N.M. Not Meaningful.

- A Rule 144a Security - A security purchased pursuant to Rule 144a under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund's investment adviser has determined to be liquid, unless otherwise noted, represent 26.98% of net assets.
- B Security is valued in good faith at fair value by or under the direction of the Board of Trustees.
- C Indexed Security - The rates of interest earned on these securities are tied to the London Interbank Offered Rate (LIBOR), the Euro Interbank Offered Rate (EURIBOR) Index, the Consumer Price Index (CPI), the one-year Treasury Bill Rate or the ten-year Japanese Government Bond Rate. The coupon rates are the rates as of September 30, 2009.
- D Bond is currently in default.
- E Illiquid security valued at fair value under the procedures approved by the Board of Trustees.
- F Convertible Security - Security may be converted into the issuer's common stock.
- G Pay-in-Kind (PIK) security - A security in which interest or dividends during the initial few years is paid in additional PIK securities rather than in cash.
- H The coupon rates shown on variable rate securities are the rates at September 30, 2009. These rates vary with the weighted average coupon of the underlying loans.
- I Stepped Coupon Security - A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.
- J Yankee Bond - A dollar-denominated bond issued in the U.S. by foreign entities.
- K Stripped Security - Security with interest-only or principal-only payment streams, denoted by a 1 or 2, respectively. For interest-only securities, the amount shown as principal is the notional balance used to calculate the amount of interest due.
- L On September 7, 2008, the Federal Housing Finance Agency placed Fannie Mae (FNMA) and Freddie Mac (FHLMC) into conservatorship.
- M Credit Linked Security - The rates of interest earned on these securities are tied to the credit rating assigned by Standard & Poor's Rating Service and/or Moody's Investors Services.
- N Non-income producing.
- O Aggregate cost for federal income tax purposes is substantially the same as book cost. At September 30, 2009, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$	15,637,245
Gross unrealized depreciation		(30,967,684)
Net unrealized depreciation	\$	(15,330,439)

Notes of Portfolio of Investments (unaudited)

Organization and Significant Accounting Policies (unaudited)

Western Asset Premier Bond Fund (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund commenced investment operations on March 28, 2002.

The Fund's investment objective is to provide current income and capital appreciation by investing primarily in a diversified portfolio of investment grade bonds. The Fund currently seeks to achieve its investment objective by investing substantially all of its assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The ability of the issuers of the securities held by the Fund to meet their obligations might be affected by, among other things, economic developments in a specific state, industry or region.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

Investment Valuation

The Fund's securities are valued under policies approved by and under the general oversight of the Board of Trustees. The Fund has adopted Financial Accounting Standards Board Codification Section 820 (formerly Statement of Financial Accounting Standards No. 157) (ASC Section 820). ASC Section 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Debt securities are valued at the last quoted bid prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market and are valued at the bid price as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities at fair value as determined in

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-Q

accordance with the procedures approved by the Fund's Board of Trustees.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach, income approach and/or cost approach, depending on the type of the security and the particular circumstance.

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

Description	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Long-term investments:				
Corporate bonds and notes		\$ 95,768,274	\$ 30,325	\$ 95,798,599

See Portfolio of Investments for additional detailed categorizations.

Values include any premiums paid or received with respect to swap contracts.

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-Q

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

Investments in Securities	Corporate Bonds & Notes	Asset- Backed Securities	Mortgage- Backed Securities	Trust Preferred Securities	Preferred Stock	Warrants	Total
Balance as of December 31, 2008		\$ 276,041	\$ 185,045				\$ 461,086
Accrued premiums/discounts	\$ 3,341	27,529	17,292				48,162
Realized gain/(loss) ¹		(144,769)					(144,769)
Change in unrealized appreciation (depreciation) ²	(9,282)	1,411,412	(17,292)				1,384,838
Net purchases (sales)	36,266	2,296,207			\$ 1,347	\$ 100	2,333,920
Net transfers in and/or out of Level 3				\$ 62,715			62,715
Balance as of September 30, 2009	\$ 30,325	\$ 3,866,420	\$ 185,045	\$ 62,715	\$ 1,347	\$ 100	\$ 4,145,952
Net unrealized appreciation (depreciation) for investments in securities still held at September 30, 2009 ²	\$ (9,282)	\$ 1,391,827	\$ (133,015)	\$ (434,656)			\$ 814,874

¹ This amount is included in net realized gain (loss) from investment.

² Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.

Foreign Currency Translation

Assets and liabilities initially expressed in non-U.S. currencies are translated into U.S. dollars using currency exchange rates determined prior to the close of trading on the New York Stock Exchange, usually at 2:00 p.m. Eastern Time. Purchases and sales of securities and income and expenses are translated into U.S. dollars at the prevailing market rates on the dates of such transactions. The effects of changes in non-U.S. currency exchange rates on investment securities and other assets and liabilities are included with the net realized and unrealized gain or loss on investment securities.

Repurchase Agreements

The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, a fund takes possession of an underlying

debt obligation subject to an obligation of the seller to repurchase, and of the fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during a fund's holding period. When entering into repurchase agreements, it is the Fund's policy that its custodian acting on the fund's behalf, or a third party custodian take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Swap Agreements

The Fund may invest in swaps for the purpose of managing their exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with ordinary portfolio transactions.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealized appreciation/(depreciation). Gains or losses are realized upon termination of the swap agreement. Periodic payments and premiums received or made by a Fund are recorded as realized gains or losses, respectively. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Securities held as collateral for swap contracts are identified in the Portfolio of Investments. The risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts terms, and the possible lack of liquidity with respect to the swap agreements.

As disclosed in the Fair Values of Derivatives Balance Sheet table that follows each Fund's summary of open swap contracts, the aggregate fair value of credit default swaps in a net liability position as of September 30, 2009 was \$892,291. The aggregate fair value of assets posted as collateral for all swaps was \$800,000. If a defined credit event had occurred as of September 30, 2009, the swaps' credit-risk-related contingent features would have been triggered and the Fund would have been required to pay up to \$21,666,202 less the value of the contracts' related reference obligations.

Credit default swaps

The Fund may enter into credit default swap (CDS) contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where a Fund has exposure to a sovereign issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-Q

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate or sovereign issues are disclosed in the Notes to Schedule of Investments and serve as an indicator of the current status of the payment/ performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/ performance risk.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its

obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

As of September, 2009, the one-month London Interbank Offered Rates (LIBOR) was 0.24563%.

The following is a summary of open swap contracts outstanding as of September 30, 2009.

CREDIT DEFAULT SWAPS ON CORPORATE ISSUES BUY PROTECTION(1)

Swap Counterparty (Reference Entity)	Termination Date	Periodic Payments Made by the Fund	Contract Notional Amount 2	Market Value	Upfront Premiums Paid/(Received)	Unrealized Appreciation/ (Depreciation)

Net unrealized appreciation on buys of credit default swaps on corporate issues						\$ 612,281

CREDIT DEFAULT SWAP ON CREDIT INDICES SELL PROTECTION(3)

Swap Counterparty (Reference Entity)	Termination Date	Periodic Payments Received by the Fund	Contract Notional Amount 2	Market Value 4 Paid/(Received)	Upfront Premiums	Unrealized Appreciation/ (Depreciation)
Merrill Lynch & Co., Inc. (CDX HY 8)	June 20, 2012	0.86% Quarterly	\$ 21,666,202	\$ (702,486)		\$ (702,486)*
Net unrealized depreciation on sales of credit default swaps on credit indices						\$ (702,486)

1 If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the underlying securities comprising the referenced index.

2 The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

3 If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

4 The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold as of the period end. Decreasing market values when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Percentage shown is an annual percentage rate.

* Security is valued in good faith at fair value by or under the direction of the Board of Trustees.

Derivative Instruments and Hedging Activities

Financial Accounting Standards Board Codification Section 815 (formerly Statement of Financial Accounting Standards No. 161) (ASC Topic 815) requires enhanced disclosure about an entity's derivative and hedging activities.

The following is a summary of the Fund's derivative instruments categorized by risk exposure at September 30, 2009.

Primary Underlying Risk Disclosure	Swap Contracts, at value	Total
Credit Contracts	\$ (90,205) \$	(90,205)

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-Q

The Fund had average notional balances of \$2,295,152 and \$28,434,111 in credit default swap contracts (to buy protection) and credit default swap contracts (to sell protection), respectively during the period ended September 30, 2009.

Other information regarding the Fund is available in the Fund's most recent Report to Shareholders. This information is available on the Securities and Exchange Commission's website (www.sec.gov).

ITEM 2. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and 15d-15(b) under the Securities Exchange Act of 1934.

(b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant's last fiscal quarter that have materially affected, or are likely to materially affect the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
