**Item 8.01 Other Events**

Flag Financial Corporation (“Flag”) has initiated a repositioning of its balance sheet designed to further reduce its exposure to an anticipated continued increase in interest rates and to improve Flag’s net interest margin and net interest income levels.

Specifically, Flag plans to dispose of approximately \$68.5 million of available-for-sale, fixed-rate investment securities with an average yield of 4.00% and an average life of 2.6 years. Approximately \$65 million of proceeds will be reinvested in securities yielding approximately 5.25% with an average life of 3.0 years. As a result of this repositioning, Flag expects to recognize an after-tax charge to earnings of approximately \$738,000 (or \$0.06 per diluted share) in the fourth quarter of 2005, which Flag anticipates recovering through earnings over approximately the next 1.5 years.

While this action will result in a current charge to earnings, management believes the end result will be an expanded net interest margin, an improved interest rate risk position, increased profitability and enhanced shareholder value. Shareholders’ equity is unlikely to change materially, as the decrease in the value of the existing investments is currently reflected in “accumulated other comprehensive income.”
