Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 1 Basis of Presentation

The consolidated financial statements include the accounts of First Commonwealth Financial Corporation and its wholly owned subsidiaries (First Commonwealth). All material intercompany transactions have been eliminated in consolidation. Certain reclassifications have been made in the consolidated financial statements for 2008 and 2009 to conform to the classifications presented for 2009. The Consolidated Statements of Financial Condition presented on page 3 reflects amounts for the period ended December 31, 2008 which have been reclassified from the presentation provided in First Commonwealth's 2008 Annual Report on Form 10-K. This reclassification relates to \$13.0 million in borrowings which were presented as short-term in the Annual Report on Form 10-K and are now presented as long-term borrowings in the 2009 financial statements. The amount reclassified represents debt with an original maturity of greater than one year, but remaining maturity of less than one year.

The accounting and reporting policies of First Commonwealth conform with accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual realized amounts could differ from those estimates. In the opinion of management, the unaudited interim consolidated financial statements include all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of First Commonwealth's financial position, results of operations, cash flows, and changes in shareholders' equity as of and for the periods presented.

The results of operations for the three months ended March 31, 2009 and 2008 are not necessarily indicative of the results that may be expected for the full year or any other interim period. These interim financial statements should be read in conjunction with First Commonwealth's 2008 Annual Report on Form 10-K which is available on First Commonwealth's website at <http://www.fcbanking.com>. First Commonwealth's website also provides additional information of interest to investors and clients, including other regulatory filings made to the Securities and Exchange Commission, press releases, historical stock prices, dividend declarations, corporate governance information, policies, and documents as well as information about products and services offered by First Commonwealth.

Note 2 Supplemental Comprehensive Income Disclosures

The following table identifies the related tax effects allocated to each component of other comprehensive income in the Consolidated Statements of Changes in Shareholders' Equity:

	March 31, 2009			March 31, 2008		
	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount	Pre-tax Amount	Tax (Expense) Benefit	Net of Tax Amount
(dollars in thousands)						
Unrealized gains on securities:						
Unrealized holding gains arising during the period	\$ 13,080	\$ (4,578)	\$ 8,502	\$ 11,792	\$ (4,128)	\$ 7,664
Noncredit related losses on securities not expected to be sold	(18,723)	6,553	(12,170)	-0-	-0-	-0-
Less: reclassification adjustment for losses (gains) realized in net income	9,842	(3,445)	6,397	(465)	163	(302)

Note 3 Supplemental Cash Flow Disclosures

The following table presents information related to cash paid during the year for interest and income taxes as well as detail on noncash investing and financing activities.

	For the Three Months Ended March 31, 2009 2008	
	(dollars in thousands)	
Cash paid during the current year for:		
Interest	\$ 24,853	\$ 40,947
Income taxes	\$ 500	\$ 700
Noncash investing and financing activities:		
ESOP loan reductions	\$ 500	\$ 500
Loans transferred to other real estate owned and repossessed assets	\$ 24,914	\$ 2,712
Investments purchased, not settled	\$ 1,491	\$ -0-
Net unrealized (losses) gains on securities available for sale	\$ 4,199	\$ 11,327
<u>Correction of Prior Period Error in Cash Flow</u>		

For reporting periods prior to March 31, 2009, we have identified an error in the line classification on our Consolidated Statements of Cash Flows. In these periods, we presented the change in Payable due to investments purchased/not settled in the Operating Activities section of the Consolidated Statements of Cash Flows, instead of in the Investing Activities section.

The error has been corrected in the Consolidated Statements of Cash Flows presented on page 7 by removing the transaction from the Operating Activities section and including it in the Investing Activities section. Also, unsettled transactions related to the purchase or sale of investment securities are now presented as part of the non-cash transaction disclosure table presented above.

We have not amended or restated any prior period filings as this error does not impact our reported net income, net cash flows, or shareholders equity.

The affect of the correction of this error on Net cash (used in) provided by operating activities and Net cash (used in) provided by investing activities for prior reporting periods is reflected below.

Original	\$ -0-	\$ -0-	\$ -0-	\$ -0-
Revised	\$ -0-	\$ -0-	\$ 16,462	\$ 8,670

Note 4 Variable Interest Entities

In December 2003, the Financial Accounting Standards Board (FASB) issued FIN 46(R), Consolidation of Variable Interest Entities. As defined by FIN 46(R), a Variable Interest Entity (VIE) is a corporation, partnership, trust or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. Under FIN 46(R), an entity that holds a variable interest in a VIE is required to consolidate the VIE if the entity is deemed to be the primary beneficiary, which generally means it is subject to a majority of the risk of loss from the VIE s activities, is entitled to receive a majority of the entity s residual returns, or both.

As part of its community reinvestment initiatives, First Commonwealth invests in qualified affordable housing projects as a limited partner. First Commonwealth receives Federal affordable housing tax credits and rehabilitation tax credits for these limited partnership investments. First Commonwealth s carrying value, or its maximum potential exposure, to these partnerships is \$1.5 million as of March 31, 2009, which consists of twelve limited partnership investments. Management evaluates the limited partnerships annually for impairment and recorded a \$1.2 million impairment charge in the fourth quarter of 2008. Based on FIN 46(R), First Commonwealth has determined that these investments will not be consolidated but continue to be accounted for under the equity method whereby First Commonwealth s portion of the partnerships results are recognized as earned.

Note 5 Commitments and Letters of Credit

Standby letters of credit are conditional commitments issued by First Commonwealth to guarantee the performance of a customer to a third party. The contract or notional amount of these instruments reflects the maximum amount of future payments that First Commonwealth could be required to pay under the guarantees if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from collateral held or pledged. In addition, many of these commitments are expected to expire without being drawn upon; therefore, the total commitment amounts do not necessarily represent future cash requirements.

The following table identifies the notional amount of those instruments at March 31, 2009 (dollars in thousands):

Commitments to extend credit	\$ 1,527,586
------------------------------	--------------

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Financial standby letters of credit	\$ 105,620
Performance standby letters of credit	\$ 81,056
Commercial letters of credit	\$ 29

Obligations of U.S. Government-sponsored enterprises includes obligations issued by Federal National Mortgage Association and Federal Home Loan Mortgage Corporation which had an amortized cost of \$137 thousand and a fair value of \$145 thousand.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

For the three months ended March 31, 2009, there were no realized gains or losses on securities held to maturity.

Note 7 Impairment of Investment Securities

During the first quarter of 2009, First Commonwealth early adopted FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairment which requires that credit related other-than-temporary impairment on debt securities be recognized in earnings while noncredit related other-than-

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 7 Impairment of Investment Securities (Continued)

temporary impairment on debt securities not expected to be sold be recognized in other comprehensive income (OCI). As a result, in the first quarter of 2009 we recorded \$9.9 million in other-than-temporary impairment charges. These charges include \$8.4 million in credit related other-than-temporary impairment on four trust preferred collateralized debt obligations and \$1.5 million recorded on equity securities related to four Pennsylvania-based financial institutions. All of the securities for which other-than-temporary impairment was recorded were classified as available for sale securities. Additionally, \$18.7 million in noncredit related other-than-temporary impairment was recorded in OCI on the four trust preferred collateralized debt obligations.

The following table shows the effect of adopting FSP FAS 115-2 and FAS 124-2 on the financial statements as of March 31, 2009 (dollars in thousands, except share data):

	Prior to Adoption	After Adoption	Effect of Adoption
Impairment losses on securities	\$ (28,589)	\$ (9,866)	\$ 18,723
Noncredit related losses on securities not expected to be sold (recognized in other comprehensive income)	\$ -0-	\$ 18,723	\$ 18,723
Net impairment losses	\$ (28,589)	\$ (9,866)	\$ 18,723
Net income	\$ (10,483)	\$ 1,687	\$ 12,170
Basic Earnings Per Share	\$ (0.12)	\$ 0.02	\$ 0.14
Diluted Earnings Per Share	\$ (0.12)	\$ 0.02	\$ 0.14
Accumulated other comprehensive loss	\$ (10,593)	\$ (22,763)	\$ (12,170)

In accordance with the new guidance, the noncredit related portion of other-than-temporary impairment losses recognized in prior year earnings was reclassified as a cumulative effect adjustment that increased retained earnings and decreased accumulated OCI at the beginning of the year. In 2008, \$13.0 million in other-than-temporary impairment charges were recognized, of which \$6.5 million related to noncredit related impairment on debt securities. Therefore, the cumulative effect adjustment to retained earnings totaled \$6.5 million, or \$4.2 million net of tax.

First Commonwealth utilizes the specific identification method to determine the net gain or loss on debt securities and the average cost method to determine the net gain or loss on equity securities.

We review our investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer and the intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in the market. We evaluate our intent and ability to hold debt securities based upon our investment strategy for the particular type of security and our cash flow needs, liquidity position, capital adequacy and interest rate risk position. In addition, the risk of future other-than-temporary impairment may be influenced by additional bank failures, prolonged recession in the U.S. economy, changes in real estate values, interest deferrals, and whether the federal government provides assistance to financial institutions. Our pooled trust preferred collateralized debt obligations are beneficial interests in securitized financial assets within the scope of EITF 99-20, and are therefore evaluated for other-than-temporary impairment using management's best estimate of future cash flows. If these estimated cash flows determine that it is probable an adverse change in

Table of Contents

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 7 Impairment of Investment Securities (Continued)

cash flows has occurred, then other-than-temporary impairment would be recognized in accordance with FSP FAS 115-2 and FAS 124-2. There is a risk that this quarterly review could result in First Commonwealth recording other-than-temporary impairment charges in the future. See Note 9 Fair Values of Assets and Liabilities for additional information.

The following table presents the gross unrealized losses and fair values at March 31, 2009 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding (dollars in thousands):

Description of Securities	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of U.S. Government Sponsored Enterprises:						
Mortgage Backed Securities Residential	\$ 855	\$ (12)	\$ 8	\$ -0-	\$ 863	\$ (12)
Corporate Securities	7,157	(3,970)	7,052	(5,780)	14,209	(9,750)
Pooled Trust Preferred Collateralized Debt Obligations	12,176	(8,223)	24,503	(50,136)	36,679	(58,359)
Obligations of States and Political Subdivisions	101,254	(2,763)	18,548	(1,295)	119,802	(4,058)
Total Debt Securities	121,442	(14,968)	50,111	(57,211)	171,553	(72,179)
Equities	2,694	(358)	-0-	-0-	2,694	(358)
Total Securities	\$ 124,136	\$ (15,326)	\$ 50,111	\$ (57,211)	\$ 174,247	\$ (72,537)

At March 31 2009, 5.6% of the total unrealized losses were comprised of fixed income securities issued by U.S. Government agencies, U.S. Government-sponsored enterprises and investment grade municipalities. Corporate fixed income comprised 13.4% of the total unrealized losses, while pooled trust preferred collateralized debt obligations accounted for 80.5% and equity securities accounted for the remaining 0.5%. The unrealized losses in the equity securities category consist of two issues, neither of which has been in a continuous unrealized loss position for more than twelve months.

Corporate securities had a total unrealized loss of \$9.8 million as of March 31, 2009. Included in this category are single issue trust preferred securities and corporate debentures issued primarily by money center and large regional banks. As of March 31, 2009, our single issue trust preferred securities had an amortized cost of \$22.8 million and an estimated fair value of \$13.1 million, while our corporate debentures had a book value of \$1.2 million and an estimated fair value of \$1.1 million. After a review of each of the issuer's asset quality, earnings trend and capital position it was determined that none of these issues were other-than-temporarily impaired. Additionally, all interest payments on these securities are being made as contractually required.

As of March 31, 2009, the book value of our pooled trust preferred collateralized debt obligations totaled \$95.0 million with an estimated fair value of \$36.7 million, which includes securities issued by 376 banks and other financial institutions. Two of our pooled securities are senior tranches and the remainder are mezzanine tranches. During the first quarter of 2009, all of the pooled issues were downgraded by Moody's Investor Services. Two of the pooled issues, representing \$12.5 million of the \$95.0 million book value, remain above investment grade. At the time of initial issue, the subordinated tranches ranged in size from approximately 7.3% to 35.4% of the total principal amount of the respective securities and no more than 5% of any pooled security consisted of a security issued by any one institution. As of March 31, 2009, after taking into account management's best estimates of

Lack of liquidity in the market for trust preferred collateralized debt obligations, credit rating downgrades and market uncertainties related to the financial industry are factors contributing to the temporary impairment on these securities.

On a quarterly basis we evaluate our debt securities for other-than-temporary impairment. In the first quarter of 2009, \$8.4 million in other-than-temporary impairment charges were recognized on our pooled trust preferred collateralized debt obligations. When evaluating these investments we determine a credit related portion and a noncredit related portion of other-than-temporary impairment. The credit related portion is recognized in earnings and represents the expected shortfall in future cash flows. The noncredit related portion is recognized in other comprehensive income and represents the difference between the fair value of the security and the amount of credit related impairment. A discounted cash flow analysis provides the best estimate of credit related other-than-temporary impairment for these securities. Additional information related to this analysis follows:

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Our pooled trust preferred collateralized debt obligations are measured for other-than-temporary impairment within the scope of EITF 99-20, Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to be Held by a Transferor in Securitized Financial Assets,

Table of Contents

Note 7 Impairment of Investment Securities (Continued)

and FSP EITF 99-20-1, Amendments to the Impairment Guidance of EITF Issue No. 99-20, by determining whether it is probable that an adverse change in estimated cash flows has occurred. Determining whether there has been an adverse change in estimated cash flows from the cash flows previously projected involves comparing the present value of remaining cash flows previously projected against the present value of the cash flows estimated at March 31, 2009. We consider the discounted cash flow analysis to be our primary evidence when determining whether credit related other-than-temporary impairment exists.

Results of a discounted cash flow test are significantly affected by other variables such as the estimate of future cash flows, credit worthiness of the underlying banks and determination of probability of default of the underlying collateral. The following provides additional information for each of these variables:

Estimate of Future Cash Flows Cash flows are constructed in an INTEX cash flow model. INTEX is a proprietary cash flow model recognized as the industry standard for analyzing all types of collateralized debt obligations. It includes each deal's structural features updated with trustee information, including asset-by-asset detail, as it becomes available. The modeled cash flows are then used to determine if all the scheduled principal and interest payments of our investments will be returned.

Credit Analysis A quarterly credit evaluation is performed for each of the 376 banks comprising the collateral across the various pooled trust preferred securities. Our credit evaluation considers all evidence available to us and includes the nature of the issuer's business, its years of operating history, corporate structure, loan composition, loan concentrations, deposit mix, asset growth rates, geographic footprint and local economic environment. Our analysis focuses on profitability, return on assets, shareholders' equity, net interest margin, credit quality ratios, operating efficiency, capital adequacy, and liquidity.

Probability of Default A probability of default is determined for each bank and is used to calculate the expected impact of future deferrals and defaults on our expected cash flows. Each bank in the collateral pool is assigned a probability of default for each year until maturity. Banks currently in default or deferring interest payments are assigned a 100% probability of default. All other banks in the pool are assigned a probability of default based on their unique credit characteristics and market indicators. In all cases, a 10% projected recovery rate is applied to projected defaults. The probability of default is updated quarterly. As of March 31, 2009, default probabilities for performing collateral ranged from 0.35% to 90%.

Our credit evaluation provides a basis for determining deferral and default probabilities for each underlying piece of collateral. Using the results of the credit evaluation, the next step of the process is to look at pricing of senior debt or credit default swaps for the issuer (or where such information is unavailable, for companies having similar credit profiles as the issuer). The pricing of these market indicators provides the information necessary to determine appropriate default probabilities for each bank.

In addition to the above factors, our evaluation of impairment also includes a stress test analysis which provides an estimate of excess subordination for each tranche. We stress the cash flows of each pool by increasing current default assumptions to the level of defaults which results in an adverse change in estimated cash flows. This stressed breakpoint is then used to calculate excess subordination levels for each pooled trust preferred security.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 7 Impairment of Investment Securities (Continued)

The results of the stress test allows management to identify those pools that are at a greater risk for a future break in cash flows so that we can monitor banks in those pools more closely for potential deterioration of credit quality.

Based upon the analysis performed by management as of March 31, 2009, it is probable that we will collect all contractual principal and interest payments on all of our pooled trust preferred securities, except for Pre TSL VI, Pre TSL VII, Pre TSL VIII and MM Comm IX. The expected principal shortfall on these four securities resulted in an \$8.4 million credit related other-than-temporary impairment charge in the first quarter of 2009.

The table below provides a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold:

Balance, January 1, 2009 (a)	\$ 2,516
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized	5,766
Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized	2,639
Balance, March 31, 2009	\$ 10,921

(a) The beginning balance represents credit related losses included in other-than-temporary impairment charges recognized on debt securities in prior periods.

Additionally in the first quarter of 2009, other-than-temporary impairment charges of \$1.5 million were recorded on equity securities related to four Pennsylvania-based financial institutions. Management evaluates equity securities for other-than-temporary impairment by reviewing research reports, analysts' recommendations, credit rating changes, news stories, annual reports, regulatory filings, impact of interest rate changes, and other relevant information. Based on the results of this review and factoring in the level of decline in the fair value of these equity securities, management could not substantiate that their market value would equal or exceed our cost basis within a reasonable period of time.

Note 8 Income Taxes

At January 1, 2009 and March 31, 2009, First Commonwealth had no material unrecognized tax benefits or accrued interest and penalties. If applicable, First Commonwealth will record interest and penalties as a component of non-interest expense. Federal and state tax years 2005 through 2008 were open for examination as of March 31, 2009.

Note 9 Fair Values of Assets and Liabilities

Statement of Financial Accounting Standards No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115 and Statement of Financial Accounting Standards No. 157 (SFAS 157), Fair Value Measurements became effective January 1, 2008. SFAS 159 permits entities to irrevocably elect to measure select financial instruments and certain other items at fair value. The unrealized gains and losses are required to be included in earnings each reporting period for the items that

fair value measurement is elected. First Commonwealth elected not to measure any existing financial instruments at fair value under SFAS 159, however, in the future we may elect to adopt SFAS 159 for select financial instruments.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

Note 9 Fair Values of Assets and Liabilities (Continued)

SFAS 157 defines fair value and the methods used for measuring fair value as well as requiring additional disclosures, however, it does not expand the use of fair value measurements. FASB Staff Position FAS 157-2, *Effective Date of FASB Statement No. 157* became effective January 1, 2009 and requires disclosures for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). All nonfinancial assets are included either as a separate line item on the Consolidated Statements of Financial Condition or in the *Other assets* category of the Consolidated Statements of Financial Condition. Currently, First Commonwealth does not have any nonfinancial liabilities to disclose. FASB also issued Staff Position FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is not Active* in October 2008, which clarified the application of SFAS 157 in a market that is not active. FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* was issued in April 2009 and provides guidelines for making fair value measurements more consistent with the principles presented in SFAS 157 when the volume and level of activity for assets or liabilities have significantly decreased. We early adopted FSP FAS 157-4 on March 31, 2009.

In accordance with SFAS 157, First Commonwealth groups financial assets and financial liabilities measured at fair value in three levels, based on the principal markets in which the assets and liabilities are transacted and the observability of the data points used to determine fair value. These levels are:

Level 1 Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities. Level 1 securities include equity holdings comprised of publicly traded bank stocks.

Level 2 Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained for identical or comparable assets or liabilities from alternative pricing sources with reasonable levels of price transparency. Level 2 includes U.S. Government securities, municipal securities, Federal Home Loan Bank (FHLB) stock, and interest rate derivatives that include interest rate swaps and risk participation agreements.

Level 3 Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. If the inputs used to provide the evaluation are unobservable and/or there is very little, if any, market activity for the security or similar securities, the securities would be considered Level 3 securities. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities. The assets included in Level 3 are corporate securities, pooled trust preferred collateralized debt obligations, impaired loans and municipal securities.

In accordance with SFAS 157, fair values for investment securities were based on quoted market prices, if available, and were classified as Level 1. If quoted market prices were not available, the valuation for investment utilized pricing models that varied based on asset class and included available trade, bid and other observable market information. Securities priced using this information are classified as Level 2.

Fair values for single issue trust preferred securities were obtained from pricing sources with reasonable pricing transparency, taking into account other unobservable inputs related to the risks for each issuer. These valuations were classified as Level 3 due to the inactivity in the markets.

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

Note 9 Fair Values of Assets and Liabilities (Continued)

Our pooled trust preferred collateralized debt obligations are collateralized by the trust preferred securities of individual banks and bank holding companies in the U.S. There has been little or no active trading in these securities for approximately nine months; therefore it was more appropriate to determine fair value using a discounted cash flow analysis. Detail on our process for determining the appropriate cash flows for this analysis is provided in Note 7 Impairment of Investment Securities. The discount rate applied to the cash flows is determined by evaluating the current market yields for comparable corporate and structured credit products along with an evaluation of the risks associated with the cash flows of the comparable security. Due to the fact that there is no active market for the trust preferred collateralized debt obligations, one key reference point is the market yield for the single issue trust preferred securities issued by banks and thrifts for which there is an active and liquid market. Adjustments are then made to reflect the credit and structural differences between these two security types.

Interest rate derivatives are reported at fair value utilizing Level 2 inputs and are included in Other Assets and Other Liabilities. First Commonwealth values its interest rate swap positions using a yield curve by taking market prices/rates for a user defined set of instruments. The set of instruments currently used to determine the US Dollar yield curve includes cash LIBOR rates from overnight to three months, the first eight Eurodollar futures contracts, and swap rates at eight points from three years to thirty years. These yield curves determine the valuations of interest rate swaps. Interest rate derivatives are further described in Note 11 Derivatives.

For purposes of potential valuation adjustments to our derivative positions, First Commonwealth evaluates the credit risk of its counterparties as well as our own credit risk. Accordingly, we have considered factors such as the likelihood of default, expected loss given default, net exposures, and remaining contractual life, among other things, in determining if any fair value adjustments related to credit risk are required. We review our counterparty exposure quarterly, and, when necessary, appropriate adjustments are made to reflect the exposure. We also utilize this approach to estimate our own credit risk on derivative liability positions. To date, we have not realized any losses due to a counterparty's inability to pay any net uncollateralized position. The decrease from December 31, 2008 to March 31, 2009 in the value of derivative assets and derivative liabilities attributable to credit risk was \$76 thousand.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 9 Fair Values of Assets and Liabilities (Continued)

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis are summarized as follows at March 31, 2008:

	Corporate Securities	Equities	Total Fair Value
	(dollars in thousands)		
Securities Available for Sale			
Balance, beginning of quarter	\$ 1,034	\$ 1,570	\$ 2,604
Realized and unrealized credit losses included in earnings	-0-	-0-	-0-
Total gains (losses) realized/unrealized in other comprehensive income	(63)	-0-	(63)
Purchases, settlements, pay downs, and maturities	-0-	-0-	-0-
Transfers into Level 3	-0-	-0-	-0-
Balance, end of quarter	\$ 971	\$ 1,570	\$ 2,541

The securities transferred from Level 2 to Level 3 were municipal securities. The primary reason for the transfer into Level 3 was the inactivity in the market for these securities which resulted in a lack of observable market activity or comparable trades that could be used to establish a benchmark for valuation.

Losses of \$8.4 million included in earnings for the period are attributable to the change in realized losses relating to assets held at March 31, 2009 and are reported in the line *Impairment losses on securities* in the Consolidated Statements of Income.

The table below presents the balances of assets measured at fair value on a nonrecurring basis at March 31, 2009:

	Level 1	Level 2	Level 3	Total Fair Value
	(dollars in thousands)			
Impaired loans	\$ -0-	\$ -0-	\$ 21,011	\$ 21,011
Other real estate owned	-0-	25,560	-0-	25,560
Total Assets	\$ -0-	\$ 25,560	\$ 21,011	\$ 46,571

Impaired loans over \$100,000 are individually reviewed to determine the amount of each loan considered to be at risk of noncollection. The impaired loans are collateral based and the fair value is determined by reviewing real property appraisals, equipment valuations, accounts receivable listings and other financial information.

Fair value for other real estate owned is determined by an independent market based appraisal less costs to sell and is classified as level 2.

Certain other assets and liabilities, including goodwill and core deposit intangibles, are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances. There

were no other assets or liabilities measured at fair value on a nonrecurring basis during the three months ended March 31, 2009.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

Note 10 Other Investments

As a member of the Federal Home Loan Bank of Pittsburgh (FHLB), First Commonwealth is required to purchase and hold stock in the FHLB to satisfy membership and borrowing requirements. This stock is restricted in that it can only be sold to the FHLB or to another member institution, and all sales of FHLB stock must be at par. As a result of these restrictions, FHLB stock is unlike other investment securities insofar as there is no trading market for FHLB stock and the transfer price is determined by FHLB membership rules and not by market participants. As of March 31, 2009 and December 31, 2008, our FHLB stock totaled \$51.4 million and is included in Other Investments on the Consolidated Statements of Financial Condition.

In December 2008, the FHLB voluntarily suspended dividend payments on its stock, as well as the repurchase of excess stock from members. The FHLB cited a significant reduction in the level of core earnings resulting from lower short-term interest rates, the increased cost of liquidity, and constrained access to the debt markets at attractive rates and maturities as the main reasons for the decision to suspend dividends and the repurchase of excess capital stock. The FHLB last paid a dividend in the third quarter of 2008.

FHLB stock is held as a long-term investment and its value is determined based on the ultimate recoverability of the par value. First Commonwealth evaluates impairment quarterly. The decision of whether impairment exists is a matter of judgment that reflects our view of the FHLB's long-term performance, which includes factors such as the following:

its operating performance;

the severity and duration of declines in the fair value of its net assets related to its capital stock amount;

its commitment to make payments required by law or regulation and the level of such payments in relation to its operating performance;

the impact of legislative and regulatory changes on the FHLB, and accordingly, on the members of FHLB; and

its liquidity and funding position.

After evaluating all of these considerations, First Commonwealth concluded that the par value of its investment in FHLB stock will be recovered. Accordingly, no impairment charge was recorded on these securities for the three months ended March 31, 2009. Our evaluation of the factors described above in future periods could result in the recognition of impairment charges on FHLB stock.

Note 11 Derivatives

First Commonwealth is a party to interest rate derivatives that are not designated as hedging instruments. These derivatives relate to interest rate swaps that First Commonwealth enters into with customers to allow customers to convert variable rate loans to a fixed rate. First Commonwealth pays interest to the customer at a floating rate on the notional amount and receives interest from the customer at a fixed rate for the same notional amount. At the same time the interest rate swap is entered into with the customer, an offsetting interest rate swap is entered into with another financial institution. First Commonwealth pays the other financial institution interest at the same fixed rate on the same notional amount

as the swap entered into with the customer, and receives interest from the financial institution for the same floating rate on the same notional amount. The changes in the market

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data**(Unaudited) (Continued)*

March 31, 2009

Note 11 Derivatives (Continued)

value of the swaps offset each other, except for the credit risk of the counterparties, which was calculated by taking into consideration the risk rating, probability of default and loss given default for all counterparties.

In 2008 we also entered into two risk participation agreements with a financial institution counterparty for an interest rate swap related to a loan in which we are a participant. The risk participation agreements provide credit protection to the financial institution should the borrower fail to perform on its interest rate derivative contract with the financial institution. The fee received, less the estimate of the liability for the credit exposure, was recognized in earnings at the time of the transaction.

A liability of \$129 thousand was recorded for credit risk on an aggregate notional amount outstanding of \$188.7 million for interest rate derivatives and \$31.6 million for risk participation agreements at March 31, 2009. The fair value of our derivatives is included in a table in Note 9 Fair Values of Assets and Liabilities in the line items Other Assets and Other Liabilities.

The table below presents the amount representing the change in value of derivative assets and derivative liabilities attributable to credit risk included in the Consolidated Statements of Income:

	Three Months Ended March 31, 2009 (dollars in thousands)
Non-hedging interest rate derivatives:	
Other non-interest expense	\$ 76

Note 12 New Accounting Pronouncements

In April 2009, FASB issued FASB Staff Position (FSP) No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009, FSP FAS 157-4 provides guidelines for making fair value measurements more consistent with the principles presented in SFAS 157, Fair Value Measurements, when the volume and level of activity for assets or liabilities have significantly decreased. FSP FAS 157-4 relates to determining fair values when there is no active market or where the price inputs being used represent distressed sales. It reaffirms what SFAS 157 states is the objective of fair value measurement to reflect how much an asset would be sold for in an orderly transaction (as opposed to a distressed or forced transaction) at the date of the financial statements under current market conditions. Specifically, it reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. We early adopted FSP FAS 157-4 on March 31, 2009, and the adoption did not have a material impact on our financial condition or results of operations.

In April 2009, FASB issued FASB Staff Position (FSP) No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009, FSP FAS 115-2 and FAS 124-2 amended Other-Than-Temporary Impairment guidance in U.S. GAAP to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairment on debt and equity securities in the financial statements. FSP FAS 115-2 and FAS 124-2 is intended to bring greater consistency to the timing of impairment recognition, and provide greater clarity to investors about the credit and

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

Note 12 New Accounting Pronouncements (Continued)

noncredit components of impaired debt securities that are not expected to be sold. The measure of impairment in comprehensive income remains fair value. The FSP also requires increased and more timely disclosures sought by investors regarding expected cash flows, credit losses, and an aging of securities with unrealized losses. We early adopted FSP FAS 115-2 and FAS 124-2 on March 31, 2009. In accordance with this new accounting guidance, the noncredit related portion of other-than-temporary impairment losses previously recognized in earnings during 2008 was reclassified as a cumulative effect adjustment that increased retained earnings and decreased accumulated OCI. Of the \$13.0 million in other-than-temporary impairment charges recognized in 2008, \$6.5 million related to noncredit related impairment, and accordingly, has been recorded, net of tax, as a cumulative effect adjustment in the Consolidated Statements of Changes in Shareholders' Equity as of January 1, 2009. Refer to Note 7 "Impairment of Investment Securities" for further discussion.

In April 2009, FASB issued FASB Staff Position (FSP) No. FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments." Effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009, FSP FAS 107-1 and APB 28-1 amends SFAS 107, "Disclosures about Fair Value of Financial Instruments," to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, "Interim Financial Reporting," to require those disclosures in summarized financial information at interim reporting periods. FSP FAS 107-1 and APB 28-1 only relates to disclosures and therefore will not have an impact on First Commonwealth's financial condition or results of operations. We will adopt FSP FAS 107-1 and APB 28-1 on June 30, 2009.

In January 2009, FASB issued FASB Staff Position (FSP) No. EITF 99-20-1, "Amendments to the Impairment Guidance of EITF Issue No. 99-20." Effective for interim and annual reporting periods ending after December 15, 2008, FSP EITF 99-20-1 amended EITF 99-20, "Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets," to achieve a more consistent evaluation of whether there is other-than-temporary impairment for the debt securities under the scope of EITF 99-20 and the debt securities not within the scope of EITF 99-20 that would fall under the scope of SFAS 115, "Accounting for Certain Investments in Debt and Equity Securities." The adoption of FSP EITF 99-20-1 did not have a material impact on First Commonwealth's financial condition or results of operations.

In June 2008, FASB issued FSP EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities." Effective for interim and annual reporting periods ending after December 15, 2008, FSP EITF 03-6-1 clarifies that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are considered participating securities and should be included in the calculation of basic earnings per share using the two-class method prescribed by SFAS 128, "Earnings Per Share." The adoption of FSP EITF 03-6-1 did not have a material impact on First Commonwealth's financial condition or results of operations.

In March 2008, FASB issued Statement of Financial Accounting Standards No. 161 (SFAS 161), "Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133." Effective for fiscal years and interim periods beginning after November 15, 2008, SFAS 161 amends and expands the disclosure requirements of Statement No. 133 by requiring enhanced disclosures for how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under Statement No. 133 and its related interpretations; and how derivative instruments and related items affect an entity's

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

Note 12 New Accounting Pronouncements (Continued)

financial position, financial performance and cash flows. The adoption of SFAS 161 did not have a material impact on First Commonwealth's financial condition or results of operations as it only relates to disclosures.

In December 2007, FASB also issued Statement of Financial Accounting Standards No. 141 (revised) (SFAS 141(R)), Business Combinations, which will apply to any business combination entered into with an acquisition date that is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Under SFAS 141(R), an acquiring entity will be required to recognize all the assets acquired and liabilities assumed in a transaction at fair value on the date of acquisition with limited exceptions. SFAS 141(R) also changes the accounting and disclosures for certain items related to business combinations to more accurately reflect the cost of the acquisition. The adoption of SFAS 141(R) will have an impact on accounting for business combinations once adopted, but the effect is dependent upon acquisitions at that time.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158 (SFAS 158), Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132R. This Statement requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions, effective for fiscal years ending after December 15, 2008. The implementation did not have a material impact on First Commonwealth's financial condition or results of operations.

ITEM 1. *Financial Statements and Supplementary Data*

(Unaudited) (Continued)

March 31, 2009

This discussion and the related financial data are presented to assist in the understanding and evaluation of the consolidated financial condition and the results of operations of First Commonwealth Financial Corporation including its subsidiaries (First Commonwealth) for the three months ended March 31, 2009 and 2008, and should be read in conjunction with the Consolidated Financial Statements and notes thereto included in this Form 10-Q.

Forward-Looking Statements

This report contains forward-looking statements that describe our future plans, strategies and expectations. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as believe, expect, anticipate, intend, plan, estimate or words of similar meaning, or future or conditional verbs such as will, would, should, could or may. All forward-looking statements are based on assumptions and involve risks and uncertainties, many of which are beyond our control and which may cause our actual results, performance or achievements to differ materially from the results, performance or achievements contemplated by the forward-looking statements. These risks and uncertainties include, among other things:

Competitive pressures among depository and other financial institutions nationally and in our market areas may increase significantly.

Deepened or prolonged weakness in economic and business conditions, nationally and in our market areas, which could increase credit-related losses and expenses and/or limit growth.

Further declines in the market value of investment securities that are considered to be other-than-temporary, which would negatively impact our earnings and capital levels.

Increases in defaults by borrowers and other delinquencies could result in increases in our provision for credit losses and related expenses.

Our inability to manage growth effectively, including the successful expansion of our customer support, administrative infrastructure and internal management systems, could adversely affect our results of operations and prospects.

The inability to successfully execute our strategic growth initiatives, which could limit further revenue and earnings growth.

Fluctuations in interest rates and market prices could reduce our net interest margin and asset valuations and increase our expenses.

Reduced wholesale funding capacity or higher borrowing costs due to capital constraints at the Federal Home Loan Bank, which would reduce our liquidity and negatively impact earnings and net interest margin.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

The consequences of continued bank acquisitions and mergers in our market areas, resulting in fewer but much larger and financially stronger competitors, could increase competition for financial services to our detriment.

Changes in legislative or regulatory requirements applicable to us and our subsidiaries could increase costs, limit certain operations and adversely affect results of operations.

Changes in tax requirements, including tax rate changes, new tax laws and revised tax law interpretations may increase our tax expense or adversely affect our customers' businesses.

Other risks and uncertainties described in this report and the other reports that First Commonwealth files with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K.

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements in this report. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or otherwise.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations

Results of Operation

Summary of Results

First Commonwealth has experienced the following developments during the first quarter of 2009 compared to the first quarter of 2008.

Net interest income increased 23.2%.

Net interest margin, on a tax equivalent basis, improved 44 basis points.

Total loans increased 14.5% and commercial loans increased 24.9%.

Average low cost demand and savings deposits increased 13.3%.

Non-accrual loans decreased 40.5% primarily due to transfers into other real estate owned.

First Commonwealth Bank opened a new community banking office in Butler and relocated its New Alexandria office to a more visible, high traffic location.

Impairment losses of \$9.9 million were recorded on collateralized debt obligations and bank equity securities.

Provision for credit losses increased \$5.1 million.

Our fundamental operating results were solid although we experienced a significant increase in the provision for credit losses as a result of increased net credit losses and we recorded impairment losses related to trust preferred collateralized debt obligations and bank equity securities. First Commonwealth achieved growth in loans and deposits and improvement in credit quality and remains well-capitalized with significant liquidity.

The banking industry continued to see deterioration in credit quality and investment write-downs. First Commonwealth is not a participant or underwriter in the sub-prime mortgage loan marketplace and therefore does not have any direct exposure to risks associated with this activity. All mortgage backed securities in First Commonwealth's investment portfolio are AAA rated and backed by U.S. Government agencies and U.S. Government sponsored-enterprises.

Net income for the first quarter 2009 was \$1.7 million or \$0.02 per diluted share, as compared to \$11.1 million or \$0.15 per diluted share for the same period in 2008. The decrease in net income was primarily the result of non-cash charges of \$9.9 million (\$6.4 million after tax) for other-than-temporary impairment recorded on four trust preferred collateralized debt obligations and four bank equity securities in addition to the \$5.1 million (\$3.2 million after tax) increase in the provision for credit losses.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Average diluted shares in the first quarter 2009 were 16.6% greater than the comparable quarter in 2008 primarily due to the issuance of 11.5 million shares of common stock in connection with the capital raising transaction completed on November 5, 2008. First quarter 2009 annualized return on average equity and average assets was 1.03% and 0.11%, respectively, compared to 7.73% and 0.75% for the prior year period.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Summary of Results (Continued)

The following table illustrates the impact on diluted earnings per share of changes in certain components of net income for the first three months of 2009 compared to the first three months of 2008, after adjusting for the affect of the 11.5 million additional shares issued in November 2008:

Net income per diluted share, prior year period	\$ 0.15
Increase (decrease) from changes in:	
Net interest income	0.13
Provision for credit losses	(0.07)
Impairment losses on securities	(0.13)
Net securities gains	(0.01)
Trust income	(0.01)
Service charges on deposit accounts	(0.01)
Salaries and employee benefits	(0.03)
FDIC insurance	(0.02)
Provision for income taxes	0.02
Net income per diluted share	\$ 0.02

Net Interest Income

Net interest income, which is our primary source of revenue, is the difference between interest income from earning assets (loans and securities) and interest expense paid on liabilities (deposits, short-term borrowings and long-term debt). The amount of net interest income is affected by both changes in the level of interest rates and the amount and composition of earning assets and interest-bearing liabilities. The net interest margin is expressed as the percentage of net interest income, on a fully tax equivalent basis, to average earning assets. To compare the tax exempt asset yields to taxable yields, amounts are adjusted to the pretax equivalent amounts based on the marginal corporate Federal income tax rate of 35%. The tax equivalent adjustment to net interest income for the first quarter of 2009 was \$3.2 million compared to \$3.6 million in the first quarter of 2008.

Net interest income increased \$9.5 million, or 23.2%, in the first quarter of 2009 from the first quarter of 2008 as a result of both growth in earning assets and a decline in the cost of interest-bearing liabilities. Interest income decreased \$6.9 million, or 8.4%, as the contribution from loan growth was negatively offset by lower interest rates. Interest expense declined \$16.4 million, or 40.2%, as a 144 basis point decline on rates paid for interest-bearing liabilities more than offset additional interest expense resulting from a \$281.4 million, or 5.8%, increase in average interest-bearing liabilities.

Average interest-earning assets increased \$392.2 million, or 7.2%, in the first quarter of 2009 compared to the first quarter of 2008 driven primarily by a \$624.8 million, or 16.3%, increase in average loans. This loan growth was partially funded by investment run-off and short-term borrowings. Average investment securities decreased \$232.8 million, or 14.2%, and a portion of the increase of \$639.7 million in average short-term borrowings was also due to refinancing \$190.0 million of longer term Federal Home Loan Bank advances in the fourth quarter of 2008. These advances were due to mature in the first seven months of 2009 and were replaced with lower costing overnight borrowings.

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition*

and Results of Operations (Continued)

Results of Operations (Continued)

Net Interest Income (Continued)

In the first quarter of 2009, average interest-bearing liabilities increased \$281.4 million when compared to the first quarter of 2008. Management continued to supplement deposit growth with wholesale borrowings due to the significant spread between wholesale borrowing costs and rates paid on time deposits. In the first quarter of 2009 compared to the first quarter of 2008, average time deposits decreased \$337.8 million, or 15.6%, which were mostly offset with increases in lower costing transaction and savings deposits. Average noninterest-bearing demand deposits increased \$50.4 million, or 9.9%, average interest-bearing demand deposits increased \$12.1 million, or 2.1%, and average savings deposits increased \$226.3 million, or 20.8%.

The net interest margin on a tax equivalent basis for the first quarter 2009 increased 44 basis points to 3.72% compared with 3.28% in the corresponding period last year. The increase in our net interest margin can be attributed to increased loan volume and declines in the cost of interest-bearing liabilities exceeding the declines in yields on total interest-earning assets. The decrease in the cost of interest-bearing liabilities can be attributed to lower interest rates, combined with a shift in the mix of our liabilities to low cost deposits and short-term borrowings from time deposits and long-term debt. First Commonwealth uses simulation models to help manage exposure to changes in interest rates. A discussion of the effects of changing interest rates is included in the **Market Risk** section of this discussion.

Interest and fees on loans decreased \$3.8 million, or 6.1%, as the 124 basis point decline in the yield on loans from 6.69% to 5.45% was partially offset by the additional income generated by the growth in average loans. Interest income on investment securities decreased \$3.1 million, or 15.6%, primarily as a result of the decline in average investment securities.

Interest on deposits decreased \$11.5 million due to declines in both rates paid and balances. The decline in rates was the result of the lower interest rate environment. The decline in balances was primarily due to a reduction in higher yielding time deposits. Interest expense on short-term borrowings decreased \$2.4 million, or 63.6%, as the growth in average balances was offset by the 254 basis point decline in rates paid for these borrowings. Interest expense on long-term debt decreased \$2.6 million due to a decrease in the average balance of \$259.0 million, or 47.2%.

The following is an analysis of the average balance sheets and net interest income for the three months ended March 31:

Average Balance Sheets and Net Interest Income Analysis
2009

	(dollars in thousands)					
	2009			2008		
	Average Balance	Income/ Expense	Yield or Rate (a)	Average Balance	Income/ Expense	Yield or Rate (a)
Assets						
Interest-earning assets:						
Interest-bearing deposits with banks	\$ 813	\$ 1	.50%	\$ 546	\$ 5	3.71%
Tax-free investment securities	258,227	2,894	6.99	320,191	3,595	6.95
Taxable investment securities	1,150,320	13,771	4.86	1,321,117	16,140	4.91
Federal funds sold	-0-	-0-	0.00	43	-0-	2.86
Loans, net of unearned income (b)(c)	4,460,337	58,275	5.45	3,835,587	62,067	6.69
Total interest-earning assets	5,869,697	74,941	5.40	5,477,484	81,807	6.27
Noninterest-earning assets:						
Cash	74,117			73,860		
Allowance for credit losses	(53,392)			(42,358)		
Other assets	528,270			487,546		
Total noninterest-earning assets	548,995			519,048		
Total Assets	\$ 6,418,692			\$ 5,996,532		
Liabilities and Shareholders' Equity						
Interest-bearing liabilities:						
Interest-bearing demand deposits (d)	\$ 585,270	\$ 549	0.38%	\$ 573,121	\$ 1,747	1.23%
Savings deposits (d)	1,315,349	4,411	1.36	1,089,059	5,348	1.98
Time deposits	1,826,609	14,616	3.25	2,164,394	23,938	4.45
Short-term borrowings	1,133,497	1,347	0.48	493,776	3,705	3.02
Long-term debt	290,013	3,419	4.78	549,016	5,985	4.38
Total interest-bearing liabilities	5,150,738	24,342	1.92	4,869,366	40,723	3.36
Noninterest-bearing liabilities and capital:						
Noninterest-bearing demand deposits (d)	560,577			510,150		
Other liabilities	45,381			38,054		
Shareholders' equity	661,996			578,962		

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Total noninterest-bearing funding sources	1,267,954		1,127,166	
Total Liabilities and Shareholders' Equity	\$ 6,418,692		\$ 5,996,532	
Net Interest Income and Net Yield on Interest-Earning Assets	\$ 50,599	3.72%	\$ 41,084	3.28%

- (a) Yields on interest-earning assets have been computed on a tax equivalent basis using the 35% Federal income tax statutory rate.
- (b) Income on nonaccrual loans is accounted for on the cash basis, and the loan balances are included in interest-earning assets.
- (c) Loan income includes loan fees earned.
- (d) Average balances do not include reallocations from noninterest-bearing demand deposits and interest-bearing demand deposits into savings deposits, which were made for regulatory purposes.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Net Interest Income (Continued)

The following table shows the effect of changes in volumes and rates on interest income and interest expense for the three months ended March 31:

	Analysis of Changes in Net Interest Income 2009 Change from 2008 (dollars in thousands)		
	Total Change	Change Due to Volume	Change Due to Rate (a)
Interest-earning assets:			
Interest-bearing deposits with banks	\$ (4)	\$ 2	\$ (6)
Tax-free investment securities	(701)	(1,071)	370
Taxable investment securities	(2,369)	(2,085)	(284)
Federal funds sold	-0-	-0-	-0-
Loans	(3,792)	10,392	(14,184)
Total interest income	(6,866)	7,238	(14,104)
Interest-bearing liabilities:			
Interest-bearing demand deposits	(1,198)	37	(1,235)
Savings deposits	(937)	1,111	(2,048)
Time deposits	(9,322)	(3,736)	(5,586)
Short-term borrowings	(2,358)	4,804	(7,162)
Long-term debt	(2,566)	(2,823)	257
Total interest expense	(16,381)	(607)	(15,774)
Net interest income	\$ 9,515	\$ 7,845	\$ 1,670

(a) Changes in interest income or expense not arising solely as a result of volume or rate variances are allocated to rate variances due to interest sensitivity of consolidated assets and liabilities.

Provision for Credit Losses

The provision for credit losses is determined based on management's estimates of the appropriate level of allowance for credit losses needed to absorb probable losses inherent in the loan portfolio, after giving consideration to charge-offs and recoveries for the period. The provision for credit losses is an amount added to the allowance against which credit losses are charged.

The provision for credit losses for the first quarter of 2009 increased \$5.1 million compared to the first quarter of 2008 as a result of loan growth, trends in losses and increased allocations for new nonperforming loans.

Edgar Filing: FIRST COMMONWEALTH FINANCIAL CORP /PA/ - Form 10-Q

Net credit losses were \$19.5 million in the first quarter of 2009 compared to \$4.0 million in the first quarter of 2008. Three commercial credit relationships accounted for \$16.3 million, or 83.6%, of the net credit losses in the first quarter of 2009. One of the commercial credit relationships was an out-of-market participation loan that was a real estate-construction loan, while the other two commercial credit relationships were in-market loans secured by equipment and real estate.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Provision for Credit Losses (Continued)

The allowance for credit losses was \$41.5 million at March 31, 2009, which represents a ratio of 0.93% of average loans outstanding compared to 1.08% reported at March 31, 2008. Management believes that the allowance for credit losses is at a level deemed sufficient to absorb losses inherent in the loan portfolio at March 31, 2009.

Below is an analysis of the consolidated allowance for credit losses for the three months ended March 31:

	2009	2008
	(dollars in thousands)	
Balance, beginning of year	\$ 52,759	\$ 42,396
Loans charged off:		
Commercial, financial and agricultural	7,907	1,018
Loans to individuals	1,234	933
Real estate-construction	4,326	26
Real estate-commercial	5,177	2,029
Real estate-residential	1,034	389
Total loans charged off	19,678	4,395
Recoveries of loans previously charged off:		
Commercial, financial and agricultural	88	153
Loans to individuals	118	138
Real estate-construction	-0-	-0-
Real estate-commercial	9	136
Real estate-residential	11	6
Total recoveries	226	433
Net credit losses	19,452	3,962
Provision charged to expense	8,242	3,179
Balance, end of period	\$ 41,549	\$ 41,613

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Non-Interest Income

The following table presents the components of non-interest income for the three months ended March 31:

	2009	2008
	(dollars in thousands)	
Non-Interest Income		
Trust income	\$ 1,087	\$ 1,532
Service charges on deposit accounts	3,837	4,425
Insurance and retail brokerage commissions	1,616	1,277
Income from bank owned life insurance	1,138	1,487
Card related interchange income	1,896	1,753
Other operating income	3,008	2,481
Subtotal	12,582	12,955
Net securities gains	24	501
Net impairment losses	(9,866)	-0-
Total non-interest income	\$ 2,740	\$ 13,456

Total non-interest income for the first quarter of 2009 decreased \$10.7 million, or 79.6%, from the first quarter of 2008, primarily due to impairment losses on securities, reduced service charges on deposit accounts and reduced trust income. These reductions were partially offset by higher insurance and retail brokerage commissions, increases in card related interchange income, and higher letter of credit fees.

The \$9.9 million net impairment losses were due to \$8.4 million in credit losses recognized on four pooled trust preferred collateralized debt obligations and \$1.5 million impairment recognized on four bank equity securities.

Service charges on deposit accounts decreased \$588 thousand, or 13.3%, primarily due to reduced overdraft charges as a result of a drop in the frequency of occurrences.

The reduction in trust income was primarily due to a sharp decline in the market value of assets under management.

Insurance and retail brokerage commissions increased \$339 thousand, or 26.5%, mainly due to higher sales, additional producers and an enhanced calling program.

Card related interchange income includes income on debit, credit and ATM cards that are issued to consumers and/or businesses. Card related interchange income increased \$143 thousand, or 8.2%, primarily due to higher usage.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Non-Interest Expense

The following table presents the components of non-interest expense for the three months ended March 31:

	2009	2008
	(dollars in thousands)	
Non-Interest Expense		
Salaries and employee benefits	\$ 22,500	\$ 20,330
Net occupancy expense	4,000	3,907
Furniture and equipment expense	2,975	3,078
Advertising expense	513	628
Data processing expense	1,132	1,051
Pennsylvania shares tax expense	1,331	1,271
Intangible amortization	743	831
Collection and repossession expense	901	615
FDIC insurance	1,521	123
Other professional fees and services	1,063	750
Other operating expenses	6,669	6,272
Total non-interest expense	\$ 43,348	\$ 38,856

Total non-interest expense for the first quarter of 2009 increased \$4.5 million, or 11.6%, over the corresponding period in 2008. This increase was primarily due to higher salaries and benefits and increased FDIC insurance.

Salaries and employee benefits increased \$2.2 million, or 10.7%, with salary expense increasing \$924 thousand, or 6.1%, and benefit expense increasing \$1.2 million, or 24.5%. The salary expense increase was due to a higher number of employees, annual merit increases in the first quarter and a higher accrual for sales related incentive payments. The increase in benefit expense was mainly due to higher hospitalization and 401(K) expenses. Full time equivalent employees were 1,648 at the end of the first quarter of 2009 compared to 1,586 at the end of the first quarter of 2008.

FDIC insurance increased \$1.4 million due to higher premiums but does not include any one time proposed assessments by the FDIC.

Other operating expenses increased \$397 thousand, or 6.3%, for the first quarter 2009 compared to the same period in 2008 due mainly to increased loan processing fees relating to loan volume, higher telephone related expenses and legal fees.

Pennsylvania shares tax expense increased \$60 thousand, or 4.7%, for the first quarter of 2009 compared to the same period in 2008. The Pennsylvania shares tax is imposed annually on the book value of shares of banks and trust companies that conduct business in Pennsylvania. The book value is calculated using a six-year rolling average of the book value of paid-in capital, surplus and undivided profits, with deductions taken for U.S. Government obligations, and beginning on January 1, 2008, goodwill from acquisitions after June 30, 2001. The current tax rate is 1.25 %.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)*Results of Operations (Continued)Income Tax

The provision for income taxes for the first quarter of 2009 decreased \$1.3 million compared to the same period in 2008 primarily due to the decrease in income before taxes offset by a decline in nontaxable income and tax credits. Our effective tax rate was 3.5% in the first quarter of 2009 compared to 11.1% in the first quarter of 2008. Nontaxable income and tax credits had a greater impact on the effective tax rate during the first quarter of 2009 compared to the first quarter of 2008 due to lower pretax income.

LIQUIDITY

Liquidity refers to our ability to meet the cash flow requirements of depositors and borrowers as well as our operating cash needs with cost-effective funding. We generate funds to meet these needs primarily through the core deposit base of First Commonwealth Bank and the maturity or repayment of loans and other interest-earning assets, including investments. Proceeds from the maturity and redemption of investment securities are used either for liquidity or to invest in securities of similar quality as our current investment portfolio. We also have access to external sources of liquidity, including overnight federal funds and repurchase agreements. We can also raise cash through the sale of earning assets, such as loans and marketable securities, or the sale of debt or equity securities in the capital markets. In the fourth quarter of 2008, we issued 11,500,000 shares of our common stock through a public stock offering, which resulted in gross proceeds of \$115.0 million and increased our capital by \$108.8 million after deducting underwriting discounts, commissions and offering expenses.

Liquidity risk arises from the possibility that we may not be able to meet our financial obligations and operating cash needs or may become overly reliant upon external funding sources. In order to manage this risk, our Board of Directors has established an Asset and Liability Management Policy that identifies primary sources of liquidity, establishes procedures for monitoring and measuring liquidity and quantifies minimum liquidity requirements based on limits approved by our Board. This policy designates our Asset/Liability Committee (ALCO) as the body responsible for meeting these objectives. The ALCO, which includes members of executive management, reviews liquidity on a periodic basis and approves significant changes in strategies that affect balance sheet or cash flow positions. Liquidity is centrally managed on a daily basis by our Treasury Department.

First Commonwealth's long-term liquidity source is a large core deposit base and a strong capital position. Core deposits are the most stable source of liquidity a bank can have due to the long-term relationship with a deposit customer. The level of deposits during any period is influenced by factors outside of management's control, such as the level of short-term and long-term market interest rates and yields offered on competing investments, such as money market mutual funds. During the first quarter of 2009, total deposits increased \$38.1 million helping to fund loan growth of \$39.0 million. The following table shows a breakdown of the components of First Commonwealth's interest-bearing deposits:

	March 31, 2009	December 31, 2008
	(dollars in thousands)	
Interest-bearing demand deposits	\$ 90,217	\$ 97,011
Savings deposits	1,850,809	1,773,843
Time deposits	1,803,829	1,842,644
Total interest-bearing deposits	\$ 3,744,855	\$ 3,713,498

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***LIQUIDITY (Continued)**

At March 31, 2009, noninterest-bearing deposits increased by \$6.7 million and interest-bearing deposits increased \$31.4 million compared to December 31, 2008. The \$77.0 million increase in savings deposits for the first three months of 2009 was partly offset by the \$6.8 million decrease in interest-bearing demand deposits and the \$38.8 million decrease in time deposits.

Core deposits continue to be a source of liquidity and the growth in these accounts during the past three months has helped fund loan growth during that period. The following table shows a breakdown of loans by classification as of the periods presented:

	March 31, 2009	December 31, 2008	September 30, 2008	June 30, 2008	March 31, 2008
	(dollars in thousands)				
Commercial, financial, agricultural and other	\$ 1,259,597	\$ 1,272,094	\$ 1,148,666	\$ 1,115,536	\$ 1,052,971
Real estate-construction	402,569	418,639	338,303	307,278	241,114
Real estate-residential	1,203,917	1,215,193	1,227,225	1,235,334	1,230,928
Real estate-commercial	1,089,989	1,016,651	978,287	988,186	909,613
Loans to individuals	501,286	495,800	492,119	467,089	458,557
Total loans	\$ 4,457,358	\$ 4,418,377	\$ 4,184,600	\$ 4,113,423	\$ 3,893,183

MARKET RISK

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices and commodity prices. Our market risk is composed primarily of interest rate risk. Interest rate risk is comprised of repricing risk, basis risk, yield curve risk and options risk. Repricing risk arises from differences in the cash flow or repricing between asset and liability portfolios. Basis risk arises when asset and liability portfolios are related to different market rate indices, which do not always change by the same amount. Yield curve risk arises when asset and liability portfolios are related to different maturities on a given yield curve; when the yield curve changes shape, the risk position is altered. Options risk arises from embedded options within asset and liability products as certain borrowers have the option to prepay their loans when rates fall while certain depositors can redeem their certificates early when rates rise.

The process by which we manage our interest rate risk is called asset/liability management. The goals of our asset/liability management are increasing net interest income without taking undue interest rate risk or material loss of net market value of our equity, while maintaining adequate liquidity. Net interest income is increased by widening the interest spread and increasing earning assets. Liquidity is measured by the ability to meet both depositors' and credit customers' requirements.

We use an asset/liability model to measure our interest rate risk. Interest rate risk measures include earnings simulation and gap analysis. Gap analysis is a static measure that does not incorporate assumptions regarding future business. Gap analysis, while a helpful diagnostic tool, displays cash flows for only a single rate environment. Net interest income simulations explicitly measure the exposure to earnings from changes in market rates of interest. Our current financial position is combined with assumptions regarding future business to calculate net interest income under various hypothetical rate scenarios. Our net interest income simulations assume a level balance sheet whereby new volumes equal run-offs. The ALCO reviews earnings simulations over multiple years under various interest rate scenarios. Reviewing these various measures provides us with a reasonably comprehensive view of our interest rate profile.

Table of Contents

FIRST COMMONWEALTH FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***MARKET RISK (Continued)**

The following gap analysis compares the difference between the amount of interest-earning assets and interest-bearing liabilities subject to repricing over a period of time. The ratio of rate sensitive assets to rate sensitive liabilities repricing within a one year period was 0.74 at both March 31, 2009 and December 31, 2008. A ratio of less than one indicates a higher level of repricing liabilities over repricing assets over the next twelve months.

Following is the gap analysis as of March 31, 2009 and December 31, 2008:

	March 31, 2009 (dollars in thousands)				Over 1 Year Thru 5 Years	Over 5 Years

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***MARKET RISK (Continued)**

The following table presents an analysis of the potential sensitivity of our annual net interest income to gradual changes in interest rates over a 12 month time frame versus if rates remained unchanged utilizing a flat balance sheet, based on March 31, 2009 information (dollars in thousands):

	- 200	- 100	+ 100	+ 200
Net interest income change (12 months):	(\$ 5,886)	(\$ 998)	\$ 620	\$ 935

The ALCO is responsible for the identification and management of interest rate risk exposure. As such, the ALCO continuously evaluates strategies to manage our exposure to interest rate fluctuations.

We recognize that asset/liability models are based on methodologies that may have inherent shortcomings. Furthermore, asset/liability models require certain assumptions be made, such as prepayment rates on earning assets and pricing impact on non-maturity deposits, which may differ from actual experience. These business assumptions are based upon our experience, business plans and published industry experience. While management believes such assumptions to be reasonable, there can be no assurance that modeled results will approximate actual results.

CREDIT RISK

We maintain an allowance for credit losses at a level deemed sufficient to absorb losses inherent in the loan portfolio at the date of each statement of financial condition. Management reviews the adequacy of the allowance on a quarterly basis to ensure that the provision for credit losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is appropriate based on management's assessment of probable estimated losses.

First Commonwealth's methodology for assessing the appropriateness of the allowance for credit losses consists of several key elements. These elements include an assessment of individual problem loans, delinquency and loss experience trends, and other relevant factors. While allocations are made to specific loans and pools of loans, the total allowance is available for all loan losses.

Nonperforming loans include nonaccrual loans and restructured loans. Nonaccrual loans represent loans on which interest accruals have been discontinued. Restructured loans are those loans whose terms have been renegotiated to provide a reduction or deferral of principal or interest as a result of the deteriorating financial position of the borrower.

We discontinue interest accruals on a loan when, based on current information and events, it is probable that we will be unable to fully collect principal or interest due according to the contractual terms of the loan. A loan is also placed in nonaccrual status when, based on regulatory definitions, the loan is maintained on a "cash basis" due to the weakened financial condition of the borrower. Past due loans are those loans which are contractually past due 90 days or more as to interest or principal payments but are well secured and in the process of collection.

Nonperforming loans are closely monitored on an ongoing basis as part of our loan review and work-out process. The potential risk of loss on these loans is evaluated by comparing the loan balance to the fair value of any underlying collateral or the present value of projected future cash flows. Losses are recognized where appropriate.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***CREDIT RISK (Continued)**

The following table identifies amounts of loan losses and nonperforming loans:

	March 31,	
	2009	2008
	(dollars in thousands)	
<u>Nonperforming Loans:</u>		
Loans on nonaccrual basis	\$ 29,049	\$ 48,799
Troubled debt restructured loans	128	143
Total nonperforming loans	\$ 29,177	\$ 48,942
Loans past due in excess of 90 days and still accruing	\$ 17,532	\$ 20,066
Other real estate owned	\$ 25,936	\$ 3,280
Loans outstanding at end of period	\$ 4,457,358	\$ 3,893,183
Average loans outstanding	\$ 4,460,337	\$ 3,835,587
Nonperforming loans as a percentage of total loans	0.65%	1.26%
Provision for credit losses	\$ 8,242	\$ 3,179
Allowance for credit losses	\$ 41,549	\$ 41,613
Net credit losses	\$ 19,452	\$ 3,962
Net credit losses as a percentage of average loans outstanding (annualized)	1.77%	0.42%
Provision for credit losses as a percentage of net credit losses	42.37%	80.24%
Allowance for credit losses as a percentage of average loans outstanding	0.93%	1.08%
Allowance for credit losses as a percentage of end-of-period loans outstanding	0.93%	1.07%
Allowance for credit losses as a percentage of nonperforming loans	142.40%	85.03%

The following table identifies impaired loans, and information regarding the relationship of impaired loans to the allowance for credit losses at March 31:

	2009	2008
	(dollars in thousands)	
Recorded investment in impaired loans at end of period	\$ 29,177	\$ 48,942
Average balance of impaired loans for the period	\$ 52,453	\$ 50,997
Allowance for credit losses related to impaired loans	\$ 8,166	\$ 11,648
Impaired loans with an allocation of the allowance for credit losses	\$ 22,166	\$ 38,733
Impaired loans with no allocation of the allowance for credit losses	\$ 7,011	\$ 10,209
Income recorded on impaired loans on a cash basis	\$ 297	\$ 112

Impaired loans decreased \$19.8 million to \$29.2 million at March 31, 2009 compared to \$48.9 million at March 31, 2008, and other real estate owned increased \$22.6 million from \$3.3 million at March 31, 2008 to \$25.9 million at March 31, 2009. The decrease in impaired loans and increase in other real estate owned is primarily due to two properties that were transferred from impaired loans to other real estate owned in the

first quarter of 2009.

Loans past due in excess of 90 days and still accruing decreased \$2.6 million from \$20.1 million at March 31, 2008 to \$17.5 million at March 31, 2009 primarily due to transfers into nonaccrual.

ITEM 2. *Management's Discussion and Analysis of Financial Condition**and Results of Operations (Continued)***CAPITAL RESOURCES**

At March 31, 2009, shareholders' equity was \$647.5 million, an increase of \$5.3 million from December 31, 2008. The increase was primarily due to unrealized holding gains on securities and net income, offset by dividends paid. A strong capital base provides First Commonwealth with a foundation to expand lending, to protect depositors, and to provide for growth while protecting against future uncertainties. The evaluation of capital adequacy depends on a variety of factors, including asset quality, liquidity, earnings history and prospects. In consideration of these factors, management's primary emphasis with respect to First Commonwealth's capital position is to maintain an adequate and stable equity to assets ratio.

While First Commonwealth has no direct sub prime lending exposure, major financial institutions that do have such exposure have incurred significant losses. As a result, the supply of capital needed by these large institutions has outpaced the demand by investors, and regional financial institutions such as First Commonwealth may experience difficulty accessing the capital markets. First Commonwealth and its banking subsidiary are well capitalized; however, we may seek to raise additional capital in the future to fund growth in interest-earning assets or to expand our market area or product offerings through acquisitions or de novo expansion.

In March 2009, First Commonwealth Financial Corporation declared a first quarter dividend of \$0.12 per share payable on April 15, 2009. This dividend represents a decrease from the prior quarterly dividend of \$0.17 per share. The dividend reduction was implemented in order to preserve capital during the unprecedented uncertainty and market volatility.

The Federal Reserve Board has issued risk-based capital adequacy guidelines, which are designed principally as a measure of credit risk. These guidelines require: (1) at least 50% of a banking organization's total capital be common and other core equity capital (Tier I Capital); (2) assets and off-balance-sheet items be weighted according to risk; (3) the total capital to risk-weighted assets ratio be at least 8%; and (4) a minimum leverage ratio of Tier I capital to average total assets of 4%.

The table below presents First Commonwealth's capital position at March 31, 2009:

	Actual		Regulatory Minimum	
	Capital	Ratio	Capital	Ratio
	Amount		Amount	
	(dollars in thousands)			
Total Capital to Risk Weighted Assets				
First Commonwealth Financial Corporation	\$ 647,216	12.0%	\$ 432,512	8.0%
First Commonwealth Bank	\$ 600,510	11.2%	\$ 428,543	8.0%
Tier I Capital to Risk Weighted Assets				
First Commonwealth Financial Corporation	\$ 605,667	11.2%	\$ 216,256	4.0%
First Commonwealth Bank	\$ 558,961	10.4%	\$ 214,271	4.0%
Tier I Capital to Average Assets				
First Commonwealth Financial Corporation	\$ 605,667	9.7%	\$ 249,970	4.0%
First Commonwealth Bank	\$ 558,961	9.0%	\$ 248,052	4.0%

For an institution to qualify as well capitalized under regulatory guidelines, total risk-based capital, Tier 1 risk-based capital and Tier 1 capital to average assets ratios must be at least 10%, 6.0%, and 5.0%, respectively. At March 31, 2009, First Commonwealth's banking subsidiary exceeded those requirements.

ITEM 3. *Quantitative and Qualitative Disclosures About Market Risk*

Information appearing in Item 2 of this report under the caption *Market Risk* is incorporated by reference in response to this item.

ITEM 4. *Controls and Procedures*

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 (the *Exchange Act*). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that the information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms of the Securities and Exchange Commission.

In addition, our management, including our Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal controls over financial reporting to determine whether any changes occurred during the current fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting. No such changes were identified in connection with this evaluation.
