ADVANCE TECHNOLOGIES, INC.  
(A Development Stage Company)  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2003

GENERAL

Advance Technologies, Inc. (the Company) has elected to omit substantially all footnotes to the financial statements for the three and nine months ended December 31, 2003 since there have been no material changes (other than indicated in other footnotes) to the information previously reported by the Company in their Annual Report filed on Form 10-KSB for the fiscal year ended September 31, 2003.

UNAUDITED INFORMATION

The information furnished herein was taken from the books and records of the Company without audit. However, such information reflects all adjustments which are, in the opinion of management, necessary to properly reflect the results of the interim period presented. The information presented is not necessarily indicative of the results from operations expected for the full fiscal year.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS AND PLAN OF OPERATIONS

Advance Technologies Inc. ("AVTX") is a developer of infrared (IR) Enhanced Vision technology for commercial solutions and applications. The Company engages in advance development activities and through strategic business arrangements AVTX utilizes OEM suppliers and major system corporations to form strategic business associations. This unique business model combines the strength of our organization with the prior capital investment of the OEMs and the in place established marketing and sales organization of the System Integrator. Our ability to bridge IR technology into application-specific markets shortens the development-to-market cycle and the investment risk.

Advance Technologies has entered into a licensing agreement with Kollsman, Inc in 1997. which has incorporated the Company's technology into an Enhanced Vision System ("EVS") for use with Gulfstream Aerospace aircraft and other aircraft. The Kollsman EVS License has board applicability to commercial aviation.

## BUSINESS OVERVIEW

The tragic events of September 11, 2001 have produced economic and bureaucratic shock waves that have had a direct effect on AVTX and our strategic plans. The effect has been most notable in the decline of the price of our common stock in the past two years reflecting the general slow down of our markets.

The acquisition of Telesis Technologies Inc., a privately held Taiwanese corporation was officially completed this fall by United Integrated Services (UIS), a publicly traded Taiwan Corporation. Our agent agreement and joint projects are expected to continue without substantial change.

In December 2003 ATI delivered 15 Nightview camera to UIS for their Spectrum 9000 medical system sold in the far east. These units were exported under the terms of our agent agreement and in compliance with the terms and conditions of Department of Commerce License No. D293324 issued October 26, 2002.

A second shipment of 15 units is scheduled for export in January 2004 under the terms of the same export provisions. This export will complete the number of authorized units under the Department of Commerce license D293324.

UIS has asked ATI to apply for another export license for 50 additional IR Cameras. This will be the third license ATI has obtained for UIS (Telesis).

ATI was contacted by a medical service facility in the USA. The medical company is interested in conducting clinical trials on the Spectrum 9000 produced by UIS to investigate potential benefits in the treatment of diabetes, varicose veins, and other circulatory diseases. UIS has asked ATI to submit a peer review study proposal.

## ENHANCED VISION ACTIVITIES

Enhance Vision System, our first project; has entered production. Advance Technologies benefits through a license agreement with Kollsman Inc.

Kollsman has issued a year end 2002 total program to date deliveries and sales.

### ANNUAL UNITS DELIVERED & SOLD

=====

	INITIAL DELIVERY	UNITS SOLD	TOTAL
	_____	_____	_____
Year 2002	47	29	29
Year 2003	108	107	107
TOTAL	155	136	136

NITEAGLE

Telesis Technologies provided two pre-production units for market evaluation. Tests are completed. The baseline configuration is up to date with the latest advancements. The rapid pace of the technology as it enters production has been an impediment to finalizing the system. Price reductions of 30% per year have been typical. We believe that 2003 will bring price and source stability to the market.

We are currently waiting on price and delivery information from our USA supplier. This information has been delayed; we now expect information in the first quarter of 2004.

SPECTRUM 9000, MEDICAL EQUIPMENT

Advanced Technologies is working with a US medical service company to provide a clinical study, peer group review proposal to study and evaluate potential benefits to the treatment of circulatory diseases such as varicose veins, diabetes, and other potential applications. This study will be conducted under the direction of well recognized Surgeon.

DEVELOPMENT PROJECTS

Advance Technologies Inc. continues development activities on new Infrared systems for commercial markets. These projects cannot be forecast with any degree of certainty and all strategic partnerships or business arrangements remain confidential until such time as a formal announcement is appropriate without compromising the development plan and/or the application market.

CAPITAL RESOURCES

No commitment for capital resources has been made during this reporting period.

FINANCIAL ANALYSIS

The results on the operation represent projects of likely future events that cannot be guaranteed. Therefore, the financial analysis does not include projects, and no quantitative assessment has been provided based upon the future discussion of potential events in section 3.

No material changes have been provided; therefore impact of unforeseeable events cannot be assessed.

Present financial plans are adequate to meet our cash flow needs with our current project schedule.

## Edgar Filing: ADVANCE TECHNOLOGIES INC - Form 10QSB

### ADVANCE TECHNOLOGIES INC. BOARD OF DIRECTOR ACTIONS

The maturity of the Enhanced Vision Project has provided the need to make adjustments to prepare for our transition from a "development company" to a mature self-sustaining company. We anticipate a full transition by mid-2004. Accordingly, the following actions have been authorized by the AVTX Board of Directors to smooth the transition of AVTX.

December 14, 2003 the Board of Directors directed the Corporate attorney to file for authorization to issue 4,000,000 shares of AVTX common stock for the purpose of generating operating capital for 2004. The proceeds of sales will be used to cover operating expense as AVTX completes their transition from a development company, dependent upon investments to an on-going profitable enterprise.

### SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
