TITANIUM METALS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2008
(Unaudited)

Note 1 – Basis of presentation and organization

Basis of presentation. The unaudited Condensed Consolidated Financial Statements contained in this Quarterly Report have been prepared on the same basis as the audited Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2007 that we filed with the Securities and Exchange Commission (“SEC”) on February 28, 2008 (“2007 Annual Report”). They include the accounts of Titanium Metals Corporation and its majority owned subsidiaries (collectively referred to as “TIMET”). Unless otherwise indicated, references in this report to “we”, “us” or “our” refer to TIMET and its subsidiaries, taken as a whole. All material intercompany transactions and balances with consolidated subsidiaries have been eliminated. In our opinion, we have made all necessary adjustments (which include only normal recurring adjustments) in order to state fairly, in all material respects, our consolidated financial position, results of operations and cash flows as of the dates and for the periods presented. We have condensed or omitted certain information and footnote disclosures (including those related to the Consolidated Balance Sheet at December 31, 2007) normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). Our results of operations for the interim period ended September 30, 2008 may not be indicative of our operating results for the full year. The Condensed Consolidated Financial Statements contained in this Quarterly Report should be read in conjunction with the 2007 Consolidated Financial Statements contained in our 2007 Annual Report. Our first three fiscal quarters reported are the approximate 13-week periods ending on the Saturday generally nearest to March 31, June 30 and September 30. Our fourth fiscal quarter and fiscal year always end on December 31. For presentation purposes, our financial statements and the accompanying notes are presented as ended on March 31, June 30, September 30 and December 31, as applicable.

Organization. At September 30, 2008, subsidiaries of Contran Corporation held 27.9% of our outstanding common stock. Substantially all of Contran's outstanding voting stock is held by trusts established for the benefit of certain children and grandchildren of Harold C. Simmons, of which Mr. Simmons is sole trustee, or is held by Mr. Simmons or persons or other entities related to Mr. Simmons. At September 30, 2008, Mr. Simmons and his spouse owned an aggregate of 16.1% of our common stock, and the Combined Master Retirement Trust (“CMRT”), a trust sponsored by Contran to permit the collective investment by trusts that maintain the assets of certain employee benefit plans adopted by Contran and certain related companies, held an additional 8.5% of our common stock. Mr. Simmons is the sole trustee of the CMRT and a member of the trust investment committee for the CMRT. Consequently, Mr. Simmons may be deemed to control each of Contran and us.

Recent accounting pronouncements. On January 1, 2008, we adopted Statement of Financial Accounting Standard (“SFAS”) No. 157, Fair Value Measurements. SFAS 157 generally provides a consistent, single fair value definition and measurement techniques for GAAP pronouncements. SFAS 157 also establishes a fair value hierarchy for different measurement techniques based on the objective nature of the inputs in various valuation methods. In February 2008, the FASB issued FSP No. FAS 157-2, Effective Date of FASB Statement No. 157 which will delay the provisions of SFAS 157 for one year for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Beginning in the first quarter of 2008, all of our fair value measurements are in compliance with SFAS 157, except for such nonfinancial assets and liabilities for which we will be required to be in compliance with SFAS 157 prospectively beginning in the first quarter of 2009. In addition, in accordance with the new standard we have expanded our disclosures regarding the valuation methods and level of inputs we utilize beginning in the first quarter of 2008, except for such nonfinancial assets and liabilities, which will require disclosure in the first quarter of 2009. The adoption of this standard did not have a material effect on our consolidated financial position or results of operations.

On January 1, 2008 we adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. SFAS 159 permits companies to choose, at specified election dates, to measure eligible items at fair value, with unrealized gains and losses included in the determination of net income. The decision to elect the fair value option is generally applied on an item-by-item basis, is irrevocable unless a new election date occurs and is applied to the entire item and not only to specified risks or cash flows or a portion of the instrument. Items eligible for the fair value option include recognized financial assets and liabilities, other than investments in a consolidated subsidiary, defined benefit pension plans, other post employment benefit plans, leases and financial instruments classified in equity. An investment accounted for by the equity method is an eligible item. The specified election dates include the date the company first recognizes the eligible item, the date the company enters into an eligible commitment, the date an investment first becomes eligible to be accounted for by the equity method and the date SFAS 159 first becomes effective for us. SFAS 159 became effective for us on January 1, 2008. We did not elect to measure any eligible items at fair value in accordance with this new standard either at the date we adopted the new standard or subsequently during the first, second or third quarters of 2008. Therefore, the adoption of this standard did not have a material effect on our consolidated financial position or results of operations.

Note 2 – Inventories

	December 31, 2007	September 30, 2008
(In millions)		
Raw materials	\$ 121.8	\$ 123.0
Work-in-process	268.7	308.5
Finished products	125.8	119.4
Inventory consigned to customers	23.0	17.9
Supplies	23.4	29.2
Total inventories	\$ 562.7	\$ 598.0

Note 3 – Marketable securities

Our marketable securities consist of investments in the publicly traded shares of related parties. NL Industries, Inc., Kronos Worldwide, Inc. and Valhi, Inc. are each majority owned subsidiaries of Contran. The aggregate cost basis of our marketable securities was \$2.7 million at December 31, 2007 and \$29.1 million at September 30, 2008. During 2008, we purchased 1.3 million shares of Valhi common stock in market transactions for an aggregate of \$26.4 million. All of our marketable securities are classified as available-for-sale, which are carried at fair value using quoted market prices, which are Level 1 inputs as defined by SFAS 157. Because we have classified all of our marketable securities as available-for-sale, any unrealized gains or losses on the securities are recognized through other comprehensive income, other than any decline in value which we conclude is other than temporary. We currently believe the decline in market prices of these securities to be temporary in nature as a result of the recent market volatility. We will continue to monitor the quoted market prices of these securities. If in the future we were to conclude that the decline in value of one or more of these securities is other than temporary, we would recognize an impairment through an income statement charge. Such income statement impairment charge would be offset in comprehensive income by the reversal of the previously unrealized losses to the extent they were previously recognized in accumulated other comprehensive income.

The following table summarizes the market value of our marketable securities:

	December 31, 2007	September 30, 2008
	(In millions)	
Valhi	\$ -	\$ 21.9
NL	2.5	2.3
Kronos	0.2	0.1
Total marketable securities	\$ 2.7	\$ 24.3

Note 4 – Property and equipment

	December 31, 2007	September 30, 2008
	(In millions)	
Land and improvements	\$ 11.6	\$ 12.6
Buildings and improvements	55.0	59.7
Information technology systems	70.3	72.2
Manufacturing equipment and other	455.8	484.6
Construction in progress	88.7	113.5
Total property and equipment	681.4	742.6
Less accumulated depreciation	299.4	314.3
Total property and equipment, net	\$ 382.0	\$ 428.3

Note 5 – Other noncurrent assets

	December 31, 2007	September 30, 2008
(In millions)		
Prepaid conversion services	\$ 47.2	\$ 45.3
Other	13.8	20.7
Total other noncurrent assets	\$ 61.0	\$ 66.0

Note 6 – Accrued and other current liabilities

	December 31, 2007	September 30, 2008
(In millions)		
Employee related	\$ 45.5	\$ 32.9
Deferred revenue	14.3	16.6
Other	27.9	23.0
Total accrued liabilities	\$ 87.7	\$ 72.5

Note 7 – Bank debt

Our indebtedness at September 30, 2008 consists of \$13.1 million outstanding under our \$175 million U.S. long-term credit agreement with a weighted average interest rate of 3.38%. At September 30, 2008 we had no outstanding borrowings under our European credit facilities, and the aggregate borrowing availability under our U.S. and European credit facilities was \$211.4 million.

Note 8 – Stockholders' equity

During 2007, our board of directors authorized the repurchase of up to \$100 million of our common stock in open market transactions or in privately negotiated transactions, with the intention that any repurchased shares will be retired and cancelled. During 2008, we purchased 2.3 million shares of our common stock in open market transactions for an aggregate purchase price of \$36.5 million, and all shares acquired under this repurchase program during 2008 have been cancelled. At September 30, 2008, we could purchase an additional \$63.5 million of our common stock under our board of directors' authorization.

Note 9 – Employee benefits

Defined benefit pension plans. The components of the net periodic pension expense are set forth below:

	Three months ended September 30,		Nine months ended September 30,	
	2007	2008	2007	2008
	(In millions)			
Service cost	\$ 1.4	\$ 1.2	\$ 4.0	\$ 3.6
Interest cost	4.2	4.3	12.6	13.1
Expected return on plan assets	(5.5)	(5.7)	(16.3)	(17.2)
Amortization of net losses	0.9	0.6	2.6	1.9
Amortization of prior service cost	0.1	0.1	0.4	0.3
Total pension expense	\$ 1.1	\$ 0.5	\$ 3.3	\$ 1.7

Postretirement benefits other than pensions (“OPEB”). The components of net periodic OPEB expense are set forth below:

	Three months ended September 30,		Nine months ended September 30,	
	2007	2008	2007	2008
	(In millions)			
Service cost	\$ 0.2	\$ 0.3	\$ 0.7	\$ 0.8
Interest cost	0.5	0.4	1.3	1.2
Amortization of net losses	0.2	0.1	0.6	0.4
Amortization of prior service credit	(0.1)	(0.1)	(0.3)	(0.2)
Total OPEB expense	\$ 0.8	\$ 0.7	\$ 2.3	\$ 2.2

Future variances from assumed actuarial rates, including the rate of return on our defined benefit pension plan assets, as well as changes in the discount rate used to determine the projected benefit obligation, may result in increases or decreases to pension plan assets and liabilities, defined benefit pension expenses and credits and funding requirements in future periods. We use a December 31 measurement date for our defined benefit pension plans. Given the current uncertainty of the U.S. and global economies, our pension plan assets may be significantly lower at December 31, 2008, as compared to December 31, 2007.

Note 10 – Income taxes

	Nine months ended September 30,	
	2007	2008
(In millions)		
Expected income tax expense, at 35%	\$ 111.0	\$ 65.7
Non-U.S. tax rates	(2.0)	(1.3)
U.S. state income taxes, net	5.7	3.7
Nontaxable income	(9.0)	(11.2)
Domestic manufacturing credit	(4.7)	(4.0)
Uncertain tax positions, net	0.5	2.1
Other, net	-	(0.1)
Total income tax expense	\$ 101.5	\$ 54.9

Note 11 – Commitments and contingencies

Environmental matters. As part of our continuing assessment with respect to our plant site in Henderson, Nevada, in the third quarter of 2008 we completed and submitted to the Nevada Department of Environmental Protection (“NDEP”) a Remedial Alternative Study (“RAS”) with respect to the groundwater located at the plant site. The RAS, which was submitted pursuant to an existing agreement between the NDEP and us, identified the presence of certain contaminants in the plant site groundwater that requires remediation. The RAS proposes various alternatives to the NDEP for the remediation of these contaminants. We currently anticipate that the NDEP will complete its review of the RAS and our proposed remedial alternatives during the fourth quarter of 2008 and that following such review, the NDEP will issue its decision concerning the remediation plan.

As of September 30, 2008, we have \$4.1 million accrued for remediation activities anticipated at our Henderson plant site, which include amounts accrued at the lower end of the range of estimated costs for the most likely remedial alternative contained in the groundwater RAS submitted to the NDEP. We increased such accrual by \$2.6 million during the third quarter of 2008. We will continue evaluating alternative methods and timing of remediation activities, and if necessary, we may revise our estimated costs in the future. We estimate the upper end of the range of reasonably possible costs related to all of our environmental matters, including the current accrual, to be approximately \$6.5 million. We expect these estimated costs to be incurred over a remediation period of at least five years.

We accrue liabilities related to environmental remediation obligations when estimated future costs are probable and estimable. We evaluate and adjust our estimates as additional information becomes available or as circumstances change. We generally do not discount estimated future expenditures to their present value due to the uncertainty of the timing of the future payments. In the future, if the standards or requirements under environmental laws or regulations become more stringent, if our testing and analysis at our operating facilities identify additional environmental remediation, or if we determine that we are responsible for the remediation of hazardous substance contamination at other sites, then we may incur additional costs in excess of our current estimates. We do not know if actual costs will exceed our current estimates, if additional sites or matters will be identified which require remediation or if the estimated costs associated with previously identified sites requiring environmental remediation will become estimable in the future.

Legal proceedings. From time to time, we are involved in various employment, environmental, contractual, intellectual property, product liability, general liability and other claims, disputes and litigation relating to our business. In certain instances, we have insurance coverage for these items to eliminate or reduce our risk of loss (other than standard deductibles, which are generally \$1 million or less). We currently believe the outcome of these matters, individually or in the aggregate, will not have a material adverse effect on our financial position, results of operations or liquidity beyond any accruals for which we have already provided. However, all such matters are subject to inherent uncertainties, and were an unfavorable outcome to occur with respect to several of these matters in a given period, it is possible that it could have a material adverse impact on our results of operations or cash flows in that particular period.

Note 12 – Earnings per share

Basic earnings per share is based on the weighted average number of unrestricted common shares outstanding during each period. Diluted earnings per share attributable to common stockholders reflects the dilutive effect of common stock options and the assumed conversion of our Series A Preferred Stock. A reconciliation of the numerator and denominator used in the calculation of basic and diluted earnings per share is presented in the following table:

	Three months ended September 30,		Nine months ended September 30,	
	2007	2008	2007	2008
	(In millions)			
Numerator:				
Net income attributable to common stockholders	\$ 52.3	\$ 40.2	\$ 203.6	\$ 127.8
Dividends on Series A Preferred Stock	1.4	0.1	4.2	0.2
Diluted net income attributable to common stockholders	\$ 53.7	\$ 40.3	\$ 207.8	\$ 128.0
Denominator:				
Average common shares outstanding	162.2	181.0	162.0	181.6
Average dilutive stock options	0.1	-	0.1	-
Series A Preferred Stock	22.0	1.0	22.2	1.0
Diluted shares	184.3	182.0	184.3	182.6

Note 13 – Business segment information

Our production facilities are located in the United States, United Kingdom, France and Italy, and our products are sold throughout the world. Our Chief Executive Officer functions as our chief operating decision maker (“CODM”), and the CODM receives consolidated financial information about us. He makes decisions concerning resource utilization and performance analysis on a consolidated and global basis. We have one reportable segment, our worldwide “Titanium melted and mill products” segment. The following table provides segment information supplemental to our Condensed Consolidated Financial Statements:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2007	2008	2007	2008
(In millions, except product shipment data)				
Titanium melted and mill products:

Mill product net sales	227.0	228.4	727.4	693.5
Other titanium product sales	28.7	33.7	96.8	98.2
Total net sales	\$ 297.3	\$ 295.4	\$ 980.3	\$ 886.3
Melted product shipments:				
Volume (metric tons)	1,045	1,115	3,685	3,060
Average selling price (per kilogram)	\$ 39.85	\$ 29.85	\$ 42.35	\$ 30.90
Mill product shipments:				
Volume (metric tons)	3,350	3,845	10,665	11,195
Average selling price (per kilogram)	\$ 67.75	\$ 59.40	\$ 68.20	\$ 61.95

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The statements contained in this Quarterly Report on Form 10-Q (“Quarterly Report”) that are not historical facts, including, but not limited to, statements found in Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”), are forward-looking statements that represent management’s beliefs and assumptions based on currently available information. Forward-looking statements can generally be identified by the use of words such as “believes,” “intends,” “may,” “will,” “looks,” “should,” “could,” “anticipates,” “expects” or comparable terminology or discussions of strategies or trends. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we do not know if these expectations will prove to be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly affect expected results. Actual future results could differ materially from those described in such forward-looking statements, and we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that could cause actual results to differ materially are the risks and uncertainties discussed in this Quarterly Report, including risks and uncertainties in those portions referenced above and those described from time to time in our other filings with the SEC which include, but are not limited to:

- the cyclical nature of the commercial aerospace industry;
- the performance of aerospace manufacturers and us under our long-term agreements;
- the existence or renewal of certain long-term agreements;
- the difficulty in forecasting demand for titanium products;
 - global economic and political conditions;
 - global production capacity for titanium;
 - changes in product pricing and costs;
- the impact of long-term contracts with vendors on our ability to reduce or increase supply;
 - the possibility of labor disruptions;
 - fluctuations in currency exchange rates;
- fluctuations in the market price of marketable securities;
- uncertainties associated with new product or new market development;
- the availability of raw materials and services;
- changes in raw material prices and other operating costs (including energy costs);
- possible disruption of business or increases in the cost of doing business resulting from terrorist activities or global conflicts;
 - competitive products and strategies; and
 - other risks and uncertainties.

Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected.

SUMMARY

General overview. We are a vertically integrated producer of titanium sponge, melted products and a variety of mill products for commercial aerospace, military, industrial and other applications. We are one of the world’s leading producers of titanium melted products (ingot, electrodes and slab) and mill products (billet, bar, plate, sheet and strip). We are the only producer with major titanium production facilities in both the United States and Europe, the world’s principal markets for titanium.

The following discussion and analysis should be read in conjunction with our Condensed Consolidated Financial Statements and related notes included elsewhere in this Quarterly Report and with our Consolidated Financial Statements and the information under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” which are included in our 2007 Annual Report.

RESULTS OF OPERATIONS

Quarter ended September 30, 2008 compared to quarter ended September 30, 2007

Summarized financial information. The following table summarizes certain information regarding our results of operations for the three months ended September 30, 2007 and 2008. Our reported average selling prices reflect actual selling prices after the effects of currency exchange rates, customer and product mix and other related factors throughout the periods presented.

	Three months ended September 30,			
	2007	% of Total Net Sales	2008	% of Total Net Sales
	(In millions, except product shipment data)			
Net sales:				
Melted products	\$ 41.6	14%	\$ 33.3	11%
Mill products	227.0	76%	228.4	77%
Other titanium products	28.7	10%	33.7	12%
Total net sales	297.3	100%	295.4	100%
Cost of sales	199.3	67%	222.5	75%
Gross margin	98.0	33%	72.9	25%
Selling, general, administrative and development expense	16.7	6%	18.0	6%
Other income (expense), net	-	-	(2.0)	1%
Operating income	\$ 81.3	27%	\$ 52.9	18%
Melted product shipments:				
Volume (metric tons)	1,045		1,115	
Average selling price (per kilogram)	\$ 39.85		\$ 29.85	
Mill product shipments:				
Volume (metric tons)	3,350		3,845	
Average selling price (per kilogram)	\$ 67.75		\$ 59.40	

Net sales. Our net sales were \$295.4 million during the third quarter of 2008 compared to net sales of \$297.3 million during the third quarter of 2007. Average selling prices for melted and mill products decreased 25% and 12%, respectively, from the third quarter of 2007 to the third quarter of 2008. Largely offsetting these price decreases, our net sales volume for both melted and mill products increased 7% and 15%, respectively, for the third quarter of 2008 compared to the same period in 2007.

Since early 2007, increases in global capacity and manufacturing activity for titanium products throughout the supply chain have increased the availability of titanium scrap, which has resulted in declining costs for this raw

material. This decline in raw material costs has, in turn, contributed to lower selling prices for certain products under long-term agreements, due in part to raw material indexed pricing adjustments included in certain of these agreements, as well as for our non-contract sales volume.

-16-

Revisions and delays in the build-out schedules of certain commercial aircraft, and the resulting effects on production and inventory levels throughout the supply-chain, continue to affect near-term demand, impacting sales volumes and selling prices for titanium products. While our sales have been impacted by the aforementioned production schedule revisions and delays, contractually committed volumes under certain of our long-term agreements contributed to the overall increase in sales volume for our products during the third quarter of 2008. Although we believe long-term demand trends are favorable, the previously announced adjustments and delays in the production schedule for the Boeing 787 Dreamliner™, and any additional production delays resulting from Boeing's labor dispute, are expected to continue to impact customer inventory levels and product demand.

Cost of sales. Our cost of sales was \$222.5 million during the third quarter of 2008 compared to cost of sales of \$199.3 million in the third quarter of 2007, an increase of \$23.2 million, primarily due to the cost of sales associated with the increased sales volume of melted and mill products combined with a shift in our product mix to a higher concentration of mill products for the third quarter of 2008, offset slightly by lower costs of titanium scrap. Mill products carry a higher unit-cost than melted products due to labor, overhead and yield costs associated with additional processing. As previously noted, the cost of our purchased titanium scrap has declined during the latter part of 2007 and through the first nine months of 2008. We anticipate that our per-unit cost of sales for both melted and mill products will continue to be favorably impacted by declining titanium scrap costs, but these favorable effects could be offset by rising costs of production, energy and other raw materials.

Gross margin. During the third quarter of 2008, our gross margin was \$72.9 million as compared to \$98.0 million for the same period in 2007, reflecting the net effect of decreased average selling prices for melted and mill products and slightly lower costs of raw materials.

Operating income. Our operating income for the third quarter of 2008 was \$52.9 million compared to \$81.3 million during the same period in 2007 primarily due to the decline in gross margin.

Income taxes. Our effective income tax rate was 28% in the third quarter of 2008 compared to 33% in the third quarter of 2007. Our effective income tax rates for the third quarters of 2008 and 2007 were lower than the U.S. statutory rate primarily due to our mix of pre-tax earnings, with a higher percentage of earnings in lower tax rate jurisdictions primarily as a result of the implementation of an internal corporate reorganization in 2007. See Note 10 to the Condensed Consolidated Financial Statements for a tabular reconciliation of our statutory income tax expense to our actual tax expense.

First nine months of 2008 compared to first nine months of 2007

Summarized financial information. The following table summarizes certain information regarding our results of operations for the nine months ended September 30, 2007 and 2008. Our reported average selling prices reflect actual selling prices we received after the effects of currency exchange rates, customer and product mix, and other related factors realized throughout the periods presented.

	Nine months ended September 30,			
	2007	% of Total Net Sales	2008	% of Total Net Sales
(In millions, except product shipment data)				
Net sales:				
Melted products	\$ 156.1	16%	\$ 94.6	11%
Mill products	727.4	74%	693.5	78%
Other titanium products	96.8	10%	98.2	11%
Total net sales	980.3	100%	886.3	100%
Cost of sales	613.4	63%	648.0	73%
Gross margin	366.9	37%	238.3	27%
Selling, general, administrative and development expense	51.7	5%	51.5	6%
Other income (expense), net	0.2	-	(2.3)	-
Operating income	\$ 315.4	32%	\$ 184.5	21%
Melted product shipments:				
Volume (metric tons)	3,685		3,060	
Average selling price (per kilogram)	\$ 42.35		\$ 30.90	
Mill product shipments:				
Volume (metric tons)	10,665		11,195	
Average selling price (per kilogram)	\$ 68.20		\$ 61.95	

Net sales. Our net sales were \$886.3 million during the first nine months of 2008 compared to net sales of \$980.3 million during the first nine months of 2007. Average selling prices for melted and mill products decreased 27% and 9%, respectively, from the first nine months of 2007 to the first nine months of 2008.

Since early 2007, increases in global capacity and manufacturing activity for titanium products throughout the supply chain have increased the availability of titanium scrap, which has resulted in declining costs for this raw material. This decline in raw material costs has, in turn, contributed to lower selling prices for certain products under long-term agreements, due in part to raw material indexed pricing adjustments included in certain of these agreements, as well as for our non-contract sales volume.

Revisions and delays in the build-out schedules of certain commercial aircraft, and the resulting effects on production and inventory levels throughout the supply-chain, continue to affect near-term demand, impacting sales volumes and selling prices for titanium products during the first nine months of 2008 compared to the first nine months of 2007. As a result of these factors, our net sales volume for melted products declined 17% for the first nine months of 2008 compared to the same period in 2007, whereas our net sales volume for mill products increased 5% over the same periods. Although we believe long-term demand trends are favorable, previously announced adjustments and delays in the production schedule for the Boeing 787 Dreamliner™, and any additional production delays resulting from Boeing's labor dispute, are expected to continue to impact customer inventory levels and product demand.

Cost of sales. Our cost of sales was \$648.0 million during the first nine months of 2008, a 6% increase from the first nine months of 2007, primarily resulting from a shift in our product mix to a higher concentration of mill products for the first nine months of 2008. Mill products carry a higher unit-cost than melted products due to labor, overhead and yield costs associated with additional processing. Cost of sales for the first nine months of 2008 were also higher on a per-unit basis due to higher raw material costs, primarily scrap, and certain other production costs, including energy. Despite the downward trends in titanium scrap costs discussed previously, the majority of our products sold during the first nine months of 2008 included higher cost raw materials acquired during prior periods due to the length of the manufacturing cycles for our products. We anticipate that our per-unit cost of sales for both melted and mill products in the future will be favorably impacted by declining titanium scrap costs, but these favorable effects could be offset by rising costs of production, energy and other raw materials.

Gross margin. During the first nine months of 2008, our gross margin was \$238.3 million as compared to \$366.9 million for the same period in 2007, primarily reflecting decreases in the average selling prices for our melted and mill products combined with the increases in raw material and production costs described above.

Operating income. Our operating income for the first nine months of 2008 was \$184.5 million compared to \$315.4 million during the same period in 2007 primarily due to the decline in gross margin.

Income taxes. Our effective income tax rate was 29% in the first nine months of 2008 compared to 32% in the first nine months of 2007. Our effective income tax rates for the first nine months of 2008 and 2007 were lower than the U.S. statutory rate primarily due to our mix of pre-tax earnings, with a higher percentage of earnings in lower tax rate jurisdictions primarily as a result of the implementation of an internal corporate reorganization in 2007. See Note 10 to the Condensed Consolidated Financial Statements for a tabular reconciliation of our statutory income tax expense to our actual tax expense.

European operations

We have substantial operations located in the United Kingdom, France and Italy. Approximately 39% of our sales originated in Europe for the nine months ended September 30, 2008, a portion of which were denominated in foreign currency, principally the British pound sterling or the euro. Certain raw materials costs, principally purchases of titanium sponge and alloys for our European operations, are denominated in U.S. dollars, while labor and other production costs are primarily denominated in local currencies. The functional currencies of our European subsidiaries are those of their respective countries, and our European subsidiaries are subject to exchange rate fluctuations that may impact reported earnings and may affect the comparability of period-to-period operating results. Borrowings of our European operations may be in U.S. dollars or in their respective functional currencies. Our export sales from the U.S. are denominated in U.S. dollars and are not subject to currency exchange rate fluctuations. We do not use currency contracts to hedge our currency exposures.

Outlook

Despite the demand volatility the industry is currently experiencing and the uncertainty surrounding the extent and duration of the current economic downturn, we believe the overall industry outlook supports a long-term favorable trend in demand for titanium across all major market sectors, including commercial aerospace, military, industrial and emerging markets. Because a significant portion of our mill products sales volume and our overall revenue is from shipments into commercial aerospace applications, the leading driver for long-term growth in industry demand, we are particularly impacted by demand trends in that market sector, and we anticipate that current commercial aerospace demand volatility will continue to impact demand for our products for the foreseeable future.

The current demand volatility in the commercial aerospace industry is expected to continue to be impacted by (i) revised production schedules for the Boeing 787 Dreamliner™, (ii) adjustments and delays in certain other commercial aircraft build-out schedules and (iii) Boeing's labor dispute, which lasted approximately eight weeks. We are unable to predict the timing or extent to which these events will impact future aircraft production. However, we do expect these events to continue to impact the demand from all manufacturers and fabricators throughout the supply chain, including our customers, at least into 2009. Additionally, worldwide economic conditions, primarily in the U.S. and Europe, are impacting the near-term demand volatility for our products, as limitations or additional restrictions on credit extended to businesses may cause delays or cancellations of capital projects and inventory purchases. If these conditions persist, it is possible that some of our customers may elect to purchase at or near their long-term agreements' contractual minimum volume for 2009.

Since early 2007, downward pressure on raw material costs resulting from increased capacity and availability of titanium sponge and scrap, together with near-term fluctuations in demand, have resulted in lower average selling prices for titanium products, particularly for standard and industrial grade melted products. In addition, the effects of (i) industry capacity expansions currently underway, (ii) Boeing's labor dispute and (iii) previously announced adjustments and delays in the production schedule for the Boeing 787 Dreamliner™ and certain other commercial aircraft, have contributed to near-term volatility in the overall market demand for commercial aerospace products. This volatility is expected to impact demand until uncertainties within the commercial aerospace production cycle are resolved and inventory levels are stabilized on a longer term basis. Although each of these factors contribute to current demand volatility in the titanium market, we have long-term agreements with a majority of our major customers, many of which specify annual pricing mechanisms and minimum annual volume commitments, that limit our exposure to the volatility of market pricing and fluctuating demand. Customers under such long-term agreements represent approximately 54% of our revenues during the nine months ended September 30, 2008.

The timing and extent to which selling price fluctuations, raw material costs and volume adjustments will continue to impact our profitability in the future will depend upon the resolution of the uncertainties discussed above. We anticipate that our per-unit cost of sales will continue to be favorably impacted by generally declining raw material costs, primarily titanium scrap, but the favorable effects of declining scrap costs could be offset by rising costs of production, energy and certain other raw materials.

We continue to pursue strategic plans to improve and expand our production capacities, with a focus on opportunities to improve our operating flexibility, efficiency and cost structure, to meet the long-term favorable demand growth reflected in titanium product volumes our customers have committed to purchase under long-term agreements and in long-term market sector forecasts. In particular, we continue to enhance our ability to meet our current and prospective customers' needs and strengthen our position as a reliable supplier in markets where technical ability and precision are critical. These efforts include strategic initiatives to assure we have the necessary availability of raw materials, melt capacity and mill product processing capabilities, through various significant capital additions as well as long-term strategic relationships with several outside convertors. In addition, we have continued to foster relationships with our key customers in our target markets, including our position in key sectors, such as the global aerospace jet engine market. We have been successful over the last two years in establishing significant flexibility and cost advantages in our entire manufacturing process. With our continuing strong positive cash flow from operations, we believe we are well positioned to capitalize on future opportunities and to respond to industry demand fluctuations in a timely and cost-efficient manner.

LIQUIDITY AND CAPITAL RESOURCES

Our consolidated cash flows for the first nine months ended September 30, 2007 and 2008 are presented below. The following should be read in conjunction with our Condensed Consolidated Financial Statements and notes thereto.

	Nine months ended September 30,	
	2007	2008
(In millions)		
Cash provided by (used in):		
Operating activities	\$ 129.7	\$ 128.0
Investing activities	(70.6)	(110.9)
Financing activities	(10.7)	(69.5)
Net cash provided by (used in) operating, investing and financing activities	\$ 48.4	\$ (52.4)

Operating activities. Cash flow from operations is considered a primary source of our liquidity. Changes in pricing, production volume and customer demand, among other things, could significantly affect our liquidity. Cash provided by operating activities decreased \$1.7 million, from \$129.7 million for the first nine months of 2007 to \$128.0 million for the first nine months of 2008. The net effects of the following significant items contributed to the overall net decrease in cash provided by operating activities:

- lower operating income of \$130.9 million in 2008;
- lower net cash used by changes in receivables, inventories, payables and accrued liabilities of \$51.4 million in 2008 in response to changing working capital requirements as overall sales volumes and purchased inventory costs per unit have declined; and
- lower net cash paid for income taxes in 2008 of \$76.7 million primarily due to the lower taxable income in 2008.

Investing activities. Cash flows used in our investing activities was \$70.6 million in the first nine months of 2007 and \$110.9 million in the first nine months of 2008. We received principal payments of \$7.0 million on the note receivable from an affiliate during the first nine months of 2008, and we purchased \$26.4 million of marketable securities during the first nine months of 2008. Our capital expenditures were \$89.3 million during the first nine months of 2008 as compared to \$60.6 million in capital expenditures during the same period in 2007. Capital expenditures included the following:

- construction in progress in 2008 for the first and second phases of our EB melt capacity expansion at our facility in Morgantown, of which phase one commenced commercial production in the second quarter of 2008, and other capacity expansion projects in the U.S. and Europe; and
- construction in progress in 2007 for the first phase of our EB capacity expansion in Morgantown and for our sponge plant expansion in Henderson, which commenced commercial production in April 2007.

Financing activities. Our cash flows from financing activities included:

- net borrowings of \$13.1 million during the first nine months of 2008;
- dividends paid on our common stock of \$40.9 million in the first nine months of 2008, as we began paying a regular quarterly dividend of \$0.075 per share in the fourth quarter of 2007;
- dividends paid to the minority interest shareholder of our 70%-owned French subsidiary of \$8.1 million in the first nine months of 2007 compared to \$5.4 million in the first nine months of 2008; and
- treasury stock purchases of \$36.5 million during the first nine months of 2008.

Future cash requirements

Liquidity. Our primary source of liquidity on an ongoing basis is our cash flows from operating activities and borrowings under various credit facilities. We generally use these amounts to (i) fund capital expenditures, (ii) repay indebtedness incurred primarily for working capital purposes and (iii) provide for the payment of dividends. From time-to-time we will incur indebtedness, generally to (i) fund short-term working capital needs, (ii) refinance existing indebtedness, (iii) make investments in marketable and other securities (including the acquisition of securities issued by our subsidiaries and affiliates) or (iv) fund major capital expenditures or the acquisition of other assets outside the ordinary course of business.

We routinely evaluate our liquidity requirements, capital needs and availability of resources in view of, among other things, our alternative uses of capital, debt service requirements, the cost of debt and equity capital and estimated future operating cash flows. As a result of this process, we have in the past, or in light of our current outlook, may in the future, seek to raise additional capital, modify our common and preferred dividend policies, restructure ownership interests, incur, refinance or restructure indebtedness, repurchase shares of common stock, purchase or redeem Series A Preferred Stock, sell assets, or take a combination of such steps or other steps to increase or manage our liquidity and capital resources. In the normal course of business, we investigate, evaluate, discuss and engage in acquisition, joint venture, strategic relationship and other business combination opportunities in the titanium, specialty metal and other industries. In the event of any future acquisition or joint venture opportunities, we may consider using then-available liquidity, issuing equity securities or incurring additional indebtedness.

At September 30, 2008, we had aggregate borrowing availability under our existing U.S. and European credit facilities of \$211.4 million, and we had an aggregate of \$36.4 million of cash and cash equivalents. Our U.S. credit facility matures in February 2011, and our U.K. credit facility matures in July 2010. Based upon our expectations of our operating performance, anticipated demands on our cash resources, borrowing availability under our existing credit facilities and anticipated borrowing capacity after the maturity of these credit facilities, we expect to have sufficient liquidity to meet our obligations for the short-term (defined as the next twelve-month period) and our long-term obligations, including our planned capacity expansion projects, some of which are discussed above. If actual developments differ from our expectations, our liquidity could be adversely affected.

Repurchases of common stock. At October 31, 2008, we had approximately \$63.5 million available for repurchase of our common stock under the authorizations described in Note 8 to Condensed Consolidated Financial Statements.

Capital expenditures. We have spent \$89.3 million on capital expenditures as of September 30, 2008. We currently estimate we will invest a total of approximately \$110 million to \$120 million for capital expenditures during 2008, primarily for improvements in and expansion of existing productive capacity.

We continue to evaluate additional opportunities to expand our production capacity including capital projects, acquisitions or other investments which, if consummated, any required funding would be provided by borrowings under our U.S. or European credit facilities.

Contractual commitments. There have been no material changes to our contractual commitments discussed in our 2007 Annual Report.

Off-balance sheet arrangements. There have been no material changes to our off-balance sheet arrangements discussed in our 2007 Annual Report.

Recent accounting pronouncements. See Note 1 to Condensed Consolidated Financial Statements.

Critical accounting policies. For a discussion of our critical accounting policies, refer to Part I, Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates" in our 2007 Annual Report. There have been no changes in our critical accounting policies during the first nine months of 2008.

Affiliate transactions. Corporations that may be deemed to be controlled by or affiliated with Mr. Simmons sometimes engage in (i) intercorporate transactions such as guarantees, management and expense sharing arrangements, shared fee arrangements, joint ventures, partnerships, loans, options, advances of funds on open account, and sales, leases and exchanges of assets, including securities issued by both related and unrelated parties, and (ii) common investment and acquisition strategies, business combinations, reorganizations, recapitalizations, securities repurchases, and purchases and sales (and other acquisitions and dispositions) of subsidiaries, divisions or other business units, which transactions have involved both related and unrelated parties and have included transactions which resulted in the acquisition by one related party of a publicly-held minority equity interest in another related party. We continuously consider, review and evaluate such transactions, and understand that Contran and related entities consider, review and evaluate such transactions. Depending upon the business, tax and other objectives then relevant, it is possible that we might be a party to one or more such transactions in the future. See Note 3 to our Condensed Consolidated Financial Statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk, including foreign currency exchange rates, commodity prices, security prices and an interest bearing note receivable. There have been no material changes in these market risks since we filed our 2007 Annual Report, and we refer you to the report for a complete description of these risks.

Item 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. We maintain a system of disclosure controls and procedures. The term "disclosure controls and procedures," as defined by Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit to the SEC under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions to be made regarding required disclosure. Each of Steven L. Watson, our Chief Executive Officer, and James W. Brown, our Chief Financial Officer, have evaluated the design and operating effectiveness of our disclosure controls and procedures as of September 30, 2008. Based upon their evaluation, these executive officers have concluded that our disclosure controls and procedures were effective as of September 30, 2008.

Scope of management's report on internal control over financial reporting. We also maintain internal control over financial reporting. The term "internal control over financial reporting," as defined by rule 13a-15(f) of the Exchange Act, means a process designed by, or under the supervision of, our principal executive and principal financial officers, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our Consolidated Financial Statements.

Changes in internal control over financial reporting. There have been no changes to our internal control over financial reporting during the quarter ended September 30, 2008 that have materially affected our internal control over financial reporting.

PART II. – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Refer to Note 11 of the Condensed Consolidated Financial Statements and to our 2007 Annual Report for descriptions of certain previously reported legal proceedings.

Item 1A. RISK FACTORS

There have been no material changes in the first nine months of 2008 with respect to our risk factors presented in Item 1A. in our 2007 Annual Report on Form 10-K.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On November 12, 2007, our board of directors authorized the repurchase of up to \$100 million of our common stock in open market transactions, including block purchases, or in privately negotiated transactions, which may include transactions with our affiliates. We may repurchase our common stock from time to time as market conditions permit. The stock repurchase program does not include specific price targets or timetables and may be suspended at any time. Depending on market conditions, we may terminate the program prior to its completion. Repurchased shares will be retired and cancelled. See Note 8 to the Condensed Consolidated Financial Statements. We made no purchases during the third quarter of 2008.

Item 6. EXHIBITS

31.1 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

31.2 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32.1 Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

Note: We have retained a signed original of any exhibit listed above that contains signatures, and we will provide any such exhibit to the SEC or its staff upon request. Such request should be directed to the attention of our Corporate Secretary at our corporate offices located at 5430 LBJ Freeway, Suite 1700, Dallas, Texas 75240.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
