TF FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - PRINCIPLES OF CONSOLIDATION

The consolidated financial statements as of March 31, 2007 (unaudited) and December 31, 2006 and for the three-month periods ended March 31, 2007 and 2006 (unaudited) include the accounts of TF Financial Corporation (the Company) and its wholly owned subsidiaries Third Federal Bank (the Bank), TF Investments Corporation and Penns Trail Development Corporation. The Company's business is conducted principally through the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

NOTE 2 - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include all of the disclosures or footnotes required by accounting principles generally accepted in the United States of America. In the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for fair presentation of the consolidated financial statements have been included. The results of operations for the period ended March 31, 2007 are not necessarily indicative of the results which may be expected for the entire fiscal year or any other period. For further information, refer to consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2006. The aggregate market value of the voting common equity held by non-affiliates of the registrant, based on the closing price of the registrant's Common Stock as quoted on the Nasdaq System on June 30, 2006, was \$58.5 million (2,027,416 shares at \$28.85 per share).

NOTE 3 - CONTINGENCIES

The Company, from time to time, is a party to routine litigation that arises in the normal course of business. In the opinion of management, the resolution of this litigation, if any, would not have a material adverse effect on the Company's consolidated financial position or results of operations.

NOTE 4 - OTHER COMPREHENSIVE INCOME

The Company's other comprehensive income consists of net unrealized losses on investment securities and mortgage-backed securities available for sale. Total comprehensive income for the three-month periods ended March 31, 2007 and 2006 was \$1,562,000 and \$560,000, net of applicable income tax expense of \$628,000 and \$115,000 respectively.

NOTE 5 - EARNINGS PER SHARE

The following tables illustrate the reconciliation of the numerators and denominators of the basic and diluted earnings per share computations (dollars in thousands, except per share data):

	Three months ended March 31, 2007		
	Income (numerator)	Weighted average shares (denominator)	Per share Amount
Basic earnings per share			
Income available to common stockholders	\$ 1,398	2,751,158	\$ 0.51
Effect of dilutive securities			
Stock options			
Diluted earnings per share			
Income available to common stockholders plus effect of dilutive securities	\$ 1,398	2,751,158	\$ 0.51

There were 20,638 options to purchase shares of common stock at a price of \$34.14 per share which were outstanding during the first quarter of 2007 that were not included in the computation of diluted earnings per share because the options' exercise prices were greater than the average market price of the common shares.

	Three months ended March 31, 2006		
	Income (numerator)	Weighted average shares (denominator)	Per share Amount
Basic earnings per share			
Income available to common stockholders	1,255	2,698,547	\$ 0.47
Effect of dilutive securities			
Stock options		12,968	(0.01)
Diluted earnings per share			
Income available to common stockholders plus effect of dilutive securities	\$ 1,255	2,711,515	\$ 0.46

There were 24,226 options to purchase shares of common stock at a price of \$34.14 per share which were outstanding during the first quarter of 2006 that were not included in the computation of diluted earnings per share because the options' exercise prices were greater than the average market price of the common shares.

NOTE 6- STOCK BASED COMPENSATION

The Company has stock benefit plans that allow the Company to grant options and stock to employees and directors. The awards, which have a term of up to 10 years when issued, vest over a three to five year period. The exercise price of each award equals the market price of the Company's stock on the date of the grant. There was \$909,000 and \$1,021,000 of total unrecognized compensation cost, net of estimated forfeitures, related to non-vested awards under the Plan at March 31, 2007 and 2006, respectively. That cost is expected to be recognized over a weighted average period of 21.2 months and 32.3 months at March 31, 2007 and 2006, respectively.

Stock-based compensation expense included in net income related to stock options was \$99,000 and \$94,000, resulting in a tax benefit of \$29,000 and \$28,000, for the three months ended March 31, 2007 and 2006, respectively.

NOTE 8- NEW ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board (FASB) Issued Statement No. 157 (SFAS 157), Fair Value Measurements which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. The Company is currently evaluating the impact the adoption of SFAS No. 157 will have on its consolidated financial statements.

In September 2006, the Emerging Issues Task Force (EITF) finalized Issue No. 06-5, Accounting for Purchases of Life Insurance Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4 (Accounting for Purchases of Life Insurance). This issue requires that a policyholder consider contractual terms of a life insurance policy in determining the amount that could be realized under the insurance contract. It also requires that if the contract provides for a greater surrender value if all individual policies in a group are surrendered at the same time, that the surrender value be determined based on the assumption that policies will be surrendered on an individual basis. Lastly, the issue discusses whether the cash surrender value should be discounted when the policyholder is contractually limited in its ability to surrender a policy. This issue is effective for fiscal years beginning after December 15, 2006. Application of this issue has not made a material impact on the financial statements.

The Company adopted the provisions of FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, on January 1, 2007. Previously, the Company had accounted for tax contingencies in accordance with SFAS 5, Accounting for Contingencies. As required by FIN 48, which clarifies SFAS 109, Accounting for Income Taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company is subject to income taxes in the U.S. federal jurisdiction, and the states of Pennsylvania and New Jersey. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. The Company applied Interpretation 48 to all tax positions for which the statute of limitations remained open. The adoption of FIN 48 did not have a material impact on the results operations or financial condition of the Company.

In February 2007, FASB issued Statement No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115. The statement permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS 159 provides an opportunity to mitigate volatility in reporting earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157 (SFAS 157), Fair Value Measurements. Although the Company has decided against early adoption, the Company will adopt SFAS No. 159 and does not anticipate any material impact on its consolidated financial statements.

NOTE 9- RECLASSIFICATIONS

Certain prior period amounts have been reclassified to conform to the current period presentation.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

During the first quarter of 2007 and 2006, the Company's provision for loan losses was \$0 and \$90,000, respectively. Management of the Company believes that there has not been any significant deterioration in its asset quality during the first quarter of 2007.

The following table sets forth information regarding the Company's asset quality (dollars in thousands):

	March 31, 2007	December 31, 2006	March 31, 2006	
Non-performing loans	\$ 2,783	\$ 2,110	\$ 1,570	
Ratio of non-performing loans to gross loans	0.57	% 0.59	% 0.31	%
Ratio of non-performing loans to total assets	0.42	% 0.32	% 0.23	%

Management maintains an allowance for loan losses at levels that are believed to be adequate; however, there can be no assurances that further additions will not be necessary or that losses inherent in the existing loan portfolio will not exceed the allowance. The following table sets forth the activity in the allowance for loan losses during the periods indicated (in thousands):

- (3) Includes interest-bearing deposits in other banks.
- (4) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net yield on interest-earning assets represents net interest income as a percentage of average interest-earning assets.

Rate/Volume Analysis

The following table presents, for the periods indicated, the change in interest income and interest expense (in thousands) attributed to (i) changes in volume (changes in the weighted average balance of the total interest earning asset and interest bearing liability portfolios multiplied by the prior year rate), and (ii) changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been allocated proportionately based on the absolute value of changes due to volume and changes due to rate.

- (1) Tax equivalent adjustments to interest on investment securities were \$110,000 and \$94,000 for the quarters ended March 31, 2007 and 2006, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.

Total Interest Income. Total interest income, on a taxable equivalent basis, increased by \$126,000 or 1.37% to \$9.3 million for the quarter ended March 31, 2007 compared with the first quarter of 2006. The average balance of loans outstanding decreased between the two periods largely because of the sale of \$16.3 million of previously purchased loans during the third quarter of 2006. However, there was a 23 basis point increase in the average yield earned on loans reflecting a rise in the yield on both existing loans and new loans added to the portfolio during the intervening period in part due to two, 25 basis point increases in the Bank's prime rate during the period March 31, 2006 through March 31, 2007 corresponding to identical increases in the federal funds interest rate of the Federal Reserve Bank. At March 31, 2007, the Bank had approximately \$74.4 million in loans that are indexed to the prime rate primarily consisting of construction loans and commercial and consumer lines of credit. Interest income from mortgage-backed securities was lower in the first three months of 2007 in comparison to the same period of 2006 due to normal repayments, plus the sale of \$5.0 million of these securities during the second quarter of 2006, offset by a 20 basis point increase in average yield in these securities as a result of purchases of \$15.0 million in higher yielding securities during the intervening period.

Total Interest Expense. Total interest expense increased by \$613,000 to \$4.2 million during the three-month period ended March 31, 2007 as compared with the first quarter of 2006. During 2006 and the first quarter of 2007, the Bank raised the interest rates paid on many of its deposit products due to the competitive pricing environment in the Bank's deposit market. Additionally during the intervening period, the Bank offered new products with higher rates which also contributed to a shift in the deposit mix. Accordingly, the interest rate paid on deposits increased by 77 basis points. Interest on advances from the Federal Home Loan Bank decreased by \$0.4 million during the first quarter of 2007 versus the first quarter of 2006 as a result of a \$36.6 million decrease in the average balance of borrowings.

Non-interest income. Total non-interest income was \$1.5 million for the three-month period ended March 31, 2007 compared with \$681,000 for the same period in 2006. The increase is mainly attributable a \$777,000 settlement award related to a lease fraud which occurred prior to 2003. Also, net gain on the sale of loans totaled \$54,000 during the first quarter of 2007 while the gain during the first quarter of 2006 totaled \$9,000 mainly due to an increase between

the two quarters in the dollar amount of loans sold.

14

Non-interest expense. Total non-interest expense increased by \$220,000 to \$4.6 million for the three months ended March 31, 2007 compared to the same period in 2006. Other non-interest expense increased during the first quarter of 2007 as a result of a \$270,000 expense related to the bankruptcy of one of the Company's loan servicing agents. On February 2, 2007, the Company became aware that one of its loan servicers which was servicing 43 loans totaling \$15.4 million had filed for protection and reorganization under Chapter 11 of the United States Bankruptcy Code on December 20, 2006. On March 2, 2007 the bankruptcy filing was converted to a Chapter 7 liquidation and the Company shortly thereafter obtained the servicing and began to directly service the loans. At the present time, the Company is seeking recovery of all monies collected and held on its behalf by the servicer and bankruptcy trustee.

Management of the Company believes that there has not been a material adverse change in market risk during the three months ended March 31, 2007.

CONTROLS AND PROCEDURES

16

CRITICAL ACCOUNTING POLICIES

Certain critical accounting policies of the Company require the use of significant judgment and accounting estimates in the preparation of the consolidated financial statements and related data of the Company. These accounting estimates require management to make assumptions about matters that are highly uncertain at the time the accounting estimate is made. Management believes that the most critical accounting policy requiring the use of accounting estimates and judgment is the determination of the allowance for loan losses. If the financial position of a significant amount of debtors should deteriorate more than the Company has estimated, present reserves for loan losses may be insufficient and additional provisions for loan losses may be required. The allowance for loan losses was \$2,870,000 at March 31, 2007.
