical support organization to enhance our current and future products by providing bug fixes, simplifying the installation process and planning future product needs.

In North America, the United Kingdom, South East Asia and Australia, the first and second level technical support in English is provided 24 hours a day, 7 days a week, 365 days a year. Local language support is also available during local business hours in Austria, Switzerland, China, France, Germany, Italy, Japan, Korea, Spain, Thailand, Brazil, Hungary, Russia, the Nordic countries, Belgium and the Netherlands.

**Table of Contents****Intellectual Property**

We believe that our continued success will depend primarily on the technical expertise, speed of technology implementation, creative skills and management abilities of our officers and key employees, plus ownership of a limited but important set of copyrights, trademarks, trade secrets and patents. We primarily rely on a combination of copyright, trademark and trade secret and patent laws, nondisclosure agreements with employees, consultants and suppliers and other contractual provisions to establish, maintain and protect our proprietary rights. We hold two issued patents that expire between years 2023 and 2025 and currently have a number of pending United States patent applications related to technology and products offered by us. In addition, we rely on third-party licensors for patented hardware and software license rights in technology that are incorporated into and are necessary for the operation and functionality of our products. We typically retain limited exclusivity over intellectual property we jointly develop with our OEMs and ODMs. Our success will depend in part on our continued ability to have access to these technologies.

We have trade secret rights for our products, consisting mainly of product design, technical product documentation and software. We also own, or have applied for registration of trademarks, in connection with our products, including NETGEAR, the NETGEAR logo, the NETGEAR Digital Entertainer logo, the Gear Guy logo, Connect with Innovation, Everybody's connecting, IntelliFi, ProSafe, RangeMax and Smart Wizard, in the United States and internationally. We have registered several Internet domain names that we use for electronic interaction with our customers including dissemination of product information, marketing programs, product registration, sales activities, and other commercial uses.

**Employees**

As of December 31, 2006, we had 388 full-time employees, with 207 in sales, marketing and technical support, 62 in research and development, 53 in operations, and 66 in finance, information systems and administration. We also utilize a number of temporary staff, including 15 full-time contractors, to supplement our workforce. We have never had a work stoppage among our employees and no personnel are represented under collective bargaining agreements. We consider our relations with our employees to be good.

**Website Posting of SEC Filings**

Our website provides a link to our SEC filings, which are available on the same day such filings are made. The specific location on the website where these reports can be found is <http://www.investor.netgear.com/edgar.cfm>. Our website also provides a link to Section 16 filings which are available on the same day as such filings are made.

**Executive Officers of the Registrant**

The following table sets forth the names, ages and positions of our executive officers (who are subject to Section 16 of the Securities Exchange Act of 1934) as of March 1, 2007.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Patrick C.S. Lo	50	Chairman and Chief Executive Officer
Mark G. Merrill	52	Chief Technology Officer
Michael F. Falcon	50	Senior Vice President of Operations
Christine M. Gorjanc	50	Chief Accounting Officer
Albert Y. Liu	34	Vice President, Legal and Corporate Development

Edgar Filing: NETGEAR, INC - Form 10-K

Charles T. Olson	51	Senior Vice President of Engineering
David Soares	40	Senior Vice President of Worldwide Sales and Support
Michael A. Werdann	38	Vice President of Americas Sales
Deborah A. Williams	49	Senior Vice President, Marketing and Chief Marketing Officer

**Table of Contents**

*Patrick C.S. Lo* has served as our Chairman and Chief Executive Officer since March 2002. From September 1999 to March 2002, he served as our President, and since our inception in 1996 to September 1999, he served as Vice President and General Manager. Mr. Lo joined Bay Networks, a networking company, in August 1995 to launch a division targeting the small business and home markets and established the NETGEAR division in January 1996. From 1983 until 1995, Mr. Lo worked at Hewlett-Packard Company, a computer and test equipment company, where he served in various management positions in software sales, technical support, network product management, sales support and marketing in the United States and Asia, including as the Asia/Pacific marketing director for Unix servers. Mr. Lo received a B.S. degree in Electrical Engineering from Brown University.

*Mark G. Merrill* has served as our Chief Technology Officer since January 2003. From September 1999 to January 2003, he served as Vice President of Engineering and served as Director of Engineering from September 1995 to September 1999. From 1987 to 1995, Mr. Merrill worked at SynOptics Communications, a local area networking company, which later merged with Wellfleet to become Bay Networks, where his responsibilities included system design and analog implementations for SynOptic's first 10BASE-T products. Mr. Merrill received both a B.S. degree and an M.S. degree in Electrical Engineering from Stanford University.

*Michael F. Falcon* has served as our Senior Vice President of Operations since March 2006 and Vice President of Operations since November 2002. From September 1999 to November 2002, Mr. Falcon worked at Quantum Corporation, a data technology company, where he served as Vice President of Operations and Supply Chain Management. From April 1999 to September 1999, Mr. Falcon was at Meridian Data, a storage company acquired by Quantum Corporation, where he served as Vice President of Operations. From February 1989 to April 1999, Mr. Falcon was at Silicon Valley Group, a semiconductor equipment manufacturer, where he served as Director of Operations, Strategic Planning and Supply Chain Management. Prior to that, he served in management positions at SCI Systems, an electronics manufacturer, Xerox Imaging Systems, a provider of scanning and text recognition solutions, and Plantronics, Inc., a provider of lightweight communication headsets. Mr. Falcon received a B.A. degree in Economics from the University of California, Santa Cruz and has completed coursework in the M.B.A. program at Santa Clara University.

*Christine M. Gorjanc* has served as our Chief Accounting Officer since December 2006 and our Vice President, Finance since November 2005. From September 1996 through November 2005, Ms. Gorjanc served as Vice President, Controller, Treasurer and Assistant Secretary for Aspect Communications Corporation, a provider of workforce and customer management solutions. From October 1988 through September 1996, she served as the Manager of Tax for Tandem Computers, Inc., a provider of fault-tolerant computer systems. Prior to that, she served in management positions at Xidex Corporation, a manufacturer of storage devices, and spent eight years in public accounting with a number of accounting firms. Ms. Gorjanc holds a B.A. in Accounting (with honors) from the University of Texas at El Paso, a M.S. in Taxation from Golden Gate University, and is a Certified Public Accountant.

*Albert Y. Liu* has served as our Vice President, Legal and Corporate Development and Corporate Secretary since March 2006 and our General Counsel and Secretary since October 2004. From March 2004 to October 2004, Mr. Liu consulted as Acting General Counsel and Secretary for Yipes Enterprise Services, Inc., an emerging telecom services company. From May 2000 to June 2004, Mr. Liu worked at Turnstone Systems, Inc., a telecommunications equipment provider, where he served as General Counsel and Secretary, as Director of Human Resources since September 2001 and as a member of the board of directors since November 2003. Prior to that, Mr. Liu practiced corporate and securities law at Sullivan & Cromwell, a leading U.S. law firm, from October 1997 to May 2000. Mr. Liu holds a J.D. from the University of California, Hastings College of the Law, and an A.B. in Political Science and a B.S. in Computer Science from Stanford University.

*Charles T. Olson* has served as our Senior Vice President of Engineering since March 2006 and our Vice President of Engineering since January 2003. From July 1978 to January 2003, Mr. Olson worked at Hewlett-Packard Company, a

computer and test equipment company, where he served as Director of Research and Development for ProCurve networking from 1998 to 2003, as Research and Development Manager for the Enterprise Netserver division from 1997 to 1998, and, prior to that, in various other engineering management roles in Hewlett-Packard's Unix server and personal computer product divisions. Mr. Olson received a B.S. degree in Electrical Engineering from the University of California, Davis and an M.B.A. from Santa Clara University.

**Table of Contents**

*David Soares* has served as our Senior Vice President of Worldwide Sales and Support since August 2004. Mr. Soares joined us in January 1998, and served as Vice President of EMEA sales from December 2003 to July 2004, EMEA Managing Director from April 2000 to November 2003, United Kingdom and Nordic Regional Manager from February 1999 to March 2000 and United Kingdom Country Manager from January 1998 to January 1999. Prior to joining us, Mr. Soares was at Hayes Microcomputer Products, a manufacturer of dial-up modems. Mr. Soares attended Ridley College, Ontario Canada.

*Michael A. Werdann* has served as our Vice President of Americas Sales since December 2003. Since joining us in 1998, Mr. Werdann has served as our United States Director of Sales, E-Commerce and DMR from December 2002 to 2003 and as our Eastern regional sales director from October 1998 to December 2002. Prior to joining us, Mr. Werdann worked for three years at Iomega Corporation, a computer hardware company, as a sales director for the value added reseller sector. Mr. Werdann holds a B.S. Degree in Communications from Seton Hall University.

*Deborah A. Williams* has served as our Senior Vice President, Marketing and Chief Marketing Officer since September 2006. From 1984 through 2005, Ms. Williams worked at Hewlett-Packard Company, a computer and test equipment company, where she held various executive-level marketing positions, most recently as Vice President of Marketing for the Business Imaging and Printing Global Business Unit. Ms. Williams previously served as Vice President of Marketing of the LaserJet Supplies Division, Vice President of Category Operations and Marketing of the Supplies Global Business Unit, Director of Marketing of the DeskJet Printers Division, Director of Consumer Marketing of the European Peripherals Group, and Director of Support of the European Computer Products Sales Unit. Ms. Williams holds a B.A. in Industrial Distribution from Clarkson University, and an M.B.A. from the J.L. Kellogg Graduate School of Management.

**Item 1A. Risk Factors**

*Investing in our common stock involves a high degree of risk. The risks described below are not exhaustive of the risks that might affect our business. Other risks, including those we currently deem immaterial, may also impact our business. Any of the following risks could materially adversely affect our business operations, results of operations and financial condition and could result in a significant decline in our stock price.*

***We expect our operating results to fluctuate on a quarterly and annual basis, which could cause our stock price to fluctuate or decline.***

Our operating results are difficult to predict and may fluctuate substantially from quarter-to-quarter or year-to-year for a variety of reasons, many of which are beyond our control. If our actual revenue were to fall below our estimates or the expectations of public market analysts or investors, our quarterly and annual results would be negatively impacted and the price of our stock could decline. Other factors that could affect our quarterly and annual operating results include those listed in this risk factors section of this Form 10-K and others such as:

changes in the pricing policies of or the introduction of new products by us or our competitors;

changes in the terms of our contracts with customers or suppliers that cause us to incur additional expenses or assume additional liabilities;

slow or negative growth in the networking product, personal computer, Internet infrastructure, home electronics and related technology markets, as well as decreased demand for Internet access;

changes in or consolidation of our sales channels and wholesale distributor relationships or failure to manage our sales channel inventory and warehousing requirements;

delay or failure to fulfill orders for our products on a timely basis;

our inability to accurately forecast product demand;

unfavorable level of inventory and turns;

unanticipated shift in overall product mix from higher to lower margin products which would adversely impact our margins;

**Table of Contents**

delays in the introduction of new products by us or market acceptance of these products;

an increase in price protection claims, redemptions of marketing rebates, product warranty returns or allowance for doubtful accounts;

operational disruptions, such as transportation delays or failure of our order processing system, particularly if they occur at the end of a fiscal quarter;

seasonal patterns of higher sales during the second half of our fiscal year, particularly retail-related sales in our fourth quarter;

delay or failure of our service provider customers to purchase at the volumes that we forecast;

foreign currency exchange rate fluctuations in the jurisdictions where we transact sales in local currency;

bad debt exposure as we expand into new international markets; and

changes in accounting rules, such as recording expenses for employee stock option grants.

As a result, period-to-period comparisons of our operating results may not be meaningful, and you should not rely on them as an indication of our future performance. In addition, our future operating results may fall below the expectations of public market analysts or investors. In this event, our stock price could decline significantly.

***Some of our competitors have substantially greater resources than we do, and to be competitive we may be required to lower our prices or increase our advertising expenditures or other expenses, which could result in reduced margins and loss of market share.***

We compete in a rapidly evolving and highly competitive market, and we expect competition to intensify. Our principal competitors in the small business market include 3Com Corporation, Allied Telesyn International, Dell Computer Corporation, D-Link Systems, Inc., Hewlett-Packard Company, the Linksys division of Cisco Systems and Nortel Networks. Our principal competitors in the home market include Belkin Corporation, D-Link and the Linksys division of Cisco Systems. Our principal competitors in the broadband service provider market include AARIS Group, Inc., Motorola, Inc., Sagem Corporation, Scientific Atlanta, a Cisco company, Terayon Communications Systems, Inc., Thomson Corporation and 2Wire, Inc. Other current and potential competitors include numerous local vendors such as Siemens Corporation and AVM in Europe, Corega International SA, Melco, Inc./Buffalo Technology in Japan and TP-Link in China. Our potential competitors also include consumer electronics vendors who could integrate networking capabilities into their line of products, and our channel customers who may decide to offer self-branded networking products. We also face competition from service providers who may bundle a free networking device with their broadband service offering, which would reduce our sales if we are not the supplier of choice to those service providers.

Many of our existing and potential competitors have longer operating histories, greater name recognition and substantially greater financial, technical, sales, marketing and other resources. These competitors may, among other things, undertake more extensive marketing campaigns, adopt more aggressive pricing policies, obtain more favorable pricing from suppliers and manufacturers, and exert more influence on the sales channel than we can. We anticipate that current and potential competitors will also intensify their efforts to penetrate our target markets. These competitors may have more advanced technology, more extensive distribution channels, stronger brand names, greater access to shelf space in retail locations, bigger promotional budgets and larger customer bases than we do. These

companies could devote more capital resources to develop, manufacture and market competing products than we could. If any of these companies are successful in competing against us, our sales could decline, our margins could be negatively impacted, and we could lose market share, any of which could seriously harm our business and results of operations.

***If we do not effectively manage our sales channel inventory and product mix, we may incur costs associated with excess inventory, or lose sales from having too few products.***

If we are unable to properly monitor, control and manage our sales channel inventory and maintain an appropriate level and mix of products with our wholesale distributors and within our sales channel, we may incur

## **Table of Contents**

increased and unexpected costs associated with this inventory. We generally allow wholesale distributors and traditional retailers to return a limited amount of our products in exchange for other products. Under our price protection policy, if we reduce the list price of a product, we are often required to issue a credit in an amount equal to the reduction for each of the products held in inventory by our wholesale distributors and retailers. If our wholesale distributors and retailers are unable to sell their inventory in a timely manner, we might lower the price of the products, or these parties may exchange the products for newer products. Also, during the transition from an existing product to a new replacement product, we must accurately predict the demand for the existing and the new product.

If we improperly forecast demand for our products we could end up with too many products and be unable to sell the excess inventory in a timely manner, if at all, or, alternatively we could end up with too few products and not be able to satisfy demand. This problem is exacerbated because we attempt to closely match inventory levels with product demand leaving limited margin for error. If these events occur, we could incur increased expenses associated with writing off excessive or obsolete inventory or lose sales or have to ship products by air freight to meet immediate demand incurring incremental freight costs above the costs of transporting product via boat, a preferred method, and suffering a corresponding decline in gross margins.

***We are currently involved in various litigation matters and may in the future become involved in additional litigation, including litigation regarding intellectual property rights, which could be costly and subject us to significant liability.***

The networking industry is characterized by the existence of a large number of patents and frequent claims and related litigation regarding infringement of patents, trade secrets and other intellectual property rights. In particular, leading companies in the data communications markets, some of which are competitors, have extensive patent portfolios with respect to networking technology. From time to time, third parties, including these leading companies, have asserted and may continue to assert exclusive patent, copyright, trademark and other intellectual property rights against us demanding license or royalty payments or seeking payment for damages, injunctive relief and other available legal remedies through litigation. These include third parties who claim to own patents or other intellectual property that cover industry standards that our products comply with. If we are unable to resolve these matters or obtain licenses on acceptable or commercially reasonable terms, we could be sued or we may be forced to initiate litigation to protect our rights. The cost of any necessary licenses could significantly harm our business, operating results and financial condition. Also, at any time, any of these companies, or any other third-party could initiate litigation against us, or we may be forced to initiate litigation against them, which could divert management attention, be costly to defend or prosecute, prevent us from using or selling the challenged technology, require us to design around the challenged technology and cause the price of our stock to decline. In addition, third parties, some of whom are potential competitors, have initiated and may continue to initiate litigation against our manufacturers, suppliers or members of our sales channel, alleging infringement of their proprietary rights with respect to existing or future products. In the event successful claims of infringement are brought by third parties, and we are unable to obtain licenses or independently develop alternative technology on a timely basis, we may be subject to indemnification obligations, be unable to offer competitive products, or be subject to increased expenses. Finally, consumer class-action lawsuits related to the marketing and performance of our home networking products have been asserted and may in the future be asserted against us. If we do not resolve these claims on a favorable basis, our business, operating results and financial condition could be significantly harmed.

***The average selling prices of our products typically decrease rapidly over the sales cycle of the product, which may negatively affect our gross margins.***

Our products typically experience price erosion, a fairly rapid reduction in the average selling prices over their respective sales cycles. In order to sell products that have a falling average selling price and maintain margins at the same time, we need to continually reduce product and manufacturing costs. To manage manufacturing costs, we must

collaborate with our third-party manufacturers to engineer the most cost-effective design for our products. In addition, we must carefully manage the price paid for components used in our products. We must also successfully manage our freight and inventory costs to reduce overall product costs. We also need to continually introduce new products with higher sales prices and gross margins in order to maintain our overall gross margins. If we are unable

## **Table of Contents**

to manage the cost of older products or successfully introduce new products with higher gross margins, our net revenue and overall gross margin would likely decline.

***Our future success is dependent on the growth in personal computers sales and the acceptance of networking products in the small business and home markets into which we sell substantially all of our products. If the acceptance of networking products in these markets does not continue to grow, we will be unable to increase or sustain our net revenue, and our business will be severely harmed.***

We believe that growth in the small business market will depend, in significant part, on the growth of the number of personal computers purchased by these end-users and the demand for sharing data intensive applications, such as large graphic files. We believe that acceptance of networking products in the home will depend upon the availability of affordable broadband Internet access and increased demand for wireless products. Unless these markets continue to grow, our business will be unable to expand, which could cause the value of our stock to decline. Moreover, if networking functions are integrated more directly into personal computers and other Internet-enabled devices, such as electronic gaming platforms or personal video recorders, and these devices do not rely upon external network-enabling devices, sales of our products could suffer. In addition, if the small business or home markets experience a recession or other cyclical effects that diminish or delay networking expenditures, our business growth and profits would be severely limited, and our business could be more severely harmed than those companies that primarily sell to large business customers.

***If we fail to continue to introduce new products that achieve broad market acceptance on a timely basis, we will not be able to compete effectively and we will be unable to increase or maintain net revenue and gross margins.***

We operate in a highly competitive, quickly changing environment, and our future success depends on our ability to develop and introduce new products that achieve broad market acceptance in the small business and home markets. Our future success will depend in large part upon our ability to identify demand trends in the small business and home markets and quickly develop, manufacture and sell products that satisfy these demands in a cost effective manner. Successfully predicting demand trends is difficult, and it is very difficult to predict the effect introducing a new product will have on existing product sales. We will also need to respond effectively to new product announcements by our competitors by quickly introducing competitive products.

We have experienced delays in releasing new products in the past, which resulted in lower quarterly net revenue than expected. In addition, we have experienced, and may in the future experience, product introductions that fall short of our projected rates of market adoption. Any future delays in product development and introduction or product introductions that do not meet broad market acceptance could result in:

loss of or delay in revenue and loss of market share;

negative publicity and damage to our reputation and brand;

a decline in the average selling price of our products;

adverse reactions in our sales channel, such as reduced shelf space, reduced online product visibility, or loss of sales channel; and

increased levels of product returns.

***We depend substantially on our sales channel, and our failure to maintain and expand our sales channel would result in lower sales and reduced net revenue.***

To maintain and grow our market share, net revenue and brand, we must maintain and expand our sales channel. We sell our products through our sales channel, which consists of traditional retailers, on-line retailers, DMRs, VARs, and broadband service providers. Some of these entities purchase our products through our wholesale distributors. We generally have no minimum purchase commitments or long-term contracts with any of these third parties.

**Table of Contents**

Traditional retailers have limited shelf space and promotional budgets, and competition is intense for these resources. If the networking sector does not experience sufficient growth, retailers may choose to allocate more shelf space to other consumer product sectors. A competitor with more extensive product lines and stronger brand identity, such as Cisco Systems, may have greater bargaining power with these retailers. Any reduction in available shelf space or increased competition for such shelf space would require us to increase our marketing expenditures simply to maintain current levels of retail shelf space, which would harm our operating margin. The recent trend in the consolidation of online retailers and DMR channels has resulted in intensified competition for preferred product placement, such as product placement on an online retailer's Internet home page. Expanding our presence in the VAR channel may be difficult and expensive. We compete with established companies that have longer operating histories and longstanding relationships with VARs that we would find highly desirable as sales channel partners. If we were unable to maintain and expand our sales channel, our growth would be limited and our business would be harmed.

We must also continuously monitor and evaluate emerging sales channels. If we fail to establish a presence in an important developing sales channel, our business could be harmed.

***If we fail to successfully overcome the challenges associated with profitably growing our broadband service provider sales channel, our net revenue and gross profit will be negatively impacted.***

We face a number of challenges associated with penetrating the broadband service provider channel that differ from what we have traditionally faced with the other channels. These challenges include a longer sales cycle, more stringent product testing and validation requirements, a higher level of customer service and support demands, competition from established suppliers, pricing pressure resulting in lower gross margins, and our general inexperience in selling to service providers. Orders from service providers generally tend to be large but sporadic, which causes our revenues from them to fluctuate wildly and challenges our ability to accurately forecast demand from them. Even if we are selected as a supplier, typically a service provider will also designate a second source supplier, which over time will reduce the aggregate orders that we receive from that service provider. In addition, service providers may choose to prioritize the implementation of other technologies or the roll out of other services than home networking. Any slowdown in the general economy, over capacity, consolidation among service providers, regulatory developments and constraint on capital expenditures could result in reduced demand from service providers and therefore adversely affect our sales to them. If we do not successfully overcome these challenges, we will not be able to profitably grow our service provider sales channel and our growth will be slowed.

***If our products contain defects or errors, we could incur significant unexpected expenses, experience product returns and lost sales, experience product recalls, suffer damage to our brand and reputation, and be subject to product liability or other claims.***

Our products are complex and may contain defects, errors or failures, particularly when first introduced or when new versions are released. The industry standards upon which many of our products are based are also complex, experience change over time and may be interpreted in different manners. Some errors and defects may be discovered only after a product has been installed and used by the end-user. If our products contain defects or errors, or are found to be noncompliant with industry standards, we could experience decreased sales and increased product returns, loss of customers and market share, and increased service, warranty and insurance costs. In addition, our reputation and brand could be damaged, and we could face legal claims regarding our products. A successful product liability or other claim could result in negative publicity and harm our reputation, result in unexpected expenses and adversely impact our operating results.

***We obtain several key components from limited or sole sources, and if these sources fail to satisfy our supply requirements, we may lose sales and experience increased component costs.***

Any shortage or delay in the supply of key product components would harm our ability to meet scheduled product deliveries. Many of the semiconductors used in our products are specifically designed for use in our products and are obtained from sole source suppliers on a purchase order basis. In addition, some components that are used in all our products are obtained from limited sources. These components include connector jacks, plastic casings and physical layer transceivers. We also obtain switching fabric semiconductors, which are used in our

## **Table of Contents**

Ethernet switches and Internet gateway products, and wireless local area network chipsets, which are used in all of our wireless products, from a limited number of suppliers. Semiconductor suppliers have experienced and continue to experience component shortages themselves, such as with substrates used in manufacturing chipsets, which in turn adversely impact our ability to procure semiconductors from them. Our contract manufacturers purchase these components on our behalf on a purchase order basis, and we do not have any contractual commitments or guaranteed supply arrangements with our suppliers. If demand for a specific component increases, we may not be able to obtain an adequate number of that component in a timely manner. In addition, if our suppliers experience financial or other difficulties or if worldwide demand for the components they provide increases significantly, the availability of these components could be limited. It could be difficult, costly and time consuming to obtain alternative sources for these components, or to change product designs to make use of alternative components. In addition, difficulties in transitioning from an existing supplier to a new supplier could create delays in component availability that would have a significant impact on our ability to fulfill orders for our products. If we are unable to obtain a sufficient supply of components, or if we experience any interruption in the supply of components, our product shipments could be reduced or delayed. This would affect our ability to meet scheduled product deliveries, damage our brand and reputation in the market, and cause us to lose market share.

***We are exposed to adverse currency exchange rate fluctuations in jurisdictions where we transact in local currency, which could harm our financial results and cash flows.***

Although a significant portion of our international sales are currently invoiced in United States dollars, we have implemented and continue to implement for certain countries both invoicing and payment in foreign currencies. Recently, we have experienced currency exchange gains, however our exposure to adverse foreign currency rate fluctuations will likely increase. We currently do not engage in any currency hedging transactions. Moreover, the costs of doing business abroad may increase as a result of adverse exchange rate fluctuations. For example, if the United States dollar declined in value relative to a local currency, we could be required to pay more in U.S. dollar terms for our expenditures in that market, including salaries, commissions, local operations and marketing expenses, each of which is paid in local currency. In addition, we may lose customers if exchange rate fluctuations, currency devaluations or economic crises increase the local currency prices of our products or reduce our customers' ability to purchase products.

***Rising oil prices, unfavorable economic conditions, particularly in Western Europe, and turmoil in the international geopolitical environment may adversely affect our operating results.***

We derive a significant percentage of our revenues from international sales, and a deterioration in global economic and market conditions, particularly in Western Europe, may result in reduced product demand, increased price competition and higher excess inventory levels. Turmoil in the global geopolitical environment, including the ongoing tensions in Iraq and the Middle-East, have pressured and continue to pressure global economies. In addition, rising oil prices may result in a reduction in consumer spending and an increase in freight costs to us. If the global economic climate does not improve, our business and operating results will be harmed.

***If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products and our operating expenses could increase.***

We are highly dependent upon the transportation systems we use to ship our products, including surface and air freight. Our attempts to closely match our inventory levels to our product demand intensify the need for our transportation systems to function effectively and without delay. On a quarterly basis, our shipping volume also tends to steadily increase as the quarter progresses, which means that any disruption in our transportation network in the latter half of a quarter will have a more material effect on our business than at the beginning of a quarter.

The transportation network is subject to disruption or congestion from a variety of causes, including labor disputes or port strikes, acts of war or terrorism, natural disasters and congestion resulting from higher shipping volumes. Labor disputes among freight carriers and at ports of entry are common, especially in Europe, and we expect labor unrest and its effects on shipping our products to be a continuing challenge for us. Since September 11, 2001, the rate of inspection of international freight by governmental entities has substantially increased, and has become increasingly unpredictable. If our delivery times increase unexpectedly for these or any other reasons, our

**Table of Contents**

ability to deliver products on time would be materially adversely affected and result in delayed or lost revenue. In addition, if the increases in fuel prices were to continue, our transportation costs would likely further increase. Moreover, the cost of shipping our products by air freight is greater than other methods. From time to time in the past, we have shipped products using air freight to meet unexpected spikes in demand or to bring new product introductions to market quickly. If we rely more heavily upon air freight to deliver our products, our overall shipping costs will increase. A prolonged transportation disruption or a significant increase in the cost of freight could severely disrupt our business and harm our operating results.

***We rely on a limited number of wholesale distributors for most of our sales, and if they refuse to pay our requested prices or reduce their level of purchases, our net revenue could decline.***

We sell a substantial portion of our products through wholesale distributors, including Ingram Micro, Inc. and Tech Data Corporation. During the fiscal year ended December 31, 2006, sales to Ingram Micro and its affiliates accounted for 19% of our net revenue and sales to Tech Data and its affiliates accounted for 16% of our net revenue. We expect that a significant portion of our net revenue will continue to come from sales to a small number of wholesale distributors for the foreseeable future. In addition, because our accounts receivable are concentrated with a small group of purchasers, the failure of any of them to pay on a timely basis, or at all, would reduce our cash flow. We generally have no minimum purchase commitments or long-term contracts with any of these distributors. These purchasers could decide at any time to discontinue, decrease or delay their purchases of our products. In addition, the prices that they pay for our products are subject to negotiation and could change at any time. If any of our major wholesale distributors reduce their level of purchases or refuse to pay the prices that we set for our products, our net revenue and operating results could be harmed. If our wholesale distributors increase the size of their product orders without sufficient lead-time for us to process the order, our ability to fulfill product demands would be compromised.

***If the redemption rate for our end-user promotional programs is higher than we estimate, then our net revenue and gross margin will be negatively affected.***

From time to time we offer promotional incentives, including cash rebates, to encourage end-users to purchase certain of our products. Purchasers must follow specific and stringent guidelines to redeem these incentives or rebates. Often qualified purchasers choose not to apply for the incentives or fail to follow the required redemption guidelines, resulting in an incentive redemption rate of less than 100%. Based on historical data, we estimate an incentive redemption rate for our promotional programs. If the actual redemption rate is higher than our estimated rate, then our net revenue and gross margin will be negatively affected.

***We are required to evaluate our internal control under Section 404 of the Sarbanes-Oxley Act of 2002 and any adverse results from such evaluation could impact investor confidence in the reliability of our internal controls over financial reporting.***

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we are required to furnish a report by our management on our internal control over financial reporting. Such report must contain among other matters, an assessment of the effectiveness of our internal control over financial reporting as of the end of our fiscal year, including a statement as to whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management. Such report must also contain a statement that our independent registered public accounting firm has issued an audit report on management's assessment of such internal controls.

We will continue to perform the system and process documentation and evaluation needed to comply with Section 404, which is both costly and challenging. During this process, if our management identifies one or more material weaknesses in our internal control over financial reporting, we will be unable to assert such internal control is

effective. If we are unable to assert that our internal control over financial reporting is effective as of the end of a fiscal year, or if our independent registered public accounting firm is unable to attest that our management's report is fairly stated or they are unable to express an opinion on the effectiveness of our internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, which may have an adverse effect on our stock price.

**Table of Contents**

***We depend on a limited number of third-party contract manufacturers for substantially all of our manufacturing needs. If these contract manufacturers experience any delay, disruption or quality control problems in their operations, we could lose market share and our brand may suffer.***

All of our products are manufactured, assembled, tested and generally packaged by a limited number of original design manufacturers, or ODMs, and original equipment manufacturers, or OEMs. We rely on our contract manufacturers to procure components and, in some cases, subcontract engineering work. Some of our products are manufactured by a single contract manufacturer. We do not have any long-term contracts with any of our third-party contract manufacturers. Some of these third-party contract manufacturers produce products for our competitors. The loss of the services of any of our primary third-party contract manufacturers could cause a significant disruption in operations and delays in product shipments. Qualifying a new contract manufacturer and commencing volume production is expensive and time consuming.

Our reliance on third-party contract manufacturers also exposes us to the following risks over which we have limited control:

unexpected increases in manufacturing and repair costs;

inability to control the quality of finished products;

inability to control delivery schedules; and

potential lack of adequate capacity to manufacture all or a part of the products we require.

All of our products must satisfy safety and regulatory standards and some of our products must also receive government certifications. Our ODM and OEM contract manufacturers are primarily responsible for obtaining most regulatory approvals for our products. If our ODMs and OEMs fail to obtain timely domestic or foreign regulatory approvals or certificates, we would be unable to sell our products and our sales and profitability could be reduced, our relationships with our sales channel could be harmed, and our reputation and brand would suffer.

***If we are unable to provide our third-party contract manufacturers a timely and accurate forecast of our component and material requirements, we may experience delays in the manufacturing of our products and the costs of our products may increase.***

We provide our third-party contract manufacturers with a rolling forecast of demand, which they use to determine our material and component requirements. Lead times for ordering materials and components vary significantly and depend on various factors, such as the specific supplier, contract terms and demand and supply for a component at a given time. Some of our components have long lead times, such as wireless local area network chipsets, switching fabric chips, physical layer transceivers, connector jacks and metal and plastic enclosures. If our forecasts are not timely provided or are less than our actual requirements, our contract manufacturers may be unable to manufacture products in a timely manner. If our forecasts are too high, our contract manufacturers will be unable to use the components they have purchased on our behalf. The cost of the components used in our products tends to drop rapidly as volumes increase and the technologies mature. Therefore, if our contract manufacturers are unable to promptly use components purchased on our behalf, our cost of producing products may be higher than our competitors due to an over supply of higher-priced components. Moreover, if they are unable to use components ordered at our direction, we will need to reimburse them for any losses they incur.

***We rely upon third parties for technology that is critical to our products, and if we are unable to continue to use this technology and future technology, our ability to develop, sell, maintain and support technologically advanced products would be limited.***

We rely on third parties to obtain non-exclusive patented hardware and software license rights in technologies that are incorporated into and necessary for the operation and functionality of most of our products. In these cases, because the intellectual property we license is available from third parties, barriers to entry may be lower than if we owned exclusive rights to the technology we license and use. On the other hand, if a competitor or potential competitor enters into an exclusive arrangement with any of our key third-party technology providers, or if any of these providers unilaterally decide not to do business with us for any reason, our ability to develop and sell products

**Table of Contents**

containing that technology would be severely limited. If we are shipping products which contain third party technology that we subsequently lose the right to license, then we will not be able to continue to offer or support those products. Our licenses often require royalty payments or other consideration to third parties. Our success will depend in part on our continued ability to have access to these technologies, and we do not know whether these third-party technologies will continue to be licensed to us on commercially acceptable terms or at all. If we are unable to license the necessary technology, we may be forced to acquire or develop alternative technology of lower quality or performance standards. This would limit and delay our ability to offer new or competitive products and increase our costs of production. As a result, our margins, market share, and operating results could be significantly harmed.

We also utilize third party software development companies to develop, customize, maintain and support software that is incorporated into our products. If these companies fail to timely deliver or continuously maintain and support the software that we require of them, we may experience delays in releasing new products or difficulties with supporting existing products and customers.

***If we are unable to secure and protect our intellectual property rights, our ability to compete could be harmed.***

We rely upon third parties for a substantial portion of the intellectual property we use in our products. At the same time, we rely on a combination of copyright, trademark, patent and trade secret laws, nondisclosure agreements with employees, consultants and suppliers and other contractual provisions to establish, maintain and protect our intellectual property rights. Despite efforts to protect our intellectual property, unauthorized third parties may attempt to design around, copy aspects of our product design or obtain and use technology or other intellectual property associated with our products. For example, one of our primary intellectual property assets is the NETGEAR name, trademark and logo. We may be unable to stop third parties from adopting similar names, trademarks and logos, especially in those international markets where our intellectual property rights may be less protected. Furthermore, our competitors may independently develop similar technology or design around our intellectual property. Our inability to secure and protect our intellectual property rights could significantly harm our brand and business, operating results and financial condition.

***Our sales and operations in international markets expose us to operational, financial and regulatory risks.***

International sales comprise a significant amount of our overall net revenue. International sales were 62% of overall net revenue in fiscal 2006. We anticipate that international sales may grow as a percentage of net revenue. We have committed resources to expanding our international operations and sales channels and these efforts may not be successful. International operations are subject to a number of other risks, including:

political and economic instability, international terrorism and anti-American sentiment, particularly in emerging markets;

preference for locally branded products, and laws and business practices favoring local competition;

exchange rate fluctuations;

increased difficulty in managing inventory;

delayed revenue recognition;

less effective protection of intellectual property;

stringent consumer protection and product compliance regulations, including but not limited to the recently enacted Restriction of Hazardous Substances directive and the Waste Electrical and Electronic Equipment, or WEEE directive in Europe, that may vary from country to country and that are costly to comply with; and

difficulties and costs of staffing and managing foreign operations.

**Table of Contents**

***We intend to expand our operations and infrastructure, which may strain our operations and increase our operating expenses.***

We intend to expand our operations and pursue market opportunities domestically and internationally to grow our sales. We expect that this attempted expansion will strain our existing management information systems, and operational and financial controls. In addition, if we continue to grow, our expenditures will likely be significantly higher than our historical costs. We may not be able to install adequate controls in an efficient and timely manner as our business grows, and our current systems may not be adequate to support our future operations. The difficulties associated with installing and implementing these new systems, procedures and controls may place a significant burden on our management, operational and financial resources. In addition, if we grow internationally, we will have to expand and enhance our communications infrastructure. If we fail to continue to improve our management information systems, procedures and financial controls or encounter unexpected difficulties during expansion, our business could be harmed.

***We are continuing to implement our international reorganization, which is straining our resources and increasing our operating expenses.***

We have been reorganizing our foreign subsidiaries and entities to better manage and optimize our international operations. Our implementation of this project requires substantial efforts by our staff and is resulting in increased staffing requirements and related expenses. Failure to successfully execute the reorganization or other factors outside of our control could negatively impact the timing and extent of any benefit we receive from the reorganization. As part of the reorganization, we have been implementing new information technology systems, including new forecasting and order processing systems. If we fail to successfully and timely integrate these new systems, we will suffer disruptions to our operations. Any unanticipated interruptions in our business operations as a result of implementing these changes could result in loss or delay in revenue causing an adverse effect on our financial results.

***Our stock price may be volatile and your investment in our common stock could suffer a decline in value.***

With the continuing uncertainty about economic conditions in the United States, there has been significant volatility in the market price and trading volume of securities of technology and other companies, which may be unrelated to the financial performance of these companies. These broad market fluctuations may negatively affect the market price of our common stock.

Some specific factors that may have a significant effect on our common stock market price include:

actual or anticipated fluctuations in our operating results or our competitors' operating results;

actual or anticipated changes in the growth rate of the general networking sector, our growth rates or our competitors' growth rates;

conditions in the financial markets in general or changes in general economic conditions;

interest rate or currency exchange rate fluctuations;

our ability to raise additional capital; and

changes in stock market analyst recommendations regarding our common stock, other comparable companies or our industry generally.

*Natural disasters, mischievous actions or terrorist attacks could delay our ability to receive or ship our products, or otherwise disrupt our business.*

Our corporate headquarters are located in Northern California and one of our warehouses is located in Southern California, regions known for seismic activity. In addition, substantially all of our manufacturing occurs in two geographically concentrated areas in mainland China, where disruptions from natural disasters, health epidemics and political, social and economic instability may affect the region. If our manufacturers or warehousing facilities are disrupted or destroyed, we would be unable to distribute our products on a timely basis, which could

## **Table of Contents**

harm our business. Moreover, if our computer information systems or communication systems, or those of our vendors or customers, are subject to disruptive hacker attacks or other disruptions, our business could suffer. We have not established a formal disaster recovery plan. Our back-up operations may be inadequate and our business interruption insurance may not be enough to compensate us for any losses that may occur. A significant business interruption could result in losses or damages and harm our business. For example, much of our order fulfillment process is automated and the order information is stored on our servers. If our computer systems and servers go down even for a short period at the end of a fiscal quarter, our ability to recognize revenue would be delayed until we were again able to process and ship our orders, which could cause our stock price to decline significantly.

*If we lose the services of our Chairman and Chief Executive Officer, Patrick C.S. Lo, or our other key personnel, we may not be able to execute our business strategy effectively.*

Our future success depends in large part upon the continued services of our key technical, sales, marketing and senior management personnel. In particular, the services of Patrick C.S. Lo, our Chairman and Chief Executive Officer, who has led our company since its inception, are very important to our business. In November 2006, Jonathan R. Mather, our former Executive Vice President and Chief Financial Officer, left the company to pursue other opportunities, and we are still in the process of hiring his replacement. We do not maintain any key person life insurance policies. The loss of any of our senior management or other key research, development, sales or marketing personnel, particularly if lost to competitors, could harm our ability to implement our business strategy and respond to the rapidly changing needs of the small business and home markets.

### **Item 1B. *Unresolved Staff Comments.***

None.

### **Item 2. *Properties***

Our principal administrative, sales, marketing and research and development facilities occupy approximately 74,000 square feet in an office complex in Santa Clara, California, under a lease that expires in December 2007, with a three-year renewal option. Our international headquarters occupy approximately 10,000 square feet in an office complex in Cork, Ireland, under a lease entered into in February 2006 and expiring in December 2026. Our international sales personnel reside in local sales offices or home offices in Austria, Australia, Brazil, China, Czech Republic, Denmark, France, Germany, India, Italy, Japan, Korea, Norway, Poland, Russia, Singapore, Spain, Sweden, Switzerland, the Netherlands, the United Arab Emirates, and the United Kingdom. We also have operations personnel using a facility in Hong Kong, which is subleased from our third party logistics provider, Kerry Logistics. We also maintain a research and development facility in Taipei, Taiwan. From time to time we consider various alternatives related to our long-term facilities needs. While we believe our existing facilities are adequate to meet our immediate needs, it may be necessary to lease additional space to accommodate future growth.

We use third parties to provide warehousing services to us, consisting of facilities in Southern California, Hong Kong and the Netherlands.

### **Item 3. *Legal Proceedings***

The information set forth under Note 6 of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report, is incorporated herein by reference. For an additional discussion of certain risks associated with legal proceedings, see the section entitled "Risk Factors" in Item 1A of this report.

### **Item 4. *Submission of Matters to a Vote of Security Holders***

No matters were submitted to a vote of the security holders during the quarter ended December 31, 2006.

**Table of Contents****PART II****Item 5. *Market for Registrant's Common Stock, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Our common stock has been quoted under the symbol NTGR on the Nasdaq National Market from July 31, 2003 to July 1, 2006, and on the Nasdaq Global Select Market since then. Prior to that time, there was no public market for our common stock. The following table sets forth for the indicated periods the high and low sales prices for our common stock on the Nasdaq markets. Such information reflects interdealer prices, without retail markup, markdown or commission, and may not represent actual transactions.

<b>Fiscal Year Ended December 31, 2005</b>	<b>High</b>	<b>Low</b>
First Quarter	\$ 19.16	\$ 13.45
Second Quarter	20.78	12.96
Third Quarter	25.73	18.65
Fourth Quarter	24.30	17.52

<b>Fiscal Year Ended December 31, 2006</b>	<b>High</b>	<b>Low</b>
First Quarter	\$ 19.59	\$ 16.64
Second Quarter	25.39	18.40
Third Quarter	21.64	16.92
Fourth Quarter	28.15	20.01

On February 16, 2007, there were 26 stockholders of record.

**Table of Contents****Company Performance**

*Notwithstanding any statement to the contrary in any of our previous or future filings with the Securities and Exchange Commission, the following information relating to the price performance of our common stock shall not be deemed filed with the Commission or soliciting material under the 1934 Act and shall not be incorporated by reference into any such filings.*

The following graph shows a comparison from July 31, 2003 (the date our common stock commenced trading on the Nasdaq National Market) through December 31, 2006 of cumulative total return for our common stock, the Nasdaq Composite Index and the Nasdaq Computer Index. Such returns are based on historical results and are not intended to suggest future performance. Data for the Nasdaq Composite Index and the Nasdaq Computer Index assume reinvestment of dividends. We have never paid dividends on our common stock and have no present plans to do so.

	<b>July 31, 2003</b>	<b>December 31, 2003</b>	<b>December 31, 2004</b>	<b>December 31, 2005</b>	<b>December 31, 2006</b>
NETGEAR, Inc.	\$ 100.00	\$ 90.39	\$ 102.66	\$ 108.82	\$ 148.39
NASDAQ Computer Index	\$ 100.00	\$ 116.78	\$ 120.58	\$ 123.89	\$ 131.51
NASDAQ Composite Index	\$ 100.00	\$ 115.47	\$ 125.38	\$ 127.11	\$ 139.21

**Dividend Policy**

We have never declared or paid cash dividends on our capital stock. We currently intend to retain future earnings, if any, to finance the operation and expansion of our business, and we do not anticipate paying cash dividends in the foreseeable future.

**Table of Contents****Equity Compensation Plan Information**

The following table summarizes the number of outstanding options granted to employees and directors, as well as the number of securities remaining available for future issuance, under our compensation plans as of December 31, 2006.

<b>Plan Category</b>	<b>(a) Number of Securities to be Issued Upon  Exercise of Outstanding Options, Warrants and Rights</b>	<b>(b) Weighted-Average  Exercise Price of Outstanding Options, Warrants and Rights</b>	<b>(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans  (Excluding Securities Reflected in Column(a))</b>
Equity compensation plans approved by security holders(1)	4,048,457	\$ 14.37	1,911,861
Equity compensation plans not approved by security holder			

(1) These plans include our 2000 Stock Option Plan, 2003 Stock Plan, 2006 Long Term Incentive Plan, 2006 Stand-Alone Stock Option Agreement, and 2003 Employee Stock Purchase Plan.

**Table of Contents****Item 6. Selected Consolidated Financial Data**

The following selected consolidated financial data are qualified in their entirety, and should be read in conjunction with, the consolidated financial statements and related notes thereto, and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this Form 10-K.

We derived the selected consolidated statement of operations data for the years ended December 2004, 2005, and 2006 and the selected consolidated balance sheet data as of December 31, 2005 and 2006 from our audited consolidated financial statements appearing elsewhere in this Form 10-K. We derived the selected consolidated statement of operations data for the years ended December 31, 2002 and 2003 and the selected consolidated balance sheet data as of December 31, 2002, 2003 and 2004 from our audited consolidated financial statements, which are not included in this Form 10-K.

	<b>Year Ended December 31,</b>				
	<b>2002</b>	<b>2003</b>	<b>2004</b>	<b>2005</b>	<b>2006</b>
	<b>(In thousands, except per share data)</b>

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*You should read the following discussion of our financial condition and results of operations together with the audited consolidated financial statements and notes to the financial statements included elsewhere in this Form 10-K. This discussion contains forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed under Risk Factors in Part I, Item 1A above.*

**Business Overview**

We design, develop and market innovative networking products that address the specific needs of small business and home users. We define small business as a business with fewer than 250 employees. We are focused on satisfying the ease-of-use, reliability, performance and affordability requirements of these users. Our product offerings enable users to share Internet access, peripherals, files, digital multimedia content and applications among multiple personal computers, or PCs, and other Internet-enabled devices.

Our product line consists of wired and wireless devices that enable Ethernet networking, broadband access, and network connectivity. These products are available in multiple configurations to address the needs of our end-users in each geographic region in which our products are sold.

We sell our networking products through multiple sales channels worldwide, including traditional retailers, online retailers, wholesale distributors, DMRs, VARs, and broadband service providers. Our retail channel includes traditional retail locations domestically and internationally, such as Best Buy, Circuit City, CompUSA, Costco, Fry's Electronics, Radio Shack, Staples, Argos (U.K.), Dixons (U.K.), PC World (U.K.), MediaMarkt (Germany, Austria), and FNAC (France). Online retailers include Amazon.com, Newegg.com and Buy.com. Our DMRs include Dell, CDW Corporation, Insight Corporation and PC Connection in domestic markets and Misco throughout Europe. In addition, we also sell our products through broadband service providers, such as multiple system operators in domestic markets and cable and DSL operators internationally. Some of these retailers and resellers purchase directly from us while most are fulfilled through wholesale distributors around the world. A substantial portion of our net revenue to date has been derived from a limited number of wholesale distributors, the

## **Table of Contents**

largest of which are Ingram Micro Inc. and Tech Data Corporation. We expect that these wholesale distributors will continue to contribute a significant percentage of our net revenue for the foreseeable future.

We have well developed channels in the United States and Europe, Middle-East and Africa, or EMEA, and are building a strong presence in the Asia Pacific region. We derive the majority of our net revenue from international sales. International sales as a percentage of net revenue grew from 56% in 2005 to 62% in 2006. Sales in EMEA grew from \$200.0 million in 2005 to \$298.2 million in 2006, representing an increase of approximately 49% during that period. We continue to penetrate new markets such as Brazil, Eastern Europe, India, and the Middle-East.

Our net revenue grew 27.6% during the year ended December 31, 2006, primarily attributable to higher sales of DSL gateway and powerline products to new and existing service provider customers, especially in Europe, as well as continued strength in our RangeMax wireless router product line.

The small business and home networking markets are intensely competitive and subject to rapid technological change. We expect our competition to continue to intensify. We believe that the principal competitive factors in the small business and home markets for networking products include product breadth, size and scope of the sales channel, brand name, timeliness of new product introductions, product performance, features, functionality and reliability, ease-of-installation, maintenance and use, and customer service and support. To remain competitive, we believe we must invest significant resources in developing new products, enhancing our current products, expanding our channels and maintaining customer satisfaction worldwide.

Our gross margin improved to 33.8% for the year ended December 31, 2006 from 33.7% for the year ended December 31, 2005. Our gross margin improvement was primarily due to decreased marketing costs and improved vendor rebates, offset by increased sales of products carrying lower gross margins to service providers. Operating expenses for the year ended December 31, 2006 were \$134.1 million or 23.4% of net revenue and \$99.5 million or 22.1% of net revenue for the year ended December 31, 2005.

Net income increased \$7.5 million, to \$41.1 million for the year ended December 31, 2006 from \$33.6 million for the year ended December 31, 2005. This increase was due to an increase in gross profit of \$42.0 million and an increase in interest and other income of \$7.1 million, offset by an increase in operating expenses of \$34.6 million and an increase in provision for income taxes of \$7.0 million.

## **Critical Accounting Policies and Estimates**

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make assumptions, judgments and estimates that can have a significant impact on the reported amounts of assets, liabilities, revenues and expenses. We base our estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. Actual results could differ significantly from these estimates. These estimates may change as new events occur, as additional information is obtained and as our operating environment changes. On a regular basis we evaluate our assumptions, judgments and estimates and make changes accordingly. We also discuss our critical accounting estimates with the Audit Committee of the Board of Directors. Note 1 of the Notes to Consolidated Financial Statements describes the significant accounting policies used in the preparation of the consolidated financial statements. We have listed below our critical accounting policies which we believe to have the greatest potential impact on our consolidated financial statements. Historically, our assumptions, judgments and estimates relative to our critical accounting policies have not differed materially from actual results.

## ***Revenue Recognition***

Revenue from product sales is recognized at the time the product is shipped provided that persuasive evidence of an arrangement exists, title and risk of loss has transferred to the customer, the selling price is fixed or determinable and collection of the related receivable is reasonably assured. Currently, for some of our customers, title passes to the customer upon delivery to the port or country of destination, upon their receipt of the product, or upon the customer's resale of the product. At the end of each fiscal quarter, we estimate and defer revenue related to product where title has not transferred. The revenue continues to be deferred until such time that title passes to the

## **Table of Contents**

customer. The amount and timing of our revenue for any period could be materially different if our management made different judgments and estimates.

### ***Allowances for Product Warranties, Returns due to Stock Rotation, Price Protection, Sales Incentives and Doubtful Accounts***

Our standard warranty obligation to our direct customers generally provides for a right of return of any product for a full refund in the event that such product is not merchantable or is found to be damaged or defective. At the time revenue is recognized, an estimate of future warranty returns is recorded to reduce revenue in the amount of the expected credit or refund to be provided to the our direct customers. At the time we record the reduction to revenue related to warranty returns, we include within cost of revenue a write-down to reduce the carrying value of such products to net realizable value. Our standard warranty obligation to end-users provides for repair or replacement of a defective product for one or more years. Factors that affect the warranty obligation include product failure rates, material usage, and service delivery costs incurred in correcting product failures. The estimated cost associated with fulfilling the warranty obligation to end-users is recorded in cost of revenue. Because our products are manufactured by contract manufacturers, in certain cases we have recourse to the contract manufacturer for replacement or credit for the defective products. We give consideration to amounts recoverable from our contract manufacturers in determining our warranty liability. Our estimated allowances for product warranties can vary from actual results and we may have to record additional revenue reductions or charges to cost of revenue which could materially impact our financial position and results of operations.

In addition to warranty-related returns, certain distributors and retailers generally have the right to return product for stock rotation purposes. Every quarter, stock rotation rights are generally limited to 10% of invoiced sales to the distributor or retailer in the prior quarter. Upon shipment of the product, we reduce revenue for an estimate of potential future stock rotation returns related to the current period product revenue. We analyze historical returns, channel inventory levels, current economic trends and changes in customer demand for our products when evaluating the adequacy of the allowance for sales returns, namely stock rotation returns. Our estimated allowances for returns due to stock rotation can vary from actual results and we may have to record additional revenue reductions which could materially impact our financial position and results of operations.

Sales incentives provided to customers are accounted for in accordance with Emerging Issues Task Force ( EITF ) Issue No. 01-9, Accounting for Consideration Given by a Vendor to a Customer or Reseller of the Vendor s Products . Under these guidelines, we accrue for sales incentives as a marketing expense if we receive an identifiable benefit in exchange and can reasonably estimate the fair value of the identifiable benefit received; otherwise, it is recorded as a reduction of revenues. Our estimated provisions for sales incentives can vary from actual results and we may have to record additional expenses or additional revenue reductions dependent on the classification of the sales incentive.

We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We regularly perform credit evaluations of our customers financial condition and consider factors such as historical experience, credit quality, age of the accounts receivable balances, and geographic or country-specific risks and economic conditions that may affect a customer s ability to pay. The allowance for doubtful accounts is reviewed monthly and adjusted if necessary based on our assessments of our customers ability to pay. If the financial condition of our customers should deteriorate or if actual defaults are higher than our historical experience, additional allowances may be required, which could have an adverse impact on operating expenses.

### ***Valuation of Inventory***

We value our inventory at the lower of cost or market, cost being determined using the first-in, first-out method. We continually assess the value of our inventory and will periodically write down its value for estimated excess and

obsolete inventory based upon assumptions about future demand and market conditions. On a quarterly basis, we review inventory quantities on hand and on order under non-cancelable purchase commitments, including consignment inventory, in comparison to our estimated forecast of product demand for the next nine months to determine what inventory, if any, are not saleable. Our analysis is based on the demand forecast but takes into

**Table of Contents**

account market conditions, product development plans, product life expectancy and other factors. Based on this analysis, we write down the affected inventory value for estimated excess and obsolescence charges. At the point of loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis. As demonstrated during prior years, demand for our products can fluctuate significantly. If actual demand is lower than our forecasted demand and we fail to reduce our manufacturing accordingly, we could be required to write down additional inventory, which would have a negative effect on our gross margin.

***Income Taxes***

We account for income taxes under an asset and liability approach. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences resulting from different treatments for tax versus accounting of certain items, such as accruals and allowances not currently deductible for tax purposes. These differences result in deferred tax assets and liabilities, which are included within the consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income and to the extent we believe that recovery is not more likely than not, we must establish a valuation allowance. As of December 31, 2006, we believe that all of our deferred tax assets are recoverable; however, if there were a change in our ability to recover our deferred tax assets, we would be required to take a charge in the period in which we determined that recovery was not more likely than not.

Our effective tax rate differs from the statutory rate due to tax credits, state taxes, stock compensation and other factors. Our future effective tax rate could be impacted by a shift in the mix of domestic and foreign income, tax treaties with foreign jurisdictions; changes in tax laws in the United States or internationally; a change which would result in a valuation allowance being required to be recorded; or a federal, state or foreign jurisdiction's view of tax returns which differs materially from what we originally provided. We assess the probability of adverse outcomes from tax examinations regularly to determine the adequacy of our income tax liability. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

**Table of Contents****Results of Operations**

The following table sets forth the consolidated statements of operations and the percentage change from the preceding year for the periods indicated:

	<b>Year Ended December 31,</b>				
	<b>2004</b>	<b>Percentage Change (In thousands, except percentage data)</b>	<b>2005</b>	<b>Percentage Change</b>	<b>2006</b>
Net revenue	\$ 383,139	17.3%	\$ 449,610	27.6%	\$ 573,570

Net income	6.1%	7.5%	7.2%

**Net Revenue**

	<b>2004</b>	<b>Year Ended December 31,</b>		<b>2005</b>	<b>2006</b>
		<b>Percentage Change</b>	<b>Percentage Change</b>		
		<b>(In thousands, except percentage data)</b>			
Net revenue	\$ 383,139	17.3%	\$ 449,610	27.6%	\$ 573,570

Our net revenue consists of gross product shipments, less allowances for estimated returns for stock rotation and warranty, price protection and sales incentives deemed to be a reduction of net revenue per EITF Issue No. 01-9 and net changes in deferred revenue. Sales incentives include advertising, cooperative marketing programs, end-caps, instant rebates and mail-in rebates.

**2006 Net Revenue Compared to 2005 Net Revenue**

Net revenue increased \$124.0 million, or 27.6%, to \$573.6 million for the year ended December 31, 2006, from \$449.6 million for the year ended December 31, 2005. We continued to experience our seasonal pattern of higher net revenues in the second half of the year. The increase in revenue was especially attributable to higher sales of DSL gateway and powerline products to new and existing service provider customers, especially in Europe. The majority of these incremental sales specifically included our wireless gateway customized for major service provider British Sky Broadcasting in the United Kingdom, with shipments of wireless gateways and powerline products to other service providers further improving revenue.

Sales were further enhanced by the first full year of RangeMax wireless router sales to the home market. We introduced our RangeMax family of products, which included performance-enhancing Multiple-In Multiple-Out (MIMO) technology, during 2005, and the market has continued to embrace this key product line throughout the year. We expect the RangeMax family to remain strong in the coming year, and anticipate continuing our recent trend of increased sales of customized wireless gateways to service providers, both domestically and abroad. We

**Table of Contents**

also anticipate new products such as our wireless-N routers, Skype wi-fi phones, and Gigabit smart switches to drive revenue in the near future.

Sales incentives that are classified as contra-revenue grew at a slower rate than overall gross sales, which further contributed to the increased net revenue. This is primarily due to increased sales to the service provider markets, which typically require less marketing spending. This favorable net revenue impact was partially offset by an increase in sales returns compared to historical return rates.

For the year ended December 31, 2006 revenue generated in the United States, EMEA and Asia Pacific and rest of world was 38.4%, 52.0% and 9.6%, respectively. The comparable net revenue for the year ended December 31, 2005 was 44.3%, 44.5% and 11.2%, respectively. The increase in net revenue over the prior year for each region was 10.7%, 49.2% and 8.8%, respectively.

**2005 Net Revenue Compared to 2004 Net Revenue**

Net revenue increased \$66.5 million, or 17.3%, to \$449.6 million for the year ended December 31, 2005, from \$383.1 million for the year ended December 31, 2004. We continued to experience our seasonal pattern of higher net revenues in the second half of the year. The increase in revenue was especially attributable to higher sales of wireless LAN products to the home market, especially the new RangeMax family of products and continued strength in G and Super-G products, as well as increased gross shipments of our broadband gateways. These revenue increases were partially offset by increases in allowances for sales incentives associated with increased retail product sales.

We were able to slow down the pace of erosion in our average selling prices on our relatively older products in 2005 in part due to our new minimum advertised price policy with our U.S. retailers, as well as a general slowdown in competitive pricing pressures.

End-user customer rebates and other sales incentives which are classified as reductions in net revenue increased in 2005, especially in the latter half of 2005 when we took advantage of significant strategic joint promotion opportunities with our biggest retail partners both in the U.S. and in Europe. For example, we co-marketed our new RangeMax family of products with U.S. national retailers using a unified advertising campaign involving ad circulars and new end-cap displays. These increases in spending combined with higher use of end-user customer rebates impacted our revenue growth.

For the year ended December 31, 2005 revenue generated in the United States, EMEA and Asia Pacific and rest of world was 44.3%, 44.5% and 11.2%, respectively. The comparable net revenue for the year ended December 31, 2004 was 48.8%, 41.6% and 9.6%, respectively. The increase in net revenue over the prior year for each region was 6.6%, 25.3% and 37.5%, respectively.

**Cost of Revenue and Gross Margin**

	Year Ended December 31,		Year Ended December 31,		2006
	2004	Percentage Change	2005	Percentage Change	
	(In thousands, except percentage data)				
Cost of revenue	\$ 260,318	14.4%	\$ 297,911	27.5%	\$ 379,911
Gross margin percentage	32.1%		33.7%		33.8%

Cost of revenue consists primarily of the following: the cost of finished products from our third-party contract manufacturers; overhead costs including purchasing, product planning, inventory control, warehousing and distribution logistics; inbound freight; and warranty costs associated with returned goods and write-downs for excess and obsolete inventory. We outsource our manufacturing, warehousing and distribution logistics. We believe this outsourcing strategy allows us to better manage our product costs and gross margin. Our gross margin can be affected by a number of factors, including sales returns, changes in net revenues due to changes in average selling prices, sales incentives, and changes in our cost of goods sold due to fluctuations in prices paid for components, net

**Table of Contents**

of vendor rebates, warranty and overhead costs, inbound freight, conversion costs, and charges for excess or obsolete inventory and transitions from older to newer products.

Cost of revenue increased \$82.0 million, or 27.5%, to \$379.9 million for the year ended December 31, 2006, from \$297.9 million for the year ended December 31, 2005. Our gross margin improved to 33.8% for the year ended December 31, 2006, from 33.7% for the year ended December 31, 2005.

Our gross margin is impacted by our sales incentives that are recorded as a reduction in revenue which grew at a relatively slower rate than overall net revenue, as most of our revenue increases relate to sales to service providers, which involve significantly lower sales incentive expenses. Additionally, we experienced decreased price protection claims, as well as relatively lower inbound freight during the year, as we were able to shift the mix of inbound shipments from our suppliers from more costly air freight to lower cost sea freight due to better supply chain planning. Furthermore, rebates from vendors were significantly higher in 2006. While we do not expect this higher level of rebates to continue in the future, we anticipate lower costs on these products.

These improvements were almost entirely offset by a number of factors. Incremental sales in 2006 came primarily from increased sales of products carrying lower gross margins to service providers. We also experienced increased warranty and sales returns costs, driven primarily by a higher scrap rate of warranty return units and an increase in reserves taken for future returns based on the increase in returns volume during the year. We also experienced higher costs related to inventory reserves and devaluation.

Additionally, stock-based compensation expense increased \$283,000 to \$430,000 for the year ended December 31, 2006, from \$147,000 for the year ended December 31, 2005, as a result of the adoption of Statement of Financial Accounting Standards ( SFAS ) No. 123 (revised 2004), Share-Based Payment ( SFAS 123R ).

Cost of revenue increased \$37.6 million, or 14.4%, to \$297.9 million for the year ended December 31, 2005 from \$260.3 million for the year ended December 31, 2004. Our gross margin improved to 33.7% for the year ended December 31, 2005, from 32.1% for the year ended December 31, 2004, an increase of 1.6 percentage points. This increase was due primarily to a favorable shift in product mix and our product costs decreasing relatively more quickly than sales prices, offset by an increase in end-user customer rebates and other sales incentives, which reduce revenue along with increased inbound freight and conversion costs.

We were able to slow down the pace of erosion in our average selling prices on our relatively older products in 2005 in part due to our new minimum advertised price policy with our U.S. retailers, as well as a general slowdown in competitive pricing pressures. We have also had continued success in obtaining cost reductions and efficiencies from our vendors and manufacturers, and have pursued product redesigns when appropriate to further lower production costs. These decreasing costs, coupled with the relative slowing in the decrease of average selling prices, boosted margins on our older products, especially our G and Super G wireless adapters. Additionally, we have benefited from relatively higher standard margins on newer products, especially from our RangeMax family of products.

It is difficult to accurately forecast demand for our products across our markets and within specific countries. The shift in the mix of actual orders compared to forecasted demand resulted in a higher than normal reliance on more expensive air versus surface freight during the last quarter of 2005 as well as higher rework and other costs primarily related to product conversions among country-specific packaging.

Additionally, stock-based compensation expense decreased \$16,000 to \$147,000 for the year ended December 31, 2005, from \$163,000 for the year ended December 31, 2004.

**Table of Contents****Operating Expenses****Research and development expense**

	Year Ended December 31,		Year Ended December 31,		
	2004	Percentage Change	2005	Percentage Change	2006
	(In thousands, except percentage data)				
Research and development expense	\$ 10,316	24.4%	\$ 12,837	43.7%	\$ 18,443
Percentage of net revenue	2.7%		2.8%		3.2%

Research and development expenses consist primarily of personnel expenses, payments to suppliers for design services, tooling design costs, safety and regulatory testing, product certification expenditures to qualify our products for sale into specific markets, prototypes and other consulting fees. Research and development expenses are recognized as they are incurred. We have invested in building our research and development organization to enhance our ability to introduce innovative and easy to use products. We expect to continue to add additional employees in our research and development department. In the future we believe that research and development expenses will increase in absolute dollars as we expand into new product technologies, enhance the ease-of-use of our products, and broaden our core competencies.

Research and development expenses increased \$5.6 million, or 43.7%, to \$18.4 million for the year ended December 31, 2006, from \$12.8 million for the year ended December 31, 2005. The increase was primarily due to higher salary and related payroll expenses of \$2.1 million resulting from research and development related headcount growth, including \$486,000 related to retention bonuses for certain employees associated with the acquisition of SkipJam. Employee headcount increased by 15% to 62 employees as of December 31, 2006 as compared to 54 employees as of December 31, 2005, in part due to employees obtained from the acquisition of SkipJam. The increase was also attributable to an increase of \$2.1 million in engineering costs. These costs were incurred to improve the quality of our small business products. Additionally, stock-based compensation expense increased \$826,000 to \$1.1 million for the year ended December 31, 2006, from \$293,000 for the year ended December 31, 2005, as a result of the adoption of SFAS 123R.

Research and development expenses increased \$2.5 million, or 24.4%, to \$12.8 million for the year ended December 31, 2005, from \$10.3 million for the year ended December 31, 2004. The increase was primarily due to increased salary and payroll related expenses of \$2.4 million resulting from research and development related headcount growth. Employee headcount increased by 35% to 54 employees as of December 31, 2005 as compared to 40 employees as of December 31, 2004. These headcount increases were primarily due to the expansion of our research and development facility in Taiwan and expansion of our focus on the broadband service provider market which often requires additional certifications and testing. Additionally, stock-based compensation expense decreased \$107,000 to \$293,000 for the year ended December 31, 2005, from \$400,000 for the year ended December 31, 2004.

**Sales and marketing expense**

	Year Ended December 31,	
	Percentage	Percentage

	<b>2004</b>	<b>Change</b>	<b>2005</b>	<b>Change</b>	<b>2006</b>
	<b>(In thousands, except percentage data)</b>				
Sales and marketing expense	\$ 62,247	14.6%	\$ 71,345	28.8%	\$ 91,881
Percentage of net revenue	16.3%		15.9%		16.0%

Sales and marketing expenses consist primarily of advertising, trade shows, corporate communications and other marketing expenses, product marketing expenses, outbound freight costs, personnel expenses for sales and marketing staff and technical support expenses. We believe that maintaining and building brand awareness is key to both net revenue growth and maintaining our gross margin. We also believe that maintaining widely available and high quality technical support is key to building and maintaining brand awareness. Accordingly, we expect sales and marketing expenses to increase in absolute dollars in the future, related to the planned growth of our business.

**Table of Contents**

Sales and marketing expenses increased \$20.6 million, or 28.8%, to \$91.9 million for the year ended December 31, 2006, from \$71.3 million for the year ended December 31, 2005. We note that sales and marketing expenses grew in line with revenue growth. Of this increase, \$9.4 million was due to increased salary and payroll related expenses as a result of sales and marketing related headcount growth and increased commissions earned in EMEA due to substantial revenue growth. Employee headcount increased from 157 employees as of December 31, 2005 to 207 employees as of December 31, 2006. More specifically, 46 of the 50 incremental employees relate to expansion in EMEA and Asia Pacific, which represents our continued geographic expansion and increasing sales staffing in these regions. For example, we established a Technical Support Center in our Ireland office, which accounted for 7 new individuals. Outside service fees related to customer service and technical support also increased by \$4.9 million, in support of higher call volumes related to increased units sold. We also incurred a \$1.7 million increase in advertising, travel, and promotion expenses related to our expansion of marketing activities into new geographies. Outbound freight increased \$1.6 million, reflecting our higher sales volume. Marketing costs classified as operating expenses remained relatively constant, as the majority of incremental marketing expenses related to rebates and other items classified as contra-revenue. Additionally, stock-based compensation expense increased \$1.0 million to \$1.4 million for the year ended December 31, 2006, from \$375,000 for the year ended December 31, 2005, as a result of the adoption of SFAS 123R.

Sales and marketing expenses increased \$9.1 million, or 14.6%, to \$71.3 million for the year ended December 31, 2005, from \$62.2 million for the year ended December 31, 2004. Of this increase, \$5.1 million was due to product promotion, including intensified in-store staffing and training programs, advertising, and outside technical support expenses, all in support of increased volume. In addition, salary and related expenses for additional sales and marketing personnel increased by \$2.7 million as a result of sales and marketing related headcount growth from 125 employees as of December 31, 2004 to 157 employees as of December 31, 2005. We attributed 28 of the 32 incremental employee additions to expansion in EMEA and Asia Pacific, where sales and marketing employee headcount grew 46% and 35%, respectively. The increase was also attributable to additional allocated overhead costs such as facilities and information systems costs amounting to \$851,000, which reflects sales and marketing's larger relative headcount growth rate and correspondingly higher share of overhead costs. Additionally, stock-based compensation expense decreased \$358,000 to \$375,000 for the year ended December 31, 2005, from \$733,000 for the year ended December 31, 2004.

**General and administrative expense**

	<b>Year Ended December 31,</b>				
	<b>2004</b>	<b>Percentage Change</b>	<b>2005</b>	<b>Percentage Change</b>	<b>2006</b>
	<b>(In thousands, except percentage data)</b>				
General and administrative expense	\$ 14,905	-2.3%	\$ 14,559	43.6%	\$ 20,905
Percentage of net revenue	3.9%		3.2%		3.7%

General and administrative expenses consist of salaries and related expenses for executive, finance and accounting, human resources, professional fees, allowance for bad debts, and other corporate expenses. We expect general and administrative costs to increase in absolute dollars related to the general growth of the business, continued international expansion, and increased investments in infrastructure such as a new enterprise resource planning system.

General and administrative expenses increased \$6.3 million, or 43.6%, to \$20.9 million for the year ended December 31, 2006, from \$14.6 million for the year ended December 31, 2005. The increase was primarily due to

higher salary and payroll related expenses of \$3.3 million due to an increase in general and administrative related headcount. Employee headcount increased by 25% to 66 employees as of December 31, 2006 compared to 53 employees as of December 31, 2005. Of the incremental 13 additions, 8 personnel were hired into accounting and finance departments in our new Ireland office. We also incurred a \$1.4 million increase in fees for outside professional services, which was in part related to an increase in IT consulting costs, tax consulting and general legal expenses. Additionally, stock-based compensation expense increased approximately \$1.4 million to \$1.6 million for the year ended December 31, 2006, from \$249,000 for the year ended December 31, 2005, as a result of the adoption of SFAS 123R.

**Table of Contents**

General and administrative expenses decreased approximately \$300,000, or 2.3%, to \$14.6 million for the year ended December 31, 2005, from \$14.9 million for the year ended December 31, 2004. This decrease was primarily due to a decrease in fees for professional services aggregating \$1.7 million and a decrease in net allocated overhead such as information systems costs aggregating \$588,000, offset by an increase in employee related costs of \$2.1 million. The decrease in fees for professional services resulted from decreases in consulting, outsourced accounting fees and legal fees, and costs associated with initial Sarbanes-Oxley 404 compliance documentation in 2004. The increase in employee related costs resulted from an increase in general and administrative related headcount, particularly in the finance area to support an increase in transactional processing due to increased revenue. Employee headcount increased by 43% to 53 employees as of December 31, 2005 as compared to 37 employees as of December 31, 2004. The decrease in net allocated overhead reflects the general and administrative function's slower headcount growth rate relative to other functional areas. Additionally, stock-based compensation expense decreased \$142,000 to \$249,000 for the year ended December 31, 2005, from \$391,000 for the year ended December 31, 2004.

**In-process research and development**

During the year ended December 31, 2006, we expensed \$2.9 million for in-process research and development related to intangible assets purchased in our acquisition of SkipJam. See Note 2 of the Notes to the Consolidated Financial Statements for additional information regarding the acquisition. In-process R&D is expensed upon an acquisition because technological feasibility has not been established and no future alternative uses exist. We acquired only one in-process R&D project, which is related to the development of a multimedia product that had not reached technological feasibility and had no alternative use. We incurred costs of approximately \$725,000 to complete the project, of which approximately \$575,000 was incurred through December 31, 2006. We completed the project in February 2007.

**Litigation reserves**

During the year ended December 31, 2005, we recorded an allowance of \$802,000 for the estimated costs of settlement for the *Zilberman v. NETGEAR* lawsuit. The lawsuit was settled on May 26, 2006, and no material additional costs were incurred. No litigation reserves were recorded in the year ended December 31, 2006.

**Interest income and other income (expense)**

	<b>Year Ended December 31,</b>		
	<b>2004</b>	<b>2005</b>	<b>2006</b>
	<b>(In thousands)</b>		
Interest income	\$ 1,593	\$ 4,104	\$ 6,974
Other income (expense), net	(560)	(1,770)	2,495
Total interest income and other income (expense)	\$ 1,033	\$ 2,334	\$ 9,469

Interest income represents amounts earned on our cash, cash equivalents and short-term investments.

Other income (expense), net, primarily represents gains and losses on transactions denominated in foreign currencies and other miscellaneous expenses.

Interest income increased \$2.9 million, or 69.9%, to \$7.0 million for the year ended December 31, 2006, from \$4.1 million for the year ended December 31, 2005. The increase in interest income was a result of an increase in the average interest rate earned.

Other income (expense), net, increased to income of \$2.5 million for the year ended December 31, 2006, from an expense of \$1.8 million for the year ended December 31, 2005. The income of \$2.5 million was primarily attributable to a net foreign exchange gain experienced in the year ended December 31, 2006 due to the weakening of the U.S. dollar against the Euro, the Great Britain Pound, and the Australian Dollar. The expense of \$1.8 million in the year ended December 31, 2005 was primarily attributable to a net foreign exchange loss experienced due to the strengthening of the U.S. dollar against the Euro, Great Britain Pound and the Australian Dollar.

## **Table of Contents**

The aggregate of interest income, interest expense, and other expense amounted to net other income of \$2.3 million for the year ended December 31, 2005, compared to net other income of \$1.0 million for the year ended December 31, 2004. This change was primarily due to an additional \$2.5 million in interest income for the year ended December 31, 2005, from the investment of our cash, cash equivalents, and short-term investments balance throughout the year. This was offset in part by an increase in other expense of \$1.2 million consisting primarily of realized and unrealized losses associated with foreign currency denominated transactions due in part to currency volatility during the year as well as our billing in foreign currencies which began in the first quarter of 2005.

### **Provision for Income Taxes**

Provision for income taxes increased \$7.0 million, resulting in a provision of \$27.9 million for the year ended December 31, 2006, from a provision of \$20.9 million for the year ended December 31, 2005. The effective tax rate was approximately 40% for the year ended December 31, 2006 and approximately 38% for the year ended December 31, 2005. The effective tax rate for both periods differed from our statutory rate of approximately 35% due to non-deductible stock-based compensation, state taxes, other non-deductible expenses, and tax credits. The effective tax rate for the year ended December 31, 2006 was also impacted by non-deductible charges pertaining to in-process research and development as a result of the acquisition of SkipJam.

Provision for income taxes increased \$8.0 million, to a provision of \$20.9 million for the year ended December 31, 2005, from a provision of \$12.9 million for the year ended December 31, 2004. The effective tax rate for the year ended December 31, 2005 was approximately 38% and differed from our statutory rate of approximately 35% due to state taxes, and other non-deductible expenses, offset in part by tax credits. The effective tax rate for the year ended December 31, 2004 was approximately 36% and differed from our statutory rate of approximately 35% due to non-deductible stock-based compensation, state taxes, and other non-deductible expenses, offset in part by a \$1.5 million tax benefit from exercises of stock options and tax credits.

### **Net Income**

Net income increased \$7.5 million, to \$41.1 million for the year ended December 31, 2006 from \$33.6 million for the year ended December 31, 2005. This increase was due to an increase in gross profit of \$42.0 million and an increase in interest and other income of \$7.1 million, offset by an increase in operating expenses of \$34.6 million and an increase in provision for income taxes of \$7.0 million.

Net income increased \$10.1 million, to \$33.6 million for the year ended December 31, 2005 from \$23.5 million for the year ended December 31, 2004. This increase was primarily due to an increase in gross profit of \$28.9 million, offset by an increase in operating expenses of \$12.0 million and an increase in provision for income taxes of \$8.0 million.

### **Liquidity and Capital Resources**

As of December 31, 2006 we had cash, cash equivalents and short-term investments totaling \$197.5 million.

Our cash and cash equivalents balance decreased from \$90.0 million as of December 31, 2005 to \$87.7 million as of December 31, 2006. Our short-term investments, which represent the investment of funds available for current operations, increased from \$83.7 million as of December 31, 2005 to \$109.7 million as of December 31, 2006. Operating activities during the year ended December 31, 2006 generated cash of \$23.1 million primarily due to an increase in net income. Investing activities during the year ended December 31, 2006 used \$37.7 million, which includes the net purchase of short-term investments of \$24.2 million, purchases of property and equipment amounting to \$5.9 million, and payments made in connection with our acquisition of SkipJam of \$7.6 million. During the year

ended December 31, 2006, financing activities provided \$12.3 million, primarily resulting from the issuance of our common stock upon exercise of stock options and our employee stock purchase program.

Our days sales outstanding decreased from 77 days as of December 31, 2005 to 66 days as of December 31, 2006.

Our accounts payable increased from \$38.9 million at December 31, 2005 to \$39.8 million at December 31, 2006.

**Table of Contents**

Inventory increased by \$26.0 million from \$51.9 million at December 31, 2005 to \$77.9 million at December 31, 2006. Ending inventory turns decreased, from approximately 6.5 turns in the quarter ended December 31, 2005, to 5.7 turns in the quarter ended December 31, 2006.

Based on our current plans and market conditions, we believe that our existing cash, cash equivalents and short-term investments will be sufficient to satisfy our anticipated cash requirements for the foreseeable future. However, we cannot be certain that our planned levels of revenue, costs and expenses will be achieved. If our operating results fail to meet our expectations or if we fail to manage our inventory, accounts receivable or other assets, we could be required to seek additional funding through public or private financings or other arrangements. In addition, as we continue to expand our product offerings, channels and geographic presence, we may require additional working capital. In such event, adequate funds may not be available when needed or may not be available on favorable or commercially acceptable terms, which could have a negative effect on our business and results of operations.

**Backlog**

As of December 31, 2006, we had a backlog of approximately \$42.7 million compared to approximately \$15.7 million as of December 31, 2005. Our backlog consists of products for which customer purchase orders have been received and which are scheduled or in the process of being scheduled for shipment. While we expect to fulfill the order backlog within the current year, most orders are subject to rescheduling or cancellation with little or no penalties. Because of the possibility of customer changes in product scheduling or order cancellation, our backlog as of any particular date may not be an indicator of net sales for any succeeding period.

**Contractual Obligations and Off-Balance Sheet Arrangements*****Contractual Obligations***

The following table describes our commitments to settle non-cancelable lease and purchase commitments as of December 31, 2006.

	<b>Less Than 1 Year</b>	<b>1-3 Years</b>	<b>3-5 Years</b>	<b>More Than 5 Years</b>	<b>Total</b>
	<b>(In thousands)</b>				
<b>Operating leases</b>	\$ 2,371	\$ 2,016	\$ 1,053	\$ 3,214	\$ 8,654
<b>Purchase obligations</b>	\$ 55,227	\$	\$	\$	\$ 55,227
	\$ 57,598	\$ 2,016	\$ 1,053	\$ 3,214	\$ 63,881

We lease office space, cars and equipment under non-cancelable operating leases with various expiration dates through December 2026. Rent expense was \$1.3 million for the year ended December 31, 2004, \$1.5 million for the year ended December 31, 2005 and \$2.2 million for the year ended December 31, 2006. The terms of some of the office leases provide for rental payments on a graduated scale. We recognize rent expense on a straight-line basis over the lease period, and have accrued for rent expense incurred but not paid. The amounts presented are consistent with contractual terms and are not expected to differ significantly, unless a substantial change in our headcount needs requires us to exit an office facility early or expand our occupied space.

We enter into various inventory-related purchase agreements with suppliers. Generally, under these agreements, 50% of the orders are cancelable by giving notice 46 to 60 days prior to the expected shipment date and 25% of orders are cancelable by giving notice 31-45 days prior to the expected shipment date. Orders are not cancelable within 30 days prior to the expected shipment date. At December 31, 2006, we had \$55.2 million in non-cancelable purchase commitments with suppliers.

As part of our acquisition of SkipJam, we agreed to pay up to \$1.4 million in cash contingent on the continued employment of certain former SkipJam employees with us. These payments will be recorded as compensation expense over a two-year period. During the year ended December 31, 2006, we have recorded \$486,000 of additional compensation expense pursuant to this agreement, and expect to pay up to \$933,000 over the remaining life of this agreement.

**Table of Contents**

***Off-Balance Sheet Arrangements***

As of December 31, 2006, we did not have any off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

**Recent Accounting Pronouncements**

See Note 1 of the Notes to Consolidated Financial Statements for recent accounting pronouncements.

**Item 7A. *Quantitative and Qualitative Disclosures About Market Risk***

We do not use derivative financial instruments in our investment portfolio. We have an investment portfolio of fixed income securities that are classified as available-for-sale securities. These securities, like all fixed income instruments, are subject to interest rate risk and will fall in value if market interest rates increase. We attempt to limit this exposure by investing primarily in short-term securities. Due to the short duration and conservative nature of our investment portfolio, a movement of 10% by market interest rates would not have a material impact on our operating results and the total value of the portfolio over the next fiscal year.

We are exposed to risks associated with foreign exchange rate fluctuations due to our international manufacturing and sales activities. We generally have not hedged currency exposures. These exposures may change over time as business practices evolve and could negatively impact our operating results and financial condition. In the second quarter of 2005 we began to invoice some of our international customers in foreign currencies including, but not limited to, the Euro, Great Britain Pound, Japanese Yen and the Australian dollar. As the customers that are currently invoiced in local currency become a larger percentage of our business, or to the extent we begin to bill additional customers in foreign currencies, the impact of fluctuations in foreign exchange rates could have a more significant impact on our results of operations. For those customers in our international markets that we continue to sell to in U.S. dollars, an increase in the value of the U.S. dollar relative to foreign currencies could make our products more expensive and therefore reduce the demand for our products. Such a decline in the demand could reduce sales and negatively impact our operating results. Certain operating expenses of our foreign operations require payment in the local currencies. As of December 31, 2006, we had net assets in various local currencies. A hypothetical 10% movement in foreign exchange rates would result in an after tax positive or negative impact of \$2.6 million to net income at December 31, 2006.

**Item 8. Consolidated Financial Statements and Supplementary Data**

**Management's Report on Internal Control Over Financial Reporting**

Management of NETGEAR, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15(d)-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including its principal executive officer and principal financial officer, the Company assessed the effectiveness of its internal control over financial reporting as of December 31, 2006. In conducting its evaluation, the Company used the criteria set forth in the *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on its evaluation and those criteria, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2006. The Company's independent registered public accounting firm, PricewaterhouseCoopers LLP, has audited management's assessment of the Company's internal control over financial reporting as of December 31, 2006 as stated in their report which appears herein.

**Table of Contents**

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Stockholders  
of NETGEAR, Inc.:

We have completed integrated audits of NETGEAR, Inc.'s consolidated financial statements and of its internal control over financial reporting as of December 31, 2006 in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

**Consolidated financial statements and financial statement schedule**

In our opinion, the consolidated financial statements listed in the accompanying index appearing under Item 15 (a)(1) present fairly, in all material respects, the financial position of NETGEAR, Inc. and its subsidiaries at December 31, 2006 and December 31, 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule appearing under Item 15 (a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 7 of the Notes to Consolidated Financial Statements, in accordance with the adoption of SFAS 123R, the Company changed the manner in which it accounts for share-based compensation in the year ended December 31, 2006.

**Internal control over financial reporting**

Also, in our opinion, management's assessment, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 8, that the Company maintained effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating

management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail,

**Table of Contents**

accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**NETGEAR, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 1 The Company and Summary of Significant Accounting Policies:**

***The Company***

NETGEAR, Inc. ( NETGEAR or the Company ) was incorporated in Delaware in January 1996. The Company designs, develops and markets networking products for small business, which the Company defines as a business with fewer than 250 employees, and home users. The Company focuses on satisfying the ease-of-use, quality, reliability, performance and affordability requirements of these users. The Company's product offerings enable users to share Internet access, peripherals, files, digital multimedia content and applications among multiple personal computers, or PCs, and other Internet-enabled devices. The Company sells products primarily through a global sales channel network, which includes traditional retailers, online retailers, direct market resellers, or DMRs, value added resellers, or VARs, and broadband service providers.

***Basis of presentation***

The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All inter-company accounts and transactions have been eliminated in the consolidation of these subsidiaries. Certain reclassifications have been made to prior period reported amounts to conform to current year presentation.

***Fiscal periods***

The Company's fiscal year begins on January 1 of the year stated and ends on December 31 of the same year. The Company reports its results on a fiscal quarter basis rather than on a calendar quarter basis. Under the fiscal quarter basis, each of the first three fiscal quarters ends on the Sunday closest to the calendar quarter end, with the fourth quarter ending on December 31.

***Use of estimates***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

***Cash and cash equivalents***

The Company considers all highly liquid investments with a maturity at the time of purchase of three months or less to be cash equivalents. The Company deposits cash and cash equivalents with high credit quality financial institutions.

***Short-term investments***

Short-term investments comprise marketable securities that consist of government securities with an original maturity or a remaining maturity at the time of purchase, of greater than three months and less than twelve months. All marketable securities are held in the Company's name with two high quality financial institutions, who act as the Company's custodians and investment managers. All of the Company's marketable securities are classified as

available-for-sale securities in accordance with the provisions of Statement of Financial Accounting Standards ( SFAS ) No. 115, Accounting For Certain Investments in Debt and Equity Securities and are carried at fair value with unrealized gains and losses reported as a separate component of stockholders equity.

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Certain risks and uncertainties***

The Company's products are concentrated in the networking industry, which is characterized by rapid technological advances, changes in customer requirements and evolving regulatory requirements and industry standards. The success of the Company depends on management's ability to anticipate and/or to respond quickly and adequately to technological developments in its industry, changes in customer requirements, or changes in regulatory requirements or industry standards. Any significant delays in the development or introduction of products could have a material adverse effect on the Company's business and operating results.

The Company relies on a limited number of third parties to manufacture all of its products. If any of the Company's third party manufacturers cannot or will not manufacture its products in required volumes, on a cost-effective basis, in a timely manner, or at all, the Company will have to secure additional manufacturing capacity. Any interruption or delay in manufacturing could have a material adverse effect on the Company's business and operating results.

***Concentration of credit risk***

Financial instruments that potentially subject the Company to a concentration of credit risk consist of cash and cash equivalents, short-term investments and accounts receivable. The Company believes that there is minimal credit risk associated with the investment of its cash and cash equivalents and short-term investments, due to the high quality financial institutions which manage the Company's investments, and the restrictions placed on the type of investment that can be entered into under the Company's investment policy.

The Company's customers are primarily distributors as well as retailers and broadband service providers who sell the products to a large group of end-users. The Company maintains an allowance for doubtful accounts for estimated losses resulting from the inability of the Company's customers to make required payments. The Company regularly performs credit evaluations of the Company's customers' financial condition and considers factors such as historical experience, credit quality, age of the accounts receivable balances, and geographic or country-specific risks and economic conditions that may affect customers' ability to pay, and, generally, requires no collateral from its customers.

The following table summarizes the percentage of the Company's total accounts receivable represented by customers with balances in excess of 10% of its total accounts receivable as of December 31, 2005 and 2006.

	<b>December 31,</b>	
	<b>2005</b>	<b>2006</b>
Ingram Micro, Inc.	21%	12%
Tech Data Corporation	15%	12%
Best Buy Co., Inc.	17%	15%

***Fair value of financial instruments***

The carrying amounts of the Company's financial instruments, including cash and cash equivalents, accounts receivable, prepaid expenses, accounts payable, accrued employee compensation and other accrued liabilities approximate their fair values due to their short maturities. See Note 3 for disclosures regarding the fair value of the Company's short-term investments.

***Inventories***

Inventories consist primarily of finished goods which are valued at the lower of cost or market, with cost being determined using the first-in, first-out method. The Company writes down its inventories based on estimated excess and obsolete inventories determined primarily by future demand forecasts. At the point of loss recognition, a new,

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

***Property and equipment***

Property and equipment are stated at historical cost, less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

Computer equipment	2 years
Furniture and fixtures	5 years
Software	2-5 years
Machinery and equipment	1-3 years
Leasehold improvements	Shorter of the lease term or 5 years

The Company accounts for impairment of property and equipment in accordance with SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets. Recoverability of assets to be held and used is measured by comparing the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated undiscounted future net cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. The carrying value of the asset is reviewed on a regular basis for the existence of facts, both internal and external, that may suggest impairment. The Company did not recognize impairment charges in any of the periods presented.

***Goodwill and intangibles***

The Company applies SFAS No. 142, Goodwill and Other Intangible Assets and performs an annual goodwill impairment test. For purposes of impairment testing, the Company has determined that it has only one reporting unit. The identification and measurement of goodwill impairment involves the estimation of the fair value of the Company. The estimates of fair value of the Company are based on the best information available as of the date of the assessment, which primarily includes the Company's market capitalization and incorporates management assumptions about expected future cash flows.

Purchased intangible assets with finite lives are amortized using the straight-line method over the estimated economic lives of the assets, which range from two to four years. Purchased intangible assets determined to have indefinite useful lives are not amortized. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. The carrying value of the asset is reviewed on a regular basis for the existence of facts, both internal and external, that may suggest impairment.

***Product warranties***

The Company provides for estimated future warranty obligations at the time revenue is recognized. The Company's standard warranty obligation to its direct customers generally provides for a right of return of any product for a full refund in the event that such product is not merchantable or is found to be damaged or defective. At the time revenue is recognized, an estimate of future warranty returns is recorded to reduce revenue in the amount of the expected credit or refund to be provided to its direct customers. At the time the Company records the reduction to revenue related to warranty returns, the Company includes within cost of revenue a write-down to reduce the carrying value of such products to net realizable value. The Company's standard warranty obligation to its end-users provides for repair or replacement of a defective product for one or more years. Factors that affect the warranty obligation include product failure rates, material usage, and service delivery costs incurred in correcting product

Table of Contents**NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

failures. The estimated cost associated with fulfilling the Company's warranty obligation to end-users is recorded in cost of revenue. Because the Company's products are manufactured by contract manufacturers, in certain cases the Company has recourse to the contract manufacturer for replacement or credit for the defective products. The Company gives consideration to amounts recoverable from its contract manufacturers in determining its warranty liability. Changes in the Company's warranty liability, which is included as a component of "Other accrued liabilities" in the consolidated balance sheets, are as follows (in thousands):

	<b>Year Ended December 31,</b>	
	<b>2005</b>	<b>2006</b>
Balance as of beginning of year	\$ 10,766	\$ 11,845
Provision for warranty liability made during the year	25,087	45,459
Settlements made during the year	(24,008)	(36,005)
Balance at end of year	\$ 11,845	\$ 21,299

***Revenue recognition***

Revenue from product sales is recognized at the time the product is shipped provided that persuasive evidence of an arrangement exists, title and risk of loss has transferred to the customer, the selling price is fixed or determinable and collection of the related receivable is reasonably assured. Currently, for some of the Company's customers, title passes to the customer upon delivery to the port or country of destination, upon their receipt of the product, or upon the customer's resale of the product. At the end of each fiscal quarter, the Company estimates and defers revenue related to product where title has not transferred. The revenue continues to be deferred until such time that title passes to the customer.

In addition to warranty-related returns, certain distributors and retailers generally have the right to return product for stock rotation purposes. Every quarter, stock rotation rights are generally limited to 10% of invoiced sales to the distributor or retailer in the prior quarter. Upon shipment of the product, the Company reduces revenue for an estimate of potential future product warranty and stock rotation returns related to the current period product revenue. Management analyzes historical returns, channel inventory levels, current economic trends and changes in customer demand for the Company's products when evaluating the adequacy of the allowance for sales returns, namely warranty and stock rotation returns. Revenue on shipments is also reduced for estimated price protection and sales incentives deemed to be contra-revenue under Emerging Issues Task Force (EITF) Issue No. 01-9.

***Sales incentives***

Sales incentives provided to customers are accounted for in accordance with EITF Issue No. 01-9, "Accounting for Consideration Given by a Vendor to a Customer or Reseller of the Vendor's Products". Under these guidelines, the Company accrues for sales incentives as a marketing expense if it receives an identifiable benefit in exchange and can reasonably estimate the fair value of the identifiable benefit received; otherwise, it is recorded as a reduction to

revenues. As a consequence, the Company records a substantial portion of its channel marketing costs as a reduction of revenue.

The Company records estimated reductions to revenues for sales incentives at the later of when the related revenue is recognized or when the program is offered to the customer or end consumer.

***Shipping and handling fees and costs***

In September 2000, the EITF issued EITF Issue No. 00-10, Accounting for Shipping and Handling Fees and Costs. EITF Issue No. 00-10 requires shipping and handling fees billed to customers to be classified as revenue and shipping and handling costs to be either classified as cost of revenue or disclosed in the notes to the consolidated financial statements. The Company includes shipping and handling fees billed to customers in net revenue.

**Table of Contents**

**NETGEAR, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Shipping and handling costs associated with inbound freight are included in cost of revenue. In cases where the Company gives a freight allowance to the customer for their own inbound freight costs, such costs are appropriately recorded as a reduction in net revenue. Shipping and handling costs associated with outbound freight are included in sales and marketing expenses and totaled \$6.4 million, \$6.7 million and \$8.3 million in the years ended December 31, 2004, 2005 and 2006 respectively.

***Research and development***

Costs incurred in the research and development of new products are charged to expense as incurred.

***Advertising costs***

Advertising costs are expensed as incurred. Total advertising and promotional expenses were \$11.9 million, \$14.5 million and \$15.3 million in the years ended December 31, 2004, 2005 and 2006, respectively.

***Income taxes***

The Company accounts for income taxes under an asset and liability approach. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences resulting from different treatments for tax versus accounting of certain items, such as accruals and allowances not currently deductible for tax purposes. These differences result in deferred tax assets and liabilities, which are included within the consolidated balance sheet. The Company must then assess the likelihood that the Company's deferred tax assets will be recovered from future taxable income and to the extent the Company believes that recovery is not more likely than not, the Company must establish a valuation allowance.

The Company assesses the probability of adverse outcomes from tax examinations regularly to determine the adequacy of the Company's income tax liability. If the Company ultimately determines that payment of these amounts is unnecessary, the Company reverses the liability and recognizes a tax benefit during the period in which the Company determines that the liability is no longer necessary. The Company records an additional charge in the Company's provision for taxes in the period in which the Company determines that the recorded tax liability is less than the Company expects the ultimate assessment to be.

***Computation of net income per share***

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted net income per share reflects the additional dilution from potential issuances of common stock, such as stock issuable pursuant to the exercise of stock options and awards. Potentially dilutive shares are excluded from the computation of diluted net income per share when their effect is anti-dilutive.

***Stock-based compensation***

Effective January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123R), using the modified prospective transition method and therefore has not restated results for prior periods. Under this transition method, stock-based compensation expense for the year ended

December 31, 2006 includes compensation expense for all stock-based compensation awards granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123, Accounting for Stock-Based Compensation ( SFAS 123 ). Stock-based compensation expense for all stock-based compensation awards granted on or after January 1, 2006 is based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R. The valuation provisions of SFAS 123R also apply to grants that are modified after January 1, 2006. The Company recognizes these compensation costs on a straight-line basis over the requisite service period of the award, which is generally

**Table of Contents**

**NETGEAR, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the option vesting term of four years. Prior to the adoption of SFAS 123R, the Company recognized stock-based compensation expense in accordance with Accounting Principles Board ( APB ) Opinion No. 25, Accounting for Stock Issued to Employees ( APB 25 ). In March 2005, the Securities and Exchange Commission (the SEC ) issued Staff Accounting Bulletin No. 107 ( SAB 107 ) regarding the SEC 's interpretation of SFAS 123R and the valuation of share-based payments for public companies. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123R. See Note 7 for a further discussion on stock-based compensation.

***Comprehensive income***

Under SFAS 130, Reporting Comprehensive Income, the Company is required to display comprehensive income and its components as part of the financial statements. The Company has displayed its comprehensive income as part of the Consolidated Statements of Stockholders' Equity.

***Foreign currency translation***

The Company's functional currency is the U.S. dollar for all of its international subsidiaries. Foreign currency transactions of international subsidiaries are remeasured into U.S. dollars at the end-of-period exchange rates for monetary assets and liabilities, and historical exchange rates for nonmonetary assets. Expenses are remeasured at average exchange rates in effect during each period, except for expenses related to non-monetary assets, which are remeasured at historical exchange rates. Revenue is remeasured at the daily rate in effect as of the date the order ships. Gains and losses arising from foreign currency transactions are included in net income and were net losses of \$560,000 and \$1.8 million for the years ended December 31, 2004 and 2005, respectively, and a net gain of \$2.5 million for the year ended December 31, 2006.

***Recent accounting pronouncements***

In June 2006, the Financial Accounting Standards Board ( FASB ) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109 ( FIN 48 ), which clarifies the accounting for uncertainty in income tax positions. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken, or expected to be taken, on a tax return. This Interpretation also provides guidance on derecognition, classification, interest, penalties, accounting in interim periods, disclosure and transition. The evaluation of a tax position in accordance with this Interpretation is a two-step process. The first step will determine if it is more likely than not that a tax position will be sustained upon examination and should therefore be recognized. The second step will measure a tax position that meets the more likely than not recognition threshold to determine the amount of benefit to recognize in the financial statements. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company is currently evaluating the impact of adopting FIN 48 on the consolidated financial statements.

In June 2006, the EITF reached a consensus on EITF Issue No. 06-3, How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation) . EITF Issue No. 06-3 provides that the presentation of taxes assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer on either a gross basis (included in revenues and costs) or on a net basis (excluded from revenues) is an accounting policy decision that should be disclosed. EITF Issue No. 06-3 is effective for fiscal years beginning after December 15, 2006. The Company is currently evaluating the impact of adopting EITF Issue No. 06-3 on the consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements ( SFAS 157 ), which defines fair value, establishes guidelines for measuring fair value, and expands disclosures regarding fair value measurements. SFAS 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. SFAS 157 is effective for fiscal years beginning after

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

November 15, 2007. The Company is currently evaluating the impact of adopting SFAS 157 on the consolidated financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 requires that registrants quantify errors using both a balance sheet and income statement approach and evaluate whether either approach results in a misstated amount that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 is effective for fiscal years ending after November 15, 2006, and did not have a material impact on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of SFAS 159 on the consolidated financial statements.

**Note 2 Business Acquisition:**

On August 1, 2006, the Company completed the acquisition of SkipJam Corp. (SkipJam), a developer of networkable media devices for home entertainment and control. The Company believes the acquisition enhances its strategically important digital home entertainment and control business by strengthening the Company's ability to expand its multimedia product portfolio. The aggregate purchase price was \$7.6 million, paid in cash.

The results of SkipJam's operations have been included in the consolidated financial statements since the date of acquisition. The historical results of SkipJam prior to the acquisition were not material to the Company's results of operations.

The accompanying consolidated financial statements reflect total consideration of approximately \$7.7 million, consisting of cash, and other costs directly related to the acquisition as follows (in thousands):

Purchase price	\$ 7,600
Direct acquisition costs	133
Total consideration	\$ 7,733

In accordance with the purchase method of accounting, the Company allocated the total purchase price to tangible assets, liabilities and identifiable intangible assets based on their estimated fair values. The excess of purchase price over the aggregate fair values was recorded as goodwill. The fair values assigned to identifiable intangible assets acquired were estimated with the assistance of an independent valuation firm. Purchased intangibles are amortized on a straight-line basis over their respective useful lives. The total allocation of the purchase price is as follows (in thousands):

	<b>Fair Value on August 1, 2006</b>
Prepaid expenses and other current assets	\$ 6
Intangibles	4,000
Goodwill	3,243
Non-current deferred income taxes	484
Total purchase price allocation	\$ 7,733

\$2.9 million of the \$4.0 million in acquired intangible assets was designated as in-process research and development ( in-process R&D ). In-process R&D is expensed upon an acquisition because technological feasibility has not been established and no future alternative uses exist. The Company acquired only one in-process

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

R&D project, which is related to the development of a multimedia product that had not reached technological feasibility and had no alternative use.

The fair value assigned to in-process R&D was determined using the income approach, under which the Company considered the importance of products under development to the Company's overall development plans, estimated the costs to develop the purchased in-process R&D into commercially viable products, estimated the resulting net cash flows from the products when completed and discounted the net cash flows to their present values. The Company used a discount rate of 35% in the present value calculations, which was derived from a weighted-average cost of capital analysis, adjusted to reflect additional risks related to the products' development and success as well as the products' stage of completion. The estimates used in valuing in-process R&D were based upon assumptions believed to be reasonable but which are inherently uncertain and unpredictable. These assumptions may be incomplete or inaccurate, and unanticipated events and circumstances may occur. Accordingly, actual results may vary from the projected results. The Company incurred costs of approximately \$725,000 to complete the project, of which approximately \$575,000 was incurred through December 31, 2006. The Company completed the project in February 2007.

\$1.0 million of the \$4.0 million in acquired intangible assets was designated as core technology. The value was calculated based on the present value of the future estimated cash flows derived from estimated royalty savings attributable to the core technology. This \$1.0 million will be amortized over its four year useful life.

The remaining acquired intangible assets consist of non-competition agreements of \$100,000, with a two year useful life. None of the goodwill recorded as part of the SkipJam acquisition will be deductible for income tax purposes.

Of the \$1.1 million in total intangibles subject to amortization, \$125,000 was expensed by the Company in the year ended December 31, 2006.

As part of the acquisition, the Company has also agreed to pay up to \$1.4 million in cash contingent on the continued employment of certain SkipJam employees with the Company. These payments will be recorded as compensation expense over a two-year period. During the year ended December 31, 2006, the Company recorded \$486,000 of additional compensation expense pursuant to this agreement.

**Note 3 Balance Sheet Components (in thousands):**

*Available-for-sale short-term investments consist of the following:*

	<b>December 31,</b>					
	<b>Cost</b>	<b>2005 Unrealized Loss</b>	<b>Estimated Fair Value</b>	<b>Cost</b>	<b>2006 Unrealized Loss</b>	<b>Estimated Fair Value</b>
Government Securities	\$ 83,744	\$ (90)	\$ 83,654	\$ 109,734	\$ (5)	\$ 109,729

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Accounts receivable and related allowances consist of the following:***

	<b>December 31,</b>	
	<b>2005</b>	<b>2006</b>
Gross accounts receivable	\$ 113,005	\$ 132,651
Less: Allowance for doubtful accounts	(1,295)	(1,727)
Allowance for sales returns	(5,985)	(8,129)
Allowance for price protection	(1,456)	(3,194)
Total allowances	(8,736)	(13,050)
Accounts receivable, net	\$ 104,269	\$ 119,601

***Inventories consist of the following:***

	<b>December 31,</b>	
	<b>2005</b>	<b>2006</b>
Finished goods	\$ 51,873	\$ 77,932

***Property and equipment, net, consists of the following:***

	<b>December 31,</b>	
	<b>2005</b>	<b>2006</b>
Computer equipment	\$ 4,514	\$ 6,101
Furniture, fixtures and leasehold improvements	1,407	2,150
Software	4,523	6,805
Machinery	4,174	5,646
Construction in progress	1,090	554
	15,708	21,256
Less: Accumulated depreciation and amortization	(11,006)	(14,688)
	\$ 4,702	\$ 6,568

Depreciation and amortization expense pertaining to property and equipment in 2004, 2005 and 2006 was \$2.6 million, \$3.1 million and \$4.0 million, respectively.

*Other accrued liabilities consist of the following:*

	<b>December 31,</b>	
	<b>2005</b>	<b>2006</b>
Sales and marketing programs	\$ 39,126	\$ 38,058
Warranty obligation	11,845	21,299
Freight	5,814	4,073
Other	9,494	12,479
Other accrued liabilities	\$ 66,279	\$ 75,909

**Note 4 Net Income Per Share:**

Basic Earnings Per Share ( EPS ) is computed by dividing net income (numerator) by the weighted average number of common shares outstanding (denominator) during the period. Basic EPS excludes the dilutive effect of

**Table of Contents****NETGEAR, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

stock options. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period. In computing diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased using the proceeds from the assumed exercise of stock options.

Potentially dilutive common shares include outstanding stock options and unvested restricted stock awards, which are reflected in diluted earnings per share by application of the treasury stock method. Under the treasury stock method, the amount that the employee must pay for exercising stock options, the amount of stock-based compensation cost for future services that the Company has not yet recognized, and the amount of tax benefit that would be recorded in additional paid-in capital upon exercise are assumed to be used to repurchase shares.

Net income per share for the years ended December 31, 2004, 2005 and 2006 are as follows (in thousands, except per share data):

	<b>Year Ended December 31,</b>		
	<b>2004</b>	<b>2005</b>	<b>2006</b>
Net income	\$ 23,465	\$ 33,623	\$ 41,132
Weighted average shares outstanding:			
Basic	30,441	32,351	33,381
Options and awards	2,185	1,588	1,172
Total diluted	32,626	33,939	34,553
Basic net income per share	\$ 0.77	\$ 1.04	\$ 1.23
Diluted net income per share	\$ 0.72	\$ 0.99	\$ 1.19

Anti-dilutive common stock options totalling 416,280, 131,560 and 675,953 were excluded from the weighted average shares outstanding for the diluted per share calculation for 2004, 2005 and 2006, respectively.

**Note 5 Income Taxes:**

Income before income taxes consists of the following (in thousands):

	<b>Year Ended December 31,</b>		
	<b>2004</b>	<b>2005</b>	<b>2006</b>
United States	\$ 32,743	\$ 50,127	\$ 52,501
