[7] Other

1. Loss related to airbag inflators

Honda has been conducting market-based measures in relation to airbag inflators. Honda recognizes a provision for specific warranty costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. There is a possibility that Honda will need to recognize additional provisions when new evidence related to the product recalls arise, however, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report.

In the United States and Canada, various class action lawsuits and civil lawsuits related to the above mentioned market-based measures have been filed against Honda. The plaintiffs have claimed for properly functioning airbag inflators, compensation of economic losses including incurred costs and the decline in the value of vehicles, as well as punitive damages. Most of the class action lawsuits in the United States were transferred to the United States District Court for the Southern District of Florida and consolidated into a multidistrict litigation.

Honda did not recognize a provision for loss contingencies because the conditions for a provision have not been met as of the date of this report. Therefore, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses, if any, as of the date of this report because there is some uncertainty.

2. Transfer pricing tax refund

In May 2015, the lawsuit related to transfer pricing involving the Company's transactions with certain consolidated subsidiaries in Brazil was concluded, and it was ruled that the Company shall receive a tax refund with corresponding interest in Japan. As a result, income tax expense decreased by JPY 19,145 million for the three months ended June 30, 2015.

3. Impairment loss on investments accounted for using the equity method

For the three months ended June 30, 2016, the Company recognized impairment losses of JPY 12,871 million on certain investments accounted for using the equity method because there is objective evidence of impairment from declines in quoted market values. The impairment losses are included in share of profit of investments accounted for using the equity method in the condensed consolidated statement of income.
