SGL Carbon increases Graphite Electrode prices

Wiesbaden, April 24, 2006. SGL Carbon announces today the following new prices for its Graphite Electrodes effective April 21st, 2006 for all new business:

Europe:

- o Regular-size Graphite Electrodes: 3760 (euro)/MT
- o Extra-size Graphite Electrodes: 4030 (euro)/MT

Americas, Asia (excluding China\*), Near Middle East and Africa:

- o For regular-size Graphite Electrodes: 2,08 US\$/lb (4585 US-\$/mt)
- o For extra-size Graphite Electrodes: 2,23 US\$/lb (4915 US-\$/mt)

Regular-sized is defined as: diameter 14" (350 mm) - 24" (600 mm)

Extra-sized is defined as: diameter 26" (650 mm) - 30" (750 mm)

These prices will be applicable for all new orders received from April 21st, 2006 until further notice and for shipments through June 30th, 2007.

This price increase is due to cost increases for the major raw materials and energy (electricity and gas).

\* Pricing in China is the sole responsibility of the joint venture between SGL Carbon and Tokai in Shanghai (STS).

Forward-looking statements:

This document contains statements on future developments that are based on currently available information and that involve risks and uncertainties that could lead to actual results deviating from these forward-looking statements. The statements on future developments are not intended as guarantees; rather, such developments and results are dependent on a number of factors, they contain various risks and uncertainties and are based on assumptions that may prove to be incorrect. These risks and uncertainties include, for example, unforeseeable changes in political, economic and business conditions, particularly in the area of electrosteel production, the competitive situation, interest rate and currency developments, technological developments and other risks and unanticipated circumstances. We see other risks in price developments, unexpected developments relating to acquired and consolidated companies, and ongoing cost optimization programs. SGL Carbon does not intend to update these forward-looking statements.

### SGL Carbon: Successful First Quarter 2006

- o Sales in Q1/2006 up by 11 %, EBIT up by 55 % compared to Q1/2005
- o Net profit for the period more than tripled in comparison with Q1/2005
- o Successful placement of almost 10 % capital increase
- o Earnings expected to further improve in Q2/2006

Wiesbaden, April 25, 2006. Due to the favorable development of demand in all three business units, consolidated sales increased by 11 % to (euro) 267.3 million in Q1/2006, or 8 % after adjusting for foreign currency changes. There was an above-average increase in EBIT of 55 % to (euro) 33.1 million. The main reasons for the growth in earnings were the sustained positive development at Carbon and Graphite, the substantial increase in income at Specialties and cost savings of approximately (euro) 5 million in the first quarter of 2006. On March 17, 2006 the rating agency Standard & Poor's placed the ratings for SGL Carbon on positive watch for an upgrade as a result of the successful capital increase in March and in the expectation of a further reduction in debt.

On March 17, 2006 the rating agency Standard & Poor's placed the ratings for SGL Carbon on positive watch for an upgrade as a result of the successful capital increase in March and in the expectation of a further reduction in debt. On March 20, 2006, SGL Carbon received an upgrade from the rating agency Moody's on its ratings. The Corporate Family rating was raised by one notch from "B1" to "Ba3" with a "stable" outlook. The rating on secured facilities was increased from "B1" to "Ba3", and the rating on senior notes of SGL Carbon Luxemburg was upgraded from "B3" to "B2". These upgrades have a positive impact on SGL Carbon's potential future financing. According to Moody's, the higher rating is largely a consequence of the substantial improvement in the operational and financial performance in the last two years as well as the positive outlook for the Carbon and Graphite business unit presented by SGL Carbon at their annual press conference on March 9, 2006. The successful capital increase allows the Company additional financial flexibility.

### Net Financing Costs

The net financing costs recorded a slight improvement in Q1/2006 to minus (euro) 12.3 million compared with minus (euro) 13.1 million in the same quarter of the previous year. This is a result of reduced net interest expenses due to the decrease in financial liabilities and lower interest expenses in connection with the antitrust proceedings, resulting from the earlier than scheduled payment of the remaining North American antitrust liabilities in 2005.

The proceeds from the capital increase of March 2006 were used to fund the first EU antitrust fine in April 2006. Consequently, the bank guarantee for this EU antitrust fine was cancelled. Therefore guarantee fees and interest accruals are no longer required. These measures benefit the net financing costs so that from today's perspective we expect a financial result of approximately minus (euro) 50 million in 2006.

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

### Profit before and after taxes

During the reporting period, earnings before income taxes more than doubled from (euro) 8.2 million to (euro) 20.8 million. With a tax rate of 40 %, net profit for the period more than tripled from (euro) 3.9 million to (euro) 12.4 million. With an average number of shares of 57.5 million, the earnings per share were (euro) 0.22 in Q1/2006 compared with (euro) 0.07 in Q1/2005.

### Statement of Changes in Consolidated Shareholders' Equity

As a result of the capital increase and the net profit for the period, equity as at March 31, 2006 increased by (euro) 99 million to (euro) 421 million, thus leading to an improvement in the equity ratio from 27.2 % to 33.9 %. The cash funding of the EU antitrust fine relating to graphite electrodes to the amount of around (euro) 69 million plus accumulated interest made in April 2006 will again lead to a shortening of the balance sheet in Q2/2006. On a pro-forma basis, this will result in an equity ratio of more than 35 %. In the coming three months, we will examine whether the EU antitrust fine concerning Graphite Specialties amounting to (euro) 18.5 million plus accumulated interest should also be funded with cash for reasons of financial optimisation.

2

### Net Debt

As at March 31, 2006, there was a significant improvement in net financial debt due to the proceeds from the capital increase. The cash received from the capital increase was used to cash fund the first EU antitrust fine, for which a restricted account was established at the EU. The final utilization of these funds still depend on the outstanding appeals before the European courts. As we do not include restricted accounts in our calculation of net financial debt, we are adhering to our guidance for the full 2006 fiscal year to reduce net debt to below (euro) 240 million by year-end despite the positive development of net debt during Q1/2006.

### Segment reporting

#### Carbon and Graphite (CG)

In Q1/2006, sales increased by 7% to (euro) 152.7 million, currency-adjusted by 3%. Despite planned reduced deliveries of graphite electrodes, EBIT rose by 18 % to (euro) 31.5 million due to price increases and ongoing cost reduction measures. The return on sales improved to 20.6 % compared with 18.7 % in the same quarter of the previous year. The average prices for graphite electrodes increased by 21 % in USD and 10 % in EUR compared to Q1/2005. As expected, shipments of graphite electrodes decreased by around 14 % compared to the exceptionally strong Q1/2005, reaching a level of 45,000 metric tons, which is comparable to the first quarters of previous years. Factor costs increased in line with expectation by 10-15 %.

The price increases for graphite electrodes announced on April 24, 2006 will be applicable for all new orders received from April 21st, 2006 until further notice and for shipments through June 30th, 2007, and therefore have little impact on the 2006 fiscal year. For the current fiscal year, we therefore maintain already indicated price increases of 15-20 % in USD and 5-10 % in EUR,

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

with prices trending toward the upper ends of both brackets.

3

### Specialties (S)

Sales increased by 22 % to (euro) 72.3 million, currency-adjusted by 19 %, with all businesses contributing to the sales growth. Particularly demand from North America and from the Automotive and Mechanical Applications and Solar Energy customer sectors showed a favorable development. EBIT increased more than fivefold compared to the weak Q1/2005. Return on sales with 12.2 % reached our target range of 10-15 % for the first time.

### SGL Technologies (T)

Due to continued positive development of demand for carbon fibers and carbon fiber reinforced composite materials, sales increased by 10 % to (euro) 41.8 million, currency adjusted by 7 %. EBIT is burdened by a receivables writedown due to the Chapter 11 proceedings of Dana Corporation in the USA, a customer in the area of Expanded Graphite. Without this effect, EBIT would have reached break even, as announced in March 2006 despite ongoing development expenses in the Brakes business and new projects for the defense industry.

### Employees

The number of employees in the Group was 5,250 as at March 31, 2006 compared with 5,263 at the end of December 2005. Although the number of employees in Carbon and Graphite and Specialties declined slightly, headcount increased at SGL Technologies due to the ongoing expansion of business.

### Outlook

For Q2/2006, SGL Carbon is anticipating an increase in sales of around 5 % and an EBIT growth of at least 20% compared to the strong Q2/2005. The increase in sales for Carbon and Graphite is likely to continue comparable to the growth

4

rate in Q1/2006, while the improvement in EBIT is likely to accelerate slightly. For Specialties, we expect another solid quarter in terms of sales and EBIT which should reach roughly the same levels of the strong second quarter of the previous year. At SGL Technologies, we expect stable sales as a result of project-related order and delivery cycles affecting Q2/2006 however with an improved EBIT compared to Q2/2005. For the year as a whole, the company's outlook at Group level remains unchanged for the time being at an expected increase in sales of around 5 % and a low double digit improvement in EBIT.

### Retroactive adjustments

For the first time since the consolidated financial statements as at December 31, 2005, all previously non-consolidated subsidiaries are fully included in the scope of consolidation and two joint ventures are accounted for under the equity

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

method. For the quarterly representation of the 2005 fiscal year, the reported data were adjusted to include the previously non-consolidated companies and thus made comparable.

5

### Retroactive adjustments

-----

For the first time since the consolidated financial statements as at December 31, 2005, all previously non-consolidated subsidiaries are fully included in the scope of consolidation and two joint ventures are accounted for under the equity

method. For the quarterly representation of the 2005 fiscal year, the reported data were adjusted to include the previously non-consolidated companies and thus made comparable.

### Business Development in the Group

#### Consolidated Income Statement (unaudited)

-----

|   | 1st Quarter |       |
|---|-------------|-------|
|   | 2006        | 2005  |
| (euro) million  |             |       |
| Sales revenue   | 267.3       | 241.0 |
| Gross profit  | 82.1        | 66.3  |
| Selling, administrative, research<br>and other income/expense | -49.0       | -45.0 |
| Profit from operations  | 33.1        | 21.3  |
| Net financing costs   | -12.3       | -13.1 |
| Profit before tax   | 20.8        | 8.2   |
| Income taxes  | -8.4        | -4.3  |
| Net profit before minority interests                          | 12.4        | 3.9   |
| Earnings per share  | 0.22        | 0.07  |

Due to the favorable development of demand in all three business units, consolidated sales increased by 11% to (euro)267.3 million in Q1/2006, or 8% after adjusting for foreign currency changes. There was an above-average increase in EBIT of 55% to (euro)33.1 million. The main reasons for the growth in earnings were the sustained positive development at Carbon and Graphite, the substantial increase in income at Specialties and cost savings of approximately (euro)5 million in the first quarter of 2006.

On March 17, 2006 the rating agency Standard & Poor's placed the ratings for SGL Carbon on positive watch for an upgrade as a result of the successful capital increase in March and in the expectation of a further reduction in debt. On March 20, 2006, SGL Carbon received an upgrade from the rating agency Moody's on its ratings. The Corporate Family rating was raised by one notch from "B1" to "Ba3" with a "stable" outlook. The rating on secured facilities was increased from "B1" to "Ba3", and the rating on senior notes of SGL Carbon Luxemburg was upgraded from "B3" to "B2". These upgrades have a positive impact on SGL Carbon's potential future financing. According to Moody's, the higher rating is largely a consequence of the substantial improvement in the operational and financial performance in the last two years as well as the positive outlook for the Carbon and Graphite business unit presented by SGL Carbon at their annual press conference on March 9, 2006. The successful capital increase allows the Company additional financial flexibility.

### Details of Net Financing Costs

|  | 1st Quarter |       |
|--|-------------|-------|
|  | 2006        | 2005  |
| (euro) million                           |             |       |
| Interest expense on loans (net)          | -6.4        | -7.0  |
| Interest expense on pensions             | -3.3        | -3.1  |
| Interest expense on antitrust (non-cash) | -0.7        | -1.3  |
| Total interest expense, net              | -10.4       | -11.4 |
|  |             |       |
| Currency and hedging valuation           |             |       |
| adjustments of antitrust liabilities     |             |       |
| (non-cash)                               | 0.0         | -0.7  |
| Amortization of refinancing costs        | -0.9        | -1.0  |
| Other                                    | -1.0        | 0.0   |
| Total other financing expenses           | -1.9        | -1.7  |
| Net financing costs                      | -12.3       | -13.1 |

The net financing costs recorded a slight improvement in Q1/2006 to minus (euro)12.3 million compared with minus (euro)13.1 million in the same quarter of the previous year. This is a result of reduced net interest expenses due to the decrease in financial liabilities and lower interest expenses in connection with the antitrust proceedings, resulting from the earlier than scheduled payment of the remaining North American antitrust liabilities in 2005.

The proceeds from the capital increase of March 2006 were used to fund the first EU antitrust fine in April 2006. Consequently, the bank guarantee for this EU antitrust fine was cancelled. Therefore guarantee fees and interest accruals are no longer required. These measures benefit the net financing costs so that from today's perspective we expect a financial result of approximately minus (euro)50 million in 2006.

### Profit before and after taxes

During the reporting period, earnings before income taxes more than doubled from (euro)8.2 million to (euro)20.8 million. With a tax rate of 40%, net profit for the period more than tripled from (euro)3.9 million to (euro)12.4 million. With an average number of shares of (euro)57.5 million, the earnings per share were (euro)0.22 in Q1/2006 compared with (euro)0.07 in Q1/2005.

| Financial liabilities                                  | 2               | 6               |
| Trade payables   | 81              | 89              |
| Other liabilities                                      | 65              | 70              |
| Other provisions                                       | 142             | 151             |
|  | 290             | 316             |
| Total equity and liabilities                           | 1,244           | 1,183           |

As at March 31, 2006, total assets increased by around (euro)61 million compared with year-end 2005. The main reasons for this were the inflow of liquidity from the capital increase and the seasonally typical increase in working capital, while exchange rate effects had a shortening impact due primarily to the weakening of the US dollar against the euro. Cash and cash equivalents increased by (euro)55 million compared with December 31, 2005. The inflow of (euro)81 million from the capital increase in particular had a positive impact while cash and cash equivalents to the amount of (euro)13 million were used to pay back a loan.

### Working Capital

| (euro) million      | Mar 31,<br>2006 | Dec 31,<br>2005 |
|---------------------|-----------------|-----------------|
| Inventories         | 297             | 281             |
| Trade receivables   | 195             | 195             |
| Less trade payables | -81             | -89             |
| Working capital     | 411             | 387             |

The increase in working capital of around (euro)24 million (currency-adjusted (euro)28 million) compared with year-end 2005 is the result of higher than expected business activity primarily in Carbon and Graphite as well as in Specialties and corresponds to the typical seasonal development at this time of the year as part of the year's order book needs to be produced in advance.

### Statement of Changes in Consolidated Shareholders' Equity

|                         |                 |
|-------------------------|-----------------|
| Three<br>months<br>2006 | Equity<br>Ratio |
|-------------------------|-----------------|

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

| (euro) million                          | ----- |       |
|---|-------|-------|
| Balance at January 1                    | 322   | 27.2% |
| Capital increase                        | 82    |       |
| Net profit                              | 12    |       |
| Currency exchange differences and other | 5     |       |
| Balance at March 31                     | 421   | 33.9% |

As a result of the capital increase and the net profit for the period, equity as at March 31, 2006 increased by (euro)99 million to (euro)421 million, thus leading to an improvement in the equity ratio from 27.2% to 33.9%. The cash funding of the EU antitrust fine relating to graphite electrodes to the amount of around (euro)69 million plus accumulated interest made in April 2006 will again lead to a shortening of the balance sheet in Q2/2006. On a pro-forma basis, this will result in an equity ratio of more than 35%. In the coming three months, we will examine whether the EU antitrust fine concerning Graphite Specialties amounting to (euro)18.5 million plus accumulated interest should also be funded with cash for reasons of financial optimisation.

### Net Debt

| (euro) million                | Mar 31,<br>2006 | Dec 31,<br>2005 |
|-------------------------------|-----------------|-----------------|
|                               | -----           |                 |
| Financial liabilities         | 329             | 342             |
| plus accrued refinancing cost | 15              | 16              |
| Cash and cash equivalents     | -148            | -93             |
| Net financial debt            | 196             | 265             |

As at March 31, 2006, there was a significant improvement in net financial debt due to the proceeds from the capital increase. The cash received from the capital increase was used to cash fund the first EU antitrust fine, for which a restricted account was established at the EU. The final utilization of these funds still depend on the outstanding appeals before the European courts. As we do not include restricted accounts in our calculation of net financial debt, we are adhering to our guidance for the full 2006 fiscal year to reduce net debt to below (euro)240 million by year-end despite the positive development of net debt during Q1/2006.

\*defined as cash used in operating activities before antitrust payments plus cash used in investing activities

In line with the reporting in the annual report, we have adapted the quarterly cash flow statements according to the indirect method as defined under IAS 7.

In Q1/2006, SGL Carbon achieved an improved but still slightly negative operating cash flow of minus (euro)1.3 million compared with minus (euro)9.7 million in Q1/2005. The main reasons for the negative cash flow are the currency-adjusted increase in working capital of (euro)27.6 million ((euro)23.6 million in Q1/2005) which is typical for this time of the year and the (euro)12.7 million ((euro)13.6 million in Q1/2005) interest payments on our financial liabilities which are influenced by the half-yearly payment schedule on our bond (8.5% coupon).

Accordingly, free cash flow also posted a negative though improved figure of minus (euro)13.5 million compared with minus (euro)16.9 million in Q1/2005 despite higher capital expenditure of (euro)12.2 million this quarter compared to (euro)7.2 million in Q1/2005. With the typical normalization of working capital in the course of the year and despite higher capital expenditure of around (euro)60 million (2005: (euro)45 million), we still expect for the full year 2006 a free cash flow of at least (euro)25 million, which we want to use to reduce our net debt to below (euro)240 million.

Cash provided by financing activities amounted to (euro)69.0 million Q1/2005: cash used (euro)3.2 million), which is mainly due to the net cash inflow from the capital increase.

Segment Reporting

Carbon and Graphite (CG)

1st Quarter

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

|                        | 2006  | 2005  |
|------------------------|-------|-------|
| (euro) million         |       |       |
| Sales revenue          | 152.7 | 143.3 |
| EBITDA                 | 38.4  | 34.5  |
| Profit from operations | 31.5  | 26.8  |
| Return on sales        | 20.6% | 18.7% |

In Q1/2006, sales increased by 7% to (euro)152.7 million, currency-adjusted by 3%. Despite planned reduced deliveries of graphite electrodes, EBIT rose by 18% to (euro)31.5 million due to price increases and ongoing cost reduction measures. The return on sales improved to 20.6% compared with 18.7% in the same quarter of the previous year. The average prices for graphite electrodes increased by 21% in USD and 10% in EUR compared to Q1/2005. As expected, shipments of graphite electrodes decreased by around 14% compared to the exceptionally strong Q1/2005, reaching a level of 45,000 metric tons, which is comparable to the first quarters of previous years. Factor costs increased in line with expectation by 10-15%.

The price increases for graphite electrodes announced on April 24, 2006 will be applicable for all new orders received from April 21st, 2006 until further notice and for shipments through June 30th, 2007, and therefore have little impact on the 2006 fiscal year. For the current fiscal year, we therefore maintain already indicated price increases of 15-20% in USD and 5-10% in EUR, with prices trending toward the upper ends of both brackets.

| Specialties (S)        | 1st Quarter |      |
|------------------------|-------------|------|
|                        | 2006        | 2005 |
| (euro) million         |             |      |
| Sales revenue          | 72.3        | 59.1 |
| EBITDA                 | 11.7        | 4.7  |
| Profit from operations | 8.8         | 1.5  |
| Return on sales        | 12.2%       | 2.5% |

Sales increased by 22% to (euro)72.3 million, currency-adjusted by 19%, with all businesses contributing to the sales growth. Particularly demand from North America and from the Automotive and Mechanical Applications and Solar Energy customer sectors showed a favorable development. EBIT increased more than fivefold compared to the weak Q1/2005. Return on sales with 12.2% reached our target range of 10-15% for the first time.

| SGL Technologies (T)   | 1st Quarter |       |
|------------------------|-------------|-------|
|                        | 2006        | 2005  |
| (euro) million         |             |       |
| Sales revenue          | 41.8        | 38.0  |
| EBITDA                 | 2.0         | 2.8   |
| Profit from operations | -0.8        | -0.5  |
| Return on sales        | -1.9%       | -1.3% |

Due to continued positive development of demand for carbon fibers and carbon fiber reinforced composite materials, sales increased by 10% to (euro)41.8 million, currency adjusted by 7%. EBIT is burdened by a receivables writedown due to the Chapter 11 proceedings of Dana Corporation in the USA, a customer in the area of Expanded Graphite. Without this effect, EBIT would have reached break even, as announced in March 2006 despite ongoing development expenses in the Brakes business and new projects for the defense industry.

## Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

| Corporate Costs | 1st Quarter |      |
|-----------------|-------------|------|
| (euro) million  | 2006        | 2005 |
| Other revenue   | 0.5         | 0.6  |
| Corporate costs | -6.4        | -6.5 |

Despite higher expenses arising from the implementation of the Sarbanes-Oxley Act as well as share-based payments, Corporate costs at (euro)6.4 million remained virtually unchanged in Q1/2006 compared to the same quarter of the previous year.

### Employees

The number of employees in the Group was 5,250 as at March 31, 2006 compared with 5,263 at the end of December 2005. Although the number of employees in Carbon and Graphite and Specialties declined slightly, headcount increased at SGL Technologies due to the ongoing expansion of business.

### Outlook

For Q2/2006, SGL Carbon is anticipating an increase in sales of around 5% and an EBIT growth of at least 20% compared to the strong Q2/2005. The increase in sales for Carbon and Graphite is likely to continue comparable to the growth rate in Q1/2006, while the improvement in EBIT is likely to accelerate slightly. For Specialties, we expect another solid quarter in terms of sales and EBIT which should reach roughly the same levels of the strong second quarter of the previous year. At SGL Technologies, we expect stable sales as a result of project-related order and delivery cycles affecting Q2/2006 however with an improved EBIT compared to Q2/2005.

For the year as a whole, the company's outlook at Group level remains unchanged for the time being at an expected increase in sales of around 5% and a low double digit improvement in EBIT.

### Quarterly Sales Revenue and Profit from Operations by Business Area

#### Important note:

This interim report contains opinions on future developments which are based on currently available information and do not include the risks and uncertainties which may result in the actual results deviating from the opinions given on

future developments. The opinions on future developments are not to be taken as guarantees. Rather, the future developments and occurrences are dependent on a multitude of factor, they include different risks and imponderables and are based on assumptions which may prove to be inaccurate. These include, for example, unforeseeable changes in policy, economic and social conditions, especially in terms of electric steel production, the competitive situation, interest rate and currency developments, technological developments and other risks and imponderables. We see further risks in, amongst other things, price developments, unforeseeable events in terms of acquired companies and Group companies, as well as with the current cost optimization programs. SGL Carbon does not intend to update these opinions on future developments.
