**THE LAMSON & SESSIONS CO.**

(Exact name of Registrant as specified in its charter)

Ohio

34-0349210

(State or other jurisdiction of  
incorporation or organization)

(IRS Employer Identification No.)

25701 Science Park Drive  
Cleveland, Ohio

44122-7313

(Address of principal executive offices)

(Zip Code)

216/464-3400

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the Registrant is a large accelerated filer; an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

(Check one):

Large Accelerated Filer  Accelerated Filer  Non-Accelerated Filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

**APPLICABLE ONLY TO CORPORATE ISSUERS:**

As of June 30, 2007 the Registrant had outstanding 15,848,432 common shares.

**THE LAMSON & SESSIONS CO. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)**

**NOTE A BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and changes in accounting estimates) considered necessary for a fair presentation have been included. Certain 2006 amounts have been reclassified to conform with 2007 classifications.

**NOTE B INCOME TAXES**

The first half 2007 income tax provision was calculated based on management's estimate of the annual effective tax rate of 37.6% for the year. The annual effective income tax rate for 2006 was 36.9%.

The Company adopted the provisions of FASB Interpretation No. 48, (FIN 48) Accounting for Uncertainty in Income Taxes, on December 31, 2006. There was no material effect realized from implementation. At December 31, 2006, the Company had \$1.2 million in unrecognized tax benefits, the recognition of which would have an effect of \$1.0 million on the effective tax rate. The Company recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. During the first half of 2007 and 2006 these amounts are immaterial. As of December 31, 2006 the Company is subject to U.S. Federal income tax examinations for the tax years 2004 through 2006, and to non-U.S. income tax examinations for the tax years of 2002 through 2006. In addition, the Company is subject to various state and local income tax examinations for the tax years 2001 through 2006. There were no significant changes to any of these amounts during the first half of 2007.

**NOTE C BUSINESS SEGMENTS**

The Company's reportable segments are as follows:

Carlson Industrial, Residential, Commercial, Telecommunications and Utility Construction: The major customers served are electrical contractors and distributors, original equipment manufacturers, electric power utilities, cable television (CATV), telephone and telecommunications companies. The principal products sold by this segment include electrical and telecommunications raceway systems and a broad line of enclosures, electrical outlet boxes and fittings. Examples of the applications for the products included in this segment are multi-cell duct systems and High Density Polyethylene (HDPE) conduit designed to protect underground fiber optic cables, allowing future cabling expansion and flexible conduit used inside buildings to protect communications cable.

Lamson Home Products Consumer: The major customers served are home centers and mass merchandisers for the do-it-yourself (DIY) home improvement market. The products included in this segment are electrical outlet boxes, liquidtight conduit, electrical fittings, door chimes and lighting controls.

PVC Pipe: This business segment primarily supplies electrical, power and communications conduit to the electrical distribution, telecommunications, consumer, power utility and sewer markets. The electrical and telecommunications conduit is made from Polyvinyl Chloride (PVC) resin and is used to protect wire or fiber optic cables supporting the infrastructure of power or telecommunications systems.

**THE LAMSON & SESSIONS CO. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE F PENSION AND OTHER POST-RETIREMENT BENEFIT PLANS**

The Company sponsors several qualified and non-qualified pension plans and other post-retirement benefit plans for its current and former employees. As of January 1, 2003 the Company eliminated the salary defined benefit pension plan for future employees. This action closed all defined benefit pension and other post-retirement benefit plans to new entrants and will reduce future service costs.

The components of net periodic benefit cost (income) are as follows:

<i>(Dollars in thousands)</i>	<b>Second Quarter Ended</b>				<b>First Half Ended</b>			
	<b>Pension Benefits</b>		<b>Other Benefits</b>		<b>Pension Benefits</b>		<b>Other Benefits</b>	
	<b>2007</b>	<b>2006</b>	<b>2007</b>	<b>2006</b>	<b>2007</b>	<b>2006</b>	<b>2007</b>	<b>2006</b>

Defined contribution plans	332	302			662	590		
	\$ 525	\$ 508	\$ (99)	\$ 109	\$ 1,048	\$ 1,001	\$ (198)	\$ 218

**NOTE G ASSERTED AND UNASSERTED CLAIMS**

From time to time the Company incurs product related claims that are incidental to the business. In the first quarter the Company became aware of certain product asserted and unasserted claims. The Company has accrued its best estimate of the known asserted claims. The Company is unable to estimate an additional range of loss in excess of our accruals due to the uncertainty inherent in the estimation process. It is at least reasonably possible that actual costs will differ from estimates, but based upon information presently available, such future costs are not expected to have a material adverse effect on our financial position or our ongoing results of operations. However, such costs could be material to results of operations in a future period.

**NOTE H STOCK COMPENSATION PLANS**

The Company granted 62,000 Stock Appreciation Rights with an exercise price of \$30.23 and 39,683 shares of restricted stock to associates and directors in the first half 2007. Total stock compensation expense recorded in the second quarter 2007 and first half of 2007 was \$0.6 million and \$1.4 million, respectively, compared with \$0.3 million in the second quarter 2006 and \$1.8 million in the first half of 2006, respectively. Included in these charges was approximately \$0.4 million and \$1.2 million in the first quarter 2007 and 2006, respectively, of stock compensation that was required to be expensed immediately as the associates are retirement-eligible. As of June 30, 2007 there was \$2.7 million of total unrecognized compensation cost related to non-vested share based compensation, which is expected to be recognized over a weighted average period of 1.3 years.

**Table of Contents**

**ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of the Company's consolidated results of operations and financial condition. The discussion should be read in conjunction with the Consolidated Financial Statements.

**Executive Overview**

In the second quarter 2007, the Company had \$138.1 million in net sales, a decline of \$24.2 million, or 14.9%, compared with the second quarter 2006. This was primarily a result of lower unit selling prices in the PVC Pipe business segment and lower HDPE conduit selling prices in the Carlon business segment.

The cost of PVC pipe resin and HDPE resin have fallen significantly (PVC compounds to a lesser degree) since the very high levels in the first half of 2006. Consequently, market conditions have pressured PVC pipe and HDPE conduit selling prices to reflect this decline. This decline has caused, in the PVC Pipe segment, a dramatic narrowing of spreads between the selling price of PVC conduit and the cost of PVC pipe resin, lowering the segment's operating results by almost \$21.9 million compared with the first half 2006. By the end of the second quarter 2007, however, PVC pipe resin costs and selling prices increased, with resin cost only 6% behind the second quarter 2006 due to feedstock cost increases and improving demand. This resulted in a much smaller loss in PVC Pipe in the second quarter 2007 compared with the first quarter 2007.

The Lamson Home Products segment had increased volume of electrical product shipments to certain retail home improvement customers as demand increased for remodeling, the customers replenished inventory levels and the Company gained market share.

In summary, net income declined to \$9.3 million in the second quarter 2007 and \$13.8 million in the first half 2007 compared with \$14.0 million in the second quarter 2006 and \$23.2 million in the first half 2007, resulting in \$0.57 and \$0.85 diluted earnings per share in the second quarter and first half 2007, respectively, versus \$0.87 and \$1.45 diluted earnings per share in the second quarter and first half of 2006. These results were in line with the Company's prior expectations.

**Table of Contents****2007 Compared with 2006****Results of Continuing Operations**

The following table sets forth, for the periods indicated, items from the Consolidated Income Statements as a percentage of net sales for the second quarter and first half of 2007 and 2006:

<i>(Dollars in thousands)</i>	<b>Second Quarter Ended</b>				<b>First Half Ended</b>			
	<b>2007</b>		<b>2006</b>		<b>2007</b>		<b>2006</b>

Net sales for the second quarter of 2007 declined by 14.9%, or \$24.2 million, to \$138.1 million compared with \$162.3 million in the second quarter of 2006. Carlon and PVC Pipe net sales were down by double digits in the current year due to the decline in PVC and HDPE resin prices and the effect of a slowdown in residential construction. Meanwhile LHP net sales have increased due to increased demand for remodeling, market share gains and the replenishment of customers' inventory. First half 2007 net sales were \$254.1 million, a decline of \$43.6 million, or 14.6%, over the \$297.7 million in net sales recorded in the first half of 2006.

Gross profit in the second quarter of 2007 was \$30.0 million, or 21.7% of net sales, compared with \$40.0 million, or 24.7% of net sales, in the second quarter of 2006. This reflects the net sales decline in the Carlon and PVC Pipe business in the current year. Profit margins are being unfavorably impacted by lower PVC Pipe margins as selling prices declined more rapidly than resin cost in 2007. For the first half of 2007, gross profit was \$51.8 million, 20.4% of net sales, a \$19.2 million, or 27.1%, decline from the \$71.1 million, or 23.9% of net sales, earned during the first half of 2006. In the second quarter of 2007, the lower gross profit level is attributable to lower sales and operating activity in the Carlon and PVC Pipe segments and the narrowing margins in the Carlon and PVC Pipe segments. Operating income for the second quarter of 2007 was \$15.5 million, or 11.2% of net sales, a decrease of \$8.1 million, or 34.3%, from the \$23.6 million, or 14.5% of net sales, earned in the second quarter of 2006. Operating expenses were \$14.5 million in the current quarter, \$2.0 million, or 12.2%, less than the \$16.5 million incurred in the prior year second quarter. These lower expenses are principally from a decrease in variable selling and marketing expenses (\$0.9 million) while other promotional expenses were \$0.5 million higher than 2006 to support LHP product reset activity. In addition, the company incurred \$1.0 million in lower incentive compensation costs in the current quarter compared with the prior year. The first half of 2007 operating expenses of \$28.5 million, or 11.2% of net sales, were \$3.1 million less than the first half of 2006 operating expenses of \$31.6 million, or 10.6% of net sales. Consistent with

the second quarter, variable selling expenses and other market expenses were \$1.9 million and incentive compensation expense \$1.3 million lower in year-to-date 2007 compared with the same period in 2006. Year-to-date stock compensation expense is \$0.4 million less than the first half of 2006. These expense reductions were partially offset by \$0.8 million in higher promotional costs to support the resetting of inventory for certain retail customers. Additionally, legal and professional fees year-to-date are \$0.7 million higher due to the strategic alternatives process and new executive compensation disclosure

**Table of Contents**

requirement. Operating income for the first half of 2007 was \$23.3 million, or 9.2% of net sales, compared with \$39.5 million, or 13.3% of net sales, for the first half of 2006.

Interest expense for the second quarter and first half of 2007 of \$0.7 million and \$1.2 million were approximately half of the levels incurred in the respective periods of 2006. Average borrowings during the first half of 2007 were \$40.5 million lower than the first half of 2006. Average interest rates paid were lower in 2007 at 5.32% compared with 5.72% in 2006.

The year-to-date income tax provisions are based on an annual effective tax rate of 37.6% in 2007 compared with 36.9% in 2006.

**Business Segments****Carlton**

Carlton had net sales of \$65.0 million in the second quarter 2007 and \$120.2 million in the first half of 2007 which are \$12.3 million, or 16.0% and \$21.2 million, or 15.0%, lower than the \$77.3 million and \$141.4 million in net sales levels recorded in the second quarter and first half of 2006, respectively. About \$4.1 million and \$7.9 million of the decrease in the second quarter and first half of 2007, respectively, were caused by lower selling prices of HDPE conduit which reflects the lower HDPE resin costs in the current year compared with 2006. Unit shipments of Carlton's telecom and utility infrastructure products are down about 15% in the second quarter and first half of 2007 compared with second quarter and first half of 2006 as projects are being spread out more evenly throughout the year as opposed to concentrated in the first half in 2006. Carlton has been adversely affected by the downturn in residential construction and the reduction of inventory levels in the distribution channel early in 2007. As a result, electrical product sales were off about 8-9% in the second quarter and first half 2007 compared with the second quarter and first half of 2006. Gross profit for Carlton declined by approximately \$4.6 million in the second quarter 2007 compared with second quarter 2006 due to a narrowing of HDPE conduit margins as contractual selling price increases lagged HDPE resin cost increases. Additionally, we incurred higher manufacturing variances, because HDPE facility utilization was down 15% as compared to the prior period, and the Company incurred approximately \$700 thousand in higher distribution costs, due to the addition of the Dallas Distribution Center. Gross profit for the first half of 2007 is \$5.9 million lower than the first half of 2006 primarily from the lower net sales levels and similar operating conditions noted for the second quarter.

Operating income for Carlton was \$10.0 million, or 15.4% of net sales, in the second quarter 2007 and \$16.8 million, or 14.0% of net sales, in the first half 2007 which are \$3.8 million and \$4.7 million less than the operating income of \$13.8 million, or 17.8% of net sales, and \$21.5 million, or 15.2% of net sales, realized in the second quarter and first half of 2006, respectively. Carlton operating expenses were \$0.8 million and \$1.2 million less in the second quarter and first half 2007 compared with respective periods in 2006 primarily because of lower variable selling and marketing expenses.

**Lamson Home Products**

The Lamson Home Products business segment grew net sales by \$9.5 million, or 35.3%, to \$36.4 million in the second quarter 2007 compared with \$26.9 million in the second quarter of 2006. Approximately 25 percent of the net sales growth in the second quarter was due to increased demand for remodeling products, with the balance of the increase coming from market share growth and replenishment of customer inventories. Net sales for the first half of 2007 were \$67.4 million, a \$13.5 million, or 25.0%, increase over the \$53.9 million in net sales recorded in the first half of 2006. Net sales gains in the first half came from increased remodeling demand, market share growth at several major retail customers and the replenishment of customers' inventories that had been depleted throughout 2006. This segment's gross profit increased in the second quarter and year to date 2007 compared with the same periods in 2006 as product margins improved primarily due to a more profitable product mix and slightly lower compound costs. In addition, the segment was able to leverage fixed distribution costs as net sales were substantially higher than the prior year.

**Table of Contents**

Operating income was \$8.6 million, or 23.6% of net sales in the second quarter of 2007 compared with operating income of \$4.1 million, or 15.2% of net sales earned in the second quarter of 2006. For the first half 2007, Lamson Home Products had \$15.1 million, or 22.5% of net sales, in operating income which compared with \$6.7 million, or 12.4% of net sales, earned in the first half of 2006. This increase was caused by the higher gross profit levels partially offset by higher operating expenses, mostly from additional merchandising costs (\$0.8 million) incurred for two major customers to reset and restock inventory.

**PVC Pipe**

Net sales for the PVC Pipe segment declined in the second quarter 2007 by \$21.4 million, or 36.8%, to \$36.7 million from the \$58.1 million net sales level in the second quarter 2006. First half net sales were \$66.6 million, a decrease of \$35.9 million, or 35.0% from the \$102.5 million in net sales in the first half of 2006. Pounds shipped of PVC conduit this quarter were 11.5% behind the prior year quarter but pounds shipped in the first half of 2007 are 4.7% ahead of the first half of 2006. The PVC Pipe business has experienced lower resin costs and consequently lower selling prices in 2007. Despite almost 8.0% of price increases in the second quarter 2007 compared with the first quarter 2007, pricing in the second quarter 2007 was almost 29.0% less than second quarter 2006 and selling prices in the first half 2007 were on average 37.0% lower than the first half of 2006. A decrease in large diameter sewer pipe shipments of \$1.8 million and \$4.7 million, respectively compared with the prior year periods, also contributed to the decline in net sales in the second quarter and first half of 2007.

Gross margins in the PVC Pipe segment for the second quarter 2007 and first half 2007 were lower than those in the comparative period in 2006 as selling prices have declined significantly faster than resin costs in the current year. Due to the investment made in improved extrusion equipment over the last couple years, manufacturing variances, including scrap, were \$0.6 million less in the second quarter 2007 compared with the second quarter 2006 and \$2.0 million less in the first half of 2007 compared with the first half of 2006.

Operating loss for the PVC Pipe segment was \$0.4 million, 1.0% of net sales, for the second quarter 2007 and \$3.4 million, 5.0% of net sales, for the first half of 2007 compared with the record operating income results of \$9.6 million and \$18.5 million in the second quarter and first half of 2006, respectively. All of this decline is a result of the lower gross profit levels as operating expenses were \$0.6 million and \$0.8 million lower in the second quarter 2007 and first half 2007, respectively, primarily due to lower variable selling expenses.

**Liquidity and Capital Resources**

The Company's primary source of liquidity and capital resources is cash generated from operating activities and availability under its Secured Credit Agreement.

Cash provided by operating activities was \$1.2 million in the first half of 2007 compared with cash provided by operating activities of \$5.8 million in the first half of 2006. At the end of the second quarter 2007, accounts receivable were \$76.2 million, a 38.3%, or \$21.1 million, increase from year-end 2006 but \$12.5 million, or 14.1% less than the end of second quarter 2006. This decline reflects the lower net sales levels in the second quarter of 2007. Days sales outstanding calculated using a 3-month rolling average, has risen only slightly to 49.7 days at June 30, 2007 compared with 48.0 days at July 1, 2006.

At the end of the second quarter 2007, inventory investment was \$56.7 million, up \$3.1 million from second quarter 2006 and \$8.2 million higher than year-end 2006. This resulted in inventory turns of 6.9 times, compared with 8.1 times at the end of second quarter 2006. A large portion of this increase comes from the pounds of PVC resin in inventory at June 30, 2007, which were about 45% more than at July 1, 2006, and 29.0% more than at 2006 year-end, while the average cost of PVC resin in inventory has decreased 6.2% from the end of second quarter 2006 but has risen about 4.8% since year end 2006. Inventory levels have also increased this quarter to support the reset activity and market share gains at retail customers.

Accounts payable at June 30, 2007 were \$32.1 million, an increase of \$12.2 million since the 2006 year-end, but \$4.2 million less than the second quarter 2006 ending balance of \$36.4 million. Payable levels have risen in the first half of 2007 primarily due to the higher inventory levels.

**Table of Contents**

Accrued expenses have declined by a total of \$1.9 million since the 2006 year-end as the Company has paid the prior year's incentive compensation, while other operating accruals such as freight are higher due to increased shipping and manufacturing activity.

The Company's cash used in investing activities, representing capital expenditures, totaled \$3.7 million in the first half of 2007 compared with cash used by investing activities of \$7.3 million in the first half of 2006. The 2007 capital expenditures are primarily investments to improve extrusion productivity and quality, and to replace and expand molding capacity.

Cash provided by financing activities totaled \$1.4 million in the first half of 2007, compared with \$2.0 million in the first half of 2006. The Company has borrowed \$1.4 million on its Credit Facility so far in 2007. The Company has met all debt covenants at the end of the second quarter of 2007 and continues to have over \$220 million of available capacity on its revolver to meet the needs of the business.

**Critical Accounting Estimates**

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 30, 2006.

**Outlook for 2007**

Demand for Carlon's electrical products which are used in commercial facilities and industrial capacity expansion started to regain momentum in the second quarter 2007 after a slower than expected start in the first quarter 2007. It is anticipated that continued non-residential construction activity will support positive growth for the Company in these markets in the second half of 2007.

Telecom infrastructure product demand is expected to continue at similar rates as the first half of 2007 to support Fiber-to-the-Premise and other infrastructure projects. Verizon Communications, one of the Company's key telecom customers, continues its plan to pass fiber optic cable to 3 million additional homes in 2007, similar to 2006.

Shipments of these products are expected to be on a more even basis in 2007 compared with the first half loading of shipments in 2006. Utility infrastructure spending has been negatively impacted this year by the slowdown in residential new construction.

Residential construction declined from record levels of new housing starts of over 2.0 million units at the beginning of 2006 to around 1.6 units at the end of 2006. We generally agree with the consensus of economic forecasts that new housing starts will remain at a lower activity level, of approximately 1.4-1.5 million units, throughout 2007, an average decline of around 15%. This will affect the sales levels of some of the Company's products mainly sold through the Carlon and LHP business segments. Many of the Company's products that service the residential construction market, however, are also used for remodeling of existing homes which is generally counter-cyclical to new home construction. The Company expects that while sales of some electrical products will be down due to the lower residential construction activity, the decline will be somewhat mitigated by remodeling activity. LHP has benefited from market share gains and inventory replenishment in the first half of 2007. This same rate of growth is not expected to recur in the second half of 2007.

With higher feedstock costs being incurred by the resin producers, PVC resin cost increased throughout the second quarter of 2007. The Company continues to pass through a portion of the cost increases with selling price increases in the PVC Pipe business. Overall the Company still expects PVC pipe resin costs to be about 15 percent lower in 2007 compared with 2006 which, in turn, generally leads to lower PVC conduit prices and margins. Although the loss was reduced for the PVC Pipe business in the second quarter of 2007 compared with the first quarter of 2007, based on current market conditions, the Company does not anticipate a significant turnaround in this segment in the second half of 2007.

Cash flow from operating activities is expected to continue to improve in 2007 from positive operating results and the reduction of working capital requirements as inventories should decline in the second half of 2007 and accounts receivable collections continue through year end. Capital spending in 2007 is expected to be \$10.0 million to \$12.0 million, as the Company focuses on upgrading extrusion equipment, increases automation and adds incremental molds and tooling to support market expansion and new products.

**Table of Contents**

In summary, based on the condition of our key markets, the Company is anticipating net sales for the third quarter of between \$130 million and \$140 million, 4-11% below the third quarter 2006, which is expected to result in net income of \$8.5-\$10.0 million, or 52-62 cents per diluted share, for the third quarter. For the full year 2007, we expect net sales to decline 6-11% from 2006 ranging from \$500 million to \$530 million, reflecting the lower PVC pipe and HDPE conduit selling prices and the effect of a softer residential construction market. If this net sales level is achieved, the Company projects net income of \$27.5-\$31.0 million, or \$1.70-\$1.90 per diluted share in 2007.

On February 12, 2007, the Company announced that it has engaged Perella Weinberg Partners to assist in the evaluation of the Company's strategic and financial alternatives. There can be no assurance that this evaluation will result in a transaction. The Company will disclose developments regarding the process only if and when the Board of Directors has approved a specific transaction or course of action.

This Management's Discussion and Analysis of Financial Condition and Results of Operations contain expectations that are forward-looking statements that involve risks and uncertainties within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those expected as a result of a variety of factors, such as: (i) the volatility of resin pricing, (ii) the ability of the Company to pass through raw material cost increases to its customers, (iii) the continued availability of raw materials and consistent electrical power supplies, (iv) maintaining a stable level of housing starts, telecommunications infrastructure spending, consumer confidence and general construction trends, (v) any adverse change in the recovery trend of the country's general economic condition affecting the markets for the Company's products and (vi) the impact, outcome and effects of the Company's exploration of strategic alternatives. Because forward-looking statements are based on a number of beliefs, estimates and assumptions by management that could ultimately prove to be inaccurate, there is no assurance that any forward-looking statement will prove to be accurate.

**Item 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 30, 2006.

**Item 4 CONTROLS AND PROCEDURES**

As of June 30, 2007, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective. During the Company's second quarter 2007, there have been no significant changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II**

**Item 1 LEGAL PROCEEDINGS**

The Company is a party to various claims and matters of litigation incidental to the normal course of its business. Management believes that the final resolution of these matters will not have a material adverse effect on the Company's financial position, cash flows or results of operations.

**Table of Contents**

**Item 1A RISK FACTORS**

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 30, 2006.

**Item 4 SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

None

**Item 6 EXHIBITS**

(a) Exhibits:

- 10.1 Supplemental Retirement Agreement (Post-2004), dated May 10, 2007, by and between the Company and James J. Abel (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed with the Securities and Exchange Commission on May 15, 2007).
  
- 31.1 Certification of Michael J. Merriman, Jr., Chief Executive Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
  
- 31.2 Certification of James J. Abel, Chief Financial Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
  
- 32.1 Certification of Michael J. Merriman, Jr., Chief Executive Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
  
- 32.2 Certification of James J. Abel, Chief Financial Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
