### Item 7.01 Regulation FD Disclosure

On July 4, 2006, Maariv, a daily newspaper in Israel printed an article discussing GammaCan International, Inc.'s business. A copy of the article is filed as Exhibit 99.1 to, and incorporated by reference in, this report. In accordance with Regulation FD, this current report is being filed to publicly disclose all information that was provided in the article. This report under Item 7.01 is not deemed an admission as to the materiality of any information in this report that is required to be disclosed solely by Regulation FD.

### Item 8.01 Other Events

The management of GammaCan International, Inc. reviewed the article by Maariv after it was printed. To avoid any doubt the management of GammaCan International, Inc. would like to add the following clarifications which more accurately reflect the statements Mr. Schnegelsberg made:

- While Mr. Zeev Bronfeld was mentioned as being a major share holder of GammaCan International, Inc. he was not discussed in the context of any financings.
- To address the change in emphasis to VitiGam from GCAN 101, Mr. Schnegelsberg stated that GammaCan would put all its efforts into developing VitiGam. Based on VitiGam's specific anti- melanoma activity seen in *in vitro* and in animal experiments as well as VitiGam's anticipated safety profile (comparable to that of GCAN101) GammaCan anticipates VitiGam to be a substantially improved drug over GCAN101.
- Mr. Schnegelsberg in his discussion about potential markets suggested that the annual therapy cost for biologics today is between \$50,000 and \$80,000. He further suggested that some exceptionally active biologics could command premium pricing in the \$100,000 range. VitiGam pricing was not discussed.
- GammaCan received the approval of the BIRD Foundation for a \$1,000,000 grant. Under this grant GammaCan International, Inc. and Life Therapeutics, Inc. (and not the entity identified in the article) would partner in a joint study of VitiGam.
