NOTE 1. BASIS OF PRESENTATION

The consolidated financial statements include the accounts of Peoples Financial Services Corp. (the “Corporation” or the “Company”) and its wholly owned subsidiaries, Peoples National Bank (the “Bank”) and Peoples Advisors, LLC (“Advisors”). All material intercompany accounts and transactions have been eliminated in consolidation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information, as well as with instructions for Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal, recurring nature. Operating results for the three-month period ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year-ended December 31, 2007. For further information, refer to the consolidated financial statements and footnotes included in the Company’s Annual Report on Form 10-K for the year-ended December 31, 2006.

NOTE 2. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

	Three Months Ended	
	March 31, 2007	March 31, 2006
Net income applicable to common stock	\$ 1,123,000	\$ 1,045,000
Weighted average common shares outstanding	3,133,304	3,153,948
Effect of dilutive securities, stock options	10,563	14,107
Weighted average common shares outstanding used to calculate diluted earnings per share	3,143,867	3,168,055
Basic earnings per share	\$ 0.36	\$ 0.33
Diluted earnings per share	\$ 0.36	\$ 0.33

NOTE 3. OTHER COMPREHENSIVE INCOME

The components of other comprehensive income and related tax effects for the three months ended March 31, 2007 and 2006 are as follows:

(In thousands)	Three Months Ended	
	March 31, 2007	March 31, 2006
Unrealized holding losses on available for sale securities	\$ (224)	\$ (51)
Less: Reclassification adjustment for gains (losses) realized in net income	29	(17)
Net unrealized losses	(253)	(34)
Tax effect	86	12
Other comprehensive loss	\$ (167)	\$ (22)

NOTE 4. STOCK BASED COMPENSATION

Prior to January 1, 2006, the Company's stock option plan was accounted for under the recognition and measurement provisions of APB Opinion No. 25 (Opinion 25), *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock Based Compensation* (as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*) (collectively SFAS 123). No stock-based employee compensation cost was recognized in the Company's consolidated statements of income through December 31, 2005, as all options granted under the plan had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123(R), Share-Based Payment, using the modified-prospective transition method. Under that transition method, compensation cost recognized in 2006 and thereafter includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006 based on the grant date fair value calculated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted subsequent to December 31, 2005, based on a grant-date fair value estimated in accordance with the provisions of SFAS 123(R). As of December 31, 2006, only 4,100 stock options were not fully vested and no stock options were granted during the three months ended March 31, 2007.

As a result of adopting SFAS 123(R) on January 1, 2006, the Company's earnings before income taxes for the three months ended March 31, 2007, are not materially different than if it had continued to be accounted for as share-based compensation under Opinion 25. As of March 31, 2007, the Company had 4,100 stock options not fully vested and there was \$3,500 of total unrecognized compensation cost related to these nonvested options. The cost is expected to be recognized monthly on a straight-line basis through December 31, 2008.

NOTE 5. GUARANTEES

The Company does not issue any guarantees that would require liability recognition or disclosure, other than standby letters of credit. Outstanding letters of credit written are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for standby letters of credit is represented by the contractual amount of those instruments. The Company had \$3,136,000 of standby letters of credit as of March 31, 2007. The Company uses the same credit policies in making conditional obligations as it does for on-balance sheet instruments.

The majority of these standby letters of credit expire within the next twelve months. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending other loan commitments. The Company requires collateral supporting these letters of credit as deemed necessary. The maximum undiscounted exposure related to these commitments at March 31, 2007 was \$3,136,000, and the approximate value of underlying collateral upon liquidation that would be expected to cover this maximum potential exposure was \$1,794,000. The current amount of the liability as of March 31, 2007 for guarantees under standby letters of credit is not material.

NOTE 6. NEW ACCOUNTING STANDARDS

EITF 06-11

In March 2007, the FASB ratified EITF Issue No. 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards." EITF 06-11 requires companies to recognize the income tax benefit realized from dividends or dividend equivalents that are charged to retained earnings and paid to employees for nonvested equity-classified employee share-based payment awards as an increase to additional paid-in capital. EITF 06-11 is effective for fiscal years beginning after September 15, 2007. The Company does not expect EITF 06-11 will have a material impact on its financial position, results of operations or cash flows.

EITF 06-10

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10 "Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements" (EITF 06-10). EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Company is currently assessing the impact of EITF 06-10 on its consolidated financial position and results of operations.

EITF 06-5

On September 7, 2006, the EITF reached a conclusion on Issue No. 06-5, "Accounting for Purchases of Life Insurance - Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance" ("EITF 06-5"). The scope of EITF 06-5 consists of six separate issues relating to accounting for life insurance policies purchased by entities protecting against the loss of "key persons." The six issues are clarifications of previously issued guidance on FASB Technical Bulletin No. 85-4. EITF 06-5 is effective for fiscal years beginning after December 15, 2006. Adoption of EITF 06-5 did not have a material impact on the Company's consolidated financial statements.

SFAS No. 159

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 provides companies with an option to report many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective of SFAS No. 159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. The FASB believes that SFAS No. 159 helps to mitigate accounting-induced volatility by enabling companies to report related assets and liabilities at fair value, which would likely reduce the need for companies to comply with detailed rules for hedge accounting. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities, and would require entities to display the fair value of those assets and liabilities for which the company has chosen to use fair value on the face of the balance sheet. The new statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in SFAS No. 157, *Fair Value Measurements*. This statement is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. The Company is in the process of evaluating the impact, if any, that the adoption of SFAS No. 159 will have on the Company's consolidated financial statements.

NOTE 7. SUBSEQUENT EVENT

On April 2, 2007, the Bank formed Peoples Financial Leasing, LLC, a member-managed limited liability company under the laws of the Commonwealth of Pennsylvania, to be a wholly owned subsidiary of the Bank, for the purpose of providing professional and technical services in employee leasing for the Bank.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of the consolidated financial statements of the Corporation is presented to provide insight into management's assessment of financial results. The Corporation's two subsidiaries, Peoples National Bank and Peoples Advisors, LLC, provide financial services to individuals and businesses within the Bank's primary market area made up of Susquehanna, Wyoming and Northern Lackawanna Counties in Pennsylvania, and Broome County in New York. The Bank is a member of the Federal Reserve System and subject to regulation, supervision, and examination by the Office of the Comptroller of the Currency. Advisors is a member of the National Association of Securities Dealers (NASD), which also acts as the primary regulator for Advisors.

CAUTIONARY STATEMENT CONCERNING FORWARD LOOKING INFORMATION

Except for historical information, this Report may be deemed to contain "forward looking" information. Examples of forward looking information may include, but are not limited to, (a) projections of or statements regarding future earnings, interest income, other income, earnings or loss per share, asset mix and quality, growth prospects, capital structure and other financial terms, (b) statements of plans and objectives of management or the Board of Directors, (c) statements of future economic performance, and (d) statements of assumptions, such as economic conditions in the market areas served by the Corporation and the Bank, underlying other statements and statements about the Corporation and the Bank or their respective businesses. Such forward looking information can be identified by the use of forward looking terminology such as "believes," "expects," "may," "intends," "will," "should," "anticipates," or the use of any of the foregoing or other variations thereon or comparable terminology, or by discussion of strategy. No assurance can be given that the future results covered by the forward looking information will be achieved. Such statements are subject to risks, uncertainties, and other factors which could cause actual results to differ materially from future results expressed or implied by such forward looking information. Important factors that could impact operating results include, but are not limited to, (i) the effects of changing economic conditions in both the market areas served by the Corporation and the Bank and nationally, (ii) credit risks of commercial, real estate, consumer and other lending activities, (iii) significant changes in interest rates, (iv) changes in federal and state banking laws and regulations which could affect operations, (v) funding costs, and (vi) other external developments which could materially affect business and operations.

CRITICAL ACCOUNTING POLICIES

Disclosure of the Company's significant accounting policies is included in Note 1 to the consolidated financial statements of the Company's Annual Report on Form 10K for the year-ended December 31, 2006. Some of these policies are particularly sensitive requiring significant judgments, estimates and assumptions to be made by Management. Additional information is contained on page 17 of this report for the provision and allowance for loan losses.

OVERVIEW

Net income for the quarter increased 7.46% to \$1.123 million as compared to \$1.045 million for the first quarter of 2006. Diluted earnings per share increased 9.09% to \$.36 per share for the first quarter of 2007 from \$.33 per share in the first quarter of 2006. At March 31, 2007, the Company had total assets of \$405.591 million, net loans of \$270.104 million, and total deposits of \$320.459 million.

FINANCIAL CONDITION

Cash and Cash Equivalents:

At March 31, 2007, cash, federal funds sold, and deposits with other banks totaled \$11.981 million as compared to \$12.380 million on December 31, 2006. The decrease over the first three months of 2007 has been minimal as the decrease in deposits with other banks has been offset by the increase in federal funds as of March 31, 2007.

Management believes the liquidity needs of the Corporation are satisfied by the current balance of cash and cash equivalents, readily available access to traditional funding sources, and the portion of the securities and loan portfolios that mature within one year. The current sources of funds will enable the Corporation to meet all its cash obligations as they come due.

Securities:

Securities totaled \$99.607 million on March 31, 2007, decreasing by \$10.695 million from the December 31, 2006 total of \$110.302 million.

The total securities portfolio is held as available for sale. This strategy was implemented in 1995 to provide more flexibility in using the investment portfolio for liquidity purposes as well as providing more flexibility in selling when market opportunities occur.

Securities available for sale are accounted for at fair value with unrealized gains or losses net of deferred income taxes, reported as a separate component of stockholders' equity. The carrying value of securities as of March 31, 2007 included an unrealized loss of \$852 thousand reflected as accumulated other comprehensive loss of \$562 thousand in stockholders' equity, net of deferred income taxes of \$290 thousand. This compares to an unrealized loss of \$598 thousand at December 31, 2006 reflected as accumulated other comprehensive loss of \$395 thousand, net of deferred income taxes of \$203 thousand.

Management monitors the earnings performance and effectiveness of liquidity of the securities portfolio on a monthly basis through the Asset/Liability Committee ("ALCO"). The ALCO also reviews and manages interest rate risk for the Corporation. Through active balance sheet management and analysis of the securities portfolio, the Corporation maintains sufficient liquidity to satisfy depositor requirements and various credit needs of its customers.

Loans:

Net loans increased \$721 thousand, or .27%, to \$270.104 million as of March 31, 2007 from \$269.383 million as of December 31, 2006. Of the loan growth experienced in the first quarter of 2007, the largest was in residential real estate mortgages which increased \$941 thousand, or .83%, to \$113.824 million as of March 31, 2007 compared to \$112.883 million as of December 31, 2006. Commercial loans, including traditional commercial loans and commercial real estate mortgages, decreased \$229 thousand, or .16%, to \$140.702 million as of March 31, 2007 compared to \$140.931 million at year-end December 31, 2006.

Increasing the loan to deposit ratio is a goal of the Bank, but loan quality is always considered in this effort. Management has continued its efforts to create good underwriting standards for both commercial and consumer credit. Most commercial lending is done primarily with locally owned small businesses.

Deposits:

Deposits are attracted from within the Bank's primary market area through the offering of various deposit instruments including NOW accounts, money market accounts, savings accounts, certificates of deposit, and IRA's. During the three-month period ended March 31, 2007, total deposits decreased \$3.154 million, or .97%, to \$320.459 million compared to \$323.613 million as of December 31, 2006. The decrease was concentrated within NOW accounts and money market deposit accounts.

The trend in the first quarter of 2007 is expected due to the nature of those deposits affected. Early in the calendar year tends to be the period where the Bank experiences an outflow of funds due to various reasons, among them are property tax payments and holiday bills which come due after January 1. The outflow of funds was less evident in the latter half of the first quarter.

Borrowings:

The Bank utilizes borrowings as a source of funds for its asset/liability management. Advances are available from the Federal Home Loan Bank (FHLB) provided certain standards related to credit worthiness have been met. Repurchase and term agreements are also available from the FHLB.

Total short-term borrowings at March 31, 2007 were \$9.940 million as compared to \$12.574 million as of December 31, 2006, a decrease of \$2.634 million, or 20.95%. Long-term borrowings were \$31.896 million as of March 31, 2007 compared to \$36.525 million as of December 31, 2006, a decrease of \$4.629 million, or 12.67%. The decrease in long-term borrowings included the maturity of \$7.500 million in term borrowings which was offset by proceeds of new term borrowings in the amount of \$3.275 million at the FHLB.

With the increase to the short end of the yield curve, the certificate savings rate offered by the Bank has attracted a large sum of deposits which have lessened the Bank's reliance on overnight, short-term borrowings.

Capital:

The adequacy of the Corporation's capital is reviewed on an ongoing basis with reference to the size, composition and quality of the Corporation's resources and regulatory guidelines. Management seeks to maintain a level of capital sufficient to support existing assets and anticipated asset growth, maintain favorable access to capital markets, and preserve high quality credit ratings. As of March 31, 2007, regulatory capital to total average assets was 9.14% as compared to 8.92% on December 31, 2006. The Company repurchases its stock in the open market or from individuals as warranted to leverage the capital account and to provide stock for its stock option and dividend reinvestment plans. In the three months ended March 31, 2007, the Company purchased 3,500 shares for the treasury at a total cost of \$94,500.

The Corporation has complied with the standards of capital adequacy mandated by the banking regulators. The bank regulators have established "risk-based" capital requirements designed to measure capital adequacy. Risk-based capital ratios reflect the relative risks of various assets the banks hold in their portfolios. A weight category of either 0% (lowest risk asset), 20%, 50%, or 100% (highest risk assets) is assigned to each asset on the balance sheet. Capital is being maintained in compliance with risk-based capital guidelines. The Company's Tier 1 capital to risk weighted asset ratio was 13.13% and the total capital ratio to risk weighted assets ratio was 13.82% at March 31, 2007. The Corporation is deemed to be well-capitalized under regulatory standards.

Liquidity:

Liquidity measures an organization's ability to meet cash obligations as they come due. The consolidated statements of cash flows presented in the accompanying financial statements included in Part I of this Form 10-Q provide analysis of the Corporation's cash and cash equivalents. Additionally, management considers that portion of the loan and investment portfolio that matures within one year as part of the Corporation's liquid assets.

The ALCO addresses the liquidity needs of the Bank to see that sufficient funds are available to meet credit demands and deposit withdrawals, as well as to the placement of available funds in the investment portfolio. In assessing liquidity requirements, equal consideration is given to the current position as well as the future outlook.

Off Balance Sheet Arrangements:

The Company's consolidated financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist primarily of commitments to grant new loans, unfunded commitments of existing loans and letters of credit made under the same standards as on-balance sheet instruments. Unused commitments on March 31, 2007 totaled \$38.657 million, which consisted of \$26.829 million in unfunded commitments of existing loans, \$8.692 million to grant new loans and \$3.136 million in letters of credit. Due to fixed maturity dates and specified conditions within these instruments, many will expire without being drawn upon. Management believes that amounts actually drawn upon can be funded in the normal course of operations and therefore, do not represent a significant liquidity risk to the Company.

Interest Rate Sensitivity:

The management of interest rate sensitivity seeks to avoid fluctuating net interest margins and to provide consistent net interest income through periods of changing interest rates.

The Company's risk of loss arising from adverse changes in the fair value of financial instruments, or market risk, is composed primarily of interest rate risk. The primary objective of the Company's asset/liability management activities is to maximize net interest income while maintaining acceptable levels of interest rate risk. The Company's ALCO is responsible for establishing policies to limit exposure to interest rate risk, and to ensure procedures are established to monitor compliance with those policies. The guidelines established by ALCO are reviewed by the Company's Board of Directors.

The tools used to monitor sensitivity are the Statement of Interest Sensitivity Gap and the interest rate shock analysis. The Bank uses a software model to measure and to keep track. In addition, an outside source does a quarterly analysis to make sure our internal analysis is current and correct. The Statement of Interest Sensitivity Gap is a good assessment of current position and is a very useful tool for the ALCO in performing its job. This report is monitored in an effort to “match” maturities or repricing opportunities of assets and liabilities, in order to attain the maximum interest within risk tolerance policy guidelines. The statement does, although, have inherent limitations in that certain assets and liabilities may react to changes in interest rates in different ways, with some categories reacting in advance of changes and some lagging behind the changes. In addition, there are estimates used in determining the actual propensity to change of certain items such as deposits without maturities.

The following table sets forth the Company’s interest sensitivity analysis as of March 31, 2007:

INTEREST RATE SENSITIVITY ANALYSIS

(Dollars in thousands)

	Maturity or Repricing In:				
	3 Months	3-6 Months	6-12 Months	1-5 Years	Over 5 Years

RESULTS OF OPERATIONS***Net Interest Income:***

For the three months ended March 31, 2007, total interest income increased by \$672 thousand, or 12.60%, to \$6.006 million as compared to \$5.334 million for the three months ended March 31, 2006. This increase is attributable to the increase in average loans and average securities to \$270.803 million and \$108.285 million respectively as of March 31, 2007 as compared to \$262.507 million and \$102.324 million, respectively, for the same three-month period in 2006. This is an increase of \$8.296 million, or 3.16%, in loans and \$5.961 million, or 5.83%, in securities when comparing the first quarter of 2007 to the same three-month period in 2006. The yield on loans, on a fully tax equivalent basis, for the first quarter of 2007 was higher at 7.17% compared to 6.77% for the first quarter of 2006. Security yields, on a fully tax equivalent basis, were also up in the first quarter of 2007 at 5.48% compared to 4.96% in the first quarter of 2006. The resulting interest earned on loans was \$4.677 million for the three-month period ended March 31, 2007 compared to \$4.270 million for the three months ended March 31, 2006, an increase of \$407 thousand, or 9.53%. The resulting interest earned on securities was \$1.290 million for the three-month period ended March 31, 2007 compared to \$1.055 million for the three months ended March 31, 2006, an increase of \$235 thousand, or 22.27%. The overall yield on earning assets increased for the three months ended March 31, 2007 to 6.68% as compared to 6.26%, on a fully tax equivalent basis, for the three months ended March 31, 2006.

Total interest expense increased by \$474 thousand, or 19.89%, to \$2.857 million for the three months ended March 31, 2007 from \$2.383 million for the three months ended March 31, 2006. This increase was primarily attributable to the increase in the cost of funds which increased to 3.66% for the three months ended March 31, 2007 as compared to 3.21% for the first quarter of 2006. Average interest bearing liabilities also increased to \$316.883 million for the three months ended March 31, 2007 as compared to \$300.764 million for the three months ended March 31, 2006. This increase was due to the increase in average savings. Average savings increased to \$108.527 million for the three-month period ended March 31, 2007 as compared to \$82.692 million for the same period in 2006. The largest contributor to the increase in average savings is the certificate savings product. The rate paid on certificate savings increased for the three months ended March 31, 2007 to 4.68% as compared to 4.55% for the three months ended March 31, 2006 as the average balance for that product was \$78.824 million and \$47.465 million, respectively.

Net interest income increased by \$198 thousand, or 6.71%, to \$3.149 million for the three months ended March 31, 2007 from \$2.951 million for the three months ended March 31, 2006. The Bank's net interest spread decreased to 3.02% for the three months ended March 31, 2007 from 3.04% for the three months ended March 31, 2006 on a fully tax equivalent basis. The net interest margin increased to 3.65% for the three-month period ended March 31, 2007 from 3.61% for the three-month period ended March 31, 2006 on a fully tax equivalent basis. The yield curve has remained somewhat static since the last increase in overnight rates which was implemented by the Federal Reserve in June of 2006. As such, the Bank has been operating within the resulting flat yield curve and cannot generate traditionally acceptable levels of spread between interest bearing assets and liabilities. The result of which has been a static net interest margin as detailed previously.

Below is the table which sets forth average balances and corresponding yields for the three-month periods ended March 31, 2007 and March 31, 2006:

**Distribution of Assets, Liabilities and Stockholders' Equity;

(2) Yields and costs are based on a 365/90 annualization method.

Provision for Loan Losses:

The provision for loan losses for the three months ended March 31, 2007 was \$120 thousand, an increase of \$60 thousand, or 100.00% as compared to \$60 thousand for the three month-period ended March 31, 2006. Changing economic conditions, as well as internal analysis performed on the loan portfolio, have made necessary the increases in the loan loss provision for the quarter ended March 31, 2007. One of the Bank's main goals is to increase the loan to deposit ratio without jeopardizing loan quality. To reach its goal, management has continued its efforts to create strong underwriting standards for both commercial and consumer credit. The Bank's lending consists primarily of retail lending which includes single family residential mortgages and other consumer lending and commercial lending primarily to locally owned small businesses.

In the three-month period ended March 31, 2007, charge-offs totaled \$19 thousand while net charge-offs totaled \$8 thousand as compared to \$21 thousand and \$12 thousand, respectively, for the same three-month period in 2006.

Monthly, senior management uses a detailed analysis of the loan portfolio to determine loan loss reserve adequacy. The process considers all "problem loans" including classified, criticized, and monitored loans. Prior loan loss history and current market trends, both nationally and locally, are taken into consideration. A watch list of potential problem loans is maintained and monitored on a monthly basis by the Board of Directors. The Bank has not had, nor presently has, any foreign loans. Based upon this analysis, senior management has concluded that the allowance for loan losses is adequate.

Other Income:

Service charges and fees decreased 3.24%, or \$15 thousand, to \$448 thousand in the three months ended March 31, 2007, from \$463 thousand in the three months ended March 31, 2006. The decrease in service charges and fees is due in part to net overdraft fees which were \$300 thousand for the three-month period ended March 31, 2007 compared to \$311 thousand for the comparable period in 2006, a decrease of \$11 thousand, or 3.54%.

Investment division income was \$79 thousand for the three-month period ended March 31, 2007, an increase of \$30 thousand, or 61.22%, from the same period in 2006. The increase is due to the change in fee structure for the investment division, which was first discussed in March of 2006. The recognition of commissions on a recurring basis, rather than at account opening only, has contributed to this increase.

Earnings on investment in life insurance (BOLI) has increased to \$75 thousand for the three-month period ended March 31, 2007, compared to \$65 thousand for the three month-period ended March 31, 2006, an increase of \$10 thousand, or 15.38%. The income earned from BOLI has kept pace with the short end of the yield curve and continued to pay a competitive market yield.

Other income was \$170 thousand for the three months ended March 31, 2007, an increase of \$68 thousand, or 66.67%, from \$102 thousand for the comparable period in 2006. Among those items is net-commission income realized from Community Bankers Insurance Agency (CBIA). This item accounted for \$65 thousand for the three-month period ended March 31, 2007 as compared to \$13 thousand for the same period in 2006, an increase of \$52 thousand, or 400.00%.

Gains on security sales were \$29 thousand for the three months ended March 31, 2007 compared to losses of \$17 thousand for the comparable period in 2006, an increase of \$46 thousand. The increase is due to the sale of equity securities through the holding company at a gain. These sales are part of a five year tax strategy to offset capital losses incurred in 2005.

Other Operating Expenses:

Total other expenses increased 7.35%, or \$167 thousand, to \$2.440 million during the three months ended March 31, 2007 compared to \$2.273 million for the comparable period in 2006.

Salaries and benefits increased \$38 thousand, or 3.32%, to \$1.181 million for the three months ended March 31, 2007 compared to \$1.143 million for the same period in 2006 due to normal pay increases. The increase was also partially due to a one time vacation payment to a retiring executive in the amount of \$28,000. The full-time equivalent number of employees was 109 as of March 31, 2007 compared to 112 as of March 31, 2006.

Occupancy expense increased \$12 thousand, or 6.45%, to \$198 thousand for the three months ended March 31, 2007 compared to \$186 thousand for the same period in 2006. Costs associated with the maintenance and upkeep of Company offices in the amount of \$60 thousand for the first quarter of 2007 when compared to \$51 thousand for the same period in 2006 accounted for this difference.

Professional fees and outside services increased \$13 thousand, or 15.66%, in the three months ended March 31, 2007 to \$96 thousand, compared to \$83 thousand for the same three-month period ended March 31, 2006. Increases for the three-month period ended March 31, 2007 were due to costs associated with a professional loan review service incurred in the first quarter of 2007 in the amount of \$13 thousand. This service was not incurred in the first quarter of 2006.

Computer services and supplies decreased \$19 thousand, or 8.52% for the three months ended March 31, 2007 to \$204 thousand compared to \$223 thousand for the comparable period in 2006. This decrease was due to costs associated with the Bank's ATM network. As previously discussed in the analysis of customer service fee income, as of February of 2006, the Bank no longer utilizes the services of Midwest Payment Systems in the processing of ATM and debit card transactions. The Company now internally processes those transactions at a reduced cost. Costs associated with ATM and debit card operations were \$51 thousand for the three-month period ended March 31, 2007 as compared to \$79 thousand for the same three-month period in 2006.

All other operating expenses increased \$123 thousand, or 19.28%, to \$761 thousand in the first quarter of 2007 compared to \$638 thousand for the same period in 2006. The increase in all other operating expense categories, which include equipment, non-income/non-payroll associated taxes, other real estate owned and other standard operating expenses, increased due to various reasons. Advertising costs associated with a one time billboard campaign for \$10 thousand, \$63 thousand of additional costs associated with foreclosed commercial real estate, \$14 thousand in brokerage fees related to the operation of the investment division which were netted from commissions in the prior period, \$27 thousand in additional supply costs and \$20 thousand in additional depreciation expenses as the result of larger than normal investments in fixed assets in the latter half of 2006 in relation to flood damages incurred by the Company, all contributed to the increase in the first quarter of 2007.

Income Tax Provision:

The Corporation recorded an income tax provision of \$267 thousand, or 19.21% of income before taxes, and \$228 thousand, or 17.91% of income before taxes, for the quarters ended March 31, 2007 and 2006, respectively. The increase in the effective tax rate is due to the decrease in taxable security income earned in the first quarter of 2007 when compared to the same period in 2006.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Federal Reserve has now held at an overnight borrowing rate of 5.25% since the last increase in June of 2006. As such, the Company continues to operate with a compressed net interest margin. As of March 31, 2007, the Bank is currently showing slight sensitivity to an upward rate shift scenario. The results of the latest financial simulation follow. The simulation shows a possible decrease in net interest income of 2.70%, or \$372 thousand, in a +200 basis point rate shock scenario over a one-year period. An increase of 1.03% or \$142 thousand is shown in the model at a -200 basis point rate shock scenario. The net interest income risk position of the Bank remains within the guidelines established by the Bank's asset/liability policy. The Bank continuously monitors its rate sensitivity.

Equity value at risk is monitored regularly and is also within established policy limits. Please refer to the Annual Report on Form 10-K filed with the Securities and Exchange Commission for December 31, 2006, for further discussion of this matter.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

The Company's management, including the Company's Chief Executive Officer and Principal Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2007. Based upon that evaluation, the Chief Executive Officer and Principal Financial Officer concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures were effective in timely alerting them to any material information relating to the Company and its subsidiaries required to be included in the Company's periodic SEC filings.

(b) Changes in internal controls.

There were no changes made in the Company's internal controls over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Although as stated above, we have not made any significant changes in our internal controls over financial reporting in the most recent fiscal quarter, based on our documentation and testing to date, we have made improvements in the documentation, design and effectiveness of internal controls over financial reporting, including the purchase of internal control software that allows upper management to view reports and to understand the risks and controls within the entire organization or specific areas of the organization. These reports provide up to date information at all times.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

The nature of the Company's business generates a certain amount of litigation involving matters arising out of the ordinary course of business. In the opinion of management, there are no legal proceedings that might have a material effect on the consolidated results of operations, liquidity, or the financial position of the Company at this time.

Item 1A. Risk Factors

No changes from those previously disclosed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

**PEOPLES FINANCIAL SERVICES CORP.
ISSUER PURCHASES OF COMMON STOCK**

MONTH	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs (1)
