UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2008

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number: 1-8944

CLEVELAND-CLIFFS INC

(Exact Name of Registrant as Specified in Its Charter)

Ohio
(State or Other Jurisdiction of
Incorporation or Organization)

34-1464672
(I.R.S. Employer
Identification No.)

1100 Superior Avenue, Cleveland, Ohio 44114-2544

(Address of Principal Executive Offices) (Zip Code)

Registrant's Telephone Number, Including Area Code: (216) 694-5700

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for

the past 90 days.

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

As of July 28, 2008, there were 106,720,100 Common Shares (par value \$0.125 per share) outstanding.

Table of Contents**CLEVELAND-CLIFFS INC AND CONSOLIDATED SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

June 30, 2008

NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with SEC rules and regulations and in the opinion of management, contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly, the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The interim results are not necessarily indicative of results for the full year. These unaudited condensed consolidated financial statements should be read in conjunction with the financial statements and notes included in Cleveland-Cliffs Annual Report on Form 10-K for the year ended December 31, 2007. All common shares and per share amounts have been adjusted retroactively to reflect the two-for-one stock split effective May 15, 2008.

The unaudited condensed consolidated financial statements include our accounts and the accounts of our consolidated subsidiaries, including the following significant subsidiaries:

Name	Location	Ownership Interest	Operation
Northshore	Minnesota	100.0%	Iron Ore
Pinnacle	West Virginia	100.0%	Coal
Oak Grove	Alabama	100.0%	Coal
Portman	Western Australia	85.2%	Iron Ore
Tilden	Michigan	85.0%	Iron Ore
Empire	Michigan	79.0%	Iron Ore
United Taconite	Minnesota	70.0%*	Iron Ore

* On July 11, 2008 we acquired the remaining 30 percent from minority

interest shareholders, with an effective date of July 1, 2008.

Intercompany accounts are eliminated upon consolidation.

On May 21, 2008, Portman authorized a tender offer to repurchase up to 16.5 million shares, or 9.39 percent of its common stock. On this date, we owned 80.4 percent of the approximately 176 million shares outstanding in Portman and indicated we would not participate in the tender buyback. Under the share tender program, eligible shareholders could offer to sell some or all of their shareholdings at a fixed-price discount of 14 percent to the volume-weighted average price of Portman shares traded on ASX during the five trading days after the date of announcement. The tender period closed on June 24, 2008. Under the buyback, 9.8 million fully paid ordinary shares were tendered at a price of A\$14.66 per share. The total consideration paid under the buyback was A\$143.3 million. As a result of the buyback, our ownership interest in Portman increased from 80.4 percent to 85.2 percent. See NOTE 4 ACQUISITIONS & OTHER INVESTMENTS for further information.

Through various interrelated arrangements, we achieve a 45 percent economic interest in Sonoma, despite the ownership percentages of the individual pieces of Sonoma. We own 100 percent of CAWO, 8.33 percent of the exploration permits and applications for mining leases for the real estate that is involved in Sonoma (Mining Assets) and 45 percent of the

Table of Contents

infrastructure, including the construction of a rail loop and related equipment (Non-Mining Assets). CAWO is consolidated as a wholly-owned subsidiary, and as a result of being the primary beneficiary, we absorb greater than 50 percent of the residual returns and expected losses of CAWO. We record our ownership share of the Mining Assets and Non-Mining Assets and share in the respective costs.

Our investments in ventures include our 30 percent equity interest in Amapá, an iron ore project located in Brazil, our 23 percent equity interest in Hibbing, an unincorporated joint venture in Minnesota, our 26.83 percent equity interest in Wabush, an unincorporated joint venture located in Canada, and Portman's 50 percent non-controlling interest in Cockatoo Island.

Investments in certain joint ventures (Wabush, Cockatoo Island, Hibbing) in which our ownership is 50 percent or less, or in which we do not have control but have the ability to exercise significant influence over operating and financial policies, are accounted for under the equity method. Our share of equity income (loss) is eliminated against consolidated product inventory upon production, and against cost of goods sold and operating expenses when sold. This effectively reduces our cost for our share of the mining venture's production to its cost, reflecting the cost-based nature of our participation in unconsolidated ventures.

Our 30 percent ownership interest in Amapá, in which we do not have control but have the ability to exercise influence over operating and financial policies, is accounted for under the equity method. Accordingly, our share of the results from Amapá is reflected as *Equity loss from ventures* on the Statements of Unaudited Condensed Consolidated Operations.

The following table presents the detail of our investments in ventures and where those investments are classified on the Statements of Condensed Consolidated Financial Position. Parentheses indicate a net liability.

Investment	Classification	Interest Percentage	(In Millions)	
			June 30, 2008	December 31, 2007
Amapá	<i>Investments in ventures</i>	30	\$ 251.8	\$ 247.2
Wabush	<i>Investments in ventures</i>	27	6.7	5.8
Cockatoo	<i>Other current liabilities</i>	50	(16.6)	(9.9)
Hibbing (1)	<i>Investments in ventures</i>	23	0.5	(0.3)
Other	<i>Investments in ventures</i>		6.3	12.3
			\$ 248.7	\$ 255.1

(1) Recorded as *Other liabilities* at December 31, 2007.

The increase in the liability related to Cockatoo is primarily attributable to an increase in the estimated asset retirement obligation in connection with a revised assessment of the mine closure plan.

Table of Contents

In preparing our second quarter 2008 interim financial statements, we determined that we should have recognized additional revenue of approximately \$55 million in our first quarter 2008 interim financial statements. In accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133), the fair value of the derivative asset relating to shipments made, on which pricing was not yet settled, should have been estimated and recognized in earnings. At the time such shipments were made during the first quarter, we recorded revenue using 2007 international benchmark pricing and should have recorded a derivative asset for the expected increase in the 2008 international benchmark in addition to the amount we recorded in revenue. Although the amount of this adjustment is quantitatively significant to the first quarter of 2008, the additional revenue is fully recorded in our second quarter interim financials and is, therefore, correctly reflected in 2008 year to date earnings by the end of the second quarter. Additionally, we disclosed the nature and potential amount of the adjustment in our first quarter MD&A. Accordingly, we do not believe that this adjustment materially misstates or warrants restatement of our first quarter 2008 unaudited condensed consolidated financial statements.

NOTE 2 ACCOUNTING POLICIES**Revenue Recognition****North American Iron Ore**

Revenue is recognized on the sale of products when title to the product has transferred to the customer in accordance with the specified provisions of each term supply agreement and all applicable criteria for revenue recognition have been satisfied. Most of our North American Iron Ore term supply agreements provide that title transfers to the customer when payment is received. Under some term supply agreements, we ship the product to ports on the lower Great Lakes and/or to the customer's facilities prior to the transfer of title. Certain supply agreements with one customer include provisions for supplemental revenue or refunds based on the customer's annual steel pricing at the time the product is consumed in the customer's blast furnaces. We account for this provision as a derivative instrument at the time of sale and record this provision at fair value until the product is consumed and the amounts are settled as an adjustment to revenue.

Revenue also includes reimbursement for freight charges. The following table is a summary of reimbursement in our North American Iron Ore operations for the three and six months ended June 30, 2008 and 2007:

	(In Millions)			
	Three Months Ended		Six Months Ended	
	June 30, 2008	June 30, 2007	June 30, 2008	June 30, 2007
Reimbursements for:				
Freight	\$ 24.6	\$ 21.1	\$ 41.6	\$ 33.3
Venture partners cost	53.7	51.9	106.2	99.0
Total reimbursements	\$ 78.3	\$ 73.0	\$ 147.8	\$ 132.3

North American Coal

We recognize revenue when title passes to the customer. For domestic coal sales, this generally occurs when coal is loaded into rail cars at the mine. For export coal sales, this generally occurs when coal is loaded into the vessels at the terminal. Revenue from product

Table of Contents

sales for the three and six months ended June 30, 2008 included reimbursement for freight charges of \$8.7 million and \$21.7 million, respectively.

Asia-Pacific Iron Ore

Sales revenue is recognized at the F.O.B. point, which is generally when the product is loaded into the vessel.

Deferred Revenue

In 2008, the terms of one of our North American Iron Ore pellet supply agreements require a prepayment by the customer for one estimated weekly shipment of pellets in addition to the amount of the bi-weekly invoice for shipments previously made. In 2007, the terms of the agreement required semi-monthly installments equaling 1/24th of the estimated total purchase value of the calendar-year nomination. In both years, revenue related to this supply agreement has been recognized when title transfers upon shipment of the pellets. Installment amounts received in excess of sales totaled \$9.0 million and \$14.6 million, which were recorded as *Deferred revenue* on the Statements of Condensed Consolidated Financial Position at June 30, 2008 and December 31, 2007, respectively.

Two of our North American Iron Ore customers purchased and paid for approximately 1.5 million tons of iron ore pellets in stockpiles in the fourth quarter of 2007. The customers requested the Company to not ship the iron ore pellets until the spring of 2008 under a fixed shipment schedule, when the Great Lakes waterways re-opened for shipping. Freight revenue related to these transactions of \$13.8 million was deferred on the Statements of Condensed Consolidated Financial Position at December 31, 2007 and subsequently recognized in 2008 upon shipment. First and second quarter 2008 freight revenues included \$5.3 million and \$8.5 million, respectively, related to the shipment of 0.6 million and 0.9 million respective tons of pellets from the stockpiles.

Derivative Financial Instruments

Portman receives funds in United States currency for its iron ore sales. Portman uses forward exchange contracts, call options, collar options and convertible collar options, designated as cash flow hedges, to hedge its foreign currency exposure for a portion of its sales receipts. United States currency is converted to Australian dollars at the currency exchange rate in effect at the time of the transaction. The primary objective for the use of these instruments is to reduce the volatility of earnings due to changes in Australian and United States currency exchange rates and to protect against undue adverse movement in these exchange rates. At June 30, 2008, Portman had \$559.2 million of outstanding exchange rate contracts in the form of call options, collar options, convertible collar options and forward exchange contracts with varying maturity dates ranging from July 2008 to May 2011, with a fair value adjustment of \$44.4 million based on the June 30, 2008 spot rate. We had \$32.1 million and \$15.7 million of foreign currency hedge contracts recorded as *Derivative assets* on the June 30, 2008 and December 31, 2007 Statements of Condensed Consolidated Financial Position, respectively. We also had \$12.3 million and \$5.9 million of foreign currency hedge contracts recorded as non-current assets in *Deposits and miscellaneous* on the Statements of Condensed Consolidated Financial Position at June 30, 2008 and December 31, 2007, respectively. Changes in fair value for highly effective hedges are recorded as a component of *Other comprehensive income*. For the first six months of 2008 and 2007, ineffectiveness resulted in a loss of \$8.6 million and a loss \$2.3 million, respectively, which were recorded in *Miscellaneous-net* on the Statements of Unaudited Condensed Consolidated Operations.

Table of Contents

Effective July 1, 2008, Portman de-designated these cash flow hedges and will prospectively mark to market future hedges through the Statements of Operations.

Certain supply agreements with one North American Iron Ore customer provide for supplemental revenue or refunds based on the customer's average annual steel pricing at the time the product is consumed in the customer's blast furnace. The supplemental pricing is characterized as an embedded derivative and is required to be accounted for separately from the base contract price. The embedded derivative instrument, which is finalized based on a future price, is marked to fair value as a revenue adjustment each reporting period until the pellets are consumed and the amounts are settled. We recognized \$84.3 million and \$20.0 million, in the second quarter of 2008 and 2007, respectively, and \$110.3 million and \$29.6 million for the six months ended June 30, 2008 and 2007, respectively, as *Product* revenues on the Statements of Unaudited Condensed Consolidated Operations related to the supplemental payments. Derivative assets, representing the fair value of the pricing factors, were \$125.8 million and \$53.8 million, respectively, on the June 30, 2008 and December 31, 2007 Statements of Condensed Consolidated Financial Position.

Certain supply agreements primarily with our Asia-Pacific customers provide for revenue or refunds based on the ultimate settlement of annual international benchmark pricing provisions. The pricing provisions are characterized as freestanding derivatives and are required to be accounted for separately once iron ore is shipped. The derivative instrument, which is settled and billed once the annual international benchmark price is settled, is marked to fair value as a revenue adjustment each reporting period based upon the estimated forward settlement until the benchmark is actually settled. We recognized \$160.6 million as *Product* revenues in the Statements of Unaudited Condensed Consolidated Operations for both the three and six months ended June 30, 2008, related to the 2008 pricing provisions. See Note 1 BASIS OF PRESENTATION regarding the portion of this revenue related to shipments made during the three months ended March 31, 2008. The derivative instrument was settled during the second quarter of 2008 upon settlement of annual international benchmark prices and is therefore not reflected on the June 30, 2008 Statement of Condensed Consolidated Financial Position.

Effective October 19, 2007, we entered into a \$100 million fixed interest rate swap to convert a portion of our floating rate debt to fixed rate debt. Interest on borrowings under our credit facility is based on a floating rate, dependent in part on the LIBOR rate, exposing us to the effects of interest rate changes. The objective of the hedge is to eliminate the variability of cash flows in interest payments for forecasted floating rate debt, attributable to changes in benchmark LIBOR interest rates. To support hedge accounting, we designate floating-to-fixed interest rate swaps as cash flow hedges of the variability of future cash flows at the inception of the swap contract. The amount charged to *Other comprehensive income* for the six months ended June 30, 2008 was \$0.8 million. Derivative liabilities, totaling \$2.2 million and \$1.4 million, were recorded as *Other current liabilities* on the Statements of Condensed Consolidated Financial Position as of June 30, 2008 and December 31, 2007, respectively. There was no ineffectiveness recorded for the interest rate swap in the first six months of 2008.

Table of Contents**Inventories**

The following table presents the detail of our *Inventories* on the Statements of Condensed Consolidated Financial Position at June 30, 2008 and December 31, 2007:

	(In Millions)					
	June 30, 2008			December 31, 2007		
	Finished Goods	Work-in Process	Total Inventory	Finished Goods	Work-in Process	Total Inventory
North American Iron Ore	\$ 297.1	\$ 9.3	\$ 306.4	\$ 114.3	\$ 16.5	\$ 130.8
North American Coal	15.4	0.9	16.3	8.3	0.8	9.1
Asia-Pacific Iron Ore	38.0	92.8	130.8	30.2	71.8	102.0
Other	10.6	2.7	13.3	-	-	-
Total	\$ 361.1	\$ 105.7	\$ 466.8	\$ 152.8	\$ 89.1	\$ 241.9

Our North American Iron Ore sales for the first half of the year are influenced by winter-related shipping constraints on the Great Lakes. While we continue to produce our products during the winter months, we cannot ship those products via lake freighter until the Great Lakes are passable, which causes our inventory levels to rise during the first half of the year. Finished goods inventory then begins to decline as sales increase later in the year.

Income Taxes

Income taxes are based on income for financial reporting purposes calculated using our expected annual effective rate and reflect a current tax liability or asset for the estimated taxes payable or recoverable on the current year tax return and expected annual changes in deferred taxes. Any interest or penalties on income tax are recognized as a component of income tax expense.

We account for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial results of operations. In the event we were to determine that we would be able to realize our deferred income tax assets in the future in excess of their net recorded amount, we would make an adjustment to the valuation allowance which would reduce the provision for income taxes. See NOTE 10 INCOME TAXES for further information.

Fair Value Measurements

Valuation Hierarchy

SFAS No. 157, *Fair Value Measurements* (SFAS 157) establishes a three-level valuation hierarchy for classification of fair value measurements. The valuation hierarchy is

Table of Contents

based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date.

Level 1 Valuation is based upon quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Valuation is based upon quoted prices for similar assets and liabilities in active markets, or other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 Valuation is based upon other unobservable inputs that are significant to the fair value measurement.

The classification of assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement in its entirety. Valuation methodologies used for assets and liabilities measured at fair value are as follows:

Cash Equivalents

Where quoted prices are available in an active market, cash equivalents are classified within Level 1 of the valuation hierarchy. Cash equivalents classified in Level 1 at June 30, 2008 include money market funds. The valuation of these instruments is determined using a market approach and is based upon unadjusted quoted prices for identical assets in active markets. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows. In these instances, the valuation is based upon quoted prices for similar assets and liabilities in active markets, or other inputs that are observable for substantially the full term of the financial instrument, and the related financial instrument is therefore classified within Level 2 of valuation the hierarchy. Level 2 securities include short-term investments such as commercial paper for which the value of each investment is a function of the purchase price, purchase yield, and maturity date.

Marketable Securities

Where quoted prices are available in an active market, marketable securities are classified within Level 1 of the valuation hierarchy. Marketable securities classified in Level 1 at June 30, 2008 include available for sale securities. The valuation of these instruments is determined using a market approach and is based upon unadjusted quoted prices for identical assets in active markets.

Derivative Financial Instruments

Derivative financial instruments valued using financial models that use as their basis readily observable market parameters are classified within Level 2 of the valuation hierarchy. Such derivative financial instruments include substantially all of our foreign currency exchange contracts and interest rate swap agreements. Derivative financial instruments that are valued based upon models with significant unobservable market parameters, and that are normally traded less actively, are classified within Level 3 of the valuation hierarchy.

Table of Contents

Non-Financial Assets and Liabilities

We have deferred the adoption of SFAS 157 until January 1, 2009 with respect to non-financial assets and liabilities in accordance with the provisions of FSP FAS 157-2. Items that are recognized or disclosed at fair value for which we have not applied the provisions of SFAS 157 include goodwill, asset retirement obligations, guarantees and certain other items. See NOTE 11 FAIR VALUE OF FINANCIAL INSTRUMENTS for further information.

Reclassifications

Certain amounts in the prior year consolidated financial statements have been reclassified to conform to the current year presentation. They included the reclassification of certain amounts included in *Miscellaneous net to Selling, general and administrative expenses* on the Statements of Unaudited Condensed Consolidated Operations.

Recent Accounting Pronouncements

In May 2008, the FASB issued FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS 162). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with U.S. GAAP. SFAS 162 is effective 60 days following the SEC's approval of the PCAOB's related amendments to remove the GAAP hierarchy from auditing standards, where it has previously resided. We are evaluating the impact SFAS 162 will have on our consolidated financial statements upon adoption, but do not expect this Statement to result in a material change in current practice.

In April 2008, the FASB issued FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142). The objective of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141(R), and other U.S. GAAP. This FSP applies to all intangible assets, whether acquired in a business combination or otherwise and shall be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years and applied prospectively to intangible assets acquired after the effective date. Early adoption is prohibited. We are currently evaluating the impact adoption of this FSP will have on our consolidated financial statements.

In March 2008, the FASB issued Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, (SFAS 161). This Statement amends and expands the disclosure requirements of Statement 133 to provide users of financial statements with an enhanced understanding of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The new requirements apply to derivative instruments and non-derivative instruments that are designated and qualify as hedging instruments and related hedged items accounted for under SFAS 133. The Statement is effective for fiscal years and interim periods beginning after

Table of Contents

November 15, 2008. Early application is encouraged. We are currently evaluating the impact adoption of this Statement will have on our consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13* (FSP 157-1). FSP 157-1 amends SFAS 157 to remove certain leasing transactions from its scope. In addition, on February 12, 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which amends SFAS 157 by delaying its effective date by one year for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. This pronouncement was effective upon issuance. We have deferred the adoption of SFAS 157 with respect to all non-financial assets and liabilities in accordance with the provisions of this pronouncement. On January 1, 2009, SFAS 157 will be applied to all other fair value measurements for which the application was deferred under FSP FAS 157-2. We are currently assessing the impact SFAS 157 will have in relation to non-financial assets and liabilities on our consolidated financial statements. See NOTE 11 FAIR VALUE OF FINANCIAL INSTRUMENTS for further information.

FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115* (SFAS 159) became effective on January 1, 2008. This standard permits entities to choose to measure many financial instruments and certain other items at fair value. While SFAS 159 became effective for our 2008 fiscal year, we did not elect the fair value measurement option for any of our financial assets or liabilities. Therefore, adoption of this Statement did not have a material impact on our consolidated financial statements.

NOTE 3 MARKETABLE SECURITIES

During the second quarter of 2008, Portman acquired 22 million shares of Golden West, a Western Australia iron ore exploration company, which represents approximately 19.9 percent of its outstanding shares. Acquisition of the shares represents an investment of approximately \$27 million. Golden West owns the Wiluna West exploration ore project in Western Australia, containing a resource of 119 million metric tons of ore. The purchase provides Portman a strategic interest in Golden West and Wiluna West. We do not exercise significant influence, and at June 30, 2008, the investment is classified as an available-for-sale security.

Our marketable securities are classified as either held-to-maturity or available-for-sale. We account for marketable securities in accordance with the provisions of SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115). SFAS 115 addresses the accounting and reporting for investments in fixed maturity securities and for equity securities with readily determinable fair values. We determine the appropriate classification of debt and equity securities at the time of purchase and re-evaluate such designation as of each balance sheet date. In addition, we review our investments on an ongoing basis for indications of possible impairment. We review impairments in accordance with EITF 03-1 and FSP SFAS 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, to determine the classification of the impairment as temporary or other-than-temporary. Once identified, the determination of whether the impairment is temporary or other-than-temporary requires significant judgment. The primary factors that we consider in classifying the impairment include the extent and time the fair value of each investment has been below cost. If a decline in fair value is judged other than

Table of Contents

temporary, the basis of the individual security is written down to fair value as a new cost basis, and the amount of the write-down is included as a realized loss. At June 30, 2008 and December 31, 2007, we had \$102.8 million and \$74.6 million, respectively, of marketable securities as follows:

	(In Millions)	
	June 30, 2008	December 31, 2007
Held to maturity - current	\$ 0.4	\$ 18.9
Held to maturity - non-current	26.4	25.8
	26.8	44.7
Available for sale - non-current	76.0	29.9
Total	\$ 102.8	\$ 74.6

Marketable securities classified as held-to-maturity are measured and stated at amortized cost. The amortized cost, gross unrealized gains and losses and fair value of investment securities held-to-maturity at June 30, 2008 and December 31, 2007 are summarized as follows:

	June 30, 2008 (In Millions)			
	Amortized Cost	Gross Gains	Gross Losses	Fair Value
Asset backed securities	\$ 3.3	\$ -	\$ (0.6)	\$ 2.7
Floating rate notes	23.5	-	(0.9)	22.6
Total	\$ 26.8	\$ -	\$ (1.5)	\$ 25.3

	December 31, 2007 (In Millions)			
	Amortized Cost	Gross Gains	Gross Losses	Fair Value
Asset backed securities	\$ 23.1	\$ -	\$ (1.4)	\$ 21.7
Floating rate notes	21.6	-	(0.1)	21.5
Total	\$ 44.7	\$ -	\$ (1.5)	\$ 43.2

Investment securities held-to-maturity at June 30, 2008 and December 31, 2007 have contractual maturities as follows:

	(In Millions)	
	June 30, 2008	December 31, 2007
Asset backed securities:		
Within 1 year	\$ 0.4	\$ 18.9
1 to 5 years	2.9	4.2

	\$ 3.3	\$	23.1
Floating rate notes:			
Within 1 year	\$ -	\$	-
1 to 5 years	23.5		21.6
	\$ 23.5	\$	21.6

Marketable securities classified as available for sale are stated at fair value, with unrealized holding gains and losses included in *Other comprehensive income*. The amortized cost, gross

Table of Contents

unrealized gains and losses and fair value of investment securities available-for-sale at June 30, 2008 and December 31, 2007 are summarized as follows:

	Amortized Cost	(In Millions) June 30, 2008 Gross Unrealized		Fair Value
		Gains	Losses	
Equity securities (without contractual maturity)	\$ 41.2	\$ 34.8	\$ -	\$ 76.0

	Amortized Cost	(In Millions) December 31, 2007 Gross Unrealized		Fair Value
		Gains	Losses	
Equity securities (without contractual maturity)	\$ 14.2	\$ 15.7	\$ -	\$ 29.9

We intend to hold our shares of available-for-sale equity securities indefinitely.

NOTE 4 ACQUISITIONS & OTHER INVESTMENTS

In accordance with FASB Statement No. 141, *Business Combinations* (SFAS 141) we allocate the cost of acquisitions to the assets acquired and liabilities assumed based on their estimated fair values. The excess of the cost over the fair value of the net assets acquired is recorded as goodwill.

PinnOak

On July 31, 2007, we completed our acquisition of 100 percent of PinnOak, a privately-owned United States producer of high-quality, low-volatile metallurgical coal. The acquisition furthers our growth strategy and expands our diversification of products for the integrated steel industry. The purchase price of PinnOak and its subsidiary operating companies was \$450 million in cash, of which \$108.4 million is deferred until December 31, 2009, plus the assumption of approximately \$160 million in debt, which was repaid at closing. The deferred payment was discounted using a six percent credit-adjusted risk free rate and was recorded as \$93.7 million of *Deferred payment* on the Statements of Consolidated Financial Position as of July 31, 2007. The purchase agreement also includes a contingent earn-out, which ranges from \$0 to approximately \$300 million dependent upon PinnOak's performance in 2008 and 2009. The earn-out, if any, would be payable in 2010 and treated as additional purchase price. The assets acquired consist primarily of coal mining rights and mining equipment and are included in our North American Coal segment.

PinnOak's operations include two complexes comprising three underground mines – the Pinnacle and Green Ridge mines in southern West Virginia and the Oak Grove mine near Birmingham, Alabama. Combined, the mines have rated capacity to produce 6.5 million tons of premium-quality metallurgical coal annually.

The Statements of Unaudited Condensed Consolidated Financial Position of the Company as of June 30, 2008 reflect the acquisition of PinnOak, effective July 31, 2007, under the purchase method of accounting. The total cost of the acquisition has been allocated to the assets acquired and the liabilities assumed based upon their estimated fair values at the date of the acquisition. The allocation resulted in an excess of fair value of acquired net assets over

Table of Contents

cost. As the acquisition involved a contingent earn-out, a liability has been recorded totaling \$178.5 million, representing the lesser of the maximum amount of contingent consideration or the excess prior to the pro rata allocation of purchase price. We finalized the purchase price allocation in the second quarter of 2008. A comparison of the finalized purchase price allocation to the initial allocation is as follows:

	(In Millions)		
	Finalized Allocation	Initial Allocation	Change
ASSETS			
Current assets	\$ 80.8	\$ 77.2	\$ 3.6
Property, plant and equipment	156.7	133.0	23.7
Mineral rights	676.5	619.9	56.6
Asset held for sale	14.0	-	14.0
Other assets	3.7	3.6	0.1
Total assets	\$ 931.7	\$ 833.7	\$ 98.0
LIABILITIES			
Current liabilities	\$ 62.5	\$ 61.3	\$ 1.2
Long-term liabilities	268.0	171.2	96.8
Total liabilities	330.5	232.5	98.0
Purchase price	\$ 601.2	\$ 601.2	\$ -

The adjustment since our initial allocation reduced coal inventory by \$1.1 million to reflect inventory survey adjustments, increased supplies inventory by \$4.8 million to reflect the capitalization of supplies inventory, increased property, plant and equipment by \$23.7 million and increased mineral rights by \$56.6 million to reflect market-based valuation adjustments. The asset held for sale represents the estimated fair value less cost to sell of the assets of a pond fines recovery operation. The sale was completed on February 15, 2008. The increase in current liabilities reflects additional accruals for non-income taxes. The increase in long-term liabilities represents adjustments to the contingent earn-out, \$78.5 million, and an increase in deferred tax liabilities resulting from further assessment of the purchase price for tax purposes, \$18.0 million.

Portman Share Repurchase

On May 21, 2008, Portman authorized a tender offer to repurchase up to 16.5 million shares, or 9.39 percent of its common stock. On this date, we owned 80.4 percent of the approximately 176 million shares outstanding in Portman and indicated we would not participate in the tender buyback. Under the share tender program, eligible shareholders could offer to sell some or all of their shareholdings at a fixed-price discount of 14 percent to the volume-weighted average price of Portman shares traded on ASX during the five trading days after the date of announcement. The tender period closed on June 24, 2008. Under the buyback, 9.8 million fully paid ordinary shares were tendered at a price of A\$14.66 per share. The total consideration paid under the buyback was A\$143.3 million. As a result of the buyback, our ownership interest in Portman increased from 80.4 percent to 85.2 percent.

The transaction constituted a step acquisition of a noncontrolling interest. In accordance with SFAS 141 we have accounted for the acquisition of the minority interests in Portman by the purchase method. As of the date of a step acquisition of the minority interest, the then historical cost basis of the minority interest balance was reduced to the extent of the percentage interest sold, or \$49.0 million, and a corresponding deferred tax liability with a preliminary fair value assignment of \$38.0 million was recorded to reflect the tax effect of the acquisition. The

Table of Contents

remaining purchase price over the net assets acquired was preliminarily assigned to *Property, Plant and Equipment* resulting in an increase of \$126.8 million on the Statement of Condensed Consolidated Financial Position at June 30, 2008. We are in the process of conducting a valuation of the assets acquired and liabilities assumed related to the acquisition, most notably, inventory, mineral rights, and property, plant and equipment. Accordingly, allocation of the purchase price is subject to modification in the future.

NOTE 5 DEBT AND CREDIT FACILITIES

On June 25, 2008, we entered into a \$325 million private placement consisting of \$270 million of 6.31 percent Five-Year Senior Notes due June 15, 2013, and \$55 million of 6.59 percent Seven-Year Senior Notes due June 15, 2015. Interest will be paid on the notes for both tranches on June 15 and December 15 until their respective maturities. The notes are unsecured obligations with interest and principal amounts guaranteed by certain of our domestic subsidiaries. The notes and guarantees are not required to be registered under the Securities Act of 1933, as amended, and have been placed with qualified institutional investors. We used the proceeds to repay senior unsecured indebtedness and for general corporate purposes.

The terms of the note purchase agreement contain customary covenants that require compliance with certain financial covenants based on: (1) debt to earnings ratio and (2) interest coverage ratio. As of June 30, 2008, we were in compliance with the covenants in the note purchase agreement.

On August 17, 2007, we entered into a five-year unsecured credit facility with a syndicate of 13 financial institutions. The facility provides \$800 million in borrowing capacity, comprised of \$200 million in term loans and \$600 million in revolving loans, swing loans and letters of credit. Loans are drawn with a choice of interest rates and maturities, subject to the terms of the agreement. Interest rates are either (1) a range from LIBOR plus 0.45 percent to LIBOR plus 1.125 percent based on debt and earning levels or (2) the prime rate or the prime rate plus 1.125 percent, based on debt and earnings.

The credit facility has two financial covenants based on: (1) debt to earnings ratio and (2) interest coverage ratio. As of June 30, 2008, we were in compliance with the covenants in the credit agreement.

As of June 30, 2008, \$160 million was drawn in revolving loans and the principal amount of letter of credit obligations totaled \$19.4 million under the credit facility. We had \$200 million drawn in term loans; \$420.6 million of borrowing capacity was available under the \$800 million credit facility. The weighted average interest rate for outstanding revolving and term loans under the credit facility was 3.33 percent as of June 30, 2008. After the effect of interest rate hedging, the weighted average annual borrowing rate was 3.85 percent.

Effective June 23, 2008, Portman added a A\$120 million cash facility to its existing facility agreement, under which Portman continues to maintain a A\$40 million multi-option facility. The facilities have floating interest rates of 20 basis points and 75 basis points, respectively, over the 90-day bank bill swap rate in Australia. At June 30, 2008, the outstanding bank commitments totaled A\$12.5 million, reducing borrowing capacity to A\$27.5 million on the A\$40 million facility. No funds have been utilized on the A\$120 million facility. The A\$120 million facility is available until September 30, 2008. Both facilities operate under the same

Table of Contents

financial covenants of Portman: (1) debt to earnings ratio and (2) interest coverage ratio. As of June 30, 2008, Portman was in compliance with the covenants of the credit facilities.

In 2005, Portman secured five-year financing from its customers in China as part of its long-term sales agreements to assist with the funding of the expansion of its Koolyanobbing mining operations. The borrowings, totaling \$5.5 million and \$6.2 million at June 30, 2008 and December 31, 2007, respectively, accrue interest annually at five percent. The borrowings require a principal payment of approximately \$0.8 million plus accrued interest to be made January 31, 2009, with the balance due in full on January 31, 2010.

At June 30, 2008, Amapá had long-term project debt outstanding of approximately \$338 million for which we have provided a several guarantee on our 30 percent share. Amapá has engaged in ongoing discussions with its lenders regarding loan amendments to address several loan covenant violations related to project delays, higher construction expenditures, debt-to-equity ratios and deliveries under its long-term supply agreement with an operator of an iron ore pelletizing plant in the Kingdom of Bahrain. In addition, at June 30, 2008, Amapá had total short-term loans outstanding of \$188.9 million. We subsequently provided a several guarantee in July 2008 on our 30 percent share of the total debt outstanding, or \$159.1 million.

NOTE 6 SEGMENT REPORTING

Our company is organized and managed according to product category and geographic location: North American Iron Ore, North American Coal, Asia-Pacific Iron Ore, Asia-Pacific Coal and Latin American Iron Ore. The North American Iron Ore segment is comprised of our interests in six North American mines that provide iron ore to the integrated steel industry. The North American Coal segment is comprised of our three North American coal mines that provide metallurgical coal to the integrated steel industry. The Asia-Pacific Iron Ore segment, comprised of our interests in Portman, is located in Western Australia and provides iron ore to steel producers in China and Japan. There are no intersegment revenues.

The Asia-Pacific Coal operating segment is comprised of our 45 percent economic interest in Sonoma, located in Queensland, Australia, which is in the early stages of production. The Latin American Iron Ore operating segment is comprised of our 30 percent Amapá interest in Brazil, which is also in the early stages of production. As a result, the Asia-Pacific Coal and Latin American Iron Ore operating segments do not meet reportable segment disclosure requirements and therefore are not separately reported.

We evaluate segment performance based on sales margin, defined as revenues less cost of goods sold identifiable to each segment. This measure of operating performance is an effective measurement as we focus on reducing production costs throughout the Company.

The following table presents a summary of our reportable segments for the three and six months ended June 30, 2008 and 2007:

Table of Contents

	(In Millions)				(In Millions)			
	Three Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,		Six Months Ended June 30,

Asia-Pacific Iron Ore	10.5	9.5
Other	3.4	4.3
Total mine closure	118.2	118.5
Total environmental and mine closure obligations	131.8	130.8
Less current portion	6.8	7.6
Long term environmental and mine closure obligations	\$ 125.0	\$ 123.2

Environmental*The Rio Tinto Mine Site*

The Rio Tinto Mine Site is a historic underground copper mine located near Mountain City, Nevada, where tailings were placed in Mill Creek, a tributary to the Owyhee River. Site investigation and remediation work is being conducted in accordance with a Consent Order between the Nevada DEP and the RTWG composed of Cliffs, Atlantic Richfield Company, Teck Cominco American Incorporated, and E. I. du Pont de Nemours and Company. The estimated costs of the available remediation alternatives currently range from approximately \$10.0 million to \$30.5 million. In recognition of the potential for an NRD claim, the parties are actively pursuing a global settlement that would include the EPA and encompass both the remedial action and the NRD issues. We have increased our reserve most recently in the second quarter of 2008 by \$3.0 million to reflect revised cleanup estimates and cost allocation associated with our anticipated share of the eventual remediation costs based on a consideration of the various remedial measures and related cost estimates, which are currently under review. The expense was included in *Selling, general and administrative* in the Statements of Consolidated Operations.

Mine Closure

The mine closure obligations are for our four consolidated North American operating iron ore mines, our three consolidated North American operating coal mines, our Asia-Pacific operating iron ore mines, the coal mine at Sonoma and a closed operation formerly known as LTVSMC. The LTVSMC closure obligation results from an October 2001 transaction where subsidiaries of the Company received a net payment of

\$50 million and certain other assets and assumed environmental and certain facility closure obligations of \$50 million. Obligations have declined to \$21.1 million at June 30, 2008.

Table of Contents

The accrued closure obligation for our active mining operations provides for contractual and legal obligations associated with the eventual closure of the mining operations. The accretion of the liability and amortization of the related fixed asset is recognized over the estimated mine lives for each location. The following represents a rollforward of our asset retirement obligation liability for the six months ended June 30, 2008 and the year ended December 31, 2007:

	(In Millions)	
	June 30, 2008	December 31, 2007 ⁽¹⁾
Asset retirement obligation at beginning of period	\$ 96.0	\$ 62.7
Accretion expense	4.1	6.6
PinnOak acquisition	-	19.9
Sonoma investment	-	4.3
Reclassification adjustment	(0.9)	1.1
Exchange rate changes	0.5	0.9
Revision in estimated cash flows	(2.6)	0.5
Asset retirement obligation at end of period	\$ 97.1	\$ 96.0

⁽¹⁾ Represents a 12-month rollforward of our asset retirement obligation at December 31, 2007.

NOTE 10 INCOME TAXES

Our total tax provision from continuing operations for the first six months of 2008 of \$121.6 million is comprised of \$71.4 million related to U.S. operations and \$50.2 million related to foreign operations. Our 2008 expected effective tax rate related to continuing operations is approximately 26 percent. The effective rate reflects benefits from deductions for percentage depletion in excess of cost depletion related to U.S. operations as well as benefits derived from operations outside the U.S., which are taxed at rates lower than the U.S. statutory rate of 35 percent.

At June 30, 2008 our valuation allowance maintained against certain gross deferred tax assets increased by \$4.1 million to fully offset an increase in future tax benefits for first quarter losses of certain foreign operations for which future utilization is currently uncertain.

At June 30, 2008, cumulative undistributed earnings of foreign subsidiaries included in consolidated retained earnings continue to be indefinitely reinvested in international operations. Accordingly, no provision has been made for deferred taxes related to a future repatriation of these earnings, nor is it practicable to estimate the amount of income taxes that would have to be provided if we were to conclude that such earnings will be remitted in the foreseeable future.

The following table details the changes in unrecognized tax benefits from January 1, 2008 to June 30, 2008.

	(In Millions)
Unrecognized tax benefits balance as of January 1, 2008	\$ 15.2

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

Increases for tax positions in prior years	3.3
Increases for tax positions in current year	17.5
Settlements	(4.4)
Unrecognized tax benefits balance as of June 30, 2008	\$ 31.6

Table of Contents

At June 30, 2008 and January 1, 2008, we had \$20.9 million and \$15.2 million, respectively, of unrecognized tax benefits that, if recognized, would impact the effective tax rate. It is reasonably possible that an additional decrease of \$14.8 million in unrecognized tax benefit obligations will occur within the next 12 months due to expected settlements with the taxing authorities. We recognize potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. During the six months ended June 30, 2008, we accrued an additional \$4.7 million of interest relating to the unrecognized tax benefits, \$1.0 million of which was due to the settlement reached with a foreign taxing authority.

Tax years that remain subject to examination are years 2003 forward for the United States, 1993 forward for Canada and 1994 forward for Australia.

NOTE 11 FAIR VALUE OF FINANCIAL INSTRUMENTS

We adopted the provisions of SFAS 157 as of January 1, 2008, with respect to financial instruments. We have deferred the adoption of SFAS 157 with respect to non-financial assets and liabilities in accordance with the provisions of FSP FAS 157-2. Items that are recognized or disclosed at fair value for which we have not applied the provisions of SFAS 157 include goodwill, asset retirement obligations, guarantees and certain other items. No transition adjustment was necessary as of January 1, 2008 upon the adoption of SFAS 157.

The following represents financial assets and liabilities of the Company measured at fair value on a recurring basis in accordance with SFAS 157 at June 30, 2008:

Description	(In Millions)			Total
	Quoted Prices in Active Markets for Identical Assets/Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Cash equivalents	\$ 170.2	\$ 28.6	\$ -	\$ 198.8
Derivative assets	-	-	125.8	125.8
Marketable securities	76.0	-	-	76.0
Foreign exchange contracts	-	44.4	-	44.4
Total	\$ 246.2	\$ 73.0	\$ 125.8	\$ 445.0
Liabilities:				
Interest rate swap	\$ -	\$ 2.2	\$ -	\$ 2.2
Total	\$ -	\$ 2.2	\$ -	\$ 2.2

Financial assets classified in Level 1 at June 30, 2008 include money market funds and available for sale securities. The valuation of these instruments is determined using a market approach, taking into account current interest rates and creditworthiness, and is based upon unadjusted quoted prices for identical assets in active markets.

The valuation of financial assets and liabilities classified in Level 2 is determined using a market approach based upon quoted prices for similar assets and liabilities in active markets, or other inputs that are observable for substantially the full term of the financial instrument. Level 2 securities include short-term investments such as commercial paper for which the value of each investment is a function of the purchase price, purchase yield and maturity date. Derivative financial instruments valued using financial models that use as their basis readily observable market parameters are also classified within Level 2 of the valuation hierarchy. At

Table of Contents

June 30, 2008, such derivative financial instruments include substantially all of our foreign currency exchange hedge contracts and interest rate exchange agreements. The fair value of the interest rate swap and forward currency contracts is based on a forward LIBOR curve and forward market prices, respectively, and represents the estimated amount we would receive to terminate these agreements at the reporting date, taking into account current interest rates and creditworthiness.

The derivative financial asset classified as a Level 3 is an embedded derivative instrument included in certain supply agreements with one of our customers. The agreements include provisions for supplemental revenue or refunds based on the customer's annual steel pricing at the time the product is consumed in the customer's blast furnaces. We account for this provision as a derivative instrument at the time of sale and record this provision at fair value based on an income approach when the product is consumed and the amounts are settled as an adjustment to revenue. The fair value of the instrument is determined based on a future price of the average hot rolled steel price at certain steelmaking facilities and other inflationary indices.

Substantially all of the financial assets and liabilities are carried at fair value or contracted amounts that approximate fair value. We had no financial assets and liabilities measured at fair value on a non-recurring basis in accordance with SFAS 157 at June 30, 2008.

The following represents a reconciliation of the changes in fair value of financial instruments measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the first half of 2008:

	(In Millions)	
	Three Months Ended June 30, 2008	Six Months Ended June 30, 2008
Beginning balance	\$ 63.9	\$ 53.8
Total gains (losses)		
Included in earnings	244.9	270.9
Included in other comprehensive income	-	-
Settlements	(183.0)	(198.9)
Transfers in and/or out of Level 3	-	-
Ending balance - June 30, 2008	\$ 125.8	\$ 125.8
Total gains (losses) for the period included in earnings attributable to the change in unrealized gains or losses on assets still held at June 30, 2008	\$ 84.3	\$ 110.3

Gains and losses included in earnings are reported in *Product revenue* on the Statements of Unaudited Condensed Consolidated Operations for the three and six months ended June 30, 2008.

With respect to changes in Level 3 financial instruments during the first half of 2008, we had freestanding derivatives related to certain supply agreements primarily with our Asia-Pacific customers that provide for revenue or refunds based on the ultimate settlement of annual international benchmark pricing provisions.

The pricing provisions are characterized as freestanding derivatives and are required to be accounted for separately once iron ore is shipped. The derivative instrument, which is settled and billed once the annual international benchmark

Table of Contents

price is settled, is marked to fair value as a revenue adjustment each reporting period based upon the estimated forward settlement until the benchmark is actually settled. The fair value of the instrument is determined based on the forward price expectation of the annual international benchmark price. We recognized \$160.6 million as *Product* revenues in the Statements of Unaudited Condensed Consolidated Operations for both the three and six months ended June 30, 2008, related to the 2008 pricing provisions. The derivative instrument was settled during the second quarter of 2008 upon settlement of annual international benchmark prices and is therefore not reflected on the June 30, 2008 Statement of Condensed Consolidated Financial Position.

NOTE 12 STOCK PLANS

2008 Performance Shares

On March 10, 2008, the Compensation and Organization Committee (Committee) of the Board of Directors approved a grant under our shareholder approved 2007 ICE Plan for the performance period 2008-2010. The grant for executive officers consisted of 75 percent of the total value of the grant in performance shares and 25 percent in restricted share units. The grant included a total of 159,480 performance shares and 56,520 restricted share units. The grant of performance shares assumes 100 percent attainment of performance goals as determined by the Committee. The restricted share units are subject to continued employment, are retention based, will vest at the end of the performance period for the performance shares, and are payable in shares at a time determined by the Committee in its discretion. The performance shares granted under the ICE Plan vest over a period of three years and measure performance for the period 2008-2010 on the basis of two factors, relative total shareholder return and three-year cumulative free cash flow, and are paid out in common shares. Upon the occurrence of a change in control, all performance shares and restricted share units granted to a participant will vest and become nonforfeitable and will be paid out in stock.

2006 and 2007 Performance Share Modifications

On May 12, 2008, the Committee of the Board of Directors approved two changes to the calculations used to determine the final payouts under the performance shares granted in 2006 (for the 2006-2008 performance period) and 2007 (for the 2007-2009 performance period) under our 1992 ICE Plan (as Amended and Restated as of May 13, 1997) and our 2007 ICE Plan, respectively.

The first change approved by the Committee relates to the calculation of total shareholder return (TSR) relative to the companies in our peer group. Under the plan modification, if any of the companies in the peer group are removed because the company has ceased to be publicly traded or has experienced a major restructuring by reason of a Chapter 11 filing or a spin-off of more than 50 percent of any such company's assets, the calculation will be based upon the greater of (1) TSR based only on the remaining companies in the original peer group or (2) TSR based on the remaining companies in the original peer group plus the addition of the Standard & Poors Metals and Minerals Exchange Traded Fund.

The second change approved by the Committee is in relation to the 2006 performance share plan year and relates to the method of evaluating performance during the applicable period. The Committee had previously adopted a new methodology under the 2007 ICE Plan for the calculation of TSR based on the Cumulative Method (where the calculation of TSR is based on the cumulative TSR between the start and the end of the performance period). Prior to this change, TSR was based on the Quarterly Method (where the calculation of TSR is based

Table of Contents

on a cumulative quarter-by-quarter basis), which effectively weighted the early quarters in the period more heavily than later quarters. Executive officers were given a choice as to which of these methods would apply to their grants of Performance Shares made in 2005 (for the 2005-2007 performance period) and 2006 (for the 2006-2008 performance period). On May 12, 2008, the Committee determined that payouts with respect to the 2006-2008 performance period would be based on the Cumulative Method unless the payout would be greater under the Quarterly Method, in which case the Quarterly Method would be used for those payouts. As a result of these modifications, we recorded additional stock-based compensation expense of \$2.4 million in Selling, general and administrative expenses on the Statement of Unaudited Condensed Consolidated Operations for the six months ended June 30, 2008.

Determination of Fair Value

The fair value of each option grant is estimated on the date of grant using a Monte Carlo simulation to forecast relative TSR performance. Consistent with the guidelines of SFAS 123(R), a correlation matrix of historic and projected stock prices was developed for both the Company and its predetermined peer group of mining and metals companies. The fair value assumes that performance goals will be achieved. If such goals are not met, no compensation cost is recognized and any recognized compensation cost is reversed.

The expected term of the grant represents the time from the grant date to the end of the service period. We estimated the volatility of our common stock and that of the peer group of mining and metals companies using daily price intervals for all companies. The risk-free interest rate is the rate at the valuation date on zero-coupon government bonds, with a term commensurate with the remaining life of the performance plans.

The following assumptions were utilized to estimate the fair value for the 2008 plan year and the 2006 and 2007 plan year modifications:

Plan Year	Grant/Modification Date	Grant/Modification Date Market Price ⁽¹⁾	Average Expected Term (Years)	Expected Volatility	Risk-Free Interest Rate	Dividend Yield	Fair Value (Percent of Grant/Modification Date Market Price)
2008	March 10, 2008	52.59	2.81	43.8%	1.93%	0.62%	58.23%
2007	May 12, 2008	90.28	1.64	45.8%	2.22%	0.39%	143.70%
2006	May 12, 2008	90.28	0.64	53.8%	1.86%	0.39%	143.95%

⁽¹⁾ Adjusted to reflect 2:1 stock split that occurred on May 15, 2008.

The table below illustrates the change in the fair value as a result of the 2006 and 2007 plan year modifications:

Plan Year	Pre-modification Calculation Method ⁽¹⁾	Pre-modification Fair Value	Change in Fair Value	Revised Fair Value
2006	Cumulative	\$ 122.55	\$ 7.18	\$ 129.73
2006	Quarterly	30.45	99.28	129.73
2007	Cumulative	128.71	1.25	129.96

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

⁽¹⁾ As a result of the choice given to executive officers between the Cumulative and Quarterly methods under the 2006 Plan, the pre-modification fair value for this plan is presented separately for each election. This was not an option under the 2007 plan, and therefore, a single pre-modification fair value is presented.

Table of Contents**NOTE 13 CAPITAL STOCK**Common Stock

On March 11, 2008, a two-for-one stock split of our common shares was declared. As a result, each shareholder of record on May 1, 2008 received one additional share of our common stock for every share held. The new shares were distributed on May 15, 2008. Pursuant to the effectuation of the stock split, the par value of our common stock was adjusted from \$0.25 per share to \$0.125 per share, and the number of authorized common shares was increased accordingly from 112 million to 224 million shares. As a result of the stock split, the preferred stock conversion rate was also adjusted from 66.1881 to 133.0646. The new conversion rate equates to a conversion price of \$7.52 per common share.

On May 13, 2008, a cash dividend of \$0.0875 per common share was declared. This dividend rate is the same as the cash dividend declared on our common stock in the first quarter of 2008, and represents an increase of 40 percent from the rate declared in the comparable quarter of 2007. The cash dividend was paid on June 2, 2008 to each shareholder of record. The cash dividend was adjusted pursuant to the previously announced two-for-one common stock split.

Preferred Stock

On January 17, 2008, 24,010 preferred shares were converted to 1,589,176 shares of common stock at a conversion rate of 66.1881. In the second quarter of 2008, an additional 91,150 preferred shares were converted to 12,128,838 shares of common stock at a conversion rate of 133.0646, reducing our preferred stock outstanding to 19,555 shares. The following is a summary of the activity of preferred stock for the six months ended June 30, 2008 and the year ended December 31, 2007:

	June 30, 2008	December 31, 2007
Number of preferred shares at beginning of the period	134,715	172,300
Number of preferred shares converted	115,160	37,585
Number of preferred shares at end of the period	19,555	134,715
Redemption value at end of the period (in millions)	\$ 310.1	\$ 898.8
Number of common shares issued from Treasury upon conversion	13,718,012	4,975,296

On May 13, 2008, a scheduled dividend payment was authorized on our 3.25 percent redeemable cumulative convertible perpetual preferred stock, and a cash payment of \$8.125 per share was paid on July 15, 2008, to preferred stock shareholders of record on July 1, 2008.

Table of Contents**NOTE 14 EARNINGS PER SHARE**

A summary of the calculation of earnings per common share on a basic and diluted basis follows:

	(In Millions)			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007

Earnings per common share - Basic	\$ 2.75	\$ 1.05	\$ 3.04	\$ 1.43
Earnings per common share - Diluted	\$ 2.57	\$ 0.83	\$ 2.73	\$ 1.14

NOTE 15 CONTINGENCIES

We have been named, along with two of our wholly owned subsidiaries, Cliffs Mining Company and Wabush Iron Co. Limited, as defendants, along with U. S. Steel Canada Inc. (formerly Stelco Inc.), HLE Mining Limited Partnership and HLE Mining GP Inc. (collectively, U. S. Steel), in an action brought before the Ontario Superior Court of Justice by Dofasco. The action pertains to a contemplated transaction whereby Dofasco and/or certain of its affiliates would purchase our ownership interests and those of U. S. Steel in Wabush. After six months of negotiations with no definitive agreements reached, both we and U. S. Steel determined to withdraw from negotiations and retain our respective ownership interests in Wabush. Notice of the withdrawal was delivered to Dofasco on March 3, 2008.

On March 20, 2008, Dofasco commenced this action against both Cliffs and U. S. Steel. Dofasco's statement of claim demands specific performance of an alleged binding contract for Cliffs and U. S. Steel to sell their respective interests in Wabush with equitable compensation in the amount of C\$427 million or, in the alternative, general damages in the amount of C\$1.8 billion. We strongly disagree with Dofasco's allegations and intend to defend this case vigorously. On May 14, 2008 U. S. Steel filed a Notice of Motion to dismiss the action. We filed an identical Notice of Motion on May 15, 2008. A two day hearing was held on our respective motions on June 23 and 24, 2008, and we expect a ruling from the court during the third quarter of 2008.

We are periodically involved in litigation incidental to our operations. We believe that any pending litigation will not result in a material liability in relation to our consolidated financial statements.

Table of Contents**NOTE 16 LEASE OBLIGATIONS**

We lease certain mining, production and other equipment under operating and capital leases. The leases are for varying lengths, generally at market interest rates and contain purchase and/or renewal options at the end of the terms. Future minimum payments under capital leases and non-cancellable operating leases at June 30, 2008 are as follows:

	(In Millions)	
	Capital Leases	Total Operating Leases
2008 (July 1 - December 31)	\$ 7.6	\$ 10.7
2009	13.6	20.3
2010	13.1	18.1
2011	12.9	13.2
2012	12.4	9.2
2013 and thereafter	52.3	25.6
Total minimum lease payments	111.9	\$ 97.1
Amounts representing interest	29.3	
Present value of net minimum lease payments	\$ 82.6	

Total minimum capital lease payments of \$111.9 million include \$1.8 million and \$110.1 million, for our North American Iron Ore segment and Asia-Pacific Iron Ore segment, respectively. Total minimum operating lease payments of \$97.1 million include \$79.8 million for our North American Iron Ore segment, \$16.3 million for our Asia-Pacific Iron Ore segment and \$1.0 million for our North American Coal segment.

NOTE 17 CASH FLOW INFORMATION

A reconciliation of capital additions to cash paid for capital expenditures for the six months ended June 30, 2008 and 2007 is as follows:

	(In Millions)	
	Six Months Ended June 30,	
	2008	2007
Capital additions	\$ 85.9	\$ 44.2
Cash paid for capital expenditures	59.1	46.2
Difference	26.8	(2.0)
Non-cash accruals	\$ 3.8	\$ (2.0)
Capital leases	23.0	-
Total	\$ 26.8	\$ (2.0)

Table of Contents

NOTE 18 SUBSEQUENT EVENTS

Capital Improvement and Capacity Expansion Projects

On July 12, 2008 we announced a capital expansion project at our Empire and Tilden mines in Michigan's Upper Peninsula. The project, which requires approximately \$290.4 million of incremental capital investment, is expected to allow the Empire mine to produce at three million tons annually through 2017 and increase Tilden mine production by more than two million tons annually. This incremental production is expected to result in total equity production of over 23 million tons annually for our North American Iron Ore segment. Empire was previously projected to exhaust reserves in early 2011. As part of the capacity expansion, we will also mine additional ore from our Tilden mine, located adjacent to Empire, and process it utilizing additional processing capacity at Empire. Utilization of this capacity will enable Tilden to increase production to more than 10 million tons annually, of which 8.5 million tons represents our share. The work is expected to begin in the last quarter of 2008, with capital expenditures of \$69.0 million, \$161.5 million and \$59.9 million projected in 2008, 2009 and 2010, respectively.

In July 2008, we also incurred an additional capital commitment for the purchase of a new longwall plow system at our Pinnacle mine in West Virginia. The equipment, which requires a capital investment of approximately \$90 million, will replace the current longwall plow system in an effort to reduce maintenance costs and increase production at the mine. Capital expenditures related to this purchase will be made in 2008 and 2009, with the equipment expected to be delivered in 2009.

Purchase of Remaining Interest in United Taconite

On July 11, 2008 we signed and closed on the acquisition of the remaining 30 percent interest in United Taconite, with an effective date of July 1, 2008. Upon consummation of the purchase, our ownership interest increased from 70 percent to 100 percent. Consideration paid for the acquisition is a combination of \$100 million in cash, approximately 1.5 million of our common shares, and 1.2 million tons of iron ore pellets to be provided throughout 2008 and 2009. The consolidation of the United Taconite minority interest, together with our Northshore property, represents two wholly-owned iron ore assets in North America.

Announced Merger with Alpha Natural Resources, Inc.

On July 16, 2008, we announced the approval of a definitive merger agreement with Alpha Natural Resources, Inc. under which we will acquire all outstanding shares of Alpha in a cash and stock transaction valued at approximately \$10 billion. Under the terms of the agreement, for each share of Alpha common stock, Alpha stockholders would receive 0.95 of our common shares and \$22.23 in cash. The aggregate consideration comprises \$1.7 billion in cash and approximately 71 million new common shares. JPMorgan Chase Bank, N.A. is providing an underwriting commitment for up to \$1.9 billion which will be used to finance the transaction.

The combined company, which will be renamed Cliffs Natural Resources, will become one of the largest U.S. mining companies and be positioned as a leading diversified mining and natural resources company. Cliffs Natural Resources' mine portfolio will include nine iron ore facilities and more than 60 coal mines located across North America, South America and Australia. The combined company's significant position in both iron ore and metallurgical coal will make it a major supplier to the global steel industry, as well as provide a platform for further

Table of Contents

diversification both geographically and in terms of the mineral and resource products it sells. Upon completion of the transaction, we anticipate the combined company to have annual sales volume in excess of 30 million tons of iron ore and nearly 18 million tons of metallurgical coal. In addition to leading positions in iron ore and metallurgical coal, the company will also ship approximately 17 million tons of thermal coal, which is used primarily for electricity generation by utility companies.

The transaction is subject to shareholder approval as well as the satisfaction of customary closing conditions and regulatory approvals, including expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976. The transaction is expected to close by the end of 2008.

The merger agreement contains certain termination rights for both parties. Specifically, if we terminate the agreement because Alpha's Board of Directors withdraws its recommendation of the deal, or Alpha terminates to accept an alternative transaction, or if the merger agreement is terminated and Alpha enters into or consummates another transaction within one year of such termination, then Alpha will have to pay us a \$350 million termination fee. Similarly, if Alpha terminates the agreement because our Board of Directors withdraws its recommendation of the deal, or if the agreement is terminated and we enter into or consummate another transaction within one year of such termination, then we will have to pay Alpha a \$350 million termination fee. In addition, if Alpha's stockholders do not approve the transaction, Alpha will have to pay us a \$100 million termination fee, and if our shareholders do not approve the transaction, we will have to pay Alpha a \$100 million termination fee.

Preferred Stock Conversion

On July 16, 2008, 19,350 preferred shares were converted to 2,574,800 shares of common stock at a conversion rate of 133.0646, reducing our preferred stock outstanding to 205 shares with a redemption value of \$2.8 million on that date. Total common shares are being issued out of treasury.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is designed to provide a reader of our financial statements with a narrative from the perspective of management on our financial condition, results of operations, liquidity and other factors that may affect our future results. We believe it is important to read our MD&A in conjunction with our Annual Report on SEC Form 10-K for the year ended December 31, 2007 as well as other publicly available information.

OVERVIEW

Cleveland-Cliffs Inc, headquartered in Cleveland, Ohio, is an international mining company, the largest producer of iron ore pellets in North America, and a major supplier of metallurgical coal to the global steelmaking industry. We operate six iron ore mines located in Michigan, Minnesota and Eastern Canada, and three coking coal mines in West Virginia and Alabama. We own 85.2 percent of Portman, a large iron ore mining company in Australia, serving the Asian iron ore markets with direct-shipping fines and lump ore. We also have a 30 percent interest in Amapá, a Brazilian iron ore project; and a 45 percent economic interest in Sonoma, an Australian coking and thermal coal project.

We organize our business according to product category and geographic location: North American Iron Ore, North American Coal, Asia-Pacific Iron Ore, Asia-Pacific Coal and Latin American Iron Ore. The Asia-Pacific Coal and Latin American Iron Ore businesses are in the early stages of production.

Cliffs Asia-Pacific headquarters are located in Perth, Australia. Cliffs Latin America headquarters are located in Rio de Janeiro, Brazil. Cliffs International Mineração Brasil, Ltda and Cliffs Asia-Pacific Pty Limited provide technical and administrative support for Cliffs' assets in Latin America and Australia, respectively, as well as new business development services in these regions. All North American business segments are headquartered in Cleveland, Ohio. Offices in Duluth, Minnesota, have shared services groups supporting the North American business segments. Our Cliffs Technology Center Office is located in Ishpeming, Michigan. See NOTE 6 SEGMENT REPORTING for further information.

Growth Strategy

We expect to grow our business and presence as an international mining company by expanding both geographically and through the minerals that we mine and market. Our investments in Australia and Latin America, as well as acquisitions in minerals outside of iron ore, such as coal, illustrate the execution of this strategy.

Mineral Diversification In addition to continuously evaluating acquisition targets and investment opportunities in iron ore, metallurgical and thermal coal, we also consider opportunities outside of these areas, including those that could expand our position as a supplier of raw materials to the steelmaking industry or capitalize on our skill sets and expertise in other industries.

Table of Contents

Geographic Diversification We currently have producing assets in North America, Australia and Latin America. Through recent growth projects such as Amapá, which provided entry into Latin America through a minority interest, and Sonoma in Queensland, Australia, we are increasing our presence in markets outside of North America.

Our strategy also includes plans to capitalize on our unique technological expertise in the area of concentrating and processing lower-grade ores into high-quality products. An example of this is our recent alliance with Kobe Steel and the right to enter into a license agreement to use its patented ITmk3[®] iron-making technology. Used for the production of high-purity iron nuggets containing more than 96 percent iron, the ITmk3[®] process provides the means to create high-quality raw materials for electric arc furnaces, a market we do not currently supply.

Golden West

During the second quarter of 2008, Portman acquired 22 million shares of Golden West, a Western Australia iron ore exploration company, which represents approximately 19.9 percent of its outstanding shares. Acquisition of the shares represents an investment of approximately \$27 million. Golden West owns the Wiluna West exploration ore project in Western Australia, containing a resource of 119 million metric tons of ore. The purchase provides Portman a strategic interest in Golden West and Wiluna West.

Sale of Cliffs Synfuel Corp.

On June 4, 2008, we completed the sale of our wholly owned subsidiary, Cliffs Synfuel Corp. (Synfuel). Under the agreement, Oil Shale Exploration Company-Skyline, LLC acquired 100 percent of Synfuel for \$24 million. As additional consideration for the stock, a perpetual nonparticipating royalty interest was granted initially equal to \$0.02 per barrel of shale oil and \$0.01 per barrel of shale oil produced from lands covered by existing State of Utah oil shale leases, plus 25 percent of royalty payments from conventional oil and gas operations. We recorded a gain of \$19 million upon completion of the transaction.

RESULTS OF OPERATIONS*North American Iron Ore*

Following is a summary of North American Iron Ore results for the three months ended June 30, 2008 and 2007:

	Three Months Ended June 30,		(In Millions) Change due to			
	2008	2007	Sales price and rate	Sales volume	Freight and reimbursements	Total change
Revenues from product sales and services	\$ 643.4	\$ 432.8	\$ 202.8	\$ 2.5	\$ 5.3	\$ 210.6
Cost of goods sold and operating expense	(370.8)	(328.4)	(35.1)	(2.0)	(5.3)	(42.4)
Sales margin	\$ 272.6	\$ 104.4	\$ 167.7	\$ 0.5	\$ -	\$ 168.2

Table of Contents

Following is a summary of North American Iron Ore results for the six months ended June 30, 2008 and 2007:

	Six Months		(In Millions)			Total change
	Ended June 30, 2008	2007	Sales price and rate	Change due to Sales volume	Freight and reimbursements	
Revenues from product sales and services	\$ 922.2	\$ 658.0	\$ 229.8	\$ 18.9	\$ 15.5	\$ 264.2
Cost of goods sold and operating expense	(585.0)	(516.3)	(39.3)	(13.9)	(15.5)	(68.7)
Sales margin	\$ 337.2	\$ 141.7	\$ 190.5	\$ 5.0	\$ -	\$ 195.5

Sales tons 8.2 7.9

The sales revenue increase for the second quarter and first half of 2008 was primarily due to higher sales prices combined with slight increases in sales volume. Sales price increases of approximately 56 percent in the quarter and 42 percent for the year to date primarily reflected the impact from higher steel prices, renegotiated and new long-term supply agreements with certain customers and other contractual price adjustment factors. Included in second quarter 2008 revenues was \$84.3 million related to supplemental steel payments, compared with \$20.0 million for the same period last year. For the first half of 2008, revenue included \$110.3 million related to the supplemental payments compared with \$29.6 million for the first six months of 2007. The higher sales volume for both the quarter and first half of 2008 is primarily due to increased demand.

In addition, based on settlement of 87 percent price increases in the iron ore pellet benchmarks referenced in certain of our North American Iron Ore sales contracts, approximately \$5 million of additional product revenue, or \$0.91 per ton, related to first quarter sales was recognized in the second quarter of 2008 upon settlement.

On May 30, 2008, we entered into a binding term sheet (the *Term Sheet*) with Algoma Steel Inc. (*Algoma*) amending the current Pellet Sale and Purchase Agreement with Algoma (the *Algoma Agreement*). As previously disclosed, Algoma, a Canadian steelmaker and subsidiary of Essar Steel Holdings Limited, had requested a price renegotiation for 2008 pricing under the terms of the Algoma Agreement. The Term Sheet establishes the price for 2008 and provides for the sale of additional tonnage to Algoma for 2008 and 2009. Pricing for 2009 and beyond will be determined in accordance with the original terms of the Algoma Agreement.

The cost of goods sold and operating expense increase in the second quarter and first half of 2008 was primarily due to higher costs of production and higher reimbursable freight and minority interest costs. Contributing to the increase in both the second quarter and first six months of 2008 were higher fuel and energy costs of \$14.7 million and \$19.1 million, respectively, compared to the same periods in 2007. Costs of goods sold and operating expense for the first half of 2008 were also higher due to major furnace repairs at Empire and United Taconite during the first quarter.

Table of Contents**Production**

Following is a summary of iron ore production tonnage for 2008 and 2007:

	Second Quarter		(In Millions) ⁽¹⁾ First Six Months		Full Year	
	2008	2007	2008	2007	2008*	2007
Mine:						
Empire	1.4	1.3	2.6	2.5	4.2	4.9
Tilden	2.2	2.3	3.8	3.7	8.4	7.2
Hibbing	2.0	2.1	4.0	3.3	8.1	7.4
Northshore	1.5	1.3	2.8	2.6	5.7	5.2
United Taconite	1.5	1.4	2.7	2.6	5.5	5.3
Wabush	1.1	1.1	2.1	2.2	4.6	4.6
Total	9.7	9.5	18.0	16.9	36.5	34.6
Cliffs share of total	6.3	6.0	11.5	10.8	24.0	21.8

* Estimate

⁽¹⁾ Tons are long tons of pellets of 2,240 pounds.

The increase in Hibbing's production for the first six months of 2008 compared to the comparable prior year period was a result of the shutdown in late February 2007 due to severe weather conditions that caused significant buildup of ice in the basin supplying water to the processing facility. The full year production loss in 2007 totaled approximately 0.8 million tons (Company share 0.2 million tons).

The increase in second quarter production at Northshore was due to reactivation of one of its furnaces at the end of March 2008. Accordingly, production at Northshore is expected to benefit from an incremental increase of approximately 0.6 million tons in 2008 and 0.8 million tons annually thereafter.

Production for 2008 at Empire and Tilden was previously expected to be 4.0 million tons and 7.9 million tons, respectively. However, based on the recently announced capital expansion project at the mines, we have increased our rate of production and expect to produce 4.2 million tons at Empire in 2008. As part of the capacity expansion, we will also mine additional ore from our Tilden mine, located adjacent to Empire, and process it utilizing additional processing capacity at Empire. As a result, we expect to produce 8.4 million tons at Tilden in 2008.

North American Coal

Following is a summary of North American Coal results for the three and six months ended June 30, 2008:

	(In Millions, except tonnage)	
	Three Months Ended June 30, 2008	Six Months Ended June 30, 2008
Revenues from product sales and services	\$ 61.5 (84.5)	\$ 155.4 (180.9)

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

Cost of goods sold and
operating expense

Sales margin	\$ (23.0)	\$ (25.5)
--------------	-----------	-----------

Sales tons (in thousands)	576	1,574
---------------------------	-----	-------

37

Table of Contents**Production**

Following is a summary of coal production tonnage for 2008:

Mine:	Second Quarter	(In Millions) ⁽¹⁾		Full Year*
		First Six Months		
Pinnacle Complex	618	1,250		2,900
Oak Grove	115	492		1,100
Total	733	1,742		4,000

* Estimate

⁽¹⁾ Tons are short tons of 2,000 pounds.

We reported losses of \$23.0 million and \$25.5 million in sales margin for the three and six months ended June 30, 2008, respectively. On a sequential quarter basis, revenue decreased approximately 35 percent primarily as a result of lower sales volume. We sold 576 thousand tons during the second quarter of 2008 compared to 998 thousand tons in the first quarter of 2008. The decrease in sales volume was primarily attributable to a 27 percent decline in production as a result of development of the longwall panel at our Oak Grove mine. The extended development spanned throughout most of the second quarter. In addition, we declared force majeure on customer shipments from our Pinnacle mine in mid-March 2008. Production at the mine slowed during the second quarter as a result of encountering a fault area within the coal panel being mined at the time. The force majeure was lifted in mid-June 2008.

The costs per-ton increased approximately 58 percent from the first quarter of 2008. As a result of lower production in the second quarter, higher fixed costs were absorbed per ton produced.

Longwall development timing has been extended due to the difficulty in obtaining additional equipment and personnel. Accordingly, we reduced the total estimated metallurgical coal production for 2008 by approximately 300 thousand tons to 4.0 million tons.

Asia-Pacific Iron Ore

Following is a summary of Asia-Pacific Iron Ore results for the three months ended June 30, 2008 and 2007:

	Three Months Ended June 30,		(In Millions)		
	2008	2007	Sales price and rate	Change due to Sales volume	Total change
Revenues from product sales and services	\$ 268.2	\$ 114.8	\$ 172.0	\$ (18.6)	\$ 153.4
Cost of goods sold and operating expense	(107.3)	(89.6)	(32.1)	14.4	(17.7)

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

Sales margin	\$ 160.9	\$ 25.2	\$ 139.9	\$ (4.2)	\$ 135.7
Sales tons	1.8	2.1			

38

Table of Contents

Following is a summary of Asia-Pacific Iron Ore results for the six months ended June 30, 2008 and 2007:

	Six Months Ended June 30,		(In Millions) Change due to		Total change
	2008	2007	Sales price and rate	Sales volume	
Revenues from product sales and services	\$ 385.7	\$ 215.1	\$ 180.0	\$ (9.4)	\$ 170.6
Cost of goods sold and operating expense	(203.4)	(165.4)	(45.2)	7.2	(38.0)
Sales margin	\$ 182.3	\$ 49.7	\$ 134.8	\$ (2.2)	\$ 132.6

Sales tons	2008	2007
	3.9	4.1

During the second quarter of 2008, the Australian benchmark prices for lump and fines settled at increases of 97 percent and 80 percent, respectively. As a result, second quarter sales from our Asia-Pacific Iron Ore segment were recorded based on 2008 settled price increases, which reflects an incremental increase of approximately \$90.6 million when compared to second quarter revenue measured at 2007 prices. In addition, approximately \$65.0 million of additional product revenue related to first quarter sales was recognized in the second quarter upon settlement of 2008 benchmark prices.

Cost of goods sold and operating expenses for the quarter and year to date increased primarily due to higher costs of production partially offset by lower volume. Costs were also negatively impacted in the second quarter and first half of 2008 by approximately \$10.7 million and \$25.2 million, respectively, related to foreign exchange rates, as the U.S. dollar continued to weaken relative to the Australian dollar. The increase in cost of goods sold and operating expenses was also a result of higher fuel, maintenance and contract labor expenditures arising from inflationary pressures. Fuel and energy costs for the quarter and year to date increased by approximately \$3.5 million and \$5.0 million, respectively, compared to the comparable periods in 2007.

Production

Following is a summary of iron ore production tonnage for 2008 and 2007:

	Second Quarter		(In Millions) ⁽¹⁾ First Six Months		Full Year	
	2008	2007	2008	2007	2008*	2007
Mine:						
Koolyanobbing	1.9	2.1	3.7	3.9	7.7	7.7
Cockatoo Island	0.2	0.1	0.3	0.3	0.3	0.7
Total	2.1	2.2	4.0	4.2	8.0	8.4

* Estimate

⁽¹⁾ Tonnes are metric tons of 2,205 pounds. Cockatoo production reflects

our 50 percent share.

Production for the second quarter and first half of 2008 was relatively consistent with the comparable prior year periods. Cockatoo Island production continued through the second quarter of 2008, with shipments expected to terminate with the closing of the mine in the third quarter of 2008.

Table of Contents*Other operating income (expense)*

Following is a summary of other operating income (expense) for 2008 and 2007:

	(In Millions)			(In Millions)		
	Three Months Ended June 30,		Variance Favorable/ (Unfavorable)	Six Months Ended June 30,		Variance Favorable/ (Unfavorable)
	2008	2007		2008	2007	
Casualty recoveries	\$ 10.0	\$ 3.2	\$ 6.8	\$ 10.0	\$ 3.2	\$ 6.8
Royalties and management fee revenue	7.1	4.0	3.1	10.9	6.2	4.7
Selling, general and administrative expenses	(52.1)	(21.5)	(30.6)	(96.6)	(42.2)	(54.4)
Gain on sale of other assets	19.5	-	19.5	21.0	-	21.0
Miscellaneous - net	(1.4)	0.6	(2.0)	(1.9)	2.2	(4.1)
	\$ (16.9)	\$ (13.7)	\$ (3.2)	\$ (56.6)	\$ (30.6)	\$ (26.0)

The increase in selling, general and administrative expense of \$30.6 million and \$54.4 million in the second quarter and first half of 2008, respectively, compared with the same periods in 2007 is primarily a result of higher employment compensation and increased outside professional service fees associated with the expansion of our business of \$13.3 million and \$17.1 million for the quarter and year to date, respectively. In addition, selling, general and administrative expense increased in the quarter and first half of 2008 by \$5.4 million and \$11.3 million, respectively, as a result of additional corporate development activities in Latin America and Asia-Pacific. Increases of \$3.4 million and \$9.2 million for the quarter and year to date, respectively, relate to our North American Coal segment acquired in July 2007. Selling, general and administrative expense for the first six months of 2008 was also impacted by a charge in the first quarter of approximately \$6.8 million in connection with a legal case as well as \$2.1 million related to our interest in Sonoma acquired in 2007.

The gain on sale of other assets of \$19.5 million and \$21.0 million in the second quarter and first half of 2008, respectively, primarily relates to the sale of Synfuel, which was completed on June 4, 2008. We recorded a gain of \$19 million in the second quarter of 2008 upon completion of the transaction.

The increase in casualty recoveries for both the three and six months ended June 30, 2008 compared to the comparable prior year periods is primarily attributable to a \$9.2 million insurance recovery recognized in the current year related to a 2006 electrical explosion at our United Taconite facility.

Other income (expense)

Following is a summary of other income (expense) for 2008 and 2007:

	(In Millions)			(In Millions)		
	Three Months Ended June 30,		Variance Favorable/	Six Months Ended June 30,		Variance Favorable/
	2008	2007		2008	2007	

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

			(Unfavorable)			(Unfavorable)
Interest income	\$ 6.3	\$ 4.6	\$ 1.7	\$ 11.9	\$ 9.9	\$ 2.0
Interest expense	(9.8)	(2.1)	(7.7)	(17.0)	(3.1)	(13.9)
Other - net	0.3	(1.2)	1.5	0.3	0.1	0.2
	\$ (3.2)	\$ 1.3	\$ (4.5)	\$ (4.8)	\$ 6.9	\$ (11.7)

Table of Contents

The increase in interest income for both the quarter and year to date is primarily attributable to additional cash and investments held by Portman during the period coupled with higher average returns. Higher interest expense in both the second quarter and first half of 2008 reflected borrowings under our credit facilities and interest accretion for the deferred payment. See NOTE 5 DEBT AND CREDIT FACILITIES for further information.

Income Taxes

Our total tax provision from continuing operations for the six months ended June 30, 2008 and 2007 was \$121.6 million and \$39.3 million, respectively. The increase in our tax provision is attributable to higher pre-tax income and a higher effective tax rate. For the full year 2008, we expect an effective tax rate of approximately 26 percent, which reflects benefits from deductions for percentage depletion in excess of cost depletion related to U.S. operations as well as benefits derived from operations outside the U.S., which are taxed at rates lower than the U.S. statutory rate of 35 percent. See NOTE 10 INCOME TAXES for further information.

Equity Loss in Ventures

The equity loss in ventures for the three and six months ended June 30, 2008 of \$6.2 million and \$13.1 million, respectively, represents the results from our investment in Amapá. The results for the second quarter and year to date primarily consist of pre-production and start-up losses of \$8.4 million and \$22.1 million, respectively, including operating losses from the railroad of \$1.9 million and \$3.9 million, respectively, partially offset by foreign currency hedge gains, \$2.7 million and \$8.6 million, respectively.

Renewafuel

During the second quarter of 2008, Renewafuel announced it will build a next-generation biomass fuel production facility at the Telkite Technology Park in Marquette, Michigan. Projected to begin operations in the first quarter of 2009, the plant will annually produce 150,000 tons of high-energy, low-emission biofuel cubes from a sustainable composite of collected wood and agricultural feedstocks, including wood byproducts, corn stalks, grasses and energy crops. Our 70 percent controlling interest in Renewafuel is a strategic investment that provides an opportunity to utilize a green solution for further reduction of emissions consistent with our objective to contain costs and enhance efficiencies in a socially responsible manner. In addition to the potential use of Renewafuel's biofuel cubes in our production process, the cubes will be marketable to other organizations as a potential substitute for western coal and natural gas.

Renewafuel's biofuel cubes generate about the same amount of energy as coal from the western United States; however, the green fuel emits 90 percent less sulfur dioxide, 35 percent less particulate matter and 30 percent less acid gases than coal. In addition, the cubes are made from feedstocks that are considered biogenic carbon meaning they are already part of the natural carbon balance and will not add to atmospheric concentrations of carbon dioxide. At full production, Renewafuel will produce approximately 60,000 tons of biomass fuel cubes for the steam plant of Marquette Board of Light and Power, as well as replace a portion of coal used at our two nearby Michigan iron ore mines as process fuel for kilns used to harden iron ore pellets. The capital cost for the facility is estimated to be approximately \$10 million.

Table of Contents**LIQUIDITY, CASH FLOWS AND CAPITAL RESOURCES***Liquidity*

Following is a summary of key liquidity measures at June 30, 2008 and December 31, 2007:

	(In Millions)	
	June 30, 2008	December 31, 2007
Cash and cash equivalents	\$ 320.4	\$ 157.1
Credit facility	\$ 800.0	\$ 800.0
Senior notes	325.0	-
Portman facilities	153.8	-
Senior notes drawn	(325.0)	-
Term loans drawn	(200.0)	(200.0)
Revolving loans drawn	(160.0)	(240.0)
Letter of credit obligations	(31.4)	(16.2)
Borrowing capacity available	\$ 562.4	\$ 343.8

Uses of liquidity primarily include operational needs, general capital requirements, and capital expenditures related to the Empire and Tilden mine expansion project, upgrades on the rail line at Portman between the operations and the port, and longwall system down payments at our Pinnacle mine.

At June 30, 2008, Amapá had long-term project debt outstanding of approximately \$338 million for which we have provided a several guarantee on our 30 percent share. Amapá has engaged in ongoing discussions with its lenders regarding loan amendments to address several loan covenant violations related to project delays, higher construction expenditures, debt-to-equity ratios and deliveries under its long-term supply agreement with an operator of an iron ore pelletizing plant in the Kingdom of Bahrain. In addition, at June 30, 2008, Amapá had total short-term loans outstanding of \$188.9 million. We subsequently provided a several guarantee in July 2008 on our 30 percent share of the total debt outstanding, or \$159.1 million.

See NOTE 5 DEBT AND CREDIT FACILITIES for further information on our credit facilities.

Cash Flows

Following is a summary of cash flows for the six months ended June 30, 2008 and 2007:

	(In Millions)	
	Six Months Ended June 30, 2008	2007
Borrowings under senior notes	\$ 325.0	\$ -
Net cash provided (used) by operating activities	82.9	(37.7)
Proceeds from sale of assets	38.6	1.8
Purchase of minority interest in Portman	(137.8)	-

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

Net borrowings (repayments) under revolving credit facility	(80.0)	125.0
Capital expenditures	(59.1)	(46.2)
Net purchase of marketable securities	(6.7)	(36.0)
Investment in ventures	(2.2)	(223.7)
Other	2.6	(5.6)
Increase (decrease) in cash and cash equivalents	\$ 163.3	\$ (222.4)

Table of Contents

A summary of cash flows due to changes in operating assets and liabilities is as follows:

	(In Millions)	
	Six Months Ended June 30, 2008	2007
Changes in product inventories	\$ (205.3)	\$ (159.0)
Changes in payables and accrued expenses	(108.4)	8.1
Changes in receivables and other assets	63.4	(48.1)
Cash used by changes in operating assets and liabilities	\$ (250.3)	\$ (199.0)

Our product inventory balances at June 30, 2008 and December 31, 2007 were as follows:

	(In Millions)			
	June 30, 2008		December 31, 2007	
	Amount	Tons*	Amount	Tons*
North American Iron Ore	\$ 297.1	6.7	\$ 114.3	3.4
North American Coal	15.4	0.3	8.3	0.1
Asia-Pacific Iron Ore	38.0	1.3	30.2	1.1
Other	10.6	0.2	-	-
Total	\$ 361.1		\$ 152.8	

*North American Iron Ore tons are long tons of pellets of 2,240 pounds.

North American Coal tons are short tons of 2,000 pounds.

Asia-Pacific Iron Ore tons are metric tons of 2,205 pounds.

The increase in North American Iron Ore pellet inventory was primarily due to higher production volume as well as winter-related shipping constraints on the lower Great Lakes earlier in the year.

TILDEN MINE THREATENED PATTERN OF VIOLATIONS

On June 17, 2008 the MSHA notified Tilden that it had conducted an initial screening of Tilden's compliance record. MSHA's notice indicated that based upon the screening a potential pattern of violations exists at the mine. Tilden has requested a conference with MSHA and is preparing a written action plan indicating actions it intends to implement to reduce repeated significant and substantial violations at the operation. No date has been set for the conference at this time.

WABUSH MINES LITIGATION

We have been named as defendants, along with U. S. Steel, in an action brought before the Ontario Superior Court of Justice by Dofasco. The action pertains to a contemplated transaction whereby Dofasco would purchase our ownership interests and those of U. S. Steel in Wabush. After six months of negotiations with no definitive agreements reached, both we and U. S. Steel determined to withdraw from negotiations and retain our respective ownership interests in Wabush. Notice of the withdrawal was delivered to Dofasco on March 3, 2008.

On March 20, 2008, Dofasco commenced this action against both Cliffs and U. S. Steel. Dofasco's statement of claim demands specific performance of an alleged binding contract for Cliffs and U. S. Steel to sell their respective interests in Wabush with equitable compensation in the amount of C\$427 million or, in the alternative, general damages in the amount of C\$1.8

Table of Contents

billion. We strongly disagree with Dofasco's allegations and intend to defend this case vigorously. On May 14, 2008 U. S. Steel filed a Notice of Motion to dismiss the action. We filed an identical Notice of Motion on May 15, 2008. A two day hearing was held on our respective motions on June 23 and 24, 2008, and we expect a ruling from the court during the third quarter of 2008.

PENSIONS AND OTHER POSTRETIREMENT BENEFITS

Defined benefit pension expense totaled \$5.4 million and \$9.2 million for the second quarter and first half of 2008, respectively, compared with \$5.2 million and \$10.4 million for the comparable periods in 2007. Defined benefit pension expense for the first six months of 2008 decreased from the comparable prior year period as a result of changes in the service lives of the workforce as well as favorable experience on investments and discount rates. See NOTE 8 PENSION AND OTHER POSTRETIREMENT BENEFITS for additional information.

OPEB expense totaled \$1.2 million and \$2.2 million for the second quarter and first half of 2008, respectively, compared with \$2.4 million and \$4.8 million for the comparable 2007 periods. The decrease in OPEB expense for both the quarter and year to date was due to changes in remaining service lives of employees and lower medical claims paid experience.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In May 2008, the FASB issued FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS 162). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with U.S. GAAP. SFAS 162 is effective 60 days following the SEC's approval of the PCAOB's related amendments to remove the GAAP hierarchy from auditing standards, where it has previously resided. We are evaluating the impact SFAS 162 will have on our consolidated financial statements upon adoption, but do not expect this Statement to result in a material change in current practice.

In April 2008, the FASB issued FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142). The objective of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141(R), and other U.S. GAAP. This FSP applies to all intangible assets, whether acquired in a business combination or otherwise and shall be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years and applied prospectively to intangible assets acquired after the effective date. Early adoption is prohibited. We are currently evaluating the impact adoption of this FSP will have on our consolidated financial statements.

In March 2008, the FASB issued Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, (SFAS 161). This Statement amends and expands the disclosure requirements of Statement 133 to provide users of financial statements with an enhanced understanding of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations and how derivative instruments and related

Table of Contents

hedged items affect an entity's financial position, financial performance and cash flows. The new requirements apply to derivative instruments and non-derivative instruments that are designated and qualify as hedging instruments and related hedged items accounted for under SFAS 133. The Statement is effective for fiscal years and interim periods beginning after November 15, 2008. Early application is encouraged. We are currently evaluating the impact adoption of this Statement will have on our consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13* (FSP 157-1). FSP 157-1 amends SFAS 157 to remove certain leasing transactions from its scope. In addition, on February 12, 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which amends SFAS 157 by delaying its effective date by one year for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. This pronouncement was effective upon issuance. We have deferred the adoption of SFAS 157 with respect to all non-financial assets and liabilities in accordance with the provisions of this pronouncement. On January 1, 2009, SFAS 157 will be applied to all other fair value measurements for which the application was deferred under FSP FAS 157-2. We are currently assessing the impact SFAS 157 will have in relation to non-financial assets and liabilities on our consolidated financial statements. See NOTE 11 FAIR VALUE OF FINANCIAL INSTRUMENTS for further information.

FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115* (SFAS 159) became effective on January 1, 2008. This standard permits entities to choose to measure many financial instruments and certain other items at fair value. While SFAS 159 became effective for our 2008 fiscal year, we did not elect the fair value measurement option for any of our financial assets or liabilities. Therefore, adoption of this Statement did not have a material impact on our consolidated financial statements.

MARKET RISKS

We are subject to a variety of risks, including those caused by changes in the market value of equity investments, changes in commodity prices, interest rates and foreign currency exchange rates. We have established policies and procedures to manage such risks; however, certain risks are beyond our control.

Foreign Currency Exchange Rate Risk

Portman hedges a portion of its United States currency-denominated sales in accordance with a formal policy. The primary objective for using derivative financial instruments is to reduce the earnings volatility attributable to changes in Australian and United States currency fluctuations. The instruments are subject to formal documentation, intended to achieve qualifying hedge treatment, and are tested at inception and at each reporting period as to effectiveness. Changes in fair value for highly effective hedges are recorded as a component of other comprehensive income. Ineffective portions are charged to *Miscellaneous net* on the Statements of Unaudited Condensed Consolidated Operations. At June 30, 2008, Portman had \$559.2 million of outstanding exchange rate contracts in the form of call options, collar options, convertible collar options and forward exchange contracts with varying maturity dates ranging from July 2008 to May 2011, and fair value adjustments of \$44.4 million, based on the June 30,

Table of Contents

2008 spot rate. A 100 basis point increase in the value of the Australian dollar from the month-end rate would increase the fair value by approximately \$40.1 million and a 100 basis point decrease would reduce the fair value by approximately \$49.1 million.

Our share of pellets produced at the Wabush operation in Canada represents approximately five percent of our North American iron ore pellet production. This operation is subject to currency exchange fluctuations between the United States and Canadian currency; however, we do not hedge our exposure to this currency exchange fluctuation.

Interest Rate Risk

Interest for borrowings under our credit facility is at a floating rate, dependent in part on the LIBOR rate, which exposes us to the effects of interest rate changes. Based on \$260 million in outstanding revolving and term loans at June 30, 2008 with a floating interest rate and no corresponding fixed rate swap, a 100 basis point change to the LIBOR rate would result in a change of \$2.6 million to interest expense on an annual basis.

In October 2007, we entered into a \$100 million fixed rate swap to convert a portion of this floating rate into a fixed rate. With the swap agreement, we pay a fixed three-month LIBOR rate for \$100 million of our floating rate borrowings. The interest rate swap terminates in October 2009 and qualifies as a cash flow hedge.

Other Risks

Our investment policy relating to short-term investments is to preserve principal and liquidity while maximizing the short-term return through investment of available funds. The carrying value of these investments approximates fair value on the reporting dates.

Approximately six percent of our U.S. pension trust assets and two percent of VEBA assets are exposed to sub prime risk, all of which are investment grade and fully collateralized by properties. These investments primarily include Mortgage-Backed Securities and the Home Equity subset of the Asset-Backed Securities sector with AAA and AA credit quality ratings.

The spreads of these structures have narrowed causing their market values to improve as the liquidity crisis in the U.S. has waned. In addition, the over-collateralization of the arrangements mitigates the potential for principal loss in these tranches, and the securities held have not been subject to rating downgrades to date. The U.S. pension and VEBA trusts have no allocations to mortgage-related collateralized debt obligations.

The rising cost of energy and supplies are important issues affecting our production costs. Recent trends indicate that electric power, natural gas and oil costs can be expected to increase over time, although the direction and magnitude of short-term changes are difficult to predict. Our consolidated North American iron ore mining ventures consumed approximately 5.5 million MMBTU s of natural gas and 8.9 million gallons of diesel fuel in the first six months of 2008. As of June 30, 2008, we purchased or have forward purchase contracts for 6.9 million MMBTU s of natural gas, representing approximately 53 percent of our 2008 requirements, at an average price of \$9.66 per MMBTU and 10.8 million gallons of diesel fuel, representing approximately 43 percent of our annual requirements, at \$3.00 per gallon for our North American iron ore mining ventures.

Our strategy to address increasing energy rates includes improving efficiency in energy usage and utilizing the lowest cost alternative fuels. To counter the rising cost of fuel and shrink

Table of Contents

our carbon footprint, we have made investments in a renewable fuel company and a small natural gas field in Kansas. Our North American Iron Ore mining ventures enter into forward contracts for certain commodities, primarily natural gas and diesel fuel, as a hedge against price volatility. Such contracts are in quantities expected to be delivered and used in the production process. At June 30, 2008, the notional amount of the outstanding forward contracts was \$33.5 million, with an unrecognized fair value net gain of \$20.0 million based on June 30, 2008 forward rates. The contracts mature at various times through December 2009. If the forward rates were to change 10 percent from the month-end rate, the value and potential cash flow effect on the contracts would be approximately \$5.3 million.

OUTLOOK

North American Iron Ore

We updated our guidance for expected 2008 per-ton pricing and costs and currently expect to realize average per-ton prices of \$90, up from our previous estimate of \$85 and an increase of 36 percent from the average price per ton of \$66 realized in 2007. This expectation is based on an annual average hot band steel price of \$775 per ton at certain steelmaking facilities. Cost per ton is estimated to average \$57 for the full year up from our previous estimate of \$56, and an increase of 19 percent compared with the \$48 per-ton average reported for 2007. The higher cost per ton estimate is the result of increasing royalty payments, energy costs and maintenance activities associated with our recently announced expansion at the Empire and Tilden mines in Michigan.

In 2008, we expect to have equity production of approximately 24 million tons and sales volume of an estimated 25 million tons as we sell through inventory. The increases in our equity production and sales volume are a result of the Michigan operations expansion and the mid-year acquisition of the remaining 30 percent interest in United Taconite, combined with continued market strength.

North American Coal

North American Coal is expected to produce and sell approximately 4.0 million tons of metallurgical coal in 2008, a 300 thousand ton reduction from previous guidance. The decrease is a result of extended longwall development due to the timing of adding additional equipment and personnel. Average sales realization per ton is still expected to be approximately \$94. Cost per ton for the year is expected to be \$89, a three dollar increase from previous guidance, due to the reduced production outlook.

Asia-Pacific Iron Ore

Our Asia-Pacific Iron Ore segment is expected to achieve average revenue per tonne of approximately \$102 in 2008. This is an 85 percent increase from the previous year's per-tonne average of \$55, and is primarily due to recent iron ore settlements in Australia of an 80 percent increase for fines and a 97 percent increase for lump ore.

We expect cost per tonne in Asia-Pacific Iron Ore to average \$58 in 2008, up 35 percent from the \$43 per-tonne average in 2007. The cost increase is primarily the result of higher expected royalty payments related to higher than expected year-over-year price increases, rising fuel costs and the impact of foreign exchange. Production and sales volumes are both expected to be 8.0 million tonnes.

Table of Contents

Sonoma Coal Project Outlook

We have a 45 percent economic interest in the Sonoma project and expect total production of approximately 2.0 million tonnes for 2008. With recent reports of significant year-over-year increases in pricing for metallurgical coal, Sonoma is expected to benefit and generate average revenue of \$142 per tonne in 2008, an increase from our previous guidance of \$129 per tonne. Our outlook for Sonoma includes a mix of metallurgical and thermal coal.

Costs at Sonoma are projected at approximately \$92 per tonne for 2008, up from our previous estimate of \$83 per tonne. The higher cost is the result of expenses attributed to changes in mine operations related to increasing the production ratio of metallurgical versus thermal coal.

Amapá Iron Ore Project

The Amapá Project, a project between MMX and Cliffs, began production in late-December 2007. We own a 30 percent interest in the project. MMX, who has agreed to sell its stake in Amapá to Anglo American plc, has management control over the venture. MMX has indicated plans to complete construction of the concentrator and ramp up operations during 2008, with production and sales expected to total approximately three million tonnes for the full year. Based on start-up delays and production levels, we expect to incur equity losses in 2008. MMX expects Amapá to produce at the 6.5 million tonne design level in 2009.

Other Expectations

Total operating expenses are anticipated to be approximately \$140 million in 2008, comprised of selling, general and administrative expenses offset by casualty recoveries, royalties and gain on sale of assets. We anticipate an effective tax rate of approximately 26 percent for the year. We also expect 2008 capital expenditures of approximately \$250 million and depreciation and amortization of approximately \$190 million. The increase from the previous estimate of \$200 million of capital expenditures is related to the recently announced Empire and Tilden mine-expansion project, upgrades on the rail line at Portman between the operations and the port, and longwall system down payments at our Pinnacle mine.

Table of Contents

FORWARD-LOOKING STATEMENTS

This report contains statements that constitute forward-looking statements. These forward-looking statements may be identified by the use of predictive, future-tense or forward-looking terminology, such as believes, anticipates, expects, estimates, intends, may, will or similar terms. These statements are as of the date of this report, and we undertake no ongoing obligation, other than that imposed by law, to update these statements. These statements appear in a number of places in this report and include statements regarding our intent, belief or current expectations of our directors or our officers with respect to, among other things:

trends affecting our financial condition, results of operations or future prospects;

estimates of our economic iron ore and coal reserves;

our business and growth strategies;

our financing plans and forecasts;

labor relations; and

uncertainties associated with unanticipated geological conditions related to underground mining. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve significant risks and uncertainties, and that actual results may differ materially from those contained in the forward-looking statements as a result of various factors, some of which are unknown. For a discussion of the factors, including but not limited to, those that could adversely affect our actual results and performance, see Risk Factors in Part I Item 1A in our Annual Report on Form 10-K for the year-ended December 31, 2007.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information regarding Market Risk of the Company is presented under the caption Market Risk which is included in our Annual Report on Form 10-K for the year ended December 31, 2007 and in the Management's Discussion and Analysis section of this report.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of disclosure controls and procedures in Rule 13a-15(e) promulgated under the Exchange Act. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was

Table of Contents

required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of the date of the evaluation conducted by our Chief Executive Officer and Chief Financial Officer.

Changes in internal controls over financial reporting

There have been no changes in our internal control over financial reporting or in other factors that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. See Management Report on Internal Controls Over Financial Reporting and Report of Independent Registered Public Accounting Firm in our Annual Report on Form 10-K for the year ended December 31, 2007.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

Tilden Mine Threatened Pattern of Violations. On June 17, 2008 the MSHA notified Tilden that it had conducted an initial screening of Tilden's compliance record. MSHA's notice indicated that based upon the screening a potential pattern of violations exists at the mine. Tilden has requested a conference with MSHA and is preparing a written action plan indicating actions it intends to implement to reduce repeated significant and substantial violations at the operation. No date has been set for the conference at this time.

Wabush Litigation. We have been named, along with two of our wholly owned subsidiaries, Cliffs Mining Company and Wabush Iron Co. Limited, as defendants, along with U. S. Steel Canada Inc. (formerly Stelco Inc.), HLE Mining Limited Partnership and HLE Mining GP Inc. (collectively, U. S. Steel), in an action brought before the Ontario Superior Court of Justice by Dofasco. The action pertains to a contemplated transaction whereby Dofasco and/or certain of its affiliates would purchase our ownership interests and those of U. S. Steel in Wabush. After six months of negotiations with no definitive agreements reached, both we and U. S. Steel determined to withdraw from negotiations and retain our respective ownership interests in Wabush. Notice of the withdrawal was delivered to Dofasco on March 3, 2008.

On March 20, 2008, Dofasco commenced this action against both Cliffs and U. S. Steel. Dofasco's statement of claim demands specific performance of an alleged binding contract for Cliffs and U. S. Steel to sell their respective interests in Wabush with equitable compensation in the amount of C\$427 million or, in the alternative, general damages in the amount of C\$1.8 billion. We strongly disagree with Dofasco's allegations and intend to defend this case vigorously. On May 14, 2008 U. S. Steel filed a Notice of Motion to dismiss the action. We filed an identical Notice of Motion on May 15, 2008. A two day hearing was held on our respective motions on June 23 and 24, 2008, and we expect a ruling from the court during the third quarter of 2008.

Table of Contents

American Steamship Litigation. On May 20, 2008, a jury returned a verdict in favor of Cliffs Sales Company with respect to overcharges for fuel Adjustments. The jury awarded Cliffs Sales damages totaling \$3.7 million. It was determined that Oglebay Norton was responsible for \$1.7 million of the damages to Cliffs Sales and American Steamship Company was responsible for the remaining \$2.0 million. The jury stated that ASC could only charge an additional half cent fuel surcharge on shuttles to a blast furnace ore dock in Cleveland, Ohio when the ore was delivered to Cleveland Bulk Terminal by a non-ASC vessel. The jury found against Cliffs Sales finding that ASC was not obligated to provide winter shuttle service. Cliffs Sales filed a motion for the payment of interest on the amounts due to Cliffs Sales as well as for our costs for trying. ASC and Oglebay filed motions for New Trial and for Judgment as a Matter of Law.

Northshore Notice of Violation. On July 28, 2008, the MPCA issued a Notice of Violation (NOV) to Northshore alleging violations related to the Control City Standard for the period of March 2006 through October 2007, specifically with respect to MPCA s interpretation of the Control City Standard s emission limits and related monitoring and reporting requirements. The NOV states that Northshore has been in compliance with MPCA s interpretation of the Standard since October 2007, but requires corrective actions relating to operating and maintaining facilities of treatment and control to remain in compliance. Although the NOV does not seek civil penalties, it contains various requests for information and reserves the right for MPCA to take further action. Northshore disputes the allegations contained in the NOV and is currently assessing its legal/administrative options.

M.M. Silta, Inc. v. Cleveland-Cliffs Inc et al. The motions filed with the trial court for judgment as a matter of law and a new trial were denied by the trial court. A notice of appeal was filed, but no briefs have been filed to date.

ITEM 1A. Risk Factors

Our 2007 Annual Report on Form 10-K includes a detailed discussion of our risk factors. The information presented below amends, updates and should be read in conjunction with the risk factors and information disclosed in that Form 10-K.

We are subject to risks involving the acts or omissions of our joint venture partners when we are not the manager of the joint venture.

We cannot control the actions of our joint venture partners, especially when we have a minority interest in a joint venture and are not designated as the manager of the joint venture. Further, in spite of performing customary due diligence prior to entering into a joint venture, we cannot guaranty full disclosure of prior acts or omissions of the sellers or those with whom we enter into joint ventures. Most recently, we learned that the Brazilian Federal Police have initiated a criminal investigation into how the Amapá railway concession was obtained prior to our involvement in the project. Such risks could have a material adverse effect on the business, results of operations or financial condition of our joint venture interests.

The proposed merger with Alpha Natural Resources, Inc. is subject to certain closing conditions that, if not satisfied or waived, will result in the merger not being completed, which may cause the market price of our common shares to decline.

The merger is subject to customary conditions to closing, including the receipt of required approvals of our and Alpha s shareholders. If any condition to the merger is not satisfied or, if permissible, waived, the

merger will not be completed. In addition, we and Alpha may terminate the merger agreement in certain circumstances. If we and Alpha do not complete the merger, the market

Table of Contents

price of our common shares may fluctuate to the extent that the current market prices of those shares reflect a market assumption that the merger will be completed. We will also be obligated to pay certain investment banking, financing, legal and accounting fees and related expenses in connection with the merger, whether or not the merger is completed.

Whether or not the merger with Alpha is completed, the announcement and pendency of the merger could cause disruptions in our business, which could have an adverse effect on our business and financial results.

Whether or not the merger is completed, the announcement and pendency of the merger could cause disruptions in our businesses. Specifically:

current and prospective employees of Alpha experience uncertainty about their future roles with the combined company, which might adversely affect our ability to retain key managers and other employees; and

the attention of our management may be directed toward the completion of the merger.

In addition, we have diverted significant management resources in an effort to complete the merger and are subject to restrictions contained in the merger agreement on the conduct of our business. If the merger is not completed, we will have incurred significant costs, including the diversion of management resources, for which they will have received little or no benefit. Further, we may be required to pay Alpha a termination fee of either \$100 million or \$350 million if the merger agreement is terminated, depending on the specific circumstances of the termination.

Opposition by Harbinger Capital Partners, one of our shareholders, and/or other significant shareholders of ours may prevent completion of the merger.

The approval of the issuance of our common shares pursuant to the terms of the merger agreement with Alpha requires the affirmative vote of at least two-thirds of the votes entitled to be cast by the holders of our outstanding common shares and preferred shares, voting together as a class. As a result, the failure of Harbinger Capital Partners, which, according to a filing on Schedule 13D, filed with the SEC on July 17, 2008, beneficially owns [15.57]% of our outstanding common shares, to vote in favor of the issuance of our common shares in the merger would significantly decrease the likelihood that the merger will be completed. On July 17, 2008, Harbinger Capital Partners publicly stated that it did not believe that the merger would be in the best interests of our shareholders. If Harbinger Capital Partners and/or other significant shareholders of ours oppose the merger, then our ability to obtain our required shareholder approval will be adversely affected.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) On April 15, 2008, May 15, 2008 and June 15, 2008, pursuant to the Cleveland-Cliffs Inc Voluntary Non-Qualified Deferred Compensation Plan (VNQDC Plan) the Company sold a total

of 35 common shares, par value \$.125 per share, of the Company (Common Shares) for an aggregate consideration of \$2,987.30 to the Trustee of the Trust maintained under the VNQDC Plan. These sales were made in reliance on Rule 506 of Regulation D under the Securities Act of 1933 pursuant to an election made by one mine manager under the VNQDC Plan.

- (b) The table below sets forth information regarding repurchases by the Company of its Common Shares during the periods indicated.

Table of Contents

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit) \$	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Programs
April 1-30, 2008				2,495,400
May 1 - 31, 2008	3,190(2)	93.6763		2,495,400
June 1 - 30, 2008				2,495,400
Total	3,190	93.6763		2,495,400

- (1) On July 11, 2006, we received the approval by the Board of Directors to repurchase up to an aggregate of four million outstanding Common Shares. There were no repurchases in the second quarter under this program.
- (2) On May 21 and May 23, 2008 the Company acquired 3,190 Common Shares from two employees in connection with the lapsing of restrictions on certain shares on the respective dates. The shares were repurchased to satisfy the tax withholding obligations of the employees.

ITEM 4. Submission of Matters to a Vote of Security Holders

The Company's Annual Meeting of Shareholders was held on May 13, 2008. At the meeting the Company's shareholders acted upon the election of ten Directors, and the ratification of Deloitte & Touche LLP as the Company's independent registered public accounting firm to examine our consolidated financial statements for the 2008 fiscal year.

In the election of Directors, the ten nominees named in the Company's Proxy Statement, dated March 26, 2008, were elected to hold office until the next Annual Meeting of Shareholders and until their respective successors are elected. Each nominee received the number of votes set opposite his or her name:

<u>Nominees</u>	<u>For</u>	<u>Withheld</u>
R. C. Cambre	75,075,400	402,834
J. A. Carrabba	75,032,614	445,620
S. M. Cunningham	75,319,482	158,752
B. J. Eldridge	75,316,476	161,756
S. M. Green	75,326,546	151,688
J. D. Ireland, III	75,055,932	422,304

Edgar Filing: CLEVELAND CLIFFS INC - Form 10-Q

F. R. McAllister	75,072,100	406,134
R. Phillips	75,015,700	462,534
R. K. Riederer	75,323,178	155,056
A. Schwartz	75,047,044	431,190

Table of Contents
