## SANDERSON FARMS, INC. AND SUBSIDIARIES

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

July 31, 2014

## NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included. Operating results for the three and nine months ended July 31, 2014 are not necessarily indicative of the results that may be expected for the year ending October 31, 2014.

The condensed consolidated balance sheet at October 31, 2013 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. For further information, reference is made to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for its fiscal year ended October 31, 2013.

## NOTE 2 INVENTORIES

Inventories consisted of the following:

	July 31, 2014	October 31, 2013
	(In thousands)	
Live poultry-broilers and breeders	\$ 143,247	\$ 124,260
Feed, eggs and other	36,630	34,949
Processed poultry	21,623	32,139
Prepared chicken	7,934	6,483
Packaging materials	8,414	8,024
	\$ 217,848	\$ 205,855

## NOTE 3 STOCK COMPENSATION PLANS

Refer to Note 9 of the Company's October 31, 2013 audited financial statements for further information on our employee benefit plans and stock based compensation plans. Total stock based compensation expense during the three and nine months ended July 31, 2014 was \$2,820,000 and \$9,937,000, respectively, as compared to total stock based compensation expense of \$3,348,000 and \$5,707,000 for the three and nine months ended July 31, 2013.

During the nine months ended July 31, 2014, participants in the Company's Management Share Purchase Plan elected to receive a total of 10,304 shares of restricted stock at an average price of \$79.05 per share instead of a specified

percentage of their cash compensation, and the Company issued 2,498 matching restricted shares. During the three and nine months ended July 31, 2014, the Company recorded compensation cost, included in the total stock based compensation expense above, of \$51,000 and \$147,000, respectively, as compared to \$49,000 and \$149,000 during the three and nine months ended July 31, 2013.

On November 1, 2013, the Company entered into performance share agreements that grant certain officers and key employees the right to receive a target number of 75,925 shares of the Company's common stock, subject to the Company's achievement of certain performance measures. As of July 31, 2014, the Company could not determine that any of those shares would eventually be earned due to the uncertainties discussed below. The Company also has performance share agreements in place with certain officers and key employees that were entered into on November 1, 2012 and November 1, 2011. Each cycle of performance shares is subject to a two-year performance period and an additional one-year service-based vesting period. As of July 2014, the aggregate number of shares estimated to be awarded related to the November 1, 2012 performance share agreements totaled 188,298 shares. The actual number of shares that can be awarded for those agreements could change materially from that estimate due to the Company's actual performance during the remaining three months of the performance period ending October 31, 2014, and due to potential forfeitures. As of July 31, 2014, the aggregate number of shares estimated to be awarded related to the November 1, 2011 performance share agreement totaled 102,653 shares. Since the performance period for those agreements has ended, the actual number of shares that will be awarded can change only due to potential forfeitures during the remaining three months of the service period ending October 31, 2014. During the three and nine months ended July 31, 2014, the Company recorded compensation expense of \$393,000 and \$1,134,000, included in the total stock based compensation expense above, related to the performance share agreements entered into on November 1, 2011, as compared to \$2,200,000 during the three and nine months ended July 31, 2013. During the second quarter of fiscal 2014, the Company determined that achievement of the applicable performance based criteria for the November 1, 2012 agreement is probable.

**Table of Contents**

Accordingly, the three and nine months ended July 31, 2014 include compensation expense of \$1,070,000 and \$5,120,000, respectively, included in the total stock based compensation expense above, related to the performance share agreements entered into on November 1, 2012. The Company recorded no compensation expense related to the performance share agreements entered into on November 1, 2013, as it could not determine that achievement of the applicable performance based criteria is probable. In estimating the compensation expense to record in a period, the Company considers, among other factors, current and projected grain costs and chicken volumes and pricing, as well as the amount of the Company's commitments to procure grain at a fixed price throughout the performance period. Due to the high level of volatility of these commodity prices and the impact that the change in pricing can have on the Company's results, the Company's assessment of probability can change from period to period and can result in a significant revision to the amounts accrued related to the arrangements.

On November 1, 2013, the Company granted 75,925 shares of restricted stock to certain officers and key management employees. The restricted stock had a grant date fair value of \$65.63 per share and will vest on November 1, 2017. On February 13, 2014, the Company granted an aggregate of 23,000 shares of restricted stock to all of its non-employee directors. The restricted stock had a grant date fair value of \$72.66 per share and vests one, two or three years from the date of grant. The Company has unvested restricted stock grants outstanding that were granted during prior fiscal years to its officers, key employees and outside directors. The aggregate number of shares outstanding at July 31, 2014, related to all unvested restricted stock grants totaled 567,450. During the three and nine months ended July 31, 2014, the Company recorded compensation cost, included in the total stock based compensation expense above, of \$1,306,000 and \$3,536,000, respectively, related to restricted stock grants, as compared to \$1,099,000 and \$3,358,000 during the three and nine months ended July 31, 2013. The Company had \$8.5 million in unrecognized share-based compensation costs as of July 31, 2014, that will be recognized over a weighted average remaining vesting period of 1.5 years.

**NOTE 4 EARNINGS PER SHARE**

Certain share-based payment awards entitling holders to receive non-forfeitable dividends before vesting are considered participating securities and thus are included in the calculation of basic earnings per share, to the extent they are dilutive. These awards are included in the calculation of basic earnings per share under the two-class method. The two-class method allocates earnings for the period between common shareholders and other security holders. The participating awards receiving dividends are allocated the same amount of income as if they were vested shares.

The following table presents earnings per share.

	<b>For the three months ended</b>	
	<b>July 31, 2014</b>	<b>July 31, 2013</b>
	(in thousands except per share amounts)

**Table of Contents****NOTE 5 FAIR VALUE OF FINANCIAL INSTRUMENTS**

The Company holds certain items that are required to be disclosed at fair value, primarily cash equivalents representing overnight investments and debt instruments. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A three-level hierarchy is followed for disclosure to show the extent and level of judgment used to estimate fair value measurements:

**Level 1** Inputs used to measure fair value are unadjusted quoted prices that are available in active markets for the identical assets or liabilities as of the reporting date.

**Level 2** Inputs used to measure fair value, other than quoted prices included in Level 1, are either directly or indirectly observable as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full term of the financial instrument.

**Level 3** Inputs used to measure fair value are unobservable inputs that are supported by little or no market activity and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

At July 31, 2014, and October 31, 2013, the fair value of the Company's cash and short-term cash investments approximated their carrying value due to the short maturity of these financial instruments and were categorized as a Level 2 measurement. Inputs used to measure fair value were primarily recent trading prices and prevailing market interest rates.

Fair values for debt are based on quoted market prices or published forward interest rate curves, and were categorized as Level 2 measurements. The fair value and carrying value of the Company's borrowings under its credit facilities, long-term debt and capital lease obligations were as follows (in millions):

	July 31, 2014		October 31, 2013	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Total Debt (in millions)	\$ 21.6	\$ 20.0	\$ 42.9	\$ 40.2

**NOTE 6 COMMITMENTS AND CONTINGENCIES**

On September 19, 2013, the Company announced plans to invest approximately \$140.0 million for construction of a new feed mill, hatchery, poultry processing plant and waste water facility on separate sites in Palestine, Anderson County, and Freestone County, Texas, and construction commenced in October 2013. To date, the Company has spent approximately \$62.7 million on the project, and we expect to spend the remaining \$77.3 million through the first half of fiscal 2015. Of the total \$140.0 million investment, \$109.7 million is budgeted for fiscal 2014, and approximately \$57.0 million, including \$778,000 of capitalized interest, has been spent during the nine months ended July 31, 2014. We expect the remaining fiscal 2014 budgeted amounts to be spent during the three months ended October 31, 2014, which will leave approximately \$24.6 million to be spent on the project in fiscal 2015. The remaining expenditures are estimates and are subject to change as the project moves toward completion.

The Company is involved in various claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operations or financial position.

The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. After a considerable analysis of each case, the Company determines the amount of reserves required, if any. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed reasonably estimable and probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of reserves or by accruals of losses to reflect any adverse determinations in these legal proceedings.

#### NOTE 7 CREDIT AGREEMENT

The Company has a \$600.0 million revolving credit facility. The facility limits capital expenditures to \$65.0 million for each of fiscal years 2014 through 2018, plus, for each year, up to \$10.0 million carryover from the preceding fiscal year, when it is not actually spent in that year. The capital expenditure limitation for fiscal 2014, with the permitted carry over, is \$75.0 million. The credit facility also permits the Company to spend up to \$140.0 million each in capital expenditures on the construction of two new poultry

**Table of Contents**

complexes to be located anywhere in the United States, which expenditures are in addition to the annual capital expenditure limits. Under the facility, the Company may not exceed a maximum debt to total capitalization ratio of 55% from the date of the agreement through October 30, 2014, and 50% thereafter. The Company has a one-time right, at any time during the term of the agreement, to increase the maximum debt to total capitalization ratio then in effect by 5% in connection with the construction of either of the two potential new poultry complexes for the four fiscal quarters beginning on the first day of the fiscal quarter during which the Company gives written notice of its intent to exercise this right. The Company has not exercised this right. The facility also sets a minimum net worth requirement that at July 31, 2014, was \$560.5 million. The credit is unsecured and, unless extended, will expire on October 24, 2018. As of July 31 and August 22, 2014, the Company had no outstanding draws under the facility, and had approximately \$13.8 million outstanding in letters of credit, leaving \$586.2 million available under the facility.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Sanderson Farms, Inc.

We have reviewed the condensed consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of July 31, 2014, and the related condensed consolidated statements of operations for the three-month and nine-month periods ended July 31, 2014 and 2013 and the condensed consolidated statements of cash flows for the nine-month periods ended July 31, 2014 and 2013. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of October 31, 2013, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended not presented herein and we expressed an unqualified opinion on those consolidated financial statements in our report dated December 17, 2013. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet of Sanderson Farms, Inc. and its subsidiaries as of October 31, 2013, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations  
General

The following Discussion and Analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included in Item 7 of the Company's Annual Report on Form 10-K for its fiscal year ended October 31, 2013.

This Quarterly Report, and other periodic reports filed by the Company under the Securities Exchange Act of 1934, and other written or oral statements made by it or on its behalf, may include forward-looking statements, which are based on a number of assumptions about future events and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and estimates expressed in such statements. These risks, uncertainties and other factors include, but are not limited to the following:

- (1) Changes in the market price for the Company's finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets.
- (2) Changes in economic and business conditions, monetary and fiscal policies or the amount of growth, stagnation or recession in the global or U.S. economies, any of which may affect the value of inventories, the collectability of accounts receivable or the financial integrity of customers, and the ability of the end user or consumer to afford protein.
- (3) Changes in the political or economic climate, trade policies, laws and regulations or the domestic poultry industry of countries to which the Company or other companies in the poultry industry ship product, and other changes that might limit the Company's or the industry's access to foreign markets.
- (4) Changes in laws, regulations, and other activities in government agencies and similar organizations applicable to the Company and the poultry industry and changes in laws, regulations and other activities in government agencies and similar organizations related to food safety.
- (5) Various inventory risks due to changes in market conditions, including, but not limited to, the risk that market values of live and processed poultry inventories might be lower than the cost of such inventories, requiring a downward adjustment to record the value of such inventories at the lower of cost or market as required by generally accepted accounting principles.
- (6) Changes in and effects of competition, which is significant in all markets in which the Company competes, and the effectiveness of marketing and advertising programs. The Company competes with regional and national firms, some of which have greater financial and marketing resources than the Company.
- (7) Changes in accounting policies and practices adopted voluntarily by the Company or required to be adopted by accounting principles generally accepted in the United States.
- (8) Disease outbreaks affecting the production performance and/or marketability of the Company's poultry products, or the contamination of its products.
- (9) Changes in the availability and cost of labor and growers.

(10) The loss of any of the Company's major customers.

(11) Inclement weather that could hurt Company flocks or otherwise adversely affect its operations, or changes in global weather patterns that could impact the supply of feed grains.

(12) Failure to respond to changing consumer preferences.

(13) Failure to successfully and efficiently start up and run a new plant or integrate any business the Company might acquire.

Readers are cautioned not to place undue reliance on forward-looking statements made by or on behalf of Sanderson Farms. Each such statement speaks only as of the day it was made. The Company undertakes no obligation to update or to revise any forward-looking statements. The factors described above cannot be controlled by the Company. When used in this report, the words believes, estimates, plans, expects, should, outlook, and anticipates and similar expressions as they relate to the Company or its management are intended to identify forward-looking statements. Examples of forward-looking statements include statements about management's beliefs about future earnings, production levels, grain prices, supply and demand factors and other industry conditions.

## GENERAL

The Company's poultry operations are integrated through its control of all functions relative to the production of its chicken products, including hatching egg production, hatching, feed manufacturing, raising chickens to marketable age (grow out), processing, and marketing. Consistent with the poultry industry, the Company's profitability is substantially impacted by the market prices for its finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets. Other costs, excluding feed grains, related to the profitability of the Company's poultry operations, including hatching egg production, hatching, growing, and processing cost, are responsive to efficient cost containment programs and management practices.

## **Table of Contents**

The Company's prepared chicken product line includes approximately 130 institutional and consumer packaged chicken items that it sells nationally, primarily to distributors and food service establishments. A majority of the prepared chicken items are made to the specifications of food service users.

On February 14, 2013, the Company announced the selection of sites in and near Palestine, Texas, for the construction of its next poultry complex. Construction of the complex began on or about October 1, 2013, and initial operations are expected to commence during the first calendar quarter of 2015. The new complex will consist of a feed mill, hatchery, poultry processing plant and wastewater facility with the capacity to process 1.25 million chickens per week for the big bird deboning market. Before the complex can open we will need to enter into contracts with a sufficient number of growers and complete construction. See "The construction and potential benefits of our new facilities are subject to risks and uncertainties" in the Risk Factors Section of the Company's Annual Report on Form 10-K for its fiscal year ended October 31, 2013.

On October 24, 2013, the Company entered into a new revolving credit facility to, among other things, increase the total committed credit to \$600.0 million. The new facility also increases the annual capital expenditure limitation to \$65.0 million for fiscal years 2014 through 2018, plus, for each year, up to \$10.0 million carryover from the preceding fiscal year, when it is not actually spent in that year. The capital expenditure limitation for fiscal 2014, with the permitted carry over, is \$75.0 million. The new facility permits the Company to spend up to \$140.0 million each in capital expenditures on the construction of two new poultry complexes to be located anywhere in the United States, which expenditures are in addition to the annual capital expenditure limits. Under the facility, the Company may not exceed a maximum debt to total capitalization ratio of 55% from the date of the agreement through October 30, 2014, and 50% thereafter. The Company has a one-time right, at any time during the term of the agreement, to increase the maximum debt to total capitalization ratio then in effect by 5% in connection with the construction of either of the two potential new poultry complexes for the four fiscal quarters beginning on the first day of the fiscal quarter during which the Company gives written notice of its intent to exercise this right. The Company has not exercised this right. The amendment also sets a minimum net worth requirement that at July 31, 2014, was \$560.5 million. The credit remains unsecured and, unless extended, will expire on October 24, 2018.

## **EXECUTIVE OVERVIEW OF RESULTS**

The Company's margins improved during the third quarter of fiscal 2014 as compared to the third quarter of fiscal 2013 reflecting significantly lower grain prices and slightly higher average sales prices for poultry products. Demand for fresh chicken in the retail grocery store market has been stable, and market prices for product sold to retail grocery store customers are at record high levels. While traffic through food service establishments remains under pressure due to relatively weak employment numbers and consumer confidence, market prices for boneless breast meat and tenders sold to food service customers improved significantly during the third quarter of fiscal 2014 compared to our second quarter of fiscal 2014. We believe this improvement is primarily driven by restricted supply of chicken and the relatively high price of the competing proteins.

Beginning in July 2012, the Company experienced historically high prices for both corn and soybean meal due to the impact on the quality and quantity of the 2012 corn and soybean crops of drought conditions in the Midwestern United States. During fiscal 2013, both corn and soybean meal stabilized below the highs they set in August 2012, but remained high relative to historical averages. While the 2013 United States corn and soybean crops were planted late as a result of wet weather a year ago, cash market prices for both corn and soybean meal moved lower as we moved into the harvest season during our fourth fiscal quarter of 2013 and, although soybean meal prices moved higher than last year's prices during our third quarter of 2014, corn prices remained well below last year's prices through the first nine months of fiscal 2014. During the third quarter of fiscal 2014, as compared to the third quarter of fiscal 2013, the average feed cost in broiler flocks processed was 10.8% lower. The Company has priced little of its grain needs past

August 2014. Had it priced its remaining fiscal year 2014 needs at August 21, 2014 cash market prices, its costs of feed grains would be approximately \$193.8 million lower during fiscal 2014 as compared to fiscal 2013.

While cash market prices and the Company's costs for feed grains have been and are expected to be lower during fiscal 2014 compared to fiscal 2013, soybean meal prices have moved higher compared to our third fiscal quarter of 2013 as a result of tight soybean supplies. Favorable growing conditions in the United States have fueled optimism for robust corn and soybean yields from the 2014 crops, and futures contracts on the Chicago Board of Trade for both corn and soybean meal have trended lower for the balance of calendar 2014 and into 2015. If these trends continue, the Company could experience lower grain costs for the balance of this fiscal year and fiscal 2015. However, these trends could reverse if unfavorable weather conditions develop before harvest.

## RESULTS OF OPERATIONS

Net sales for the third quarter ended July 31, 2014 were \$768.4 million as compared to \$739.0 million for the third quarter ended July 31, 2013, an increase of \$29.4 million or 4.0%. Net sales of poultry products for the third quarter ended July 31, 2014 and 2013, were \$722.6 million and \$712.1 million respectively, an increase of \$10.5 million or 1.5%. The increase in net sales of poultry products

**Table of Contents**

resulted from a 1.3% increase in the pounds of poultry products sold, and a slight 0.2% increase in the average sales price of poultry products sold. During the third quarter of fiscal 2014, the Company sold 780.6 million pounds of poultry products, up from 770.8 million pounds during the third quarter of fiscal 2013. The increased pounds of poultry products sold resulted from a 15.1 million pound decrease in finished goods inventory during the quarter. The pounds sold from inventory were offset by a 1.7% decrease in the number of head processed, and a 0.2% decrease in the average live weight of poultry processed. Overall, market prices for poultry products increased during the third quarter of fiscal 2014 as compared to the same quarter of fiscal 2013. Urner Barry average market prices increased for boneless breast meat and tenders during the third quarter of fiscal 2014 as compared to the third quarter of fiscal 2013 by 2.0% and 26.2%, respectively, while average market prices decreased for jumbo wings and bulk leg quarters during the third quarter of fiscal 2014 as compared to the third quarter of fiscal 2013 by 10.9% and 3.7%, respectively. The average Georgia Dock whole bird market price for the third quarter of fiscal 2014 showed improvement and increased by approximately 5.3% over third quarter 2013 levels. Net sales of prepared chicken products for the third quarter ended July 31, 2014 and 2013 were \$45.7 million and \$26.8 million, respectively, or an increase of 70.5%. This increase resulted from a 61.6% increase in the pounds of prepared chicken products sold, and a 5.5% increase in the average sales price of prepared chicken products sold. During the third quarter of fiscal 2014, the Company sold 21.7 million pounds of prepared chicken products, up from 13.4 million pounds during the third quarter of fiscal 2013. The increase in the pounds of prepared chicken products sold was a result of new customers added during the current fiscal year and, to a lesser extent, increased volume sold to existing customers.

Net sales for the first nine months of fiscal 2014 were \$2,014.0 million as compared to \$1,955.9 million for the first nine months of fiscal 2013, an increase of \$58.1 million, or 3.0%. Net sales of poultry products for the first nine months of fiscal 2014 and 2013 were \$1,903.9 million and \$1,884.0 million, respectively, an increase of \$19.9 million or 1.1%. The increase in net sales of poultry products resulted from a 2.9% increase in the pounds of poultry products sold, offset by a 1.8% decrease in the average sales price of poultry products sold. During the first nine months of fiscal 2014 the Company sold 2,274.1 million pounds of poultry products, up from 2,209.4 million pounds during the first nine months of fiscal 2013. The additional pounds of poultry products sold resulted from a 0.9% increase in the number of head processed, a 1.3% increase in the average live weight of poultry processed, and a 26.4 million pound decrease in finished goods inventory during the quarter. Overall, market prices for poultry products decreased during the first nine months of fiscal 2014 as compared to the same period during fiscal 2013. Urner Barry average market prices decreased for boneless breast meat, jumbo wings, and bulk leg quarters for the first nine months of fiscal 2014 as compared to the first nine months of fiscal 2013 by 0.4%, 28.0%, and 10.6%, respectively, while the average market prices for tenders increased by 15.6% for the same period. The average Georgia Dock whole bird market price for the first nine months of fiscal 2014 showed improvement when compared to the first nine months of fiscal 2013, increasing by approximately 5.2%. Net sales of prepared chicken products for the nine months ended July 31, 2014 and 2013 were \$110.1 million and \$71.9 million, respectively, or an increase of 53.0%. This increase resulted from a 53.2% increase in the pounds of prepared chicken products sold, partially offset by a 0.1% decrease in the average sales price of prepared chicken products sold. During the first nine months of fiscal 2014, the Company sold 55.0 million pounds of prepared chicken products, up from 35.9 million pounds during the first nine months of fiscal 2013.

Cost of sales for the third quarter of fiscal 2014 was \$607.0 million as compared to \$605.0 million during the third quarter of fiscal 2013, an increase of \$2.0 million or 0.3%. Cost of sales of poultry products sold during the third quarter of fiscal 2014 as compared to the third quarter of fiscal 2013 was \$562.5 million and \$579.4 million, respectively, a decrease of \$16.9 million or 2.9%. As illustrated in the table below, the decrease in the cost of sales of poultry products sold resulted from a 10.8% decrease in the costs of feed in broilers processed, or \$0.0435 per pound, partially offset by a 1.3% increase in the pounds of poultry products sold.

## Poultry Cost of Sales

Edgar Filing: SANDERSON FARMS INC - Form 10-Q

(In thousands, except per pound data)

**Table of Contents**

Other costs of sales of poultry products include labor, contract grower pay, packaging, freight and certain fixed costs, among other costs. During the third quarter of fiscal 2014, other costs of sales of poultry products also include approximately \$9.2 million of charges related to the Company's bonus award program, as compared to approximately \$4.1 million during the third quarter of fiscal 2013. These non-feed related costs of poultry products sold increased by \$0.0209 per pound processed, or 6.1%, during this year's third fiscal quarter compared to the same quarter a year ago. Excluding the effects of the bonus award program in each period, the non-feed related costs increased by \$0.0142 per pound processed, or 4.2%, year over year. Costs of sales of the Company's prepared chicken products during the third quarter of fiscal 2014 were \$44.5 million as compared to \$25.6 million during the same quarter a year ago, an increase of \$18.9 million, or 73.6%, primarily attributable to a 61.6% increase in the pounds of prepared chicken sold.

Cost of sales for the nine months ended July 31, 2014 was \$1,675.4 million as compared to \$1,752.1 million during the nine months ended July 31, 2013, a decrease of \$76.7 million, or 4.4%. Cost of sales of poultry products sold for the nine months ended July 31, 2014 and 2013 were \$1,571.4 million and \$1,684.2 million, respectively, a decrease of \$112.8 million, or approximately 6.7%. As illustrated in the table below, the decrease in the cost of sales of poultry products sold resulted from a 18.4% decrease in the costs of feed in broilers processed, or \$0.0763 per pound, partially offset by a 2.9% increase in the pounds of poultry products sold.

## Poultry Cost of Sales

Other costs of sales of poultry products include labor, contract grower pay, packaging, freight and certain fixed costs, among other costs. During the nine months ended July 31, 2014, other costs of sales also include approximately \$9.2 million of charges related to the Company's bonus award program, as compared to approximately \$4.1 million during the nine months ended July 31, 2013. Also included in these other costs of sales during the nine months ended July 31, 2014 is a loss of approximately \$1.0 million incurred by the Company as a result of a fire destroying finished goods at a third-party cold storage facility. These non-feed related costs of poultry products sold increased \$0.0072 per pound processed, or 2.1%, during the first nine months of fiscal 2014 as compared to the same period a year ago. Excluding the effects of the bonus award program in each period, and the \$1.0 million loss of finished goods during the nine months ended July 31, 2014, the non-feed related costs increased by \$0.0046 per pound processed, or 1.3%, year over year. For the nine months ended July 31, 2014, costs of sales of the Company's prepared chicken products were \$104.0

million as compared to \$68.0 million during the nine months ended July 31, 2013, an increase of \$36.0 million, or 53.1%, primarily attributable to a 53.2% increase in the pounds of prepared chicken products sold.

The Company recorded the value of live broiler inventories on hand at July 31, 2014 at cost. When market conditions are favorable, the Company values the broiler inventories on hand at cost, and accumulates costs as the birds are grown to a marketable age subsequent to the balance sheet date. In periods where the Company estimates that the cost to grow live birds in inventory to a marketable age, process, and distribute those birds will be higher than the anticipated sales price, the Company will make an adjustment to lower the value of live birds in inventory to the market value. No such charge was required at July 31, 2014 or July 31, 2013.

**Table of Contents**

Selling, general and administrative costs during the three and nine months ended July 31, 2014 were \$45.7 million and \$99.2 million, respectively. The following table includes the components of selling, general and administrative costs for the three and nine months ended July 31, 2014 and 2013.

## Selling, General and Administrative Costs

	(in thousands)			
	Three Months		Nine Months	
	Ended July 31,		Ended July 31,	
	2014	2013	2014	2013

<b>Total S,G &amp; A</b>	<b>\$ 45,687</b>	<b>\$ 29,505</b>	<b>\$ 99,201</b>	<b>\$ 69,902</b>

Selling, general and administrative costs increased \$16.2 million during the third quarter of fiscal 2014 as compared to the same period a year ago. The increase resulted primarily from a \$5.5 million increase in the accrual related to the Company's Employee Stock Ownership Plan, a \$3.7 million increase in the accrual related to the Company's bonus award program, a \$1.0 million increase in trainee expenses, a \$2.5 million increase in marketing expenses, and a \$1.9 million increase in start-up expenses related to the new Palestine, Texas complex currently under construction. The increase in marketing expense results from the Company's decision to launch a new series of television advertisements during 2014 to build brand recognition and loyalty, which campaign is expected to continue in fiscal 2015. The increase in trainee expense is attributable to an increase in trainee staff.

During the first nine months of fiscal 2014, selling, general and administrative costs increased \$29.3 million as compared to the first nine months of fiscal 2013, reflecting a \$4.3 million increase in stock compensation expense attributable to the performance share awards discussed in Note 3 – Stock Compensation Plans, a \$2.2 million increase in Sanderson Farms Championship expenses, and each of the individual areas discussed above, partially offset by a \$1.8 million decrease in expenses related to the previously planned construction of a new facility in Nash County, North Carolina. The Sanderson Farms Championship is a PGA TOUR event for which the Company is committed as the title sponsor for years 2013 through 2016. Given the Company's commitment to be the title sponsor of the tournament over the next three years, we are committed to increasing the tournament's exposure for the benefit of the charities it supports, as well as the Company. Accordingly, the Company incurred greater expenses related to the tournament during the first nine months of fiscal 2014 when compared to the first nine months of fiscal 2013. Regarding the planned construction of a new facility in Nash County, North Carolina, the Company previously capitalized approximately \$800,000 in various charges. On November 13, 2012, the Company announced that Nash County, North Carolina, would no longer be considered as a potential site for the new facility. Accordingly, the Company expensed the related charges in the first quarter of fiscal 2013. Additionally, upon determining that Nash

County would no longer be considered as a potential site for the new facility, the Company chose to reimburse Nash County and its related economic development organization approximately \$1.0 million in legal fees incurred by those entities during the planning phase of the expansion, and those fees were also expensed in the first quarter of fiscal 2013.

The Company's operating income for the three and nine months ended July 31, 2014 was \$115.7 million and \$239.4 million, respectively, as compared to an operating income for the three and nine months ended July 31, 2013 of \$104.4 million and \$133.9 million. The increase in operating income as compared to the same period a year ago resulted primarily from the decreased cost of feed grains during the three and nine months ended July 31, 2014.

Interest expense during the third quarter and first nine months of fiscal 2014 was \$0.4 million and \$2.1 million, respectively, as compared to interest expense of \$1.4 million and \$5.0 million for the same periods in fiscal 2013. The decrease in interest expense resulted primarily from lower outstanding debt during the first nine months of fiscal 2014 as compared to the same period in fiscal 2013. Additionally, the Company capitalized \$778,000 in interest costs related to the construction of the new complex in Palestine, Anderson County, and Freestone County, Texas during the first nine months of fiscal 2014, \$396,000 of which was capitalized during the third quarter. The Company did not capitalize any interest cost during the first nine months of fiscal 2013.

The Company's effective tax rate for the three and nine months ended July 31, 2014 was 34.0% and 34.3%, respectively, as compared to 34.1% and 33.8% for the three and nine months ended July 31, 2013. The Company's effective tax rate for the nine months ended July 31, 2013 included an approximate 0.4% discrete favorable benefit recognized in the period related to legislation enacted during the first quarter of fiscal 2013. The Company's effective tax rate differs from the statutory federal rate due to state income taxes, certain nondeductible expenses for federal income tax purposes and certain state and federal tax credits.

During the three and nine months ended July 31, 2014, the Company's net income was \$76.1 million, or \$3.30 per share, and \$155.9 million, or \$6.76 per share, respectively. For the three and nine months ended July 31, 2013, the Company's net income was \$67.9 million, or \$2.95 per share, and \$85.3 million, or \$3.71 per share, respectively.

---

**Table of Contents****Liquidity and Capital Resources**

The Company's working capital, calculated by subtracting current liabilities from current assets, at July 31, 2014 was \$329.3 million and its current ratio, calculated by dividing current assets by current liabilities, was 2.8 to 1. The Company's working capital and current ratio at October 31, 2013 were \$269.2 million and 2.7 to 1. These measures reflect the Company's ability to meet its short term obligations and are included here as a measure of the Company's short term market liquidity. The Company's principal sources of liquidity during fiscal 2014 include cash on hand at October 31, 2013, cash flows from operations, and funds available under the Company's revolving credit facility. As described below, the Company entered into a new revolving credit facility dated October 24, 2013, to, among other things, increase the available credit to \$600.0 million from \$500.0 million, and to extend the term from February 2016 to October 2018. As of July 31 and August 22, 2014, the Company had no outstanding draws under the facility and had approximately \$13.8 million outstanding in letters of credit, leaving \$586.2 million available under the facility.

The Company's cash position at July 31, 2014 and October 31, 2013 consisted of \$139.3 million and \$85.6 million, respectively, in cash and short-term cash investments. The Company's ability to invest cash is limited by covenants in its revolving credit agreement to short term investments. All of the Company's cash at July 31, 2014 and October 31, 2013 was held in checking accounts and highly liquid, overnight investment accounts maintained at two banks. There were no restrictions on the Company's access to its cash and cash investments, and such cash and cash investments were available to the Company on demand to fund its operations.

Cash flows provided by operating activities during the nine months ended July 31, 2014 and 2013, were \$197.3 million and \$156.5 million, respectively. Cash flows from operating activities increased by \$40.8 million, resulting primarily from the lower costs of feed grains experienced by the Company during the first nine months of fiscal 2014, partially offset by an increase of approximately \$72.2 million in cash paid for income taxes and the payment during the first quarter of fiscal 2014 of \$21.5 million in bonuses earned under the Company's fiscal 2013 bonus award program.

Cash flows used in investing activities during the first nine months of fiscal 2014 and 2013 were \$113.0 million and \$39.6 million, respectively. The Company's capital expenditures during the first nine months of fiscal 2014 were approximately \$113.4 million, and included approximately \$7.4 million for a new Company aircraft and \$57.0 million for construction of the Palestine, Texas complex. Capital expenditures for the first nine months of fiscal 2013 were \$39.7 million.

Cash flows used in financing activities during the nine months ended July 31, 2014 and 2013 were \$30.5 million and \$81.9 million, respectively. During the first nine months of fiscal 2014 the Company made the third of five \$10.0 million annual installments on the Farm Credit services term loan, and completed an early purchase option of an aircraft that was previously held as a capital lease. During the first nine months of fiscal 2013, the Company made the second of five \$10.0 million annual installments on the Farm Credit services term loan. Related to its revolving credit facility, the Company made no change to the net outstanding borrowings during the first nine months of fiscal 2014, compared to a reduction in net outstanding borrowings of \$62.5 million during the first nine months of fiscal 2013.

The Company's capital budget for fiscal 2014, excluding operating leases, is approximately \$178.2 million. The 2014 capital budget will be funded by internally generated working capital, cash flows from operations and, as needed, draws under the Company's revolving credit facility. The Company had \$586.2 million available under the revolving line of credit at July 31, 2014. The fiscal 2014 capital budget includes approximately \$109.7 million for construction of the Company's new Palestine, Texas poultry complex, and the new Company aircraft referred to above. Excluding the budget for the new complex, the fiscal 2014 capital budget is \$68.5 million.

The Company has a Form S-3 shelf registration statement on file with the Securities and Exchange Commission to register, for possible future sale, shares of the Company's common and/or preferred stock at an aggregate offering price not to exceed \$1.0 billion. The stock may be offered by the Company in amounts, at prices and on terms to be determined by the board of directors if and when shares are issued.

The Company entered into the new revolving credit facility dated October 24, 2013 to, among other things, increase the available credit to \$600.0 million from \$500.0 million. The new facility increases the annual capital expenditure limitation from \$55.0 million to \$65.0 million for fiscal years 2014 through 2018, plus, for each year, up to \$10.0 million carryover from the preceding fiscal year, when it is not actually spent in that year. The capital expenditure limitation for fiscal 2014, with the permitted carry over, is \$75.0 million. The new facility also permits the Company to spend up to \$140.0 million each in capital expenditures on the construction of two new poultry complexes to be located anywhere in the United States, which expenditures are in addition to the annual capital expenditure limits. The \$140.0 million limit represents an increase from the \$125.0 million limit available under the previous agreement. Under the facility, the Company may not exceed a maximum debt to total capitalization ratio of 55% from the date of the agreement through October 30, 2014, and 50% thereafter. The Company has a one-time right, at any time during the term of the agreement, to increase the maximum debt to total capitalization ratio then in effect by 5% in connection with the construction of either of the two potential new poultry complexes for the four fiscal quarters beginning on the first day of the fiscal quarter during which the Company gives written notice of its intent to exercise this right. The Company has not exercised this right. The amendment also sets a minimum net worth requirement that at July 31, 2014 was \$560.5 million.

## **Table of Contents**

The credit is unsecured and, unless extended, will expire on October 24, 2018. As of July 31 and August 22, 2014, the Company had no outstanding draws under the facility, and had approximately \$13.8 million outstanding in letters of credit, leaving \$586.2 million available under the facility.

The Company regularly evaluates both internal and external growth opportunities, including acquisition opportunities and the possible construction of new production assets, and conducts due diligence activities in connection with such opportunities. The cost and terms of any financing to be raised in conjunction with any growth opportunity, including the Company's ability to raise debt or equity capital on terms and at costs satisfactory to the Company, and the effect of such opportunities on the Company's balance sheet, are critical considerations in any such evaluation.

### **Critical Accounting Policies and Estimates**

The preparation of financial statements in accordance with accounting standards generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions, and the differences could be material.

The Company's Summary of Significant Accounting Policies, as described in Note 1 of the Notes to the Consolidated Financial Statements that are filed with the Company's latest report on Form 10-K, should be read in conjunction with this Management's Discussion and Analysis of Financial Condition and Results of Operations. Management believes that the critical accounting policies and estimates that are material to the Company's Consolidated Financial Statements are those described below.

### **Allowance for Doubtful Accounts**

In the normal course of business, the Company extends credit to its customers on a short-term basis. Although credit risks associated with our customers are considered minimal, the Company routinely reviews its accounts receivable balances and makes provisions for probable doubtful accounts. In circumstances where management is aware of a specific customer's inability to meet its financial obligations to the Company, a specific reserve is recorded to reduce the receivable to the amount expected to be collected. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations to us), our estimates of the recoverability of amounts due us could be reduced by a material amount, and the allowance for doubtful accounts and related bad debt expense would increase by the same amount.

### **Inventories**

Processed and prepared inventories and inventories of feed, eggs, medication and packaging supplies are stated at the lower of cost (first-in, first-out method) or market value. When market prices for poultry are low and feed grains are high, the Company may be required to write down the carrying values of processed poultry and live inventories to fair market value, which would increase the Company's cost of sales.

Live poultry inventories of broilers are stated at the lower of cost or market and breeders at cost less accumulated amortization. The cost associated with broiler inventories, consisting principally of chicks, feed, medicine and payments to the growers who raise the chicks for us, are accumulated during the growing period. The cost associated with breeder inventories, consisting principally of breeder chicks, feed, medicine and grower payments are accumulated during the growing period. Capitalized breeder costs are then amortized over nine months using the straight-line method. Mortality of broilers and breeders is charged to cost of sales as incurred. If market prices for

chicks, feed or medicine or if grower payments increase (or decrease) during the period, the Company could have an increase (or decrease) in the market value of its inventory as well as an increase (or decrease) in cost of sales. Should the Company decide that the nine month amortization period used to amortize the breeder costs is no longer appropriate as a result of operational changes, a shorter (or longer) amortization period could increase (or decrease) the cost of sales recorded in future periods. High mortality from disease or extreme temperatures would result in abnormal charges to cost of sales to write-down live poultry inventories.

As of July 31, 2014, the Company's inventory of live broilers was recorded at cost. Any required reserve would be determined by comparing the accumulated cost of live poultry inventories of broilers at July 31, 2014, plus the estimated remaining costs of their grow-out, processing, marketing and sale, to the ultimate expected sales prices of finished products resulting from the processing of such broiler inventories. Had such estimated cost exceeded the estimated sales price, an adjustment to record inventory at market value would have been necessary. If an adjustment were determined to be appropriate, the value of no individual live broiler flock would be reduced by an amount greater than its accumulated cost as of July 31, 2014. The Company used the latest available information in making these estimates, including the expected cost of grain needed to complete the grow-out of live inventories and the expected market prices for the finished products. However, as with any sensitive estimate, there are uncertainties inherent in making forward-looking projections, and the Company's actual results could vary from those estimated.

## **Table of Contents**

### Long-Lived Assets

Depreciable long-lived assets are primarily comprised of buildings and machinery and equipment. Depreciation is provided by the straight-line method over the estimated useful lives, which are 15 to 39 years for buildings and 3 to 12 years for machinery and equipment. An increase or decrease in the estimated useful lives would result in changes to depreciation expense.

The Company continually evaluates the carrying value of its long-lived assets for events or changes in circumstances that indicate that the carrying value may not be recoverable. As part of this evaluation, the Company estimates the future cash flows expected to result from the use of the asset and its eventual disposal. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized to reduce the carrying value of the long-lived asset to the estimated fair value of the asset. If the Company's assumptions with respect to the future expected cash flows associated with the use of long-lived assets currently recorded change, then the Company's determination that no impairment charges are necessary may change and result in the Company recording an impairment charge in a future period. The Company did not identify any indicators of impairment during the current fiscal period.

### Accrued Self Insurance

Insurance expense for workers' compensation benefits and employee-related health care benefits are estimated using historical experience and actuarial estimates. The Company accrues expenses in its workers' compensation and employee benefit plans for both known claims as well as claims incurred but not reported. Stop-loss coverage is maintained with third party insurers to limit the Company's total exposure. Management regularly reviews the assumptions used to recognize periodic expenses. Any resulting adjustments to accrued claims are reflected in current operating results. There are no material adjustments to expenses accrued in prior periods in current period expenses. If historical experience proves not to be a good indicator of future expenses, if management were to use different actuarial assumptions, or if there is a negative trend in the Company's claims history, there could be a significant increase or decrease in cost of sales depending on whether these expenses increased or decreased, respectively.

### Performance Share Bonus Plans

The Company enters into performance share agreements that grant certain officers and key employees the right to receive shares of the Company's common stock, subject to the Company's achievement of certain performance measures. The performance measures in the outstanding agreements relate to the Company's average return on equity and average return on sales over a two year performance period. There is an additional one-year service period during which the holder must be employed by the Company to be eligible to receive the shares that met the performance measures. The Company must estimate, at the end of each reporting period, the probability that all or some portion of the shares will be earned at the end of the total three year vesting period. In making this estimate, the Company considers, among other factors, the current and projected grain costs and chicken volumes and pricing, as well as the amount of commitments to procure grain at a fixed price throughout the performance period. Due to the high level of volatility of these commodity prices and the impact that the change in pricing can have on the Company's results, the Company's assessment of probability can change from period to period and can result in a significant revision to the amounts accrued related to the awards. The accounting for these awards requires the Company to accrue over the three year vesting period the estimated amounts of the shares that will be earned with adjustments made during the service period using the cumulative catch up method. With respect to the fiscal 2012 and 2013 awards, the Company has accrued \$9.7 million as of July 31, 2014, which is the maximum amount that could be accrued based on the Company's determination that it is probable that the maximum amount of those outstanding awards that could be earned would be earned at the end of the requisite periods. However, because of the volatility of the factors previously discussed, as of

July 31, 2014, the Company was unable to determine that it was probable that awards from outstanding agreements entered into during fiscal 2014 would be earned, and therefore it has not accrued any amount for those awards. Had the Company determined that it was probable that the maximum amount of those outstanding awards from the fiscal 2014 agreements would be earned, an additional \$2.4 million would have been accrued as of July 31, 2014.

#### Income Taxes

The Company determines its effective tax rate by estimating its permanent differences resulting from differing treatment of items for financial and income tax purposes. The Company is periodically audited by taxing authorities and considers any adjustments made as a result of the audits in considering the tax expense. Any audit adjustments affecting permanent differences could have an impact on the Company's effective tax rate.

#### Contingencies

The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. After a considerable analysis of each case, the Company determines the amount of reserves required, if any. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed reasonably estimable and probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of reserves or by accruals of losses to reflect any adverse determinations in these legal proceedings.

**Table of Contents**

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

The Company is a purchaser of certain commodities, primarily corn and soybean meal, for use in manufacturing feed for its chickens. As a result, the Company's earnings are affected by changes in the price and availability of such feed ingredients. Feed grains are subject to volatile price changes caused by factors described below that include weather, size of harvest, transportation and storage costs and the agricultural policies of the United States and foreign governments. The price fluctuations of feed grains have a direct and material effect on the Company's profitability.

Generally, the Company commits to purchase feed ingredients for deferred delivery from one month to nine months after the time of the commitment. The Company sometimes purchases its feed ingredients for prompt delivery to its feed mills at market prices at the time of such purchases. The grain purchases are made directly with our usual grain suppliers, which are companies in the business of regularly supplying grain to end users, and do not involve options to purchase. Such purchases occur when senior management concludes that market factors indicate that prices at the time the grain is needed are likely to be higher than current prices, or where, based on current and expected market prices for the Company's poultry products, management believes it can purchase feed ingredients at prices that will allow the Company to earn a reasonable return for its shareholders. Market factors considered by management in determining whether or not and to what extent to commit to buy grain for deferred delivery include:

Current market prices;

Current and predicted weather patterns in the United States, South America, China and other grain producing areas, as such weather patterns might affect the planting, growing, harvesting and yield of feed grains;

The expected size of the harvest of feed grains in the United States and other grain producing areas of the world as reported by governmental and private sources;

Current and expected changes to the agricultural policies of the United States and foreign governments;

The relative strength of United States currency and expected changes therein as it might impact the ability of foreign countries to buy United States feed grain commodities;

The current and expected volumes of export of feed grain commodities as reported by governmental and private sources;

The current and expected use of available feed grains for uses other than as livestock feed grains (such as the use of corn for the production of ethanol, which use is impacted by the price of crude oil); and

Current and expected market prices for the Company's poultry products.

The Company purchases physical grain, not financial instruments such as puts, calls or straddles that derive their value from the value of physical grain. Thus, the Company does not use derivative financial instruments as defined in ASC

815, Accounting for Derivatives for Instruments and Hedging Activities, or any market risk sensitive instruments of the type contemplated by Item 305 of Regulation S-K. The Company does not enter into any derivative transactions or purchase any grain-related contracts other than the physical grain contracts described above.

Although the Company does not use derivative financial instruments as defined in ASC 815 or purchase market risk sensitive instruments of the type contemplated by Item 305 of Regulation S-K, the commodities that the Company does purchase for physical delivery, primarily corn and soybean meal, are subject to price fluctuations that have a direct and material effect on the Company's profitability as mentioned above. During the third quarter of fiscal 2014, the Company purchased approximately 22.9 million bushels of corn and approximately 192,000 tons of soybean meal for use in manufacturing feed for its live chickens. Thus, a \$1.00 change in the average market price paid per bushel for corn would have impacted the Company's cash outlays for corn by approximately \$22.9 million in the third quarter of fiscal 2014. Likewise, a \$10.00 change in the price paid per ton for soybean meal would impact the Company's cash outlays by approximately \$1.9 million.

Although changes in the market price paid for feed grains impact cash outlays at the time the Company purchases the grain, such changes do not immediately impact cost of sales. The cost of feed grains is recognized in cost of sales, on a first-in-first-out basis, at the same time that the sales of the chickens that consume the feed grains are recognized. Thus, there is a lag between the time cash is paid for feed ingredients and the time the cost of such feed ingredients is reported in cost of goods sold. For example, corn delivered to a feedmill and paid for one week might be used to manufacture feed the following week. However, the chickens that eat that feed might not be processed and sold for another 48-62 days, and only at that time will the costs of the feed consumed by the chicken become included in cost of goods sold.

During the third quarter of fiscal 2014, the Company's average feed cost per pound of broilers processed totaled \$0.3611 per pound. Feed costs per pound of broilers processed consist primarily of feed grains, but also include other feed ingredients such as vitamins, fat and mineral feed supplements. The average feed cost per pound is influenced not only by the price of feed ingredients, but also by the efficiency with which live chickens convert feed into body weight. Factors such as weather, poultry husbandry, quality of feed ingredients and the quality and health of the bird, among others, affect the quantity of feed necessary to mature chickens to the target live weight and the efficiency of that process. Generally, however, a \$1.00 change in the average price paid per bushel of corn fed to a

**Table of Contents**

chicken during its life would have impacted average feed cost per pound of broilers processed by \$0.0297, based on the quantity of grain used during the third fiscal quarter of 2014. Similarly, a \$10.00 change in the average price paid per ton of soybean meal would have influenced the average feed cost per pound of broilers processed by \$0.0025 during the third fiscal quarter of 2014.

The following table shows the impact of hypothetical changes in the price of corn and soybean meal on both the Company's cash flow and cost of goods sold, based on quantities actually purchased in the third fiscal quarter of 2014:

(15,620)	45%	55%	0%	96%	4%

\* Prior year segment information has been reclassified to conform to the presentation of the Company's current reportable segments.

**Cement Business**

As of December 31, 2014, the Company, through its subsidiaries, processed or shipped cement from 12 properties in 4 states, of which 8 are located on land owned by the Company free of major encumbrances and 4 are on leased land. The Company's Cement business has production facilities located at two sites in Texas and one in California: Midlothian, Texas, south of Dallas/Fort Worth; Hunter, Texas, between Austin and San Antonio; and Oro Grande, California, near Los Angeles. The following table summarizes certain information about the Company's cement manufacturing facilities at December 31, 2014:

Plant	Rated Annual	Manufacturing	Service Date	Internally
	Productive			Estimated
	Capacity	Process		Minimum
	Tons of Clinker			Reserves
				Years
Midlothian, TX	2,200,000	Dry	2001	57
Hunter, TX	2,250,000	Dry	2013 and 1981	160
Oro Grande, CA	2,200,000	Dry	2008	59
<b>Total</b>	<b>6,650,000</b>			

Reserves identified with the facilities shown above are contained on approximately 5,579 acres of land owned by the Company. As of December 31, 2014, the Company estimated its total proven and probable limestone reserves on such land to be approximately 933 million tons.

The Company's cement manufacturing facilities include kilns, crushers, pre-heaters/calciners, coolers, finish mills and other equipment used to process limestone and other raw materials into cement, as well as equipment used to extract and transport the limestone from the adjacent quarries. These cement manufacturing facilities are served by rail and truck.

## **Table of Contents**

As of December 31, 2014, the Company, through its subsidiaries, also operated 5 cement distribution terminals and 1 cement packaging facility.

### ***Magnesia Specialties Business***

The Magnesia Specialties business currently operates major manufacturing facilities in Manistee, Michigan, and Woodville, Ohio. Both of these facilities are owned.

### ***Other Properties***

The Company's principal corporate office, which it owns, is located in Raleigh, North Carolina. The Company owns and leases various administrative offices for its five reportable business segments.

### ***Condition and Utilization***

The Company's principal properties, which are of varying ages and are of different construction types, are believed to be generally in good condition, are generally well maintained, and are generally suitable and adequate for the purposes for which they are used.

During 2014, the principal properties of the Aggregates business were believed to be utilized at average productive capacities of approximately 65% and were capable of supporting a higher level of market demand. However, during the economic recession, the Company adjusted its production schedules to meet reduced demand for its products. For example, the Company has reduced operating hours at a number of its facilities, closed some of its facilities, and temporarily idled some of its facilities. In 2014, the Company's Aggregates business operated at a level significantly below capacity, which restricted the Company's ability to capitalize \$39.8 million of costs that could have been inventoried under normal operating conditions. If demand does not improve over the near term, such reductions and temporary idling could continue. The Company expects, however, as the economy continues to recover, it will be able to resume production at its normalized levels and increase production again as demand for its products increases.

During 2014 the Texas cement plants were operating between 75 and 85 percent utilization and the California cement plant was operating in the low 70s percent utilization, reflective of a slower recovery in the southern California construction economy. The Portland Cement Association (PCA) anticipates California markets should reach a demand/supply equilibrium during 2016. The Cement business leadership, in collaboration with the aggregates and ready mixed concrete teams, have developed strategic plans regarding interplant efficiencies, as well as tactical plans addressing plant utilization and efficiency, providing incremental supply for a sold-out Texas cement market and a road map for significantly improved profitability for 2015 and beyond. Significant gains in plant utilization and efficiency are typically achieved only during plant shutdowns.

During 2014, the Magnesia Specialties business was essentially running near capacity at the Manistee, Michigan, magnesia-based chemicals plant and the Woodville, Ohio, lime plant. The Company expects future organic growth to result from increased pricing, rationalization of the current product portfolio and/or further cost reductions. In the current operating environment, any unplanned change in costs or customers introduces volatility to the earnings of the Magnesia Specialties segment.

**Table of Contents**

**ITEM 3. LEGAL PROCEEDINGS**

From time to time claims of various types are asserted against the Company arising out of its operations in the normal course of business, including claims relating to land use and permits, safety, health, and environmental matters (such as noise abatement, blasting, vibrations, air emissions, and water discharges). Such matters are subject to many uncertainties, and it is not possible to determine the probable outcome of, or the amount of liability, if any, from, these matters. In the opinion of management of the Company (which opinion is based in part upon consideration of the opinion of counsel), based upon currently-available facts, it is remote that the ultimate outcome of any litigation and other proceedings will have a material adverse effect on the overall results of the Company's operations, its cash flows, or its financial condition. However, there can be no assurance that an adverse outcome in any of such litigation would not have a material adverse effect on the Company or its operating segments.

The Company was not required to pay any penalties in 2014 for failure to disclose certain reportable transactions under Section 6707A of the Internal Revenue Code.

See also Note N: Commitments and Contingencies of the Notes to Financial Statements of the 2014 Financial Statements included under Item 8 of this Form 10-K and the 2014 Annual Report and Management's Discussion and Analysis of Financial Condition and Results of Operations - Environmental Regulation and Litigation under Item 7 of this Form 10-K and the 2014 Annual Report.

**ITEM 4. MINE SAFETY DISCLOSURES**

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.104) is included in Exhibit 95 to this Annual Report on Form 10-K.

**Table of Contents****EXECUTIVE OFFICERS OF THE REGISTRANT**

The following sets forth certain information regarding the executive officers of Martin Marietta Materials, Inc. as of February 13, 2015:

<i>Name</i>	<i>Age</i>	<i>Present Position</i>	<i>Year Assumed Present Position</i>	<i>Other Positions and Other Business Experience Within the Last Five Years</i>
C. Howard Nye	52	Chairman of the Board; Chief Executive Officer; President; President of Aggregates Business; Chairman of Magnesia Specialties Business	2014  2010 2006 2010  2007	
Anne H. Lloyd	53	Executive Vice President; Chief Financial Officer	2009  2005	Treasurer (2006-2013)

- (1) The Company's initial stock repurchase program, which authorized the repurchase of 2.5 million shares of common stock, was announced in a press release dated May 6, 1994, and has been updated as appropriate. The program does not have an expiration date. The Company announced in a press release dated February 22, 2006 that its Board of Directors had authorized the repurchase of an additional 5 million shares of common stock. The Company announced in a press release dated August 15, 2007 that its Board of Directors had authorized the repurchase of an additional 5 million shares of common stock. The Company announced in a press release dated February 10, 2015 that its Board of Directors had authorized the repurchase of an additional 15 million shares of common stock, for a total repurchase authorization of 20 million shares.

**ITEM 6. SELECTED FINANCIAL DATA**

The information required in response to this Item 6 is included under the caption "Five Year Summary" of the 2014 Annual Report, and that information is incorporated herein by reference.

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The information required in response to this Item 7 is included under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2014 Annual Report, and that information is incorporated herein by reference, except that the information contained under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations Outlook 2015" in the 2014 Annual Report is not

incorporated herein by reference.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The information required in response to this Item 7A is included under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations-Quantitative and Qualitative Disclosures About Market Risk of the 2014 Annual Report, and that information is incorporated herein by reference.

**Table of Contents**

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

The information required in response to this Item 8 is included under the caption Consolidated Statements of Earnings, Consolidated Statements of Comprehensive Earnings, Consolidated Balance Sheets, Consolidated Statements of Cash Flows, Consolidated Statements of Total Equity, Notes to Financial Statements, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Quarterly Performance (Unaudited) of the 2014 Annual Report, and that information is incorporated herein by reference, except that the information contained under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations Outlook 2015 in the 2014 Annual Report is not incorporated herein by reference.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

**ITEM 9A. CONTROLS AND PROCEDURES**

As of December 31, 2014, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer ( CEO ) and Chief Financial Officer ( CFO ), of the effectiveness of the design and operation of the Company's disclosure controls and procedures and the Company's internal control over financial reporting. Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were effective in ensuring that all material information required to be disclosed is made known to them in a timely manner as of December 31, 2014 and further concluded that the Company's internal control over financial reporting was effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with generally accepted accounting principles as of December 31, 2014. As permitted by the Securities and Exchange Commission, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls over certain assets and the net sales of the acquired cement and ready mixed concrete operations, which are included in the 2014 consolidated financial statements and constituted 18% of consolidated total assets and 17% of consolidated net sales as of and for the year ended December 31, 2014. There were no changes in the Company's internal control over financial reporting during the most recently completed fiscal quarter that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The foregoing evaluation of the Company's disclosure controls and procedures was based on the definition in Exchange Act Rule 13A-15(e), which requires that disclosure controls and procedures are effectively designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits with the SEC under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms, and is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

---

**Table of Contents**

The Company's management, including the CEO and CFO, does not expect that the Company's control system will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

The Company's management has issued its annual statement of financial responsibility and report on the Company's internal control over financial reporting, which included management's assessment that the Company's internal control over financial reporting was effective at December 31, 2014. The Company's independent registered public accounting firm has issued an attestation report that the Company's internal control over financial reporting was effective at December 31, 2014. Management's report on the Company's internal controls and the attestation report of the Company's independent registered public accounting firm are included in the 2014 Financial Statements, included under Item 8 of this Form 10-K and the 2014 Annual Report. See also Management's Discussion and Analysis of Financial Condition and Results of Operations - Internal Control and Accounting and Reporting Risk under Item 7 of this Form 10-K and the 2014 Annual Report.

Included among the Exhibits to this Form 10-K are forms of Certifications of the Company's CEO and CFO as required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the Section 302 Certification). The Section 302 Certifications refer to this evaluation of the Company's disclosure policies and procedures and internal control over financial reporting. The information in this section should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

**PART III**

**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

The information concerning directors of the Company, the Audit Committee of the Board of Directors, and the Audit Committee financial expert serving on the Audit Committee, all as required in response to this Item 10, is included under the captions Corporate Governance Matters and Section 16(a) Beneficial Ownership Reporting Compliance in the Company's definitive proxy statement to be

**Table of Contents**

filed with the SEC pursuant to Regulation 14A within 120 days after the close of the Company's fiscal year ended December 31, 2014 (the 2015 Proxy Statement), and that information is hereby incorporated by reference in this Form 10-K. Information concerning executive officers of the Company required in response to this Item 10 is included in Part I, under the heading Executive Officers of the Registrant, of this Form 10-K. The information concerning the Company's code of ethics required in response to this Item 10 is included in Part I, under the heading Available Information, of this Form 10-K.

**ITEM 11. EXECUTIVE COMPENSATION**

The information required in response to this Item 11 is included under the captions Executive Compensation, Compensation Discussion and Analysis, Corporate Governance Matters, Management Development and Compensation Committee Report, and Compensation Committee Interlocks and Insider Participation in the Company's 2015 Proxy Statement, and that information is hereby incorporated by reference in this Form 10-K.

**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

The information required in response to this Item 12 is included under the captions General Information, Security Ownership of Certain Beneficial Owners and Management, and Securities Authorized for Issuance Under Equity Compensation Plans in the Company's 2015 Proxy Statement, and that information is hereby incorporated by reference in this Form 10-K.

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

The information required in response to this Item 13 is included under the captions Compensation Committee Interlocks and Insider Participation in Compensation Decisions and Corporate Governance Matters in the Company's 2015 Proxy Statement, and that information is hereby incorporated by reference in this Form 10-K.

**ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The information required in response to this Item 14 is included under the caption Independent Auditors in the Company's 2015 Proxy Statement, and that information is hereby incorporated by reference in this Form 10-K.

**Table of Contents**

**PART IV**

**ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES**

**(a) (1) List of financial statements filed as part of this Form 10-K.**

The following consolidated financial statements of Martin Marietta Materials, Inc. and consolidated subsidiaries, included in the 2014 Annual Report and incorporated by reference under Item 8 of this Form 10-K:

Consolidated Statements of Earnings

for years ended December 31, 2014, 2013, and 2012

Consolidated Statements of Comprehensive Earnings

for years ended December 31, 2014, 2013, and 2012

Consolidated Balance Sheets

at December 31, 2014 and 2013

Consolidated Statements of Cash Flows

for years ended December 31, 2014, 2013, and 2012

Consolidated Statements of Total Equity

for years ended December 31, 2014, 2013, and 2012

Notes to Financial Statements

**(2) List of financial statement schedules filed as part of this Form 10-K**

The following financial statement schedule of Martin Marietta Materials, Inc. and consolidated subsidiaries is included in Item 15(c) of this Form 10-K.

Schedule II - Valuation and Qualifying Accounts

All other schedules have been omitted because they are not applicable, not required, or the information has been otherwise supplied in the financial statements or notes to the financial statements.

The report of the Company's independent registered public accounting firm with respect to the above-referenced financial statements is included in the 2014 Annual Report, and that report is hereby incorporated by reference in this Form 10-K. The report on the financial statement schedule and the consent of the Company's independent registered public accounting firm are attached as Exhibit 23.01 to this Form 10-K.

**(3) Exhibits**

The list of Exhibits on the accompanying Index of Exhibits included in Item 15(b) of this Form 10-K is hereby incorporated by reference. Each management contract or compensatory plan or arrangement required to be filed as an exhibit is indicated by asterisks.
