SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended October 31, 2011

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number 1-33913

QUANEX BUILDING PRODUCTS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

26-1561397
(I.R.S. Employer Identification No.)

1900 West Loop South, Suite 1500, Houston, Texas
(Address of principal executive offices)

77027
(Zip code)

Registrant's telephone number, including area code: (713) 961-4600

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: Quanex Building Products CORP - Form 10-K

Title of each class	Name of each exchange on which registered
Common Stock, \$0.01 par value	New York Stock Exchange, Inc.

Securities registered pursuant to Section 12(g) of the Act: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates as of April 30, 2011, computed by reference to the closing price for the Common Stock on the New York Stock Exchange, Inc. on that date, was \$778,131,590. Such calculation assumes only the registrant's current officers and directors were affiliates of the registrant.

At December 9, 2011, there were outstanding 36,807,213 shares of the registrant's Common Stock, \$0.01 par value.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive Proxy Statement for its 2012 Annual Meeting of Stockholders to be filed with the Commission within 120 days of October 31, 2011 are incorporated herein by reference in Part III of this Annual Report.

PART I

**Item 1. *Business*
General**

Quanex was organized in 1927 as a Michigan corporation under the name Michigan Seamless Tube Company. It reincorporated in Delaware in 1968 under the same name and then changed its name to Quanex Corporation in 1977. On December 12, 2007, Quanex Building Products Corporation was incorporated in the state of Delaware as a subsidiary of Quanex Corporation to facilitate the separation of Quanex Corporation's vehicular products and building products businesses. The separation occurred on April 23, 2008, through the spin-off of Quanex Corporation's building products business to its shareholders, immediately followed by the merger of Quanex Corporation (consisting principally of the Vehicular Products business and all non-building products related corporate accounts) with a wholly-owned subsidiary of Gerdau S.A. (Gerdau). This transaction is hereafter referred to as the Separation. The Company's executive offices are located at 1900 West Loop South, Suite 1500, Houston, Texas 77027. For purposes of describing the events related to the Separation as well as other events, transactions and financial results of Quanex Building Products Corporation and its subsidiaries related to periods prior to April 23, 2008, the terms "Quanex" or the "Company" also refer to Quanex Building Products Corporation's accounting predecessor, Quanex Corporation.

The Company's businesses are managed on a decentralized basis and operate in two reportable business segments: Engineered Products and Aluminum Sheet Products. Each business has administrative, operating and marketing functions. The Company measures each business earnings, cash flow and return on investment and seeks to reward superior performance with incentive compensation, which is a significant portion of total compensation for salaried employees. Intercompany sales are conducted on an arms-length basis and appropriate eliminating entries are performed. Operational activities and policies are managed by corporate officers and key division executives. Also, a small corporate staff provides corporate accounting, financial and treasury management, tax, legal, internal audit, information technology and human resource services to the operating divisions.

Quanex is a technological leader in the production of aluminum flat-rolled sheet, extruded vinyl profiles, flexible insulating glass (IG) spacer systems, solar panel sealants, and metal and wood products that primarily serve the North American residential new construction and remodeling markets. The Company uses low-cost production processes, and engineering and metallurgical expertise, to provide customers with specialized products for their specific window and door applications. Quanex believes these capabilities also provide the Company with unique competitive advantages. The Company's growth strategy is focused on developing its Engineered Products businesses, introducing innovative products and components, and pursuing expansion through organic growth and the acquisition of companies that produce similar products and serve similar building products markets.

Business Developments

The Company has grown primarily through the strategic acquisition of residential-related building products businesses that complement its overall product base. The following business developments occurred in the past five years.

On March 31, 2011, the Company acquired Edgetech, I.G. Inc. and its German subsidiary. Headquartered in Cambridge, Ohio, Edgetech has three manufacturing facilities (U.S., U.K. and Germany) that produce and market a full line of insulating glass spacer systems for window and door customers in North America and abroad. In March 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington. In January 2011, management closed its facility located in The Dalles, Oregon. In November 2011, management committed to a plan to consolidate its Truseal and U.S. Edgetech facilities. The consolidation plan, in part, calls for the permanent closing of the Company's Barbourville, Kentucky facility. The equipment used to manufacture the

Table of Contents

single seal spacer system will be relocated to the Company's Cambridge, Ohio facility. The Company believes this consolidation will allow it to better serve customers through streamlined operations. The consolidation of operations and the subsequent closure of the Barbourville facility are expected to be completed during 2012.

In February 2010, the Company bought a facility in Shawano, Wisconsin for manufacturing engineered wood flooring. In 2010, management closed its start-up facility in China due to the contraction of demand and the Company's ability to serve the overseas thin film solar panel market from its North American operations. Accordingly, the China assets and liabilities, results of operations and cash flows are reported as discontinued operations for all periods presented.

Manufacturing Processes, Markets, and Product Sales by Business Segment

The Company has 20 manufacturing facilities in 9 states in the United States, the United Kingdom, and Germany. These facilities feature efficient plant design and flexible manufacturing processes, enabling the Company to produce a wide variety of custom engineered products and components for the residential building products markets. The Company is able to maintain minimal levels of finished goods inventories at most locations because it typically manufactures products upon order to customer specifications. Payments for purchases and collections from customers are generally consistent with industry practices which are based on average 30 day terms for both Engineered Products and Aluminum Sheet Products. The majority of the Company's products are sold into the building products markets. Residential remodeling activity and housing starts are its primary market drivers.

For financial information regarding each of the Company's reportable business segments, see Management's Discussion and Analysis of Financial Condition and Results of Operations herein and Note 12 to the Consolidated Financial Statements. For net sales of the Company by major product lines see Note 12 to the Consolidated Financial Statements. For the years ended October 31, 2011 and 2010, no single customer represented 10% or more of the consolidated net sales of the Company, respectively. For the year ended October 31, 2009, one customer, Andersen Corporation, represented \$62.7 million or 11% of the consolidated net sales of the Company. Both of the Company's segments sell to Andersen Corporation.

Quanex operates in two reportable business segments: Engineered Products and Aluminum Sheet Products.

Engineered Products

The Engineered Products segment is comprised of four fabricated metal components operations, two facilities producing wood fenestration (door and window) components, one facility producing engineered wood flooring, four polyvinyl chloride (vinyl) extrusion facilities, and four flexible IG (insulating glass) spacer facilities. The segment's operations produce window and door components for Original Equipment Manufacturers (OEMs) that primarily serve the residential construction, commercial construction, and remodeling markets. Products include insulating glass spacer systems, window and patio door screens, aluminum cladding and other roll formed metal window components, door components such as thresholds and astragals, residential exterior products, patio doors, window profiles and custom window grilles, trim and architectural moldings in a variety of woods, thin film solar panel sealants, and engineered wood flooring.

Engineered Products' extrusion operations use highly automated production facilities to manufacture vinyl and composite profiles, the framing material used by fenestration OEMs in the assembly of vinyl windows and patio doors. Value-added capabilities include compound blending, window system design, tooling design and fabrication, in-line weatherstrip installation and miter cutting, and the application of painted and co-extruded integrated weather-resistant coatings. Metal fabrication operations include roll forming, stamping, and end-product assembly to produce a variety of fenestration products. The IG systems business uses compound-extrusion and laminating technology to produce highly engineered window spacer products produced from butyl, EPDM, and silicone-based raw materials. These window spacer products are used to separate two or three panes

Table of Contents

of glass in an IG unit to improve its thermal performance. Engineered Products customers' end-use applications include windows and window components, entry and patio door systems, custom hardwood architectural moldings, and solar panels. Engineered Products key success factors range from design expertise, engineering support, quality audit support, marketing support, industry and governmental advocacy, new technology development, flexible, world-class quality manufacturing capability, unique patented products, customer service, and just-in-time delivery.

Aluminum Sheet Products

The Aluminum Sheet Products segment is comprised of an aluminum mini-mill operation and three stand-alone aluminum sheet cold finishing operations. Aluminum sheet finishing capabilities include reducing reroll (hot-rolled aluminum sheet) coil to specific gauge, annealing, slitting and custom coating. Customer end-use applications of the finished sheet include residential windows and screens, patio doors, exterior home trim, fascias, roof edgings, soffits, downspouts and gutters. A secondary market includes transportation (truck trailer, RV and mobile home panels).

The segment's aluminum mini-mill can produce approximately 360 million annualized finished pounds using an in-line casting process. The mini-mill converts aluminum scrap to reroll through melting, continuous casting, and in-line hot rolling processes. It also has scrap shredding and blending capabilities, as well as two rotary barrel melting furnaces, a delacquering furnace and a dross recovery system that broaden the mini-mill's use of raw materials, allowing it to utilize a broader range of scrap while improving raw material yields. Scrap is blended using computerized processes to most economically achieve the desired molten aluminum alloy composition. Management believes its production capabilities result in a significant conversion cost advantage and savings from reduced raw material costs, optimized scrap utilization, reduced unit energy cost and lower labor costs.

For financial information related to each segment, see Note 12 of the Financial Statements contained in this Annual Report on Form 10-K.

Strategy

Management's vision is to become the supplier of choice for fenestration systems and components, recognized for leading edge product and process technology, best in class customer service, and excellent returns on investment. Execution of the following strategies will be essential for attainment of this vision:

Achieve robust organic growth, both within our current customer base and through new market opportunities with national and regional customers, fueled by a robust system of quality and unmatched customer service, new product introduction, a systems approach and development of superior product attributes, particularly thermal efficiency, enhanced functionality, weatherability, appearance and best-in-class quality for Engineered Products;

Realize improved Aluminum Sheet profitability through investments focused on furthering our best-in-class processes, including the specialized ability to process low grades of scrap aluminum, while increasing capacity through internal advancements and expanding sales of value added products;

Lead the Company's industry in safety, the reduction of accidents and education of the Company's work force in safety practices;

Offer logistic solutions that provide our customers with just-in-time service that reduces their processing costs;

Enhance our profitability through continued efforts to adopt, promulgate and formalize Lean Manufacturing practices within our current businesses and future acquisitions, including eliminating waste, minimizing scrap, optimizing work flow and improving productivity;

Edgar Filing: Quanex Building Products CORP - Form 10-K

Attract and retain outstanding leadership and facilitate broad-based employee development through open communication, active feedback, meaningful goal setting and well-designed incentives; and

Table of Contents

Pursue an active acquisition program to grow the existing fenestration footprint into clear leadership positions through expansion of components and systems the Company offers and markets it serves.

Raw Materials and Supplies

The Engineered Products businesses purchase a diverse range of raw materials, which include coated and uncoated aluminum sheet, wood (both hardwood and softwood), polyvinyl chloride, epoxy resin, butyl, desiccant powder, silicone and EPDM rubber compounds. In most cases, the raw materials are available from several suppliers at market prices. Aluminum sheet is generally purchased from the Aluminum Sheet Products business at prices based upon arms-length transactions. Sole sourcing arrangements are entered into from time to time if beneficial savings can be realized and only when it is determined that a vendor can reliably supply all of the business's raw material requirements.

The Aluminum Sheet Products business's most significant raw material is aluminum scrap purchased on the open market, where availability and delivery can be adversely affected by, among other things, extreme weather conditions. Firm fixed price forward purchases matched to firm fixed price forward sales are used on a limited basis to hedge against fluctuations in the price of aluminum scrap required to manufacture products for fixed-price sales contracts. To a lesser extent, aluminum ingot futures contracts are bought and sold on the London Metal Exchange to hedge aluminum scrap requirements.

Although the Company has material sole sourcing arrangements, its agreements have clauses that allow for termination. In addition, there are several other qualified suppliers from which the Company could purchase raw materials and supplies.

Competition

The Company's products are sold under highly competitive conditions. The Company competes with a number of companies, some of which have greater financial resources than Quanex. Competitive factors include product quality, price, delivery, and the ability to manufacture to customer specifications. The volume of aluminum mill sheet products and engineered building products that the Company manufactures represent a small percentage of annual domestic consumption.

Engineered Products competes against a range of small and midsize metal, vinyl and wood products suppliers and wood molding companies. The Company also competes against IG spacer manufacturing firms and IG wholesalers. IG systems are used in numerous end markets including residential housing, commercial, appliances and transportation vehicles, but the Company primarily serves the residential housing market. Competition is primarily based on regional presence, custom engineering, product development, quality, service and price. The business also competes with in-house operations of vertically integrated fenestration OEMs. Some of the primary competitors of the Engineered Products business include Royal Group, Veka, Deceuninck, GED Integrated Solutions, Allmetal, Vision Industries, Aluminite, and Ritescreen.

The Aluminum Sheet Products business competes with small to large aluminum sheet manufacturers such as Aleris, Jupiter, Alcoa, and JW Aluminum, some of which are divisions or subsidiaries of major corporations with substantially greater resources than the Company. The Company competes in common alloy coil-coated and mill finished products, primarily on the basis of the breadth of product lines, the quality and responsiveness of its services, and price.

Sales, Marketing, and Distribution

The Company has sales representatives whose territories essentially cover all of the United States, Canada, much of Europe, and to a lesser extent, the Middle East, Latin and South America, Australia and Asia. The Company sells to over 82 countries worldwide. Engineered Products segment sales are primarily to window and door OEMs through a direct sales force, along with the limited use of distributors and independent sales

Table of Contents

agents. In 2010, its three standalone sales and marketing groups (one group for each of its three divisions) were combined into one unified group, which is tasked with selling and marketing the segment's complete range of components, products and systems to national and regional OEMs. The Edgetech sales and marketing resources were integrated into this unified group during 2011. Aluminum Sheet Products segment sales are to OEM and distribution customers through both direct and indirect sales representatives.

Seasonal Nature of Business

Sales of Engineered Products and Aluminum Sheet Products businesses are seasonal. Winter weather typically reduces homebuilding and home improvement activity. The Company typically experiences its lowest sales during the first half of its fiscal year. Profits tend to be lower in quarters with lower sales because a high percentage of manufacturing overhead and operating expense is due to labor and other costs that are generally semi-variable throughout the year.

Working Capital

The Company funds operations through a combination of available cash and equivalents, short-term investments, and cash flow generated from operations. In addition, the Company's revolving credit facility is available for working capital needs. The Company extends credit to its domestic customers in the ordinary course of business generally for 30 to 45 day terms and its international customers generally for 60 day terms. Inventory of raw materials are carried in quantities deemed necessary to ensure a smooth production process, some of which are governed by consignment agreements with suppliers. The Company maintains finished goods inventories sufficient to manage customer needs.

Service Marks, Trademarks, Trade Names, and Patents

The Company's federally registered trademarks or service marks include QUANEX, QUANEX and design, TRUSEAL TECHNOLOGIES, DURASEAL, DURALITE, SOLARGAIN EDGE TAPE, ENVIROSEALED WINDOWS, EDGETHERM, COLONIAL CRAFT, EDGETECH, SUPER SPACER, TSS, TRUE WARM, E & Design, QUIET EDGE, HEALTH SMART WINDOWS, ENERGY WISE WINDOWS, DESI-ROPE, 360 and design, INTELLICLIP, SUSTAINAVIEW, MIKRON, MIKRONWOOD, MIKRONBLEND, MIKRON BLEND and design, ENERGYCORE, FUSION INSULATED SYSTEM, AIRCELL, SUPERCOAT, SUPERCAP, STYLELOCK, STYLELOCK and design, K2 MIKRON and design, HOMESHIELD, HOMESHIELD and design, and STORM SEAL. The trade name Nichols Aluminum is used in connection with the sale of our aluminum mill sheet products. The HOMESHIELD, COLONIAL CRAFT, TRUSEAL TECHNOLOGIES, EDGETECH, MIKRON and QUANEX word and design marks and associated trade names are considered valuable in the conduct of business. The Company's business generally does not depend upon patent protection, but patents obtained at its vinyl extrusion, fabricated metal component operations and window sealant business units remain critical in providing a competitive advantage over other building products manufacturers. The Company's vinyl extrusion business unit obtains patent protection for various dies and other tooling created in connection with its production of customer-specific designs and extrusions. The Company's fabricated metal components business obtains patent protection for its thresholds, which gives it an advantage in the threshold markets. The Company's window sealant business unit relies on patents to protect the design of several of its window spacer products. Although the Company holds numerous patents, the proprietary process technology that has been developed is also the source of considerable competitive advantage.

Research and Development

Expenditures for research and development of new products or services during the last three years were not significant. Although not technically defined as research and development, a significant amount of time, effort and expense is devoted to (a) custom engineering which qualifies products for specific customer applications, (b) developing superior, proprietary process technology and (c) partnering with customers to develop new products.

Table of Contents**Environmental and Employee Safety Matters**

The Company is subject to extensive laws and regulations concerning the discharge of materials into the environment, the remediation of chemical contamination and worker safety. To satisfy such requirements, the Company must make capital and other expenditures on an ongoing basis. The cost of environmental matters and worker safety has not had a material adverse effect on the Company's operations or financial condition in the past, and management is not currently aware of any existing conditions that it believes are likely to have a material adverse effect on its operations, financial condition, or cash flows.

Worker Safety

The Company for many years has maintained effective compliance policies that have helped to minimize liabilities and other financial impacts related to worker safety and environmental issues. These policies include extensive employee training and education, as well as internal policies embodied in the Company's Code of Conduct and elsewhere. In addition, the Company has a Quanex-wide Safety Council, comprised of leaders from across the organization, which meets regularly to discuss safety issues and drive safety improvements. The Company plans to continue these practices in the future, and believes that they are a vital component of the Company's continued high performance. Based on experience to date, the Company does not believe that there will be any material adverse effect on its operations, financial condition, or cash flows as a result of maintaining these policies in the future.

Remediation

Under applicable state and federal laws, the Company may be responsible for, among other things, all or part of the costs required to remove or remediate wastes or hazardous substances at locations it has owned or operated at any time. The Company currently is engaged in material environmental remediation activities at only one of its plant sites.

From time to time, the Company also has been alleged to be liable for all or part of the costs incurred to clean up third-party sites where it is alleged to have arranged for disposal of hazardous substances. At present, the Company is not involved in any such matters.

Total environmental reserves and corresponding recovery as of October 31, 2011 and October 31, 2010 were as follows:

	October 31, 2011	October 31, 2010
	(In thousands)	
Current ⁽¹⁾	\$ 1,965	\$ 1,564
Non-current	11,221	12,027
Total environmental reserves	\$ 13,186	\$ 13,591
Receivable for recovery of remediation costs ⁽²⁾	\$ 12,304	\$ 12,747

⁽¹⁾ Reported in Accrued liabilities on the Consolidated Balance Sheets

⁽²⁾ Reported in Accounts receivable and Other assets on the Consolidated Balance Sheets

The Company currently is engaged in ongoing remediation activities at one of its subsidiaries, Nichols Aluminum-Alabama, LLC (NAA). NAA operates a plant in Decatur, Alabama that is subject to an Alabama Hazardous Wastes Management and Minimization Act Post-Closure Permit. Among other things, the permit requires NAA to remediate, as directed by the state, historical environmental releases of wastes and waste constituents. Consistent with the permit, NAA has undertaken various studies of site conditions and, during the first quarter of 2006, started a phased program to treat in-place free product petroleum that had been released

Table of Contents

underneath the plant. During the second quarter 2010, NAA submitted to the state the first component of its proposed workplan for implementing a site-wide remedy. The full workplan was submitted to the state during the third quarter 2010, revised during the second quarter 2011 to reflect both additional sampling data and responses to state comments, and revised again in the fourth quarter 2011 in response to another round of state comments. Based on those plans, which remain subject to further comment, revision, and state approval, the Company's remediation reserve at NAA's Decatur plant is \$12.9 million as of October 31, 2011. Approximately \$1.3 million of the October 31, 2011 reserve represents administrative costs; the balance of \$11.6 million represents estimated costs for investigation, studies, cleanup, and treatment. The reserve has not been discounted. NAA was acquired through a stock purchase in which the sellers agreed to indemnify Quanex and NAA for identified environmental matters related to the business and based on conditions initially created or events initially occurring prior to the acquisition. Environmental conditions are presumed to relate to the period prior to the acquisition unless proved to relate to releases occurring entirely after closing. The limit on indemnification is \$21.5 million excluding legal fees. While the Company's current estimates indicate it will not reach this limit, changing circumstances could result in additional costs or expense that are not foreseen at this time. In accordance with the indemnification, the indemnitors paid the first \$1.5 million of response costs and have been paying 90% of ongoing costs. Based on its experience to date, its estimated cleanup costs going forward, and costs incurred to date as of October 31, 2011, the Company expects to recover from the sellers' shareholders an additional \$12.3 million which has not been discounted. Of that, \$11.6 million is recorded in Other assets on the Consolidated Balance Sheets, and the balance is reflected in Accounts receivable on the Consolidated Balance Sheets. The undiscounted recovery from indemnitors as of October 31, 2010 was \$12.7 million.

The Company's final remediation costs and the timing of those expenditures will depend upon such factors as the nature and extent of contamination, the cleanup technologies employed, the effectiveness of the cleanup measures that are employed, and regulatory concurrences. While actual remediation costs, therefore, may be more or less than amounts accrued, the Company believes it has established adequate reserves for all probable and reasonably estimable remediation liabilities. It is not possible at this point to reasonably estimate the amount of any obligation for remediation in excess of current accruals because of uncertainties as to the extent of environmental impact, cleanup technologies, and concurrence of governmental authorities. The Company currently expects to pay the accrued remediation reserve through at least fiscal 2034, although some of the same factors discussed earlier could accelerate or extend the timing.

Compliance

In June 2010, the United States Environmental Protection Agency (EPA) conducted an inspection at the plant operated by the Company's subsidiary Nichols Aluminum LLC (Nichols) in Davenport, Iowa, and in February 2011, the EPA conducted an inspection at Nichols' Casting facility in Davenport, Iowa, to determine compliance with the requirements of the Resource Conservation and Recovery Act (RCRA). In September 2011, Nichols received from the EPA an offer of settlement and a proposed penalty assessment in excess of \$100,000 to address alleged violations identified during the June 2010 and February 2011 inspections. The Company is working with EPA to address the allegations. While it is reasonable to believe that this matter could potentially involve a penalty exceeding \$100,000, the potential liability with respect to this matter should not be material to the Company.

Quanex incurred expenses of approximately \$1.5 million during fiscal 2011 in order to comply with existing environmental regulations. This compares to \$1.4 million of expense incurred during fiscal 2010. For fiscal 2012, the Company estimates expenses at its facilities will be approximately \$1.7 million for continuing environmental compliance. There were capital expenditures for environmental matters during fiscal 2011 of \$2.2 million and fiscal 2010 of \$2.5 million. Environmental capital expenditures of \$5.8 million are planned for fiscal 2012. Future expenditures relating to environmental matters will depend upon the application to the Company and its facilities of future regulations and government decisions. The Company will continue to have expenditures beyond fiscal 2012 in connection with environmental matters, including control of air emissions, control of water discharges and plant decommissioning costs. It is not possible at this time to reasonably estimate the amount of

Table of Contents

those expenditures, except as discussed above, due to uncertainties about emission levels, control technologies, the positions of governmental authorities and the application of requirements to the Company. Based upon its experience to date, the Company does not believe that its compliance with environmental requirements will have a material adverse effect on its operations, financial condition, or cash flows.

Employees

The Company had 2,340 employees at October 31, 2011. Of the total employed, approximately 25% are covered by collective bargaining agreements. Following is a table of collective bargaining agreements currently in place:

Facility	Expires	Union	Covered Employees at 10/31/11
Nichols Aluminum Davenport/Casting	Nov. 2011 ⁽¹⁾	International Brotherhood of Teamsters	252
Truseal Technologies	Dec. 2012	United Steelworkers of America	175
Nichols Aluminum Lincolnshire	Jan. 2013	International Association of Machinists and Aerospace Workers	83
Nichols Aluminum Alabama	Nov. 2014	United Steelworkers of America	78

⁽¹⁾ Nichols Aluminum Davenport/Casting and International Brotherhood of Teamsters Local 371 have been and remain engaged in negotiations for a new labor contract. The current labor contract expired November 15, 2011 without the parties having reached a new agreement. Nichols Aluminum is continuing manufacturing operations at its two plants in Davenport, Iowa.

Financial Information about Geographic Areas

For financial information on the Company's foreign and domestic operations, see Note 12 of the Financial Statements contained in this Annual Report on Form 10-K.

Communication with the Company

The Company's website is www.quanex.com. Inquiries to the Company and its Board of Directors are invited. Interested persons may contact the appropriate individual or department by choosing one of the options below.

General*Investor Information:*

For Investor Relations matters or to obtain a printed copy of the Company's Code of Business Conduct and Ethics, Corporate Governance Guidelines or charters for the Audit, Compensation and Management Development, and Nominating and Corporate Governance Committees of the Board of Directors, send a request to the Company's principal address below or inquiry@quanex.com. This material may also be obtained from the Company website at www.quanex.com/investor-relations/corporate-governance.

The Company's required regulatory filings such as annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports are available free of charge through the Company's website, as soon as reasonably practicable after they have been filed with or furnished to the Securities and Exchange Commission (SEC) pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934 (the 1934 Act). Forms 3, 4 and 5 filed with respect to equity securities under Section 16(a) of the 1934 Act are also available on the Company's website. All of these materials are located at the Investor Relations link under SEC filings. They can also be obtained free of charge upon request to inquiry@quanex.com or to the Company's principal address below.

Communications with the Company's Board of Directors:

Persons wishing to communicate to the Company's Board of Directors or specified individual directors may do so by sending them in care of The Chairman of the Board of Directors at the Company's principal address below or online by visiting the Company's Alert Line located at <https://quanex.alertline.com>.

Alert Line

Accounting Issues:

Persons who have questions or concerns regarding potential questionable accounting, internal accounting controls or auditing matters may submit them to the Senior Vice President Finance & Chief Financial Officer at the Company's principal address or online by visiting the Company's Alert Line located at

<https://quanex.alertline.com>. The Audit Committee will be informed of the call or report and the Company's response.

Such communications will be kept confidential to the fullest extent possible. If the individual is not satisfied with the response, they may contact the Audit Committee or the Nominating and Corporate Governance Committee of the Board of Directors of the Company. If concerns or complaints require confidentiality, then this confidentiality will be protected, subject to applicable laws.

Reporting Potential Illegal or Unethical Behavior:

Employees, officers and directors who suspect or know of violations of the Company's Code of Business Conduct and Ethics, or illegal or unethical business or workplace conduct by employees, officers or directors, have an obligation to report it. If the individuals to whom such information is conveyed are not responsive, or if there is reason to believe that reporting to such individuals is inappropriate in particular cases, then the employee, officer or director may contact the Chief Compliance Officer, Chief Financial Officer, Director of Internal Audit, or any corporate officer in person, by telephone, letter to the Company's principal address or e-mail below. Quanex Building Products also encourages persons who are not affiliated with the Company to report any suspected illegal or unethical behavior. The Audit and Nominating & Corporate Governance Committees will be informed.

Item 1A. Risk Factors

In addition to the factors discussed elsewhere in this report and in Management's Discussion and Analysis of Financial Condition and Results of Operations, the following are some of the potential risk factors that could cause the Company's actual results to differ materially from those projected in any forward-looking statements. These factors, as well as the other information contained in this document, should be carefully considered when evaluating an investment in the Company's securities. Any of the following risks could have material adverse effects on the Company's financial condition, operating results and cash flow. The below list of important factors is not all-inclusive or necessarily in order of importance.

The Company is subject to business risks and general economic factors that are largely out of our control, any of which could have a material adverse effect on our business, financial condition and results of operations.

The primary drivers of the Company's business are remodeling activities and housing starts. The building and construction industry is cyclical and seasonal, and product demand is based on numerous factors such as interest rates, general economic conditions, consumer confidence and other factors beyond the Company's control. Declines in housing starts and remodeling activities due to such factors could have a material adverse effect on the Company's business, results of operations and financial condition. The downturn in the housing market has had an adverse effect on the operating results of the Company's building products business. Further deterioration or prolonged depressed states in industry conditions or in the broader economic conditions of the markets where the Company operates could further decrease demand and pricing for its products and have additional adverse effects on its operations and financial results.

The Company's business is subject to a number of general economic factors that may adversely affect its business, financial condition and results of operations, many of which are largely out of its control. These factors include domestic and international recessionary economic cycles, changes in foreign currency exchange rates, and downturns in customers' business cycles and changes in their business practices, particularly in market segments and industries where the Company has a significant concentration of customers. There could be a number of follow-on effects on the Company's business, including insolvency of key suppliers resulting in product delays, inability of customers to obtain credit to finance purchases of the Company's products, an inability of customers to pay accounts receivable owed to the Company, or delays in the payment of such receivables. Additionally, if these economic conditions persist, the Company's assets may become further impaired.

The price of our common stock has been volatile and could continue to fluctuate in the future.

The market price of the Company's common stock has fluctuated significantly and is likely to continue to fluctuate in the future. Announcements by the Company or others regarding the receipt of customer orders, quarterly variations in operating results, acquisitions or divestitures, additional equity or debt financings, litigation, product developments, patent or proprietary rights, government regulation and general market conditions may have a significant impact on the market price of the Company's common stock.

Table of Contents

If the Company's raw materials or energy were to significantly increase in price or raw materials were to become unavailable, the Company might not be able to timely produce products for its customers or maintain its profit levels.

Quanex requires significant amounts of raw materials, substantially all of which are purchased from outside sources. The Company does not have long-term contracts for the supply of most of its raw materials. The availability and prices of raw materials may be subject to curtailment or change due to new laws or regulations, suppliers' allocations to other purchasers, or interruptions in production by suppliers. In addition, the operation of the Company's facilities requires substantial amounts of electric power and natural gas. Any change in the supply of, or price for, these raw materials could affect its ability to timely produce products for its customers.

The Company depends on supplier relationships, insurance providers, and other vendors, and any disruption in these relationships may cause damage to its customer relationships or delays to its business.

There can be no assurance that the Company's suppliers will be able to meet the Company's future requirements for products and components in a timely fashion. In addition, the availability of many of these components is dependent in part on the Company's ability to provide its suppliers with accurate forecasts of the Company's future requirements. Delays or lost sales could be caused by other factors beyond the Company's control, including late deliveries by vendors. If the Company were required to identify alternative suppliers for any of its required components, qualification and pre-production periods could be lengthy and may cause an increase in component costs and delays in providing products to customers. Any extended interruption in the supply of any of the key components currently obtained from limited sources could disrupt the Company's operations and have a material adverse effect on customer relationships and profitability.

The Company is subject to various environmental requirements, and compliance with, or liabilities under, existing or future environmental laws and regulations could significantly increase the Company's costs of doing business.

The Company is subject to extensive federal, state and local laws and regulations concerning the discharge of materials into the environment and the remediation of chemical contamination. To satisfy such requirements, the Company must make capital and other expenditures on an ongoing basis. For example, environmental agencies continue to develop regulations implementing the Federal Clean Air Act. Depending on the nature of the regulations adopted, the Company may be required to incur additional capital and other expenditures in the next several years for air pollution control equipment, to maintain or obtain operating permits and approvals, and to address other air emission-related issues. Future expenditures relating to environmental matters will necessarily depend upon the application to the Company and its facilities of future regulations and government decisions. It is likely that the Company will be subject to increasingly stringent environmental standards and the additional expenditures related to compliance with such standards. Furthermore, if the Company fails to comply with applicable environmental regulations, the Company could be subject to substantial fines or penalties and to civil and criminal liability.

The Company may not be able to successfully identify, manage or integrate future acquisitions, and if it is unable to do so, the Company's rate of growth and profitability could be adversely affected.

The Company cannot provide any assurance that it will be able to identify appropriate acquisition candidates or, if it does, that it will be able to successfully negotiate the terms of an acquisition, finance the acquisition, or integrate the acquired business effectively and profitably into its existing operations. Integration of future acquired businesses could disrupt the Company's business by diverting management's attention away from day-to-day operations. Further, failure to successfully integrate any acquisition may cause significant operating inefficiencies and could adversely affect the Company's profitability. Consummating an acquisition could require the Company to raise additional funds through additional equity or debt financing. Additional equity financing could depress the market price of the Company's common stock.

Table of Contents

If the Company's information technology systems fail, or if the Company experiences an interruption in their operation, then the Company's business, financial condition and results of operations could be materially adversely affected.

The efficient operation of the Company's business is dependent on its information technology systems. The Company relies on those systems generally to manage the day-to-day operation of its business, manage relationships with its customers, fulfill customer orders, and maintain its financial and accounting records. In fiscal 2011, the Company launched a multi-year, company-wide program to transform certain business processes, including the transition to a single enterprise resource planning (ERP) software system to perform various functions. The new system is expected to improve access to and consistency of information, enable standardization of business activities, help deliver business process improvements and support business growth. The implementation of an ERP system entails certain risks, including difficulties with changes in business processes that could disrupt the Company's operations, such as its ability to process orders and timely ship products, project inventory requirements, provide services and customer support, send invoices and track payments, fulfill contractual obligations, and aggregate financial and operational data. The ERP implementation project will likely consume significant business resources, including personnel and financial resources. The failure of the Company's information technology systems, its inability to successfully maintain, enhance and/or replace its information technology systems, or any compromise of the integrity or security of the data that is generated from information technology systems, could adversely affect the Company's results of operations, disrupt business and make the Company unable, or severely limit the Company's ability, to respond to customer demands. In addition, the Company's information technology systems are vulnerable to damage or interruption from:

earthquake, fire, flood and other natural disasters;

employee or other theft;

attacks by computer viruses or hackers;

power outages; and

computer systems, internet, telecommunications or data network failure.

Any interruption of the Company's information technology systems could result in decreased revenue, increased expenses, increased capital expenditures, customer dissatisfaction and potential lawsuits, any of which could have a material adverse effect on the Company's results of operations or financial condition.

The Company operates in competitive markets, and its business will suffer if it is unable to adequately address potential downward pricing pressures and other factors that may reduce operating margins.

The principal markets that the Company serves are highly competitive. Competition is based primarily on the precision and range of achievable tolerances, quality, price and the ability to meet delivery schedules dictated by customers. The Company's competition in the markets in which it participates comes from companies of various sizes, some of which have greater financial and other resources than the Company does and some of which have more established brand names in the markets the Company serves. Any of these competitors may foresee the course of market development more accurately than the Company does, develop products that are superior to the Company's products, have the ability to produce similar products at a lower cost than the Company can, or adapt more quickly than the Company to new technologies or evolving customer requirements. Increased competition could force the Company to lower its prices or to offer additional services at a higher cost to the Company, which could reduce its gross profit and net income.

Original Equipment Manufacturers (OEMs) have significant pricing leverage over suppliers and may be able to achieve price reductions over time, which could reduce the Company's profits.

The Company's products are sold primarily to OEMs, and to a much lesser extent, sold through distributors and independent representative agents. There is substantial and continuing pressure from OEMs in all industries

Table of Contents

to reduce the prices they pay to suppliers. The Company attempts to manage such downward pricing pressure, while trying to preserve its business relationships with its OEM customers, by seeking to reduce its production costs through various measures, including purchasing raw materials and components at lower prices and implementing cost-effective process improvements. However, the Company's suppliers may resist pressure to lower their prices and may seek to impose price increases. If the Company is unable to offset OEM price reductions through these measures, its gross margins and profitability could be adversely affected. In addition, OEMs have substantial leverage in setting purchasing and payment terms, including the terms of accelerated payment programs under which payments are made prior to the account due date in return for an early payment discount.

Loss or financial weakness of any of the Company's largest customers could adversely affect our financial results.

The Company has certain product lines associated with some of the Company's larger customers. Although the Company has an extensive customer base, loss of or material financial weakness of its largest customers could adversely affect the Company's financial condition and results of operations until such business is replaced and no assurances can be made that the Company would be able to regain or replace any lost customers.

The Company could lose customers and the related revenues due to customers vertically integrating, new customers entering the market, or the transfer of manufacturing capacity by its customers out of the United States to lower cost regions of the world.

The Company produces products primarily for OEMs. These customers may choose to vertically integrate or bring production in-house decreasing their demand for the Company's products. In addition, new competitors could enter our markets which could also lead to a loss of customers and revenues if the customer no longer purchases products from the Company.

In addition, U.S. manufacturers have migrated production to other regions of the world that offer lower cost labor forces. The combined effect is that U.S. manufacturers can reduce product costs by manufacturing and assembling in other regions of the world and then importing those products to the United States. Some of the Company's customers have shifted production to other regions of the world and there can be no assurance that this trend will not continue. The Company may lose customers and revenues if its customers locate in areas that the Company chooses not to serve or cannot economically serve.

If the Company's relationship with its employees were to deteriorate, the Company could be faced with labor shortages, disruptions or stoppages, which could shut down certain of its operations, reducing revenue, net earnings, and cash flows.

The Company's operations rely heavily on its employees, and any labor shortage, disruption or stoppage caused by poor relations with its employees and/or renegotiation of labor contracts could shut down certain of its operations. Approximately 25% of the Company's employees are covered by collective bargaining agreements which expire between 2011 and 2014. It is possible that the Company could become subject to additional work rules imposed by agreements with labor unions, or that work stoppages or other labor disturbances could occur in the future, any of which could impact financial results. Similarly, any failure to negotiate a new labor agreement when required might result in a work stoppage that could reduce the Company's operating margins and income.

Changes in regulatory requirements or new technologies may render the Company's products obsolete or less competitive.

Changes in legislative, regulatory or industry requirements or in competitive technologies may render certain of the Company's products obsolete or less competitive, preventing the Company from selling them at profitable prices, or at all. The Company's ability to anticipate changes in technology and regulatory standards

Table of Contents

and to successfully develop and introduce new and enhanced products on a timely and cost-efficient basis will be a significant factor in its ability to remain competitive. The Company's business may, therefore, require significant ongoing and recurring additional capital expenditures and investments in research and development. The Company may not be able to achieve the technological advances necessary for it to remain competitive or certain of its products may become obsolete. The Company is also subject to the risks generally associated with new product introductions and applications, including lack of market acceptance, certification issues, delays in product development and failure of products to operate properly. Any such delays or cost overruns or the inability to obtain such certifications could negatively affect the returns from any proposed or new products.

Equipment failures, delays in deliveries or catastrophic loss at any of the Company's manufacturing facilities could lead to production curtailments or shutdowns that prevent the Company from producing its products.

An interruption in production capabilities at any of the Company's facilities as a result of equipment failure or other reasons could result in the Company's inability to produce its products, which would reduce its sales and earnings for the affected period. In addition, the Company generally manufactures its products only after receiving the order from the customer and thus does not hold large inventories. If there is a stoppage in production at any of the Company's manufacturing facilities, even if only temporarily, or if the Company experiences delays as a result of events that are beyond its control, delivery times could be severely affected. Any significant delay in deliveries to the Company's customers could lead to increased returns or cancellations and cause the Company to lose future sales. The Company's manufacturing facilities are also subject to the risk of catastrophic loss due to unanticipated events such as fires, explosions or violent weather conditions. The Company has in the past and may in the future experience plant shutdowns or periods of reduced production as a result of equipment failure, delays in deliveries or catastrophic loss, which could have a material adverse effect on the Company's results of operations or financial condition. The Company may not have adequate insurance to compensate it for all losses that result from any of these events.

Product liability claims and product replacements could harm the Company's reputation, sales and financial condition.

The Company designs and manufactures most of its products and expects to continue to do so. The Company has, on occasion, found flaws and deficiencies in the manufacturing, design, testing and installation of its products. Some deficiencies may not become apparent until after the products are installed by customers.

The Company may need to replace products, and it may be liable for any costs necessary to retrofit the affected structures. Any such replacement or retrofit could entail substantial costs and adversely affect the Company's reputation, sales and financial condition. The Company generally does not carry insurance against product replacement costs or the adverse business effect of a product replacement, and its product liability insurance may not cover retrofit costs.

The Company's business involves complex manufacturing processes that may result in costly accidents or other disruptions of its operations.

The Company's business involves complex manufacturing processes. Some of these processes involve high pressures, temperatures, hot metal and other hazards that present certain safety risks to workers employed at the Company's manufacturing facilities. The potential exists for accidents involving death or serious injury. The potential liability resulting from any such accident, to the extent not covered by insurance, could cause the Company to incur unexpected cash expenditures, thereby reducing the cash available to operate its business. Such an accident could disrupt operations at any of the Company's facilities, which could adversely affect its ability to deliver product to its customers on a timely basis and to retain its current business.

Table of Contents

Flaws in the design or manufacture of the Company's products could cause future product liability or warranty claims for which it does not have adequate insurance or affect its reputation among customers.

The Company's products are essential components in buildings and other applications where problems in the design or manufacture of its products could result in property damage, personal injury or death. While the Company believes that its liability insurance is adequate to protect it from future product liability and warranty liabilities, its insurance may not cover all liabilities or be available in the future at a cost acceptable to the Company. In addition, if any of the Company's products prove to be defective, it may be required in the future to participate in a recall involving such products. A successful claim brought against the Company in excess of available insurance coverage, if any, or a requirement to participate in any product recall, could significantly reduce the Company's profits or negatively affect its reputation with customers. In addition, flaws in the Company's products could lead to customer complaints, weaken its relationships with its customers, affect its reputation in the industry and lead to lost revenues or customers.

The Company's credit facility contains restrictions on the Company's ability to implement its acquisition program.

The Company's credit facility contains certain restrictions on the Company's ability to enter into acquisitions, including:

the Company must comply with all terms and conditions of the credit facility on a pro forma basis based on the combined operating results of the acquisition target and the Company;

if the Company's leverage ratio is greater than 2.50x, acquisitions are limited to 15% of the Company's net worth per transaction; and

the Company is restricted from incurring certain additional indebtedness.

The above restrictions may impede the Company's ability to carry out an active acquisition program, which is an important component of the Company's future growth strategy. The Company's failure to comply with the terms and covenants in its credit facility could lead to a default under the terms of those documents, which would entitle the lenders to accelerate the indebtedness and declare all amounts owed due and payable.

The Company's credit facility contains certain financial covenants that limit the aggregate availability of funds.

The availability of funds under the credit facility is a function of both the facility amount utilized and meeting covenant requirements. The aggregate availability under the Credit Facility is limited by the Consolidated Leverage Ratio which is based on EBITDA. These restrictions on fund availability could:

limit the Company's ability to plan for or react to market conditions or meet capital needs

restrict activities or business plans

adversely affect the Company's ability to fund operations, or engage in other business activities that would be in the Company's interest.

Failure to obtain alternative financing created by a potential breach of the lender's funding commitment could negatively impact the Company's growth strategy.

The turmoil affecting the banking system and financial markets during the prior years has resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in fixed income, credit, currency and equity markets. There is no assurance that the Company's lenders will provide any future funding under the credit facility. If the Company's lenders were unable or unwilling to fulfill their lending commitment, the Company would be required to seek alternative funding sources in order to conduct operations. Alternative

funding could result in higher interest rates. However, there can be no assurance that alternative

Table of Contents

financial resources will be available promptly, on favorable terms or at all. Failure to obtain necessary funding could adversely affect the Company's short-term liquidity and ability to make investment in research and development to fund new product initiatives, continue to upgrade process technology and manufacturing capabilities, and actively seek out potential acquisition candidates and could adversely affect our business, financial condition and operating results.

The Company's corporate governance documents as well as Delaware law may delay or prevent an acquisition that stockholders may consider favorable, which could decrease the value of the Company's shares.

The Company's certificate of incorporation and bylaws and Delaware law contain provisions that could make it more difficult for a third party to acquire the Company without the consent of its board of directors. These provisions include restrictions on the ability of the Company's stockholders to remove directors and

supermajority voting requirements for stockholders to amend the Company's organizational documents, a classified board of directors and limitations on action by the Company's stockholders by written consent. In addition, the Company's board of directors has the right to issue preferred stock without stockholder approval, which could be used to dilute the stock ownership of a potential hostile acquirer. Delaware law also imposes some restrictions on mergers and other business combinations between any holder of 15% or more of the Company's outstanding common stock and the Company. Although the Company believes these provisions protect its stockholders from coercive or otherwise unfair takeover tactics and thereby provide for an opportunity to receive a higher bid by requiring potential acquirers to negotiate with its board of directors, these provisions apply even if the offer may be considered beneficial by some stockholders.

The Company's operations outside the United States require it to comply with a number of United States and international regulations, violations of which could have a material adverse effect on its consolidated results of operations and consolidated financial condition.

The Company's operations outside the United States require it to comply with a number of United States and international regulations. For example, its operations in countries outside the United States are subject to the Foreign Corrupt Practices Act (FCPA), which prohibits United States companies or their agents and employees from providing anything of value to a foreign official for the purposes of influencing any act or decision of these individuals in their official capacity to help obtain or retain business, direct business to any person or corporate entity, or obtain any unfair advantage. The Company's activities create the risk of unauthorized payments or offers of payments by one of its employees or agents that could be in violation of the FCPA, even though these parties are not always subject to its control. The Company has internal control policies and procedures and has implemented training and compliance programs for its employees and agents with respect to the FCPA. However, the Company cannot assure that its policies, procedures and programs always will protect it from reckless or criminal acts committed by its employees or agents. Allegations of violations of applicable anti-corruption laws, including the FCPA, may result in internal, independent, or government investigations. Violations of the FCPA may result in severe criminal or civil sanctions, and the Company may be subject to other liabilities, which could have a material adverse effect on its business, consolidated results of operations and consolidated financial condition. In addition, investigations by governmental authorities as well as legal, social, economic, and political issues in these countries could have a material adverse effect on its business and consolidated results of operations. The Company is also subject to the risk that its employees and agents outside of the United States may fail to comply with other applicable laws.

The Company's expansion plans outside the United States may not succeed.

Any expansion to markets outside the United States will present different and successive risks, expenses and difficulties with regard to applying or modifying our business model to different countries and regions of the world. There can be no assurance that any of the Company's efforts to expand outside the United States will prove successful, that it will not incur operating losses in the future as a result of these efforts or that such efforts will not have a material adverse impact.

Table of Contents

The Company may not have the right infrastructure (people, systems, and processes) in place to achieve its growth initiatives.

If the Company does not effectively develop and implement its organic growth strategies, or if there are delays or difficulties in enhancing business processes, it may not realize anticipated productivity improvements or cost efficiencies, and may experience operational difficulties, increased costs, manufacturing interruptions or delays, quality issues, increased product time-to-market, and/or inefficient allocation of human resources, any or all of which could materially and adversely affect the Company's business, financial condition and results of operations.

The Company's success depends upon its ability to develop new products and services, integrate acquired products and services and enhance its existing products and services through product development initiatives and technological advances.

The Company has continuing programs designed to develop new products and to enhance and improve its products. The Company is expending resources for the development of new products in all aspects of its business, including products that can reach a broader customer base. Some of these new products must be developed due to changes in legislative, regulatory or industry requirements or in competitive technologies that render certain of the Company's products obsolete or less competitive. The successful development of the Company's products and product enhancements are subject to numerous risks, both known and unknown, including unanticipated delays, access to significant capital, budget overruns, technical problems and other difficulties that could result in the abandonment or substantial change in the design, development and commercialization of these new products.

Given the uncertainties inherent with product development and introduction, including lack of market acceptance, the Company cannot provide assurance that any of its product development efforts will be successful on a timely basis or within budget, if at all. Failure to develop new products and product enhancements on a timely basis or within budget could harm the Company's business and prospects. In addition, the Company may not be able to achieve the technological advances necessary for it to remain competitive.

The Company's goodwill and indefinite-lived intangible assets may become impaired and result in a charge to income.

The Company's management must use judgment in making estimates of future operating results and appropriate residual values to allocate the purchase price paid for acquisitions to the fair value of the net tangible and identifiable intangible assets. Future operating results and residual values could reasonably differ from the estimates and could require a provision for impairment in a future period which would result in a charge to income from operations in the year of the impairment with a resulting decrease in the Company's recorded net worth.

The Company may not be able to protect its intellectual property.

A significant amount of time, effort and expense is devoted to custom engineering which qualifies the Company's products for specific customer applications and developing superior, proprietary process technology. The Company relies on a combination of copyright, patent, trade secrets, confidentiality procedures and contractual commitments to protect its proprietary information. Despite the Company's efforts, these measures can only provide limited protection. Unauthorized third parties may try to copy or reverse engineer portions of the Company's products or otherwise obtain and use its intellectual property. Any patents the Company owns may be invalidated, circumvented or challenged. Any of the Company's pending or future patent applications, whether or not being currently challenged, may not be issued with the scope of the claims it seeks, if at all. If the Company cannot protect its proprietary information against unauthorized use, it may not remain competitive, which would have a material adverse effect on the Company's results of operations.

Table of Contents

The Company has the ability to issue additional equity securities, which would lead to dilution of its issued and outstanding common stock.

The issuance of additional equity securities or securities convertible into equity securities would result in dilution of existing stockholders' equity interests in the Company. The Company is authorized to issue, without stockholder approval, 1,000,000 shares of preferred stock, no par value, in one or more series, which may give other stockholders dividend, conversion, voting, and liquidation rights, among other rights, which may be superior to the rights of holders of the Company's common stock. The Company's board of directors has no present intention of issuing any such preferred shares, but reserves the right to do so in the future. In addition, the Company is authorized, by prior stockholder approval, to issue up to 125,000,000 shares of common stock, \$0.01 par value per share. The Company is authorized to issue, without stockholder approval, securities convertible into either common stock or preferred stock.

The Company's insurance providers may be unable to perform under their obligations.

Although the Company believes its insurance providers are creditworthy and that it will collect all amounts owed to it, the failure of these institutions to perform under their obligations could have a material adverse effect on the Company's financial condition, results of operations, and cash flows.

Item 1B. *Unresolved Staff Comments*

None.

Table of Contents**Item 2. Properties**

The following table lists the Company's principal properties together with their locations, general character and the industry segment which uses the facility. Listed facilities are owned by the Company, unless indicated otherwise. See Item 1, Business, for discussion of the capacity of various facilities.

Location	Principal Products
Engineered Products Segment	
Rice Lake, Wisconsin	Fenestration products
Chatsworth, Illinois	Fenestration products
Richmond, Indiana	Fenestration products
Solon, Ohio	Flexible spacer and adhesive research & sales
<i>Leased (expires 2017)</i>	
Barbourville, Kentucky ⁽¹⁾	Flexible spacer/solar adhesives
Luck, Wisconsin	Fenestration products
Richmond, Kentucky	Vinyl and composite extrusions
Winnebago, Illinois	Vinyl extrusions
Mounds View, Minnesota	Fenestration products
<i>Leased (expires 2016)</i>	
Kent, Washington	Vinyl and composite extrusions
<i>Leased (lease expires in 2015)</i>	
Yakima, Washington	Vinyl extrusions
<i>Leased (expires in 2015)</i>	
Dubuque, Iowa	Fenestration products
<i>Leased (expires 2012)</i>	
Shawano, Wisconsin	Fenestration products
<i>Leased (expires 2015)</i>	
Cambridge, Ohio	Flexible spacer/solar adhesives
<i>Leased (expires 2021)</i>	
Coventry, United Kingdom	Flexible spacer
Heinsberg, Germany	Flexible spacer
<i>Leased (expires 2025)</i>	
Aluminum Sheet Products Segment	
Lincolnshire, Illinois	Finishing
Davenport, Iowa	Mini-mill and finishing/painting (two plants)
Decatur, Alabama	Finishing/painting
<i>Owned and leased (expires 2018)</i>	
Executive Offices	
Houston, Texas	Corporate Office
<i>Leased (expires 2015)</i>	

⁽¹⁾ In November 2011, management committed to a plan to close its Barbourville, Kentucky facility.

The Company believes that its properties are generally in good condition, are well maintained, and are generally suitable and adequate to carry on the Company's business. In fiscal 2011, the Company's facilities operated at approximately 56% of capacity.

Item 3. Legal Proceedings

The Company believes there are no material legal proceedings to which Quanex, its subsidiaries, or their property is subject. For discussion of environmental issues, see Item 1 of this Form 10-K, Note 16 to the Consolidated Financial Statements, located in Item 8 of this Form 10-K.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Quanex Building Products' common stock, \$0.01 par value, is traded on the New York Stock Exchange, under the ticker symbol NX. The following tables present the quarterly common stock cash dividends and the high and low prices for the Company's common stock during each fiscal quarter within the two most recent fiscal years.

Quarterly Common Stock Cash Dividends

Paid for the Quarter Ended	2011	2010
January	\$ 0.04	\$ 0.03
April	0.04	0.03
July	0.04	0.04
October	0.04	0.04
Total	\$ 0.16	\$ 0.14

Quarterly Common Stock Sales Price (High & Low Sales Price)

Quarter Ended	2011	2010
January	\$ 20.96	\$ 18.36
	16.17	14.22
April	21.62	19.82
	18.28	14.61
July	21.02	21.19
	14.09	16.13
October	16.04	18.65
	10.01	14.50

The terms of Quanex's revolving credit agreement do not specifically limit the total amount of dividends or other distributions to its shareholders. Dividends and other distributions are permitted so long as after giving effect to such dividend or stock repurchase, there is no event of default.

There were approximately 4,128 holders of Quanex Building Product's common stock (excluding individual participants in securities positions listings) on record as of December 9, 2011.

Table of Contents

The following graph compares the performance of the Company's common stock to the performance of the Standard & Poor's 500 Index (S&P 500), the Russell 2000 Index, and the Company's peer group.

Company Name / Index	INDEXED RETURNS				
	Base Period	Years Ending			
		10/31/08	10/31/09	10/31/10	10/31/11
Quanex	100	61.21	100.55	122.85	101.59

Peer Group	100	68.95	81.66	87.15	86.40

Quanex Building Products Corporation was initially listed and began trading on the New York Stock Exchange on April 24, 2008. The graph assumes \$100 invested on April 23, 2008 in Quanex Building Products Corporation common stock, in the S&P 500, Russell 2000 Index and in the Industry Peer Group. The companies included in the Industry Peer Group are: American Woodmark Corp, Apogee Enterprises Inc, Builders Firstsource, Drew Industries Inc, Eagle Materials Inc, Gibraltar Industries Inc, Griffon Corp, Louisiana-Pacific Corp, Simpson Manufacturing Inc, Trex Co Inc, and Universal Forest Prods Inc.

Table of Contents**Equity Compensation Plan Information**

The following table summarizes as of October 31, 2011 certain information regarding equity compensation to the Company's employees, officers, directors and other persons under equity compensation plans.

Equity Compensation Plan Information

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders	2,137,436	\$ 14.08	2,623,310
Issuer Purchases of Equity Securities			

On May 27, 2010, the Board of Directors approved a stock repurchase program that authorized the repurchase of 1.0 million shares of the Company's common stock, and on August 25, 2011, the Board of Directors authorized an additional 1.0 million shares to the program. Set forth below is a table summarizing the program and the repurchase of shares during the quarter ended October 31, 2011.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
August 1, 2011 thru August 31, 2011 ⁽²⁾	282,685	\$ 12.20	271,750	1,221,001
September 1, 2011 thru September 30, 2011	210,601	11.34	210,601	1,011,400
October 1, 2011 thru October 31, 2011	11,400	10.95	11,400	1,000,000
Total	504,686	\$ 11.81	493,751	1,000,000

⁽¹⁾ On May 27, 2010, the Board of Directors approved a stock repurchase program of 1.0 million shares, and on August 25, 2011, the Board of Directors authorized an additional 1.0 million shares to the program. The program does not have a dollar limit or an expiration date.

⁽²⁾ In August 2011, shares of 10,935 were surrendered to the Company by employees to satisfy individual tax withholding obligations upon vesting of previously issued shares of restricted stock awards. Average price paid per share reflects the closing price of Quanex stock on the business day the shares were surrendered by the employee stockholder to satisfy individual tax withholding.

Item 6. Selected Financial Data

The following selected consolidated financial data for the years ended October 31, 2007 through October 31, 2011 is derived from the Company's audited Consolidated Financial Statements. All periods have been adjusted on a retroactive basis to give effect to the Separation. Unless otherwise noted, all information in the table below reflects only continuing operations. The data set forth should be read in conjunction with the Company's Consolidated Financial Statements and accompanying notes to the Consolidated Financial Statements included in Item 8 of this Form 10-K. The historical information is not necessarily indicative of the results to be expected in the future.

Table of Contents

Glossary of Terms

The exact definitions of commonly used financial terms and ratios vary somewhat among different companies and investment analysts. The following list gives the definition of certain financial terms that are used in this report:

Asset turnover (continuing): Net sales divided by the average of beginning of year and end of year total assets excluding discontinued operations assets.

Conversion capital: Accounts receivable plus inventory less accounts payable.

Working capital (continuing): Current assets less current liabilities (both excluding discontinued operations).

Current ratio (continuing): Current assets divided by current liabilities (both excluding discontinued operations).

Continuing return on common stockholders' equity: Income from continuing operations attributable to common stockholders divided by the average of beginning of year and end of year common stockholders' equity.

Continuing return on investment: The sum of income from continuing operations and the after-tax effect of interest expense less capitalized interest divided by the sum of the beginning of year and end of year averages for short and long-term debt and stockholders' equity.

(1) In 2010, management closed its start-up facility in China due to the contraction of demand and the Company's ability to serve the overseas thin film solar panel market from its North American operations. During the second quarter of 2008, the Company spun off Quanex Corporation's Building Products business immediately followed by the merger of Quanex Corporation (consisting primarily of the Vehicular Products business and all non-Building Products related corporate accounts) with a wholly-owned subsidiary of Gerdau. Accordingly, the assets and liabilities of the start-up facility in China, the Vehicular Products business and all non-Building Products related corporate accounts are reported as discontinued operations in the Consolidated Balance Sheets for all periods presented, and their operating results are reported as discontinued operations in the Consolidated Statements of Income for all periods presented.

(2) On March 31, 2011, the Company acquired Edgetech, I.G. Inc. and its German subsidiary. Headquartered in Cambridge, Ohio, Edgetech has three manufacturing facilities (U.S., U.K. and Germany) that produce and market a full line of insulating glass spacer systems for window and door customers in North America and abroad. In March 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington. Accordingly, the estimated fair value of assets acquired in the acquisition and the results of operations are included in the Company's Consolidated Financial Statements as of the effective date of the acquisition.

Table of Contents

- (3) In February 2010, the Company completed a small acquisition which was effected through an asset purchase through a receivership proceeding and no liabilities were assumed. Accordingly, the estimated fair value of assets acquired in the acquisition and the results of operations are included in the Company's Consolidated Financial Statements as of the effective date of the acquisition.
- (4) Includes effects in fiscal 2009 of the Company's \$182.6 million (pretax) and \$141.4 million (after-tax) asset impairment charge in accordance with ASC Topic 350 and ASC Topic 360.
- (5) The quarterly common stock cash dividends prior to April 23, 2008 reflect dividends of Quanex Corporation prior to the Separation, while dividends after April 23, 2008 reflect dividends of Quanex Building Products, the accounting successor to Quanex Corporation.
- (6) Total assets include assets of discontinued operations of \$0.5 million, \$1.8 million, \$1.4 million, and \$742.3 million at October 31, 2010, 2009, 2008, and 2007, respectively.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations* **General**

The discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with the Selected Financial Data and the Consolidated Financial Statements of the Company and the accompanying notes.

Private Securities Litigation Reform Act

Certain of the statements contained in this document and in documents incorporated by reference herein, including those made under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. Generally, the words expect, believe, intend, estimate, anticipate, project, will and similar expressions identify forward-looking statements, which generally are not historical in nature. All statements which address future operating performance, events or developments that the Company expects or anticipates will occur in the future, including statements relating to volume, sales, operating income and earnings per share, and statements expressing general outlook about future operating results, are forward-looking statements. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from the Company's historical experience and the present projections or expectations. As and when made, management believes that these forward-looking statements are reasonable. However, caution should be taken not to place undue reliance on any such forward-looking statements since such statements speak only as of the date when made and there can be no assurance that such forward-looking statements will occur. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Factors exist that could cause the Company's actual results to differ materially from the expected results described in or underlying the Company's forward-looking statements. Such factors include domestic and international economic activity, prevailing prices of aluminum scrap and other raw material costs, the rate of change in prices for aluminum scrap, fluctuations in foreign currency exchange rates, energy costs, interest rates, construction delays, market conditions, particularly in the home building and remodeling markets, any material changes in purchases by the Company's principal customers, labor supply and relations, environmental regulations, changes in estimates of costs for known environmental remediation projects and situations, world-wide political stability and economic growth, the Company's successful implementation of its internal operating plans, acquisition strategies and integration, performance issues with key customers, suppliers and subcontractors, and regulatory changes and legal proceedings. Accordingly, there can be no assurance that the forward-looking statements contained herein will occur or that objectives will be achieved. All written and verbal forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by such factors. For more information, please see Item 1A, Risk Factors.

About Third-Party Information

In this report, the Company relies on and refers to information regarding industry data obtained from market research, publicly available information, industry publications, U.S. government sources and other third parties. Although the Company believes the information is reliable, it cannot guarantee the accuracy or completeness of the information and has not independently verified it.

Description of Business

The Company operates two businesses: Engineered Products and Aluminum Sheet Products. The Engineered Products business produces window and door components and products for OEMs that primarily serve residential construction and residential repair and remodel (R&R) markets. The Aluminum Sheet Products business produces mill finished and coated aluminum sheet serving the broader building and construction markets, as well as other transportation and capital goods markets.

Table of Contents

Prior to April 23, 2008, the Company also operated a Vehicular Products business which produced engineered steel bars for the light vehicle, heavy duty truck, agricultural, defense, capital goods, recreational and energy markets. The Separation occurred on April 23, 2008 through the spin-off of Quanex Corporation's building products business to its shareholders immediately followed by the merger of Quanex Corporation (consisting principally of the vehicular products business and all non-building products related corporate accounts) with a wholly-owned subsidiary of Gerdau S.A. (Gerdau). The spin-off and subsequent merger is hereafter referred to as the Separation. For purposes of describing the events related to the Separation, as well as other events, transactions and financial results of Quanex Corporation and its subsidiaries related to periods prior to April 23, 2008, the term the Company refers to Quanex Building Products Corporation's accounting predecessor, Quanex Corporation.

On March 31, 2011, the Company acquired Edgetech for \$104.4 million in an all cash transaction (net of cash acquired). Headquartered in Cambridge, Ohio, Edgetech has three manufacturing facilities located in the United States, the United Kingdom and Germany that produce a full line of warm-edge, dual seal insulating glass spacer systems for window and door customers in North America and abroad. Edgetech's products separate and seal double and triple pane glass within a window and act as a thermal barrier that enhances the window's energy efficiency. Edgetech is being integrated into the Engineered Products segment. Acquiring Edgetech allows the Company to better serve its growing base of national and regional customers and will further accelerate its international growth as Edgetech has a solid market presence overseas. In March 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington. In January 2011, management closed its facility located in The Dalles, Oregon. In November 2011, management committed to a plan to consolidate its Truseal and U.S. Edgetech operations. The consolidation plan, in part, calls for the permanent closing of the Company's Barbourville, Kentucky facility. The equipment used to manufacture the single seal spacer system will be relocated to Company's Cambridge, Ohio facility. The Company believes this consolidation will allow it to better serve customers through streamlined operations. The consolidation of operations and the subsequent closure of the Barbourville facility are expected to be completed during 2012.

In 2010, management closed its start-up facility in China due to the contraction of demand and the Company's ability to serve the overseas thin film solar panel market from its North American operations. Accordingly, the China assets and liabilities, results of operations and cash flows are reported as discontinued operations for all periods presented. Unless otherwise noted, all disclosures in the notes accompanying the Consolidated Financial Statements as well as all discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations reflect only continuing operations.

Table of Contents

(1) All periods presented exclude the operations of Truseal China, the vehicular products business and all non-building products related corporate accounts which are included in discontinued operations.

(2) Exclusive of items shown separately below.

Overview

Quanex outperformed in the face of difficult end markets in fiscal 2011. Prime window demand dropped to new lows in 2011 at an estimated 38.4 million units. While the first quarter of 2011 experienced demand pull-forward in advance of the \$1,500 window tax credit that expired on December 31, 2010, demand could be characterized as lackluster for the remainder of the fiscal year as the building and construction market did not experience a meaningful spring bounce as is typical as the year progresses. The 2011 figures include financial results from the Edgetech acquisition beginning in April 2011. Net sales increased in 2011 by \$50.0 million compared to the same period of last year of which \$53.4 million was driven by the Edgetech acquisition. Despite weak end markets, same store 2011 revenues from Engineered Products were slightly higher compared to 2010, supported by price increases and surcharges. Operating income for 2011 was \$20.8 million lower than the same period last year due to lower aluminum sheet shipments, higher maintenance costs at Aluminum Sheet Products, coupled with higher costs at Engineered Products associated with rationalizing operations, incremental sales and marketing costs as the Company invested in long-term organic growth initiatives, acquisition related costs, higher raw material costs and warranty expense.

Housing starts and window shipments have declined significantly in recent years from record highs in 2005 of 2.1 million and 70.5 million units, respectively, to an estimated 0.6 million and 38.4 million, respectively, in 2011. The following table sets forth the annual calendar year market information from the 2005 peak to the current 2011 estimates:

	Housing Starts ⁽¹⁾		Window Shipments ⁽²⁾	
	Starts (millions)	% Change	Shipments (millions)	% Change
2005	2.1		70.5	
2006	1.8	(12.6)%	66.7	(5.4)%
2007	1.3	(25.9)%	59.1	(11.4)%
2008	0.9	(32.6)%	48.4	(18.1)%
2009	0.6	(39.0)%	38.9	(19.6)%
2010	0.6	6.2%	41.6	6.9%
2011E	0.6	2.4%	38.4	(7.7)%

(1) As published by the National Association of Home Builders.

(2) As published by Ducker Worldwide.

While the condition of the Company's primary end markets found new lows, the Company continues to demonstrate an ability to outperform the market by developing new products, securing price realization, and from the benefits of longstanding relationships with leading customers who the Company believes continued to grow share. The Company took steps in fiscal 2011 to invest in the long-term growth of the business with the acquisition of Edgetech and consolidation of several facilities. As a direct result of the strengths of Edgetech, the Company reorganized the sales, marketing, customer service and technical services functions for Engineered Products into an organization that is best equipped to support our customers and to provide industry-leading customer service in addition to allowing for streamlined integration of future acquisitions. All of these activities contributed costs during the year for which the benefits will be realized in future periods. Aluminum Sheet Products experienced a drop in demand as customers moved to take out much of the inventory restocking that took place in 2010 as the building and construction market failed to bounce in the spring as many had expected.

Fiscal 2010 showed early signs of a potential recovery with fiscal year housing starts increasing 6.1% over 2009. The Company outperformed the market with Engineered Products increasing sales 11.7% for the same comparative

Table of Contents

period. Additionally, the Aluminum Sheet Products business benefited in 2010 from inventory re-building, industry capacity reductions and market share gains in 2010 following a weak 2009. All of these factors, coupled with a continuous focus on controllable internal factors and the financial position of the Company, resulted in the Company not only performing relatively well in difficult times, but positioning it to gain additional market share even as end market conditions remain difficult.

End market conditions in the first half of fiscal year 2009 were extremely difficult, driven by the collapse of the housing market along with a collapse of aluminum prices to an inflation adjusted record low. With markets still depressed, the Company saw a sales improvement in the second half of 2009 due to a better than expected seasonal pickup in the building season. Despite the difficult economic challenges in 2009 and its resulting pressure on sales volume, Quanex produced respectable cash generation in 2009, the result of significant improvements in working capital, a focus on cost controls, lean initiatives and price realization. In 2010, each quarter's sales were higher than the comparative 2009 quarter. The Company's net sales increased by \$213 million or 37% in fiscal 2010 compared to fiscal 2009. Quanex continued to not only keep, but win new business on the strength of its value proposition and solid execution. Additionally, the Company's focus on price realization and vigilant focus on flexing the operations to demand are evident in its financial results and margins. The strong performance at the Aluminum Sheet Products segment contributed \$176 million to the net sales increase for the year as the segment experienced exceptionally strong shipments complimented by an increase in average selling prices.

The Company continues to believe that consumer demand for more energy efficient products and its ability to provide innovative window and door systems, in addition to stand-alone components, along with new sales and marketing efforts targeted at national and regional OEM customers, will help fuel its long-term organic growth even as the housing market continues to experience hardship. Demographics for long-term housing demand in the U.S. remain favorable when factoring the projected population increase and continuing immigration. The Company believes taking a disciplined approach to the way it seeks new business opportunities will make it a more successful company and a stronger competitor by offering a broader range of customers a more robust slate of systems, products and services. Additionally, the Company is elevating its programs to develop more energy efficient products as well as a strong focus on achieving the highest level of customer service in the industry. These programs and initiatives, coupled with an eventual return to a more normal housing market, will benefit Quanex over the long term.

In addition to the negative impact weaker markets have had on the Company's net sales and operating income, the Company incurred impairments of its goodwill, and to a lesser extent, its other intangible assets in fiscal 2009 of \$182.6 million. For additional information on the impairment charges see Note 4, Goodwill and Acquired Intangible Assets, in the Notes to Consolidated Financial Statements in Item 8 of this Form 10-K.

Business Segments

Business segments are reported in accordance with ASC Topic 280 *Segment Reporting* (ASC 280). ASC 280 requires that the Company disclose certain information about its operating segments, where operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker (CODM) in deciding how to allocate resources and in assessing performance. Generally, financial information is required to be reported on the basis that it is used internally for evaluating segment performance and deciding how to allocate resources to segments.

Quanex has two reportable segments: Engineered Products and Aluminum Sheet Products. The Engineered Products segment produces systems, finished products, and components serving the OEM residential window and door industry, while the Aluminum Sheet Products segment produces mill finished and coated aluminum sheet serving the broader building and construction markets. The primary market drivers of both segments are residential repair and remodel activity (R&R) and new home construction.

Table of Contents

For financial reporting purposes, four of the Company's five operating segments, Homeshield, Truseal, Edgetech and Mikron, have been aggregated into the Engineered Products reportable segment. The remaining operating segment, Aluminum Sheet Products (Nichols Aluminum), is reported as a separate reportable segment. Corporate & Other is comprised of corporate office expenses and certain inter-division eliminations. The sale of products between segments is recognized at market prices. The financial performance of the operations is based upon operating income. The segments follow the accounting principles described in the Summary of Significant Accounting Principles, see Item 8, Note 1. The two reportable segments value inventory on a FIFO or weighted-average basis while the LIFO reserve relating to those operations accounted for under the LIFO method of inventory valuation is computed on a consolidated basis in a single pool and treated as a corporate item.

Engineered Products Three Years Ended October 31, 2011

The following table sets forth selected operating data for the Engineered Products segment:

	Years Ended October 31, (Dollars in millions)			% Change	
	2011	2010	2009	2011	2010 vs.
				vs. 2010	2009

⁽¹⁾ Exclusive of items shown separately below.

** Percentage of change not meaningful.

Since Quanex's acquisition of Edgetech on March 31, 2011, Edgetech generated \$53.4 million in Net sales and is the primary reason Net sales for 2011 exceeded the prior year 2010 period. Engineered Products' same store Net sales were essentially flat despite difficult end markets. Engineered Products compares its sales to U.S. window shipments as reported by Ducker Worldwide, a market intelligence firm. For the twelve months ended October 31, 2011, Engineered Products' Net sales before contributions from acquisitions were up 0.3% compared to the previous twelve months, versus U.S. window shipments that were down approximately 8%.

The Company's Engineered Products business outperformed the market in fiscal 2010 with net sales up 12% in 2010. Comparatively, the Company's market drivers were essentially flat at an estimated 0.7% increase on a combined basis in fiscal 2010 compared to fiscal 2009. The Engineered Products business experienced healthy growth, especially from R&R activity, market share gains by customers and new products. The growth this year further illustrates the logic of the segment's continued emphasis to gain share in the more active residential R&R market. The Company continues to keep and win new business on the strength of the value proposition of its highly engineered window and door products. The Company believes that programs like the expired \$8,000 first time homebuyers' tax credit, the \$1,500 tax credit for energy efficient windows, which expired at the end of December 2010, and customer restocking in the first half of the year benefited results in 2010. As anticipated by the Company, its demand slowed mid-way through 2010, which reflected the residential building and construction market peaking earlier in 2010 than is typical.

Net sales less Cost of sales (Contribution margin) at Engineered Products for 2011 compared to the same period of last year improved by \$11.9 million including Edgetech's contribution of \$13.4 million. Net sales less Cost of sales as a percent of Net sales for the year ended October 31, 2011 are slightly below the same 2010 period due to higher raw material costs and temporary increases in labor expense as the Company used overtime to meet a hike in orders in November and December; additionally, the first fiscal quarter of 2010 benefited from

⁽²⁾ Calculated using data from external sources: National Association of Home Builders (NAHB) for new home starts and Harvard University's Joint Center for Housing Studies for repair and remodeling expenditures.

Table of Contents

hourly labor savings associated with the strike at the segment's Barbourville, Kentucky facility in mid-December 2009. Although Engineered Products experienced higher raw material costs in 2011, these higher costs were generally offset by higher prices, surcharges, cost controls and productivity improvements, which strengthened margins. Truseal, one of the Company's warm-edge, insulating glass spacer divisions, initiated an oil based raw material surcharge effective May 1, 2011. The surcharge helped Truseal offset the rising cost of butyl, a key raw material of the business and highly correlated to the price of oil. Further reducing margins during 2011 was \$2.8 million of costs associated with plant consolidations and closings as the Company rationalized production facilities. The Company finished the building consolidation project at its facility in Kent, Washington where four buildings have been consolidated to one, and the Company closed a facility in The Dalles, Oregon. Of the \$2.8 million in plant consolidation costs, \$1.3 million is recognized in Cost of sales. During 2011, \$1.9 million of expense was recognized in Cost of sales to increase the warranty reserve associated with a discontinued legacy product and claims from some years ago. Because the establishment of the warranty reserve is an inherently uncertain process involving estimates of the number of future claims and the cost to settle claims, the Company's ultimate losses may differ from the warranty reserve and future adjustments to the reserve may be necessary. Finally, 2011 results were negatively impacted by \$1.9 million of additional non-cash Cost of goods sold during 2011, due to the increased value of inventory sold from applying purchase accounting to the Edgetech inventory acquired. Of the initial \$2.0 million increase in inventory value from applying purchase accounting, the Company expects the remaining \$0.1 million balance to be recognized in 2012.

Net sales less cost of sales for fiscal 2010 compared to fiscal 2009 increased by \$14.7 million or 18.6% due to increased volume and higher average selling prices. The Company took the necessary actions to right-size its business by reducing variable and fixed costs and continuously sizes its operations to match demand. Net sales less cost of sales as a percent of net sales increased from fiscal 2008 to fiscal 2010 as a direct result of the Company's right-sizing efforts and price realization. In the first fiscal quarter of 2010, the Company had hourly labor savings associated with the strike at the segment's Barbourville, Kentucky facility in mid December 2009 as the then effective labor contract expired without the parties having reached a new agreement. In January 2010, the strike ended upon ratification of a new three-year collective bargaining agreement. The Barbourville facility was able to continue production with the Company's non-union salaried workforce and continued to deliver its products during the strike to meet customer demands. Benefiting the comparative 2010 and 2009 results is an expense of \$1.0 million recorded in fiscal 2009 related to a Truseal warranty reserve increase driven by an increase in a legacy product's claims experience. Reducing margins in fiscal 2010 were costs associated with vacating a couple of buildings at the Company's Mikron facility in Kent, Washington and higher material costs at Truseal. At Truseal, the business uses an oil based butyl compound in its insulating glass sealant systems, and with the rise in oil prices, margins were squeezed in 2010. In response, Truseal announced a price increase effective November 15, 2010.

Selling, general and administrative costs increased for the 2011 year from the acquisition of Edgetech which reported \$9.0 million of Selling, general and administrative costs for 2011. Additionally, the increase in Selling, general and administrative costs for the year were attributable to \$1.1 million (included in the total \$2.8 million discussed above) of costs associated with the aforementioned plant consolidations and closing during the first fiscal quarter of 2011. The majority of the \$1.1 million represents an estimated liability to terminate a facility operating lease; this estimated liability is net of an associated sublease benefit. Furthermore, Engineered Products incurred additional sales and marketing expenses of \$1.8 million in 2011 associated with the roll out of new products and programs and increasing resources necessary to achieve long-term organic growth, with a focus on expanding further into the regional segment of the residential market. Benefiting the comparative 2011 results is \$1.0 million of costs associated with the aforementioned strike in mid December 2009 (partially offset by the direct labor savings in Cost of sales) as well as reduced incentives corresponding to lower earnings.

The \$5.7 million or 17% increase in Selling, general and administrative costs in fiscal 2010 compared to fiscal 2009 was partially attributable to \$1.0 million of costs associated with the aforementioned strike in mid December 2009 (partially offset by the direct labor savings in Cost of sales). Also, variable pay incentives increased in 2010 corresponding to an increased level of earnings. Furthermore, the Company began to incur additional sales and marketing expenses associated with the roll out of new products and programs in 2010. This

Table of Contents

increase was partially offset by cost control efforts put in place in 2009 and the absence of matching contributions to the Quanex Building Products Salaried and Non-Union Employee 401(k) Plan in the first quarter 2010 as that program was suspended as of April 1, 2009. The matching contributions on this 401(k) Plan were reinstated effective February 1, 2010.

The Company recorded a \$1.6 million non-cash asset impairment charge on its Barbourville, Kentucky real property during the fourth quarter of fiscal 2011 related to its plan to consolidate its insulating glass operations. See further discussion of this topic below. The \$162.2 million non-cash impairment charge reflected in 2009 represents \$11.9 million of impairment on acquired intangible assets and \$150.3 million of impairment charge on goodwill. For additional information on the intangible impairment charges see Note 4, Goodwill and Acquired Intangible Assets, in the Notes to Consolidated Financial Statements in Item 8 of this Form 10-K.

Depreciation and amortization has increased in 2011 compared to 2010 primarily due to the acquisition of Edgetech on March 31, 2011. Depreciation and amortization associated with Edgetech was \$4.8 million (seven months) for fiscal 2011. In addition, depreciation and amortization increased for the year in 2011 by \$0.3 million (included in the total \$2.8 million discussed above) for accelerated depreciation related to the plant consolidations. Depreciation and amortization for the full fiscal year of 2012 is expected to increase over fiscal 2011 due to a full twelve months of expense from the Edgetech acquisition being realized going forward. Depreciation and amortization declined from 2009 to 2010 due to the aforementioned intangible asset impairment (other than goodwill) in the first fiscal quarter of 2009. Additionally, depreciation declined in 2010 compared to 2009 due to the completion of depreciation on assets acquired in an acquisition in a previous year.

Operating income for fiscal 2011 was down by \$4.0 million of which \$0.3 million is attributable to the Edgetech operating loss since acquisition in 2011. Operating income for the remaining Engineered Products businesses for fiscal 2011 was below prior year levels primarily due to weak end markets and rising material costs as well as negative impacts from current year costs to consolidate facilities, warranty expense associated with legacy products and incremental sales and marketing investment to support Engineered Products organic growth initiatives. The fiscal 2011 Edgetech operating loss was driven by production start up costs at its Germany facility as well as inventory step up expenses from acquisition accounting. Operating income for fiscal 2010 was higher than fiscal 2009 primarily due to the absence of the goodwill and intangible asset impairment charge recognized in 2009 as well as higher volumes, increases in average selling prices and right sizing efforts.

Engineered Products long-term organic growth programs are focused on driving profitable growth through one sales and marketing team, coupled with the engineering collaboration of its family of businesses: Mikron, Truseal and Homeshield (and as of March 31, 2011, Edgetech). The Company believes these programs will drive profitable growth at Engineered Products by furthering the goal of becoming the leading energy efficient expert in the market by offering customers state-of-the-art engineering, design and marketing support. The organic growth programs were formalized and launched in March 2010 and are comprised of related initiatives to execute this strategy; the sales, marketing and engineering efforts of these divisions operated independently in the past. Today, Engineered Products sales and marketing employees have been organized into a single team to better utilize their combined capabilities to expand sales opportunities to the existing customer base. Additionally, the new sales and marketing structure is focused on developing and capturing more mid-sized regional OEM business. Mid-sized regional OEMs, a customer class Engineered Products has historically underserved, are believed to comprise about 60% of the market. The engineering resources across Engineered Products are also working together to develop products and systems that provide customers with the latest innovations in technology and energy efficiency. Engineered Products is in the early stages of this long-term organic growth initiative but believes it will have a meaningful impact on its long-term growth and profitability. The Company will continue to incur expenses and to invest in additional resources at Engineered Products to support this organic growth effort.

In addition to the long-term organic growth programs, Engineered Products management also plans to foster operational synergies among existing plants. In November 2011, management committed to a plan to consolidate its Truseal and U.S. Edgetech warm-edge spacer operations. The consolidation plan, in part, calls for the

Table of Contents

permanent closing of its manufacturing facility in Barbourville, Kentucky. The Company will incur various costs and future expenditures associated with the consolidation, including but not limited to termination costs and asset relocation costs. The equipment used to manufacture the single seal spacer system will be relocated to the Company's Cambridge, Ohio facility. The Company believes this consolidation will also allow it to better serve customers through streamlined operations. The consolidation of operations and the subsequent closure of the Barbourville facility are expected to be completed in 2012. Under ASC Topic 712, *Compensation - Nonretirement Postemployment Benefits*, the Company is required to record charges for contractual termination benefits when it is probable that employees will be entitled to benefits under the contract's terms and the amount can be reasonably estimated. Under ASC Topic 420, *Exit or Disposal Cost Obligations*, the Company is required to record charges for one-time employee termination benefits, contract termination costs, and other associated costs as incurred. No exit costs or termination benefits were incurred as of October 31, 2011, and as such no liability has been accrued for the Barbourville closing as of October 31, 2011. While discussions with the plant's employee union are in process the total expense expected to be incurred in connection with the closure of Barbourville is \$9 million over the next 12 months, based upon management's best estimate of future events. Of the estimated charges, approximately 60% is related to relocating and starting up the equipment in Cambridge and approximately 40% is associated with salaried and hourly employee termination related costs. In addition, management estimates spending of approximately \$7 million to prepare the Cambridge, Ohio facility for the new operations activity, of which approximately 80% is expected to be capitalized and approximately 20% expensed. Changes to management's estimates may occur. The costs related to the closure, severance and relocation activities will be recorded as incurred, when they meet the definition of a liability, and they will be included in the statements of operations as selling, general, and administrative expenses or as cost of sales, in accordance with the applicable accounting guidance. After the consolidation is complete in 2012, the Company expects annual pre-tax operating savings of approximately \$9 million.

Aluminum Sheet Products - Three Years Ended October 31, 2011

The following table sets forth selected operating data for the Aluminum Sheet Products segment:

	Years Ended October 31, (Dollars in millions)			% Change	
	2011	2010	2009	2011	2010 vs.
				vs. 2010	2009
Net sales	\$ 440.5	\$ 449.5	\$ 273.7	(2.0)%	64.2%
Cost of sales ⁽¹⁾	406.8	401.1	264.1	1.4	51.9
Selling, general and administrative	8.1	9.9	6.6	(18.2)	50.0
Asset impairment charges			20.4		(100.0)
Depreciation and amortization	8.5	8.3	9.0	2.4	(7.8)
Operating income (loss)	\$ 17.1	\$ 30.2	\$ (26.4)	(43.4)%	(214.4)%
Operating income (loss) margin	3.9%	6.7%	(9.6)%	(2.8)%	**
Shipped pounds	277.3	322.6	223.0	(14.0)%	44.6%

⁽¹⁾ Exclusive of items shown separately below.

** Percentage change not meaningful due to impairment of goodwill.

The primary market drivers for the Aluminum Sheet Products segment are residential repair and remodel activity and new home construction (together approximately 70% of the segment's sales) and transportation (approximately 20% of the segment's sales) markets.

Net sales were negatively impacted by a decline in shipped pounds of 14.0% for the 2011 year compared to the same period of 2010 due to weaker demand for building and construction sheet. The Aluminum Association, which tracks aluminum industry shipments of sheet products, reported non-can sheet aluminum shipments for year-to-date October up 2% from a year ago, while Aluminum Sheet Products' shipments were down 14.0%. Part of the Company's underperformance versus the industry can be attributed to relatively weaker building and construction demand, where Nichols has a sizable presence, compared to stronger distribution and transportation demand, where Nichols has a relatively smaller presence. This decrease in Net sales at the Aluminum Sheet Products segment for 2011 was partially offset by a 14.0% increase in average selling price per pound compared

Table of Contents

to 2010. Average selling price increased primarily due to higher London Metal Exchange (LME) aluminum prices in the comparative period. LME aluminum prices are the most commonly used index for correlating aluminum sheet prices.

The \$175.8 million or 64.2% increase in Net sales at the Aluminum Sheet Products segment in fiscal 2010 compared to fiscal 2009 was primarily the result of a 44.6% increase in shipped pounds during the period compared to the same period of 2009 and to a lesser extent an increase in average selling price per pound of 13.5%. The Aluminum Association reported U.S. demand for the type of aluminum sheet the Company sells was up 24% in 2010 while the segment's 2010 shipments were up 44.6%. Additionally, shipped pounds in fiscal 2010 were the best since 2006. The business was effectively sold out in the second half of fiscal 2010. The segment's ability to outperform the market was due to a reduction in overall industry capacity coupled with solid execution at the business that included its continued success in keeping market share gains over the last twelve months. Average selling price increased primarily due to higher London Metal Exchange (LME) aluminum prices, partially offset by product mix.

Selling, general and administrative costs decreased by \$1.8 million for 2011 compared to 2010. The decrease in expense is primarily due to a \$1.0 million expense in 2010 associated with the discontinuation of a new Microsoft Dynamics AX enterprise resource planning system for the segment, a \$0.8 million decline in environmental related expense, and to a lesser extent a decrease in variable pay incentives associated with a lower level of earnings in 2011. For additional information on the environmental reserve, see Note 16, Contingencies in the Notes to Consolidated Financial Statements in Item 8 of this Form 10-K. Selling, general and administrative costs increased by \$3.3 million in fiscal 2010 compared to fiscal 2009. The increase was primarily due to a \$1.1 million increase in an existing environmental reserve, a \$1.0 million expense associated with the discontinuation of development of a new Microsoft Dynamics AX enterprise resource planning system and to a lesser extent an increase in variable pay incentives associated with higher level of earnings.

The \$20.4 million non-cash impairment charge reflected in the 2009 results represents the write-off of all of the segment's goodwill. For additional information on the goodwill impairment charge see Note 4, Goodwill and Acquired Intangible Assets, in the Notes to Consolidated Financial Statements in Item 8 of this Form 10-K. Depreciation and amortization declined in fiscal 2010 compared to 2009 as 2009 included accelerated depreciation from a premature equipment failure during the 2009 first fiscal quarter.

Operating income decreased at the Aluminum Sheet Products segment for 2011, compared to prior year due to lower shipped pounds and to a lesser extent lower painted sales. The Aluminum Sheet Products segment is a high fixed cost business, so as shipments drop due to weaker demand, its ability to substantially reduce operating costs is limited. Operating income was further impacted by high repair and maintenance expenses and to a lesser extent by higher energy costs and higher freight costs. Repair and maintenance expense in 2011 increased by \$3.8 million over the same 2010 period in part due to projects that were previously deferred in prior years. The Company believes that repairs and maintenance will not remain at 2011 levels, and expects future repair and maintenance expenditures to be more in line with 2010. This decline in operating income was partially offset by an 8.6% increase in spread (sales price less material costs). The higher spread compared to the previous year was primarily a result of higher aluminum prices that rose faster than material costs. The segment's operating income and margins are impacted by changes in LME aluminum prices as its spread is correlated with aluminum prices over time. Declines in aluminum prices generally result in spread compression; however, as aluminum prices rebound, spread and profits generally expand.

Operating income increased at the Aluminum Sheet Products segment in fiscal 2010 compared to 2009 due in part to the absence of an impairment charge in 2010. Additionally, operating income increased as a result of substantially higher shipments as well as an increase in spreads (sales price less material costs divided by pounds) of 12.1%. The Aluminum Sheet Products' operating income and margins are impacted by changes in LME aluminum prices as its material spread is correlated with aluminum prices over time. The increase in average LME aluminum prices in fiscal 2010 compared to fiscal 2009 of 29% is the primary driver to the

Table of Contents

Company's 12.1% increase in spread. However, spreads remained constrained in 2010 due to ongoing tightness in the aluminum scrap market, particularly in the availability of industrial grade scrap due to reduced industrial production.

Corporate and Other Three Years Ended October 31, 2011

	Years Ended October 31, (Dollars in millions)			\$ Change	
	2011	2010	2009	2011 vs. 2010	vs. 2009
Net sales	\$ (12.5)	\$ (12.3)	\$ (12.0)	\$ (0.2)	\$ (0.3)
Cost of sales ⁽¹⁾	(9.6)	(8.0)	(19.5)	(1.6)	11.5
Selling, general and administrative	27.9	22.8	19.6	5.1	3.2
Depreciation and amortization	0.1	0.1	0.1		
Operating income (loss)	\$ (30.9)	\$ (27.2)	\$ (12.2)	\$ (3.7)	\$ (15.0)

⁽¹⁾ Exclusive of items shown separately below.

Corporate and Other operating expenses, which are not in the segments mentioned above, include inter-segment eliminations, the consolidated LIFO inventory adjustments (calculated on a combined pool basis), and corporate office expenses. Net sales amounts represent intersegment eliminations between the Engineered Products segment and the Aluminum Sheet Products segment with an equal and offsetting elimination in Cost of sales. LIFO adjustments are reported in Corporate Cost of sales. The Company incurred LIFO expense of \$2.3 million and \$3.8 million in fiscal 2011 and fiscal year 2010, respectively, compared to LIFO income of \$7.8 million in fiscal 2009. LIFO expense was incurred in fiscal 2011 and 2010 primarily due to a rise in pricing of aluminum based inventory held by the Company at year-end while the 2009 income was primarily due to a reduction in aluminum scrap values held by the Company. Fluctuations associated with the LIFO inventory adjustment comprise a majority of the change from year to year in the Corporate and Other Net sales less Cost of sales.

Selling, general and administrative costs increased by \$5.1 million for fiscal 2011 over fiscal 2010. The single largest reason for the increase is \$4.1 million of transaction and integration related costs associated with the acquisition of Edgetech during fiscal 2011. Also increasing Selling, general and administrative costs are those costs associated with the development and rollout of a company-wide ERP system. The Company initiated this ERP project (Project Quest) in March 2011 to support the drive for long-term organic growth by bringing the myriad of disparate systems currently existing throughout the Company together into a single standard system supported by a common set of processes. During fiscal 2011, the Company recognized \$1.5 million of Project Quest expense and expects an increase of expense to approximately \$2.5 million in fiscal 2012 primarily due to a full twelve months of activity in 2012 as well as the initial conversions of the legacy systems. The current plan anticipates the conversion of all of the Company's disparate systems to a single system over a period of at least three years. Additionally, as the new ERP system is placed in service the Company expects depreciation expense to increase. Fiscal 2011 Selling, general, and administrative expense includes a \$1.0 million increase in estimated workers compensation self-insurance reserves partially associated with higher open claims with limited development experience. Selling, general and administrative costs in 2011 also reflect various other programs including lean six sigma employee training that the Company believes will result in future cost savings. Partially offsetting these increases was a \$1.5 million decline during fiscal 2011 in mark-to-market expense associated with the deferred compensation plan reflecting the decrease in the Company's stock price as well as the market value of other investments held by the deferred compensation plan during the 2011 period. As of October 31, 2011, approximately 47% of the deferred compensation plan balance was indexed to the Company's stock price, and the Quanex stock price decreased by \$3.27 per share during fiscal 2011 compared to an increase of \$3.15 per share during fiscal 2010. Additionally, Selling, general and administrative costs have declined in 2011 from lower estimated variable pay incentive costs corresponding to the Company's lower earnings.

Table of Contents

Selling, general and administrative costs in fiscal 2010 increased by \$3.2 million over fiscal 2009 primarily due to \$3.3 million higher variable pay incentive costs corresponding to the Company's higher operating earnings and return on invested capital and to a lesser extent higher stock-based compensation expense. Stock-based compensation expense increased \$1.0 million as the Company added layers of vesting awards with each annual grant since the Company's Separation in 2008; the Company's stock option and restricted stock awards typically have three-year vesting periods. Partially offsetting these increases was a \$0.8 million year over year decline in the mark-to-market expense associated with the deferred compensation plan. During fiscal 2010, the market value of the investments held by the deferred compensation plan on average increased less during the 2010 period compared to the increase in market value during the same 2009 period. As of October 31, 2010, approximately 65% of the deferred compensation plan balance was indexed to the Company's stock price, and the Quanex stock price increased by \$3.15 per share during fiscal 2010 compared to an increase of \$5.71 per share during fiscal 2009.

Other Items Three Years Ended October 31, 2011

Interest expense for fiscal 2011 was \$0.4 million compared to \$0.4 million in fiscal 2010 and \$0.5 million in fiscal 2009. No amounts were borrowed against the revolving credit facility during fiscal 2011, 2010, or 2009.

Other, net typically includes interest income earned on the Company's cash and equivalents, changes associated with the cash surrender value of life insurance, and beginning with the acquisition of Edgetech in April 2011 foreign currency transaction gains and losses. Other, net for fiscal 2011 was a loss of \$0.5 million compared to income of \$2.6 million in fiscal 2010 and income of \$0.4 million in fiscal 2009. During fiscal 2011, the Company incurred \$0.9 million of transaction losses which are included in determining net income primarily related to Edgetech's international operations and foreign currency denominated receivables. There are no transaction gains or losses during the fiscal 2010 or 2009. Other, net for fiscal 2010 includes the recognition of a \$0.9 million gain on involuntary conversion of a non-monetary asset related to the May 2009 tornado that struck and damaged the Company's Mikron facility in Richmond, Kentucky. Additionally, fiscal 2010 includes a \$1.3 million bargain purchase gain related to an acquisition during the second fiscal quarter of 2010. In February 2010, the Company completed a small acquisition for approximately \$1.6 million in consideration. This operation has been integrated into one of its existing Engineered Products businesses. The acquisition was effected through an asset purchase through a receivership proceeding and no liabilities were assumed. ASC 805 *Business Combinations* requires that a gain be recorded when the fair value of the net assets acquired is greater than the fair value of the consideration transferred. Though uncommon, bargain purchases can occur because of underpayments for the business acquired due to a forced liquidation or distress sale. As such, the Company obtained the assets at a bargain and recognized a gain of approximately \$1.3 million in Other, net.

The Company's annual effective tax rate for fiscal 2011 was 41.5% compared to 38.7% in fiscal 2010 and 24.0% in fiscal 2009. The effective rate in 2011 increased primarily due to nondeductible transaction costs in 2011 and the mix of domestic and foreign results partially offset by general business credits. The effective tax rate benefit for 2009 was unusually low primarily due to the nondeductible portion of the goodwill impairment charge in the fiscal year. For further discussion of the goodwill impairment charge see Note 4, Goodwill and Acquired Intangible Assets, in Notes to Consolidated Financial Statements in Item 8 of this Form 10-K.

Income from discontinued operations, net of tax was \$12 thousand for fiscal 2011 and a loss of \$1.1 million and \$1.0 million for fiscal 2010 and 2009, respectively, and represents the results of the Truseal China business.

Liquidity and Capital Resources

Sources of Funds

The Company's principal sources of funds are cash on hand, cash flow from operations, and borrowings under its \$270.0 million Senior Unsecured Revolving Credit Facility (the Credit Facility). As of October 31, 2011, the Company has a solid liquidity position, comprised of cash and equivalents and adequate availability

Table of Contents

under the Company's Credit Facility. The Company has \$89.6 million of cash and equivalents, \$188.3 million of current availability under the revolving credit facility and minimal debt of \$1.7 million as of October 31, 2011. The Company grew its cash and equivalents balance steadily since its spin-off from Quanex Corporation in April 2008, throughout 2009 and 2010 from \$40.5 million as of April 30, 2008 to \$123.5 million at October 31, 2009 and to \$187.2 million at October 31, 2010. In a very weak year, Quanex was able to grow its cash balance in 2010 ending the year with \$187.2 million, a \$63.7 million increase over 2009. Cash equivalents at October 31, 2011 were reduced primarily due to \$110.8 million of cash paid (net of cash acquired) for the acquisition of Edgetech and JELD-WEN's vinyl extrusion assets in Yakima, Washington (Yakima). The Company's strategy for cash uses is to make strategic acquisitions that fit its fenestration vision, invest in organic growth opportunities, fund the cash dividend and make ongoing purchases of Quanex stock.

The Company's excess cash and equivalents are invested only in large, overnight money market funds due to the conditions of the financial market. The funds are diversified by security type across Treasuries, Government Agencies and Prime Corporate. These funds are all AAA-rated, approved by the NAIC and compliant with Rule 2A-7 of the Investment Company Act of 1940. The Company's current investments are diversified across multiple institutions that the Company believes to be financially sound. The Company intends to remain in highly rated money market funds, financial institutions and treasuries following a prudent investment philosophy. From time to time, to prepare for potential disruption in the money markets, the Company may temporarily move funds into operating bank accounts of highly-rated financial institutions to meet on-going operational liquidity requirements. The Company had no material losses on its cash and marketable securities.

The Credit Facility was executed on April 23, 2008 and has a five-year term. Proceeds from the Credit Facility may be used to provide availability for acquisitions, working capital, capital expenditures, and general corporate purposes. Borrowings under the Credit Facility bear interest at a spread above LIBOR based on a combined leverage and ratings grid. There are certain limitations on additional indebtedness, asset or equity sales, and acquisitions. Dividends and other distributions are permitted so long as after giving effect to such dividend or stock repurchase, there is no event of default. Under the Credit Facility, the Company is obligated to comply with certain financial covenants requiring the Company to maintain a Consolidated Leverage Ratio of no more than 3.25 to 1 and a Consolidated Interest Coverage Ratio of no less than 3.00 to 1. As defined by the indenture, the Consolidated Leverage Ratio is the ratio of consolidated indebtedness as of such date to consolidated EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) for the previous four fiscal quarters, and the Consolidated Interest Coverage Ratio is the ratio of consolidated EBITDA to consolidated interest expense, in each case for the previous four consecutive fiscal quarters. EBITDA is defined by the indenture to include proforma EBITDA of acquisitions and to exclude certain items like goodwill and intangible asset impairments and certain other non-cash charges and non-recurring items. The availability under the Credit Facility is a function of both the facility amount utilized and meeting covenant requirements. Additionally, the availability of the Credit Facility is dependent upon the financial viability of the Company's lenders. The Credit Facility is funded by a syndicate of nine banks, with three banks comprising over 55% of the commitment. If any of the banks in the syndicate were unable to perform on their commitments to fund the facility, the availability under the Credit Facility could be reduced; however, the Company has no reason to believe that such liquidity will be unavailable or decreased.

As of October 31, 2011, the Company had no borrowings under the Credit Facility, and the Company was in compliance with all Credit Facility covenants as seen by the table below:

At October 31, 2011	Required	Actual
Consolidated Interest Coverage Ratio	No less than 3.00 to 1	134.43 to 1
Consolidated Leverage Ratio	No more than 3.25 to 1	0.13 to 1

Although there were no borrowings on the Credit Facility and there was only \$5.2 million of outstanding letters of credit under the Credit Facility, the aggregate availability under the Credit Facility was limited by the Consolidated Leverage Ratio resulting in an availability of \$188.3 million at October 31, 2011. Because the

Table of Contents

Consolidated Leverage Ratio is based on a rolling twelve months of EBITDA, a change in future earnings will impact the amount available under the Credit Facility in future quarters, absent any pro-forma EBITDA benefit from any potential acquisitions. To have access to the full availability of the \$270.0 million Credit Facility, the Company must have a minimum rolling EBITDA of \$84 million for the previous four fiscal quarters. Actual rolling EBITDA for the previous four fiscal quarters was \$60.4 million as of October 31, 2011. Increased earnings for any future periods could increase availability under the Credit Facility; conversely, reduced earnings for any future periods could adversely impact the amount available under the Credit Facility in future quarters, absent any pro-forma EBITDA benefit from any potential acquisitions.

The Company believes that it has sufficient funds and adequate financial resources available to meet its anticipated liquidity needs. The Company also believes that cash balances and cash flow from operations will be sufficient in the next twelve months and foreseeable future to finance anticipated working capital requirements, capital expenditures, debt service requirements, environmental expenditures, and dividends.

The Company's working capital was \$140.3 million on October 31, 2011 compared to \$223.8 million on October 31, 2010. Working capital declined by \$83.5 million primarily from the \$101.9 million impact of the acquisitions of Edgetech and Yakima, representing \$110.8 million in cash paid for these acquisitions (net of cash acquired) and \$8.9 million increase from working capital acquired. Partially offsetting this decline was a decline in accrued liabilities primarily attributable to lower annual incentive accruals as of October 31, 2011 compared to October 31, 2010 as well as a general increase in cash and equivalents after taking into account cash spent on the aforementioned acquisitions. Conversion capital (accounts receivable plus inventory less accounts payable) was relatively flat October 31, 2011 compared to October 31, 2010 after considering conversion capital increases associated with fiscal 2011 acquisitions.

The following table summarizes the Company's cash flow results from continuing operations for fiscal years 2011, 2010 and 2009:

	Years ended October 31,		
	2011	2010 (In millions)	2009
Cash flows from operating activities	\$ 52.9	\$ 89.6	\$ 61.3
Cash flows from investing activities	(135.4)	(15.9)	(14.4)
Cash flows from financing activities	(14.9)	(10.0)	9.6

Highlights from the Company's cash flow results for the fiscal years ended 2011, 2010 and 2009 are as follows:

Operating Activities - Continuing Operations

Cash provided by operating activities from continuing operations during fiscal 2011 compared to fiscal 2010 declined by \$36.7 million. This decline is primarily attributable to reduced income in fiscal 2011 due to acquisition related costs, lower aluminum sheet shipments, and higher maintenance costs at Aluminum Sheet Products, coupled with higher costs at Engineered Products associated with rationalizing operations, incremental sales and marketing costs as the Company invested in long-term organic growth initiatives, and higher raw material costs. Additionally, during fiscal 2010, the Company received a federal income tax refund of \$11.4 million. In fiscal 2011, the Company did not receive a tax refund coupled with the remittance of \$2.8 million (of the total estimated \$3.5 million) associated with reorganization taxes assumed in the Edgetech acquisition. Partially offsetting these cash flow declines is a \$3.5 million reduction in pension contributions in fiscal 2011 compared to fiscal 2010. The Company contributed approximately \$5.3 million to its pension plan during fiscal 2010 in an effort to target a 100% funding threshold while the 2011 contribution amounted to \$1.9 million. The Company expects to contribute approximately \$4.2 million to its pension plan in fiscal 2012. Despite the continued weak condition of the Company's primary end markets, it generated cash flow from operating activities of \$52.9 million during fiscal 2011.

Table of Contents

The increase of \$28.3 million in cash provided by operating activities from continuing operations during fiscal 2010 compared to fiscal 2009 primarily related to the increase in year over year sales and gross margin from the Company's Engineered Products businesses as well as increased volumes and spreads at the Company's Aluminum Sheet business. Partially offsetting this was the substantial decrease in conversion capital during 2009 compared to relatively steady conversion capital levels during 2010; while the Company continued to focus on its working capital management in 2010, in 2009 its efforts resulted in such significant improvements in working capital that those improvements were not expected to be matched in 2010 as the business expanded. As previously discussed above, the Company received a federal income tax refund in February 2010 of \$11.4 million; this refund was partially offset in 2010 by estimated federal tax payments. During fiscal 2009, the Company did not make any estimated federal tax payments. Additionally, the Company contributed approximately \$5.3 million to its pension plan during fiscal 2010 compared to pension contributions of approximately \$3.4 million during 2009.

Investing Activities – Continuing Operations

Cash spending from investing activities from continuing operations increased by \$119.5 million during fiscal 2011 compared to fiscal 2010 and increased by \$1.5 million in fiscal 2010 compared to fiscal 2009. The increase in investing cash spending in 2011 is attributable to the Company's acquisition activity during the second fiscal quarter of 2011. On March 31, 2011, the Company used \$104.4 million in an all cash transaction (net of cash acquired) to acquire Edgetech. Edgetech is headquartered in Cambridge, Ohio, and has three manufacturing facilities (U.S., U.K. and Germany) that produce and market a full line of insulating glass spacer systems for window and door customers in North America and abroad. In March, 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington (integrated into one of its existing Engineered Products businesses) for \$6.4 million in cash consideration. This acquisition was effected through an asset purchase of vinyl extrusion related equipment and certain other assets. The 2010 increase primarily related to \$1.6 million of cash used for a small acquisition made in February 2010. The acquisition was effected through a receivership proceeding and no liabilities were assumed. The Company remains interested in acquisitions that fit its fenestration vision.

A tornado struck and damaged the Company's Mikron facility in Richmond, Kentucky in May 2009. During the second half of fiscal 2009 and the first half of fiscal 2010, the Company received \$1.4 million and \$0.4 million of proceeds, respectively, from the property insurance claim related to this incident. In fiscal 2009 and in fiscal 2010, the Company spent approximately \$1.4 million and \$0.4 million, respectively on its repair efforts; this spending is reflected in capital expenditures on the statement of cash flows. The Company's net overall cash flows from this event was zero as the Company received offsetting insurance proceeds related to the Mikron capital repairs.

Capital expenditures for fiscal years 2011, 2010 and 2009 were \$25.3 million, \$14.7 million and \$15.7 million, respectively. During fiscal 2011, the Company incurred \$4.9 million of capital associated with the rollout of its company-wide ERP system (Project Quest) initiated in March 2011. The current plan anticipates the conversion of all of the Company's disparate systems to a single system over a period of at least three years. The additional increase in spending from prior year levels relate to Edgetech (\$2.3 million) and organic growth initiatives including capital to support new product development as well as spending on previously deferred projects. The slight elevation in fiscal 2009 compared to fiscal 2010 is primarily related to the aforementioned repair of the Mikron facility in Kentucky.

The Company expects 2012 capital expenditures to approximate \$49 million. The increase in spending from prior year levels primarily reflects approximately \$16.0 million associated with Project Quest and an estimated \$7.0 million associated with preparing the Cambridge, Ohio facility for the consolidation of the insulated glass spacer operations. At October 31, 2011, the Company had commitments of approximately \$6.4 million for the purchase or construction of capital assets. The Company plans to fund these capital expenditures through cash flow from operations.

Table of Contents**Financing Activities – Continuing Operations**

Quanex spent \$14.9 million, spent \$10.0 million and received \$9.6 million in cash from financing activities from continuing operations in fiscal years 2011, 2010 and 2009, respectively. The \$4.9 million increase in cash spending from financing activities during 2011 compared to 2010 was primarily the result of the Company's stock repurchase program and to a lesser extent an increase in the cash dividend in mid fiscal 2010. This increase in spending was partially offset by more proceeds from stock option exercises of \$0.6 million. The Board of Directors approved a stock repurchase program of 1.0 million shares in May 2010, and authorized an additional 1.0 million shares to the program in August 2011. During fiscal 2011, the Company purchased 750,000 shares of common stock at a cost of \$10.1 million compared to 250,000 shares of common stock at a cost of \$4.3 million during fiscal 2010. In fiscal 2011 and 2010, the Company paid quarterly dividends of \$0.16 per common share and \$0.14 per common share, respectively, with shares outstanding remaining relatively flat. The Company increased its quarterly cash dividend in May 2010 by 33% to \$0.04 per share from \$0.03 per share.

The Company used \$10.0 million for financing activities from continuing operations during 2010 compared to receiving \$9.6 million 2009. In 2009, the Company received \$15.4 million from Gerdau representing the fourth and final true-up and relating to distribution taxes pursuant to the terms of the transaction related agreements. The Company does not anticipate any further cash from financing activities related to the Separation. During fiscal 2010, the Company purchased 250,000 shares of common stock at a cost of \$4.3 million. The Company did not purchase common stock during fiscal 2009. In fiscal 2010 and 2009, the Company paid quarterly dividends of \$0.14 per common share and \$0.12 per common share, respectively with shares remaining relatively flat.

Discontinued Operations

Cash flows from discontinued operations represent results related to the Company's start-up facility in China that was closed in fiscal year 2010. Residual 2011 cash flows represent wind-up activities, including repayment by the China facility (discontinued cash outflow) to its Quanex parent (offsetting financing cash inflow in continuing operations).

Debt Structure and Activity

Refer to Item 8, Note 10 – Long-Term Debt and Financing Arrangements for a discussion of the Company's debt structure.

Contractual Obligations and Commercial Commitments**Contractual Obligations**

The following tables set forth certain information concerning the Company's unconditional obligations and commitments to make future payments under contracts with remaining terms in excess of one year, such as debt and lease agreements, and under contingent commitments.

Payments Due by Period

Contractual Obligations	Total	Less than	1-3	3-5	More
		1 Year	Years	Years	Than
(In thousands)					
Long-term debt, including interest ⁽¹⁾	\$ 1,720	\$ 365	\$ 698	\$ 227	\$ 430
Operating leases ⁽²⁾	32,763	6,731	11,289	6,654	8,089
Unconditional purchase obligations ⁽³⁾	4,385	3,941	444		
Total contractual cash obligations ⁽⁴⁾	\$ 38,868	\$ 11,037	\$ 12,431	\$ 6,881	\$ 8,519

⁽¹⁾ The debt interest amounts are based on rates as of October 31, 2011.

Table of Contents

- (2) Operating leases cover a range of items from facilities and fork lift trucks to fax machines and other miscellaneous equipment.
- (3) The unconditional purchase obligations are made up of gas supply agreements and \$4.2 million of scrap aluminum purchases.
- (4) The above table excludes reserves recorded in accordance with ASC Topic 740 *Income Taxes*, as the Company is unable to reasonably estimate the timing of future cash flows related to these reserves. For additional information see Note 9, *Income Taxes*, in the Notes to Consolidated Financial Statements in Item 8 of this Form 10-K.

Prior to the Separation, the Company's pension plan included participants from the vehicular products business, the building products businesses and corporate. Upon the Separation, Gerdau assumed the pension benefit liabilities for the vehicular products and corporate retiree participants (reported in discontinued operations) while the Company retained the pension benefit liabilities for the building products and active corporate participants. Accordingly, the plan assets were allocated based on benefit priority categories of the respective participants between Gerdau and the Company. During fiscal 2012, the Company expects to contribute approximately \$4.2 million to the pension plan to continue to target a 100% funding threshold and meet minimum contribution requirements. Pension contributions beyond 2012 are not determinable since the amount of any contribution is heavily dependent on the future economic environment and investment returns on pension plan assets. Obligations to these plans are based on current and projected obligations of the plans, performance of the plan assets, if applicable, and any participant contributions. Refer to Note 11 of Item 8 to the Consolidated Financial Statements for further information on these plans. Management believes the effect of the plans on liquidity is not significant to the Company's overall financial condition.

The timing of payments related to the Company's Supplemental Benefit Plan and Deferred Compensation Plan cannot be readily determined due to their uncertainty. The Supplemental Benefit Plan liability of \$1.8 million at October 31, 2011 was recorded as part of Other (non-current) liabilities. Based on the \$5.9 million market value of the Company's Deferred Compensation Plan, payments for fiscal 2012 are estimated to be approximately \$0.2 million and are recorded in Accrued liabilities on the Consolidated Balance Sheets. The remaining liability balance of \$5.7 million is recorded in Other liabilities on the Consolidated Balance Sheets.

Other Commercial Commitments

The following table reflects other commercial commitments or potential cash outflows that may result from a contingent event, such as a need to borrow short-term funds for liquidity purposes.

Amount of Commitment Expiration per Period

	Total				More
	Amounts	Less than	1-3	3-5	Than
Other Commercial Commitments	Committed	1 Year	Years	Years	5
(In thousands)					
Standby letters of credit	\$ 6,215	\$ 5,302	\$	\$	\$ 913
Off-Balance Sheet Arrangements					

The Company does not have any off-balance sheet arrangements, as such term is defined in the rules promulgated by the Securities and Exchange Commission, that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Effects of Inflation

Inflation has not had a significant effect on earnings and other financial statement items.

Table of Contents

Critical Accounting Estimates

The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying footnotes. Estimates and assumptions about future events and their effects cannot be perceived with certainty. Estimates may change as new events occur, as more experience is acquired, as additional information becomes available and as the Company's operating environment changes. Actual results could differ from estimates.

The Company believes the following are the most critical accounting policies used in the preparation of the Company's Consolidated Financial Statements as well as the significant judgments and uncertainties affecting the application of these policies.

Revenue Recognition and Allowance for Doubtful Accounts

The Company recognizes revenue when the products are shipped and the title and risk of ownership pass to the customer. Selling prices are fixed based on purchase orders or contractual agreements. Sales allowances and customer incentives are treated as reductions to sales and are provided for based on historical experience and current estimates. Inherent in the Company's revenue recognition policy is the determination of collectability. This requires management to make frequent judgments and estimates in order to determine the appropriate amount of allowance needed for doubtful accounts. The Company's allowance for doubtful accounts is estimated to cover the risk of loss related to accounts receivable. This allowance is maintained at a level the Company considers appropriate based on historical and other factors that affect collectability. These factors include historical trends of write-offs, recoveries and credit losses, the careful monitoring of portfolio credit quality, and projected economic and market conditions. Different assumptions or changes in economic circumstances could result in changes to the allowance.

Inventory

The Company records inventory valued at the lower of cost or market value. Inventories are valued using the first-in first-out (FIFO) and last-in first-out (LIFO) methods. The Company uses the dollar-value link chain LIFO method, and the LIFO reserve is calculated on a consolidated basis in a single consolidated pool. Acquisitions are integrated into the Company's operations with some valuing inventories on a LIFO basis and others on a FIFO basis. Fixed costs related to excess manufacturing capacity have been expensed in the period, and therefore, are not capitalized into inventory. Inventory quantities are regularly reviewed and provisions for excess or obsolete inventory are recorded primarily based on the Company's forecast of future demand and market conditions. Significant unanticipated changes to the Company's forecasts could require a change in the provision for excess or obsolete inventory.

Environmental Contingencies

Quanex is subject to extensive laws and regulations concerning the discharge of materials into the environment and the remediation of chemical contamination. To satisfy such requirements, Quanex must make capital and other expenditures on an ongoing basis. The Company accrues its best estimates of its remediation obligations and adjusts such accruals as further information and circumstances develop. Those estimates may change substantially depending on information about the nature and extent of contamination, appropriate remediation technologies, and regulatory approvals. In accruing for environmental remediation liabilities, costs of future expenditures are not discounted to their present value, unless the amount and timing of the expenditures are fixed or reliably determinable. Legal costs are expensed as incurred except incremental direct costs of the remediation effort which are accrued as part of the measurement of the environmental remediation liability. When environmental laws might be deemed to impose joint and several liability for the costs of responding to contamination, the Company accrues its allocable share of liability taking into account the number of parties participating, their ability to pay their shares, the volumes and nature of the wastes involved, the nature of anticipated response actions, and the nature of the Company's alleged connections. Recoveries of environmental

Table of Contents

remediation costs from other parties are recorded as assets when their receipt is deemed probable. Unanticipated changes in circumstances and/or legal requirements could extend the length of time over which the Company pays its remediation costs or could increase actual cash expenditures for remediation in any period.

Warranty Obligations

The Company's estimated obligations for warranty are accrued concurrently with the revenue recognized. The Company makes provisions for its warranty obligations based upon historical costs incurred for such obligations adjusted, as necessary, for current conditions and factors. Due to the significant uncertainties and judgments involved in estimating the Company's warranty obligations, including changing product designs, the ultimate amount incurred for warranty costs could change in the near term from the current estimate.

Insurance

The Company manages its costs of workers' compensation, group medical, property, casualty and other liability exposures through a combination of self-insurance retentions and insurance coverage with third-party carriers. Liabilities associated with the Company's portion of these exposures are not discounted and are estimated by considering various factors which may include historical claims experience, severity factors, estimated claims incurred but not yet reported, and loss development factors, which are estimates on how claims will develop over time until the claims are closed, as appropriate. While the Company considers a number of factors in preparing the estimates, sensitive assumptions using significant judgment are made in determining the amounts accrued in the financial statements. Actual claims can differ significantly from estimated liabilities if future claims experience differs from historical experience and assumptions used in the Company's analysis are adjusted. Insurance recoveries are not recognized until any contingencies relating to the claim have been resolved.

Impairment or Disposal of Long-Lived Assets

Property, Plant and Equipment and Intangibles

The Company makes judgments and estimates in conjunction with the carrying value of property, plant and equipment, other intangibles, and other assets, including amounts to be capitalized, depreciation and amortization methods and useful lives. Additionally, carrying values of these assets are reviewed for impairment whenever events or changes in circumstances indicate that carrying value may not be recoverable. The Company determines that the carrying amount is not recoverable if the carrying amount exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying value exceeds the sum of the undiscounted cash flows, an impairment charge is recorded in the period in which such review is performed. The Company measures the impairment loss as the amount by which the carrying amount of the long-lived asset exceeds its fair value as determined by quoted market prices in active markets or by discounted cash flows. This requires the Company to make long-term forecasts of its future revenues and costs related to the assets subject to review. Forecasts require assumptions about demand for the Company's products and future market conditions. Future events and unanticipated changes to assumptions could require a provision for impairment in a future period.

The Company monitors relevant circumstances, including industry trends, general economic conditions, and the potential impact that such circumstances might have on the valuation of its identifiable intangibles. Events and changes in circumstances that may cause a triggering event and necessitate such a review include, but are not limited to: a decrease in sales for certain customers, improvements or changes in technology, and/or a decision to phase-out a trademark or trade name. Such events could negatively impact the carrying value of the Company's identifiable intangibles. It is possible that changes in such circumstances or in the numerous variables associated with the judgments, assumptions, and estimates made by the Company in assessing the appropriate valuation of its identifiable intangibles could require the Company to further write down a portion of its identifiable intangibles and record related non-cash impairment charges in the future.

Table of Contents**Goodwill**

The acquisition method of accounting for business combinations requires the Company to make use of estimates and judgments to allocate the purchase price paid for acquisitions to the fair value of the net tangible and identifiable intangible assets. The Company performs a goodwill impairment test annually as of August 31. In addition, goodwill would be tested more frequently if changes in circumstances or the occurrence of events indicates that a potential impairment exists. The Company tests for impairment of its goodwill using a two-step approach as prescribed in ASC Topic 350 *Intangibles Goodwill and Other* (ASC 350). The first step of the Company's goodwill impairment test compares the fair value of each reporting unit with its carrying value including assigned goodwill. The second step of the Company's goodwill impairment test is required only in situations where the carrying value of the reporting unit exceeds its fair value as determined in the first step. In such instances, the Company compares the implied fair value of goodwill to its carrying value. The implied fair value of goodwill is determined by allocating the fair value of a reporting unit to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. An impairment loss is recorded to the extent that the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill. The Company uses the present value of future cash flows to determine fair value in combination with the market approach. Future cash flows are typically based upon appropriate future periods for the businesses and an estimated residual value. Management judgment is required in the estimation of future operating results and to determine the appropriate residual values. The residual values are determined by reference to an exchange transaction in an existing market for that asset. Future operating results and residual values could reasonably differ from the estimates and could require a provision for impairment in a future period.

Income Taxes

The Company records the estimated future tax effects of temporary differences between the tax basis of assets and liabilities and the amounts reported in the Company's Consolidated Balance Sheets, as well as net operating losses and tax credit carry forwards. The carrying value of the net deferred tax assets reflects the Company's assumption that the Company will be able to generate sufficient future taxable income to realize its deferred tax assets. This assumption is based on estimating future taxable income using the same forecasts used to test goodwill and intangibles for impairment, scheduling out the future reversal of existing taxable temporary differences and reviewing the Company's most recent financial operations. If the estimates and assumptions change in the future, the Company may be required to record a valuation allowance against a portion of its deferred tax assets. This could result in additional income tax expense in a future period in the Consolidated Statements of Income.

Stock Based Compensation

In accordance with ASC Topic 718 *Compensation Stock Compensation* (ASC 718), the Company determines the fair value of share awards on the date of grant using the Black-Scholes valuation model. The Company recognizes the fair value as compensation expense on a straight-line basis over the requisite service period of the award based on awards ultimately expected to vest. Under ASC 718, the Company amortizes new option grants to retirement-eligible employees immediately upon grant, consistent with the retirement vesting acceleration provisions of these grants. For employees near retirement age, the Company amortizes such grants over the period from the grant date to the retirement date if such period is shorter than the standard vesting schedule. In accordance with ASC Topic 230-10-45-14 *Statement of Cash Flows Cash Flows From Financing Activities* (ASC 230-10-45-14), the Consolidated Statements of Cash Flow report the excess tax benefits from the stock-based compensation as financing cash inflows. See Note 14 of Item 8 for additional information related to the Company's stock-based compensation.

The Company's fair value determination of stock-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected

Table of Contents

stock price volatility over the term of the awards and actual and projected employee stock option exercise behavior. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable. Because the Company's employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion, the existing valuation models may not provide an accurate measure of the fair value of the Company's employee stock options. Accordingly, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

Retirement Plans

The Company sponsors a defined benefit pension plan and an unfunded postretirement plan that provides health care and life insurance benefits for eligible retirees and dependents. The measurement of liabilities related to these plans is based on management's assumptions related to future events, including expected return on plan assets, rate of compensation increases, and health care cost trend rates. The discount rate reflects the rate at which benefits could be effectively settled on the measurement date. The Company determines its discount rate based on a pension discount curve, and the rate represents the single rate that, if applied to every year of projected benefits payments, would result in the same discounted value as the array of rates that comprise the pension discount curve. Actual pension plan asset investment performance will either reduce or increase unamortized pension losses at the end of any fiscal year, which ultimately affects future pension costs. Refer to Note 11 of Item 8 to the Consolidated Financial Statements for further information on these plans.

The effects of the decrease in selected assumptions, assuming no changes in benefit levels and no amortization of gains or losses for the pension plans in fiscal 2011, is shown below:

Assumption	Percentage Point Change	Effect on all Defined Benefit Pension Plans October 31, 2011	
		Increase (Decrease)	
		In Projected Benefit Obligation (In thousands)	Increase (Decrease) in 2011 Pension Expense
Discount rate	-1.0 pts	\$ 2,608	\$ 500
Assumed return on plan assets	-1.0 pts	N/A	167

As of October 31, 2011, the Company's projected benefit obligation (PBO) and accumulated benefit obligation (ABO) exceed the fair value of the plan assets by \$6.7 million and \$5.4 million, respectively. As a comparison, the Company's PBO and ABO exceeded the fair value of plan assets by \$2.7 million and \$1.9 million, respectively, as of October 31, 2010. In 2010, the fair value of plan assets approached the obligation partly due to the Company modifying its funding strategy to accelerate contributions to target a 100% funding threshold; however in 2011, a decrease in the discount rate and additional participants from the Edgetech acquisition increased the obligation more than the increase in the fair value of the plan assets. During fiscal 2011, the Company contributed \$1.9 million to its defined benefit plan. During fiscal 2012, the Company expects to contribute approximately \$4.2 million to the pension plan to continue to target a 100% funding threshold and to meet minimum contribution requirements. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. In addition, the Company takes into consideration its business investment opportunities and resulting cash requirements. Accordingly, actual funding may differ greatly from current estimates.

Accounting guidance applicable to pensions does not require immediate recognition of the effects of a deviation between actual and assumed experience and the revision of an estimate. This approach allows the favorable and unfavorable effects that fall within an acceptable range to be netted and disclosed as an unrecognized gain or loss. Accumulated other comprehensive income as of October 31, 2011 includes pretax net actuarial losses and net prior service costs of \$4.8 million. A portion of the loss will be amortized in fiscal year 2012. The effect on fiscal years after 2012 will depend on the actual experience of the plans.

Table of Contents

Mortality assumptions used to determine the obligations for the Company's pension plans are related to the experience of the plans and to our third-party actuary's best estimate of expected plan mortality.

Foreign Currency Translation

The functional currencies of the Company's United Kingdom and German subsidiaries are the British Pound and Euro and their books and records are maintained in the local currency. Translation adjustments, which are based upon the exchange rate at the balance sheet date for assets and liabilities and the weighted-average rate for the income statement, are recorded in Accumulated Other Comprehensive Income (loss) in Stockholders' equity on the Consolidated Balance Sheets.

New Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board (FASB) issued ASC Topic No. 2010-29 *Business Combinations (ASC Topic 805) Disclosure of Supplementary Pro Forma Information for Business Combinations* which amended ASC Topic 805 *Business Combinations* to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the year had occurred as of the beginning of the comparable prior annual reporting period only. The ASC also expands the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and the amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The ASC is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010 (November 1, 2011 for the Company). Early adoption is permitted. The Company has disclosed information in accordance with this ASC effective March 31, 2011.

In June 2011, the FASB issued Accounting Standards Update No. 2011-05 (ASU 2011-05), *Presentation of Comprehensive Income*. This amendment will require companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. It eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The amended guidance, which must be applied retroactively, is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 (November 1, 2012 for the Company), with earlier adoption permitted. ASU 2011-05 impacts presentation only and will have no effect on the Company's financial condition, results of operations or cash flows.

Item 7A. *Quantitative and Qualitative Disclosures about Market Risk*

The following discussion of the Company and its subsidiaries' exposure to various market risks contains forward looking statements that involve risks and uncertainties. These projected results have been prepared utilizing certain assumptions considered reasonable in light of information currently available to the Company. Nevertheless, because of the inherent unpredictability of interest rates, foreign currency rates and metal commodity prices as well as other factors, actual results could differ materially from those projected in such forward looking information. The Company does not use derivative financial instruments for speculative or trading purposes. For a description of the Company's significant accounting policies associated with these activities, see Note 1 to the Consolidated Financial Statements.

Interest Rate Risk

The Company and its subsidiaries have a Credit Facility and other long-term debt which subject the Company to the risk of loss associated with movements in market interest rates. At October 31, 2011 and 2010, the Company had fixed-rate debt totaling \$166 thousand and \$143 thousand, respectively. This debt is fixed-rate, and therefore, does not expose the Company to the risk of earnings loss due to changes in market interest rates.

Table of Contents

The Company and certain of its subsidiaries' floating-rate obligations totaled \$1.5 million and \$1.8 million at October 31, 2011 and 2010, respectively. Based on the floating-rate obligations outstanding at October 31, 2011, a one percent increase or decrease in the average interest rate would result in a change to pre-tax interest expense of approximately \$15 thousand.

Commodity Price Risk

Within the Aluminum Sheet Products segment, the Company uses various grades of aluminum scrap as well as minimal amounts of prime aluminum as raw materials for its manufacturing processes. The price of this raw material is subject to fluctuations due to many factors in the aluminum market. In the normal course of business, Nichols Aluminum enters into firm price sales commitments with its customers. In an effort to reduce the risk of fluctuating raw material prices, Nichols Aluminum enters into firm price raw material purchase commitments (which are designated as "normal purchases" under ASC Topic 815 *Derivatives and Hedging* (ASC 815)) as well as option contracts on the London Metal Exchange (LME). The Company's risk management policy as it relates to these LME contracts is to enter into contracts to cover the raw material needs of the Company's committed sales orders, to the extent not covered by fixed price purchase commitments.

Nichols Aluminum maintains a balanced metals book position which excludes a normal operational inventory level. This operating inventory level as a matter of practice is not hedged against material price (LME) movements. This practice reflects that over the commodity price cycle, no gain or loss is incurred on this inventory. Through the use of firm price raw material purchase commitments and LME contracts, the Company intends to protect cost of sales from the effects of changing prices of aluminum. To the extent that the raw material costs factored into the firm price sales commitments are matched with firm price raw material purchase commitments, changes in aluminum prices should have no effect. During fiscal 2011, 2010 and 2009, the Company primarily relied upon firm price raw material purchase commitments to protect cost of sales tied to firm price sales commitments. At October 31, 2011, there were 62 open LME forward contracts associated with metal exchange derivatives covering notional volumes of 3.4 million pounds with a fair value mark-to-market net loss of approximately \$0.1 million. In addition, at October 31, 2011 there were 97 open LME short sale contracts associated with metal exchange derivatives covering notional volumes of 5.3 million pounds with a fair value mark-to-market net gain of approximately \$0.1 million. These contracts were not designated as hedging instruments, and any mark-to-market net gain or loss was recorded in Cost of sales with the offsetting amount reflected as a current asset or liability on the balance sheet. At October 31, 2010 there were 22 open LME forward contracts associated with metal exchange derivatives covering notional volumes of 1.2 million pounds with a fair value mark-to-market net gain of approximately \$0.2 million. In addition, at October 31, 2010 there were 116 open LME short sale contracts associated with metal exchange derivatives covering notional volumes of 6.4 million pounds with a fair value mark-to-market net loss of approximately \$0.4 million.

Within the Engineered Products segment, polyvinyl resin (PVC) is the significant raw material consumed during the manufacture of vinyl extrusions. The Company has a monthly resin adjuster in place with the majority of its customers and resin supplier that is adjusted based upon published industry resin prices for the prior month. This adjuster effectively shares the base pass-through price changes of PVC with the Company's customers commensurate with the market at large. The Company's long-term exposure to changes in PVC prices is thus significantly reduced due to the contractual component of the resin adjuster program; however, there is a level of exposure to short-term volatility due to the one month lag.

Effective May 1, 2011, Truseal, one of the Company's warm-edge, insulating glass spacer divisions initiated an oil-based materials surcharge. The surcharge helps offset the rising cost of butyl and other oil-based raw materials, pricing of which are highly correlated to the price of oil. The surcharge is in place with the majority of its customers and is adjusted monthly based upon the 90 day average published price for Brent crude. The oil-based raw materials purchased by the company are subject to similar pricing schemes. Therefore, the Company's long-term exposure to changes in oil-based raw materials prices is significantly reduced due to the contractual component of the surcharge program.

Table of Contents

Foreign Currency Rate Risk

The Company's international operations have exposure to foreign currency rate risks primarily due to fluctuations in the British Pound, the Canadian dollar and Euro. From time to time, the Company enters into foreign exchange contracts associated with its exposures from operations to manage a portion of the foreign currency rate risk.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Quanex Building Products Corporation

Houston, Texas

We have audited the accompanying consolidated balance sheets of Quanex Building Products Corporation and subsidiaries (the Company) as of October 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flow for each of the three years in the period ended October 31, 2011. Our audits also include the financial statement schedule listed in the Index at Item 15. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company and subsidiaries as of October 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended October 31, 2011, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of October 31, 2011, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 19, 2011 expressed an unqualified opinion on the Company's internal control over financial reporting.

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Significant Accounting Policies

The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Estimates and assumptions about future events and their effects cannot be perceived with certainty. Estimates may change as new events occur, as more experience is acquired, as additional information becomes available and as the Company's operating environment changes. Actual results could differ from estimates.

Quanex Building Products Corporation and its subsidiaries (Quanex or the Company) are managed on a decentralized basis and operate in two business segments: Engineered Products and Aluminum Sheet Products. The Engineered Products segment produces engineered products and components primarily serving the window and door industry, while the Aluminum Sheet Products segment produces mill finished and coated aluminum sheet serving the broader building products markets and secondary markets such as capital goods and transportation. The primary market drivers are residential housing starts and remodeling expenditures. Quanex believes it is a technological leader in the production of aluminum flat-rolled products, flexible insulating glass spacer systems, extruded vinyl profiles, thin film solar panel sealants, and precision-formed metal and wood products which primarily serve the North American building products markets. The Company uses low-cost production processes, and engineering and metallurgical expertise to provide customers with specialized products for specific applications.

On December 12, 2007, Quanex Building Products Corporation was incorporated in the state of Delaware as a subsidiary of Quanex Corporation to facilitate the separation of Quanex Corporation's vehicular products and building products businesses. The separation occurred on April 23, 2008 through the spin-off of Quanex Corporation's building products business to its shareholders immediately followed by the merger of Quanex Corporation (consisting principally of the vehicular products business and all non-building products related corporate accounts) with a wholly-owned subsidiary of Gerdau S.A. (Gerdau). This is hereafter referred to as the Separation.

In March 2011, the Company acquired Edgetech I.G., Inc. and its German subsidiary. Headquartered in Cambridge, Ohio, Edgetech has three manufacturing facilities (U.S., U.K. and Germany) that produce and market a full line of insulating glass spacer systems for window and door customers in North America and abroad. In March 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington. In 2010, management closed its start-up facility in China due to the contraction of demand and the Company's ability to serve the overseas thin film solar panel market from its North American operations. Accordingly, the China assets and liabilities, results of operations and cash flows are reported as discontinued operations for all periods presented.

The following are significant accounting policies used in the preparation of the Company's Consolidated Financial Statements as well as the significant judgments and uncertainties affecting the application of these policies.

Nature and Scope of Operations

Quanex has two reportable segments covering two customer-focused markets: Engineered Products and Aluminum Sheet Products. The Company manufactures aluminum flat-rolled products, flexible insulating glass spacer systems, extruded vinyl profiles, thin film solar panel sealants, and precision-formed metal and wood products which primarily serve the North American building products markets. The Company's manufacturing operations are conducted in the United States, the United Kingdom, and Germany. See Note 12, Industry Segment Information.

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Revenue Recognition and Allowance for Doubtful Accounts

The Company recognizes revenue when the products are shipped and the title and risk of ownership pass to the customer. Selling prices are fixed based on purchase orders or contractual agreements. Sales allowances and customer incentives are treated as reductions to sales and are provided for based on historical experience and current estimates. Inherent in the Company's revenue recognition policy is the determination of collectability. This requires management to make frequent judgments and estimates in order to determine the appropriate amount of allowance needed for doubtful accounts. The Company's allowance for doubtful accounts is estimated to cover the risk of loss related to accounts receivable. This allowance is maintained at a level the Company considers appropriate based on historical and other factors that affect collectability. These factors include historical trends of write-offs, recoveries and credit losses, the careful monitoring of portfolio credit quality, and projected economic and market conditions. Different assumptions or changes in economic circumstances could result in changes to the allowance.

Inventory

The Company records inventory valued at the lower of cost or market value. Inventories are valued using the first-in first-out (FIFO) and last-in first-out (LIFO) methods. The Company uses the dollar-value link chain LIFO method, and the LIFO reserve is calculated on a consolidated basis in a single consolidated pool. Acquisitions are integrated into the Company's operations with some valuing inventories on a LIFO basis and others on a FIFO basis. Fixed costs related to excess manufacturing capacity have been expensed in the period, and therefore, are not capitalized into inventory. Inventory quantities are regularly reviewed and provisions for excess or obsolete inventory are recorded primarily based on the Company's forecast of future demand and market conditions. Significant unanticipated changes to the Company's forecasts could require a change in the provision for excess or obsolete inventory.

Environmental Contingencies

Quanex is subject to extensive laws and regulations concerning the discharge of materials into the environment and the remediation of chemical contamination. To satisfy such requirements, Quanex must make capital and other expenditures on an ongoing basis. The Company accrues its best estimates of its remediation obligations and adjusts such accruals as further information and circumstances develop. Those estimates may change substantially depending on information about the nature and extent of contamination, appropriate remediation technologies, and regulatory approvals. In accruing for environmental remediation liabilities, costs of future expenditures are not discounted to their present value, unless the amount and timing of the expenditures are fixed or reliably determinable. Legal costs are expensed as incurred except incremental direct costs of the remediation effort which are accrued as part of the measurement of the environmental remediation liability. When environmental laws might be deemed to impose joint and several liability for the costs of responding to contamination, the Company accrues its allocable share of liability taking into account the number of parties participating, their ability to pay their shares, the volumes and nature of the wastes involved, the nature of anticipated response actions, and the nature of the Company's alleged connections. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable. Unanticipated changes in circumstances and/or legal requirements could extend the length of time over which the Company pays its remediation costs or could increase actual cash expenditures for remediation in any period.

Asset Retirement Obligations

Asset retirement obligations represent legal obligations associated with the retirement of tangible long-lived assets that result from the normal operation of the long-lived asset. The costs associated with such legal obligations are accounted for under the provisions of ASC Topic 410 *Asset Retirement and Environmental*

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Obligations (ASC 410). The fair value of a liability for an asset retirement obligation is recognized in the period in which it is incurred and capitalized as part of the carrying amount of the long-lived asset. The fair value of such obligations is based upon the present value of the future cash flows expected to be incurred to satisfy the obligation. Over time, the liability is accreted to its settlement value and the capitalized cost is depreciated over the useful life of the related asset. Upon settlement of the liability, the Company will recognize a gain or loss for any difference between the settlement amount and the liability recorded. When certain legal obligations are identified with indeterminate settlement dates, the fair value of these obligations cannot be reasonably estimated and accordingly a liability is not recognized. When a date or range of dates can reasonably be estimated for the retirement of that asset, the Company will estimate the cost of performing the retirement activities and record a liability for the fair value of that cost using established present value techniques.

Warranty Obligations

The Company's estimated obligations for warranty are accrued concurrently with the revenue recognized. The Company makes provisions for its warranty obligations based upon historical costs incurred for such obligations adjusted, as necessary, for current conditions and factors. Due to the significant uncertainties and judgments involved in estimating the Company's warranty obligations, including changing product designs, the ultimate amount incurred for warranty costs could change in the near term from the current estimate.

Long-Lived Assets

Property, Plant and Equipment and Intangibles

The Company makes judgments and estimates in conjunction with the carrying value of property, plant and equipment, other intangibles, and other assets, including amounts to be capitalized, depreciation and amortization methods and useful lives. Additionally, carrying values of these assets are reviewed for impairment whenever events or changes in circumstances indicate that carrying value may not be recoverable. The Company determines that the carrying amount is not recoverable if the carrying amount exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying value exceeds the sum of the undiscounted cash flows, an impairment charge is recorded in the period in which such review is performed. The Company measures the impairment loss as the amount by which the carrying amount of the long-lived asset exceeds its fair value as determined by quoted market prices in active markets or by discounted cash flows. This requires the Company to make long-term forecasts of its future revenues and costs related to the assets subject to review. Forecasts require assumptions about demand for the Company's products and future market conditions. Future events and unanticipated changes to assumptions could require a provision for impairment in a future period.

The Company monitors relevant circumstances, including industry trends, general economic conditions, and the potential impact that such circumstances might have on the valuation of its identifiable intangibles. Events and changes in circumstances that may cause a triggering event and necessitate such a review include, but are not limited to: a decrease in sales for certain customers, improvements or changes in technology, and/or a decision to phase-out a trademark or trade name. Such events could negatively impact the carrying value of the Company's identifiable intangibles. It is possible that changes in such circumstances or in the numerous variables associated with the judgments, assumptions, and estimates made by the Company in assessing the appropriate valuation of its identifiable intangibles could require the Company to further write down a portion of its identifiable intangibles and record related non-cash impairment charges in the future.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Property, plant and equipment is stated at cost and is depreciated using the straight-line method over the estimated useful lives of the assets. The estimated useful lives of certain categories are as follows:

	Years
Land improvements	7 to 25
Buildings	25 to 40
Building improvements	5 to 20
Leasehold improvements	Over lease term ⁽¹⁾
Machinery and equipment	2 to 15

⁽¹⁾ Leasehold improvements are depreciated over the shorter of their estimated useful lives or the term of the lease.

Goodwill

The acquisition method of accounting for business combinations requires the Company to make use of estimates and judgments to allocate the purchase price paid for acquisitions to the fair value of the net tangible and identifiable intangible assets. The Company performs a goodwill impairment test annually as of August 31. In addition, goodwill would be tested more frequently if changes in circumstances or the occurrence of events indicates that a potential impairment exists. The Company tests for impairment of its goodwill using a two-step approach as prescribed in ASC Topic 350 *Intangibles Goodwill and Other* (ASC 350). The first step of the Company's goodwill impairment test compares the fair value of each reporting unit with its carrying value including assigned goodwill. The second step of the Company's goodwill impairment test is required only in situations where the carrying value of the reporting unit exceeds its fair value as determined in the first step. In such instances, the Company compares the implied fair value of goodwill to its carrying value. The implied fair value of goodwill is determined by allocating the fair value of a reporting unit to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. An impairment loss is recorded to the extent that the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill. The Company uses the present value of future cash flows to determine fair value in combination with the market approach. Future cash flows are typically based upon appropriate future periods for the businesses and an estimated residual value. Management judgment is required in the estimation of future operating results and to determine the appropriate residual values. The residual values are determined by reference to an exchange transaction in an existing market for that asset. Future operating results and residual values could reasonably differ from the estimates and could require a provision for impairment in a future period.

Income Taxes

The Company records the estimated future tax effects of temporary differences between the tax basis of assets and liabilities and the amounts reported in the Company's Consolidated Balance Sheets, as well as net operating losses and tax credit carry forwards. The carrying value of the net deferred tax assets reflects the Company's assumption that the Company will be able to generate sufficient future taxable income to realize its deferred tax assets. This assumption is based on estimating future taxable income using the same forecasts used to test goodwill and intangibles for impairment, scheduling out the future reversal of existing taxable temporary differences and reviewing the Company's most recent financial operations. If the estimates and assumptions change in the future, the Company may be required to record a valuation allowance against a portion of its deferred tax assets. This could result in additional income tax expense in a future period in the Consolidated Statements of Income.

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Insurance

The Company manages its costs of workers' compensation, group medical, property, casualty and other liability exposures through a combination of self-insurance retentions and insurance coverage with third-party carriers. Liabilities associated with the Company's portion of these exposures are not discounted and are estimated by considering various factors which may include historical claims experience, severity factors, estimated claims incurred but not yet reported, and loss development factors, which are estimates on how claims will develop over time until the claims are closed, as appropriate. While the Company considers a number of factors in preparing the estimates, sensitive assumptions using significant judgment are made in determining the amounts accrued in the financial statements. Actual claims can differ significantly from estimated liabilities if future claims experience differs from historical experience and assumptions used in the Company's analysis are adjusted. Insurance recoveries are not recognized until any contingencies relating to the claim have been resolved.

Stock Based Compensation

In accordance with ASC Topic 718 *Compensation - Stock Compensation* (ASC 718), the Company determines the fair value of share awards on the date of grant using the Black-Scholes valuation model. The Company recognizes the fair value as compensation expense on a straight-line basis over the requisite service period of the award based on awards ultimately expected to vest. Under ASC 718, the Company amortizes new option grants to retirement-eligible employees immediately upon grant, consistent with the retirement vesting acceleration provisions of these grants. For employees near retirement age, the Company amortizes such grants over the period from the grant date to the retirement date if such period is shorter than the standard vesting schedule. In accordance with ASC Topic 230-10-45-14 *Statement of Cash Flows - Cash Flows From Financing Activities* (ASC 230-10-45-14), the Consolidated Statements of Cash Flow report the excess tax benefits from the stock-based compensation as financing cash inflows. See Note 14 for additional information related to the Company's stock-based compensation.

The Company's fair value determination of stock-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behavior. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable.

Retirement Plans

The Company sponsors a defined benefit pension plan and an unfunded postretirement plan that provides health care and life insurance benefits for eligible retirees and dependents. The measurement of liabilities related to these plans is based on management's assumptions related to future events, including expected return on plan assets, rate of compensation increases, and health care cost trend rates. The discount rate reflects the rate at which benefits could be effectively settled on the measurement date. The Company determines its discount rate based on a pension discount curve, and the rate represents the single rate that, if applied to every year of projected benefits payments, would result in the same discounted value as the array of rates that comprise the pension discount curve. Actual pension plan asset investment performance will either reduce or increase unamortized pension losses at the end of any fiscal year, which ultimately affects future pension costs.

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Treasury Stock

The Company records treasury stock purchases under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. The Company uses a moving average method on the subsequent reissuance of shares, and any resulting proceeds in excess of cost are credited to additional paid in capital while any deficiency is charged to retained earnings.

Foreign Currency Translation

The functional currencies of the Company's United Kingdom and German subsidiaries are the British Pound and Euro and their books and records are maintained in the local currency. Translation adjustments, which are based upon the exchange rate at the balance sheet date for assets and liabilities and the weighted-average rate for the income statement, are recorded in Accumulated other comprehensive income (loss) in Stockholders' equity on the Consolidated Balance Sheets.

Discontinued Operations

In accordance with ASC Topic 205-20 *Presentation of Financial Statements - Discontinued Operations* (ASC 205-20), the Company presents the results of operations, financial position and cash flows of operations that have either been sold or that meet the criteria for held for sale accounting as discontinued operations. At the time an operation qualifies for held for sale accounting, the operation is evaluated to determine whether or not the carrying value exceeds its fair value less cost to sell. Any loss as a result of carrying value in excess of fair value less cost to sell is recorded in the period the operation meets held for sale accounting. Management judgment is required to (1) assess the criteria required to meet held for sale accounting, and (2) estimate fair value. Changes to the operation could cause it to no longer qualify for held for sale accounting and changes to fair value could result in an increase or decrease to previously recognized losses.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Quanex and its subsidiaries, all of which are wholly owned. All intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain reclassifications included within the Consolidated Balance Sheets in prior year financial statements have been made to conform to the 2011 presentation. The reclassifications include providing more detail of noncurrent liabilities to conform with the current year presentation. Such reclassifications have no impact on earnings or cash flows provided by operations.

Earnings per Share Data

Basic earnings per share excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity.

Statements of Cash Flows

The Company generally considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. Similar investments with original maturities beyond three months are considered short-term investments.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Supplemental cash flow information is as follows:

	Years Ended October 31,		
	2011	2010	2009

2. New Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board (FASB) issued ASC Topic No. 2010-29 *Business Combinations (ASC Topic 805) Disclosure of Supplementary Pro Forma Information for Business Combinations* which amended ASC Topic 805 *Business Combinations* to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the year had occurred as of the beginning of the comparable prior annual reporting period only. The ASC also expands the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and the amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The ASC is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010 (November 1, 2011 for the Company). Early adoption is permitted. The Company has disclosed information in accordance with this ASC effective March 31, 2011.

In December 2010, the FASB issued ASC Topic No. 2010-28 *Intangibles - Goodwill and Other (ASC Topic 350) When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts* which amended ASC Topic 350 *Goodwill and Other*. The ASC requires an entity with reporting units that have carrying amounts that are zero or negative to assess whether it is more likely than not that the reporting units' goodwill is impaired. If the entity determines that it is more likely than not that the goodwill of one or more of its reporting units is impaired, the entity is required to perform Step 2 of the goodwill impairment test for those reporting unit(s) and record any resulting impairment as a cumulative-effect adjustment to beginning retained earnings. The provisions of this ASC are effective for fiscal years, and interim periods within those years, beginning after December 15, 2010 (November 1, 2011 for the Company). Early adoption is not permitted. The adoption of this ASC does not have a material impact on the Company's consolidated financial statements.

In January 2010, the FASB issued ASC Topic No. 2010-06, *Fair Value Measurements and Disclosures (ASC Topic 820) Improving Disclosures About Fair Value Measurements*. The ASC requires new disclosures about transfers into and out of Levels 1 (fair value determined based on quoted prices in active markets for identical assets and liabilities) and 2 (fair value determined based on significant other observable inputs) and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements. It also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. Except for the detailed Level 3 roll-forward disclosures, the new standard is effective for the Company for interim and annual reporting periods beginning after December 15, 2009 (February 1, 2010 for the Company). The requirement to provide detailed disclosures about the purchases, sales, issuances and settlements in the roll-forward activity for Level 3 fair value measurements is effective for the Company for fiscal years, and interim periods within those years, beginning after December 15, 2010.

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(November 1, 2011 for the Company). Other than requiring additional disclosures, none that currently impact the Company, the adoption of this new guidance does not have a material impact on the Company's consolidated financial statements.

In May 2011, the FASB issued Accounting Standards Update No. 2011-04 (ASU 2011-04), *Fair Value Measurement (ASC Topic 820) Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amended guidance changes the wording used to describe many requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Additionally, the amendments clarify the FASB's intent about the application of existing fair value measurement requirements. The guidance provided in ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011 (February 1, 2012 for the Company) and is applied prospectively. The Company does not expect the provisions of ASU 2011-04 to have a material effect on its consolidated financial statements.

In June 2011, the FASB issued Accounting Standards Update No. 2011-05 (ASU 2011-05), *Presentation of Comprehensive Income*. This amendment will require companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. It eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The amended guidance, which must be applied retroactively, is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 (November 1, 2012 for the Company), with earlier adoption permitted. ASU 2011-05 impacts presentation only and will have no effect on the Company's financial condition, results of operations or cash flows.

In September 2011, the FASB issued Accounting Standards Update No. 2011-08 (ASU 2011-08), *Testing Goodwill for Impairment* which amends the guidance in ASC 350-20. The amendments in ASU 2011-08 provide entities with the option of performing a qualitative assessment before performing the first step of the two-step impairment test. If entities determine, on the basis of qualitative factors, it is not more likely than not that the fair value of the reporting unit is less than the carrying amount, then performing the two-step impairment test would be unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the carrying amount of a reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss, if any. ASU 2011-08 also provides entities with the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to the first step of the two-step impairment test. ASU 2011-08 is effective for fiscal years and interim periods beginning after December 15, 2011, although early adoption is permitted (February 1, 2012 for the Company). The Company is currently evaluating the potential impact of this standard on the Company's consolidated financial statements.

3. Acquisitions

On March 31, 2011, Quanex completed its acquisition of Edgetech I.G., Inc., an Ohio corporation (Edgetech I.G.), the United Kingdom division of Edgetech (Edgetech UK), and Edgetech Europe GmbH, a German company (Edgetech Germany). These entities are hereafter referred to as Edgetech. Headquartered in Cambridge, Ohio, Edgetech has three manufacturing facilities located in the United States, the United Kingdom and Germany that produce a full line of warm-edge, dual seal insulating glass spacer systems for window and door customers in North America and abroad. Edgetech's products separate and seal double and triple paned glass within a window and act as a thermal barrier that enhances the window's energy efficiency.

Quanex acquired Edgetech by merging its wholly-owned subsidiary, QSB Inc., a Delaware corporation (QSB), with and into Lauren International, Inc. formerly known as Lauren Holdco Inc., an Ohio corporation and parent of the Edgetech Entities (Holdco), pursuant to the terms and conditions of the previously filed Agreement

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

and Plan of Merger (the Merger Agreement), dated as of January 31, 2011, among the Company, QSB, Lauren International Ltd. fka Lauren International Inc., a privately-held Ohio corporation (Lauren), Holdco and Kevin E. Gray, as agent for the shareholders of Holdco (Agent). Holdco is now the Company's wholly-owned subsidiary. As consideration for the acquisition of all of the issued and outstanding capital shares of Holdco, Quanex paid \$104.4 million in cash, net of \$0.8 million of cash acquired. Of the cash paid, \$7.0 million was placed into an escrow fund to satisfy certain indemnity obligations under the Merger Agreement. Additionally, Quanex is responsible for the tax liability resulting from the pre-closing reorganization of Lauren and its subsidiaries limited to \$3.5 million, of which \$2.8 million was paid during fiscal 2011.

Edgetech is being integrated into the Engineered Products segment. The acquisition of Edgetech complements Quanex's ongoing efforts to provide its customers with the broadest range of high quality components, products, systems and services the fenestration industry has to offer. The vast majority of windows manufactured today feature double or triple pane insulating glass, and with window production set to rise as the housing and R&R markets recover, Quanex believes that the long-term outlook for the business is excellent. The acquisition of Edgetech allows the Company to better serve its growing base of national and regional customers and further accelerate its international growth as Edgetech has a solid market presence overseas.

The Edgetech acquisition is being accounted for as a business combination using the acquisition method of accounting under which the total purchase price consideration is allocated to assets and liabilities assumed based upon their fair values. Fair value measurements have been applied based on assumptions that market participants would use in the pricing of the asset or liability. The excess of the purchase price over the amounts assigned to tangible or intangible assets acquired and liabilities assumed is recognized as goodwill. The following table summarizes the fair values assigned to the assets and liabilities acquired as of the March 31, 2011 acquisition date:

	As of Date of Opening Balance Sheet (In thousands)
Current assets:	
Cash and equivalents	\$ 828
Accounts receivable	9,181
Inventories	10,123
Prepaid and other current assets	2,023
Total current assets	22,155
Property, plant and equipment	21,086
Goodwill	44,623
Intangible assets	48,750
Other assets	1,377
Total assets	\$ 137,991
Current liabilities:	
Accounts payable	\$ 6,905
Accrued liabilities	1,315
Income taxes payable	3,780
Deferred income taxes	322
Current maturities of long-term debt	24
Total current liabilities	12,346
Long-term debt	40

Edgar Filing: Quanex Building Products CORP - Form 10-K

Deferred income taxes	20,374
Total liabilities	32,760
Investment	105,231
Total liabilities and equity	\$ 137,991

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The purchase price allocation resulted in goodwill of \$44.6 million, which is not deductible for income tax purposes. Goodwill consists of the excess of the purchase price over the fair value of the acquired assets and represents the estimated economic value attributable to future operations. The other intangible assets are being amortized over periods which reflect the pattern in which the economic benefits of the assets are expected to be realized. Specifically, the trademarks and trade names are being amortized over an average estimated useful life of 7 years, patents and other developed technology is being amortized over an average life of 10 years and customer relationships are being amortized over an average of 11 years. The weighted average useful life of intangible assets, excluding goodwill, created as a result of the acquisition is 10 years. No residual value is estimated for the intangible assets. While the Company uses its best estimates and assumptions as part of the purchase price allocation process to value assets acquired and liabilities assumed at the acquisition date, the purchase price allocation could change during the measurement period (not to exceed one year) if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of additional assets and liabilities as of that date.

The Company recorded \$2.5 million of transaction-related costs in connection with the Edgetech acquisition within Selling, general and administrative expense in its Consolidated Statement of Income during the year ended October 31, 2011.

The Consolidated Statements of Income for the year ended October 31, 2011, include seven months of financial results of Edgetech. For the seven months ended October 31, 2011, Edgetech net sales and operating loss are \$53.4 million and \$0.3 million, respectively. In connection with applying the provisions of purchase accounting to state inventory at fair value, the Company increased Edgetech's inventory value by \$2.0 million, which negatively impacts Quanex's Cost of sales following the acquisition. The Edgetech results were negatively impacted by \$1.9 million of additional non-cash Cost of goods sold during the year ended October 31, 2011 due to the increased value of inventory sold from applying purchase accounting to the Edgetech inventory acquired. Additionally, Edgetech results include \$3.0 million in amortization expense from the acquired intangibles for the year ended October 31, 2011.

The following table provides unaudited pro forma consolidated results of operations for the combined entity for year ended October 31, 2011 and 2010 as if Edgetech had been acquired as of the first day of the Company's fiscal 2010 period.

	Unaudited Pro forma Year Ended October 31, 2011 2010 (In thousands, except	
	per share amounts)	
Net sales	\$ 878,291	\$ 872,691
Operating income (loss)	20,530	33,706
Income (loss) from continuing operations	\$ 11,496	\$ 21,256
Diluted earnings (loss) per common share from continuing operations	\$ 0.31	\$ 0.56

The unaudited pro forma consolidated results of operations were prepared using the acquisition method of accounting and are based on the historical financial information of the Company and Edgetech. The unaudited pro forma financial information does not purport to reflect the results the combined company may achieve in future periods or the results that would have been obtained had Quanex acquired Edgetech on the first day of its fiscal 2010 period. The unaudited pro forma financial information does not include any operating efficiencies or cost savings that may be achieved or any integration expenses. Additionally, the historical Edgetech financial information has not been adjusted to remove expenses that will cease under Quanex's ownership, such as the

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

prior parent company allocation, or to add incremental anticipated stand-alone expenses going forward. Generally, the pro forma financial information reflects the allocation of the purchase price to the appropriate assets and liabilities based upon their fair values, and related changes in depreciation and amortization expense. Accordingly, such amounts are not necessarily indicative of the results that would have occurred if the acquisition had occurred on the dates indicated or that may result in the future. The unaudited pro forma information reflects primarily the following unaudited pro forma adjustments:

Amortization expense related to the fair value of identifiable intangible assets acquired;

Additional depreciation expense related to the fair value adjustment to property, plant and equipment acquired;

Additional facility rental expense;

Additional cost of goods sold of \$2.0 million in the year ended October 31, 2010 to reflect the increased value of inventory sold as a result of applying purchase accounting, and a partially offsetting benefit in cost of goods sold of \$1.8 million in the year ended October 31, 2011;

Additional expense of \$2.5 million in the year ended October 31, 2010 to reflect the transaction-related costs incurred, and an offsetting reduction of expense of \$2.5 million in the year ended October 31, 2011;

The Edgetech historical results and all of the above adjustments were adjusted for the applicable tax impact.

In March 2011, the Company also acquired JELD-WEN's vinyl extrusion assets in Yakima, Washington (Yakima) for \$6.4 million in cash consideration. This acquisition was effected through an asset purchase of vinyl extrusion related equipment and certain other assets. Yakima was integrated into one of the Company's existing Engineered Products businesses, and the net assets acquired primarily included \$5.0 million of property, plant and equipment and \$1.4 million of intangible assets. There was no goodwill recognized in connection with the Yakima acquisition.

4. Goodwill and Acquired Intangible Assets*Goodwill*

All of the Company's goodwill is recorded on the Engineered Products segment. The changes in the carrying amount of goodwill for the years ended October 31, 2011 and 2010 are as follows (in thousands):

	Engineered Products Goodwill
Balance at October 31, 2009	\$ 25,189
Other	

Edgar Filing: Quanex Building Products CORP - Form 10-K

Balance at October 31, 2010	\$	25,189
Acquisition		44,623
Foreign currency translation adjustment		(380)
Balance at October 31, 2011	\$	69,432

Under ASC 350, goodwill is no longer amortized, but is reviewed for impairment annually or more frequently if certain indicators arise. The Company elected to make August 31 the annual impairment assessment date for goodwill.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Beginning in October 2008 and continuing into the first quarter of fiscal 2009, the Company's market capitalization declined below book value. During the first fiscal quarter of 2009, based on a combination of factors, including additional declines in housing start projections, falling aluminum ingot prices, further deterioration of the overall market conditions in the building products industry, downward revision to earnings guidance, and the continued gap between the Company's market value of equity and book value of equity, the Company concluded that there were sufficient indicators to require Quanex to perform an interim goodwill impairment analysis during first fiscal quarter of 2009. Accordingly, the Company performed an interim impairment analysis and recorded a non-cash goodwill impairment charge of \$170.7 million during fiscal year 2009 leaving \$25.2 million of goodwill remaining on the Company's balance sheet post-impairment. Since this goodwill impairment charge was non-cash, it did not affect liquidity or the Consolidated Leverage Ratio and Consolidated Interest Coverage Ratio contained in the Company's Credit Facility financial covenants (see Note 10 for further information regarding financial covenants and definitions of ratios). Following this interim goodwill impairment charge, the August 31, 2009 annual review of goodwill indicated that goodwill was not further impaired.

In accordance with ASC Topic 350, *Goodwill and Other Intangible Assets*, a detailed determination of the fair value of the reporting unit may be carried forward from one year to the next if all of the following conditions are met: a) assets and liabilities that make up the reporting unit have not changed since the most recent fair value determination (August 31, 2009 valuations used for fiscal 2010 fair values), b) the most recent fair value determination resulted in an amount that exceeded the carrying amount of the reporting unit by a substantial margin, c) based on analysis of events that have occurred and circumstances that have changed since the most recent fair value determination, the likelihood that a current fair value determination would be less than the current carrying amount of the reporting unit is remote. Based on the Company's analysis of the above criteria, the Company carried forward the fiscal 2009 detailed determination of the fair value of its reporting units to fiscal 2010. As the fair value of the reporting units exceeded their respective carrying amount, no impairment of goodwill was incurred at August 31, 2010.

The August 31, 2011 review of goodwill indicated that goodwill was not impaired. As a result of the first step of this annual goodwill impairment analysis, the fair value of each reporting unit exceeded its carrying value. Therefore, the second step was not necessary.

Acquired Intangible Assets

Intangible assets consist of the following (in thousands):

	As of October 31, 2011		As of October 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Intangible assets subject to amortization:				
Patents and other technology	\$ 25,300	\$ (7,552)	\$ 11,560	\$ (6,175)
Trademarks and trade names	44,857	(11,540)	33,530	(9,156)
Customer relationships	44,260	(8,588)	21,200	(6,291)
Other	1,392	(186)		
Total	\$ 115,809	\$ (27,866)	\$ 66,290	\$ (21,622)

The intangible assets are being amortized over the period they are expected to contribute to the future cash flows of the Company. No residual value is estimated for the intangible assets.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Based on a combination of factors, including additional declines in housing start projections and further deterioration of the overall market conditions in the building products industry, the Company determined that there were events and circumstances during the first quarter of 2009 that could indicate that its carrying amount of intangible assets may not be recoverable. Accordingly, intangible assets were tested for recoverability during the three months ended January 31, 2009. The carrying amount of an intangible asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the intangible asset. If the carrying amount is not recoverable, the impairment loss is measured as the amount by which the carrying amount of the intangible exceeds its fair value. An impairment loss of \$11.9 million was recognized during the three months ended January 31, 2009 on certain Engineered Products trademarks, trade names and patents whose carrying amount was not recoverable and whose carrying amount exceeded fair value. Fair value was determined by the relief from royalty approach which is a variation of the income approach. The intangible asset impairment charge is included in Asset impairment charges in the accompanying Consolidated Statements of Income. Since this intangible impairment charge is non-cash, it does not affect liquidity or financial covenants. No material impairment charges were recorded in 2011 or 2010.

The aggregate amortization expense for intangibles for the years ended October 31, 2011, 2010, and 2009 is \$6.3 million, \$3.1 million and \$3.2 million, respectively. Estimated amortization expense for the next five years for existing intangibles follows (in thousands):

Fiscal Years Ending	Estimated Amortization
October 31,	
2012	8,390
2013	8,337
2014	8,213
2015	8,074
2016	7,833

5. Earnings per Share

The computational components of basic and diluted earnings per share from continuing operations for fiscal 2011 and 2010 are below (shares and dollars in thousands except per share amounts). As discussed below, fiscal 2009 basic and diluted earnings per share from continuing operations are identical as the Company reported a loss from continuing operations.

	For the Year Ended October 31, 2011		
	Numerator (Income)	Denominator (Shares)	Per Share Amount
Basic earnings and earnings per share	\$ 9,078	37,007	\$ 0.24
Effect of dilutive securities:			
Common stock equivalents arising from stock options		328	
Restricted stock		202	
Diluted earnings and earnings per share	\$ 9,078	37,537	\$ 0.24

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

	For the Year Ended October 31, 2010		
	Numerator (Income)	Denominator (Shares)	Per Share Amount
Basic earnings and earnings per share	\$ 24,201	37,220	\$ 0.65
Effect of dilutive securities:			
Common stock equivalents arising from stock options		261	
Restricted stock		190	
Diluted earnings and earnings per share	\$ 24,201	37,671	\$ 0.64

The computation of diluted earnings per share excludes outstanding options and other common stock equivalents in periods where inclusion of such potential common stock instruments would be anti-dilutive in the periods presented. When income from continuing operations is a loss, all potential dilutive instruments are excluded from the computation of diluted earnings per share as they would be anti-dilutive. Accordingly, for the year ended October 31, 2009, 0.1 million of restricted stock and 0.1 million of common stock held by the rabbi trust were excluded from the computation of diluted earnings per share as the Company had a loss from continuing operations.

For the years ended October 31, 2011 and 2010, the Company had 0.7 million and 0.3 million of stock options, respectively, that are potentially dilutive in future earnings per share calculations. Such dilution will be dependent on the excess of the market price of the Company's stock over the exercise price and other components of the treasury stock method.

6. Inventories

Inventories consist of the following:

	October 31,	
	2011	2010
	(In thousands)	
Raw materials	\$ 27,862	\$ 18,823
Finished goods and work in process	24,988	23,756
Supplies and other	2,992	2,621
Total	\$ 55,842	\$ 45,200

The values of inventories are based on the following accounting methods:

	October 31,	
	2011	2010
	(In thousands)	
LIFO	\$ 18,782	\$ 20,122
FIFO	37,060	25,078
Total	\$ 55,842	\$ 45,200

Edgar Filing: Quanex Building Products CORP - Form 10-K

With respect to inventories valued using the LIFO method, replacement cost exceeded the LIFO value by approximately \$12.3 million and \$10.1 million at October 31, 2011 and 2010, respectively. During fiscal 2011 and fiscal 2010, there were LIFO liquidations that resulted in a reduction of the LIFO reserve (credit to cost of

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

sales) of approximately \$0.9 million and \$1.2 million, respectively. The LIFO liquidations increased the amount of income recognized in the respective years compared to what would have been recognized had there been no liquidations.

LIFO reserve adjustments are treated as corporate expenses as this matches how management reviews the businesses. The LIFO reserve adjustments are calculated on a consolidated basis in a single consolidated pool using the dollar-value link chain method. Upon completion of the consolidated calculation, the resulting reserve that is recorded to reflect inventories at their LIFO values is not allocated to the segments. Management believes LIFO reserves to be a corporate item and thus performs all reviews of segment operations on a FIFO or weighted-average basis.

Acquisitions are integrated into the Company's operations with some valuing inventory on a LIFO basis and others on a FIFO basis. The selection of the inventory valuation treatment of each acquisition depends on the facts and circumstances that existed at the time of the acquisition, including expected inventory levels and pricing expected in the foreseeable future; this evaluation is applied on each transaction individually. As discussed above, management reviews all of the businesses on a FIFO or weighted-average basis for comparability, with the LIFO reserve treated as a corporate item.

7. Property, Plant and Equipment

Property, plant and equipment consist of the following:

	October 31,	
	2011	2010
	(In thousands)	
Land and land improvements	\$ 9,608	\$ 9,827
Buildings and building improvements	71,170	68,276
Machinery and equipment	374,733	344,996
Construction in progress	14,983	11,420
Property, plant and equipment, gross	470,494	434,519
Less: accumulated depreciation and amortization	(312,285)	(299,002)
Property, plant and equipment, net	\$ 158,209	\$ 135,517

Depreciation expense for the years ended October 31, 2011, 2010, and 2009 was \$27.6 million, \$25.1 million, and \$29.2 million, respectively. The Company recorded asset impairment charges for its real property during the fourth quarter of fiscal 2011 of \$1.6 million related to its plan to consolidate its insulating glass operations. See Note 20 for additional information. The Company had commitments for the purchase or construction of capital assets amounting to approximately \$6.4 million at October 31, 2011.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****8. Accrued Liabilities**

Accrued liabilities consist of the following:

	October 31,	
	2011	2010
	(In thousands)	
Payroll, payroll taxes and employee benefits	\$ 13,877	\$ 22,312
Accrued insurance and workers compensation	6,337	3,977
Sales allowances	3,572	3,975
Accrued capital expenditures	2,576	3,621
Deferred revenue	2,593	3,005
Environmental	1,965	1,564
Warranties	1,671	968
Audit, legal, and other miscellaneous professional fees	1,380	738
Accrued rent	1,267	875
Other	2,820	2,412
Accrued liabilities	\$ 38,058	\$ 43,447

9. Income Taxes

Income taxes are provided on taxable income at the statutory rates applicable to such income.

Components of income taxes excluding discontinued operations are as follows:

	Years Ended October 31,		
	2011	2010	2009
Income / (loss) from continuing operations before income taxes (in thousands)			
U.S.	\$ 17,610	\$ 39,602	\$ (178,924)
Non-U.S.	(2,095)	(100)	(221)
Total	\$ 15,515	\$ 39,502	\$ (179,145)

	Years Ended October 31,		
	2011	2010	2009
Income tax (benefit) expense (in thousands)			
Current			
Federal	\$ 1,949	\$ 2,729	\$ 413
State and local	390	386	197
Non-U.S.	737	(108)	(67)
Total current	3,076	3,007	543
Deferred			

Edgar Filing: Quanex Building Products CORP - Form 10-K

Federal	3,964	10,806	(37,680)
State and local	596	1,450	(5,882)
Non-U.S.	(1,199)	38	(47)
Total deferred	3,361	12,294	(43,609)
Total	\$ 6,437	\$ 15,301	\$ (43,066)

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

	Years Ended October 31,		
	2011	2010	2009
Reconciliation of effective tax rate			
U.S. tax at statutory rate	35.0%	35.0%	35.0%
State and local income tax	4.4	3.0	2.0
Non-U.S. income tax	1.1		
Goodwill and intangibles			(13.3)
Transaction costs	4.7		
General business credits	(2.6)		
Other	(1.1)	0.7	0.3
Effective tax rate	41.5%	38.7%	24.0%

Prepaid and other current assets on the Consolidated Balance Sheets include an income tax receivable of \$0.2 million and \$2.6 million as of October 31, 2011 and 2010, respectively.

The non-current deferred income taxes asset balance decreased from \$30.6 million as of October 31, 2010 to \$7.7 million as of October 31, 2011. This large decrease primarily relates to the non-current deferred income tax liability established in the Edgetech acquisition.

Significant components of the Company's net deferred tax assets are as follows:

	October 31,	
	2011	2010
	(In thousands)	
Deferred tax assets:		
Employee benefit obligations	\$ 11,224	\$ 11,152
Goodwill and intangibles	6,580	28,003
Accrued liabilities and reserves	4,122	2,317
Pension and other benefit obligations	3,694	1,946
Inventory	3,277	3,254
Loss and tax credit carry forwards	2,505	1,489
Property, plant and equipment		4,958
Other	373	279
Total deferred tax assets	31,775	53,398
Deferred tax liabilities:		
Property, plant and equipment	2,256	
Net deferred tax assets	\$ 29,519	\$ 53,398
Deferred income tax assets, non-current	\$ 18,299	\$ 42,851
Deferred income tax assets, current	11,220	10,547
Net deferred tax assets	\$ 29,519	\$ 53,398

Edgar Filing: Quanex Building Products CORP - Form 10-K

Operating loss carry forwards for tax purposes were \$21.5 million at October 31, 2011. Most of these losses begin to expire in 2025. Tax credits available to offset future tax liabilities are \$0.5 million and are expected to be utilized within the next twelve months. Tax benefits of operating losses and tax credit carry forwards are evaluated on an ongoing basis, including a review of historical and projected future operation results, the eligible carry forward period and other circumstances.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

A reconciliation of the change in the unrecognized income tax benefit balance from November 1, 2008 to October 31, 2011 is as follows (in thousands):

	Accrued Interest and Penalties	Unrecognized Income Tax Benefits
Balance at November 1, 2008	\$ 43	\$ 16,999
Additions for tax positions related to the current year		9
Additions for tax positions related to the prior year	166	1,324
Balance at October 31, 2009	\$ 209	\$ 18,332
Additions for tax positions related to the current year		13
Additions for tax positions related to the prior year	227	270
Balance at October 31, 2010	\$ 436	\$ 18,615
Additions for tax positions related to the current year		13
Additions for tax positions related to the prior year	301	414
Balance at October 31, 2011	\$ 737	\$ 19,042

The Company's unrecognized tax benefit (UTB) is related to the Separation as discussed in Note 1 and state tax items regarding the interpretations of tax laws and regulations. The total UTB as of October 31, 2011 is \$19.0 million. Of this, \$8.4 million is recorded in Liability for uncertain tax positions and \$10.6 million is recorded in Deferred income taxes (non-current assets). The UTB includes \$1.1 million for which the disallowance of such items would not affect the annual effective tax rate. As of October 31, 2010 the total UTB was \$18.6 million with \$6.3 million recorded in Liabilities for uncertain tax positions and \$12.3 million recorded in Deferred income taxes (non-current assets). For the years ended October 31, 2011 and 2010, the Company recognized \$0.3 million and \$0.2 million, respectively in interest and penalties, which are reported as Income tax expense in the Consolidated Statements of Income consistent with past practice.

The Company and its subsidiaries file income tax returns in the U.S. federal and various state jurisdictions as well as in the U.K., Germany and Canada. The Company is not currently under a tax examination, but in certain jurisdictions the statute of limitations has not yet expired. The Company generally remains subject to examination of its U.S. federal income tax returns for 2008 and subsequent years. The Company generally remains subject to examination of its various state income tax returns for a period of four to five years from the date the return was filed. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the state of the federal change.

Judgment is required in assessing the future tax consequences of events that have been recognized in the Company's financial statements or income tax returns. The final outcome of the future tax consequences of legal proceedings, if any, as well as the outcome of competent authority proceedings, changes in regulatory tax laws, or interpretation of those tax laws could impact the Company's financial statements. The Company is subject to the effects of these matters occurring in various jurisdictions. The Company believes that it is reasonably possible that a decrease of approximately \$3.5 million in the UTB may be recognized within the next twelve months as a result of a lapse in the statute of limitations.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****10. Long-Term Debt and Capital Lease Obligations**

Long-term debt consists of the following:

	October 31,	
	2011	2010
	(In thousands)	
Revolving Credit Facility	\$	\$
City of Richmond, Kentucky Industrial Building Revenue Bonds	900	1,000
Scott County, Iowa Industrial Waste Recycling Revenue Bonds	600	800
Capital lease obligations and other	166	143
Total debt	\$ 1,666	\$ 1,943
Less maturities due within one year included in current liabilities	352	327
Long-term debt	\$ 1,314	\$ 1,616

Credit Facility

The Company's \$270.0 million Senior Unsecured Revolving Credit Facility (the Credit Facility) was executed on April 23, 2008. The Credit Facility has a five-year term and is unsecured. The Credit Facility expires April 23, 2013 and provides for up to \$50.0 million for standby letters of credit, limited to the undrawn amount available under the Credit Facility. Borrowings under the Credit Facility bear interest at a spread above LIBOR based on a combined leverage and ratings grid. Proceeds from the Credit Facility may be used to provide availability for acquisitions, working capital, capital expenditures and general corporate purposes.

Under the Credit Facility, the Company is obligated to comply with certain financial covenants requiring the Company to maintain a Consolidated Leverage Ratio of no more than 3.25 to 1 and a Consolidated Interest Coverage Ratio of no less than 3.00 to 1. As defined by the Credit Facility's indenture, the Consolidated Leverage Ratio is the ratio of consolidated indebtedness as of such date to consolidated EBITDA for the previous four fiscal quarters; and the Consolidated Interest Coverage Ratio is the ratio of consolidated EBITDA to consolidated interest expense, in each case for the previous four consecutive fiscal quarters. EBITDA is defined by the indenture to include proforma EBITDA of acquisitions and to exclude certain items like non-cash charges. Additionally, the Credit Facility contains certain limitations on additional indebtedness, asset or equity sales, and acquisitions. Dividends and other distributions are permitted so long as after giving effect to such dividend or stock repurchase, there is no event of default.

As of October 31, 2011, the Company had no borrowings under the Credit Facility, and the Company was in compliance with all Credit Facility financial covenants. The availability under the Credit Facility is a function of both the facility amount utilized and meeting covenant requirements. Although there were no borrowings on the Credit Facility and only \$5.2 million of outstanding letters of credit under the Credit Facility, the aggregate availability under the Credit Facility was limited by the Consolidated Leverage Ratio resulting in an availability of \$188.3 million at October 31, 2011.

Other Debt Instruments

The City of Richmond, Kentucky Industrial Building Revenue Bonds were obtained as part of the acquisition of Mikron. These bonds are due in annual installments through October 2020. Interest is payable monthly at a variable rate. The average rate during fiscal 2011 and fiscal 2010 was 0.6% and 0.4%, respectively. These bonds are secured by the land, building and certain equipment of the Mikron East facility located in Richmond, Kentucky. In addition, a \$0.9 million letter of credit under the Credit Facility serves as a conduit for making the scheduled payments.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

In June 1999, the Company borrowed \$3.0 million through Scott County, Iowa Variable Rate Demand Industrial Waste Recycling Revenue Bonds Series 1999. The bonds require 15 annual principal payments of \$200,000 beginning on July 1, 2000. The variable interest rate is established by the remarketing agent based on the lowest weekly rate of interest that would permit the sale of the bonds at par, on the basis of prevailing financial market conditions. Interest is payable on the first business day of each calendar month. Interest rates on these bonds during fiscal 2011 have ranged from 0.3% to 0.8%. These bonds are secured by a Letter of Credit.

Additional Debt Disclosures

The Company's consolidated debt had a weighted average interest rate of 1.2% and 1.2% as of October 31, 2011 and October 31, 2010, respectively. Approximately 90% and 93% of the total debt had a variable interest rate at October 31, 2011 and 2010, respectively. As of October 31, 2011 and 2010, the Company's debt of \$1.7 million and \$1.9 million approximates fair value as nearly all the Company's debt is at a variable interest rate. As of October 31, 2011, the Company has \$6.2 million in letters of credit, of which \$5.2 million in letters of credit fall under the Credit Facility sublimit.

Aggregate maturities of long-term debt at October 31, 2011, are as follows (in thousands):

2012	\$ 352
2013	353
2014	325
2015	108
2016	108
Thereafter	420
Total	\$ 1,666

11. Retirement Plans

The Company has a number of retirement plans covering substantially all employees. The Company provides both defined benefit and defined contribution plans. In general, the plant or location of his/her employment determines an employee's coverage for retirement benefits.

Pension Plan

The Company has a non-contributory, single employer defined benefit pension plan that covers substantially all non-union employees. Effective January 1, 2007, the Company amended this defined benefit pension plan to include a new cash balance formula for all new salaried employees hired on or after January 1, 2007 and for any non-union employees who were not participating in a defined benefit plan prior to January 1, 2007. All new salaried employees are eligible to receive credits equivalent to 4% of their annual eligible wages, while some of the employees at the time of the amendment were grandfathered and are eligible to receive credits ranging up to 6.5% based upon a percentage they received in the defined contribution plan prior to the amendment of the pension plan. Additionally, every year the participants will receive an interest related credit on their respective balance equivalent to the prevailing 30-year Treasury rate. Benefits for participants in this plan prior to January 1, 2007 continue to be based on a more traditional formula for retirement benefits where the plan pays benefits to employees upon retirement, using a formula based upon years of service and pensionable compensation prior to retirement. Of the Company's participants, 99% are under the cash balance formula.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 was signed into law on December 8, 2003. This Act introduces a Medicare prescription-drug benefit beginning in 2006 as well as a federal subsidy to sponsors of retiree health care plans that provide a benefit at least actuarially equivalent to

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

the Medicare benefit. Management has concluded that the Company's plans are at least actuarially equivalent to the Medicare benefit. The Company has not included the federal subsidy from the Act for those eligible. The impact to net periodic benefit cost and to benefits paid did not have a material impact on the Consolidated Financial Statements.

Funded Status and Net Periodic Benefit Cost

The funded status of the defined benefit pension plan at the respective year-ends was as follows:

	October 31,	
	2011	2010
	(In thousands)	
Change in Benefit Obligation		
Benefit obligation at beginning of year ⁽¹⁾	\$ 15,615	\$ 13,026
Service cost	3,794	3,357
Interest cost	795	661

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The accumulated benefit obligation is the present value of pension benefits (whether vested or unvested) attributed to employee service rendered before the measurement date and based on employee service and compensation prior to that date. The accumulated benefit obligation differs from the projected benefit obligation in that it includes no assumption about future compensation levels. The accumulated benefit obligations of the

Company's pension plans as of the measurement dates in 2011 and 2010 were \$19.4 million and \$14.8 million, respectively. The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for pension plans with accumulated benefit obligations in excess of plan assets were:

	October 31, 2011	2010
	(In thousands)	
Projected benefit obligation	\$ 20,662	\$ 15,615
Accumulated benefit obligation	19,395	14,829
Fair value of plan assets	14,004	12,950

The net periodic benefit cost and other changes in plan assets and benefit obligations recognized in other comprehensive loss (income) (pretax) for the years ended October 31, 2011, 2010 and 2009 were:

	2011	October 31, 2010	2009
	(In thousands)		
Net Periodic Benefit Cost:			
Service cost	\$ 3,794	\$ 3,357	\$ 2,815
Interest cost	795	661	563
Expected return on plan assets	(986)	(754)	(407)
Amortization of net loss	134	146	
Net periodic benefit cost	\$ 3,737	\$ 3,410	\$ 2,971
Other changes in plan assets and benefit obligations recognized in other comprehensive loss (income) (pretax):			
Net loss (gain) arising during the period	\$ 2,271	\$ (998)	\$ 3,651
Prior service cost (credit) arising during the period			
Amortization of gain (loss)	(134)	(146)	
Amortization of prior service (cost) credit			
Total recognized in other comprehensive loss (income)	\$ 2,137	\$ (1,144)	\$ 3,651
Total recognized in net periodic benefit cost and other comprehensive loss (income)	\$ 5,874	\$ 2,266	\$ 6,622

The increase in net pension cost from 2010 to 2011 is primarily attributable to a decrease in the discount rate which effectively increases pension costs and an increase in participants from the Edgetech acquisition. The increase in net pension cost from 2009 to 2010 is primarily attributable to a decrease in the discount rate which effectively increases pension costs.

The amount of prior service cost and net actuarial loss for the defined benefit pension plans that is expected to be amortized from accumulated other comprehensive income and reported as a component of net periodic benefit cost during fiscal 2011 is \$0 and \$218 thousand, respectively.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)***Measurement Date and Assumptions*

The Company uses an October 31 measurement date for its defined benefit plans. The Company generally determines its actuarial assumptions on an annual basis. The assumptions for the pension benefit calculations for the years ended October 31, are as follows:

	Pension Benefits		
	October 31,		
	2011	2010	2009
Weighted average assumptions to determine benefit obligation at year-end:			
Discount rate	4.40%	5.15%	5.65%
Rate of compensation increase	4.00%	4.00%	4.00%
Weighted average assumptions to determine net periodic benefit costs:			
Discount rate	5.15%	5.65%	8.34%
Expected return on plan assets	7.25%	8.00%	8.00%
Rate of compensation increase	4.00%	4.00%	4.00%

The discount rate is used to calculate the present value of the projected benefit obligation for pension benefits. The rate reflects the rate at which benefits could be effectively settled on the measurement date. For 2011, 2010 and 2009, the Company determined its discount rate based on a pension discount curve; and the rate represents the single rate that, if applied to every year of projected benefits payments, would result in the same discounted value as the array of rates that comprise the pension discount curve.

The expected return on plan assets is used to determine net periodic pension expense. The rate of return assumptions are based on projected long-term market returns for the various asset classes in which the plans are invested, weighted by the target asset allocations. The return assumption is reviewed at least annually. The rate of compensation increase represents the long-term assumption for expected increases to salaries.

Plan Assets

The Company's target allocation for the year ending October 31, 2011 and actual asset allocation by asset category and fair value measurements as of October 31, 2011 and 2010 are as follows:

	Target	Actual Allocation at	
	Allocation	October 31,	
		2011	2010
Equity securities	60.0%	59.0%	60.0%
Fixed income	40.0%	41.0%	40.0%

⁽¹⁾ Quoted fair value prices are as of October 31, 2011 and 2010 and are quoted prices in active markets for identical assets (Level 1). Inputs and valuation techniques used to measure the fair value of plan assets vary according to the type of security being valued. All of the equity and debt securities held directly by the plans are actively traded and fair values are determined based on quoted market prices.

The Company's investment objective for defined benefit plan assets is to meet the plans' benefit obligations, while minimizing the potential for future required Company plan contributions. The investment strategies focus on asset class diversification, liquidity to meet benefit payments and an appropriate balance of long-term investment return and risk. Target ranges for asset allocations are determined by matching the actuarial projections of the plans' future liabilities and benefit payments with expected long-term rates of return on the assets, taking into account investment return volatility and correlations across asset classes. Plan assets are diversified across several investment managers and are generally invested in liquid funds that are selected to track broad market equity and bond indices. Investment risk is carefully controlled with plan assets rebalanced to target allocations on a periodic basis and continual monitoring of investment managers performance relative to the investment guidelines established with each investment manager.

Expected Benefit Payments and Funding

The Company's pension funding policy generally has been to make the minimum annual contributions required by applicable regulations while considering targeted funded percentages. In fiscal 2010, the Company decided to modify its funding strategy and accelerate contributions to target a 100% funding threshold. Additionally, the Company will consider funding fiscal year requirements early in the fiscal year to potentially maximize returns on assets. During the third quarter 2010, the Company contributed \$2.7 million in addition to minimum funding requirements to achieve a 100% funded threshold. In fiscal 2011 and 2010, the Company made total pension contributions of \$1.9 million and \$5.3 million, respectively.

During fiscal 2012, the Company expects to contribute approximately \$4.2 million to the pension plan to reach targeted funding levels and meet minimum contribution requirements. For the pension benefit plan, this is comprised of expected contributions to the plan. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. In addition, the Company takes into consideration its business investment opportunities and resulting cash requirements. Accordingly, actual funding may differ greatly from current estimates.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Total benefit payments expected to be paid to participants, which include payments funded from the Company's assets, as discussed above, as well as payments paid from the plan are as follows:

Years Ended October 31,	Pension Benefits (In thousands)
2012	983
2013	1,202
2014	1,627
2015	1,571
2016	1,823
2017 - 2021	13,497

Postretirement Benefit Plan

The Company provides certain healthcare and life insurance benefits for a small number of eligible retired employees employed prior to January 1, 1993. Certain employees may become eligible for those benefits if they reach normal retirement age while working for the Company. The Company continues to fund benefit costs on a pay-as-you-go basis. At October 31, 2011, the Company had a total liability of \$1.2 million of which \$0.1 million was recorded in Accrued liabilities and \$1.1 million was recorded in Deferred pension and postretirement benefits on the Consolidated Balance Sheets. At October 31, 2010, the Company had a total liability of \$1.1 million of which \$0.1 million was recorded in Accrued liabilities and \$1.0 million was recorded in Deferred pension and postretirement benefits on the Consolidated Balance Sheets.

Defined Contribution Plans

The Company also has defined contribution plans to which both employees and the Company make contributions. Effective April 1, 2009, the Company temporarily suspended its matching contributions to the Quanex Building Products Salaried and Non-Union Employee 401(k) Plan as part of its efforts to reduce controllable spending. Effective February 1, 2010, these matching contributions were reinstated. The Company matches 50% up to the first 5% of employee deferrals. The Company contributed approximately \$3.1 million, \$2.2 million and \$1.1 million to these plans in fiscal 2011, 2010 and 2009, respectively. The increase in contributions from 2010 to 2011 primarily resulted from a full year of Company matching contributions in 2011 and an increase in plan participants from acquisitions. The increase in contributions from 2009 to 2010 primarily resulted from the Company reinstating its matching contributions effective February 1, 2010. No shares of the Company's common stock were held by the Company's defined contribution plan as of October 31, 2011 and 2010 as Company stock is no longer an investment option offered under the Plan.

Other

Quanex has a Supplemental Benefit Plan covering certain key officers of the Company. Earned vested benefits under the Supplemental Benefit Plan were approximately \$1.8 million, \$1.1 million and \$0.7 million at October 31, 2011, 2010 and 2009, respectively. The entire October 31, 2011 and 2010 balance is recorded as part of Other (non-current) liabilities. The Company also has a non-qualified Deferred Compensation Plan covering members of the Board of Directors and certain key employees of the Company. The estimated market values of the Deferred Compensation Plan as of October 31, 2011, 2010 and 2009, respectively were approximately \$5.9 million, \$5.0 million and \$5.2 million.

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

12. Industry Segment Information

Business segments are reported in accordance with ASC Topic 280 *Segment Reporting* (ASC 280). ASC 280 requires the Company to disclose certain information about its operating segments where operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker (CODM) in deciding how to allocate resources and in assessing performance. Generally, financial information is required to be reported on the basis that it is used internally for evaluating segment performance and deciding how to allocate resources to segments.

Quanex has two reportable segments: Engineered Products and Aluminum Sheet Products. The Engineered Products segment produces engineered products and components primarily serving the window and door industry, while the Aluminum Sheet Products segment produces common alloy mill finished and coated aluminum sheet serving the broader building and construction markets, as well as other capital goods and transportation markets. The main market drivers of the two segments are residential housing starts and residential repair and remodel (R&R) expenditures.

For financial reporting purposes four of the Company's five operating segments, Homeshield, Truseal Edgetech, and Mikron, have been aggregated primarily based on similar economic characteristics, products, services and processes into the Engineered Products reportable segment. The remaining operating segment, Nichols Aluminum, is reported as a separate reportable segment, Aluminum Sheet Products. The financial performance of the operations is based upon operating income.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies, with the exception of the inventory valuation method. The Company measures its inventory at the segment level on a FIFO or weighted-average basis; however at the consolidated Company level, approximately half of the inventory is measured on a LIFO basis. The LIFO reserve is computed on a consolidated basis as a single pool and is thus treated as a corporate expense. See Note 6 to the financial statements for more information. LIFO inventory adjustments along with corporate office charges and intersegment eliminations are reported as Corporate, Intersegment Eliminations or Other. The Company accounts for intersegment sales and transfers as though the sales or transfers were to third parties, that is, at current market prices. Corporate assets primarily include cash and equivalents partially offset by the Company's consolidated LIFO inventory reserve.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

For the years ended October 31, 2011 and 2010, no one customer represented 10% or more of the consolidated net sales of the Company. For the year ended October 31, 2009, one customer, Andersen Corporation, represented \$62.7 million or 11% of the consolidated net sales of the Company. Both of the Company's segments make sales to Andersen Corporation. Following is selected segment information.

Edgar Filing: Quanex Building Products CORP - Form 10-K

- (2) In 2010, management closed its start-up facility in China; therefore, the China assets are included in discontinued operations for all periods presented.
- (3) In fiscal 2011, Engineered Products recorded asset impairment charges of \$1.8 million. As more fully described in Note 4, in fiscal 2009, the Company recorded a non-cash goodwill impairment charge of \$170.7 million. Engineered Products recorded \$150.3 million, and Aluminum Sheet Products recorded \$20.4 million of the goodwill impairment charge. Additionally, Engineered Products recorded an intangible impairment charge of \$11.9 million in fiscal 2009.
- (4) Increase in Engineered Products identifiable assets are primarily attributable to the Edgetech acquisition on March 31, 2011. See Note 3 for discussion of the acquisition.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)*****Net Sales by Product Information***

Reportable segment net sales separately reflect revenues for each group of similar products. The Engineered Products segment sells window and door components and the Aluminum Sheet Products segment sells aluminum sheet products.

Geographic Information

Operations of the Company and all long-lived assets are located in the United States, U.K. and Germany. Net sales by geographic region are attributed to countries based on the location of the customer and are as follows:

13. Stockholders Equity

The Company's authorized capital stock consists of 125,000,000 shares of Common Stock, par value \$0.01 per share, and 1,000,000 shares of Preferred Stock, no par value, as of October 31, 2011. As of October 31, 2011 and 2010, there were no shares of Preferred Stock issued or outstanding.

Edgar Filing: Quanex Building Products CORP - Form 10-K

Stock Repurchase Program and Treasury Stock

On May 27, 2010, the Board of Directors approved a stock repurchase program of 1.0 million shares, and on August 25, 2011, the Board of Directors authorized an additional 1.0 million shares to this program. The objectives of this program are to manage the dilution created by shares issued under stock-based compensation plans and to repurchase shares opportunistically. The Company records treasury stock purchases under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. The Company uses a moving-average method on the subsequent reissuance of shares, and any resulting proceeds in excess of cost are credited to additional paid in capital while any deficiency is charged to retained earnings.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

As of October 31, 2010, the number of shares in treasury stock was 351,626. During the year ended October 31, 2011, the Company purchased 750,000 shares at a cost of \$10.1 million partially offset by shares issued for stock option exercises and restricted stock grants for a net increase to the number of shares in treasury stock to 1,035,288 as of October 31, 2011. Since inception of the program, Quanex has purchased 1,000,000 shares through October 31, 2011. The remaining shares authorized for repurchase in the program was 1,000,000 as of October 31, 2011.

14. Stock-Based Compensation

Effective with the Separation on April 23, 2008, the Company established the Quanex Building Products Corporation 2008 Omnibus Incentive Plan (the 2008 Plan). The 2008 Plan provides for the granting of stock options, stock appreciation rights, restricted stock, restricted stock units (RSUs), performance stock awards, performance unit awards, annual incentive awards, other stock-based awards and cash-based awards. The 2008 Plan is administered by the Compensation and Management Development Committee of the Board of Directors and allows for immediate, graded or cliff vesting options, but options must be exercised no later than ten years from the date of grant. The aggregate number of shares of common stock originally authorized for grant under the 2008 Plan was 2,900,000. At the Company's annual shareholder meeting in February 2011, the shareholders approved an amendment which increased the aggregate number of shares available for grant under the 2008 Plan by an additional 2,400,000 shares. Any officer, key employee and / or non-employee director of the Company or any of its affiliates is eligible for awards under the 2008 Plan. The initial awards granted under the 2008 Plan were on April 23, 2008; service is the vesting condition. All Quanex Corporation unvested stock options and restricted shares vested as set forth in the Separation related agreements prior to the completion of the Separation on April 23, 2008, and all such Quanex Corporation stock-based compensation awards were settled effective with the Separation.

The Company's practice is to grant options and restricted stock or RSUs to non-employee directors on October 31 of each year, with an additional grant of options to each director on the date of his or her first anniversary of service. Additionally, the Company's practice is to grant options and restricted stock to employees at the Company's December board meeting and occasionally to key employees on their respective dates of hire. The exercise price of the option awards is equal to the closing market price on these pre-determined dates. The Company generally issues shares from treasury stock, if available, to satisfy stock option exercises. If there are no shares in treasury stock the Company issues additional shares of common stock.

The Company's stock-based compensation is related to the Company's stock awards governed by the 2008 Plan. Stock-based compensation recorded in Selling, general and administrative expense for the years ended October 31, 2011, 2010 and 2009 was as follows:

	Years Ended October 31,		
	2011	2010	2009
	(In thousands)		
Stock option expense	\$ 3,166	\$ 2,812	\$ 1,912
Restricted stock amortization	1,537	1,393	1,271
Restricted stock units	149	251	246
Total pretax stock-based compensation expense included in income from continuing operations	\$ 4,852	\$ 4,456	\$ 3,429
Income tax benefit related to stock-based compensation included in net income	\$ 2,003	\$ 1,724	\$ 1,313

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The Company has not capitalized any stock-based compensation cost as part of inventory or fixed assets during the years ended October 31, 2011, 2010 and 2009. Cash proceeds from stock option exercises and the related tax benefits are a component of financing cash flows from continuing operations. Cash received from stock option exercises for the year ended October 31, 2011 was \$0.9 million. The actual tax benefit realized for the tax deductions from stock option exercises and lapses on restricted stock totaled \$0.2 million. Cash received from stock option exercises for the year ended October 31, 2010 was \$0.4 million. The actual tax benefit realized for the tax deductions from stock option exercises and lapses on restricted stock totaled \$0.1 million. There were no stock option exercises as of October 31, 2009.

Stock Options

The Company uses the Black-Scholes-Merton option-pricing model to estimate the fair value of its stock options. A description of the methodology for the valuation assumption follows:

Expected Volatility For the 2011, 2010 and 2009 grants, expected volatility was determined based on the historical data available for peer companies as Quanex Building Products Corporation is a new company with no historical price data available. The expected volatility assumption is adjusted if future volatility is expected to vary from historical experience.

Expected Term - The expected term of options represents the period of time that options granted are expected to be outstanding and falls between the option's vesting and contractual expiration dates. Quanex Building Products Corporation is a new company with no company specific exercise behavior available. Accordingly, for the 2011, 2010 and 2009 grants, expected term was determined based on historical data from Quanex Corporation considering that Quanex Corporation's employee group was the most similar to Quanex Building Products Corporation's employee group. Separate groups of employees that have similar historical exercise behavior are considered separately. Accordingly, the expected term range given below results from certain groups of employees exhibiting different behavior.

Risk-Free Rate - The risk-free rate is based on the yield at the date of grant of a zero-coupon U.S. Treasury bond whose maturity period equals the option's expected term.

Expected Dividend Yield For the 2011, 2010, and 2009 grants, this valuation assumption was based on the expected dividend yield of Quanex Building Products Corporation.

The fair value of each option was estimated on the date of grant. The following is a summary of valuation assumptions for grants during the years ended October 31, 2011, 2010 and 2009:

Valuation assumptions	Grants During the Years Ended October 31,		
	2011	2010	2009
Weighted-average expected volatility	53.0%	55.0%	47.0%
Expected term (in years)	4.9-5.1	4.9-5.1	4.9-5.1
Risk-free interest rate	1.7%	2.0%	1.6%
Expected dividend yield over expected term	1.0%	1.0%	1.0%
Weighted-average grant-date fair value per share	\$ 7.42	\$ 7.38	\$ 3.21

The fluctuation in the weighted average grant-date fair value is primarily related to the Company's stock price; for Quanex Building Products Corporation, the weighted-average market price on the date of grant was \$17.13 in 2011 compared to \$16.39 in 2010 and \$8.24 in 2009.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Below is a table summarizing the stock option activity for the 2008 Plan, since October 31, 2010:

	Shares	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (000s)
Outstanding at October 31, 2010	1,724,301	\$ 13.24		
Granted	480,392	17.13		
Exercised	(61,338)	14.13		
Cancelled/Expired	(5,919)	14.87		
Outstanding at October 31, 2011	2,137,436	14.08	7.2	\$ 3,520
Vested or expected to vest at October 31, 2011	2,066,525	14.03	7.2	\$ 3,430
Exercisable at October 31, 2011	1,347,917	13.46	6.6	\$ 2,393

The total intrinsic value of options (the amount by which the market price of the stock on the date of exercise exceeded the exercise price of the option) exercised during the years ended October 31, 2011 and 2010 were \$0.3 million and \$0.3 million, respectively. No options were exercised during fiscal year 2009. The total fair value of shares vested during the year ended October 31, 2011 and October 31, 2010 was \$2.9 million and \$2.1 million, respectively. Total unrecognized compensation cost related to stock options granted under the 2008 Plan was \$2.6 million as of October 31, 2011. That cost is expected to be recognized over a weighted-average period of 1.6 years.

Restricted Stock

Under the 2008 Plan, common stock may be awarded to key employees, officers and non-employee directors. The recipient is entitled to all of the rights of a shareholder, except that during the forfeiture period the shares are nontransferable. The awards vest over a specified time period, but typically either immediately vest or cliff vest over a three-year period with service as the vesting condition. Upon issuance of stock under the plan, fair value is measured by the grant date price of the Company's shares. This fair value is then expensed over the restricted period with a corresponding increase to additional paid-in-capital. A summary of non-vested restricted shares at October 31, 2010, and changes during the year ended October 31, 2011 follows.

	Shares	Weighted- Average Grant- Date Fair Value Per Share
Nonvested at October 31, 2010	378,616	\$ 13.07
Granted	69,200	17.14
Vested	(166,219)	15.29
Cancelled	(25,207)	13.62
Nonvested at October 31, 2011	256,390	12.67

Edgar Filing: Quanex Building Products CORP - Form 10-K

For the following discussion, the Separation and periods prior to the Separation include restricted stock awards awarded to former vehicular products employees whose expense is reported in discontinued operations. However, just prior to the Separation, restrictions on all outstanding restricted stock awards lapsed. Therefore, all activity post Separation would relate to the Company's continuing operations. Restricted stock awards prior to Separation were granted under the predecessor plans as described previously. The weighted-average grant-date fair value of restricted stock granted during the years ended October 31, 2011, 2010, and 2009 was \$17.14, \$16.21, and \$7.82, respectively. The total fair value of restricted stock vested during the years ended October 31,

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

2011, 2010, and 2009 were \$2.5 million, \$0.1 million, and \$0.1 million, respectively. Total unrecognized compensation cost related to unamortized restricted stock awards was \$1.3 million as of October 31, 2011. That cost is expected to be recognized over a weighted-average period of 1.7 years.

Restricted Stock Units

Restricted stock units (RSUs) were historically awarded to non-employee directors in lieu of restricted stock. Beginning in fiscal 2010, RSUs were awarded to key employees. RSUs are granted under the 2008 Plan. RSUs are not considered to be outstanding shares of common stock and do not have voting rights. Holders of RSUs receive cash for an equivalent amount of cash dividends paid on the underlying common stock. Upon the earlier of the date the director ceases to be a board member or a change of control or upon vesting for the employee grants, each RSU is payable in cash in an amount equal to the market value of one share of the Company's common stock. Accordingly, the RSU liability will be adjusted to fair market value at each reporting date. The Company granted 10,278, 29,388, and 9,426 RSU awards in 2011, 2010, and 2009, respectively. The fair market value per share of the outstanding awards was \$14.75 and \$18.02 as of October 31, 2011 and 2010, respectively, and the aggregate amount charged to expense with respect to these awards was \$0.1 million, \$0.3 million, and \$0.2 million in fiscal 2011, 2010, and 2009, respectively. The number of RSU awards outstanding as of October 31, 2011 and 2010 was 56,410 and 46,132, respectively.

15. Commitments

Quanex has operating leases for certain real estate and equipment. Rental expense for the years ended October 31, 2011, 2010, and 2009 was \$6.0 million, \$4.8 million, and \$4.8 million, respectively. Total minimum rentals to be received in the future under noncancelable subleases as of October 31, 2011 were \$2.8 million. Quanex is a party to non-cancelable purchase obligations primarily for natural gas and aluminum scrap used in the manufacturing process. Amounts purchased under these purchase obligations for the years ended October 31, 2011, 2010 and 2009 were \$2.8 million, \$1.6 million and \$17.5 million, respectively.

Future minimum payments as of October 31, 2011, by year and in the aggregate under operating leases having original non-cancelable lease terms in excess of one year and estimated non-cancellable purchase obligations with remaining terms in excess of a year as of October 31, 2011, by year and in the aggregate were as follows (in thousands):

	Operating Leases	Purchase Obligations
2012	\$ 6,731	\$ 3,941
2013	5,901	420
2014	5,388	24
2015	4,033	
2016	2,621	
Thereafter	8,089	
Total	\$ 32,763	\$ 4,385

16. Contingencies*Environmental*

Quanex is subject to extensive laws and regulations concerning the discharge of materials into the environment and the remediation of chemical contamination. To satisfy such requirements, Quanex must make capital and other expenditures on an ongoing basis. The Company accrues its

best estimates of its remediation

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

obligations and adjusts such accruals as further information and circumstances develop. Those estimates may change substantially depending on information about the nature and extent of contamination, appropriate remediation technologies, and regulatory approvals. In accruing for environmental remediation liabilities, costs of future expenditures are not discounted to their present value, unless the amount and timing of the expenditures are fixed or reliably determinable. When environmental laws might be deemed to impose joint and several liability for the costs of responding to contamination, the Company accrues its allocable share of liability taking into account the number of parties participating, their ability to pay their shares, the volumes and nature of the wastes involved, the nature of anticipated response actions, and the nature of the Company's alleged connections. The cost of environmental matters has not had a material adverse effect on Quanex's operations or financial condition in the past, and management is not currently aware of any conditions that it believes are likely to have a material adverse effect on Quanex's operations, financial condition or cash flows.

Total environmental reserves and corresponding recovery as of October 31, 2011 and October 31, 2010 were as follows:

	October 31, 2011	October 31, 2010
	(In thousands)	
Current ⁽¹⁾	\$ 1,965	\$ 1,564
Non-current	11,221	12,027
Total environmental reserves	\$ 13,186	\$ 13,591
Receivable for recovery of remediation costs ⁽²⁾	\$ 12,304	\$ 12,747

⁽¹⁾ Reported in Accrued liabilities on the Consolidated Balance Sheets

⁽²⁾ Reported in Accounts receivable and Other assets on the Consolidated Balance Sheets

The Company currently is engaged in ongoing remediation activities at one of its subsidiaries, Nichols Aluminum-Alabama, LLC (NAA). NAA operates a plant in Decatur, Alabama that is subject to an Alabama Hazardous Wastes Management and Minimization Act Post-Closure Permit. Among other things, the permit requires NAA to remediate, as directed by the state, historical environmental releases of wastes and waste constituents. Consistent with the permit, NAA has undertaken various studies of site conditions and, during the first quarter of 2006, started a phased program to treat in-place free product petroleum that had been released underneath the plant. During the second quarter 2010, NAA submitted to the state the first component of its proposed workplan for implementing a site-wide remedy. The full workplan was submitted to the state during the third quarter 2010, revised during the second quarter 2011 to reflect both additional sampling data and responses to state comments, and revised again in the fourth quarter 2011 in response to another round of state comments. Based on those plans, which remain subject to further comment, revision, and state approval, the Company's remediation reserve at NAA's Decatur plant is \$12.9 million as of October 31, 2011. Approximately \$1.3 million of the October 31, 2011 reserve represents administrative costs; the balance of \$11.6 million represents estimated costs for investigation, studies, cleanup, and treatment. The reserve has not been discounted. NAA was acquired through a stock purchase in which the sellers agreed to indemnify Quanex and NAA for identified environmental matters related to the business and based on conditions initially created or events initially occurring prior to the acquisition. Environmental conditions are presumed to relate to the period prior to the acquisition unless proved to relate to releases occurring entirely after closing. The limit on indemnification is \$21.5 million excluding legal fees. While the Company's current estimates indicate it will not reach this limit, changing circumstances could result in additional costs or expense that are not foreseen at this time. In accordance with the indemnification, the indemnitors paid the first \$1.5 million of response costs and have been paying 90% of ongoing costs. Based on its experience to date, its estimated cleanup costs going forward, and costs incurred to date as of October 31, 2011, the Company expects to recover from the sellers' shareholders an additional \$12.3 million which has not

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

been discounted. Of that, \$11.6 million is recorded in Other assets on the Consolidated Balance Sheets, and the balance is reflected in Accounts receivable on the Consolidated Balance Sheets. The undiscounted recovery from indemnitors as of October 31, 2010 was \$12.7 million.

The Company's final remediation costs and the timing of those expenditures will depend upon such factors as the nature and extent of contamination, the cleanup technologies employed, the effectiveness of the cleanup measures that are employed, and regulatory concurrences. While actual remediation costs, therefore, may be more or less than amounts accrued, the Company believes it has established adequate reserves for all probable and reasonably estimable remediation liabilities. It is not possible at this point to reasonably estimate the amount of any obligation for remediation in excess of current accruals because of uncertainties as to the extent of environmental impact, cleanup technologies, and concurrence of governmental authorities. The Company currently expects to pay the accrued remediation reserve through at least fiscal 2034, although some of the same factors discussed earlier could accelerate or extend the timing.

Asset Retirement Obligations

The Company has asset retirement obligations at certain Engineered Products leased facilities due to leasehold improvements constructed for the Company's manufacturing processes. Upon lease termination, the Company may be required to remove the leasehold improvements per the lease agreements. As of October 31, 2011 and 2010 the Company has asset retirement obligations for these leasehold improvements of \$0.5 million and \$0.8 million, respectively, which is included in Other liabilities on the Company's Consolidated Balance Sheets. The decrease during 2011 is primarily associated with the consolidation of buildings at the Company's Mikron facility.

Other

From time to time, the Company and its subsidiaries are involved in various litigation matters arising in the ordinary course of their business. Although the ultimate resolution and impact of such litigation on the Company is not presently determinable, the Company's management believes that the eventual outcome of such litigation will not have a material adverse effect on the overall financial condition, results of operations or cash flows of the Company.

17. Warranty Obligations

The Company's estimated obligations for warranty are accrued concurrently with the revenue recognized. The Company makes provisions for its warranty obligations based upon historical experience incurred for such obligations adjusted, as necessary, for current conditions and factors. Due to the significant uncertainties and judgments involved in estimating the Company's warranty obligations, including changing product designs, variance in customer installation process and future claims experience varying from historical claims experience, the ultimate amount incurred for warranty costs could change in the near and long-term from the current estimate.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The following table provides a reconciliation of the activity related to the Company's accrued warranty, including both the current (reported in Accrued liabilities on the Consolidated Balance Sheets) and long-term portions (reported in Other liabilities on the Consolidated Balance Sheets), for the year ended October 31, 2011 and 2010 (in thousands):

	Years Ended October 31,	
	2011	2010
Beginning balance	\$ 3,697	\$ 4,167
Provision for warranty expense	2,638	773
Warranty costs paid	(1,073)	(1,243)
Total accrued warranty	\$ 5,262	\$ 3,697
Less long-term portion	3,591	2,729
Current accrued warranty	\$ 1,671	\$ 968

During the year ended October 31, 2011, the reserve was increased by \$1.9 million related to a rise in projected experience for a discontinued legacy product and claims from some years ago.

18. Fair Value Measurement of Assets and Liabilities

The Company holds Money Market Fund investments that are classified as cash equivalents and are measured at fair value on a recurring basis, based on quoted prices in active markets for identical assets (Level 1). The Company had cash equivalent investments totaling approximately \$80.7 million and \$180.6 million at October 31, 2011 and 2010, respectively. The decrease is primarily related to the \$104.4 million cash paid for the acquisition of Edgetech, net of cash acquired of \$0.8 million.

In addition, the Company's pension plan assets are measured at fair value on a recurring basis, based on quoted prices in active markets for identical assets (Level 1), see Note 11 for additional information.

As of October 31, 2011 and 2010, the Company did not have any assets or liabilities measured at fair value on a recurring basis obtained from readily available pricing sources for comparable instruments (Level 2) or requiring measurement at fair value without observable market values that would require a high level of judgment to determine fair value (Level 3).

19. Other Income (Expense)

Other income (expense) for the years ended October 31, 2011, 2010, and 2009 are as follows:

	Years Ended October 31,		
	2011	2010	2009
	(In thousands)		
Other income (expense)			
Foreign currency transaction gains (losses)	\$ (904)	\$	\$
Gain on bargain purchase		1,272	

Edgar Filing: Quanex Building Products CORP - Form 10-K

Gain on involuntary conversion		914	
Interest income	311	411	388
Other	79	48	17
Other income (expense)	\$ (514)	\$ 2,645	\$ 405

Table of Contents

QUANEX BUILDING PRODUCTS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The Company incurred \$0.9 million of transaction losses which are included in determining net income primarily related to Edgetech's international operations and foreign currency denominated exposures during the year ended October 31, 2011. There are no transaction gains or losses during the years ended October 31, 2010 and 2009.

In February 2010, the Company completed a small acquisition for approximately \$1.6 million in consideration. This operation has been integrated into one of its existing Engineered Products businesses. ASC 805 *Business Combinations* requires that a gain be recorded when the fair value of the net assets acquired is greater than the fair value of the consideration transferred. Though uncommon, bargain purchases can occur because of underpayments for the business acquired due to a forced liquidation or distress sale. These assets were acquired at auction due to the business being in Wisconsin receivership proceedings. As such, the Company obtained the assets at a bargain and recognized a gain of approximately \$1.3 million in Other, net in its second fiscal quarter of 2010.

In May 2009, a tornado struck and damaged the Company's Mikron facility in Richmond, Kentucky. In May 2010, the Company received the final insurance payment bringing the total cash proceeds from property insurance settlement to \$1.8 million of which \$0.4 million was received in fiscal 2010 and \$1.4 million was received in fiscal 2009. In its third fiscal quarter of 2010, the Company recorded a gain on involuntary conversion in Other, net of approximately \$0.9 million, which represents the amount of insurance proceeds received over the carrying value of the damaged property.

20. Subsequent Events

In November 2011, management committed to a plan to close its Barbourville, Kentucky facility (Barbourville) which is included in the Engineered Products segment. The consolidation plan, in part, calls for the permanent closing of Barbourville. The equipment used to manufacture the single seal spacer system will be relocated to the Company's Cambridge, Ohio facility. The Company believes this consolidation will allow it to better serve customers through streamlined operations. The consolidation of operations and the subsequent closure of the Barbourville facility are expected to be completed during 2012.

Under ASC Topic 712, *Compensation - Nonretirement Postemployment Benefits*, the Company is required to record charges for contractual termination benefits when it is probable that employees will be entitled to benefits under the contract's terms and the amount can be reasonably estimated. Under ASC Topic 420, *Exit or Disposal Cost Obligations*, the Company is required to record charges for one-time employee termination benefits, contract termination costs, and other associated costs as incurred. No exit costs or termination benefits were incurred as of October 31, 2011. No liability has been accrued for the Barbourville closing as of October 31, 2011.

The total expense expected to be incurred in connection with the closure of Barbourville is \$9 million over the next 12 months, based upon management's best estimate of future events. Of the estimated charges, approximately 60% is related to relocating and starting up the equipment in Cambridge and approximately 40% is associated with salaried and hourly employee termination related costs. In fiscal 2012, the Company will recognize contractual termination benefits under ASC Topic 712. Additionally, costs considered one-time termination benefits will be recognized ratably over the future service period. Discussions regarding the nature and amount of the hourly employee incentive bonuses are ongoing.

In addition, management estimates that spending of approximately \$7 million will be incurred to prepare the Cambridge, Ohio facility for the new operations activity, of which approximately 80% is expected to be capitalized and approximately 20% expensed. Changes to management's estimates may occur. The costs related to the closure, severance and relocation activities will be recorded as incurred, when they meet the definition of a liability, and they will be included in the statements of operations as selling, general, and administrative expenses or as cost of sales, in accordance with the applicable accounting guidance.

Table of Contents**QUANEX BUILDING PRODUCTS CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****21. Quarterly Results of Operations (Unaudited)**

The following sets forth the selected quarterly information for the years ended October 31, 2011 and 2010.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b) as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There have been no changes in internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the most recent fiscal quarter that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Quanex Building Products Corporation and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to management and the Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

All internal control systems, no matter how well designed, have inherent limitations. Even those systems determined to be effective can provide only reasonable assurance with respect to financial statement presentation and preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of October 31, 2011. Deloitte & Touche LLP, the registered public accounting firm that audited the financial statements contained in this report, has issued an attestation report on the Company's internal control over financial reporting.

The evaluation of effectiveness of the Company's internal control over financial reporting did not include the internal control over financial reporting at Edgetech I.G. Inc., an Ohio corporation, the United Kingdom division of Edgetech, and Edgetech Europe GmbH, a Germany company which were acquired on March 31, 2011 and whose financial statements constitute less than 1 percent and 23 percent of net and total assets, respectively, of the consolidated financial statement amounts as of the year ended October 31, 2011. Edgetech's financial statements constitute 6 percent of net sales and 11 percent of net income (Edgetech had a net loss of \$1.0 million of the Company's \$9.7 million of net income) of the consolidated financial statement amounts for the year ended October 31, 2011.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Quanex Building Products Corporation

Houston, Texas

We have audited the internal control over financial reporting of Quanex Building Products Corporation and subsidiaries (the Company) as of October 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control, based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of October 31, 2011, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended October 31, 2011 of the Company and our report dated December 19, 2011 expressed an unqualified opinion on those financial statements and financial statement schedule.

Management Compensation or Incentive Plan

As permitted by Item 601(b)(4)(iii)(A) of Regulation S-K, the Registrant has not filed with this Annual Report on Form 10-K certain instruments defining the rights of holders of long-term debt of the Registrant and its subsidiaries because the total amount of securities authorized under any of such instruments does not exceed 10% of the total assets of the Registrant and its subsidiaries on a consolidated basis. The Registrant agrees to furnish a copy of any such agreements to the Securities and Exchange Commission upon request.
