Mitsui & Co., Ltd. (Mitsui) and its subsidiaries (collectively the Group) posted consolidated a net income of ¥334.5 billion, a significant increase of ¥90.3 billion, or up 37.0 %, from ¥244.2 billion which was the consolidated net income for the corresponding period of the previous year. In regards to the individual businesses, the Mineral & Metal Resources and the Energy made an outstanding performance reflecting substantial one-off gains on divestitures such as Sesa Goa Limited in India and Sakhalin II in Russia as well as increases in energy equity production and mineral resource prices. The Iron & Steel Products, the Chemicals and the Machinery and Infrastructure Projects continued to post robust results, and the Foods and Retail which had recorded significant impairment losses in the previous year has improved its performance with the restructuring efforts paying off. On the other hand, the Americas recorded a downturn from write downs on inventories in residential home business and slowdown in its businesses in the United States, triggered by the sub-prime mortgage issues. In addition, several operating segments at the head office recorded increases in write downs on listed securities. The Group maintains the forecast consolidated net income for the year ending March 31, 2008 as ¥420 billion, despite recently increasing uncertainties surrounding the United States and global economy.

Total assets as of December 31, 2007 were ¥10.2 trillion, an increase of ¥0.4 trillion from ¥9.8 trillion as of March 31, 2007. Investments and plant, property and equipment (PPE) increased slightly reflecting various new investments and expansion projects at the Machinery & Infrastructure Projects, the Mineral & Metal Resources, the Energy and the Americas segments while the investment balance into the Sakhalin II project decreased as a result of the partial divestiture of our stake in the project. As of December 31, 2007, shareholders equity was ¥2.4 trillion as a result of increased retained earnings and Net Debt-to-Equity Ratio (Net DER) was 1.27 times, 0.20 times lower than that of March 31, 2007. Return on Equity (ROE) during the period on an annualized basis is computed as 19.9%.

2. Results of Operations

(1) Analysis on consolidated income statements

Gross Profit

Gross profit for the nine month period ended December 31, 2007 was ¥720.8 billion, an increase of ¥92.0 billion, or 14.6%, from ¥628.8 billion for the corresponding nine month period of the previous year as a result of the followings:

Contributions coming from Mitsui Oil Exploration Co., Ltd. (Japan) (MOECC⁽¹⁾) which was consolidated in the fourth quarter of the year ended March 31, 2007; and the commercial start up of the Enfield oil field in Australia in July 2006 both at the Energy Segment. In addition, gross profit of Mitsui Iron Ore Development Pty. Ltd. (Australia) increased reflecting an increase in iron ore price⁽²⁾. These contributions were partly offset by a decline of gross profit at Mitsui Mitsui Coal Holdings Pty. Ltd. (Australia) reflecting a lower coal price, the Australian Dollar appreciation against the U.S. Dollar and a delay and troubles in start-up operations at its mining expansion project. In short, the energy and oil and gas producing activities led the overall growth of the Group s gross profit.

Machinery businesses including automotive, ocean vessels, rolling stock leasing; and basic materials such as steel products and chemical products continued to show good performance and increased their gross profit.

The Americas Segment recorded a substantial decrease over the corresponding nine month period of the previous year. MBK Real Estate Ltd. (United States), which engages in development and sale of residential homes in the West Coast market, recorded a sharp fall in sales and a loss from write-down on inventories reflecting a deterioration in the residential market triggered by the sub-prime mortgage related issue in the United States. Moreover, Westport Petroleum Inc. (United States) decreased its profit from oil products trading and so did steel products subsidiaries mainly in oil tubular products reflecting lower margins.

(*1) In March 2007, Mitsui acquired 3% stake in MOECO, formerly an associated company, increasing its voting interest in MOECO to 50.3% and re-classifying MOECO as a subsidiary of Mitsui.

(*2) As a result of Mitsui's divestiture of Sesa Goa, the operating results of Sesa Goa for the six month periods ended September 30, 2007 and 2006 are presented as income from discontinued operations (after income tax effect).

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the nine month period ended December 31, 2007 were ¥446.6 billion, an increase of ¥21.0 billion from ¥425.6 billion for the corresponding nine month period of the previous year. Mitsui recorded a ¥5.2 billion increase reflecting higher Japanese Yen interest rates. Overseas subsidiaries also reported increases by ¥5.2 billion in total due to increased interest bearing debt used to fund various investments.

(2) Operating Results by Operating Segment

Iron & Steel Products Segment

Gross profit for the nine month period ended December 31, 2007 was ¥47.1 billion, an increase of ¥4.6 billion from ¥42.5 billion for the corresponding nine month period of the previous year. Overall steel products business continued to show steady performance mainly in high-end tubular products for energy applications under a tight supply-demand balance. Rising stainless steel products prices and strong performance at Regency Steel Asia Pte Ltd. (Singapore) also contributed to the increase in earnings as well.

Operating income for the nine month period ended December 31, 2007 was ¥ 21.2 billion, an increase of ¥2.2 billion from ¥19.0 billion for the corresponding nine month period of the previous year. The increase in gross profit was partly offset by higher selling, general and administrative expenses.

Equity in earnings of associated companies for the nine month period ended December 31, 2007 was ¥4.0 billion, an increase of ¥1.5 billion from ¥2.5 billion for the corresponding nine month period of the previous year.

Net income for the nine month period ended December 31, 2007 was ¥17.6 billion, a ¥1.7 billion increase from ¥15.9 billion for the corresponding nine month period of the previous year.

Mineral & Metal Resources Segment

Gross profit for the nine month period ended December 31, 2007 was ¥72.1 billion, a decrease of ¥9.6 billion from ¥81.7 billion for the corresponding nine month period of the previous year as a result of the followings:

The divestiture in April 2007 of the Group's whole stake in Sesa Goa Limited, formerly the Group's iron ore subsidiary, which resulted in a decrease of this segment's gross profit by ¥16.3 billion(*), an amount Sesa Goa Limited contributed for the corresponding nine month period of the previous year.

Reflecting tight supply and demand balance in Asia, especially in China, iron ore prices for the year ending March 31, 2008 increased by 9.5 % from the year ended March 31, 2007. Consequently, gross profit at Mitsui Iron Ore Development Pty. Ltd. (Australia) and Mitsui Itochu Iron Pty. Ltd. (Australia) increased by ¥5.5 billion and ¥3.1 billion, respectively.

Operating income for the nine month period ended December 31, 2007 was ¥60.1 billion, a decrease of ¥7.2 billion from ¥67.3 billion for the corresponding nine month period of the previous year, due to the above-mentioned decrease in gross profit. There was a marginal improvement in selling, general administrative expenses, as a result of the divestiture of Sesa Goa Limited.

Equity in earnings of associated companies for the nine month period ended December 31, 2007 was ¥59.1 billion, an increase of ¥10.2 billion from ¥48.9 billion for the corresponding nine month period of the previous year. Major factors contributing to the increase were as follows:

Valepar S.A. (Brazil) posted an increase by ¥9.9 billion over the corresponding nine month period of the previous year when it recorded a ¥5.6 billion one-time gain on issuance of stock by Vale in exchange for Caemi Mineração e Metalurgia S.A stock. This increase is due to strong operating results of Vale reflecting higher iron prices and contributions from newly acquired Inco Limited (currently Vale Inco Limited) following the acquisition by Vale during the fourth quarter of the year ended March 31, 2007.

Despite firm copper market price, earnings of Compania Minera Dona Ines de Collahuasi SCM (Chile) decreased by ¥2.2 billion from the corresponding nine month period of the previous year, due to reduced shipment of products caused by replacement work on property and equipment.

Sims Group Limited (Australia), which the Group acquired 19.9% of its shares in June 2007, added a new contribution in earnings for ¥1.8 billion.

Net income for the nine month period ended December 31, 2007 was ¥148.3 billion, a significant increase of ¥61.2 billion from ¥87.1 billion for the corresponding nine month period of the previous year. Besides the above-mentioned factors, there were significant movements in gains on sales of securities for the nine month period ended December 31, 2007 and 2006 as follows:

For the nine month period ended December 31, 2007, this segment recorded a ¥93.9 billion gain on the sale of its whole stake in Sesa Goa Limited^(*). In addition, it also recorded a ¥12.4 billion gain on the sale of shares in Empreendimentos Brasileiros de Mineração S.A.

For the corresponding nine month period of the previous year, this segment recorded a ¥14.2 billion gain on the sale of shares in Toho Titanium Co., Ltd. (Japan).

(*) In the consolidated statements of income, net income of Sesa Goa for the nine month periods ended December 31, 2007 and 2006 are presented as income from discontinued operations (after income tax effect). However, in this Operating Results by Operating Segment ,

Operating income for the nine month period ended December 31, 2007 was ¥ 24.0 billion, an increase of ¥13.3 billion from ¥10.7 billion for the corresponding nine month period of the previous year. The increase is primarily attributable to the improvement in gross profit in ocean vessels and marine project businesses; and infrastructure projects businesses. Operating income of automotive and machined tools related subsidiaries increased in general, however, increase in the relevant gross profit was largely offset by increases in selling, general and administrative expenses and provision for doubtful receivables.

Paiton Energy (Indonesia) reported equity in earnings of ¥2.4 billion in total, a decrease of ¥4.3 billion from ¥6.7 billion earnings for the corresponding nine month period of the previous year. The decrease is due to a ¥4.5 billion mark-to-market evaluation loss recorded by IPM Eagle on a long-term swap contract in one its Australian power producing operations for the nine month period ended December 31, 2007. (decreased from a mark-to-market evaluation loss of ¥9.4 billion recorded as of September 30, 2007 reflecting a softening Australian electricity market.)

This segment recorded a ¥5.5 billion equity in loss reflecting an other-than- temporary decline in share price of ASAHI TEC CORPORATION (Japan), a manufacturer of ductile iron cast parts and aluminum forged parts.

The other associated companies reported improved earnings in general, such as the gas distribution companies in Brazil and the automotive and construction machinery related businesses.
