**UNDERSTANDING YOUR FUND'S EXPENSES
(unaudited)**

SHAREHOLDER EXPENSES

The following Example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The Example is based on an investment of \$1,000 invested at April 1, 2005 and held for the entire period until September 30, 2005.

ACTUAL EXPENSES

The first line in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line of your Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

**HYPOTHETICAL EXAMPLE FOR
COMPARISON PURPOSES**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Edgar Filing: TRANSAMERICA INCOME SHARES INC - Form N-CSRS

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges, redemption fees, brokerage commissions paid on purchases and sales of fund shares. Therefore, the second line under the Fund in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

Transamerica Income Shares, Inc.	Beginning Account Value (April 1, 2005)	Ending Account Value (September 30, 2005)	Annualized Expense Ratio	Expenses Paid During Period(a) (April 1, 2005 to September 30, 2005)
Actual	\$ 1,000.00	\$ 1,060.50	0.77%	\$ 3.98
Hypothetical(b)	1,000.00	1,021.21	0.77	3.90

(a) Expenses are calculated using each Fund's annualized expense ratio (as disclosed in the table), multiplied by the average account value for the period, multiplied by number of days in the period (183 days), and divided by the number of days in the year (365 days).

(b) 5% return per year before expenses.

NOTE 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The Fund's investment objective is to seek as high a level of current income consistent with prudent investment, with capital appreciation as only a secondary objective.

In the normal course of business the Fund enters into contracts that contain a variety of representations and warranties, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund and/or its affiliates that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

In preparing the Fund's financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following policies were consistently followed by the Fund, in accordance with GAAP.

Securities Valuations: Fund investments traded on an exchange are valued at the last sale price or closing price on the day of valuation on the exchange where the security is principally traded.

Debt securities are valued by independent pricing services at the last quoted bid price; however, those that mature in sixty days or less are valued at amortized cost, which approximates market.

Other securities for which quotations are not readily available or whose values have been determined to be unreliable are valued at fair market value as determined in good faith by the Fund's Administrative Valuation Committee, under the supervision of the Board's Valuation Committee, using guidelines adopted by the Board of Directors.

Repurchase Agreements: The Fund is authorized to enter into repurchase agreements. The Fund, through its custodian, Investors Bank & Trust Company ("IBT"), receives delivery of the underlying securities, the value of which at the time of purchase is required to be an amount equal to at least 100% of the resale price. Repurchase agreements involve the risk that the seller will fail to repurchase the security, as agreed. In that case, the Fund will bear the risk of value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security. In the event of bankruptcy or insolvency of the seller, delays and costs are incurred.

Securities Lending: The Fund may lend securities to qualified borrowers (typically broker/dealers). The loans are collateralized at all times with cash or short term money market instruments with a market value at least equal to the market value of the securities on loan. Although securities loaned will be fully collateralized at all times, the Fund may experience delays in, or may be prevented from, recovering the collateral should the borrower fail financially.

Income from securities lending is included in the Statement of Operations. The amount of collateral and value of securities on loan are included in the Statement of Assets and Liabilities as well as in the Schedule of Investments.

The Fund has engaged its custodian bank, IBT, as a lending agent to administer its securities lending program. IBT earned \$5 of program income for its services.

Securities Transactions and Investment Income: Security transactions are recorded on the trade date. Security gains and losses are calculated on the specific identification basis. Dividend income, if any, is recorded on the ex-dividend date. Interest income, including accretion of discounts and amortization of premiums, is recorded on the accrual basis commencing on the settlement date.

Dividend Distributions: Dividend distributions are declared monthly. Capital gains distributions are declared annually. Distributions are generally paid in the month following the ex-date, on or about the fifteenth calendar day. See "Automatic Reinvestment Plan" on page 25 for opportunity to reinvest distributions in shares of the Fund's common stock.

NOTE 4. FEDERAL INCOME TAX MATTERS

The Fund has not made any provision for federal income or excise taxes due to its policy to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments for items including, but not limited to, bond premium amortization and capital loss carryforwards.

The aggregate cost of investments and composition of unrealized appreciation (depreciation) for federal income tax purposes as of September 30, 2005, are as follows:

Federal tax cost basis	\$ 147,195
Unrealized appreciation	4,374
Unrealized (depreciation)	(2,274)
Net unrealized appreciation (depreciation)	\$ 2,100

NOTE 5. REGULATORY PROCEEDINGS

There continues to be significant federal and state regulatory activity relating to financial services companies, particularly mutual fund companies and their investment advisers. As part of an ongoing investigation regarding potential market timing, recordkeeping and trading compliance issues and matters affecting the Fund's investment adviser, TFAI, and certain employees and affiliates of TFAI, the SEC staff has indicated that it is likely to take some action against TFAI and certain of its affiliates at the conclusion of

the investigation. The potential timing and the scope of any such action is difficult to predict. Although the impact of any action brought against TFAI and/or its affiliates is difficult to assess at the present time, the Fund currently believes that the likelihood that any such action will have a material adverse impact on it is remote. It is important to note that the Fund is not aware of any allegation of wrongdoing against it and its Board at the time this semi-annual report is printed. Although it is not anticipated that these developments will have an adverse impact on the Fund, there can be no assurance at this time. TFAI and its affiliates are actively working with the SEC in regard to this matter; however, the exact resolution cannot be determined at this time. TFAI will take such actions that it deems necessary or appropriate to continue providing management services to the Fund and to bring all matters to an appropriate conclusion.

TFAI and/or its affiliates, and not the Fund, will bear the costs regarding these regulatory matters.

AUTOMATIC REINVESTMENT PLAN

Holders of 50 (not in thousands) shares or more of the Fund's common stock are offered the opportunity to reinvest dividends and other distributions in shares of the common stock of the Fund through participation in the Automatic Reinvestment Plan (the "Plan"). Under the Plan, Mellon, as Transfer Agent, automatically invests dividends and other distributions in shares of the Fund's common stock by making purchases in the open market. Plan participants may also deposit cash in amounts (not in thousands) between \$25 and \$2,500 with Mellon for the purchase of additional shares. Dividends, distributions and cash deposits are invested in, and each participant's account credited with, full and fractional shares.

The price at which Mellon is deemed to have acquired shares for a participant's account is the average price (including brokerage commissions and any other costs of purchase) of all shares purchased by it for all participants in the Plan.

Your dividends and distributions, even though automatically reinvested, continue to be taxable as though received in cash.

Another feature of the Plan is the "Optional Cash Only" feature. You can make additional investments only, without reinvesting your monthly dividend. If you own 50 shares (not in thousands) or more, registered in your name and currently in your Plan account, and desire to periodically send additional contributions (not in thousands) between \$25 and \$2,500 for investment, you may do so. The shares you own and the new shares acquired through this feature will not participate in automatic reinvestment of dividends and distributions. Rather, the shares you acquire if you participate in the "Optional Cash Only" feature of the Plan will be held for safekeeping in your Plan account. Each investment will be made on or near the next dividend payment date. All other procedures for the purchase and sale of shares described above will apply.

Mellon charges a service fee (not in thousands) of \$1.75 for each investment, including both dividend reinvestment and optional cash investment.
