- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

## Edgar Filing: PC TEL INC - Form 8-K

### ITEM 2.05 COSTS ASSOCIATED WITH EXIT OR DISPOSAL ACTIVITIES

On April 7, 2006, the company reached an agreement in principle with the labor union responsible for the company's manufacturing and certain other personnel in its Dublin, Ireland factory to discontinue the manufacture of the iVET, PMR and DPMR lines of the company's antenna products at that location. This agreement will enable the company to wind down its manufacturing operations at the Dublin facility, terminate 65 redundant employee positions, terminate its facilities lease at this location, and reduce its pension obligations to terminated employees. Manufacturing of the discontinued lines of antenna products will be substantially relocated either to a contract manufacturer in St. Petersburg, Russia, or to the company's Antenna Products Group facility in Bloomingdale, Illinois. The process of winding down manufacturing operations in Dublin and relocating the products to their new manufacturing locations is expected to be complete by mid- 2006, and the related general and administrative support functions are expected to be eliminated by the end of 2006.

The company will continue to maintain antenna research and development as well as sales and marketing activities in a smaller facility in Dublin to be established during the last quarter of 2006. The company believes that its restructuring activities in Dublin will enable it to improve the gross profit margins of the antenna product lines that were included with the company's acquisition of Sigma Wireless Technologies in July 2005.

The company expects to incur restructuring costs related to the discontinuation of its Dublin manufacturing operations. The categories of costs are: severance pay for employees whose jobs are being made redundant; future minimum lease payments through June 2007 on the existing Dublin facility which will be vacated; and, termination of the employee pension defined benefit plan. The severance, future lease payments, and a portion of the termination of the employee pension defined benefit plan will result in future cash expenditures.

The company will incur severance costs of approximately \$1.4 million. Approximately \$0.5 million is statutory and will be recorded in the first quarter 2006. The remaining amount will be recorded over the service period of the affected employees. It is anticipated that the future minimum lease payments between the time the facility is vacated and the end of the minimum lease period will be between \$0.1 and \$0.2 million. The company is still evaluating the potential credit, if any, which would be incurred with the termination of the pension plan and related payout to the pension members. It is not in a position at this time to estimate costs or credits for the pension termination. When those costs or credits are known, the company will make additional disclosure.

### ITEM 2.06 MATERIAL IMPAIRMENTS

In conjunction with the discontinuance of manufacturing operations in the Dublin facility, the company will dispose of fixed assets no longer required. It anticipates the net book value of such assets to be in a range between \$0.3 and \$0.5 million. The impairment is non-cash in nature.
