ANZ 2006 Annual Result Excel template

ANZ will announce its 2006 Annual Result on Thursday, 26 October 2006.

To assist market participants in analysing the results, ANZ will provide an Excel version of key tables with the Annual Results announcement. This will be available on ANZ's website at www.anz.com/australia/aboutanz/investorcentre/ReportsandResults/results.asp shortly after the Result has been lodged with the ASX.

A version of this file containing prior period numbers is now available at the above link. These prior period numbers are based on ANZ's new Divisional structure which was announced in April 2006.

HIGHLIGHTS

For Release: 26 October 2006

ANZ 2006 Annual Results

Profit after tax	
Statutory profit \$3,688 million	up 16.2%
Cash* profit \$3,587 million	up 13.8%
Cash* profit before provisions	up 10.4%

Earnings per share	
Statutory EPS 200.0 cents	up 18.0%
Cash* EPS 194.5 cents	up 13.2%

Shareholder return	
Full year dividend 125 cents	up 13.6%
Total Shareholder Return 17.1%	
Return on equity 20.7% (18.3%)	

Business highlights

Strong result in Personal - revenue up 13%, profit up 22%

Improved results and momentum in New Zealand and Institutional

Accelerated investment spend with 1,280 new FTEs

Credit environment benign, credit quality strong, credit costs at historic lows

Achieved targeted revenue and productivity targets. Revenue target range expanded, now 7-10%

Revenue growth 8.4%* (9.1% FX adjusted)

Cost-Income ratio 45.6%* (1.0% improvement, medium-term target 40%)

Adjusted common equity ratio stable at 4.7% (restated for new APRA capital deductions)

* Adjusted for AIFRS 2005 adjustments and non-core items (including significant items, ANZ National Bank incremental integration costs and AIFRS mark to market of certain hedge gains/losses)

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Australia and New Zealand Banking Group Limited (ANZ) today announced a record profit after tax of \$3,688 million for the year ended 30 September 2006, up 16.2%.

The headline result included a number of one-off gains including the National Housing Bank (NHB) insurance settlement. Adjusting for these, cash* profit was up 13.8% and cash* EPS were up 13.2%.

* Adjusted for AIFRS 2005 adjustments and non-core items (including significant items, ANZ National Bank incremental integration costs and AIFRS mark to market of certain hedge gains/losses)

A final dividend of 69 cents brought the full year dividend to 125 cents, an increase of 13.6%.

ANZ CEO Mr John McFarlane said: This is a good result based on a strong business performance.

The real highlight was our strong revenue growth, at the top of our target range, reflecting the substantial investment over recent years and the resultant strong momentum. This enabled us to lower the Cost Income ratio by 1% while at the same time accelerating our investment program.

Net interest margin fell 9 basis points over the year, moderating in the second half. Provisioning was unusually low, and partly reflects cyclically strong credit quality and the result of substantial de-risking that has taken place at ANZ over the past few years.

When we said that we would invest to create a real difference that others would find hard to replicate, and to accelerate revenue growth to 7%-9%, it was seen as stretching. It's now evident this is the right approach.

To be a great organisation we need to stand for something. For us it is to become a very different bank by reshaping the way banking is done. We are making it compelling for a customer to deal with us and not others, why the community should trust us, why shareholders should invest in us, and why our people should devote their working lives to us.

Our vision, our investment program, our strong foundation, and our track record, all underpin the future that I am personally very excited to be part of, Mr McFarlane said.

Outlook

Commenting on the outlook for ANZ, Mr McFarlane said: As the benefits of our investment program come through, we are confident to extend our future revenue target range to 7-10%.

We will continue to invest to underpin revenue growth, and work towards leadership in our major businesses over time. We believe this will build superior and sustainable value for shareholders over the medium to long term. In consequence, expense growth in 2007 is likely to be similar to that in 2006.

The adoption of AIFRS will require the \$141 million gain from New Zealand dollar hedges to be taken directly to retained earnings in 2007. We have taken out additional hedges to mitigate the negative impact of a weaker New Zealand dollar on earnings, which is expected to mitigate the 2007 EPS impact to less than 1%.

The impact of credit losses for the industry as a whole under IFRS is less predictable, though it is unlikely we will see current provisioning levels sustained at such low levels. Otherwise, with our strong momentum going into 2007, we are confident about the year ahead, Mr McFarlane said.

Divisional Performance

Personal has had an outstanding year, with revenue growth of 13% driving earnings growth of 22%. All Personal businesses recorded double-digit earnings growth, with the highlights being Pacific (up 67%), Investment and Insurance Products (up 48%), Consumer Finance (up 25%), and Mortgages (up 21%). Expenses were up 9%, as investment in future growth continued, with the addition of 714 full time equivalent staff, 25 new branches, and 330 ATMs over the year.

The Division is making good progress in establishing a strong proposition centered on **More Convenient Banking**, and continues to have a distinct lead over our peers in Customer Satisfaction. Giving customers a strong reason to bank with us other than price alone has resulted in minimal margin attrition. Some of these reasons included opening call centres 24 hours, 7 days a week; expanding the ATM network, including a partnership with Woolworths, extending branch opening hours including on weekends, and being first to market with new products.

Institutional earnings grew 11% over the same period last year, with revenue growth of 8%. This was offset by an 11% increase in expenses, driven primarily by higher people costs. Good results were achieved in Markets (up 13%), Corporate and Structured Finance (up 42%), Corporate Banking (up 19%), Business Banking (up 15%), and Trade/Transactions business (up 16%). This was partly offset by subdued performance from our Debt Products Group, mainly Institutional lending (down 10%), where the impact on margins from excess global liquidity continues to dampen earnings growth. Given this, the Division has sought to reduce the balance sheet intensity of this business, and this has resulted in lower risk-weighted asset growth of 10%, and 1% in the second half. While the environment at the top end of Institutional remains challenging, it is nevertheless making good progress in transforming this segment. The recent Peter Lee Associates survey confirmed ANZ regained its Number One Lead Institutional Bank position in Australia.

New Zealand Banking (in NZD) earnings were up 20% on the same period last year. The result was assisted by lower credit provision charges, with profit before provisions up 8%. There were good results from The National Bank Retail (up 21%), Corporate & Commercial (up 102%), and New Zealand Institutional (up 15%). The profit from UDC is still declining (down 25%), as the business is restructured. Overall, New Zealand Businesses is showing promising momentum, and has a clear growth strategy to build on a strong foundation. Robust credit growth and good credit quality continue.

Partnership Expansion continues with the completion of the 20% stake in Tianjin City Commercial Bank in China, and 10% stake in Sacombank in Vietnam. Discussions are proceeding satisfactorily in Shanghai and in other faster growing Asian countries. Our joint-ventures in Indonesia, the Philippines and Cambodia are performing well, and the cards businesses are showing strong organic growth with 1 million cards now on issue in Indonesia and the Philippines. INGA remediation program is nearing completion and the overall foundation of the business has improved substantially. We can now look forward to normal operation and growth in the years ahead.

Profit on a comparable AIFRS basis

Net profit attributable to shareholders of the company has been amended as follows to arrive at profit on a comparable AIFRS basis.

	Half year Sep 06 \$M	Half year Mar 06 \$M	Movt Sep 06 v. Mar 06 %	Full year Sep 06 \$M	Full year Sep 05 \$M	Movt Sep 06 v. Sep 05 %
Net profit attributable to shareholders of the Company	1,877	1,811	4%	3,688	3,175	16%
AIFRS adjustments to bring prior periods onto a comparable basis(1)	n/a	n/a	n/a	n/a	(31)	n/a
Profit on a comparable AIFRS basis(1)	1,877	1,811	4%	3,688	3,144	17%

Cash profit

Profit on a comparable AIFRS basis has been adjusted to exclude the following non-core items to arrive at cash profit. Throughout this document figures and ratios that are calculated on a cash basis have been shaded to distinguish them from figures calculated on a statutory AIFRS basis.

	Half year Sep 06 \$M	Half year Mar 06 \$M	Movt Sep 06 v. Mar 06 %	Full year Sep 06 \$M	Full year Sep 05 \$M	Movt Sep 06 v. Sep 05 %
Profit on a fully comparable AIFRS basis(1)	1,877	1,811	4%	3,688	3,144	17%

Less: Non-core items**Significant items(2)**

Gain on sale of NBNZ Life			n/a	14	-100%	
Settlement of ANZ National Bank claims	14	-100%	14		n/a	
Settlement of NHB insurance claim	79	-100%	79		n/a	
Total significant items(2)	93	-100%	93	14	large	
Ineffective hedge fair value gains/losses(3)	21	13	62%	34	31	10%
ANZ National Bank incremental integration costs(4)	(26)	-100%	(26)	(52)	-50%	
Total non-core items	21	80	-74%	101	(7)	large
Cash profit	1,856	1,731	7%	3,587	3,151	14%

(1). ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$31 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

(2). In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

(3). The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$34 million after tax (2005 full year: \$31 million; Sep 2006 half: \$21 million; Mar 2006 half: \$13 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$15 million (2005 full year: \$13 million; Sep 2006 half: \$10 million; Mar 2006 half: \$5 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives in the 2006 year not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (refer page 14)

(4). In 2006 ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (2005 full year: \$52 million; Sep 2006 half: nil; Mar 2006 half: \$26 million). Tax on ANZ National Bank incremental integration costs is \$13 million (2005 full year: \$26 million; Sep 2006 half: nil; Mar 2006 half: \$13 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration

CHIEF FINANCIAL OFFICER'S REVIEW**2006 results**

ANZ recorded a profit after tax of \$3,688 million for the year ended 30 September 2006, an increase of 16% over the September 2005 year. Earnings per share increased 18% to 200.0 cents over the September 2005 year. After adjusting for AIFRS 2005 adjustments(1) and non-core items(1) referred to on pages 13 to 15, Cash(1) profit increased 14% to \$3,587 million and Cash EPS increased 13% to 194.5 cents.

Profit growth

Cash profit increased 14% to \$3,587 million. Core(1) revenue increased 8% with volume growth partly offset by reduced margins (-9 basis points). Operating expense growth of 6% reflected on-going investment in the business.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Cash profit in Australia increased 16% over the 2005 year with outstanding growth across the Personal businesses (22%). Solid performances across the Institutional businesses were partially offset by subdued performance from the Debt Products Group.

Cash profit in New Zealand increased 19% (26% in NZD terms), assisted by a lower credit provisioning charge, strong performance in the Markets business in Institutional, good lending growth and higher capital. These increases were partly offset by reduced earnings in UDC, competitive margin compression on mortgages and deposits and lower earnings in non-continuing businesses from certain structured finance transactions which have been exited.

Cash profit in Asia and Pacific increased 18% and 35% respectively, driven by strong volume growth in Fiji and PNG and the Indonesian cards business, being partly offset by lower earnings from PT Panin Bank.

Profit in the UK and US decreased driven by reduced profit in non-continuing businesses with the sale of the London headquartered project finance business in 2005 and repatriation of capital.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$31 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability. In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$34 million after tax (2005 full year: \$31 million; Sep 2006 half: \$21 million; Mar 2006 half: \$13 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$15 million (2005 full year: \$13 million; Sep 2006 half: \$10 million; Mar 2006 half: \$5 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives in the 2006 year not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (refer page 14)

In 2006 ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (2005 full year: \$52 million; Sep 2006 half: nil; Mar 2006 half: \$26 million). Tax on ANZ National Bank incremental integration costs is \$13 million (2005 full year: \$26 million; Sep 2006 half: nil; Mar 2006 half: \$13 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration

Impact of exchange rate movements(1)

Movements in exchange rates had little impact on reported Cash(1) profit due to NZD hedges. However growth rates in individual line items are affected. Presented below is an analysis of the impact of foreign exchange movements and currency hedges on the income statement. Movements in exchange rates have resulted in a \$5 million increase in Cash profits for 2006, principally in New Zealand (net of profit on contracts put in place to hedge USD and NZD revenues). The average NZD exchange rate reduced by 5.4% and the closing rate depreciated by 4.2% with a corresponding impact on the balance sheet.

Cash profit(1)	7%	8%	(7)	14%	14%	5

(1) ANZ has removed the impact of exchange rate movements to provide readers with a better indication of the Group's performance in local currency terms. Retranslation is net of revenue hedge earnings

(2) Net interest income included the impact of revenue hedge gains which increased \$58 million over 2005 and \$52 million over first half 2006

Profit drivers

Profit after tax increased 16% over the 2005 year and Cash(1) profit increased 14% over the 2005 year. For a discussion of the impact of non-core items and AIFRS 2005 adjustments refer pages 13 to 15.

Significant influences on profit are shown below. Explanations are on cash profit adjusted for AIFRS 2005 adjustments and non-core items:

Net interest #19% - Adjusted for AIFRS 2005 adjustments and non-core items(1) #9%:

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Net interest income was driven by growth of 13% in average interest earning assets attributable to Institutional Continuing (21%), particularly in trading securities and Personal (12%), largely in Mortgages, and average deposit growth in Institutional Continuing (15%) and Personal (10%). Volume growth was partly offset by a 9 basis point decline in margin.

Other income \$10% - Adjusted for AIFRS 2005 adjustments and non-core items(1) \$7%:

Other income growth was primarily driven by volume growth initiatives and higher trading profits in Australia and New Zealand. These increases were partly offset by reduced foreign exchange income and lower equity accounted income in PT Panin and the joint venture with ING.

Operating expenses #3% - Adjusted for AIFRS 2005 adjustments and non-core items(1) #6%:

Operating expense growth was primarily due to higher wage rates and a 4% increase in staff numbers, largely in Personal and Institutional, as we continue to invest in the business.

Provision for credit impairment \$30% - Adjusted for AIFRS 2005 adjustments and non-core items(1) \$28%:

The reduction in provision for credit impairment reflected the Group's strengthening risk profile. Individual provisions decreased by \$19 million due to increased write-backs in Institutional and lower single name provisions in New Zealand partly offset by lower write-backs in the non-continuing businesses. The collective provision charge decreased by \$139 million largely driven by the oil price shock risk provision recognised in 2005.

Income tax #25% - Adjusted for AIFRS 2005 adjustments and non-core items(1) #19%:

The increase in tax expense is driven by growth in profit before tax and a 1% increase in the effective tax rate reflecting the run-off of certain structured financing transactions in non-continuing businesses.

(1) Refer footnote 1 on page 11

Comparison with March 2006 half

The Group recorded a profit after tax of \$1,877 million for the half year ended 30 September 2006, an increase of 4% over the March 2006 half. Basic earnings per share increased 3% (3.2 cents) to 101.6 cents.

Cash profit increased 7% over the March 2006 half. Cash earnings per share (refer page 24) increased 7% (6.5 cents) to 100.5 cents.

Revenue increased 5%. After adjusting for non-core items, net interest increased 6% with a 4% increase in average interest earning asset volumes together with a 4 basis point improvement in margin. The margin improvement reflects a 4 basis point reduction from funding mix and competition offset by higher earnings from revenue hedges, trading income recognised in interest and interest refunds. Other operating income increased 1% due to volume growth initiatives and strong structured finance deal flows, offset by reduced trading profits. Operating costs increased 4% driven by on-going investment in the business.

Excluding non-core items, cash profit in Australia increased 15% driven by 14% growth in Personal. Cash profit in New Zealand increased 3% in NZD terms with strong performance from the New Zealand Businesses being partly offset by less favourable trading conditions for the Markets business. Cash profit in Asia and Pacific geographies increased 27% and 5% with volume related growth. Other geographies reduced 35% due largely to the profit on the sale of a power asset and the settlement of sale warranties occurring in the March 2006 half year.

Non-core items

ANZ has adjusted the income statement for non-core items, as outlined below, to assist readers in understanding the core business performance by removing the volatility in reported results created by one-off significant items, ANZ National Bank incremental integration costs which ceased in the half year March 2006 and the timing differences in the recognition of fair value gains in profit on ineffective hedging contracts.

Non-core items in the income statement

Significant items	Half year Sep 06 \$M	Half year Mar 06 \$M	Movt Sep 06 v. Mar 06 %	Full year Sep 06 \$M	Full year Sep 05 \$M	Movt Sep 06 v. Sep 05 %
Gain on sale of NBNZ Life			n/a		14	-100%
Settlement of ANZ National Bank claims		14	-100%	14		n/a
Settlement of NHB insurance claim		79	-100%	79		n/a
Total significant items		93	-100%	93	14	large
Ineffective hedge fair value gains/losses	21	13	62%	34	31	10%
ANZ National Bank incremental integration costs		(26)	-100%	(26)	(52)	-50%
Non-core items	21	80	-74%	101	(7)	large

Significant items

Significant items in the income statement are those items that management believe do not form part of the core business by virtue of their magnitude and infrequent nature and, as such, should be removed from profit when analysing the core business performance. The following are considered significant items:

Settlement of the NHB insurance claim (March 2006 half year)

During the March 2006 half ANZ settled its \$130 million claim against a number of reinsurers in relation to the National Housing Bank (NHB) matter. ANZ has reported the \$113 million (\$79 million after tax) cost recovery as a significant item in 2006. \$1 million was received in 2005 and not treated as significant as it was immaterial.

Settlement of ANZ National Bank claims (March 2006 half year)

Following the purchase of National Bank of New Zealand Limited on 1 December 2003, a dispute arose with Lloyds TSB in relation to the accounting treatment in the Completion Accounts of the provision for retirement gratuities. The dispute was referred to arbitration and, as a result, ANZ National Bank received \$14 in March 2006 (\$14 million after tax) in final settlement.

Sale of NBNZ Life and Funds Management (September 2005 half year)

On 30 September 2005 ANZ National Bank sold NBNZ Life and Funds Management businesses into a joint venture with ING. Profit after tax on sale of \$14 million was recognised.

ANZ National Bank incremental integration costs

Expenditure on the integration of ANZ National Bank includes both the reallocation of existing resources to integration and incremental integration costs. Incremental costs are those costs that will not recur once integration is complete and thus do not form part of the core ongoing cost base. During the March 2006 half year \$26 million after tax (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million) or \$39 million before tax (Sep 2005 half: \$53 million; Mar 2005 half: \$25 million) of incremental integration costs were incurred. This program is now complete.

Ineffective hedge fair value gains

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. The implementation of AIFRS accounting policies on hedge accounting from 1 October 2005 introduced volatility within the Income Statement in respect of ineffective hedges as follows:

ineffectiveness of designated accounting cash flow and fair value hedges; and

approved classes of derivatives not designated in accounting hedge relationships but that are considered to be economic hedges.

ANZ has separately reported the impact of volatility due to hedge ineffectiveness as a non-core item as the profit reported on hedge transactions will reverse over time and as such is not part of the core operating performance. During 2006 ANZ has classified \$34 million after tax (2005 full year: \$31 million; Sep 2006 half: \$21 million; Mar 2006 half: \$13 million) relating to ineffective hedging as a non-core item (tax on hedge gains/losses \$15 million (2005 full year: \$13 million; Sep 2006: \$10 million; Mar 2006: \$5 million)). The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding.

Net unrealised loss (balance sheet position)	Sep 06 \$m	Mar 06 \$m	Sep 05 \$m
Non-compliant hedges	84	102	129
Ineffective portion of effective cash flow and fair value hedges	11	24	15
Net unrealised loss (balance sheet position)	95	126	144

Ineffective hedge fair value gains (income statement)	Half year Sep 06 \$m	Half year Mar 06 \$m	Full year Sep 06 \$m	Full year Sep 05 \$m
Non-compliant hedges	18	27	45	36
Ineffective portion of effective cash flow and fair value hedges	13	(9)	4	8
Ineffective hedge fair value gains (before tax)	31	18	49	44
Ineffective hedge fair value gains (after tax)	21	13	34	31

In 2007 ineffective hedge fair value gains/losses will include mark to market gains/losses on NZD revenue hedges - refer page 26.

AIFRS 2005 adjustments

The Group implemented accounting policies in accordance with AIFRS on 1 October 2004, except for those relating to financial instruments and insurance contracts, which were implemented on 1 October 2005. The 2005 comparatives for these standards have not been restated in the statutory accounts. To assist readers to understand the core business performance on a comparable basis, ANZ has adjusted the 2005 figures to be comparable with the 2006 year result within the Chief Financial Officer's and Business Performance Reviews. The major adjustments are to the provision for credit impairment and recognition of fees as effective yield adjustments to net interest. No adjustment has been made to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding on the basis of impracticability.

Full details of the impact of transition to AIFRS are set out in the 31 March 2006 Consolidated Financial Report and Dividend Announcement.

Summary of major AIFRS impacts

The following table reconciles comparative AIFRS (statutory) numbers with equivalent figures on a comparable AIFRS basis, including the impact of AASB 139.

(1) Refer footnote 1 on page 11

(2) AIFRS 2005 adjustments include the reclassification of customers liability for acceptance from non-interest earning to interest earning (2005: \$13.3 billion) to be consistent with the classification of commercial bill fees as interest. Average balance sheets adjusted for AIFRS 2005 adjustments are included as Supplementary Information on pages 92 to 96

2006 result

Net interest income at \$6,943 million was 19% (\$1,125 million) higher than the 2005 year. After adjusting for non-core items and AIFRS 2005 adjustments, core net interest income was 9% (\$572 million) higher than the 2005 year.

Volume

Average interest earning assets increased 19%. After adjusting for AIFRS 2005 adjustments, average interest earning assets increased 13%:

Average net advances grew by \$23.6 billion (10%). Growth in Australia was attributable to: Personal (\$13.4 billion or 12%), with \$10.2 billion or 12% in Mortgages; and Institutional Australia (\$6.1 billion or 12%) with \$1.2 billion or 10% in Corporate Banking, \$1.2 billion or 13% in Business Banking, \$1.8 billion or 8% in Debt Products Group and Non-continuing Businesses (-\$0.8 billion). New Zealand's average net advances increased by \$4.1 billion

or 7% (\$8.4 billion or 13% in NZD terms). Average net advances grew by \$0.8 billion (9%) in Overseas Markets.

Other interest earning assets increased \$10.6 billion (32%), driven by higher levels of liquid assets (\$3.8 billion), trading securities (\$4.6 billion), available-for-sale assets and interbank lending (\$2.2 billion).

Average deposits and other borrowings grew \$17.1 billion or 9%. Growth in Australia was attributable to: Personal (\$5.5 billion or 10%), with \$4.1 billion or 11% in Banking Products and \$1.2 billion or 12% in Esanda; Institutional Australia (\$3.1 billion or 8%) with \$0.9 billion or 12% in Corporate Banking, \$0.8 billion in Business Banking and \$0.7 billion or 5% in Trade and Transaction Services Australia; and \$4.2 billion or 24% in Treasury. Average deposits and other borrowings decreased in New Zealand \$0.5 billion or 0.8% (\$2.6 billion increase or 5% in NZD terms which comprised core deposits growth of 12%, partially offset by a decrease in Treasury Certificates of Deposits and Commercial Paper due to a switch to longer term funding). Average deposits and other borrowings grew (\$4.7 billion or 24%) in Overseas Markets, with exchange rate impacts \$0.3 billion.

Margin

Net interest average margin was up 1 basis point to 2.31%, however, core net interest margin adjusted for AIFRS 2005 adjustments reduced 9 basis points from the 2005 year:

AIFRS 2005 adjustments (+10 basis points)

Changes predominantly reflect the inclusion of certain fees as net interest income, partially offset by interest expense on Hybrid securities, reported as debt instruments under AIFRS, and the inclusion of acceptances in average interest earning assets.

Funding mix (-5 basis points)

Margins were down due to substitution of wholesale funding for customer deposits (2 basis points) and a decrease in net non-interest bearing items (3 basis points).

Asset mix (-3 basis points)

Reduction in margin was due to an increase in the proportion of lower yielding liquid assets and trading securities in Group Treasury and Institutional (3 basis points), with offsetting impacts between changes in the proportion of higher yielding Esanda and Mortgage lending.

Competition (-8 basis points)

Competitive pressures reduced margins, mainly in Australian and New Zealand Mortgages (3 basis points) and Institutional lending (1 basis point) with slight margin reductions in Corporate and Business Banking and Rural portfolios (1 basis point). In addition, customer migration to lower yielding credit cards reduced the net interest margin (1 basis points), together with migration into high yielding customer deposits principally in New Zealand (2 basis points).

Wholesale rates (+3 basis points)

Wholesale rate movements benefited margins with less basis risk in variable rate mortgages and credit cards together with increased earnings on the investment of capital and rate insensitive deposits (3 basis points).

Other items (+4 basis points) include:

higher earnings from foreign exchange revenue hedging (+2 basis points or \$58 million)

release of a provision relating to prior year income in Institutional (+1 basis point)

reduced effective yield fee income (-2 basis point)

other impacts include lower funding costs associated with unrealised trading gains, interest received on tax refunds, increase in the proportion of credit cards earning interest and a reduction in the proportion of retail broker payments (+3 basis points)

Comparison with March 2006 half

Net interest income increased \$207 million (6%) over the March 2006 half.

Volume

Average interest earning assets increased \$11.6 billion (4%):

Average net advances grew by \$9.4 billion (4%). Growth in net advances in Australia was attributable to: Personal (\$7.4 billion or 6%), with \$5.8 billion or 6% in Mortgages; and Institutional Australia (\$2.9 billion or 5%), with \$0.5 billion or 4% in Corporate Banking, \$0.8 billion or 8% in Business Banking, \$1.2 billion or 5% in Debt Products Group, \$0.2 billion in Trade and Transaction Services Australia and Non-continuing Businesses (-\$0.3 billion). New Zealand's average net advances decreased by \$1.4 billion or 2% (increased \$5.0 billion or 7% in NZD terms). Average net advances increased by \$0.8 billion (9%) in Overseas Markets.

Other interest earning assets increased \$2.2 billion (6%), driven by higher levels of liquid assets (\$1.0 billion) and trading securities (\$2.1 billion), offset by a decrease in available-for-sale assets and interbank lending (\$0.9

million).

Average deposits and other borrowings grew \$6.1 billion or 3%. Growth in Australia was attributable to: Personal (\$2.9 billion or 5%), with \$2.0 billion or 5.2% in Banking Products; and Institutional Australia (\$2.6 billion or 7%), with \$0.4 billion or 5% in Corporate Banking, \$0.5 billion or 6% in Business Banking and \$1.4 billion or 9% in Trade and Transaction Services Australia; and \$4.0 billion or 20% in Treasury. Average deposits and other borrowings decreased in New Zealand \$3.0 billion or 6% (increased \$2.2 billion or 4.0% in NZD terms comprising core deposits growth of 6%, partially offset by a decrease in Treasury Certificates of Deposits and Commercial Paper due to a switch to longer term funding). Average deposits and other borrowings decreased (\$0.4 billion or 2.0%) in Overseas Markets with exchange rate impact of \$0.2 billion.

Margin

Net interest average margin increased 4 basis points from the March 2006 half:

Funding mix (unchanged)

Stable proportions of wholesale and customer funding within the portfolio.

Asset mix (unchanged)

Modest increase in the proportions of low yielding liquid assets and trading securities.

Competition (-3 basis points)

Competitive pressures reduced margins, mainly in Australian and New Zealand Mortgages (1 basis point) and Corporate Banking, Business Banking and Rural portfolios (1 basis point). In addition, migration to high yielding customer deposits and lower rate credit cards reduced margin (1 basis point).

Wholesale rates (unchanged)

Increased income on the investment of capital and rate insensitive deposits (+1 basis points) offset by a reduction in non-traded interest rate risk earnings, with minimal impacts from basis risk in variable rate mortgages and credit cards.

Other items (+7 basis points) include:

Higher earnings from foreign exchange revenue hedging (+3 basis points or \$52 million)

Funding costs associated with unrealised trading gains decreased \$64 million, captured as an improvement in net interest margin (+4 basis points), however it is directly offset by an equivalent decrease in trading income.

Release of revenue relating to prior year income in Institutional in the March 2006 half (-2 basis points).

Other impacts include reduced effective yield fee income (-1 basis point), an increase in the proportion of credit cards earning interest and interest received on tax refunds (+3 basis points).

(1) Refer footnote 1 on page 11

2006 result

Other operating income decreased \$369 million (10%). After adjusting for AIFRS 2005 adjustments and non-core items (refer pages 13 to 15 for details), core other operating income increased \$211 million (7%). The following explanations are based on core other operating income:

Fee income increased \$166 million (8%).

Lending fee income increased \$25 million (6%) largely in Personal where Mortgages increased \$11 million driven by asset lending growth and Banking Products increased \$7 million as a result of growth in the number of transaction accounts. New Zealand increased \$5 million (NZD increase \$10 million) largely in NBNZ Retail. Institutional increased \$2 million. Trade and Transaction Services increased \$10 million due to increased volumes in International Trade Finance, which was offset by a reduction in Debt Product Group due to lower loan administration fees.

Non-lending fee income increased \$141 million (9%):

Personal increased \$123 million (16%). Consumer Finance increased \$54 million (13%) principally due to volume growth. Investment and Insurance Products increased \$30 million (26%) from income generated by financial planners. Banking Products increased \$23 million (20%) driven by new product initiatives together with strong new

transaction deposit growth. Esanda grew \$5 million due to higher predetermination fee income.

Institutional increased \$16 million (4%). Trade and Transaction Services grew \$9 million (5%) due to business growth from new channels and the custody business. Markets increased \$8 million due to debt capital market deals.

Partnerships & Private Bank increased \$10 million mainly due to a 37% increase in cards issued in Indonesia.

New Zealand decreased \$7 million (NZD increase of \$15 million, 4%) with growth across card and transaction fees offset by exchange rate movements.

Foreign exchange earnings decreased \$7 million (2%) mainly in Institutional Markets due to lower foreign exchange swap and spot earnings which were offset by increased profit on trading instruments. This was partially offset in Markets in New Zealand with gains in spot and foreign exchange forward products associated with NZD and interest rate volatility and in Trade and Transaction Services as a result of continuing growth particularly from international payments revenue.

Profit on trading instruments increased \$77 million. Institutional increased \$40 million with Markets increasing \$49 million driven by strong growth in Australia and New Zealand associated with increased activity and positioning to take advantage of interest rate and currency volatility. In addition Markets increased due to the profit offsetting the foreign exchange loss referred to above. Included in the Markets increase was a \$15 million reduction due to unrealised losses in Australia and New Zealand which were offset by the funding benefit from realised cash flows included in net interest income. Debt Product Group decreased \$10 million due to costs incurred in managing the portfolio. In addition, the 2005 year included a \$32 million cost from the hedge of capital investment earnings in INGA which ceased in October 2005.

Other operating income decreased \$25 million (7%):

Partnerships & Private Bank decreased \$32 million reflecting the impact of the expiration of transitional tax relief and lower capital investment earnings on the INGA result as well as lower PT Panin equity accounted earnings.

New Zealand decreased \$17 million which includes a \$7 million gain in 2005 resulting from the alignment of revenue recognition on leases in the New Zealand Fleet business with Group accounting policies, UDC losses on sale of operating lease vehicles and lower profits from ING NZ offset by a \$5 million profit due to the sale of MasterCard shares.

Personal increased \$15 million largely in Mortgages from higher sales volumes and associated LMI policy premiums. A \$9 million increase in Consumer Finance due to the sale of MasterCard shares was offset by a \$9 million reduction in Esanda mainly as a result of the impact from the fall in secondhand car prices.

Non-continuing businesses increased \$10 million mainly as a result of a gain from settlement of warranties relating to the sale of the London headquartered project finance business and a \$4 million gain on the sale of power assets.

Institutional increased \$2 million with a \$11 million increase in Corporate and Structured Financing, which included a \$6 million gain on sale of power assets, offset by the impact of the \$10 million gain on sale of Sydney Futures Exchange shares in 2005.

Movements in average exchange rates over the September 2005 year decreased total other income by \$28 million.

Total Markets income is impacted by mix impacts between the categories within other operating income and net interest income. The effect for the 2006 year largely offset each other and was to decrease total other income by \$15 million (offset in net interest income).

Comparison with March 2006 result

Other operating income increased \$19 million (1%). Core other operating income increased \$20 million (1%) after excluding non-core items (refer pages 13 to 15 for details). The following explanations are based on core other operating income:

Fee income increased \$87 million (8%).

Lending fee income was flat. Institutional decreased \$13 million with a change in business mix in Corporate and Structured Financing (higher non-lending fees) and lower administration fees in Debt Products Group. Personal increased \$11 million including a \$4 million increase in Mortgages driven by lending growth and a \$3 million increase in Esanda due to fee initiatives.

Non-lending fee income increased \$87 million (11%):

Personal increased \$66 million (16%), of which \$35 million in Consumer Finance was driven principally by volume growth initiatives. Banking Products increased \$14 million driven by product initiatives together with strong new transaction deposit growth. Investment and Insurance Products increased \$10 million due to an increase in income generated by financial planners.

Institutional increased \$32 million (17%). Corporate and Structured Financing increased \$28 million from strong deal flow.

New Zealand decreased \$14 million (NZD increase of \$4 million) due to the impact of movements in exchange rates.

Foreign exchange earnings decreased \$7 million (3%) mainly in Institutional as a result of strong first half earnings in Markets associated with large currency volatility, particularly in New Zealand (\$32 million). This was partially offset by the close out of a large foreign exchange swap and spot position and the corresponding take up of a derivative trading profit (reducing foreign exchange earnings and increasing profit on trading income) in the first half (\$24 million).

Profit on trading instruments decreased \$79 million:

Markets decreased by \$71 million due to unrealised losses in Australia and New Zealand of \$64 million which are offset by the funding benefit from realised cash flows included in net interest income. In addition, the first half included the \$24 million profit on trading instruments offsetting the lower foreign exchange swap and spot earnings (see above). Institutional sales increased \$18 million associated with the closure of a number of large deals.

Debt Product Group decreased \$8 million due to costs incurred in managing the portfolio.

Other operating income increased \$19 million (12%):

Personal increased \$27 million. Esanda increased \$10 million due largely to the impact of a fall in secondhand car prices recorded in the first half. Mortgages increased \$9 million from higher sales volumes and associated LMI policy premiums. Consumer Finance increased mainly due to the \$9 million profit from the sale of MasterCard shares.

Partnerships & Private Bank increased \$12 million. INGA equity accounted income rose \$5 million reflecting increased funds under management. International Partnerships increased \$4 million due to equity accounted income from Tianjin City Commercial Bank.

Institutional increased \$6 million. Markets increased \$7 million due to bond sales.

Non-continuing businesses decreased \$20 million as the first half included a \$12 million gain from settlement of the sale warranties relating to the sale of the London headquartered project finance business and a \$4 million gain on sale of power assets.

Movements in average exchange rates over the March 2006 half year decreased total other income by \$36 million.

The total Markets mix impact (referred to above), in comparison with the March 2006 result, was to decrease total other income by \$64 million (offset in net interest income).

(1) For March 2006 these costs are personnel costs of \$22 million (2005: \$36 million), computer costs of \$6 million (2005: \$17 million), and other costs of \$11 million (2005: \$25 million)

2006 result

Operating expenses increased \$113 million (3%) over the 2005 year. After adjusting for non-core items (refer page 13 for details of non-core items), core operating expenses increased \$265 million (6%). The following explanations exclude non-core items:

Personnel expenses increased \$214 million (9%) as a result of annual salary increases and a 4% increase in staff numbers mainly in the following business units:

Personal staff numbers increased 6%. Consumer Finance increased 8% to deal with increased volumes and cards initiatives. Branch Network staff numbers increased 6% due to the opening of 25 new branches under the Branch Investment Program coupled with extending opening hours for an additional 86 branches. Mortgages increased 8% due to increased volumes. Investment and Insurance Products increased 16% over the year due mainly to recruitment of financial planners.

Institutional staff numbers increased 7% due to a 24% increase in Markets primarily reflecting the strategy to drive business growth and increased staff for IT projects. Trade and Transaction Services increased 8% reflecting investment in business platforms and short-term parallel runs of a new operations site.

Partnership & Private Bank increased 29% driven mainly by the expansion program in Cambodia and increasing specialist staff to follow the growth agenda in Private Banking.

Premises costs increased \$23 million (6%) reflecting additional space requirements and opening of 25 new branches. There was also a \$6 million increase in the cost of security services.

Computer costs increased \$2 million. Depreciation charges in Operations, Technology and Shared Services and Personal were lower principally as a result of asset write-downs in 2005 and assets fully depreciating. Offsetting this were increases in Mortgages due to re-assessment of software projects, Trade and Transaction Services and Markets due to investment in new platforms, and Consumer Finance due to additional ATM and merchant terminals.

Other expenses increased \$30 million:

Travel expenses increased \$16 million with small increases spread across most business units.

Advertising spend increased \$14 million including expenditure on the ANZ NOW and ATM advertising campaigns and Consumer Finance expenditure due to the launch of new products including Visa Debit Card.

Movements in exchange rates reduced costs by \$55 million.

Comparison with March 2006 half

Operating expenses increased \$161 million (7%) or \$87 million (4%) adjusting for non-core items (refer page 13 for details). The following explanations exclude non-core items:

Personnel costs were up \$25 million (2%) with a 4% increase in staff numbers. The increase included a \$28 million benefit from movement in NZD exchange rates. Increases in staff numbers were mainly in the following business units:

Personal increased 4%. Consumer Finance increased by 8% to deal with increased volumes and cards initiatives. Retail Banking staff numbers increased 5% due to opening of 14 new branches under the Branch Investment Program together with extending opening hours of branches. Investment and Insurance Products increased 8% due mainly to recruitment of financial planners.

Institutional increased 5% mainly due to a 15% increase in Markets primarily reflecting the strategy to drive business growth. Trade and Transaction Services increased 6% reflecting business expansion particularly in Custodian Services and Trade Finance businesses.

Partnership & Private Bank increased 19% driven mainly by the expansion program in Cambodia and Private Banking increased 26% to bring forward the growth agenda.

Premises costs increased \$3 million (1%) driven by higher rental expense reflecting additional space requirements and opening of new branches.

Computer costs increased \$27 million (10%) due to the timing impact of higher software maintenance fees in the second half and re-assessment of software projects in Mortgages.

Other expenses were \$31 million (7%) higher. Advertising increased \$15 million which included the launch of the Visa Debit Card and an increased advertising campaign in New Zealand. Professional fees were up \$10 million with Operations, Technology and Shared Services increasing \$5 million due to a range of initiatives and Esanda increasing \$4 million due to a review of Esanda's Auto Finance business. Travel expenses increased \$8 million with small increases spread across most business units. Card processing expense increased \$5 million mainly due to microchip rollout costs. Non lending losses decreased \$17 million with the first half higher due to Institutional and New Zealand (the latter included a NZD 10 million Commerce Commission settlement impact).

Movements in exchange rates reduced cost growth by \$52 million.

Credit Risk

Provision for credit impairment charge

(1) Refer page 15

Individual provision charge

The individual provision charge was \$338 million, down \$19 million from the September 2005 year. This decrease was principally driven by increased recoveries and writebacks in Institutional and lower single name provisions in New Zealand. This was partially offset by growth and moderately higher risk in Personal, driven mainly by credit cards and lower recovery rates in Esanda due to falling used car prices and lower writebacks and recoveries in the non-continuing businesses.

	Half year Sep 06 \$M	Half year Mar 06 \$M	Movt Sep 06 v. Mar 06 %	Full year Sep 06 \$M	Full year Sep 05 \$M	Movt Sep 06 v. Sep 05 %

(1) Refer page 15

Collective provision charge

The collective provision charge was \$69 million, down \$154 million from the September 2005 year or \$139 million on a comparable basis after AIFRS 2005 adjustments.

The Group charge for the year was driven by strong asset growth, changes in portfolio risk and a reduced benefit from non-continuing businesses following the sale of offshore project finance assets. This was partially offset by a decline in the scenario impact provision taken in 2005 to reflect the risk change of materially higher and sustained oil prices, which are now flowing into risk measured collective or individual provisions.

The risk increase was predominantly in Personal due to strong growth in low rate cards, which have a slightly higher risk/return; and moderately higher losses in Esanda as higher petrol prices reduce recovery rates on defaulted loans as resale values have fallen in some vehicle classes. New Zealand benefited from strong relative growth in lower risk mortgage products and improvement in personal loans and cards (low rate card products were only introduced late in the financial year). New Zealand continues to be supported by stable economic conditions that are being closely watched for any signs of weakening.

Expected loss

Management believe that disclosure of modelled expected loss data will assist readers in determining the longer term expected loss rates on the lending portfolio as they remove the volatility in reported earnings created by the use of AIFRS credit loss provisioning. The expected loss concept also aligns with the Basel II advanced approach to capital management. ANZ uses the expected loss methodology internally for economic value added (EVA) reporting and as a factor when determining the dividend payout ratio. Expected loss outcomes are subject to change as Basel II validation work is completed.

The Group's expected loss was \$691 million, an increase of \$111 million (19%) over the September 2005 year. This increase was primarily driven by strong growth in Personal including the strategic risk shift into lower rate credit cards and by a slightly higher risk profile in Esanda largely driven by the falling value of secondhand vehicles reducing recovery rates on defaulted facilities. Partnerships & Private Bank also increased due to strong growth and risk changes within the Indonesian credit cards portfolio. The non-continuing businesses expected loss reduced during 2006, however the expected loss rate increased over this period due to a large decrease in average net lending assets.

Gross non-performing loans

Gross non-performing loans increased to \$661 million, up \$19 million from \$642 million as at 30 September 2005. This increase was largely driven by two new accounts in Institutional during the first half of 2006, partially offset by lower non-performing loans in New Zealand and strong asset realisations and writeoffs in the non-continuing businesses.

2006 result

The Group's income tax expense increased by \$302 million to \$1,522 million resulting in an effective tax rate of 29.2%, an increase of 1.5% from the September 2005 year. The increase mainly reflects the run-off of structured finance transactions. The September 2005 year included the non-taxability of profit on sale of NBNZ Life and Funds Management Businesses.

Adjusted for AIFRS 2005 adjustment and non-core items, income tax expense increased by \$239 million resulting in an effective tax rate of 29.3%, an increase of 1.0% from the September 2005 year. This increase mainly reflects the run-off of structured financing transactions.

Comparison with March 2006 half

The Group's effective tax rate for the half year ended September 2006 increased 0.2%, with the AIFRS and non-core adjusted rate increasing 0.1% from the March 2006 half year.

- (3) The EPS calculation excludes the Euro preference shares

2006 full year earnings per share increased 18.0% (30.5 cents) to 200.0 cents over full year 2005. Cash EPS for the Group increased 13.2% or 22.7 cents over full year 2005. The main drivers of the increase in cash EPS on full year 2005 are:

Growth in continuing business profit before credit impairment (after tax) and preference shares contributed 11.6%

Reduction in the continuing businesses credit impairment charge (after tax) contributed 4.8%

Partly offset by non-continuing businesses (2.8%) and the dilution by the increase in number of shares (0.4%)

September 2006 half year earnings per share increased 3.3% (3.2 cents) on the March 2006 half. Cash EPS for the Group increased 6.9% or 6.5 cents on the March 2006 half. The main drivers of the increase in cash EPS on the March 2006 half are:

Growth in continuing business profit before credit impairment (after tax) contributed 6.9%

Reduction in the continuing businesses credit impairment charge (after tax) contributed 1.4%

Partly offset by non-continuing businesses (1.2%) and the dilution by the increase in number of shares (0.2%)

(1) Refer footnote 1 on page 11

The Directors propose that a final dividend of 69 cents be paid on each ordinary share, up 10 cents (17%) on the 2005 final dividend broadly in line with the growth in Cash EPS (adjusted for non-core items and AIFRS 2005 adjustments). The proposed final dividend will be fully franked.

The Group has a dividend reinvestment plan and a bonus option plan. Participation in these plans is limited to 50,000 shares in each plan. Election notices for these plans must be received by 5.00 pm (AEST) on the record date, namely, 15 November 2006. It is proposed that the final dividend will be payable on 15 December 2006. Dividends payable to shareholders with a registered address in Great Britain (including the Channel Islands and the Isle of Man) and New Zealand will be converted to their local currency at ANZ's daily forward exchange rate at the close of business on the fifth ASX trading day immediately following the record date for value on the payment date.

The Group expects current timing differences will generate future franking credits and therefore the Group expects it will be able to maintain full franking for the foreseeable future.

EVA Reconciliation

One measure of shareholder value is EVATM (Economic Value Added) growth relative to prior periods. EVATM for the year ended 30 September 2006 at \$2,082 million was up \$171 million on the year ended 30 September 2005, and up \$56 million on the March 2006 half.

EVA™	1,069	1,013	6%	2,082	1,911	9%

(1) Refer footnote 1 on page 11

EVA™ is a measure of risk adjusted accounting profit used for evaluating business unit performance and is a factor in determining the variable component of remuneration packages. It is based on net profit after tax, adjusted for non-core items, credit costs, the cost of capital, and imputation credits (measured at 70% of Australian tax). Of these, the major component is the cost of capital, which is calculated on the risk adjusted or economic capital at a rate of 11%. At the Group level, total capital is used so the cost of capital reflects the full resources provided by shareholders. The credit cost adjustment replaces the credit impairment charge with expected losses after tax at the rate applicable in the relevant geography.

At ANZ, economic capital is equity allocated according to a business unit's inherent risk profile. It is allocated for several risk categories including: credit risk, operating risk, interest rate risk, basis risk, mismatch risk, investment risk, trading risk deferred acquisition costs risk and other risk. The methodology used to allocate capital to business units for risk is designed to help drive appropriate risk management and business strategies.

Market Risk

Below are aggregate Value at Risk (VaR) exposures at 97.5% and 99% confidence levels covering both physical and derivatives trading positions for the Bank's principal trading centres. Figures are converted from USD at closing exchange rates.

Revenue related cash flow hedges

The Group has used derivative instruments to hedge against the adverse impact on future offshore revenue streams from exchange rate movements. Movements in average exchange rates, net of associated revenue hedges, resulted in an increase of \$5 million in the Group's profit after tax for 2006 (Sep 2006 half: decrease \$7 million). This included the impact of earnings from associated revenue hedges, which increased by \$58 million (before tax) from 2005. Hedge revenue is booked in the Group Centre as interest income.

From 1 October 2006, new AIFRS rules do not permit economic hedging of offshore revenue streams to be accounted for in the same manner as that permitted under first year AIFRS transitional rules or AGAAP. As a consequence, any revenue hedges of the Group's offshore revenue streams will be marked to market through the income statement. In addition, AIFRS requires realised and unrealised positions on revenue hedges at 1 October 2006 to be taken directly to retained earnings.

The most significant offshore revenue stream is derived from the New Zealand geography (refer page 56) and the debt component of New Zealand Dollar intra-group funding of this business, which amounted to NZD1.77 billion at 30 September 2006. Details of revenue hedges are set out below.

	Half year Sep 06 \$M	Half year Mar 06 \$M	Full year Sep 06 \$M	Full year Sep 05 \$M
Net open position NZD (notional principal)		2,486		3,957
Amount taken to income (pre tax)				
- NZD hedges	49	(3)	46	(27)
- USD hedges				15

All revenue hedges existing at the start of financial year 2006 were realised. The realised gains on the hedges of future years revenues of approximately \$141 million (net of tax) have been deferred in the Hedging Reserve in equity at 30 September 2006. In line with AIFRS requirements, these gains (which would have otherwise been reflected in the income statement in future years) were transferred directly to Retained Earnings at 1 October 2006. In addition, NZD1.55 billion of capital hedges were established during the latter part of the financial year. The unrealised losses on these hedges at 30 September 2006 of approximately \$23 million (net of tax) have been included in the Foreign Currency Translation Reserve. Post balance date, these capital hedges have been de-designated, and will be marked-to market through the income statement in 2007 as a partial economic hedge of the expected 2007 NZD earnings. Approximately 95% of the anticipated 2007 NZD revenue streams (including inter-group funding) have been hedged at an effective all-in rate of NZD1.14/A\$, compared to an all in rate of NZD1.10/A\$ for 2006. This will limit the expected reduction in 2007 Group earnings per share due to a possible weaker NZD to less than 1%.

The changes to the accounting requirements have had no impact on the economic position of the Group. Whilst the marking to market of these hedges will introduce volatility going forward, the unrealised gains/losses on these hedges will be included in non-core items and excluded from Cash profit.

Balance Sheet

Total assets increased by \$34.9 billion (12%) since 30 September 2005 to \$335.8 billion. Exchange rate movements accounted for a net reduction of \$2.2 billion consisting of a reduction of \$3.1 billion in New Zealand partly offset by an increase of \$0.9 billion in Overseas Markets. Excluding the impact of exchange rate movements, total assets increased \$28.1 billion (14%) in Australia, \$7.6 billion (10%) in New Zealand and \$2.5 billion (25%) in Asia Pacific, offset by a reduction of \$1.1 billion (10%) in other geographies.

The explanations in the table below describe movements in the major asset classes.

Liquid assets #29% (*Excl Exchange Rates #29%*)

Liquid assets increased by \$3.4 billion to \$15.0 billion at 30 September 2006.

Australia increased \$3.7 billion from customer-related repurchase agreement activity in Institutional and increased liquidity in Group Treasury. Overseas Markets decreased \$0.6 billion due to a switch from bank certificates of deposit to more attractive available-for-sale assets in the United Kingdom.

Due from other financial institutions #52% (*Excl Exchange Rates #51%*)

Due from other financial institutions increased by \$3.3 billion to \$9.7 billion at 30 September 2006 due mainly to an increase in volumes of interbank lending in Australian Treasury, Singapore and New Zealand partially offset by a decrease in United Kingdom.

Trading securities #46% (*Excl Exchange Rates #47%*)

Trading securities volumes increased \$2.9 billion to \$9.2 billion at 30 September 2006 due largely to a strategic decision in Institutional to be more competitive in the Debt Capital Markets with greater focus on supporting customer issuance and investment needs.

Derivatives #41% (*Excl Exchange Rates #42%*)

Derivative assets increased \$2.7 billion to \$9.2 billion at 30 September 2006 driven principally by increased volatility in exchange rates, notably the significant depreciation in the NZD during the year and increased trading activity.

Available-for-sale assets #6% (Excl Exchange Rates #5%, excl Exchange Rates and AIFRS 2005 Adjustment \$5%)

Available-for-sale assets include assets previously classified as investment securities (under AGAAP) and loans and advances and other assets that are available-for-sale. These assets are measured at fair value. Available-for-sale asset volumes increased \$0.6 billion to \$10.7 billion at 30 September 2006 due to the reclassification of \$1.1 billion assets from net loans and advances and other assets on 1 October 2005 on adoption of AIFRS and an increase in available-for-sale loans in Institutional Australia. This is partially offset by a decrease in Corporate and Structured Finance following the de-consolidation of two Special Purpose Vehicles.

Net loans and advances #10% (Excl Exchange Rates #11%)

Net loans and advances increased \$22.9 billion to \$255.4 billion at 30 September 2006. Excluding the impact of exchange rate movements (-\$2.1 billion) and the impact of adopting AIFRS (-\$1.5 billion resulting from changes in credit provisioning and the reclassification to available-for-sale), the increase was \$26.5 billion (12%). Growth in Australia was 11% or \$17.1 billion. After adjusting 2005 to a fully comparable AIFRS basis growth was \$18.1 billion (11%):

Personal (12% or \$13.5 billion) with \$10.5 billion as a result of growth in housing loans. Consumer Finance increased \$1.1 billion, reflecting the success of the low rate MasterCard product. Esanda increased \$0.6 billion with solid new business writings partly offset by the natural run-off of assets. Investment and Insurance Products grew \$0.4 billion due to growth in margin lending volumes and uptake of new products and Regional & Rural Banking grew \$0.8 billion.

Institutional Australia (11% or \$4.6 billion) largely in Debt Products Group, with growth of \$1.6 billion driven by increased demand for funding of mergers and acquisition activity. Business Banking increased \$1.3 billion (14%) driven by continued business momentum and Corporate Banking grew \$0.9 billion (14%) with growth in asset finance products and variable rate term lending. Corporate and Structured Financing increased \$0.3 billion due to increased project finance and structured debt activity and volumes in Trade and Transaction Services increased \$0.3 billion as a result of growth in overdrafts.

New Zealand grew by \$4.7 billion (7%). However, after excluding the impact of exchange rates and impact of adopting AIFRS, growth was \$7.3 billion, or 12%, with increases in NBNZ Retail (\$2.2 billion or 10%), ANZ Retail (\$2.1 billion or 15%), Rural Banking (\$1.4 billion or 16%) and Corporate & Commercial Banking (\$1.8 billion or 20%). Overseas Markets grew by \$1.1 billion (13%) in Asia (\$0.7 billion) and Pacific (\$0.4 billion).

Other assets \$19% (Excl Exchange Rates \$18%)

Other assets reduced \$1.2 billion due mainly to lower assets awaiting settlement in New Zealand.

Total liabilities increased by \$34.5 billion (12%) from 30 September 2005. Exchange rate movements accounted for a net reduction of \$1.8 billion consisting of a \$2.7 billion reduction in New Zealand offset by an increase of \$0.9 billion in Overseas Markets. The explanations in the table below describe movements in the major liability classes.

Due to other financial institutions #17% (Excl Exchange Rates #15%)

Due to other financial institutions increased \$2.1 billion to \$14.1 billion at 30 September 2006.

Volumes in Australia increased \$3.3 billion principally in the Markets business in Institutional with increased interbank repurchase agreement activity partly offset by decreases in New Zealand and United Kingdom.

Deposits and other borrowings #8% (Excl Exchange Rates #9%)

Deposits and other borrowings increased \$14.5 billion to \$204.8 billion at September 2006. Excluding the impact of exchange rate movement, the increase was \$16.1 billion. After adjusting for exchange rate movements:

Australia increased \$9.3 billion (8%) largely as a result of increases in the following businesses:

Institutional increased \$4.1 billion (11%) with increased deposits in Debt and Transaction Services (\$4.0 billion) following the Balance Sheet Collateralised Loan Obligation issuance (\$2.2 billion) and growth in current accounts, Institutional & Corporate Relationships (\$1.7 billion) and Markets (\$0.7 billion), partly offset by a reduction in deposits in Corporate and Structured Financing (\$2.3 billion).

Personal increased \$6.3 billion (11%) mainly due to the growth in cash management account products and term deposit balances in Banking Products (\$4.3 billion) and Rural & Small Business Banking (\$0.8 billion), and increased issuance of commercial paper in Esanda to meet funding requirements (\$0.8 billion).

Treasury reduced \$1.1 billion largely due to a reduced requirement for short term domestic funding.

New Zealand increased \$2.8 billion (5%), largely in Institutional (\$4.4 billion) and Retail (\$2.2 billion) following growth in current accounts bearing interest and term deposits. This is partially offset by a reduction in Treasury (\$3.8 billion) where a switch has occurred from short term commercial paper and certificates of deposit to the longer term issuance of EMTNs.

Overseas Markets increased by \$4.0 billion largely due to increased term deposits in Asia (\$1.6 billion) and increased certificates of deposit in America (\$1.5 billion) and United Kingdom (\$0.4 billion).

Derivatives #25% (*Excl Exchange Rates #27%*)

Derivative liabilities increased \$1.7 billion to \$8.8 billion at 30 September 2006. The increase is driven by increased volatility in exchange rates, principally the significant movement in the NZD during the year and increased trading activities.

Payables and other liabilities #40% (*Excl Exchange Rates #42%*)

Payables and other liabilities increased \$3.1 billion (40%) to \$10.7 billion at 30 September 2006 with an increase in securities lending volumes in Institutional and an increase in liabilities awaiting settlement in Treasury.

Bonds and Notes #28% (*Excl Exchange Rates #29%*)

Bonds and notes increased \$11.0 billion to \$50.1 billion at 30 September 2006. Excluding exchange rate movements, bonds and notes increased by \$7.1 billion (22%) in Australia and \$4.1 billion (68%) in New Zealand in response to increased term funding requirements.

Loan Capital #22% (*Excl Exchange Rates #22%*)

Loan capital increased \$2.0 billion to \$11.1 billion at 30 September 2006 in response to term funding requirements and the reclassification of ANZ StEPS (\$1.0 billion) from equity to debt on adoption of AIFRS on 1 October 2005.

Further details of the components of capital and the capital adequacy calculation are set out on pages 98 to 99

Prudential issues – APRA’s changes to prudential standards covering AIFRS impacts and Tier 1 hybrid capital

APRA changes to prudential standards, APS 110 Capital Adequacy and APS 111 Capital Adequacy: Measurement of Capital became effective on 1 July 2006. Transitional rules mean that some changes are not fully effective until January 2008 and potentially January 2010.

AIFRS and capital deductions

The changes to the prudential standards impact the capital base of the Group in the following ways:

The Group’s Tier 1 capital base was reduced by \$716 million at 1 July 2006 due to new or higher deductions for such items as capitalised software, net deferred tax assets, hedge accounting ineffectiveness and defined pension plan deficits, offset by a small release in the general provision for loan losses. The deduction for deferred tax assets has been introduced into the calculation of ANZ’s Tier 1 capital post March 2006. APRA is now requiring verification letters from the Group’s auditors and tax advisors before netting of deferred tax assets and liabilities is permitted for offshore sites.

The Group’s upper Tier 2 capital base was reduced by \$17 million at 1 July 2006 due to the release of the general provision for loan losses, offset by an allowance for the recognition of post acquisition earnings and movement in reserves for associates.

APRA introduced transitional rules to January 2008, whereby the Group can add back to its capital base the adverse impact of adopting the new prudential standards on 1 July 2006. The Group has taken Tier 1 and Upper Tier 2 transitional relief of \$716 million and \$17 million respectively. These amounts are fixed for the period to January 2008. The end of the transitional period is expected to be aligned with the adoption of the Basel II accord.

	\$m	\$m
Total Tier 1 capital at 30 September 2006 (before Transitional relief)	15,641	
Transitional relief	30 June 2006 values	30 Sep 2006 values

General provision for loan losses	(184)	(184)(1)
- New deduction:		
Capitalised software	397	397
Deferred tax assets	289	290
- Other	(1)	(1)(1)
Total	716	740
Transitional Tier 1 capital at 30 September 2006	16,357	

(1) Assumed unchanged since June 2006

Tier 1 Capital and Securitisation

The prudential standards and guidance notes also outlined new criteria for Tier 1 and Tier 2 capital, including sub-categories therein for hybrid Tier 1, Lower and Upper Tier 2. Material changes from the existing prudential standards are:

Introduction of a sub-category of Tier 1 capital being Fundamental Tier 1 which includes most components of shareholders equity, excluding hybrid Tier 1 instruments. This sub-category must be at least 75% of net Tier 1, which effectively reduces the level of hybrid Tier 1 capital (Residual Tier 1) to 25% of net Tier 1 previously 25% of Tier 1 before deductions.

Splitting hybrid Tier 1 into two sub-categories, Innovative and Non-Innovative Tier 1, with limits of 15% and 10% of net Tier 1 respectively. Transition rules will be available to ADIs up until January 2010 if the ADI is above these limits when first measured on 1 January 2008 based upon hybrid Tier 1 instruments on issue at 31 August 2005 (subject to certain conditions being met). The Non-Innovative category is a new classification covering instruments that have the characteristics of non-cumulative, irredeemable preference shares without innovative capital features . ANZ believes that its existing hybrid Tier 1 instruments will be classified as Innovative. At 30 September 2006, ANZ has an Innovative hybrid usage rate of 20.4% (nil for Non-Innovative) which is above the limit and as such expects to apply for the transitional relief contemplated in the standard.

ACE Ratio

As noted above, upon adopting APRA's new prudential standards in July 2006, the Group incurred a \$716 million reduction in Tier 1 capital for increased or new deductions. Whilst APRA has provided transitional relief from these deductions, this transitional relief will not flow through to Rating Agency measures of ACE. As these deductions do not reflect changes to the underlying economic risk of the business, the Group lowered its ACE target range by 25 basis points and expanded the range by 25 basis points to allow short term flexibility, for example AIFRS volatility. The Group's revised ACE target range is 4.00% to 4.75%. The ACE ratio at 4.7% remains at the upper end of the Group's targeted capital range. During the year, ACE ratio declined 39 basis points principally due to:

new capital deductions from adopting AIFRS and APRA's amendments to the prudential standards on 1 July 2006 (-33 basis points);

net profit after preference share dividends of \$3.7 billion (+167 basis points);

ordinary share dividend payments and commitments, net of Bonus Option Plan and Dividend Reinvestment Plan of \$2.1 billion (-95 basis points);

increase in risk weighted assets, excluding the impact of exchange rate movements (-47 basis points);

increase in investment/profit retention in funds management businesses and associates (-20 basis points) principally due to capital injections into PT Panin and Tianjin City Commercial Bank, and profit retention within ING joint ventures;

buy-back of ordinary equity of \$146 million (-7 basis points); and

other (-4 basis points) which includes exchange rate movements principally due to a weaker NZ dollar, increase in defined pension liabilities, 1st loss facility deduction for Collateralised Loan Obligation (CLO), offset by share issuances to staff and option conversions.

Hybrid Capital and Tier 1 Capital

The Group raises hybrid capital to further strengthen the Group's capital base and ensure compliance with APRA's prudential capital requirements.

There was no issuance of new hybrid capital during the year and, as at 30 September 2006, the Group had three Innovative Hybrid Capital instruments outstanding:

Innovative Hybrid Capital details

	ANZ StEPS	US Stapled Trust Security	Euro Hybrid
Amount (in issue currency)	\$1,000 million	USD1,100 million	500 million
Accounting classification	Debt (post AIFRS)	Debt	Equity
Regulatory (APRA) classification	Tier 1	Tier 1	Tier 1
September 2006 balance	\$1,000 million	\$1,471 million	\$871 million
Interest rate	BBSW +1.00%	Tranche 1 Coupon: 4.48% Tranche 2 Coupon: 5.36%	Euribor +0.66%

On adoption of AIFRS on 1 October 2005 the ANZ StEPS issue was reclassified from equity to debt, however, it continues to be classified as Innovative Tier 1 capital for regulatory purposes.

Buy-Back of Ordinary Equity

The Group commenced an on-market buy-back of \$350 million of ordinary equity on 10 January 2005. The buy-back was completed 14 March 2006 with the Group repurchasing 15.7 million shares at an average cost of \$22.26 per share. 6.1 million shares were repurchased during the year at an average cost of \$24.02 per share, totalling \$146 million.

Deferred acquisition costs and deferred income

The Group recognises assets that represent deferred acquisition costs relating to the acquisition of interest earning assets, and liabilities that represent deferred income relating to income received in advance of services performed.

Deferred acquisition costs

At 30 September 2006 the Group's assets included \$569 million (Mar 2006: \$549 million; Sep 2005: \$524 million) in relation to costs incurred in acquiring interest earning assets. During the year, amortisation of \$293 million (Sep 2005: \$258 million) was recognised as an adjustment to the yield earned on interest earning assets.

Deferred income

At 30 September 2006, the Group had deferred income of \$406 million (Mar 2006: \$426 million; Sep 2005(3): \$474 million) in relation to income received in advance. At 30 September 2006, this includes \$3 million (Mar 2006: \$5 million; Sep 2005: \$3 million) deferred service type fees. These fees are deferred and will be amortised over the period of service under AASB 118: Revenue .

At 30 September 2006, fee income of \$343 million (Mar 2006: \$364 million; Sep 2005: \$382 million) that is integral to the yield of an originated financial instrument, net of any direct incremental costs, has been capitalised. This income is deferred and recognised against net loans and advances over the expected life of the financial instrument under AASB 139: Financial Instruments: Recognition and Measurement . At 30 September 2006, the Group's liabilities included other deferred income of \$60 million (Mar 2006: \$57 million; Sep 2005: \$89 million).

The balances of deferred acquisition costs and deferred income at period end were:

	Deferred Acquisition Costs(1)				Deferred Income		
	Sep 06 \$M	Mar 06 \$M	Sep 05 \$M	Sep 06 \$M	Mar 06 \$M	Sep 05(3) \$M	Sep 05(4) \$M

Other	(2)		n/a	(2)		n/a
Total software capitalisation	397	390	2%	397	386	3%

Deferred tax assets (overseas)

Deferred tax assets are recognised using the comprehensive tax balance sheet liability method. They are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses can be utilised. The APRA Prudential Standards require net deferred tax assets (net of deferred tax liabilities) to be deducted from capital. The Prudential Standards only allow netting of deferred tax assets and liabilities for subsidiaries incorporated outside of Australia under certain limited circumstances.

Overseas deferred tax assets (net of collective provision)

	As at Sep 06 \$M

The Group from time to time modifies the organisation of its businesses to facilitate delivery of the strategic agenda. Prior period numbers are adjusted for such changes to allow comparability. Significant changes since 31 March 2006 have been:

A simplified divisional structure was implemented in May 2006:

Personal: Esanda, Small Business and the Pacific have been added to the division. INGA's operating results are now included in Partnerships & Private Bank.

Institutional: Corporate Banking, Business Banking and Personal & Private Banking Asia (including the Asian branch network) are now part of the Institutional division. In addition, Trade and Transaction Services and the Debt Products Group have been combined into Debt and Transaction Services. The component of Treasury activities in respect of managing interest rate mismatch is now included in Markets.

New Zealand: UDC is now included in New Zealand Businesses.

Partnerships & Private Bank: Includes ANZ's partnerships and investments, including ING Australia, ANZ's investments in Asia, and Private Bank.

Group Centre: Treasury mismatch activities are now included in Institutional, and INGA's investment earnings in Partnerships & Private Bank.

There were also a number of minor restatements as a result of customer segmentation, changes to internal transfer pricing methodologies and the realignment of support functions.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$31 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$34 million after tax (2005 full year: \$31 million; Sep 2006 half: \$21 million; Mar 2006 half: \$13 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$15 million (2005 full year: \$13 million; Sep 2006 half: \$10 million; Mar 2006 half: \$5 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives in the 2006 year not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (refer page 14)

In 2006 ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (2005 full year: \$52 million; Sep 2006 half: nil; Mar 2006 half: \$26 million). Tax on ANZ National Bank incremental integration costs is \$13 million (2005 full year: \$26 million; Sep 2006 half: nil; Mar 2006 half: \$13 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration

(2) ANZ has removed the impact of exchange rate movements to provide readers with a better indication of the business unit performance in local currency terms. Retranslation is net of revenue hedge earnings

Brian Hartzler

2006 result

Profit after tax increased 22% over the year, driven by strong lending and deposit growth across the business, up 12% and 11% respectively, while margin compression was contained at 1 basis point across the division. Market share was maintained in retail mortgages and we grew share in retail deposits and personal lending. We continued to increase our retail footprint through the addition of 25 more branches and the expansion of our ATM network as well as growth in our specialist sales force. We are making good progress in establishing a strong brand proposition based on delivering More Convenient Banking, and we continue to lead our major peers in customer satisfaction.

Balance sheet growth drove double digit earnings increases in Mortgages, Consumer Finance, Banking Products and Small Business Banking, while Regional & Rural Banking earnings benefited from a benign credit environment. Investment and Insurance Products experienced strong growth driven by our financial planning business. Pacific earnings grew 67% from good lending growth and low credit costs. Esanda rebounded, growing by 11% as revenue improved in the second half.

Significant factors affecting the result were:

Overall net interest income increased 12%. Mortgages, Regional & Rural Banking and Small Business Banking net interest income grew in line with balance sheet growth (overall up 12%) as margins were held. Consumer Finance net interest income increased 15% with strong balance sheet growth of 21% skewed towards lower margin products. Banking Products net interest income increased by 9% with good deposit growth of 11% offset by ongoing migration to lower margin products. Pacific net interest income grew by 25% in line with strong balance sheet growth of 24%. Esanda net interest income increased by 5%.

Other operating income increased 16%. Mortgages grew other income 49% on the back of strong sales and lending volumes and fee initiatives to match competitors. Consumer Finance grew by 15% through stronger issuing and lending fees and a \$9 million profit from the sale of shares received from the MasterCard Initial Public Offering in the second half. Banking Products grew other income by 17% from higher sales of transaction accounts. Financial planning income was up 28% as more planners generated higher sales volumes. Small Business Banking and Pacific grew other income by 8% and 7% respectively, Regional & Rural Banking grew other income by 1%, while Esanda contracted other income by 1% due to a \$6 million impact from a fall in second hand car prices.

Operating costs increased 9%. Investment continued in expanding the footprint through the addition of 25 more branches, a further 330 ATMs and significant additions to our frontline staff. Operating costs also increased due

to higher marketing and project spend and annual salary rises.

Overall credit costs reduced 3% largely as a result of the provisions taken into account in 2005 for the impact of higher oil prices on consumer s debt servicing capacity, coupled with the effectiveness of improved collections strategies.

Individual provisions were 17% higher primarily in our credit card business reflecting growth in the size of the book, particularly in low rate cards, which have a marginally higher risk profile.

Comparison with March 2006 half

Overall profit after tax increased 14% driven by strong income performance and investment in the business.

Operating income was up 10% driven by strong volume and fee growth across all businesses. Revenues increased by 8% in Mortgages, 14% in Consumer Finance (including the profit on sale of MasterCard shares), 10% in Banking Products, 8% in Regional & Rural Banking, 9% in Small Business Banking, 11% in Esanda, 9% in Pacific and 16% in Investment and Insurance Products from strong sales through the tax year end from our financial planners.

Operating expenses increased 9% due to higher numbers of front line staff to service increased business volumes, ongoing investment in the branch network, investment in chip technology in the Cards business and increased marketing spend as we work to create our distinctive customer proposition focused around More Convenient Banking.

- (1) *Debt and Transaction Services consists of the Debt Product Group and Trade and Transaction Services*
- (2) *Markets includes interest rate mismatch component of Treasury result. NPAT for 2006 was \$13 million (2005: \$15 million; Sep 2006: \$6 million; Mar 2006: \$7 million)*
- (3) *Other includes Client Relationship Group and Personal and Private Banking Asia. Client Relationship Group carries the relationship management costs associated with Institutional customers, with associated revenue booked in the product businesses*

2006 result

Profit after tax increased by 11% with revenue growth of 8% a good outcome. We continued to invest in our business, with expenses growing 11% as we lifted the skills base and improved systems. The balance sheet is being more actively managed, through mechanisms such as the recent successful Collateralised Loan Obligation (CLO), with risk weighted assets growing by only 1% in the second half. Credit quality remained strong throughout the year. All businesses achieved annual profit growth rates in excess of 10%, except for the Debt Products Group, which holds the lending assets for large institutional clients. Business Banking and Corporate Banking profit grew 15% and 19% respectively with sound lending and deposit growth, and a reduction in credit impairment expenses. Trade and Transaction Services profit increased by 16% from higher global Trade Finance and Clearing Services volumes and the release of revenue related to prior years. Corporate and Structured Financing profit increased 42% as deal flow volumes increased and credit impairment expense reduced after the write-back of several individual provisions. Markets profit increased by 13% with continuing revenue growth from sales activity and a particularly strong first half trading result. These strong performances were offset by the Debt Product Group, where a net profit decline of 10% resulted from declining margins, constrained balance sheet growth and a modest increase in individual provisions after write-backs in 2005.

Profit before credit impairment and income tax, adjusting for the impact of exchange rate movements, increased 7%.

Significant factors affecting the result were:

Net interest income grew by 10%. Average net lending assets increased 14%, while average deposit volumes increased 15%. The net interest margin decreased 19 basis points due to competition, run-off of higher margin assets and changes in business mix. Debt and Transaction Services increased 7% due to higher deposit volumes and the release of revenue related to prior years, offset by margin compression in the lending portfolio. Business Banking increased 8%, with 13% average lending growth and 11% average deposit growth, offsetting a 20 basis point decline in margins. Corporate Banking increased 5%, with average lending growth of 10% and average deposit growth of 12% offsetting a 7 basis point margin decline. Markets net interest income increased \$47 million, from increased trading securities income and collateral volumes.

Other operating income increased 5%, with an 8% increase in Markets from a strong first half result. Higher custodian fees and foreign exchange revenue in Debt and Transaction Services was partially offset by mark to market adjustments on hedges of the lending book. Corporate and Structured Financing increased 5%, with higher income from structured finance transactions. Business Banking and Corporate Banking grew 10% and 8% respectively, due to higher volumes.

Operating expenses increased 11%, reflecting increased investment in personnel. Personnel numbers increased by 357, and we have focussed on providing training for current staff and selective recruitment to cover skill gaps. We are also investing in new IT platforms in our Markets and Transaction Services businesses.

Provision for credit impairment decreased by \$78 million. This was driven by both lower collective and individual provision charges, following a combination of improved credit quality, high debt recoveries and collective provisions raised in 2005 for portfolio deterioration in segments identified as being most vulnerable to higher oil prices. Net non-performing loans increased largely due to two accounts in Australia and New Zealand being downgraded in the March 2006 half.

Comparison with March 2006 half

Profit after tax increased by \$34 million (5%). Profit before credit impairment and income tax, adjusting for the impact of exchange rate movements, increased 1%.

Operating income increased by 1%. Revenue in Corporate and Structured Financing increased 13% with solid deal flow in the second half. Business Banking increased 4% with lending and deposit growth offsetting margin declines. Corporate Banking increased 3% due to lending and deposit growth. Lower revenue in Debt and Transaction Services was due to lower margins in the Debt Product Group, and the release of revenue related to prior years in the first half. Markets operating income reduced by 2%, with higher revenue from sales offset by lower trading income in less favorable trading conditions in all markets.

Operating expenses increased 3% due to on-going investment in filling capability gaps and investing in systems. However, other discretionary costs were well controlled.

Provisions for credit impairment decreased \$44 million. Individual provisions decreased due to ongoing debt recoveries and no large new provisions in the second half. The collective provision increased \$19 million primarily from volume growth.

New Zealand Banking

Graham Hodges

2006 result

Profit after tax for New Zealand Banking increased 20% (NZD167 million) over the year, assisted by a NZD92 million after tax reduction in credit impairment expense. Overall, the business is showing promising momentum and has a clear strategy to build on this momentum. The business continues to experience robust lending growth, good credit quality, and the level of interest margin decline has moderated.

Growth in profit before credit impairment and income tax was strong in The National Bank Retail (11%) due to other income growth, Corporate & Commercial Banking (11%) and Rural Banking (9%) due to strong lending growth. NZ Institutional Continuing Businesses growth was 25% due to a strong Markets performance. ANZ Retail improved marginally (2%) with growth constrained in other operating income and expenses impacted by the additional costs of operating domestic systems in New Zealand (NZD10 million). UDC's results were disappointing, with fierce competition and sales force restructuring adversely impacting growth. A number of actions are underway in UDC to return the business to profitable growth.

The results of the Retail Banks include the cost for compensation to customers relating to a Commerce Commission action on disclosure of optional issuer fees (-NZD10 million) and income recognised as a result of the MasterCard Initial Public Offer (+NZD5 million).

Total revenue included additional net integration revenue synergies of NZD24 million, whilst total costs included additional net cost synergies of NZD10 million.

Key influences on the result include the following:

Net interest income increased 8%. Lending volumes increased 13% driven by double-digit growth in ANZ Retail (15%), The National Bank Retail (10%), Corporate & Commercial Banking (20%) and Rural (16%). This was partly offset by a reduction of 7% in UDC due to fierce competition and sales force restructuring. Deposit volumes increased 5%, with strong growth in Corporate & Commercial Banking (19%), ANZ Retail (11%), The National Bank Retail (7%) and Rural Banking (2%). Treasury deposits reduced by 29% offset by the growth in other external liabilities driven by a shift to longer term wholesale funding. Net interest margin reduced by 21 basis points, driven by competition and product mix changes; the mix factors included customer migration from variable rate to fixed rate mortgages, increased requirement for wholesale funding, and growth in lower margin at call products (including ANZ On-line Call) and term deposit products. ANZ Retail net interest margin reduced by 22 basis points, The National Bank Retail by 18 basis points and NZ Institutional Continuing Businesses by 14 basis points. These declines occurred primarily in the first half.

Other external operating income increased 6% largely due to the strong result in New Zealand Institutional Continuing (15%), mainly from the Markets business. Other income in The National Bank Retail increased by 21%, with growth across lending, card and transactional fees as well as commission income. UDC other income reduced 83%, with performance impacted by the transition to a restructured sales team and strong competitive pressures, and the 2005 result including a one-off benefit from an accounting policy change.

Operating expenses increased 6%. Increases in frontline and customer support staff, salary increases, the cost of the Commerce Commission settlement (NZD10 million), and the cost of operating domestic systems in New Zealand (NZD10 million) were partly offset by a 6% reduction in support staff, and control of discretionary expenditure.

Provision for credit impairment decreased by NZD137 million. This was driven by both lower collective and individual provision charges, following a combination of increased lending volumes being offset by individual provisions raised for corporate accounts and exposures to the apple and pear export industry in 2005, an improved credit risk profile (an increased proportion of low risk residential and rural lending) and collective provisions raised in 2005 for portfolio deterioration in segments identified as being most vulnerable to higher oil prices. Net non-performing loans reduced NZD36 million (28%) with credit conditions remaining generally benign.

Comparison with March 2006 half

Profit after tax increased 4%, with growth in ANZ Retail (9%), The National Bank Retail (8%), Rural Banking (9%), and Corporate Banking (18%). This was partially offset by a reduction in NZ Institutional Continuing Businesses (-7%) with the strong first half performance from the Markets business not matched in the second half.

Net interest income increased 9%. Lending volumes increased 5%, with good growth in all businesses apart from UDC, and NZ Institutional Continuing Businesses which were impacted by repayments. Deposits grew 2% with strong growth in ANZ Retail, The National Bank Retail and Rural Banking, offset by a reduction in Treasury of 12%. The level of interest margin decline has moderated in all businesses, and in NZ Institutional Continuing Businesses margins improved. This was due to a sharp decline in exchange rates during the March half which resulted in an additional NZD32 million interest income being earned on swap transactions in the September half, however, trading losses offset the interest income.

Other operating income reduced 13%, mainly driven by NZ Institutional Continuing Businesses, with the exceptional Markets performance in the first half not matched. Other income in The National Bank Retail increased 9%, with growth across lending, cards and transactional fees. Fee income in other businesses was constrained by competitive pressures.

Operating expenses increased 2% with salary and rental increases offset by control of discretionary expenditure and with the NZD10 million cost associated with the Commerce Commission settlement impacting the

March 2006 half result.

Provision for credit impairment decreased NZD10 million. The individual provision charge reduced NZD16 million largely reflecting provisioning for an isolated loss in the March 2006 half, and the collective provision charge increased by NZD6 million. Net non-performing loans reduced 22%.

(2) Credit impairment expense

ING New Zealand joint venture

In September 2005 ANZ National Bank Limited entered into a joint venture with ING Insurance International Limited (INGII). The joint venture, ING (NZ) Holdings Ltd (INGNZ), is 49% owned by ANZ National Bank Limited and 51% owned by INGII.

For 2006 full year, INGNZ contributed NZD22 million in equity accounted earnings (2005 full year: NZD29 million (prior to the establishment of the joint venture, this was reported between INGA and NZ Businesses); Sep 2006 half: NZD10 million; Mar 2006 half: NZD12 million). The September 2006 half contribution was marginally down on the March half due to a one-off compensation payment for the cancellation of a property management contract. INGNZ is reported as part of Central Support within the New Zealand Businesses.

(1) INGA, PT Panin, Metrobank Card Corporation and Tianjin City Commercial Bank are equity accounted. Indonesia Cards and ANZ Royal are controlled entities

(2) Other comprises Private Bank and Support Units

2006 result

Profit after tax decreased 4%. Strong underlying performance in the Cards and Private Bank businesses were offset by lower equity accounted earnings for PT Panin Bank and the expiration of transitional tax relief and lower capital investment earnings in INGA. The impact of exchange rate movements was immaterial. The INGA result is further explained on pages 47 to 49. Significant influences on the result were:

Net interest income increased 18% (\$11 million), driven by strong volume growth in Indonesia Cards and the first full year of operations in Cambodia.

Other external operating income increased 7% (\$12 million).

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Cards other income increased \$12 million. A 37% increase in cards issued drove fee income up 62% in Indonesia Cards and contributed to significant growth in Metrobank equity accounted income. New partnerships increased income by \$7 million driven by equity accounted income from Tianjin City Commercial Bank, and the first full year of operations in Cambodia with deposit volumes well ahead of expectations. ANZ Private Bank other income increased 41% reflecting the impact of cross sell initiatives. INGA income increased \$4 million with a 12% increase in operating profit partly offset by the impacts of the expiration of transitional tax relief in 2005 and lower capital investment earnings net of the capital investment hedge.

These increases were partially offset by a \$15 million reduction in equity accounted income from PT Panin, reflecting the difficult economic conditions during the latter part of 2005 and reduced bond sales.

Operating expenses increased 24% as a result of the first full year of operations in Cambodia, increased business activity in the Cards business in Indonesia and ongoing investment across the Private Bank and International Partnership businesses. Net inter business unit expenses include a credit for inter business unit commission revenue generated by Private Bank which was up 20% for the year primarily due to increased Mortgage commissions (up 25%), consumer deposit commissions (up 23%) and margin lending commissions (up 26%).

Provision for credit impairment increased \$8 million largely due to regulatory changes in Indonesia impacting the cards portfolio.

Income tax expense increased \$10 million mainly due to the impact of the tax benefit from capital investment hedges in respect of INGA in 2005. ANZ ceased hedging INGA's capital investment earnings from 1 October 2005.

Comparison with March 2006 half

Profit after tax increased 17%. Net interest income increased \$7 million (21%) primarily due to volume growth in Indonesia Cards. Other operating income increased \$16 million (18%) due to increased INGA equity accounted income reflecting higher funds under management, equity accounted income from the new Tianjin City Commercial Bank partnership and increased fee and other income from cards volume growth in Indonesia and the Philippines. Operating expenses were flat reflecting absorption of cost increases despite continued investment in the second half. Provision for credit impairment increased \$7 million due to the impact of regulatory changes in Indonesia.

ING Australia performance

The results in the table below show the performance of INGA on a fully comparable AIFRS basis, other than the full year to September 2005 which adopts AIFRS from 1 January 2005 (i.e. commencement of INGA's financial year). In addition, the results have been restated to exclude net profits from the New Zealand business that INGA sold in September 2005, which are included in New Zealand Businesses.

(1) *Gains or losses arising from a change in valuation methods and best estimate assumptions*

(2) *Remediation expenses represent costs incurred in rectifying historical unit pricing errors and fully compensating customers*

(3) *Transitional tax relief for life insurance companies discontinued with effect from 1 July 2005*

(4) *On 30 September 2005 ING Australia sold its New Zealand based businesses to a joint venture between ING Group and ANZ National Bank (further details are contained on page 44). As a result, prior period profits relating to the sold operations (Sep 2005: \$4 million; Mar 2005: \$4 million) are now reflected in the ING NZ joint venture*

(5) *In 2005, ANZ partially hedged against volatility in this income stream and, as a result, gains in capital investment earnings were partially offset by hedge losses. ANZ ceased hedging capital investment earnings from 1 October 2005*

(6) *ANZ adopts the equity method of accounting for its 49% interest in INGA. The carrying value of the investment in INGA has been tested for impairment by comparing the carrying value with the recoverable amount of INGA. The Group engaged Ernst & Young ABC Limited (EY ABC) to provide an independent valuation of INGA for 31 March 2006 assessment purposes (the recoverable amount), and there has been no evidence of subsequent impairment. The independent economic valuation was based on a discounted cash flow approach, with allowance for the cost of capital. Based on the results of this valuation, no change is required to the carrying value of the investment in INGA*

(7) *Value of new business represents the present value of future profits arising from the new business written over the periods less the present value of the cost of capital applying to that new business. Consistent value factors are applied across all reporting periods*

(8) *Cost to Income ratio is management expenses (excluding Remediation Expenses) / Total Income*

(9) *Other Flows includes investment income net of taxes, fees and charges (and the acquisition of Oasis)*

Partnerships & Private Bank

Bob Edgar

2006 result

Highlights of the year included the successful launch and subsequent strong sales of INGA's new retail risk product OneCare and improvements in sales and retention of retail and mezzanine funds under management. The increased inflows occurred mainly in INGA's flagship platform product OneAnswer. INGA also acquired majority ownership of Oasis Asset Management, a rapidly growing provider of badged platform products to non-aligned advisers, with effect from 1 May 2006. The acquisition serves to strengthen INGA's position in the open market.

Substantial progress was made in resolving remediation issues. This work is well advanced.

INGA continues to hold strong market shares in its chosen segments. Net flows growth within the Personal Investments business has outpaced the market with a 96% uplift in the year to June 2006 compared with industry growth of 36%. The Employer Super business maintained its #3 ranking for inflows and market share (13%) within the small-medium enterprises masterfund segment. The success of OneCare has translated into increased market share in individual life risk new annual premiums, from 8.3% in 2005 to 13.4% in the year to June 2006. INGA enjoyed the highest growth in new annual premium among the major institutions in the industry. (*Source of market statistics: Plan For Life*)

A core component of INGA's strategy has been to grow the number of aligned advisers. Following the acquisition of the Synergy dealer group in October 2005 and continued organic growth in the aligned dealer groups in 2006, the total number of INGA aligned advisers has grown to 1,145. This represents a year-on-year increase of 142 planners, of which ANZ financial planners contributed 47. INGA ranks 4th in the industry for adviser numbers, with the largest growth amongst the major institutions.

Profit after tax was 19% lower due to lower capital investment earnings. Operating profit after tax increased by 12% on 2005. Significant influences included:

Funds management income increased by 21% based on higher average funds under management underpinned by strong investment markets, and improved net flows in both personal investments and employer super businesses. This increase was achieved in an environment of increasing pressure on margins. The Oasis acquisition added \$11 million of funds management income in the half year to 30 September.

Risk income was 6% higher than full year 2005, driven by strong growth in premium income in both term life and consumer credit, together with continued favourable mortality and morbidity experience profits.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Funds management expenses increased by 15% mainly due to higher spend on customer service and five months of Oasis expenses. Life risk expenses increased due to costs incurred in developing the new OneCare product and higher nondeferrable acquisitions costs due to the significantly higher sales volume in 2006. Remediation expenses are at similar levels to the previous year and are not expected to continue beyond the end of the calendar year.

Tax on operating profit (including transitional tax relief) increased 11% due to profit growth and the impact of the loss of transitional tax relief for life companies from 1 July 2005, offset by favourable one-off tax treatments in the March 2006 half year.

Capital investment earnings after tax were lower than the previous year due to:

the recognition of held-for-trading investment returns, and margin on service (MOS) actuarial reserving treatment for the quarter ended 31 December 2004 (IFRS was adopted from 1 January 2005),

a \$500 million capital repayment to shareholders made on 31 December 2004, resulting in lower average capital invested in 2006, and

lower average yields across various asset classes in which shareholder capital is invested.

Note: the 2005 comparative figures have been compiled on an AGAAP basis for the first 3 months and an AIFRS basis for the last 9 months. This was due to AASB 1 which required ANZ to commence reporting AIFRS numbers from the joint venture's transition date of 1 January 2005. The impact of this is that the 2005 NPAT result is boosted by \$13 million of unrealised investment earnings that would not be recognised under AIFRS accounting.

The balance of unrealised gains on available for sale securities at 30 September 2006 was \$13.3 million (30 September 2005: \$13.0 million).

Comparison with March 2006 half

Profit after tax was 9% higher than the half year to 31 March 2006.

Operating profit after tax was 11% higher, influenced by:

Strong growth in funds management income +14% based on higher average funds under management, improved net flows, and the acquisition of Oasis Asset Management.

Higher risk income from in-force premium growth, more than offset by the non-recurrence of assumption changes made in the March half.

Flat funds management and life risk expenses, and reduced spending on remediation in the September half as expected.

Higher tax due to higher taxable operating profit, and the non-recurrence of tax adjustments booked in the March half.

Capital investment earnings were 4% higher due to marginally higher yields on equities.

The balance of unrealised gains on available for sale securities at 30 September 2006 was \$13.3 million (31 March 2006: \$26.3 million).

(1) *Non-continuing businesses comprises the London headquartered project finance business, the run-off of New Zealand conduit transactions and certain structured finance transactions that ANZ has exited as part of its de-risking strategy*

2006 result

Profit after tax reduced by \$88 million (70%). During the year good progress was made in reducing the volume of structured loans in the discontinued book, which reduced by \$1.1 billion to \$513 million. The credit quality on the remaining business is sound. Significant factors affecting the results were:

Net interest income reduced by \$50 million reflecting a 76% (\$2.6 billion) reduction in average lending volumes from \$3.4 billion in 2005 to \$0.8 billion in 2006.

Other operating income of \$14 million largely represents a \$12 million release of provisions created on the sale of the London headquartered project finance business following the settlement of sale warranties provided to Standard Chartered Bank and a \$4 million gain on sale of power assets.

Operating expenses reduced by \$19 million, with the remaining expenses being legal and restructuring costs associated with the legacy balances in the London headquartered project finance business.

The benefit from the provision for credit impairment arises from the run-off of legacy assets, releasing collective provisions, and recoveries. The reduction in this benefit reflects a lower volume of run-off in 2006.

Comparison with March 2006 half

Profit after tax reduced by \$22 million (73%). Operating income reduced by \$32 million, with reduced net interest income resulting from a \$0.3 billion reduction in lending volumes. Other operating income of \$18 million in the first half was largely from the release of provisions created on the sale of the London headquartered project finance business. Operating expenses increased by \$3 million. The benefit from the provision for credit impairment increased a further \$6 million, reflecting a \$4 million recovery on an individual provision together with the release of collective provisions as legacy assets run off.

2006 result

The result for the Group Centre was a \$45 million profit compared with a loss of \$34 million in 2005. Significant influences on the result were:

Operating income increased by \$88 million, primarily due to a \$58 million increase in income on contracts put in place to hedge NZD and USD denominated earnings. These gains are largely offset in the translation of the results of New Zealand Banking. Operating income also increased due to \$38 million of additional interest received on tax refunds. This was partially offset by lower benefits from USD capital hedges and other sundry income.

Operating expenses reduced by \$29 million mainly due to reductions in non-incremental New Zealand integration costs, other project costs and lower non-lending losses. The increase in employee numbers is largely driven by the transitional impact of offshoring technology and back office work to India.

The higher effective tax rate in 2006 resulted primarily from allowance for withholding tax payable on future remittances from offshore operations.

Comparison with March 2006 half

The half year profit of \$33 million was \$21 million higher than in the March 2006 half. Revenue increased by \$64 million primarily from increases by \$52 million in income on contracts put in place to hedge NZD denominated earnings and by \$15 million in additional interest received on tax refunds. Operating expenses increased by \$16 million largely due to timing of Technology costs. The higher effective tax rate in the September 2006 half resulted primarily from allowance for withholding tax payable on future remittances from offshore operations in the second half.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing

readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$31 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$34 million after tax (2005 full year: \$31 million; Sep 2006 half: \$21 million; Mar 2006 half: \$13 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$15 million (2005 full year: \$13 million; Sep 2006 half: \$10 million; Mar 2006 half: \$5 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives in the 2006 year not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (refer page 14)

In 2006 ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (2005 full year: \$52 million; Sep 2006 half: nil; Mar 2006 half: \$26 million). Tax on ANZ National Bank incremental integration costs is \$13 million (2005 full year: \$26 million; Sep 2006 half: nil; Mar 2006 half: \$13 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$63 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter as a significant item. ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$32 million after tax (2005 full year: \$31 million; Sep 2006 half: \$23 million; Mar 2006 half: \$9 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$14 million (2005 full year: \$13 million; Sep 2006 half: \$11 million; Mar 2006 half: \$3 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives in the 2006 year not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance

2006 result

Profit after tax increased by 16%. Cash profit also increased 16% (refer pages 13 to 15 for an explanation of non-core items and AIFRS adjustments). Significant influences on cash profit were:

Net interest income increased by 12%. Average net advances increased 11%, driven by growth in Consumer Finance 21%, Rural Commercial & Agribusiness Products 15%, Mortgages 12%, Business Banking 13%, Corporate Banking 10% and Debt Product Group 8%. Average deposit and other borrowing volumes increased 12% driven by Rural Commercial & Agribusiness Products 13%, Esanda 12%, Banking Products 11%, Corporate Banking 12%, Business Banking 11% and Group Treasury 24%. Net interest margin decreased 5 basis points with a change in the asset mix, increased volumes of wholesale funding and competitive pressures in the lending books of Mortgages, Consumer Finance, Debt Products Group, Business Banking and Corporate Banking, partly offset by higher earnings from foreign exchange revenue hedging, +3 basis points or \$58 million, interest received on tax refunds from the ATO and release of revenue related to prior years in Trade and Transaction Services.

Other operating income increased by 9%. Personal increased 8% due to volume growth initiatives in Consumer Finance, higher transaction volumes in Banking Products and higher sales from financial planners in Investment and Insurance Products. Institutional increased 9% due to increased volumes in Trade and Transaction Services, higher deal fees in Corporate and Structured Financing and higher Markets earnings with increased activity and positioning to take advantage of interest rate and currency volatility. In addition the 2005 year included a \$32 million cost from the hedging of capital investment earnings in INGA which ceased in October 2005.

Operating expenses increased by 8% reflecting an increased investment in frontline staff with a 4% increase in personnel numbers, the footprint expansion in Personal through the addition of 25 more branches and a further 330 ATMs, annual salary increases, and investment in new IT platforms in Markets and Transactional Services businesses.

Provision for credit impairment decreased by 9% (\$40 million). This was driven by a combination of increased lending volumes, moderately higher risk in credit cards and an increase in Institutional, due to two accounts downgraded in the March 2006 half, partly offset by recoveries in the non-continuing businesses, being offset by an improved credit risk profile in most portfolios and collective provisions raised in 2005 for expected portfolio deterioration in segments identified as being most vulnerable to higher oil prices.

Comparison with March 2006 half

Profit after tax increased 8%. After adjusting for the impact of non-core items and AIFRS 2005 adjustments (refer pages 13 to 15), cash profit increased 15%.

Net interest income increased 8% as average net advances increased 6% and average deposits and other borrowings increased 8% and net interest margin increased 2 basis points. Higher earnings from foreign exchange revenue hedging contributed +5 basis points or \$52 million. Market's net interest income increased \$22 million due to a reduction in funding costs associated with unrealised trading gains resulting in a higher proportion of revenue being booked as interest, offset in Other income.

Other income increased 15%. Personal increased 20%, due to strong volume and fee growth across all businesses and Institutional increased 12%, due to solid deal flow in Corporate and Structured Financing and higher Markets revenue from sales.

Operating expenses increased 8% reflecting the 3% increase in staff numbers, higher marketing spend, the ongoing investment in the branch network and the timing impact of higher software maintenance fees in the second half and re-assessment of software projects in Mortgages.

Provision for credit impairment decreased 11% as the individual provision charge decreased \$28 million, due to ongoing debt recoveries and no large new provisions in Institutional, partly offset by higher provisions in Personal due to increased volumes and seasonality in Consumer Finance.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of NZD27 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In 2006 ANZ has classified the NZD\$16 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In 2006 ANZ has incurred NZD29 million after tax ANZ National Bank incremental integration costs (2005 full year: NZD56 million; Sep 2006 half: \$nil; Mar 2006 half: NZD29 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base following completion of the integration

2006 result

Profit after tax in NZD increased by 26% (NZD197 million) after adjusting for the impact of AIFRS and non-core items (refer page 15). The result was assisted by a NZD137 million (NZD92 million after tax) reduction in the credit impairment charge. Profit before credit impairment and income tax increased 15% after adjusting for the impact of AIFRS 2005 adjustments and non-core items. Overall, the business is displaying promising momentum, and has achieved robust credit growth, maintained good credit quality, and the level of interest margin decline has moderated.

Key influences on cash profit include:

Net interest income increased 11% (NZD199 million) including an additional NZD76 million resulting from the issue of preference share capital in September 2005 to repay intercompany debt as a result of amendments to New Zealand thin capitalisation rules. Lending volumes increased 12% with growth robust across all businesses, except for a reduction in UDC (impacted by intense competition and sales force restructuring), and the roll off in discontinuing businesses. Net interest margins declined 11 basis points mainly driven by competition and product mix impacts (customer migration from variable rate to fixed rate mortgages, the increasing requirement for wholesale funding, and growth in lower margin products). This was partly offset by the benefit of the additional preference share capital (equivalent of 9 basis points).

Other external operating income increased 7% largely due to the strong result in Institutional (15%) mainly from the Markets business, as well as income resulting from the MasterCard Initial Public Offer (NZD5 million). The National Bank Retail increased by 21%, with growth across lending, card and transactional fees as well as commission income.

Operating expenses increased 4%. Increases in frontline and customer support staff numbers, salary increases, the cost of the Commerce Commission settlement (NZD10 million), and the cost of operating domestic systems in New Zealand (NZD10 million) were partly offset by a 6% reduction in the number of support staff, control of discretionary expenditure, and lower non-incremental integration costs with the project completed during the year.

Provision for credit impairment decreased by NZD137 million. This was driven by both lower collective and individual provision charges, following a combination of increased lending volumes being offset by individual provisions raised for corporate accounts and exposures to the apple and pear export industry in 2005, an improved credit risk profile (an increased proportion of low risk residential and rural lending) and collective provisions raised in 2005 for portfolio deterioration in segments identified as being most vulnerable to higher oil prices.

The effective tax rate increased, largely due to the run off of structured finance deals.

Comparison with March 2006 half

Profit after tax in NZD increased by 6%. After adjusting for the impact of AIFRS and non-core items (refer pages 13 to 15), cash profit increased 3%. The following explanations exclude the impact of non-core items:

Net interest income increased 9%. Lending volumes increased 6%, with good growth across all businesses apart from UDC and Institutional. Deposits grew 2%. The level of net interest margin decline has moderated in all businesses, except in NZ Institutional Continuing Businesses where the margin has improved due to a sharp decline in exchange rates during the March half which resulted in an additional NZD32 million interest income being earned on swap transactions in the September half, however, trading losses offset the interest income.

Other operating income reduced 13%, mainly driven by NZ Institutional Continuing Businesses, with the exceptional Markets performance in the first half not matched. Other income in The National Bank Retail increased 9%, with growth across lending, cards and transactional fees. Fee income in other businesses was constrained by competitive pressures.

Operating expenses remained flat. Salary and rental increases were offset by lower non-incremental integration costs with the project completing during March 2006. The first half result was also impacted by the cost of the Commerce Commission settlement.

Provision for credit impairment decreased by NZD9 million. The individual provision charge reduced NZD16 million largely reflecting provisioning for an isolated loss in the March 2006 half, and the collective provision credit

reduced by NZD7 million. Net non-performing loans reduced 22%.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$11 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

2006 result

Profit after tax increased 32%. After adjusting for AIFRS 2005 adjustments (refer page 15) profit after tax increased by 18%. The depreciation of the AUD increased profit growth by 2% (\$2 million). After adjusting for non-core items and exchange rate movements:

Net interest income increased 37% reflecting improved Treasury performance in Singapore, Card volumes in Indonesia, improved deposit margins, particularly in Vietnam, and the first full year of operations in Cambodia. Loan and deposit volumes also grew across the region, reflective of increased economic activity.

Other external operating income increased 10% due to higher Cards volumes in Indonesia, higher foreign exchange revenue, increased equity accounted income from Metrobank Card Corporation and Tianjin City Commercial Bank, offset by reduced Equity accounted income in PT Panin Bank.

Operating expenses increased 17% as a result of costs associated with building partner relationships in Indonesia, China and Vietnam, the first full year of operating costs in Cambodia and new product specialists in Asia.

Provision for credit impairment increased by \$13 million. The individual provision charge increased largely due to Singapore and Indonesia, offset by write-backs in Hong Kong and Philippines.

Income tax expense increase reflects increased profit and the impact of reduced equity accounted income from PT Panin Bank.

Comparison with March 2006 half

Profit after tax increased 27%. Operating income increased 18% with strong deposit volume growth in Hong Kong and Indonesia, higher Metrobank Card Corporation Inc equity accounted income from growth in card volumes and higher equity accounted earnings from the new partnership with Tianjin City Commercial Bank. Operating expenses increased by 4% as investments were made to progress partnerships in Indonesia, China and Vietnam, together with the addition of specialist product skills. The impact of exchange rate movements was immaterial.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$6 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

2006 result

Profit after tax increased 26%. After adjusting for AIFRS 2005 adjustments (refer page 15) profit after tax increased by 35%. The depreciation of the AUD increased profit growth by 2% (\$2 million). After adjusting for non-core items and exchange rate movements:

Net interest increased 23% reflecting growth in lending volumes in Fiji, Samoa and PNG.

Other external operating income increased 7% due to growth in lending volumes in Fiji, Samoa, PNG and Vanuatu and higher foreign exchange revenue.

Operating expenses increased 13% predominantly due to investment in our Operational Excellence agenda and expansion of footprint.

Provision for credit impairment decreased by \$17 million predominantly due to the writeback of two individual provisions in Fiji.

Income tax expense increase reflects increased profit.

Comparison with March 2006 half

Profit after tax increased 5%. Operating income increased 4% with strong lending and increased fee income. Operating expenses increased by 3%. The impact of exchange rate movements was immaterial.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$52 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability.

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$2 million after tax (2005 full year: \$nil; Sep 2006 half: \$2 million loss; Mar 2006 half: \$4 million profit) relating to economic hedging as a non-core item. Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives not designated in accounting hedge relationships but that are considered to be economic hedges. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance.

2006 result

Profit after tax decreased 10%. Cash profit reduced 35%. The impact of exchange rates was immaterial. Significant influences on the core result were:

Net interest income decreased 38% mainly due to reduced earnings on capital of \$70 million following a change in the New Zealand funding structure resulting in repayment of intra-group debt and a reduction in the non-continuing business in the United States.

Other operating income increased 5% due largely to the profit on the sale of a power asset in the United States and the settlement of warranties on the sale of the London headquartered project and structured finance business offset by lower foreign exchange earnings and fees.

Operating expenses increased 3%. The rise in staff numbers is attributable to increases in operations and technology staff in India, however these costs were charged to other businesses.

The credit in the Provision for credit impairment is due to the reduction in assets following the sale of the project and structured finance business, lower risk in the continuing business and debt recoveries. The credit in the individual provisions charge reduced mainly as a result of lower recoveries in the 2006 financial year. Net non-performing loans reduced due to the realisation of a power exposure in the United States.

Comparison with March 2006 half

Profit after tax decreased 41%. Cash profit decreased 35%. Net interest income increased by 19% due largely to the lower funding cost of derivative positions in Markets, which is offset by a reduction in other income. Other operating income was further impacted by the profit on the sale of a power asset in the United States and the settlement of sale warranties occurring in the March 2006 half year, lower foreign exchange earnings and mark to market losses on credit derivatives. Operating expenses increased 22% mainly due to higher premises and intra-group costs in London and higher costs in India. The increase in the credit to collective provisions is due to improved credit quality, reduction in customer limits and recovery of bad debts previously provided for.

(1) ANZ has calculated the 2005 result on an AIFRS basis that is comparable with 2006 (refer page 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. The impact is a reduction of \$31 million in 2005 net profit after tax. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

In 2006 ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million settlement of a dispute with Lloyds TSB over the accounting treatment of certain items in the completion accounts for the acquisition of National Bank of New Zealand Limited (tax on settlement: \$nil) as significant items. In 2005 ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

The Group enters into economic hedges to manage its interest rate and foreign exchange risk. In 2006 ANZ has classified \$34 million after tax (2005: \$31 million) relating to economic hedging as a non-core item (tax on hedge gains/losses \$15 million (2005: \$13 million)). Included in this non-core amount is ineffectiveness arising from designated accounting hedges, any volatility arising from usage of the fair value option and approved classes of derivatives not designated in accounting hedge relationships but that are considered to be economic hedges. The 2005 year numbers do not include any adjustment to retrospectively calculate the AIFRS impact on the derivatives associated with the Group's funding. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (refer page 14)

In 2006 ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (2005: \$52 million; 2004: \$14 million). Tax on ANZ National Bank incremental integration costs is \$13 million (2005: \$26 million; 2004: \$7 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration

- (2) Average ordinary shareholders' equity excludes minority interest*

- (3) Operating expenses excludes goodwill amortisation of \$nil (2005: \$nil; 2004: \$146 million; 2003: \$18 million; 2002: \$20 million). Under AIFRS goodwill is not amortised and therefore was not recognised from 2005 onwards*

- (4) September 2003 and prior periods adjusted for the bonus element of the rights issue*

- (5) Excludes employees whose only ANZ shares are held in trust under ANZ employee share schemes*

NOTES TO FINANCIAL INFORMATION

1. Significant Accounting Policies

(i) Basis of preparation

These consolidated financial statements comprise a general purpose financial report and:

should be read in conjunction with the ANZ Financial Report and the ANZ Concise Annual Report for the year ended 30 September 2006 and any public announcements made by the Parent entity and its controlled entities (the Group) for the year ended 30 September 2006 in accordance with the continuous disclosure obligations under the Corporations Act 2001 (as amended) and the ASX Listing Rules;

are presented in Australian dollars in accordance with class order 98/100 dated 10 July 1998 (millions, except where stated otherwise);

comply with the accounts provisions of the Banking Act 1959, applicable Australian Accounting Standards, the Corporations Act 2001 (as amended), the Corporations Regulations 2001 and other authoritative pronouncements of the Australian Accounting Standards Board (AASB);

do not include all notes of the type normally included in the annual financial report; and

have been prepared in accordance with the historical cost convention except that the following assets and liabilities are stated at their fair value: derivative financial instruments including the fair value of any applicable underlying exposure, assets treated as available-for-sale, financial instruments held for trading, term funding instruments including specific bonds and notes, and defined benefit plans assets and liabilities.

The preparation of the financial report requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. Actual results may differ from these estimates. Such estimates may require review in future periods.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

International Financial Reporting Standards (IFRS) form the basis of Australian Accounting Standards issued by the AASB, being Australian equivalents to IFRS (AIFRS). The Group revised its accounting policies effective 1 October 2004 to enable the preparation of financial statements that comply with AIFRS. This is the Group's first consolidated financial report prepared in accordance with AIFRS and AASB 1: First-time Adoption of Australian Equivalents to International Financial Reporting Standards has been applied in preparing these financial statements. An explanation of how the transition from superseded policies to AIFRS has impacted the Group's reported financial position, financial performance and cash flow, is set out on the Group's website (www.anz.com) and in the Consolidated Financial Report and Dividend Announcement for the half year ended 31 March 2006.

The accounting policies have been consistently applied by all consolidated entities and to all periods presented in the consolidated financial report and the opening AIFRS balance sheet as at 1 October 2004, except for those policies relating to Standards for which comparatives are not restated, as permitted under the first time adoption transitional provisions. The Standards are AASB 132: Financial Instruments: Presentation and Disclosure, AASB 139: Financial Instruments: Recognition and Measurement, and AASB 4: Insurance Contracts.

The Group's key accounting policies that have been amended by the adoption of AIFRS follow.

(ii) Consolidation

The financial statements consolidate the financial statements of Australia and New Zealand Banking Group Limited (the Company) and all its subsidiaries where it is determined that there is a capacity to control. Control means the power directly or indirectly to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

On adoption of AIFRS certain special purpose entities in which the Group holds less than a majority of voting rights, were deemed to be controlled entities where:

in substance, the majority of the risks and rewards from their activities accrue to the Group; or

in substance, the Group controls their decision making powers so as to obtain the majority of the risks and rewards from their activities.

(iii) Interest income and interest expense

Interest income and interest expense are recognised in the income statement as they accrue using the effective interest method.

Fee income and directly related transaction costs relating to loan origination, financing or restructurings are deferred and amortised to interest income over the expected life of the loan using the effective interest method.

Loan commitment fees, together with related direct costs, are deferred and recognised as an adjustment to the interest yield on the loan once drawn or immediately to the income statement for expired commitments.

Fees and commissions payable to brokers in respect of originating lending business, where these are incremental costs directly related to the issue of a financial instrument, are included in interest income as part of the effective interest rate.

(iv) Fee and commission income

Unless included in the effective interest calculation (refer 1(iii)), fees and commissions are brought to account on an accrual basis.

Fees and commissions that relate to the execution of a significant act (for example, advisory or arrangement services, placement fees and underwriting fees) are recognised when the significant act has been completed.

Fees charged for providing ongoing services (for example, maintaining and administering existing facilities) are recognised as income over the period the service is provided.

(v) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. At the Group level, this generally arises in the following circumstances:

where transaction costs, which are an integral part of the effective interest rate of a financial instrument measured at amortised cost, are offset against the interest income generated by the financial instrument;

where gains and losses relating to fair value hedges are assessed as being effective;

where gains and losses from a group of similar transactions are reported on a net basis, such as foreign exchange gains and losses;

where amounts are collected on behalf of third parties, where the Group is acting as an agent; or

where costs are incurred on behalf of customers and the Group is reimbursed.

(vi) Derivative financial instruments

Derivative financial instruments are contracts whose value is derived from one or more underlying price, index or other variable.

Derivative financial instruments including swaps, forward rate agreements, futures, options and combinations of these instruments are entered into by the Group for trading purposes, including customer-related reasons, or for hedging purposes where the derivative instruments are used to hedge the Group's exposures to interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions.

Derivative financial instruments are recognised initially at fair value with gains or losses from subsequent remeasurement at fair value being recognised in the income statement. Where the derivative is designated and effective as a hedging instrument, the timing of the recognition of any resultant gain or loss in the income statement is dependent on the hedging designation. These hedging designations and associated accounting treatments are as follows:

Fair value hedge

Where the Group hedges the fair value of a recognised asset or liability or firm commitment, changes in the fair value of derivatives designated as a fair value hedge are recognised in the income statement. Changes in the fair value of the hedged item attributable to the hedged risk are reflected as adjustments to the carrying value of the hedged items, which are also recognised in the income statement. Hedge accounting is discontinued when the hedge instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. The resulting adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to the income statement over the period to maturity. If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

Cash flow hedge

The Group designates derivatives as cash flow hedges where the instrument hedges the variability in cash flows of a recognised asset or liability, a foreign exchange component of a firm commitment or a highly probable forecast transaction. The effective portion of changes in the fair value of derivatives qualifying and designated as cash flow hedges is deferred to the cash flow hedging reserve which forms part of shareholders equity. Any ineffective portion is recognised immediately in the income statement. Amounts deferred in equity are recognised in the income statement in the period during which the hedged forecast transactions take place.

When the hedge expires, is sold, terminated, exercised, or no longer qualifies for hedge accounting, the cumulative amount deferred in equity remains in the cash flow hedging reserve, and is subsequently transferred to the income statement when the hedged item is recognised in the income statement.

When a forecast transaction is no longer expected to occur, the amount deferred in equity is recognised immediately in the income statement.

Net investment hedge

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. The gain or loss from remeasuring the fair value of the hedging instrument relating to the effective portion of the hedge is deferred in equity and the ineffective portion is recognised immediately in the income statement. Amounts deferred in the foreign currency translation reserve are recognised in the income statement on disposal of the foreign operation.

All gains and losses from changes in the fair value of derivatives, that are not designated in a hedging relationship but are entered into to manage the interest rate and foreign exchange risk of funding instruments, are recognised in the income statement. Under certain circumstances, the component of the fair value change in the derivative which relates to current period realised and unrealised interest, is included in net interest income. The remainder of the fair value movement is included in other income.

Derivatives embedded in financial instruments or other host contracts are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contracts, and the host contracts are not measured at fair value. The embedded derivative is reported at fair value with changes in fair value immediately recognised in the income statement.

(vii) **Trading Securities and other financial assets at fair value through profit or loss**

Trading securities and other financial instruments acquired principally for the purpose of selling in the short-term or which are part of a portfolio which is managed for short-term profit-taking are recognised in the balance sheet at their fair value. Additionally, this valuation basis is used as an alternative to hedge accounting for financial instruments where certain conditions are met. It is not used for illiquid instruments or those for which the demonstrated variability in the range of fair value estimates is other than low.

Changes in the fair value (gains or losses) of financial instruments are recognised in the income statement in the period in which they occur.

(viii) Available-for-sale assets

Available-for-sale assets comprise non-derivative financial assets which the Group designates as available-for-sale but which are not deemed to be held principally for trading purposes, and include equity investments, certain loans and advances and fixed term securities. They are initially recognised at fair value plus transaction costs. Subsequent gains or losses arising from changes in fair value are included as a separate component of equity, the available-for-sale revaluation reserve. When an available-for-sale asset is sold, the cumulative gain or loss relating to the asset is transferred from equity to the income statement.

Where there is objective evidence of impairment to an available-for-sale asset, the cumulative loss related to that asset is removed from equity and recognised in the income statement. If, in a subsequent period, the amount of an impairment loss relating to an available-for-sale debt instrument decreases and the decrease can be linked objectively to an event occurring after the impairment event, the loss is reversed through the income statement.

Premiums and discounts are included within the calculation of the fair value of the security. Interest income is accrued and dividend income is recognised when the right to receive payment is established.

Financial assets previously disclosed as investment securities are now predominantly treated as available-for-sale securities.

(ix) Impairment of loans and advances

Loans and advances are regularly reviewed for impairment.

Credit impairment provisions are raised for exposures, including off-balance sheet items such as commitments and guarantees, that are known to be impaired. Exposures are impaired and impairment losses incurred if there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the loan and prior to the reporting date, and that loss event or events has had a reliably estimable impact on the estimated future cash flows of the individual loan or the collective portfolio of loans.

Impairment is assessed firstly for assets that are individually significant (or on a portfolio basis for small value loans), and then on a collective basis for those exposures not individually known to be impaired.

For those exposures that are assessed collectively, these are placed in pools of similar assets with similar risk characteristics. The required provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data.

The estimated impairment loss is measured as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value. As this discount unwinds during the period between recognition of impairment and recovery of the written down amount, it is recognised in net interest income. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The provision for impairment loss (individual and collective), referred to as Provision for credit impairment, is deducted from loans and advances in the balance sheet and the movement in the provision for the reporting period is reflected in the income statement. When a loan is uncollectible, it is written-off against the related provision for loan impairment. Subsequent recoveries of amounts previously written off are taken to the income statement.

Where impairment losses recognised in previous periods are subsequently decreased or no longer exist, such impairments are reversed in the income statement.

(x) Goodwill and other intangible assets

Goodwill

Goodwill, representing the excess of the purchase consideration over the fair value of the identifiable net assets of a controlled entity at the date of gaining control, is recognised as an asset and not amortised, but assessed for impairment annually and whenever there is an indication that the goodwill may be impaired. Where the assessment results in the goodwill balance exceeding the value of expected future benefits the difference is charged to the income statement.

Any impairment of goodwill cannot be subsequently reversed.

Other intangible assets

Other intangible assets comprise costs incurred in acquiring and building computer software. Software is amortised using the straight-line method over its expected useful life to the Group. The period of amortisation is between 3 and 5 years except for branch front-end applications where 7 years is used. Costs incurred in planning or evaluating software proposals, or in maintaining systems after implementation, are not capitalised.

(xi) **Impairment of non-financial assets**

At each reporting date, the carrying amounts of non-financial assets are reviewed for impairment. If any such indication exists, the recoverable amount of the assets are estimated and compared against the existing carrying value. Where the existing carrying value exceeds the recoverable amount, the difference is charged to the income statement. If it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

A previously recognised impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

(xii) **Employee benefits**

Defined benefit superannuation schemes

The directors have elected under s334(5) of the Corporations Act 2001 to early adopt the December 2004 revision of Australian Accounting Standard AASB 119: Employee Benefits.

The Group operates a number of defined benefit schemes. The liability and expense related to providing benefits to employees under each defined benefit scheme are calculated by independent actuaries. Initially, a defined benefit liability is recognised to the extent that the present value of the defined benefit obligation of each scheme, calculated using the Projected Unit Credit Method, is greater than the fair value of each scheme's assets. Where this calculation results in a benefit to the Group, a defined benefit asset is recognised. In each subsequent reporting period, ongoing movements in the defined benefit liability or asset carrying value are treated as follows:

the net movement relating to the current period's service cost, interest cost, expected return on scheme assets, past service costs and other costs (such as the effects of any curtailments and settlements) is recognised as an employee expense in the income statement

movements relating to actuarial gains and losses are recognised directly in retained earnings

contributions incurred are recognised directly against the net defined benefit position.

Share-based compensation

The Group has various equity settled share-based compensation plans. These will be described in the notes to the 2006 Annual Financial Report and largely comprise the Employee Share Acquisition Plan and the ANZ Share Option Plan.

ANZ ordinary shares

The fair value of ANZ ordinary shares granted under the Employee Share Acquisition Plan is measured at grant date, using the one-day volume weighted average market price of ANZ shares. The fair value is expensed immediately when shares vest immediately or on a straight-line basis where shares vest over the period in which the employees become unconditionally entitled to the shares. This is recognised as an employee compensation expense with a corresponding increase in equity.

Share options

The fair value of share options is measured at grant date, using an option pricing model. The fair value is expensed on a straight-line basis over the relevant vesting period. This is recognised as an employee compensation expense with a corresponding increase in the share options reserve. The option pricing model takes into account the exercise price of the option, the risk free interest rate, the expected volatility of ANZ ordinary share price and other factors. Market vesting conditions are taken into account in estimating the fair value.

Performance rights

A Performance Right is a right to acquire a share at nil cost to the employee, subject to satisfactorily meeting time and performance hurdles. Upon exercise, each Performance Right entitles the holder to one ordinary share in ANZ. The fair value of Performance Rights is determined at grant date using an option pricing model, taking into account market conditions. The fair value is expensed over the relevant vesting period. This is recognised as an employee expense with a corresponding increase in equity.

Other adjustments

The amount recognised as an expense is adjusted to reflect the actual number of shares or share options that vest, except where forfeiture is only due to share prices not achieving the threshold for vesting.

(xiii) **Offsetting of assets and liabilities**

Assets and liabilities are offset and the net amount reported in the balance sheet only where:

there is a current enforceable legal right to offset the asset and liability, and

there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(xiv) **Income tax**

Income tax expense

Income tax on earnings for the period comprises current and deferred tax and is based on the applicable tax law in each jurisdiction. It is recognised in the income statement as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity, or where it arises from the initial accounting for a business combination, in which case it is included in the determination of goodwill.

Current tax

Current tax is the expected tax payable on taxable income for the period, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date, including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

Deferred tax

Deferred tax is accounted for using the comprehensive tax balance sheet liability method. It is generated by temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the reporting date. The measurement reflects the tax consequences that would follow from the manner in which the Group, at the reporting date, recovers or settles the carrying amount of its assets and liabilities.

Deferred tax liabilities are recognised for all taxable temporary differences, other than those in relation to taxable temporary differences arising from goodwill. Deferred tax liabilities are recognised for taxable temporary differences arising on investments in controlled entities, branches, associates and joint ventures, except where the Group is able to control the reversal of the temporary differences and it is probable that temporary differences will not reverse in the foreseeable future. Deferred tax assets associated with these interests are recognised only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and there will be sufficient taxable profits against which to utilise the benefits of the temporary difference.

Deferred tax assets, including those related to the tax effects of income tax losses and credits available to be carried forward, are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses and credits can be utilised.

Offsetting

Current and deferred tax assets and liabilities are offset only to the extent that they relate to income taxes imposed by the same taxation authority and there is a legal right and intention to settle on a net basis and it is allowed under the tax law of the relevant jurisdiction.

Diluted earnings per share (cents)	98.5	95.5	3%	194.0	164.4	18%

(1) The US Stapled Trust securities issued on 27 November 2003 mandatorily convert to ordinary shares in 2053 unless redeemed or bought back prior to that date. The US Stapled Trust Security issue can be de-stapled and the investor left with coupon paying preference shares at ANZ's discretion at any time, or at the investor's discretion under certain circumstances. AASB 133 requires that potential ordinary shares for which conversion to ordinary share capital is mandatory must be included in the calculation of diluted EPS. The inclusion of this issue in EPS increased the diluted number of shares by 54.8 million

(2) ANZ StEPS (issued on 23 September 2003) converts to either \$100 for each ANZ StEPS share or a number of ordinary shares calculated at the market price of ANZ ordinary shares less 2.5%. ANZ StEPS has been included for the first time in dilutive EPS in 2005 due to the adoption of AIFRS. The inclusion of this issue in EPS increased the diluted number of shares by 38.2 million

New Zealand	75	74	66	1%	14%
Overseas markets	18	15	33	20%	-45%
	499	428	381	17%	31%

(1) Includes unsecured credit card and personal loans 90 day past due accounts which are allowed by APRA to be retained on an accrual basis for up to 180 days past due amounting to \$64 million (Mar 2006: \$64 million; Sep 2005: \$51 million). The remainder of 90 day past due accounts are predominantly held on an accrual basis having been assessed as well secured, for example no loss of principal or interest is expected

In the event of customer default, any loan security is held as mortgagee in possession and therefore the Group does not hold any other real estate owned assets.

Subordinated notes	8,254	8,166	1%	8,254	7,300	13%
Total Loan Capital	11,126	11,121	0%	11,126	9,137	22%

(1) Loan capital of USD1.1 billion is subordinated in right of payment to the claims of depositors and all other creditors of the parent entity and its controlled entities which have issued the notes. Hybrid loan capital constitutes Tier 1 capital as defined by the Australian Prudential Regulation Authority for capital adequacy purposes

(2) ANZ StEPS securities are classified as Loan Capital instead of share capital under AIFRS financial reporting

(6) The hedging reserve represents hedging gains and losses recognised on the effective portion of cash flow hedges. The cumulative deferred gain or loss on the hedge is recognised in the profit or loss when the hedged transaction impacts profit or loss, consistent with the applicable accounting policy

(7) The transfer of balances from the general and capital reserves to retained earnings represent items of a distributable nature

(8) Comprises

Remeasurement of the carrying value of the Group's investment in INGA as at 1 October 2005

Adjustment in respect of hedging derivative financial instruments as at 1 October 2005

Recognition of the fair value of derivatives relating to securitisation and structured finance transactions as at 1 October 2005

Deferral of previously recognised fees now treated as an adjustment to yield on 1 October 2005

Restatement of credit loss provisions to an AIFRS basis

(9) ANZ has taken the option available under AASB 119 to recognise actuarial gains/losses on defined benefit superannuation plans directly in retained earnings

13. Contingent liabilities and contingent assets

Contingent liabilities

General

There are outstanding court proceedings, claims and possible claims against the Group, the aggregate amount of which cannot readily be quantified. Appropriate legal advice has been obtained and, in the light of such advice, provisions as deemed necessary have been made. In some instances we have not disclosed the estimated financial impact as this may prejudice the interests of the Group.

Sale of Grindlays businesses

On 31 July 2000, ANZ completed the sale to Standard Chartered Bank (SCB) of ANZ Grindlays Bank Limited and the private banking business of ANZ in the United Kingdom and Jersey, together with ANZ Grindlays (Jersey) Holdings Limited and its subsidiaries, for USD1.3 billion in cash. ANZ provided warranties and certain indemnities relating to those businesses and, where it was anticipated that payments would be likely under the warranties or indemnities, made provisions to cover the anticipated liability. The issues below have not impacted our reported results. All expected settlements and costs have been covered within the provisions established at the time. ANZ may be held liable in relation to the following:

FERA

In 1991 certain amounts were transferred from non-convertible Indian Rupee accounts maintained with Grindlays in India. These transactions may not have complied with the provisions of the Foreign Exchange Regulation Act, 1973. Grindlays, on its own initiative, brought these transactions to the attention of the Reserve Bank of India. The Indian authorities have served notices on Grindlays and certain of its officers in India that could lead to possible penalties. Criminal prosecutions have also been filed and, in the case of two former officers and the bank, commenced. These prosecutions are being defended.

Differential Cheques

In June 2003, Grindlays was successful in its appeal against orders to repay, with interest, two payments it received from a stockbroker in 1991 in connection with securities transactions. These orders had directed repayment of Indian Rupees 24 million (plus interest accruing at 24% since 1991). Since the appeal decision was handed down, no further action has been taken against Grindlays in relation to notices in respect of a further eleven payments received by it in 1991 in similar circumstances totalling Indian Rupees 225 million.

In addition, ANZ provided an indemnity relating to tax liabilities of Grindlays (and its subsidiaries) and the Jersey Sub-Group to the extent to which such liabilities were not provided for in the Grindlays accounts as at 31 July 2000. Claims have been made under this indemnity with no material impact on the Group expected.

Contingent tax liability

The Group in Australia was during 2005 subjected to client risk reviews by the Australian Taxation Office (ATO) across a broad spectrum of matters, as part of normal ATO procedures. The reviews mainly covered years up to 2003. Some matters listed by the ATO for further investigation remain outstanding.

The ATO is also reviewing the taxation treatment of certain other transactions, including legacy structured finance transactions, undertaken by the Group in the course of normal business activities.

The ATO's review of the sale of Grindlays in 2000 and of the transfer of the life and funds management businesses into the joint venture with ING Australia in 2002 was finalised during the year. The Inland Revenue Department (IRD) in New Zealand is reviewing a number of conduit-relieved structured finance transactions as part of normal revenue authority audit procedures. This is part of an industry-wide review by the IRD of these transactions undertaken in New Zealand. The IRD has issued Notices of Proposed Adjustment (the Notices) in respect of some of those structured finance transactions. The Notices are not tax assessments and do not establish a tax liability, but are the first step in a formal disputes process. In addition, some tax assessments relating to some of the transactions have been received. Should the same position be adopted by the IRD on the remaining transactions of that kind as reflected in the Notices and in the tax assessments received, the maximum potential tax liability would be approximately NZD469 million (including interest tax effected) for the period to 30 September 2006. Of that maximum potential liability, approximately NZD133 million is subject to tax indemnities provided by Lloyds TSB Bank PLC under the agreement by which ANZ acquired the National Bank of New Zealand and which relate to transactions undertaken by the National Bank of New Zealand before December 2003. All of these conduit-relieved transactions have now either matured or been terminated.

Additional general or issue-specific audits and other investigations are being undertaken by the New Zealand IRD, and by revenue authorities in the United States, the United Kingdom and in other jurisdictions as part of normal revenue authority activity in those countries.

The Company has assessed these and other taxation claims arising in Australia, New Zealand and elsewhere, including seeking independent advice where appropriate, and considers that it holds appropriate provisions.

Interbank Deposit Agreement

ANZ has entered into an Interbank Deposit Agreement with the major banks in the payments system. This agreement is a payment system support facility certified by the Australian Prudential Regulation Authority, where the terms are such that if any bank is experiencing liquidity problems, the other participants are required to deposit equal amounts of up to \$2 billion for a period of 30 days. At the end of 30 days the deposit holder has the option to repay the deposit in cash or by way of assignment of mortgages to the value of the deposit.

Clearing and Settlement Obligations

In accordance with the clearing and settlement arrangements set out:

in the Australian Payments Clearing Association Limited (APCA) Regulations for the Australian Paper Clearing System, the Bulk Electronic Clearing System, the Consumer Electronic Clearing System and the High Value Clearing System (HVCS), the Company has a commitment to rules which could result in a bilateral exposure and loss in the event of a failure to settle by a member institution; and

in the Austraclear System Regulations and the CLS Bank International Rules, the Company has a commitment to participate in loss-sharing arrangements in the event of a failure to settle by a member institution.

For both the APCA HVCS and Austraclear, the obligation arises only in limited circumstances.

Contingent asset matters

National Housing Bank

In 1992, Grindlays received a claim aggregating to approximately Indian Rupees 5.06 billion from the National Housing Bank (NHB) in India. The claim arose out of cheques drawn by NHB in favour of Grindlays, the proceeds of which were credited to the account of a Grindlays customer.

Grindlays won an arbitration award in March 1997, under which NHB paid Grindlays an award of Indian Rupees 9.12 billion. NHB subsequently won an appeal to the Special Court of Mumbai, after which Grindlays filed an appeal with the Supreme Court of India. Grindlays paid the disputed money including interest into court. Ultimately, the parties settled the matter and agreed to share the moneys paid into court which by then totalled Indian Rupees 16.45 billion (AUD 661 million at 19 January 2002 exchange rates), with Grindlays receiving Indian Rupees 6.20 billion (AUD 248 million at 19 January 2002 exchange rates) of the disputed monies. ANZ in turn received a payment of USD124

million (USD equivalent of the Indian Rupees received by Grindlays) from Standard Chartered Bank under the terms of an indemnity given in connection with the sale of Grindlays to Standard Chartered Bank.

ANZ Claims

ANZ has pursued two separate actions arising from the above:

A \$130 million plus interest claim against its insurers. \$130 million being the balance of the limit of indemnity under ANZ's insurance arrangements for the 1991-92 policy year. ANZ settled the claim for \$114.3 million which has been recognised in these accounts, less an amount of \$0.9 million which was recognised in the accounts at 30 September 2005.

ANZ is entitled to share with NHB in the proceeds of any recovery from the estate of the customer whose account was credited with the cheques drawn by NHB. However, the Indian Taxation Department is claiming a statutory priority to all of the funds available for distribution to creditors of that customer. Proceedings are currently on foot in the Special Court, Mumbai to determine these issues.

Harris Scarfe

The Receiver and Manager of Harris Scarfe Limited (HSL) and related companies, together with ANZ, have initiated proceedings in the Supreme Court of South Australia to recover damages for breach of contract, negligence and statutory causes of action against the former auditors of HSL. These proceedings are continuing. It is not practicable to reliably estimate the financial effect of these proceedings.

14. Note to the Cash Flow Statement

15. Changes in composition of the Group

Newly controlled entities

The following securitisation special purpose entities were consolidated as part of the Group from 1 October 2004 because of the application of new AASB UIG Interpretation 112: Consolidation - Special Purpose Entities. The entities were not included in the previous year's financial statements because AASB UIG 112 became operative on 1 October 2005.

Arc Funding Pty Ltd	Kingfisher Trust 2001-1G	Omeros II Trust
Eos Trust	Kingfisher Trust 2004-1G	Solera Trust
Kingfisher Trust No. 1	Kingfisher Securitisation Pty Ltd	Stellar Funding Pty Ltd
Kingfisher Trust No. 2	Omeros Trust	Coral Finance Ltd

The impact of the consolidation of these entities has been to increase assets and liabilities recorded within the Balance Sheet by \$5 billion as at 1 October 2004. For the comparative year ended 30 September 2005, the Group recognised a decrease in both assets and liabilities of \$388 million reflecting the net impact of repayment and securitisation of new assets during the year.

Disposal of controlled entities

There were no material controlled entities disposed of during the year to 30 September 2006. On 30 September 2005, the controlled entities NBNZ Life Insurance Limited and NBNZ Investment Services Limited were sold. The profit before tax on disposal was \$14 million (\$14 million after tax). The after tax contribution prior to disposal was \$9 million in the September 2005 half (Mar 2005 half: \$9 million).

United States dollar	0.7476	0.7162	0.7623	0.7518	0.7418	0.7468	0.7657

18. Significant events since balance date

On 1 September 2006, the Group announced that it had agreed to sell Esanda Fleetpartners in Australia and New Zealand to Nikko Principal Investments Australia, the Australian private equity arm of Nikko Cordial Corporation for approximately \$380 million. The profit after tax on sale is anticipated to be approximately \$130 million. This sale is expected to be completed by the end of October 2006. Esanda Fleetpartners contributed approximately \$20 million to the Group's net profit after tax for the year ended 30 September 2006.

There have been no other significant events from 30 September 2006 to the date of this report.

19. Impact of adopting Australian Equivalents to International Financial Reporting Standards (AIFRS)

Please refer to the Dividend Announcement for the half year ended 31 March 2006 and to our website (www.anz.com).

APPENDIX 4E STATEMENT

The directors of Australia and New Zealand Banking Group Limited confirm that the financial information and notes of the consolidated entity set out on pages 65 to 90 are in the process of being audited.

Charles Goode
Chairman

John McFarlane
Director

25 October 2006

SUPPLEMENTARY INFORMATION

Average Balance Sheet on a fully comparable AIFRS basis(1)

Averages used in the following tables are predominantly daily averages. Interest income figures are presented on a tax-equivalent basis. Impaired loans are included under the interest earning asset category, loans, advances and bills discounted. Intra-group interest earning assets and interest bearing liabilities are treated as external assets and liabilities for the geographic segments.

(1) Includes \$1,938 million in assets excluded for risk weighting calculations for Australian Prudential Regulation Authority reporting purposes

(2) Excludes off balance sheet exposures in subsidiaries consolidated on adoption of AIFRS from 1 October 2004 as required by Australian Prudential Regulation Authority

DEFINITIONS

Adjusted common equity (ACE) is Tier 1 capital less preference shares and other Hybrid Capital at current rates, regulatory deductions from total capital and transitional capital relief as approved by the Australian Prudential Regulation Authority.

AIFRS - Australian Equivalents of International Accounting Standards.

Business Unit description:

Personal

Personal is a division comprised of Regional, Rural and Small Business Banking, Banking Products, Mortgages, Consumer Finance, Investments and Insurance, Esanda, Pacific Banking and a number of other areas, including the branch network and marketing and support costs in Australia.

Regional & Rural Banking provides a full range of banking services to personal customers across regional and rural Australia, and to small business and agribusiness customers in rural and regional Australia.

Small Business Banking provides a full range of banking services for metropolitan-based small businesses in Australia with funds under management up to A\$50,000.

Banking Products provides transaction banking and savings products, such as term deposits, V2+, and cash management accounts.

Mortgages provides housing finance to consumers in Australia for both owner occupied and investment purposes.

Consumer Finance provides consumer and commercial credit cards, ePayment products, personal loans, merchant payment facilities in Australia and ATM facilities.

Investments and Insurance comprises ANZ Australia's Financial Planning, Margin Lending, insurance distribution, and Trustees businesses in addition to the equity accounted earnings from E*Trade Australia, an online broking business.

Esanda provides motor vehicle and equipment finance, operating leases and management services, fleet management services and investment products.

Pacific provides retail and corporate banking services to customers in the Pacific Region.

Institutional

Institutional is a division encompassing businesses that provide a full range of financial services to ANZ Australia and New Zealand corporate and institutional customers in all geographies. Institutional has a major presence in Australia and New Zealand and also operations in UK, USA, 13 countries in Asia, and Europe

Institutional & Corporate Relationships manages customer relationships and develops financial services solutions and strategies for **Business Banking** clients with funds under management (FUM) in excess of A\$50,000, for **Corporate** clients with FUM in excess of A\$10 million and for **Institutional** clients with FUM in excess of A\$150 million in Australia and New Zealand and, for global corporate clients with whom ANZ Australia has an existing customer relationship, in the United Kingdom, United States and Asia.

Debt and Transaction Services combines managing Institutional and Corporate's balance sheet with a particular focus on credit quality, diversification and maximising risk adjusted returns. Also provides cash transaction banking management, trade finance, international payments, clearing and custodian services principally to institutional and corporate customers.

Markets provides foreign exchange and commodity trading sales-related services to corporate and institutional clients globally. In addition, the business provides origination, underwriting, structuring and risk management services, advice and sale of credit and derivative products globally.

Corporate & Structured Financing provides complex financing and advisory services, structured financial products, leasing, private equity finance, project finance, leveraged finance and infrastructure investment products.

Personal and Private Banking Asia provides banking services in selected Asian geographies.

New Zealand Banking

The New Zealand Banking division is a combination of New Zealand Institutional and New Zealand Businesses. New Zealand Businesses includes the following businesses:

ANZ Retail, operating under the ANZ brand in New Zealand provides a full range of banking services to personal and small business banking customers.

NBNZ Retail, operating under the National Bank brand in New Zealand, provides a full range of banking services to personal and small business banking customers.

Corporate Banking in New Zealand incorporates the ANZ and National Bank brands and provides financial solutions through a relationship management model for medium-sized businesses with a turnover up to NZ\$100 million.

Rural Banking in New Zealand provides a full range of banking services to rural and agribusiness customers.

Central support includes Operations, Technology, Treasury, our 49% stake in ING New Zealand, Risk Management, People Capital, Financial Management and Property New Zealand.

UDC provides motor vehicle and equipment finance, operating leases and management services, fleet management services, and investment products.

Partnerships & Private Bank

Partnerships & Private Bank is responsible for ANZ's partnerships with other institutions in Australia and Asia, along with our Private Bank business, and includes the following:

INGA includes the equity accounted earnings from our 49% stake in ING Australia Ltd, a joint venture between ANZ and ING.

International Partnership- ANZ continues to develop a portfolio of strategic retail partnerships in Asia. ANZ currently has partnerships in Indonesia with PT Panin Bank, in the Philippines with Metrobank, in Cambodia with the Royal Group, in China with Tianjin City Commercial Bank and in Vietnam with Sacombank. These partnerships are focused on leveraging ANZ Australia's capabilities into faster growing personal and small business banking markets via the established client bases of the local partners.

Other includes Private Bank and support units within the division.

Group Centre

Group Centre division includes Operations, Technology and Shared Services, Treasury (funding component), Group People Capital, Group Strategic Development, Group Financial Management, Group Risk Management, Capital Funding and Group Items.

Collective provision is Provision for Credit Losses that are inherent in the portfolio but not able to be individually identified; presently unidentified impaired assets. A collective provision may only be recognised when a loss event has already occurred. Losses expected as a result of future events, no matter how likely, are not recognised.

Expected loss is determined based on the expected average annual loss of principal over the economic cycle for the current risk profile of the lending portfolio.

Equity standardisation Economic Value Added (EVATM) principles are in use throughout the Group, whereby risk adjusted capital is allocated and charged against business units. Equity standardised profit is determined by eliminating the impact of earnings on each business unit's book capital and attributing earnings on the business unit's risk adjusted capital. This enhances comparability of business unit performance. Geographic results are not equity standardised.

Impaired assets are those whose carrying value was greater than the amount expected to be recovered over its life. More specifically, in relation to loans or other credit facilities, impairment may arise where there is reasonable doubt about the collectability of interest, fees (past and future) or principal outstanding, or where concessional terms have been provided because of the financial difficulties of the customer.

Income includes external interest income, other external operating income, and if positive, net inter-segment interest income.

Individual provision charge is the amount of impairment on those loans and advances assessed for impairment on an individual basis (as opposed to on a collective basis). It takes into account expected cash flow over the lives of those loans and advances.

Liquid assets are cash and cash equivalent assets. Cash equivalent assets are highly liquid investments with short periods to maturity, are readily convertible to cash at ANZ's option and are subject to an insignificant risk of changes in value.

Net advances includes gross loans and advances and acceptances less income yet to mature and provisions.

Net inter business unit expenses consists of the charges made between business units for the provision of support services. Both payments and receipts by business units are shown as net inter business unit expenses.

Net interest margin is net interest income as a percentage of average interest earning assets. Non-assessable interest income is grossed up to the equivalent before tax amount for the purpose of these calculations.

Net interest spread is the average interest rate received on interest earning assets less the average interest rate paid on interest bearing liabilities. Non-assessable interest income is grossed up to the equivalent before tax amount for the purpose of these calculations.

Net non-interest bearing items referred to in the analysis of interest spread and net interest average margin, includes shareholders equity, impairment of loans and advances, deposits not bearing interest and other liabilities not bearing interest, offset by premises and equipment and other non-interest earning assets. Impaired loans are included within interest bearing loans, advances and bills discounted.

Net tangible assets equals share capital and reserves attributable to shareholders of the company less preference share capital and unamortised intangible assets (including software).

Operating expenses exclude the provision for impairment of loans and advances charge.

Operating income in business segments includes equity standardised net interest and other operating income.

Overseas Markets includes all operations outside of Australia and New Zealand. The Group's geographic segments are Australia, New Zealand and Overseas Markets.

Profit on a fully comparable AIFRS basis is management's estimate of prior year results adjusted for the impact of those AIFRS standards, principally financial instrument and insurance related, which became effective from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability.

Return on asset ratios include net intra group assets which are risk weighted at 0% for return on risk weighted assets calculations.

Significant items are items that have a material impact (typically >\$10 million) on profit after tax, or the earnings used in the earnings per share calculation. Significant items also do not arise in the normal course of business and are infrequent in nature. Divestments are typically defined as significant items.

Total advances include gross loans and advances and acceptances less income yet to mature (for both as at and average volumes). Loans and advances classified as available-for-sale are excluded from total advances.

Unproductive facilities comprise facilities (such as standby letters of credit, bill endorsements, documentary letters of credit, guarantees to third parties, undrawn facilities to which the Group is irrevocably committed and market related exposures) where the customer status is non-performing.

Australia and New Zealand
Banking Group Limited
26 October 2006

A VERY DIFFERENT BANK

John McFarlane
Chief Executive Officer

www.anz.com

[LOGO]

A good year met our targets again

Headline profit	16.2%
Cash* profit	13.8%
Revenue Growth	8.4%#
Profit Before Provisions	10.4%
Cash* EPS	13.2%
Dividend	13.6%

Return on equity back above 20%

Cost-Income ratio improved by 1.0%

**adjusts headline numbers for AIFRS 2005 adjustments, significant items & inc integration costs & fair value hedge gains/losses*

9.1% FX adjusted

[LOGO]

Good performance from divisions

[CHART]

[CHART]

* New Zealand Banking, which includes NZ Institutional

Innovative strategy delivering results

[GRAPHIC]

But some areas where we need to do more

Speed up Asian expansion

Advance wealth and private banking

Australia

Personal outstanding, engine of group revenue, high customer satisfaction

Institutional regained #1 position

New Zealand

Good operational momentum

Financial results earlier than expected

Asia/Pacific

Asia 26% revenue growth

Pacific 15% revenue growth

Partnerships creating value

Sacombank & Panin valued well above book

1m credit cards now on issue in Asia

Invested against the trend

Now seeing the payback

Accelerated investment spend in 2nd half

Considerable investment in de-risking contributing to lower provisions

Building a sustainable difference

Invest to increase revenue growth

Maintain high expense growth trajectory

Maintain investment and revenue gap to peers

Resources directed to highest growth areas

Improve cost and capital productivity

Dynamic capital and expense allocation process

Leverage Bangalore operations and technology campus

Roll out end-to-end process re-engineering capability

Advance our stakeholder foundation

ANZ people and culture now a competitive advantage

Difficult and expensive to replicate

A leader with customers and in corporate responsibility

Updated Targets

Revenue growth	7-10%
Cost Growth	5-7%
ROE	>20%
Cost to Income	<40%

A quick reminder its not all apples and apples

1 October 2005

AASB 139, 132 & 4 come into play, Sep-05 not restated for these standards

1 October 2006

Changes to treatment of revenue hedges

	Sep 2005	Mar 2006	Sep 2006
Statutory IFRS Accounts			
2005 not restated for AASB 139, 132, and 4	2005	2006	2006
Fully Comparable IFRS Accounts			
We have applied all standards to 2005 to generate meaningful cash earnings comparatives	2005	2006	2006

Lack of comparability YOY a real issue eg:

Change in margin	1 bp (statutory)	9 bp (fully comparable)
Other income growth	-10% (statutory)	7% (fully comparable)

A good result - 13.8% cash earnings growth; 10.4% profit before provisions growth

Strong income growth allowing continued investment

[CHART]

HOH Growth	6.1%	1.3%	(3.9)%	18.3%	(7.8)%	7.2%
-------------------	------	------	--------	-------	--------	-------------

Profit before Provisions	5.2%
---------------------------------	-------------

Scorecard	FY06	2H06
Volume Growth	üü	üü
Interest Margin	ü	üü
Non Int. Income	üü	ü
Expenses	û	û
Provisions	üü	üü
Tax	ü	ü
Cash EPS	üü	üü

üü - Favourable to expectations

ü - In line with expectations

û - Unfavourable to expectations

Another way to think about this result

A good result even without provisioning benefit

[CHART]

10%-11% a better reflection of underlying trajectory

In line with PBP growth of 10.4%

Can't completely ignore provisioning impact - partly reflects de-risking benefits coming through

Very good result given level of investment in the franchise

Strong revenue growth the highlight, 9.1% FX adjusted

Top end of Revenue target revised upwards, now 7% to 10%

[CHART]

** fx adjusted growth,*

^ reported growth,

normalised for NBNZ

Strong revenue growth across the Group

(FY06 ANZ League Table -Top 10 Performers)

Business	Revenue Growth
Investments & Insurance	23%
NZ Institutional**	23%
Pacific	18%^
Private Bank	18%
Consumer Finance Aust.	15%
Mortgages	15%
Markets	15%
Corp & Structured Financing**	12%
Small Business Banking	12%
Banking Products	11%

Personal	New Zealand
Institutional	Partnerships & Private Bank

*** Continuing businesses*

^ 15% on geographic basis

Good volume growth offset by Institutional and New Zealand margin pressure, mainly in first half

Net Interest Income[#] Drivers FY05 v FY06

[CHART]

@ *Continuing Businesses*

NII includes tax equivalent gross-up

^ *Continuing Businesses, excludes non core items & shareholder functions*

End of Period+	11.7%	9.1%	12.6%	10.9%
-----------------------	-------	------	-------	-------

+*growth in net loans & advances, including acceptances, fx adjusted*

Margin decline in line with expectations, improvement in second half

Lower competitive intensity in NZ, partly offset by increase in Australia

[CHART]

^refer slide 46

Competition impacts in all segments

(competition impact on Group Margin FY05-FY06 **bps**)

[CHART]

** Offset by basis risk benefits. Overall Australian Mortgages margin increased ~1bp in 2006*

Underlying Other Income growth remains strong, still a seasonality impact

2H06 Other Income* impacted by NZD and Markets accounting

[CHART]

** adjusted for non core items and NBNZ normalisation*

fx adjusted

Misleading to look at Trading Income in isolation - need to look at total Markets income[^] (\$m)

[CHART]

[^]includes Mismatch & Liquidity revenue of \$13m in 2H06 previously reported in Treasury

Higher investment funded by strong revenue growth

Expense growth* above short term target range reflecting higher investment spend

[CHART]

**adjusted for non core items and NBNZ normalisation and fx adjusted*

^reported growth

We have significantly increased our investment spend over last two years

[CHART]

Investment focused towards high growth Personal segment

(~% of FY06 investment spend)

[CHART]

Successfully lowered risk in the portfolio, very hard to see credit quality getting better than this!

Individual Provisions at unsustainably low levels

[CHART]

**Consumer includes Retail, Rural and Asset Finance businesses*

Commercial includes Institutional Division, NZ Corporate & Commercial and Business Banking businesses

Consumer: Key Drivers

Continued growth in the portfolio

Change in portfolio mix from growth in unsecured products -low rate cards

Impact on servicing capacity interest rates, oil price

Rising bankruptcies

Slight reduction in recovery rates - motor vehicles and unsecured debt

Commercial: Key Drivers

Low levels of Corporate gearing

High level of recoveries & writebacks

Low levels of non performing loans

90 days past due an early indicator? Alert but not alarmed!

The cycle has clearly turned with higher interest rates & fuel costs impacting some consumers, but 90+ days still at low levels

[CHART]

Growth has mainly been in the Australian highly secured portfolio (90+ days past due loans Aust.)

[CHART]

Mortgage concerns have largely been in NSW

(90+ days past due % GLA* by State)

[CHART]

**Gross Lending Assets*

Portfolio growth driving Collective Provision charge

FY06 Collective Provision charge at low levels

[CHART]

FY06 - Reduction in Collective Provision charge driven by:

Lower rate of portfolio growth than in FY05

Slight change in risk with deterioration in consumer Finance partly offset by improvement in NZ Businesses

Modelled run off of Oil Provision

FY07 - Increase in Collective Provision charge likely, due to:

Continued shift in Credit Card product mix

Potential for modest deterioration in overall risk profile from remarkably good levels

Reduced Oil Provision run off

Non Continuing businesses benefit eliminated

Hedging the Kiwi dollar two key impacts

1. Pre-existing hedges significant value created for shareholders

FY06 NPAT of \$32m from hedges at average rate of ~1.105

\$118m of shareholder value created - FY07-FY09 hedge profits booked directly to reserves & retained earnings in FY06 (-\$23m) & FY07 (+\$141m) under AIFRS[^]

2. New hedges we've successfully limited FY07 EPS drag

FY07 EPS drag limited to <1%

~95% of FY07 earnings hedged at an average rate of ~1.14 (incl. fwd points)

Will result in 1H07 Headline P&L impact due to 2H07 hedges being MTM*, no Cash Earnings impact

No full year MTM impact unless hedging extended beyond FY07

A\$/NZ\$ weakened to long term average rate

[CHART]

**Marked to Market, ^FY06 adjustment booked on 30/09/06, FY07 adjustment booked on 01/10/06*

Key takeaways from today

[GRAPHIC] **A good result, with cash EPS up 13.2%**

[GRAPHIC] **Very good revenue growth, up 9.1%* Momentum continuing into 07, new target of 7%-10%**

[GRAPHIC] **Cost growth up 7.5%*, significant investment in growth Still investing in 07, growth at upper end of 5%-7%**

[GRAPHIC] **Remarkably good credit quality outcome in 06 Credit losses must rise in 2007**

[GRAPHIC] **Kiwi dollar issues well managed Impact of weaker NZD limited to less than 1%**

**fx adjusted growth*

Additional Information

Strong headline growth; 13.8% cash profit growth

[CHART]

ANZ is a recognised Corporate Responsibility leader

Ranked in the top five banks globally on the Dow Jones Sustainability Index

Overall gold medal and ranked three on the Australian Corporate Responsibility Index

Prime Minister's Special Award for Impact on the Community

Member of the FTSE4Good Global Index

Most engaged workforce of all major companies in Australia and NZ

EOWA Employer of Choice for Women

One of 50 FT500 companies included in the Carbon Disclosure Projects Climate Leadership Index

[LOGO]

[LOGO]

[LOGO]

[LOGO]

[LOGO]

Community investment strategy is leading practice

Increasing the financial literacy and inclusion of adult Australians, particularly amongst the most vulnerable people in society

MoneyMinded

Financial education program for adults facing financial difficulty, delivered by community partners and financial counsellors Australia-wide.

More than 15,000 people have participated in MoneyMinded this year and more than 650 facilitators were trained to deliver the program.

RMIT University research shows MoneyMinded helps participants increase their confidence in dealing with financial issues, creditors and banks

MoneyBusiness

MoneyBusiness is delivered in partnership with the Aus Govt, and aims to build the money skills and confidence of Indigenous Australians.

The MoneyBusiness pilot sites are Katherine, Tennant Creek, Nguiu (Tiwi Islands) and Galiwinku (Elcho Island) in NT and Geraldton and Kununurra in WA.

Saver Plus

Assisting low-income individuals and families to develop a long-term savings habit, improve their financial knowledge and save for their education.

ANZ matches the savings of participants in the program dollar-for-dollar up to \$1,000 per person. 719 participants were involved in Saver Plus this year.

RMIT University research shows that 95% of participants in the pilot program are still saving, 12 months after completing Saver Plus

Progress Loans

Small loans program developed with the Brotherhood of St Laurence.

Progress Loans are small, affordable loans of between \$500 and \$3,000 for essential household items.

Forty-one loans totalling \$35,000 had been approved

Opportunities for our people to engage with their local communities and support causes that are important to them

ANZ Volunteers

Eight hours paid volunteer leave for staff, including increasing opportunities for skilled volunteering and secondments.

24% of Australian staff and 18% of NZ staff contributed more than 50,000 volunteer hours, valued at more than \$2.5 million, to community organisations in 2006.

ANZ's program is amongst the leaders globally; the average corporate volunteering participation rate is 8.5% according to the London Benchmarking Group for Corporate Community Investment

Community Giving

Our workplace giving program, supports more than 18 community organisations that were selected to reflect the causes that are important to our staff.

10.6% of Australian staff participated in this program during 2006. Their contributions were matched dollar-for-dollar by ANZ, totalling \$537,499.

Eighteen local Indigenous people have been employed as MoneyBusiness workers providing Indigenous individuals and families with coaching in financial literacy, budgeting, bill paying, and developing savings

by the end of September 2006 with a 70% approval rate. No loans are in arrears.

In 2006 Community Giving was extended to employee teams, our customers via internet banking and ANZ shareholders

The program is currently operating in Victoria, with a view to expanding it to other states and community partners in 2007

People strategy has created the most engaged workforce of major banks

[LOGO]

Cultural Transformation

Six-year focus on cultural transformation and values-based decision making. 26,000+ staff have participated in Breakout workshops,

This year we implemented the Breakout to the Frontline program involving 6,000 customer-facing staff this year.

Our employee engagement score remains the highest of all large (ASX Top 20) companies in Australia and New Zealand according to Hewitt Associates.

Attracting and Nurturing Talent

Attractive benefits including flexible pay choices for all staff, share ownership, salary sacrifice for laptops, PCs@home, discounted medical insurance and ANZ products and services.

Development plans for all staff with 300 employees taking part in talent programs this year. We also introduced Innovative programs to identify, nurture and fast-track high potential people from graduates through to senior executives.

A new Learning and Innovation Centre will be launched in 2007.

Building a vibrant, energetic and high-performing culture, where ANZ's values guide our actions and decisions

Flexibility for a Diverse Workforce

Employee Wellbeing

ANZ achieved its 2006 targets for females in executive positions. New two-year targets have also been established.

Upgraded occupational health and safety policy and system.

12 weeks paid parental leave, with no minimum service requirement and guaranteed part-time employment for staff over 55, and a Career Extensions program offering flexible options for mature-aged staff.

Free, comprehensive health checks for all staff and on-line health information service.

Lost time injury frequency rate continues to decrease.

Partnership with ABC Learning Centres offering childcare services, with five centres open around Australia.

Flexible leave options including lifestyle leave which enables staff to take up to an additional four weeks leave for any purpose and career breaks of up to five years.

Integrating environmental and social considerations into our business practices

	Institutional & Corporate Sustainability	Operational Environmental Footprint	New Products and Services
<p>Demonstrating business leadership by integrating environmental and social considerations into our business practices, decisions & behaviours</p>	<p>86% of all new client transactions and annual client reviews in Institutional Australia underwent an environmental and social impact screening this year.</p>	<p>We are continuing to implement new environmental policies and initiatives to help us achieve our two year goal of reducing ANZ's environmental footprint by a minimum of 5% per FTE.</p>	<p>ANZ launched its first sustainable investment product, the ANZ Sustainable Protected Responsible Investment Over Term (ASPRIT).</p>
	<p>Developed new Wholesale Credit policies requiring business units to assess the activities, practices or associations of each credit customer in relation to environmental and social issues.</p>		<p>Member of the North Adelaide consortium which was the first successful Solar Cities proposal announced by the Australian Government under its Solar Cities initiative</p>
	<p>Assessed the energy and water intensity of ANZ's Institutional loan portfolio, compared with the Australian economy, using the CSIRO/University of Sydney Balancing Act methodology.</p>		<p>Established and invested in the Energy Infrastructure Trust which has a portfolio of over \$100 million in investments; including Esperance Energy Project, Biodiesel Producers Limited and Queensland Gas Company Ltd).</p> <p>Debt financed renewable energy projects enabled by the various Government schemes such as Envirogen's Oakey Creek Project and Energy Developments landfill gas projects.</p>
