ANZ confirms earnings momentum

Following four months of solid performance, ANZ is confident it will meet market expectations of up to 8% cash earnings per share growth in 2005*, the bank said in a shareholder update today.

ANZ Chief Executive Officer Mr John McFarlane said: Our underlying performance has been pleasing and we remain focused on meeting our financial target of 8% for the year as a whole.

This reflects the strength of the Australian and New Zealand economies and the momentum established in our core businesses. Personal is performing particularly strongly. Corporate is performing solidly as is Institutional, which is showing signs of improvement. New Zealand is flatter, following severe price competition in the mortgage market in the first quarter, he said.

The Personal Division, ANZ's specialist retail product and distribution businesses in Australia, continues to be ANZ's best performing division. In a competitive market, Personal has grown retail deposits 10.2% in the past 12 months, lifted residential lending by 15.8% and funds management flows continue to improve. The credit card business continues to perform well.

Personal's strong performance has been largely driven by improvements in the ANZ branch network and continued advances in customer satisfaction. The latest market research indicates ANZ has the highest customer satisfaction of any of the major banks and has now moved ahead of St George Bank for the first time since 1996.

Mr McFarlane said: These results are built on the success we have had in revitalising the branch network including high levels of staff satisfaction and engagement. We are now expanding our retail presence in population growth corridors with an increase in the number of ATMs and new branches in Sydney and Southern Queensland. This includes trialling new concepts such as *anz@work* involving the location of small sales-focused branches in business precincts.

The Corporate Division is performing well with deposits up 12% over the past 12 months and lending up 13%. While lending growth to smaller businesses remains at a high level, it has moderated slightly with the slowdown in the property market and increasing competition.

Asset growth in Institutional has been stronger although largely offset by lower margins in a highly competitive market. The Markets business has benefited from recent volatility in foreign exchange markets. Going forward, Institutional will also be impacted by the loss of earnings from the London-based Structured Finance business recently sold to Standard Chartered.

New Zealand has been impacted by severe price competition in the mortgage market in the first quarter resulting in a flat financial performance. Volume growth was significantly higher than expected however pointing to improving momentum in second half of 2005 as management moves from a focus on integration to using the Group's two brands to grow market share and improve financial performance.

Excludes significant transactions, incremental expenditure on the integration of The National Bank of New Zealand, goodwill amortisation.

Australia and New Zealand Banking Group Limited ABN 11 005 357 522

Customer attrition levels remain well below expectations and the Group's retail market share is stable. This reflects increased investment in retail banking staffing levels in both brands. High levels of staff engagement in New Zealand, among the highest in the Group, and leading customer satisfaction levels at The National Bank of New Zealand, together with continued improvements at ANZ New Zealand have also been important. No material integration issues have arisen and is now well on track to be completed this year. ANZ National Bank Limited will release its General Disclosure Statement for the period ending December 2004 on 17 February 2005.

ANZ continues to expect earnings from Asia Pacific to be well down, reflecting lower earnings from our Panin investment, which were abnormally high in 2004, investment in the region, and the strength of the Australian Dollar. Esanda and UDC's performance is solid. ING Australia is performing well but financial performance will depend on the strength of investment returns.

Credit quality is significantly better than expected and continued de-risking of the portfolio is likely to lower our provisioning charge below expectations.

We have said consistently that 2005 is a year where we will continue to invest in organic growth and that our focus is not on maximising current year's earnings but creating a stronger business platform for the future, Mr McFarlane said.

Our performance in core businesses in Australia has been stronger than expected but New Zealand lower than expected. We are investing in people, particularly in branch and specialist sales activities across Australia and New Zealand. However, tight control of business-as-usual costs has allowed us to maintain our focus on revenue growth by investing in high priority growth areas such as personal and small-to-medium business.

We believe these opportunities are significant and justify giving up some earnings growth in the short term to create a platform for further market share gains and more sustainable earnings performance over the medium term, Mr McFarlane said.

A number of factors previously detailed are however working to offset strong volume growth experienced in the year to date. Margins remain modestly under pressure particularly in Institutional and New Zealand. In Group Treasury the flat yield curve has significantly reduced the opportunity for earning mismatch income across the industry in Australia and offshore, representing a drag of around 1% in EPS terms. The strength of the Australian Dollar relative to the US Dollar is also a negative influence.

Commenting on other issues of interest to shareholders, Mr McFarlane said: Although we have commented that we have an underweight position in wealth management, this is an issue for the long term, not for the moment. Our focus remains on organic growth and it would be imprudent to entertain wealth management acquisitions given the current values in the sector.

We are continuing to look for opportunities in Asia to establish a portfolio of consumer-focused growth businesses in partnership with local players. Although we continue to examine opportunities, we will only proceed where we can engineer financially attractive investments.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Overall, I remain comfortable with the year, which is now on track against our target of 8% growth in cash earnings per share, and we have also advanced our strategic agenda by investing in organic growth, Mr McFarlane said.

ANZ will hold a conference call for analysts and fund managers at 10.00am today during which John McFarlane and Chief Financial Officer, Mr Peter Marriott will discuss this shareholder update.

- CC** Entities rated CC are currently highly vulnerable to non-payment of interest and principal.
- C** Entities rated C have filed a bankruptcy petition or taken similar action, but payment of obligations are being continued.
- D** D rated entities are in default. This is assigned when interest or principal payments are not made on the date due or when an insolvency petition or a request to appoint a receiver is filed.

Plus (+) or Minus (-): The ratings from **AA** to **CCC** may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Moody's Investors Service - Credit rating scale for long-term ratings:

Ratings scale	Description
Aaa	Judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as 'gilt edged'. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualised are most unlikely to impair the fundamentally strong position of such issues.
Aa	Judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the Aaa securities.
A	Possess many favourable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.
Baa	Considered as medium-grade obligations (i.e. they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
Ba	Judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterises bonds in this class.
B	Generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
Caa	These bonds are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
Ca	Represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.
C	These are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Moody's Investors Service bond ratings, where specified, are applied to financial contracts, senior bank obligations and insurance company senior policyholder and claims obligations with an original maturity in excess of one year.

Moody's Investors Service applies numerical modifiers **1**, **2** and **3** in each generic rating classification from **Aa** through **Caa**. The modifier **1** indicates that the obligation ranks in the higher end of its generic rating category; the modifier **2** indicates a mid-range ranking; and the modifier **3** indicates a ranking in the lower end of that generic rating category.

Contingent tax liability

As previously disclosed, the New Zealand Inland Revenue Department (IRD) is reviewing a number of structured finance transactions as part of an audit of the 2000 to 2003 tax years. This is part of an industry-wide review by the IRD of these transactions undertaken in New Zealand.

Since 30 September 2004, the Bank has received Notices of Proposed Adjustment (the Notices) in respect of some of these transactions. The Notices are formal advice that the IRD is proposing to amend tax assessments. The Notices are not tax assessments and do not establish a tax liability. They are the first step in a formal disputes process. It is expected, however, that tax assessments are likely to be issued in due course.

Based on the independent tax and legal advice obtained, the Bank is confident that the tax treatment it has adopted for these transactions and all similar transactions is correct and does not currently expect to raise additional provisions for any tax liability relating to this matter.

The tax adjustments proposed so far by the IRD cover the 2000 to 2003 tax years and imply a maximum potential liability of \$81 million (\$103 million with interest tax effected).

The IRD is also investigating other transactions undertaken by the Banking Group which have been subject to the same tax treatment. Should the same position be taken by the IRD for all years on all these transactions, including those that the Notices cover, the maximum potential tax liability would be approximately \$313 million (\$367 million with interest tax effected) as at 31 December 2004.

Of the maximum potential tax liability in dispute, it has been estimated that approximately \$99 million (\$118 million with interest tax effected) is subject to tax indemnities given by Lloyds TSB Bank plc under the agreement by which the Bank acquired the NBNZ Group, and which relate to transactions undertaken by NBNZ Group before December 2003.

This leaves a net potential tax liability as at 31 December 2004 of \$214 million (\$249 million with interest tax effected).

The Bank, with the rest of the banking industry, is working in co-operation with the New Zealand Government on tax law changes that would affect transactions of this type in the future. The Bank has not entered into similar transactions for some time and many of those being reviewed have already matured. Legislative changes could involve the remaining transactions being terminated during the current financial year.

Other contingent liabilities

An actuarial valuation of The National Bank Staff Superannuation Fund at 1 April 2004, undertaken in October 2004, showed that the actuarial valuation of past service liabilities exceeds the value of the Fund's assets by \$6 million. This amount is not included as a liability within these financial statements. This deficit is being funded at the contribution rate recommended by the independent actuary.

The Commerce Commission is investigating the banking industry in relation to currency conversion fees on foreign currency credit and debit card transactions. At balance date, the Bank has been charged under the Fair Trading Act 1986 in relation to ANZ branded credit card products, but not any National Bank branded credit card products. Subsequent to balance date, the Bank was also charged under the Fair Trading Act 1986 in relation to National Bank branded credit card products. Any potential liability cannot be reliably estimated due to uncertainty over the scope and outcome of the proceedings.

20. SECURITISATION, FUNDS MANAGEMENT AND OTHER FIDUCIARY ACTIVITIES**Securitisation**

The Banking Group has not securitised any of its own assets. The Banking Group is involved in providing banking services to customers who securitise assets.

Funds management

Certain subsidiaries of the Bank act as trustee and/or manager for a number of unit trusts and investment funds, including retirement funds. The Bank provides private banking services to a number of clients including investment advice and portfolio management. The Banking Group is not responsible for any decline in the performance of the underlying assets of the investors.

The unit trusts are managed to ensure sufficient liquid assets are held to meet normal redemptions. Any decline in the value of the underlying assets of the unit trusts is reflected in the unit price, and ultimately borne by the investor. The Banking Group does not guarantee the managed fund products with respect to liability or asset values.

The ANZ Mortgage Trust holds mortgages under an equitable assignment with the Bank. The ANZ Mortgage Trust can at any time require the Bank to repurchase any mortgage. The Bank may also require repurchase in certain circumstances. The mortgages are included in these financial statements.

As funds under management are not owned by the Banking Group, they are not included in these financial statements. The Banking Group derives fee and commission income from the sale and management of superannuation bonds and superannuation plans, unit trusts, life insurance products, bonus bonds, investment funds and the provision of private banking services to a number of clients.

Funding was provided to The National Bank Superannuation Bond to facilitate payments, including provisional tax payments. Details of funding provided to funds managed by the Banking Group are detailed below:

21. CONCENTRATIONS OF CREDIT RISK**Concentrations of credit risk to individual counterparties**

The credit exposure concentrations disclosed for connected persons are on the basis of actual exposures and exclusive of exposures of a capital nature. The peak end-of-day credit exposures for the quarter to connected persons is measured over Tier 1 Capital as at the end of the quarter. There are no specific provisions provided against credit exposures to connected persons as at 31 December 2004 (31/12/2003 \$nil; 30/09/2004 \$nil).

Note 1

The Banking Group has amounts due from its Ultimate Parent Company and other entities within the Ultimate Parent Group arising from the ordinary course of its business. These balances arise primarily from deposits of surplus foreign currency and other foreign currency transactions.

Note 2

Non-bank connected persons exposures consists of loans to directors of the Bank. All loans were made in the ordinary course of business of the Bank, on an arm's length basis and on normal commercial terms and conditions.

Note 3

The method of calculating the peak end-of-day disclosure above differs from that applied in determining the connected persons limit under the Banking Group's Conditions of Registration. The peak end-of-day disclosure is measured against Tier 1 Capital at quarter end whereas the connected persons exposure under the Conditions of Registration is measured against Tier 1 Capital on a continuous basis.

Note 4

Represents the maximum peak end-of-day aggregate credit exposures limit (exclusive of exposures of a capital nature and net of specific provisions) to all connected persons. This is based on the rating applicable to the Bank's long term senior unsecured NZD obligations payable in New Zealand, in New Zealand dollars (refer page 5 for the credit rating). Within the overall limit a sub-limit of 15% of Tier 1 Capital applies to aggregate credit exposures (exclusive of exposures of a capital nature and net of specific provisions) to non-bank connected persons.

The information contained in the table below has been derived in accordance with the Conditions of Registration imposed pursuant to section 74 (4) (b) of the Reserve Bank of New Zealand Act 1989 and the capital adequacy framework issued by the Reserve Bank of New Zealand.

For the purposes of calculating the capital adequacy ratios for the Parent Bank (solo basis), wholly owned and wholly funded subsidiaries of ANZ National Bank Limited are consolidated with the Bank. In this context, wholly funded by the Bank means that there are no liabilities (including off-balance sheet obligations) to anyone other than the Bank, the Department of Inland Revenue and trade creditors, where aggregate exposure to trade creditors does not exceed 5% of the subsidiary s shareholders equity. Wholly owned by the Bank means that all equity issued by the subsidiary is held by the Bank.

Where there is a full, unconditional, irrevocable cross guarantee between a subsidiary and the Bank, the subsidiary may be consolidated with the Bank for the purposes of calculating the Bank s solo capital position.

INDEPENDENT REVIEW REPORT for the three months ended 31 December 2004

Independent Review Report to the Directors of ANZ National Bank Limited

We have reviewed the interim financial statements, including supplementary information, for the three months ended 31 December 2004 set out on pages 7 to 24.

The interim financial statements and supplementary information provide information about the past financial performance and financial position of ANZ National Bank Limited and its subsidiary companies (the Banking Group). This information is stated in accordance with the accounting policies set out on page 11.

Directors responsibilities

The Directors are responsible for the preparation of interim financial statements and supplementary information which gives a true and fair view of the financial position of the Banking Group as at 31 December 2004 and of the results of its operations and cash flows for the three months ended on that date.

Auditors responsibilities

It is our responsibility to independently review the interim financial statements including supplementary information presented by the Directors and state whether anything has come to our attention that would cause us to believe that the interim financial statements or supplementary information do not present a true and fair view of the matters to which they relate.

Basis of statement

Our review has been conducted in accordance with the Review Engagement Standards issued by the Institute of Chartered Accountants of New Zealand. A review is limited primarily to enquiries of Banking Group personnel and analytical review procedures applied to financial data, and thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Statement

Based on our review nothing has come to our attention that would cause us to believe that the interim financial statements or supplementary information do not present a true and fair view of the matters to which they relate.

Our review was completed on 10 February 2005 and our statement is made as at that date.
