(unaudited)

1. Basis of Financial Reporting

The accompanying unaudited consolidated financial statements of Nelnet, Inc. and subsidiaries (the "Company") as of June 30, 2016 and for the three and six months ended June 30, 2016 and 2015 have been prepared on the same basis as the audited consolidated financial statements for the year ended December 31, 2015 and, in the opinion of the Company's management, the unaudited consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of results of operations for the interim periods presented. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results for the year ending December 31, 2016. The unaudited consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 Annual Report").

Reclassifications

Certain amounts previously reported within the Company's consolidated balance sheet and statements of income have been reclassified to conform to the current period presentation. These reclassifications are summarized below.

In April 2015, the Financial Accounting Standards Board ("FASB") issued accounting guidance regarding the presentation of debt issuance costs. The new guidance requires that entities present debt issuance costs related to a debt liability as a direct deduction from that liability on the balance sheet. This guidance became effective for the Company beginning January 1, 2016. As a result of this standard, the Company reclassified its debt issuance costs, which were previously included in "other assets" on the consolidated balance sheet, to "bonds and notes payable."

On February 1, 2016, the Company sold 100 percent of the membership interests in Sparkroom LLC, which includes the majority of the Company's inquiry management products and services within Nelnet Enrollment Solutions. The Company retained the digital marketing and content solution products and services under the brand name Peterson's within the Nelnet Enrollment Solutions business, which include test preparation study guides, school directories and databases, career exploration guides, on-line courses, scholarship search and selection data, career planning information and guides, and on-line information about colleges and universities. The Company reclassified the revenue and cost of goods sold attributable to the Peterson's products and services from "enrollment services revenue" and "cost to provide enrollment services" to "other income" and "other expenses," respectively, on the consolidated statements of income. After this reclassification, "enrollment services revenue" and "cost to provide enrollment services" include the operating results of the products and services sold as part of the Sparkroom disposition for all periods presented. These reclassifications had no effect on consolidated net income.

2. Student Loans Receivable and Allowance for Loan Losses

Student loans receivable consisted of the following:

| | As of June 30, 2016 | As of December 31, 2015 |
|--|------------------------|-------------------------------|
| Federally insured loans: | | |
| Stafford and other | \$5,629,034 | 6,202,064 |
| Consolidation | 20,837,356 | 22,086,043 |

| Allowance for loan losses – private education loans | (15,529) | (15,008) |
| | \$26,539,604 | 28,324,552 |

As of June 30, 2016 and December 31, 2015, "loan discount, net of unamortized loan premiums and deferred (a) origination costs" included \$26.2 million and \$33.0 million, respectively, of non-accretable discount associated with purchased loans of \$10.1 billion and \$10.8 billion, respectively.

Private Education Loans

In February 2015, the Company entered into an agreement with CommonBond, Inc. ("CommonBond"), a student lending company that provides private education loans to graduate students, under which the Company committed to purchase private education loans for a period of 18 months, with the maximum purchase obligation limited to \$200.0 million. As of June 30, 2016, the Company had purchased \$190.1 million in private education loans from CommonBond and has satisfied its commitment under this agreement.

Activity in the Allowance for Loan Losses

The provision for loan losses represents the periodic expense of maintaining an allowance sufficient to absorb losses, net of recoveries, inherent in the portfolio of student loans. Activity in the allowance for loan losses is shown below.

| | Three months ended June 30, | | Six months ended June 30, | |

Student Loan Status and Delinquencies

Delinquencies have the potential to adversely impact the Company's earnings through increased servicing and collection costs and account charge-offs. The table below shows the Company's loan delinquency amounts.

| | As of June 30, 2016 | | As of December 31, 2015 | | As of June 30, 2015 | |

FFELP Warehouse Facilities

The Company funds a portion of its FFELP loan acquisitions using its FFELP warehouse facilities. Student loan warehousing allows the Company to buy and manage student loans prior to transferring them into more permanent financing arrangements.

As of June 30, 2016, the Company had three FFELP warehouse facilities as summarized below.

| | NFSLW-I (a) | NHELP-II | NHELP-III | Total |
|------------------------------------|-----------------|-------------------|----------------|-----------|
| Maximum financing amount | \$875,000 | 500,000 | 750,000 | 2,125,000 |
| Amount outstanding | 844,087 | 455,049 | 512,572 | 1,811,708 |
| Amount available | \$30,913 | 44,951 | 237,428 | 313,292 |
| Expiration of liquidity provisions | July 8, 2016 | December 16, 2016 | April 28, 2017 | |
| Final maturity date | July 9, 2018 | December 14, 2018 | April 26, 2019 | |
| Maximum advance rates | 92.0 - 98.0% | 85.0 - 95.0% | 92.2 - 95.0% | |
| Minimum advance rates | 84.0 - 90.0% | 85.0 - 95.0% | 92.2 - 95.0% | |
| Advanced as equity support | \$36,663 | 38,051 | 30,694 | 105,408 |

On July 10, 2015, the Company amended the agreement for this warehouse facility to temporarily increase the maximum financing amount to \$875.0 million. The maximum financing amount was scheduled to decrease by \$125.0 million on March 31, 2016. On January 26, 2016, the Company amended the agreement for this warehouse (a) facility to extend the scheduled decrease of the maximum financing amount by \$125.0 million to July 8, 2016. On July 7, 2016, the Company amended the agreement for this warehouse facility to permanently set the maximum financing amount at \$875.0 million, and changed the expiration of liquidity provisions to July 10, 2018 and the final maturity date to September 7, 2018.

Private Education Loan Warehouse Facility

On June 26, 2015, the Company entered into a \$275.0 million private education loan warehouse facility. As of June 30, 2016, there was \$221.1 million outstanding on the facility and \$53.9 million was available for future use. The facility has a static advance rate that requires initial equity for loan funding, but does not require increased equity based on market movements. The maximum advance rate on the entire facility is 88 percent and minimum advance rates, depending on loan characteristics and program type, ranged from 64 percent to 99 percent. As of June 30, 2016, \$32.0 million was advanced on the facility as equity support. The facility is supported by liquidity provisions, which had an original expiration date of June 24, 2016.

On April 1, 2016, the Company amended the agreement for this facility to change the expiration date for the liquidity provisions to October 28, 2016, and to change the final maturity date to April 28, 2017. In addition, the minimum advance rates, depending on loan characteristics and program type, were changed to a range from 61.75 percent to 95.00 percent, and the maximum advance rate on the entire facility remained at 88 percent. In the event the Company is unable to renew the liquidity provisions by the amended expiration date of October 28, 2016, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by the facility's amended final maturity date of April 28, 2017.

Unsecured Line of Credit

The Company has a \$350.0 million unsecured line of credit that has a maturity date of October 30, 2020. As of June 30, 2016, the unsecured line of credit had an outstanding balance of \$105.0 million and \$245.0 million was available for future use.

4. Derivative Financial Instruments

The Company uses derivative financial instruments primarily to manage interest rate risk and foreign currency exchange risk. Derivative instruments used as part of the Company's risk management strategy are further described in note 5 of the notes to consolidated financial statements included in the 2015 Annual Report. A tabular presentation of such derivatives outstanding as of June 30, 2016 and December 31, 2015 is presented below.

Basis Swaps

The following table summarizes the Company's basis swaps outstanding as of June 30, 2016 and December 31, 2015 in which the Company receives three-month LIBOR set discretely in advance and pays one-month LIBOR plus or minus a spread as defined in the agreements (the "1:3 Basis Swaps").

| | As of June 30, 2016 | As of December 31, 2015 |
|----------|---------------------------|----------------------------------|
| Maturity | Notional amount | Notional amount |
| 2016 | \$2,000,000 | \$7,500,000 |
| 2028 | 125,000 | — |

The weighted average rate paid by the Company on the 1:3 Basis Swaps as of June 30, 2016 and December 31, 2015 was one-month LIBOR plus 9.3 basis points and 10.0 basis points, respectively.

Interest Rate Swaps – Floor Income Hedges

The following table summarizes the outstanding derivative instruments used by the Company to economically hedge loans earning fixed rate floor income.

| | As of June 30, 2016 | | As of December 31, 2015 | |
|----------|---------------------|---|----------------------------|---|
| Maturity | Notional amount | Weighted average fixed rate paid by the Company (a) | Notional amount | Weighted average fixed rate paid by the Company (a) |
| 2016 | \$750,000 | 0.72 % | \$1,000,000 | 0.76 % |
| 2017 | 1,000,000 | 0.97 | 2,100,000 | 0.84 |
| 2018 | 1,600,000 | 1.08 | 1,600,000 | 1.08 |
| 2019 | 3,250,000 | 0.97 | 500,000 | 1.12 |
| 2020 | 1,500,000 | 1.01 | — | — |
| 2025 | 100,000 | 2.32 | 100,000 | 2.32 |
| 2026 | 50,000 | 1.52 | — | — |
| | \$8,250,000 | 0.99 % | \$5,300,000 | 0.95 % |

(a) For all interest rate derivatives, the Company receives discrete three-month LIBOR.

On August 20, 2014, the Company paid \$9.1 million for an interest rate swap option to economically hedge loans earning fixed rate floor income. The interest rate swap option gives the Company the right, but not the obligation, to

enter into a \$250 million notional interest rate swap in which the Company would pay a fixed amount of 3.30% and receive discrete one-month LIBOR. If the interest rate swap option is exercised, the swap would become effective in 2019 and mature in 2024.

Interest Rate Swaps – Unsecured Debt Hedges

The Company had the following derivatives outstanding as of June 30, 2016 and December 31, 2015 that are used to effectively convert the variable interest rate on a portion of the Junior Subordinated Hybrid Securities to a fixed rate of 7.66%.

| Maturity | Notional amount | Weighted average fixed rate paid by the Company (a) |
|----------|-----------------|---|
| 2036 | \$25,000 | 4.28 % |

(a) For all interest rate derivatives, the Company receives discrete three-month LIBOR.

Interest Rate Caps

In June 2015, in conjunction with the entry into the \$275.0 million private education loan warehouse facility, the Company paid \$2.9 million for two interest rate cap contracts with a total notional amount of \$275.0 million. The first interest rate cap has a notional amount of \$125.0 million and a one-month LIBOR strike rate of 2.50%, and the second interest rate cap has a notional amount of \$150.0 million and a one-month LIBOR strike rate of 4.99%. In the event that the one-month LIBOR rate rises above the applicable strike rate, the Company would receive monthly payments related to the spread difference. Both interest rate cap contracts have a maturity date of July 15, 2020.

Foreign Currency Exchange Risk

In 2006, the Company issued €352.7 million of student loan asset-backed Euro Notes (the "Euro Notes") with an interest rate based on a spread to the EURIBOR index. As a result of the Euro Notes, the Company is exposed to market risk related to fluctuations in foreign currency exchange rates between the U.S. dollar and Euro. The principal and accrued interest on these notes are re-measured at each reporting period and recorded in the Company's consolidated balance sheet in U.S. dollars based on the foreign currency exchange rate on that date.

The Company entered into a cross-currency interest rate swap in connection with the issuance of the Euro Notes. Under the terms of the cross-currency interest rate swap, the Company receives from the counterparty a spread to the EURIBOR index based on a notional amount of €352.7 million and pays a spread to the LIBOR index based on a notional amount of \$450.0 million. In addition, under the terms of this agreement, all principal payments on the Euro Notes will effectively be paid at the exchange rate in effect between the U.S. dollar and Euro as of the issuance of the notes.

The following table shows the income statement impact as a result of the re-measurement of the Euro Notes and the change in the fair value of the related derivative instrument.

| | Three months ended June 30, | | Six months ended June 30, | |
|--|-----------------------------|----------|---------------------------|----------|
| | 2016 | 2015 | 2016 | 2015 |
| Re-measurement of Euro Notes | \$9,768 | (14,671) | (8,712) | 33,538 |
| Change in fair value of cross-currency interest rate swap | (12,008) | 13,933 | 20,693 | (35,873) |
| Total impact to consolidated statements of income - income (expense) (a) | \$(2,240) | (738) | 11,981 | (2,335) |

(a) The financial statement impact of the above items is included in "Derivative market value and foreign currency adjustments and derivative settlements, net" in the Company's consolidated statements of income. Management has structured the cross-currency interest rate swap to economically hedge the Euro Notes to effectively convert the Euro Notes to U.S. dollars and pay a spread on these notes based on the LIBOR index. However, the cross-currency interest rate swap does not qualify for hedge accounting. The re-measurement of the Euro-denominated bonds generally correlates with the change in the fair value of the corresponding cross-currency interest rate swap. However, the Company will experience unrealized gains and losses between these financial instruments due to the principal and accrued interest on the Euro Notes being re-measured to U.S. dollars at each reporting date based on the foreign currency exchange rate on that date, while the cross-currency interest rate swap is measured at fair value at each reporting date with the change in fair value recognized in the current period earnings.

Consolidated Financial Statement Impact Related to Derivatives

The following table summarizes the fair value of the Company's derivatives as reflected in the consolidated balance sheets:

| | Fair value of asset derivatives | | Fair value of liability derivatives | |
|--|---------------------------------|-------------------------|-------------------------------------|-------------------------|
| | As of June 30, 2016 | As of December 31, 2015 | As of June 30, 2016 | As of December 31, 2015 |

| Other | 1,417 | 1,731 | 2,236 | — |
| Total | \$3,408 | 28,690 | 101,771 | 74,881 |

During the six months ended June 30, 2016, the Company terminated a total notional amount of \$3.1 billion of fixed rate floor income hedges for gross proceeds of \$3.0 million, and a total notional amount of \$300.0 million of other basis swaps for gross proceeds of \$0.5 million. During the six months ended June 30, 2015, the Company terminated a total notional amount of \$5.5 billion of 1:3 Basis Swaps for gross proceeds of \$51.9 million.

Offsetting of Derivative Assets/Liabilities

The Company records derivative instruments in the consolidated balance sheets on a gross basis as either an asset or liability measured at its fair value. Certain of the Company's derivative instruments are subject to right of offset provisions with counterparties. The following tables include the gross amounts related to the Company's derivative portfolio recognized in the consolidated balance sheets, reconciled to the net amount when excluding derivatives subject to enforceable master netting arrangements and cash collateral received/pledged:

| Derivative assets | Gross amounts of recognized assets presented in the consolidated balance sheets | Gross amounts not offset in the consolidated balance sheets | | Net asset (liability) |

(a) As of June 30, 2016, the Company considered the decline in market value of its available-for-sale investments to be temporary in nature and did not consider any of its investments other-than-temporarily impaired.

(b) As of June 30, 2016, the stated maturities of the majority of the Company's student loan asset-backed and other debt securities classified as available-for-sale were greater than 10 years.

6. Business Combination

Allo Communications LLC ("Allo")

On December 31, 2015, the Company purchased 92.5 percent of the ownership interests of Allo for total cash consideration of \$46.25 million. On January 1, 2016, the Company sold a 1.0 percent ownership interest in Allo to a non-related third-party for \$0.5 million. The remaining 7.5 percent of the ownership interests of Allo is owned by members of Allo management, who have the opportunity to earn an additional 11.5 percent (up to 19 percent) of the total ownership interests based on the financial performance of Allo. The additional ownership interest that Allo management has the opportunity to earn are based on their continued employment with Allo. Accordingly, the value associated with the ownership interests issued to these employees of \$1.0 million will be recognized by Allo as compensation expense over the performance period.

Allo provides pure fiber optic service to homes and businesses for internet, television, and telephone services. The acquisition of Allo provides additional diversification of the Company's revenues and cash flows outside of education. In addition, the acquisition leverages the Company's existing infrastructure, customer service capabilities and call centers, and financial strength and liquidity for continued growth.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the acquisition date. The fair values of the assets and liabilities related to Allo are subject to refinement as the Company completes its analysis relative to the fair values at the date of acquisition. During the first six months of 2016, the Company recognized certain adjustments to the provisional amounts recorded at December 31, 2015 that were needed to reflect new information obtained about facts and circumstances that existed as of the acquisition date. The net impact of these adjustments was an increase to goodwill, and the adjustments had no impact on operating results.

| | |
|---|-----------|
| Cash and cash equivalents | \$334 |
| Restricted cash and investments | 850 |
| Accounts receivable | 1,935 |
| Property and equipment | 32,479 |
| Other assets | 371 |
| Intangible assets | 11,410 |
| Excess cost over fair value of net assets acquired (goodwill) | 21,112 |
| Other liabilities | (4,587) |
| Bonds and notes payable | (13,904) |
| Net assets acquired | 50,000 |
| Minority interest | (3,750) |
| Total consideration paid by the Company | \$46,250 |

The \$11.4 million of acquired intangible assets on the date of acquisition had a weighted-average useful life of approximately 12 years. The intangible assets that made up this amount included customer relationships of \$6.3 million (10-year useful life) and a trade name of \$5.1 million (15-year useful life).

The \$21.1 million of goodwill was assigned to the Communications operating segment and is expected to be deductible for tax purposes. The amount allocated to goodwill was primarily attributable to future customers to be generated through the continued expansion of Allo's services in rural markets.

The proforma impacts of the acquisition on the Company's historical results prior to the acquisition were not material.

Allo recognizes revenue when (i) persuasive evidence of an arrangement exists between Allo and the customer, (ii) delivery of the product to the customer has occurred or service has been provided to the customer, (iii) the price to the customer is fixed or determinable, and (iv) collectability of the sales price is reasonably assured. Revenues based on a flat fee, derived principally from internet, television, and telephone services are billed in advance and recognized in subsequent periods when the services are provided. Revenues for usage-based services, such as access charges billed to other telephone carriers for originating and terminating long-distance calls on Allo's network, are billed in arrears. Allo recognizes revenue from these services in the period the services are rendered rather than billed. Earned but unbilled usage-based services are recorded in accounts receivable.

7. Intangible Assets and Goodwill

Intangible assets consist of the following:

| | Weighted average remaining useful life as of June 30, 2016 (months) | As of June 30, 2016 | As of December 31, 2015 |
|---|--|---------------------------|-------------------------------|
| Amortizable intangible assets: | | | |
| Customer relationships (net of accumulated amortization of \$5,949 and \$4,028, respectively) | 171 | \$ 30,935 | 27,576 |
| Computer software (net of accumulated amortization of \$6,820 and \$4,397, respectively) | 31 | 12,128 | 11,601 |
| Trade names (net of accumulated amortization of \$1,224 and \$795, respectively) | 195 | 10,348 | 10,687 |
| Content (net of accumulated amortization of \$1,350 and \$900, respectively) | 6 | 450 | 900 |
| Covenants not to compete (net of accumulated amortization of \$74 and \$56, respectively) | 95 | 280 | 298 |
| Total - amortizable intangible assets | 143 | \$ 54,141 | 51,062 |

The Company recorded amortization expense on its intangible assets of \$2.7 million and \$2.4 million during the three months ended June 30, 2016 and 2015, respectively, and \$5.2 million and \$4.8 million during the six months ended June 30, 2016 and 2015, respectively. The Company will continue to amortize intangible assets over their remaining useful lives. As of June 30, 2016, the Company estimates it will record amortization expense as follows:

| | |
|-----------------------------|-----------|
| 2016 (July 1 - December 31) | \$ 6,328 |
| 2017 | 9,386 |
| 2018 | 8,605 |
| 2019 | 5,147 |
| 2020 | 4,231 |
| 2021 and thereafter | 20,444 |
| | \$ 54,141 |

The change in the carrying amount of goodwill by reportable operating segment was as follows:

| | Student Loan and Guaranty Servicing | Tuition Payment Processing and Campus Commerce | Communications | Asset Generation and Management | Corporate and Other Activities | Total |
|---------------------------------|--|---|----------------|--|--------------------------------------|---------|
| Balance as of December 31, 2015 | \$ 8,596 | 67,168 | 19,800 | 41,883 | 8,553 | 146,000 |

| Communications, net property and equipment | | 42,706 | 34,377 |
| Total property and equipment, net | | \$96,079 | 80,482 |

Depreciation expense for the three months ended June 30, 2016 and 2015 related to property and equipment was \$5.4 million and \$4.1 million, respectively, and \$10.6 million and \$7.4 million during the six months ended June 30, 2016 and 2015, respectively.

9. Earnings per Common Share

Presented below is a summary of the components used to calculate basic and diluted earnings per share. The Company applies the two-class method in computing both basic and diluted earnings per share, which requires the calculation of separate earnings per share amounts for common stock and unvested share based awards. Unvested share-based awards that contain nonforfeitable rights to dividends are considered securities which participate in undistributed earnings with common stock.

| Earnings per share - basic and diluted | \$1.73 | 1.73 | 1.73 | 2.94 | 2.94 | 2.94 |

Unvested restricted stock awards are the Company's only potential common shares and, accordingly, there were no awards that were antidilutive and not included in average shares outstanding for the diluted earnings per share calculation.

10. Segment Reporting

See note 14 of the notes to consolidated financial statements included in the 2015 Annual Report for a description of the Company's operating segments. The following tables include the results of each of the Company's operating segments reconciled to the consolidated financial statements.

Prior to January 1, 2016, the Company allocated certain corporate overhead expenses that are incurred within the Corporate and Other Activities segment to the other operating segments. These expenses included certain corporate activities related to executive management, internal audit, enterprise risk management, and other costs incurred by the Company due to corporate-wide initiatives. Effective January 1, 2016, internal reporting to executive management (the "chief operating decision maker") changed to eliminate the allocation of these expenses to the other segments. Management believes the change in its allocation methodology results in a better reflection of the operating results of each of the reportable segments as if they each operated as a standalone business entity, which also reflects how management evaluates the performance of the segments. Prior period segment operating results have been restated to conform to the current period presentation.

11. Major Customer

The Company earns loan servicing revenue from a servicing contract with the U.S. Department of Education (the "Department") that currently expires on June 16, 2019. Revenue earned by the Company's Student Loan and Guaranty Servicing operating segment related to this contract was \$37.1 million and \$33.6 million for the three months ended June 30, 2016 and 2015, respectively, and \$72.3 million and \$66.0 million for the six months ended June 30, 2016 and 2015, respectively. In April 2016, the Department's Office of Federal Student Aid released information regarding a new contract procurement process for the Department to acquire a single servicing solution to support the management of federal student financial aid, including the servicing of all student loans owned by the Department. The contract solicitation process is divided into two phases. Responses for Phase I were due on May 9, 2016.

On May 6, 2016, the Company and Great Lakes Educational Loan Services, Inc. ("Great Lakes") submitted a joint response to Phase I as part of a newly created joint venture to respond to the contract solicitation process and to provide services under the new contract in the event that the Department selects it to be awarded with the contract. The joint venture will operate as a new legal entity called GreatNet Solutions, LLC ("GreatNet"). The Company and Great Lakes each own 50 percent of the ownership interests of GreatNet. In addition to the Company, Great Lakes is currently one of four private sector companies (referred to as Title IV Additional Servicers, or "TIVAS") that currently has a student loan servicing contract with the Department to provide servicing for loans owned by the Department.

On June 30, 2016, the Department announced which entities were selected to respond to Phase II of the procurement selection process. GreatNet was one of three entities selected.

12. Fair Value

The following tables present the Company's financial assets and liabilities that are measured at fair value on a recurring basis. There were no transfers into or out of level 1, level 2, or level 3 for the six months ended June 30, 2016.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Management's Discussion and Analysis of Financial Condition and Results of Operations is for the three and six months ended June 30, 2016 and 2015. All dollars are in thousands, except per share amounts, unless otherwise noted.)

The following discussion and analysis provides information that the Company's management believes is relevant to an assessment and understanding of the consolidated results of operations and financial condition of the Company. The discussion should be read in conjunction with the Company's consolidated financial statements included in the 2015 Annual Report.

Forward-looking and cautionary statements

This report contains forward-looking statements and information that are based on management's current expectations as of the date of this document. Statements that are not historical facts, including statements about the Company's plans and expectations for future financial condition, results of operations or economic performance, or that address management's plans and objectives for future operations, and statements that assume or are dependent upon future events, are forward-looking statements. The words "may," "should," "could," "would," "predict," "potential," "continue," "expect," "anticipate," "future," "intend," "plan," "believe," "estimate," "assume," "forecast," "will," and similar expressions, as well as in future tense, are intended to identify forward-looking statements.

The forward-looking statements are based on assumptions and analysis made by management in light of management's experience and its perception of historical trends, current conditions, expected future developments, and other factors that management believes are appropriate under the circumstances. These statements are subject to known and unknown risks, uncertainties, assumptions, and other factors that may cause the actual results and performance to be materially different from any future results or performance expressed or implied by such forward-looking statements. These factors include, among others, the risks and uncertainties set forth in the "Risk Factors" section of the 2015 Annual Report and elsewhere in this report, and include such risks and uncertainties as:

- student loan portfolio risks such as interest rate basis and repricing risk resulting from the fact that the interest rate characteristics of the student loan assets do not match the interest rate characteristics of the funding for those assets, the risk of loss of floor income on certain student loans originated under the Federal Family Education Loan Program (the "FFEL Program" or "FFELP"), risks related to the use of derivatives to manage exposure to interest rate fluctuations, uncertainties regarding the expected benefits from purchased securitized and unsecuritized FFELP student loans and initiatives to purchase additional FFELP and private education loans, and risks from changes in levels of student loan prepayment or default rates;

- financing and liquidity risks, including risks of changes in the general interest rate environment and in the securitization and other financing markets for student loans, including adverse changes resulting from slower than expected payments on student loans in FFELP securitization trusts, which may increase the costs or limit the availability of financings necessary to purchase, refinance, or continue to hold student loans;

- risks from changes in the educational credit and services markets resulting from changes in applicable laws, regulations, and government programs and budgets, such as the expected decline over time in FFELP loan interest income and fee-based revenues due to the discontinuation of new FFELP loan originations in 2010 and potential government initiatives or legislative proposals to consolidate existing FFELP loans to the Federal Direct Loan Program or otherwise allow FFELP loans to be refinanced with Federal Direct Loan Program loans, risks related to adverse changes in the Company's volumes allocated under the Company's loan servicing contract with the Department, which accounted for approximately 15 percent of the Company's revenue in 2015, risks related to the Department's initiative to procure a new contract for federal student loan servicing to acquire a single servicing solution to service all loans owned by the Department, including the risk that the Company's joint venture with Great

Lakes may not be awarded the contract, and risks related to the Company's ability to comply with agreements with third-party customers for the servicing of FFELP, Federal Direct Loan Program, and private education loans; risks related to a breach of or failure in the Company's operational or information systems or infrastructure, or those of third-party vendors, including cybersecurity risks related to the potential disclosure of confidential student loan borrower and other customer information; uncertainties inherent in forecasting future cash flows from student loan assets and related asset-backed securitizations;

the uncertain nature of the expected benefits from the acquisition of Allo Communications LLC and the ability to integrate its communications operations and successfully expand its fiber network in existing service areas and additional communities;

risks and uncertainties related to initiatives to pursue additional strategic investments and acquisitions, including investments and acquisitions that are intended to diversify the Company both within and outside of its historical core education-related businesses; and

risks and uncertainties associated with litigation matters and with maintaining compliance with the extensive regulatory requirements applicable to the Company's businesses, reputational and other risks, including the risk of increased regulatory costs, resulting from the recent politicization of student loan servicing, and uncertainties inherent in the estimates and assumptions about future events that management is required to make in the preparation of the Company's consolidated financial statements.

All forward-looking statements contained in this report are qualified by these cautionary statements and are made only as of the date of this document. Although the Company may from time to time voluntarily update or revise its prior forward-looking statements to reflect actual results or changes in the Company's expectations, the Company disclaims any commitment to do so except as required by securities laws.

OVERVIEW

The Company is a diverse company with a focus on delivering education-related products and services and student loan asset management. The largest operating businesses engage in student loan servicing, tuition payment processing and school information systems, and communications. A significant portion of the Company's revenue is net interest income earned on a portfolio of federally insured student loans. The Company also makes investments to further diversify the Company both within and outside of its historical core education-related businesses, including, but not limited to, investments in real estate and start-up ventures.

GAAP Net Income and Non-GAAP Net Income, Excluding Adjustments

A reconciliation of the Company's GAAP net income to net income, excluding derivative market value and foreign currency adjustments, is provided below.

| | Three months ended June 30, | | Six months ended June 30, | |
|--|-----------------------------|----------|---------------------------|----------|
| | 2016 | 2015 | 2016 | 2015 |
| GAAP net income attributable to Nelnet, Inc. | \$26,150 | 70,909 | 74,111 | 135,674 |
| Derivative market value and foreign currency adjustments | 35,207 | (11,944) | 57,361 | (14,081) |
| Tax effect (a) | (13,379) | 4,539 | (21,797) | 5,351 |
| Net income, excluding derivative market value and foreign currency adjustments (b) | \$47,978 | 63,504 | 109,675 | 126,944 |
| Earnings per share: | | | | |
| GAAP net income attributable to Nelnet, Inc. | \$0.61 | 1.54 | 1.73 | 2.94 |
| Derivative market value and foreign currency adjustments | 0.83 | (0.26) | 1.34 | (0.31) |
| Tax effect (a) | (0.31) | 0.10 | (0.51) | 0.12 |
| Net income, excluding derivative market value and foreign currency adjustments (b) | \$1.13 | 1.38 | 2.56 | 2.75 |

(a) The tax effects are calculated by multiplying the derivative market value and foreign currency adjustments by the applicable statutory income tax rate.

(b) The Company provides additional non-GAAP financial information related to specific items management believes to be important in the evaluation of its operating results and performance. "Derivative market value and foreign

currency adjustments" include (i) the unrealized gains and losses that are caused by changes in fair values of derivatives which do not qualify for "hedge treatment" under GAAP; and (ii) the foreign currency transaction gains or losses caused by the re-measurement of the Company's Euro-denominated bonds to U.S. dollars. The Company believes these point-in-time estimates of asset and liability values related to these financial instruments that are subject to interest and currency rate fluctuations are subject to volatility mostly due to timing and market factors beyond the control of management, and affect the period-to-period comparability of the results of operations. Accordingly, the Company's management utilizes operating results excluding these items for comparability purposes when making decisions regarding the Company's performance and in presentations with credit rating agencies, lenders, and investors. Consequently, the Company reports this non-GAAP information because the Company believes that it provides additional information regarding operational and performance indicators that are closely assessed by management. There is no comprehensive, authoritative guidance for the presentation of such non-GAAP information, which is only meant to supplement GAAP results by providing additional information that management utilizes to assess performance.

Operating Results

The Company earns net interest income on its FFELP student loan portfolio in its Asset Generation and Management ("AGM") operating segment. This segment is expected to generate a stable net interest margin and significant amounts of cash as the FFELP portfolio amortizes. As of June 30, 2016, the Company had a \$26.5 billion student loan portfolio that will amortize over the next approximately 25 years. The Company actively seeks to acquire additional FFELP loan portfolios to leverage its servicing scale and expertise to generate incremental earnings and cash flow.

In addition, the Company earns fee-based revenue through the following reportable operating segments:

- Student Loan and Guaranty Servicing ("LGS") - referred to as Nelnet Diversified Solutions ("NDS")
- Tuition Payment Processing and Campus Commerce ("TPP&CC") - referred to as Nelnet Business Solutions ("NBS")
- Communications - referred to as Allo Communications ("Allo")

Other business activities and operating segments that are not reportable are combined and included in Corporate and Other Activities ("Corporate"). Corporate and Other Activities also includes income earned on certain investments and interest expense incurred on unsecured debt transactions.

Prior to January 1, 2016, the Company allocated certain corporate overhead expenses that are incurred within the Corporate and Other Activities segment to the other operating segments. These expenses included certain corporate activities related to executive management, internal audit, enterprise risk management, and other costs incurred by the Company due to corporate-wide initiatives. Effective January 1, 2016, internal reporting to executive management (the "chief operating decision maker") changed to eliminate the allocation of these expenses to the other segments. Management believes the change in its allocation methodology results in a better reflection of the operating results of each of the reportable segments as if they each operated as a standalone business entity, which also reflects how management evaluates the performance of the segments. Prior period segment operating results have been restated to conform to the current period presentation.

The information below provides the operating results for each reportable operating segment and Corporate and Other Activities for the three and six months ended June 30, 2016 and 2015 (dollars in millions).

(a) Revenue includes intersegment revenue earned by LGS as a result of servicing loans for AGM.

(b) Total revenue includes "net interest income after provision for loan losses" and "total other income" from the Company's segment statements of income, excluding the impact from changes in fair values of derivatives and foreign currency transaction adjustments. Net income excludes changes in fair values of derivatives and foreign currency transaction adjustments, net of tax.

(c) Computed as income before income taxes divided by total revenue.

A summary of the results and financial highlights for each reportable operating segment and a summary of the Company's liquidity and capital resources follows. See "Results of Operations" for each reportable operating segment and "Liquidity and Capital Resources" under this Item 2 for additional detail.

Student Loan and Guaranty Servicing

As of June 30, 2016, the Company was servicing \$183.6 billion in FFELP, private, and government owned student loans, as compared with \$169.9 billion of loans as of June 30, 2015.

Revenue decreased in the three and six months ended June 30, 2016 compared to the same periods in 2015 due to a decrease in guaranty servicing and collection revenue. The Company's guaranty servicing and collection revenue was earned from two guaranty clients, and a significant amount of such revenue came from one of those clients. The contract with this client expired on October 31, 2015. FFELP guaranty servicing and collection revenue recognized by the Company from this client for the three and six months ended June 30, 2015 was \$12.6 million and \$21.3 million respectively. The other guaranty servicing and collection client exited the FFELP guaranty business at the end of their contract term on June 30, 2016. After this customer's exit from the FFELP guaranty business effective June 30, 2016, the Company has no remaining guaranty servicing and collection revenue.

Revenue from the government servicing contract increased to \$37.1 million for the three months ended June 30, 2016 compared to \$33.6 million for the same period in 2015, and increased to \$72.3 million for the six months ended June 30, 2016, compared to \$66.0 million for the same period in 2015. This increase was due to the shift in the portfolio of loans serviced to a greater portion of loans in higher paying repayment statuses.

Before tax operating margin was 25.1% and 27.0% for the three months ended June 30, 2016 and 2015, respectively, and 22.9% and 24.4% for the six months ended June 30, 2016 and 2015, respectively. This decrease was due to a decrease in guaranty servicing and collection revenue due to the loss of a significant guaranty client discussed above. The Company anticipates that margins will continue to decrease as a result of the loss of its remaining guaranty servicing and collection customer that exited the FFELP guaranty business at the end of their contract term on June 30, 2016 as discussed above.

In April 2016, the Department's Office of Federal Student Aid released information regarding a new contract procurement process for the Department to acquire a single servicing solution to support the management of federal student financial aid, including the servicing of all student loans owned by the Department. The contract solicitation process is divided into two phases. Responses for Phase I were due on May 9, 2016.

On May 6, 2016, the Company and Great Lakes submitted a joint response to Phase I as part of a newly created joint venture to respond to the contract solicitation process and to provide services under the new contract in the event that the Department selects it to be awarded with the contract. The joint venture will operate as a new legal entity called GreatNet Solutions, LLC ("GreatNet"). The Company and Great Lakes each own 50 percent of the ownership interests of GreatNet. In addition to the Company, Great Lakes is one of four private sector companies (referred to as Title IV Additional Services, or "TIVAS") that currently has a student loan servicing contract with the Department to provide servicing for loans owned by the Department. On June 30, 2016, the Department announced which entities were selected to respond to Phase II of the procurement selection process. GreatNet was one of three entities selected.

Tuition Payment Processing and Campus Commerce

Revenue increased in the three and six months ended June 30, 2016 compared to the same periods in 2015 due to increases in the number of managed tuition payment plans, campus commerce customer transaction and payments volume, and new school customers.

Before tax operating margin was 20.2% and 20.3% for the three months ended June 30, 2016 and 2015, respectively and 32.5% and 30.4% for the six months ended June 30, 2016 and 2015, respectively.

This segment is subject to seasonal fluctuations. Based on the timing of when revenue is recognized and when expenses are incurred, revenue and operating margin are higher in the first quarter as compared to the remainder of the year.

Communications

On December 31, 2015, the Company purchased 92.5 percent of the ownership interests of Allo for total cash consideration of \$46.25 million. On January 1, 2016, the Company sold a 1.0 percent ownership interest in Allo to a non-related third-party for \$0.5 million. The remaining 7.5 percent of the ownership interests of Allo is owned by members of Allo management, who have the opportunity to earn an additional 11.5 percent (up to 19 percent) of the total ownership interests based on the financial performance of Allo. The Allo assets acquired and liabilities assumed were recorded by the Company at their respective estimated fair values at the date of acquisition, and such assets and liabilities were included in the Company's balance sheet as of December 31, 2015. However, Allo had no impact on the consolidated statement of income for 2015. On January 1, 2016, the Company began to reflect the operations of Allo in the consolidated statements of income.

For the three and six months ended June 30, 2016, the operating segment recorded a net loss of \$0.7 million and \$1.1 million, respectively. The Company anticipates this operating segment will be dilutive to consolidated earnings in 2016 due to large upfront capital expenditures and associated depreciation and upfront customer acquisition costs.

- The Company currently plans to spend a total of approximately \$50 million in network capital expenditures during 2016. However, such amount could change based on customer demand for Allo's services. For the six months ended June 30, 2016, Allo's capital expenditures were \$12.0 million, including \$9.2 million for the three months ended June 30, 2016.

Asset Generation and Management

Core student loan spread was 1.29% for the three months ended June 30, 2016, compared to 1.41% for the same period in 2015 and 1.34% for the three month period ended March 31, 2016. The decrease in core student loan spread for the three month period ended June 30, 2016 compared to the three month period ended March 31, 2016 was due to a widening in the basis between the asset and debt indices in which the Company earns interest on its loans and funds such loans.

Due to historically low interest rates, the Company continues to earn significant fixed rate floor income. During the three months ended June 30, 2016 and 2015, and six months ended June 30, 2016 and 2015, the Company earned \$39.5 million, \$45.1 million, \$80.1 million, and \$91.3 million, respectively, of fixed rate floor income (net of derivative settlements of \$4.8 million and \$5.0 million for the three months ended June 30, 2016 and 2015, respectively, and \$10.1 million and \$10.0 million for the six months ended June 30, 2016 and 2015, respectively, used to hedge such loans). The decrease in fixed rate floor income for the three and six months ended June 30, 2016 compared to the same periods in 2015 is due to an increase in interest rates.

Liquidity and Capital Resources

As of June 30, 2016, the Company had cash and cash equivalents of \$59.3 million. In addition, the Company had a portfolio of available-for-sale and trading investments, consisting primarily of student loan asset-backed securities, with a fair value of \$141.5 million as of June 30, 2016.

For the six months ended June 30, 2016, the Company generated \$175.2 million in net cash provided by operating activities.

Forecasted future cash flows from the Company's FFELP student loan portfolio financed in asset-backed securitization transactions are estimated to be approximately \$2.37 billion as of June 30, 2016.

During the six months ended June 30, 2016, the Company repurchased a total of 1,611,041 shares of Class A common stock for \$52.5 million (\$32.57 per share). In May 2016, the Company's Board of Directors authorized a new stock repurchase program to repurchase up to a total of five million shares of the Company's Class A common stock during the three-year period ending May 25, 2019. The five million shares authorized under the new program include the remaining 1,664,223 un-repurchased shares from the prior program, which the new program replaced.

During the six months ended June 30, 2016, the Company paid cash dividends of \$10.2 million (\$0.24 per share), including \$5.1 million (\$0.12 per share) during the second quarter.

The Company intends to use its liquidity position to capitalize on market opportunities, including FFELP and private education loan acquisitions; strategic acquisitions and investments; expansion of Allo's telecommunications network; and capital management initiatives, including stock repurchases, debt repurchases, and dividend distributions. The timing and size of these opportunities will vary and will have a direct impact on the Company's cash and investment balances.

CONSOLIDATED RESULTS OF OPERATIONS

Analysis of the Company's operating results for the three and six months ended June 30, 2016 compared to the same period in 2015 is summarized below.

The Company's operating results are primarily driven by the performance of its existing portfolio and the revenues generated by its fee-based businesses and the costs to provide their products and services. The performance of the Company's portfolio is driven by net interest income (which includes financing costs) and losses related to credit quality of the assets, along with the cost to administer and service the assets and related debt.

The Company operates in distinct operating segments as described previously. For a reconciliation of the segment operating results to the consolidated results of operations, see note 10 of the notes to consolidated financial statements included under Part I, Item 1 of this report. Since the Company monitors and assesses its operations and results based on these segments, the discussion following the consolidated results of operations is presented on a segment basis.

On February 1, 2016, the Company sold 100 percent of the membership interests in Sparkroom LLC, which includes the majority of the Company's inquiry management products and services within Nelnet Enrollment Solutions. The Company retained the digital marketing and content solution products and services under the brand name Peterson's within the Nelnet Enrollment Solutions business, which include test preparation study guides, school directories and databases, career exploration guides, on-line courses, scholarship search and selection data, (a) career planning information and guides, and on-line information about colleges and universities. The Company reclassified the revenue and cost of goods sold attributable to the Peterson's products and services from "enrollment services revenue" and "cost to provide enrollment services" to "other income" and "other expenses," respectively, on the consolidated statements of income. After this reclassification, "enrollment services revenue" and "cost to provide enrollment services" include the operating results of the products and services sold as part of the Sparkroom disposition for all periods presented. These reclassifications had no effect on consolidated net income.

The following table summarizes the components of "other income."

(b) The operating results for the six months ended June 30, 2016 includes a gain of approximately \$3.0 million related to the Company's sale of Sparkroom, LLC in February 2016.

Department of Education Student Loan Servicing Contract

The Company's current servicing contract with the Department expires on June 16, 2019. In April 2016, the Department's Office of Federal Student Aid released information regarding a new contract procurement process for the Department to acquire a single servicing solution to support the management of federal student financial aid, including the servicing of all student loans owned by the Department. The contract solicitation process is divided into two phases. Responses for Phase I were due on May 9, 2016.

On May 6, 2016, the Company and Great Lakes submitted a joint response to Phase I as part of a newly created joint venture to respond to the contract solicitation process and to provide services under the new contract in the event that the Department selects it to be awarded with the contract. The joint venture will operate as a new legal entity called GreatNet. The Company and Great Lakes each own 50 percent of the ownership interests of GreatNet. In addition to the Company, Great Lakes is one of four private sector companies that currently has a student loan servicing contract with the Department to provide servicing for loans owned by the Department. On June 30, 2016, the Department announced which entities were selected to respond to Phase II of the procurement selection process. GreatNet was one of three entities selected. Navient Corporation and FedLoan Servicing (Pennsylvania Higher Education Assistance Agency), both existing TIVAS, were also selected to respond to Phase II.

During 2015, approximately 75 percent of new government student loans were allocated for servicing to the four TIVAS, with allocations based on established performance metrics compared among that group. An additional six not-for-profit ("NFP") servicers were allocated a total of approximately 25 percent of new loans for servicing during 2015. On March 2, 2016, the

Department announced that, for the period March 1, 2016 through June 30, 2016, new student loans will be allocated for servicing among the group of ten TIVAS and NFP servicers on the basis of the currently established performance metrics as compared among all ten loan servicers in that group, pursuant to a provision in the federal budgetary Consolidated Appropriations Act of 2016. This change resulted in a decrease in the Company's overall government allocation of new student loans for servicing from 13 percent to 8 percent for the period March 1, 2016 through June 30, 2016, and the other TIVAS were similarly affected. However, the Company did and will continue to benefit from the allocation of additional borrowers to the four NFP servicers to which the Company licenses its remote-hosted servicing software.

On July 15, 2016, the Department provided an update on its Direct Loan servicing contract with performance metrics results for the period January 1, 2016 through May 31, 2016 and new volume allocations for its student loan servicers based on these results. The new performance results had the Company ranked fifth among all TIVAS and NFP servicers, which results in the Company being allocated 12 percent of new student loan servicing volume for the period July 1, 2016 through February 28, 2017. The Company ranked second among the four TIVAS, with Great Lakes ranking first.

| Other expenses | 11,380 | 15,376 | 22,850 | 29,976 | Decrease due primarily to a decrease in collection costs associated with FFELP guaranty collection revenue. Collection costs were \$1.7 million and \$6.0 million for the three months ended June 30, 2016 and 2015, respectively and \$3.5 million and \$10.8 million for the six months ended June 30, 2016 and 2015, respectively. Excluding collection costs, other expenses were \$9.7 million and \$9.4 million for the three months ended June 30, 2016 and 2015, respectively, and \$19.3 million and \$19.2 million for the six months ended June 30, 2016 and 2015, respectively. Decrease in margin is due to a decrease in guaranty servicing and collection revenue due to the loss of a guaranty client as discussed below. The Company anticipates that margins will continue to decrease as a result of the loss of its remaining guaranty servicing and collection customer that exited the FFELP guaranty business at the end of their contract term on June 30, 2016 as discussed below.

The following table summarizes the components of "Loan and guaranty servicing revenue."

| Government servicing | \$37,063 | 33,633 | 72,294 | 66,041 | Increase due to the shift in the portfolio of loans serviced to a greater portion of loans in higher paying repayment statuses. |
| FFELP servicing | 3,684 | 3,483 | 7,323 | 7,028 | Increase due to an increase in third-party servicing volume as a result of conversions to the Company's servicing platform. Over time, FFELP servicing revenue will decrease as third-party customers' FFELP portfolios run off. |

TUITION PAYMENT PROCESSING AND CAMPUS COMMERCE OPERATING SEGMENT – RESULTS OF OPERATIONS

This segment of the Company's business is subject to seasonal fluctuations which correspond, or are related to, the traditional school year. Tuition management revenue is recognized over the course of the academic term, but the peak operational activities take place in summer and early fall. Higher amounts of revenue are typically recognized during the first quarter due to fees related to grant and aid applications as well as online applications and enrollment services. The Company's operating expenses do not follow the seasonality of the revenues. This is primarily due to generally fixed year-round personnel costs and seasonal marketing costs. Based on the timing of revenue recognition and when expenses are incurred, revenue and pre-tax operating margin are higher in the first quarter as compared to the remainder of the year.

Earnings before interest, taxes, depreciation, and amortization ("EBITDA") is a supplemental non-GAAP performance measure that is frequently used in capital-intensive industries such as telecommunications. Allo's management uses EBITDA to compare Allo's performance to that of its competitors and to eliminate certain non-cash and non-operating items in order to consistently measure performance from period to period. EBITDA excludes interest expense and income taxes because these items are associated with a company's particular capitalization and tax structures. EBITDA also excludes depreciation and amortization expense because these non-cash expenses primarily reflect the impact of historical capital investments, as opposed to the cash impacts of capital expenditures made in recent periods, which may be evaluated through cash flow measures. The Company reports EBITDA for Allo because the Company believes that it provides useful additional information for investors regarding a key metric used by management to assess Allo's performance, and it provides supplemental information about Allo's operating performance on a more variable cost basis. There are limitations to using EBITDA as a performance measure, including the difficulty associated with comparing companies that use similar performance measures whose calculations may differ from Allo's calculations. In addition, EBITDA should not be considered a substitute for other measures of financial performance, such as net income or any other performance measures derived in accordance with GAAP. A reconciliation of EBITDA from net income (loss) under GAAP is presented in the table immediately above.

(b) Represents the estimated number of single residence homes, apartments, and condominiums that Allo already serves and those in which Allo has the capacity to connect to its network distribution system without further

material extensions to the transmission lines, but have not been connected.

ASSET GENERATION AND MANAGEMENT OPERATING SEGMENT – RESULTS OF OPERATIONS

Student Loan Portfolio

As of June 30, 2016, the Company had a \$26.5 billion student loan portfolio that will amortize over the next approximately 25 years. For a summary of the Company's student loan portfolio as of June 30, 2016 and December 31, 2015, see note 2 of the notes to consolidated financial statements included under Part I, Item 1 of this report.

Loan Activity

The following table sets forth the activity of loans:

Allowance for Loan Losses and Loan Delinquencies

The Company maintains an allowance appropriate to absorb losses, net of recoveries, inherent in the portfolio of student loans, which results in periodic expense provisions for loan losses. Delinquencies have the potential to adversely impact the Company's earnings through increased servicing and collection costs and account charge-offs.

For a summary of the activity in the allowance for loan losses for the three and six months ended June 30, 2016 and 2015, and a summary of the Company's student loan delinquency amounts as of June 30, 2016, December 31, 2015, and June 30, 2015, see note 2 of the notes to consolidated financial statements included under Part I, Item 1 of this report.

In general, over the last several years, there has been a period over period decrease in the Company's federally insured loan provision for loan losses and charge-offs. The Company's primary driver for loan growth has been acquiring student loan portfolios. The Company records loans acquired net of any credit exposure through a credit discount, separate from the allowance for loan losses. This credit discount is non-accretable to interest income. The Company continues to evaluate credit losses associated with purchased loans based on current information and changes in expectations to determine the need for any additional allowance for loan losses. The recent purchases of large loan portfolios have resulted in an increase in the non-accretable discount balance, but no additional allowance for loan losses associated with these recent loan portfolios has been necessary. In addition, as the Company's overall federally insured student loan portfolio continues to season with the length of time that loans are in active repayment, credit performance continues to improve.

The Company's provision for loan losses for private education loans increased during the first six months of 2016 compared to 2015 due to the increase in the private education loan balance.

Student Loan Spread Analysis

The following table analyzes the student loan spread on the Company's portfolio of student loans, which represents the spread between the yield earned on student loan assets and the costs of the liabilities and derivative instruments used to fund the assets.

| Average balance of debt outstanding | 27,240,061 | 28,099,821 | 28,331,870 | 27,669,813 | 28,395,893 | |

A trend analysis of the Company's core and variable student loan spreads is summarized below.

The interest earned on a large portion of the Company's FFELP student loan assets is indexed to the one-month LIBOR rate. The Company funds the majority of its assets with three-month LIBOR indexed floating rate securities. The relationship between the indices in which the Company earns interest on its loans and funds such (a) loans has a significant impact on student loan spread. This table (the right axis) shows the difference between the Company's liability base rate and the one-month LIBOR rate by quarter. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk," which provides additional detail on the Company's FFELP student loan assets and related funding for those assets.

Variable student loan spread decreased during the three months ended June 30, 2016 as compared to both the three months ended March 31, 2016 and June 30, 2015 due to a widening in the basis between the asset and debt indices in which the Company earns interest on its loans and funds such loans (as reflected in the table above).

The primary difference between variable student loan spread and core student loan spread is fixed rate floor income. A summary of fixed rate floor income and its contribution to core student loan spread follows:

| | Three months ended | | | Six months ended | | |
|---|--------------------|-------------------|------------------|------------------|------------------|---|
| | June 30, 2016 | March 31, 2016 | June 30, 2015 | June 30, 2016 | June 30, 2015 | |
| Fixed rate floor income, gross | \$44,338 | 45,882 | 50,088 | 90,220 | 101,347 | |
| Derivative settlements (a) | (4,841) | (5,243) | (5,019) | (10,084) | (10,034) | |
| Fixed rate floor income, net | \$39,497 | 40,639 | 45,069 | 80,136 | 91,313 | |
| Fixed rate floor income contribution to spread, net | 0.58 | % 0.58 | % 0.64 | % 0.58 | % 0.65 | % |

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during 2016 and 2015 are due to historically low interest rates. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods. The decrease in fixed rate floor income for the three and six months ended June 30, 2016 compared to the same periods in 2015 is due to an increase in interest rates. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk," which provides additional detail on the Company's portfolio earning fixed rate floor income and the derivatives used by the Company to hedge these loans.

| Derivative settlements, net | (5,264) | (5,189) | (11,568) | (10,152) | The Company maintains an overall risk management strategy that incorporates the use of derivative instruments to reduce the economic effect of interest rate volatility. Derivative settlements for each applicable period should be evaluated with the Company's net interest income as reflected in the table below. |

LIQUIDITY AND CAPITAL RESOURCES

The Company's Student Loan and Guaranty Servicing and Tuition Payment Processing and Campus Commerce operating segments are non-capital intensive and both produce positive operating cash flows. As such, a minimal amount of debt and equity capital is allocated to these segments and any liquidity or capital needs are satisfied using cash flow from operations. Therefore, the Liquidity and Capital Resources discussion is concentrated on the Company's liquidity and capital needs to meet existing debt obligations in the Asset Generation and Management operating segment and capital needs to expand Allo's communications network in the Company's Communications operating segment.

Sources of Liquidity

The Company has historically generated positive cash flow from operations. For the six months ended June 30, 2016 and the year ended December 31, 2015, the Company's net cash provided by operating activities was \$175.2 million and \$391.4 million, respectively.

As of June 30, 2016, the Company had cash and cash equivalents of \$59.3 million. The Company also had a portfolio of available-for-sale and trading investments, consisting primarily of student loan asset-backed securities, with a fair value of \$141.5 million as of June 30, 2016.

The Company also has a \$350.0 million unsecured line of credit that matures on October 30, 2020. As of June 30, 2016, \$105.0 million was outstanding on the unsecured line of credit and \$245.0 million was available for future use.

In addition, the Company has repurchased certain of its own asset-backed securities (bonds and notes payable) in the secondary market. For accounting purposes, these notes are effectively retired and are not included on the Company's consolidated balance sheet. However, these securities are legally outstanding at the trust level and the Company could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. Upon a sale of these notes to third parties, the Company would obtain cash proceeds equal to the market value of the notes on the date of such sale. As of June 30, 2016, the Company holds \$50.8 million (par value) of its own asset-backed securities that are not included in the consolidated financial statements.

The Company intends to use its liquidity position to capitalize on market opportunities, including FFELP and private education loan acquisitions; strategic acquisitions and investments; expansion of Allo's telecommunications network; and capital management initiatives, including stock repurchases, debt repurchases, and dividend distributions. Dependent upon the timing and size of the opportunities, the Company's cash and investment balances may increase from their current levels.

Cash Flows

During the six months ended June 30, 2016, the Company generated \$175.2 million from operating activities, compared to \$192.0 million for the same period in 2015. The decrease in cash provided by operating activities reflects a decrease in net income, change in deferred taxes, and a decrease in proceeds from terminating certain derivative instrument contracts during the six months ended June 30, 2016 as compared to the same period in 2015. These factors were partially offset by changes in the adjustments to net income for non-cash fair value adjustments for derivatives and foreign currency transaction adjustments and a decrease in accounts receivable. Accrued interest on loans purchased is included in cash flows from operating activities in the respective period of the purchase. Net purchased accrued interest was \$60.7 million for the six months ended June 30, 2015. Net purchased accrued interest for the six months ended June 30, 2016 was not significant.

The primary items included in the statement of cash flows for investing activities are the purchase and repayment of student loans. The primary items included in financing activities are the proceeds from the issuance of and payments on bonds and notes payable used to fund student loans. Cash provided by investing activities for the six months ended June 30, 2016 and 2015 was \$1.6 billion and \$324.3 million, respectively. Cash used in financing activities was \$1.8 billion and \$464.4 million for the six months ended June 30, 2016 and 2015, respectively. Investing and financing activities are further addressed in the discussion that follows.

Liquidity Needs and Sources of Liquidity Available to Satisfy Debt Obligations Secured by Student Loan Assets and Related Collateral

The following table shows the Company's debt obligations outstanding that are secured by student loan assets and related collateral.

| | As of June 30, 2016 | |
|--|---------------------|-------------------|
| | Carrying amount | Final maturity |
| Bonds and notes issued in asset-backed securitizations | \$24,576,893 | 8/26/19 - 8/26/52 |
| FFELP warehouse facilities | 1,811,708 | 7/9/18 - 4/26/19 |
| Private education loan warehouse facility | 221,114 | 4/28/17 |
| Other borrowings | 75,000 | 10/31/16 |
| | \$26,684,715 | |

Bonds and Notes Issued in Asset-backed Securitizations

The majority of the Company's portfolio of student loans is funded in asset-backed securitizations that are structured to substantially match the maturity of the funded assets, thereby minimizing liquidity risk. In addition, due to (i) the difference between the yield the Company receives on the loans and cost of financing within these transactions, and (ii) the servicing and administration fees the Company earns from these transactions, the Company has created a portfolio that will generate earnings and significant cash flow over the life of these transactions.

As of June 30, 2016, based on cash flow models developed to reflect management's current estimate of, among other factors, prepayments, defaults, deferment, forbearance, and interest rates, the Company currently expects future undiscounted cash flows from its portfolio to be approximately \$2.37 billion as detailed below. The \$2.37 billion includes approximately \$726.5 million (as of June 30, 2016) of overcollateralization included in the asset-backed securitizations. These excess net asset positions are reflected variously in the following balances in the consolidated balance sheet: "student loans receivable," "restricted cash and investments," and "accrued interest receivable."

The forecasted cash flow presented below includes all loans funded in asset-backed securitizations as of June 30, 2016. As of June 30, 2016, the Company had \$24.6 billion of loans included in asset-backed securitizations, which represented 93.0 percent of its total FFELP student loan portfolio. The forecasted cash flow does not include cash flows that the Company expects to receive related to loans funded in its warehouse facilities as of June 30, 2016 or loans acquired subsequent to June 30, 2016.

FFELP Asset-backed Securitization Cash Flow Forecast

\$2.37 billion

(dollars in millions)

The Company uses various assumptions, including prepayments and future interest rates, when preparing its cash flow forecast. These assumptions are further discussed below.

Prepayments: The primary variable in establishing a life of loan estimate is the level and timing of prepayments. Prepayment rates equal the amount of loans that prepay annually as a percentage of the beginning of period balance, net of scheduled principal payments. A number of factors can affect estimated prepayment rates, including the level of consolidation activity, borrower default rates, and utilization of FFEL Program debt management options such as income-based repayment, deferments, and forbearance. Should any of these factors change, management may revise its assumptions, which in turn would impact the projected future cash flow. The Company's cash flow forecast above assumes prepayment rates that are generally consistent with those utilized in the Company's recent asset-backed securitization transactions. If management used a prepayment rate assumption two times greater than what was used to forecast the cash flow, the cash flow forecast would be reduced by approximately \$260 million to \$320 million.

Interest rates: The Company funds the majority of its student loans with three-month LIBOR indexed floating rate securities. Meanwhile, the interest earned on the Company's student loan assets is indexed primarily to a one-month LIBOR rate. The different interest rate characteristics of the Company's loan assets and liabilities funding these assets result in basis risk. The Company's cash flow forecast assumes three-month LIBOR will exceed one-month LIBOR by 12 basis points for the life of the portfolio, which approximates the historical relationship between these indices. If the forecast is computed assuming a spread of 24 basis points between three-month and one-month LIBOR for the life of the portfolio, the cash flow forecast would be reduced by approximately \$65 million to \$105 million.

The Company uses the current forward interest rate yield curve to forecast cash flows. A change in the forward interest rate curve would impact the future cash flows generated from the portfolio. An increase in future interest rates will reduce the amount of fixed rate floor income the Company is currently receiving. The Company attempts to mitigate the impact of a rise in short-term rates by hedging interest rate risks. As of June 30, 2016, the net fair value of the Company's interest rate derivatives used to hedge loans earning fixed rate floor income was a net liability of \$42.8 million. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk — Interest Rate Risk."

FFELP Warehouse Facilities

The Company funds a portion of its FFELP loan acquisitions using its FFELP warehouse facilities. Student loan warehousing allows the Company to buy and manage student loans prior to transferring them into more permanent financing arrangements. As of June 30, 2016, the Company had three FFELP warehouse facilities with an aggregate maximum financing amount available of \$2.1 billion, of which \$1.8 billion was outstanding, and \$0.3 billion was available for additional funding. Of the three facilities, one facility provides for formula-based advance rates, depending on FFELP loan type, up to a maximum of the principal and interest of loans financed. The advance rate for collateral may increase or decrease based on market conditions. The other two FFELP warehouse facilities have static advance rates that require initial equity for loan funding, but do not require increased equity based on market movements. As of June 30, 2016, the Company had \$105.4 million advanced as equity support on these facilities. For further discussion of the Company's FFELP warehouse facilities outstanding at June 30, 2016, see note 3 of the notes to consolidated financial statements included under Part I, Item 1 of this report.

Upon termination or expiration of the warehouse facilities, the Company would expect to access the securitization market, obtain replacement warehouse facilities, use operating cash, consider the sale of assets, or transfer collateral to satisfy any remaining obligations.

Private Education Loan Warehouse Facility

On June 26, 2015, the Company entered into a \$275.0 million private education loan warehouse facility. As of June 30, 2016, there was \$221.1 million outstanding on the facility and \$53.9 million was available for future use. The facility has a static advance rate that requires initial equity for loan funding, but does not require increased equity based on market movements. The maximum advance rate on the entire facility is 88 percent and minimum advance rates, depending on loan characteristics and program type, ranged from 64 percent to 99 percent. As of June 30, 2016, \$32.0 million was advanced on the facility as equity support. The facility is supported by liquidity provisions, which had an original expiration date of June 24, 2016.

On April 1, 2016, the Company amended the agreement for this facility to change the expiration date for the liquidity provisions to October 28, 2016, and to change the final maturity date to April 28, 2017. In addition, the minimum advance rates, depending on loan characteristics and program type, were changed to a range from 61.75 percent to 95.00 percent, and the maximum advance rate on the entire facility remained at 88 percent. In the event the Company is unable to renew the liquidity provisions by the amended expiration date of October 28, 2016, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by the facility's amended final maturity date of April 28, 2017.

Upon termination or expiration of the warehouse facility, the Company would expect to access the securitization market, obtain replacement warehouse facilities, use operating cash, consider the sale of assets, or transfer collateral to satisfy any remaining obligations.

Other Borrowings

The Company has a \$75.0 million line of credit, which is collateralized by asset-backed security investments, that expires October 31, 2016. The line of credit has covenants and cross default provisions similar to those under the Company's unsecured line of credit. As of June 30, 2016, \$75.0 million was outstanding on this line of credit. Upon termination or expiration of this line of credit, the Company would obtain a replacement facility, use operating cash, consider the sale of assets, or transfer collateral to satisfy any remaining obligations.

Other Uses of Liquidity

Effective July 1, 2010, no new loan originations can be made under the FFEL Program and all new federal loan originations must be made through the Federal Direct Loan Program. As a result, the Company no longer originates new FFELP loans, but continues to acquire FFELP loan portfolios from third parties and believes additional loan

purchase opportunities exist.

The Company plans to fund future FFELP student loan acquisitions using current cash and investments; using its Union Bank participation agreement (as described below); using its FFELP warehouse facilities (as described above); and continuing to access the asset-backed securitization market.

49

Union Bank Participation Agreement

The Company maintains an agreement with Union Bank, as trustee for various grantor trusts, under which Union Bank has agreed to purchase from the Company participation interests in student loans. As of June 30, 2016, \$505.6 million of loans were subject to outstanding participation interests held by Union Bank, as trustee, under this agreement. The agreement automatically renews annually and is terminable by either party upon five business days' notice. This agreement provides beneficiaries of Union Bank's grantor trusts with access to investments in interests in student loans, while providing liquidity to the Company. The Company can participate loans to Union Bank to the extent of availability under the grantor trusts, up to \$750 million or an amount in excess of \$750 million if mutually agreed to by both parties. Loans participated under this agreement have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included in the Company's consolidated balance sheets.

Asset-backed Securities Transactions

The Company, through its subsidiaries, has historically funded student loans by completing asset-backed securitizations. Fitch Ratings and Moody's Investors Service have placed numerous tranches of FFELP securitizations by various issuers, including certain tranches of prior FFELP securitizations issued by subsidiaries of the Company, on review for potential downgrade due to principal payments and prepayments on the underlying student loans coming in slower than initial expectations, and the resulting risk that certain principal maturities on those FFELP securitizations may not be met by the final maturity dates, which could result in an event of default under the underlying securitization agreements. Such rating actions have caused the spreads on FFELP securitizations in general to widen and have reduced the liquidity in the secondary market for FFELP securitizations.

In June 2016, Moody's published an updated methodology for its ratings of FFELP securitizations, and Fitch announced that it was in the final phase of updating its corresponding ratings criteria. In addition, on June 15, 2016, the Company announced the launch of an online investor communication forum that may facilitate the amendment of securitizations to extend the legal final maturity dates. The ultimate impact of these developments on the Company's current and future securitizations is uncertain. Depending on future rating agency actions and market conditions, the Company currently anticipates continuing to access the asset-backed securitization market for both FFELP and private education loans. Such asset-backed securitization transactions would be used to refinance student loans included in its warehouse facilities, student loans purchased from third parties, and/or student loans in its existing asset-backed securitizations.

Liquidity Impact Related to Hedging Activities

The Company utilizes derivative instruments to manage interest rate sensitivity. By using derivative instruments, the Company is exposed to market risk which could impact its liquidity. Based on the derivative portfolio outstanding as of June 30, 2016, the Company does not currently anticipate any movement in interest rates having a material impact on its capital or liquidity profile, nor does the Company expect that any movement in interest rates would have a material impact on its ability to meet potential collateral deposits with its counterparties. However, if interest rates move materially and negatively impact the fair value of the Company's derivative portfolio or if the Company enters into additional derivatives for which the fair value becomes negative, the Company could be required to deposit additional collateral with its derivative instrument counterparties and/or a third-party clearinghouse. The collateral deposits, if significant, could negatively impact the Company's liquidity and capital resources. As of June 30, 2016, the fair value of the Company's derivatives which had a negative fair value (a liability in the Company's balance sheet), was \$101.8 million. As of June 30, 2016, the Company had \$110.7 million of collateral deposited with counterparties or a clearinghouse related to these derivatives.

Liquidity Impact Related to the Communications Operating Segment

Allo has made significant investments in its communications network and currently provides fiber directly to homes and businesses in seven Nebraska communities. In November 2015, Allo announced plans to expand its network to make its services available to substantially all commercial and residential premises in Lincoln, Nebraska, and currently plans to expand to additional communities in Nebraska and surrounding states over the next several years. The Company currently plans to spend approximately \$50 million in total in network capital expenditures during 2016. However, such amount could change based on customer demand for Allo's services. For the six month period ended June 30, 2016, Allo's capital expenditures were \$12.0 million.

Other Debt Facilities

As discussed above, the Company has a \$350.0 million unsecured line of credit with a maturity date of October 30, 2020. As of June 30, 2016, the unsecured line of credit had an outstanding balance of \$105.0 million and \$245.0 million was available for future use. Upon the maturity date in 2020 there can be no assurance that the Company will be able to maintain this line of credit, increase the amount outstanding under the line, or find alternative funding if necessary.

The Company has issued Junior Subordinated Hybrid Securities (the "Hybrid Securities") that have a final maturity date of September 15, 2061. The Hybrid Securities are unsecured obligations of the Company. As of June 30, 2016, \$57.2 million of Hybrid Securities were outstanding.

The Company also has two notes payable, which were each issued by TDP Phase Three, LLC ("TDP") on December 30, 2015 in connection with the development of a commercial building. TDP is an entity established during 2015 for the sole purpose of developing and operating a commercial building. The Company owns 25 percent of TDP. However, because the Company plans to be a tenant in this building once the development is complete, the operating results of TDP are included in the Company's consolidated financial statements. As of June 30, 2016, one of the TDP notes has \$12.0 million outstanding with a maturity date of March 31, 2023; the other TDP note has \$6.4 million outstanding with a maturity date of December 15, 2045. Recourse to the Company on the outstanding balance of these notes is equal to its ownership percentage of TDP.

Debt Repurchases

Due to the Company's positive liquidity position and opportunities in the capital markets, the Company has repurchased its own debt over the last several years, and may continue to do so in the future. See note 4 of the notes to consolidated financial statements included in the 2015 Annual Report for information on debt repurchased by the Company during the years 2013 through 2015. No significant debt repurchases have been made by the Company during 2016.

Stock Repurchases

On May 7, 2015, the Company announced that its Board of Directors had authorized a stock repurchase program to repurchase up to a total of five million shares of the Company's Class A common stock during the three-year period ending May 24, 2018. In May 2016, the Company's Board of Directors authorized a new stock repurchase program to repurchase up to a total of five million shares of the Company's Class A common stock during the three-year period ending May 25, 2019. The five million shares authorized under the new program included the remaining 1,664,223 un-repurchased shares from the prior program, which the new program replaced. Under the program, shares may be repurchased from time to time depending on various factors, including share prices and other potential uses of liquidity. Shares repurchased by the Company during the three months ended March 31, 2016 and June 30, 2016 are shown below. For additional information on stock repurchases during the second quarter of 2016, see "Stock Repurchases" under Part II, Item 2 of this report.

| | Total shares repurchased | Purchase price (in thousands) | Average price of shares repurchased (per share) |
|------------------------------|--------------------------|-------------------------------|---|
| Quarter ended March 31, 2016 | 1,599,099 | \$ 52,069 | 32.56 |
| Quarter ended June 30, 2016 | 11,942 | 399 | 33.45 |
| Total | 1,611,041 | \$ 52,468 | 32.57 |

As of June 30, 2016, 4,992,360 shares remain authorized for repurchase under this stock repurchase program.

Dividends

On June 15, 2016, the Company paid a second quarter 2016 cash dividend on the Company's Class A and Class B common stock of \$0.12 per share. In addition, the Company's Board of Directors has declared a third quarter 2016 cash dividend on the Company's outstanding shares of Class A and Class B common stock of \$0.12 per share. The third quarter cash dividend will be paid on September 15, 2016, to shareholders of record at the close of business on September 1, 2016.

The Company currently plans to continue making regular quarterly dividend payments, subject to future earnings, capital requirements, financial condition, and other factors. In addition, the payment of dividends is subject to the terms of the Company's outstanding Hybrid Securities, which generally provide that if the Company defers interest payments on those securities it cannot pay dividends on its capital stock.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources that are material to investors.

RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued accounting guidance regarding the recognition of revenue from contracts with customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This guidance will replace most existing revenue recognition guidance once it becomes effective on January 1, 2018. Early application is permitted beginning January 1, 2017, and the standard allows the use of either the retrospective or cumulative effect transition method. The Company is evaluating the impact this standard will have on its ongoing financial reporting, and has not yet selected a method of transition.

In January 2016, the FASB issued accounting guidance regarding the recognition and measurement of financial assets and financial liabilities, which will change the income statement impact of equity investments, and the recognition of changes in fair value of financial liabilities when the fair value option is elected. The new guidance requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee) and requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. This guidance is effective for the Company beginning January 1, 2018. Early adoption is permitted for the provisions related to the recognition of changes in fair value of financial liabilities when the fair value option is elected. The Company is evaluating the impact this standard will have on its ongoing financial reporting.

In February 2016, the FASB issued accounting guidance regarding the accounting for leases. The new standard will require most leases where the Company is the lessee to be recognized on the balance sheet, as well as certain changes in the lessor accounting. This guidance is effective for the Company beginning January 1, 2019 and will be applied retrospectively. The Company is evaluating the impact this standard will have on its ongoing financial reporting.

In June 2016, the FASB issued accounting guidance regarding the measurement of credit losses on financial instruments, which will change the way entities recognize impairment of many financial assets by requiring immediate recognition of estimated credit losses expected to occur over the asset's remaining life. This guidance is effective for the Company beginning January 1, 2020. Early application is permitted beginning January 1, 2019. The Company is evaluating the impact this standard will have on its ongoing financial reporting.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

(All dollars are in thousands, except share amounts, unless otherwise noted)

Interest Rate Risk

The Company's primary market risk exposure arises from fluctuations in its borrowing and lending rates, the spread between which could impact the Company due to shifts in market interest rates.

Edgar Filing: NELNET INC - Form 10-Q

The following table sets forth the Company's loan assets and debt instruments by interest rate characteristics:

| | As of June 30, 2016 | | As of December 31, 2015 | |
|--------------------------------|---------------------|---------|----------------------------|---------|
| | Dollars | Percent | Dollars | Percent |
| Fixed-rate loan assets | \$10,010,100 | 37.4 % | \$11,229,584 | 39.3 % |
| Variable-rate loan assets | 16,744,460 | 62.6 | 17,326,165 | 60.7 |
| Total | \$26,754,560 | 100.0% | \$28,555,749 | 100.0% |

FFELP loans originated prior to April 1, 2006 generally earn interest at the higher of the borrower rate, which is fixed over a period of time, or a floating rate based on the special allowance payment ("SAP") formula set by the Department. The SAP rate is based on an applicable index plus a fixed spread that depends on loan type, origination date, and repayment status. The Company generally finances its student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the SAP rate, the Company's student loans earn at a fixed rate while the interest on the variable rate debt typically continues to reflect the low and/or declining interest rates. In these interest rate environments, the Company may earn additional spread income that it refers to as floor income.

Depending on the type of loan and when it was originated, the borrower rate is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, the Company may earn floor income for an extended period of time, which the Company refers to as fixed rate floor income, and for those loans where the borrower rate is reset annually on July 1, the Company may earn floor income to the next reset date, which the Company refers to as variable rate floor income. All FFELP loans first originated on or after April 1, 2006 effectively earn at the SAP rate, since lenders are required to rebate fixed rate floor income and variable rate floor income for those loans to the Department.

No variable-rate floor income was earned by the Company during 2015 and 2016. A summary of fixed rate floor income earned by the Company follows.

| | Three months ended June 30, | | Six months ended June 30, | |
|--------------------------------|-----------------------------|----------|---------------------------|-----------|
| | 2016 | 2015 | 2016 | 2015 |
| Fixed rate floor income, gross | \$44,338 | 50,088 | 90,220 | 101,347 |
| Derivative settlements (a) | (4,841) | (5,019) | (10,084) | (10,034) |
| Fixed rate floor income, net | \$39,497 | 45,069 | 80,136 | 91,313 |

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during 2016 and 2015 are due to historically low interest rates. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods. Fixed rate floor income decreased for the three and six months ended June 30, 2016 as compared to the same periods in 2015 due to an increase in interest rates.

Absent the use of derivative instruments, a rise in interest rates may reduce the amount of floor income received and this may have an impact on earnings due to interest margin compression caused by increasing financing costs, until such time as the federally insured loans earn interest at a variable rate in accordance with their special allowance payment formulas. In higher interest rate environments, where the interest rate rises above the borrower rate and fixed rate loans effectively become variable rate loans, the impact of the rate fluctuations is reduced.

The following graph depicts fixed rate floor income for a borrower with a fixed rate of 6.75% and a SAP rate of 2.64%:

The following table shows the Company's federally insured student loan assets that were earning fixed rate floor income as of June 30, 2016.

| Fixed interest rate range | Borrower/lender weighted average yield | Estimated variable conversion rate (a) | Loan balance |
|---------------------------|--|--|--------------|
| 3.0 - 3.49% | 3.28% | 0.64% | \$1,536,726 |
| 3.5 - 3.99% | 3.65% | 1.01% | 2,212,385 |
| 4.0 - 4.49% | 4.20% | 1.56% | 1,639,781 |
| 4.5 - 4.99% | 4.72% | 2.08% | 997,829 |
| 5.0 - 5.49% | 5.22% | 2.58% | 627,344 |
| 5.5 - 5.99% | 5.67% | 3.03% | 439,469 |
| 6.0 - 6.49% | 6.19% | 3.55% | 510,363 |
| 6.5 - 6.99% | 6.70% | 4.06% | 500,707 |
| 7.0 - 7.49% | 7.17% | 4.53% | 174,555 |
| 7.5 - 7.99% | 7.71% | 5.07% | 294,973 |
| 8.0 - 8.99% | 8.18% | 5.54% | 685,884 |
| > 9.0% | 9.04% | 6.40% | 237,633 |
| | | | \$9,857,649 |

The estimated variable conversion rate is the estimated short-term interest rate at which loans would convert to a (a) variable rate. As of June 30, 2016, the weighted average estimated variable conversion rate was 2.26% and the short-term interest rate was 45 basis points.

The following table summarizes the outstanding derivative instruments as of June 30, 2016 used by the Company to economically hedge loans earning fixed rate floor income.

| Maturity | Notional amount | Weighted average fixed rate paid by the Company (a) | |
|----------|-----------------|---|---|
| 2016 | \$750,000 | 0.72 | % |
| 2017 | 1,000,000 | 0.97 | |
| 2018 | 1,600,000 | 1.08 | |
| 2019 | 3,250,000 | 0.97 | |
| 2020 | 1,500,000 | 1.01 | |
| 2025 | 100,000 | 2.32 | |
| 2026 | 50,000 | 1.52 | |
| | \$8,250,000 | 0.99 | % |

(a) For all interest rate derivatives, the Company receives discrete three-month LIBOR.

In addition, on August 20, 2014, the Company paid \$9.1 million for an interest rate swap option to economically hedge loans earning fixed rate floor income. The interest rate swap option gives the Company the right, but not the obligation, to enter into a \$250 million notional interest rate swap in which the Company would pay a fixed amount of 3.30% and receive discrete one-month LIBOR. If the interest rate swap option is exercised, the swap would become effective in 2019 and mature in 2024.

The Company is also exposed to interest rate risk in the form of basis risk and repricing risk because the interest rate characteristics of the Company's assets do not match the interest rate characteristics of the funding for those assets. The following table presents the Company's FFELP student loan assets and related funding for those assets arranged by underlying indices as of June 30, 2016:

| Index | Frequency of variable resets | Assets | Funding of student loan assets |
|--|------------------------------|--------------|--------------------------------|
| 1 month LIBOR (a) | Daily | \$24,356,092 | — |
| 3 month H15 financial commercial paper | Daily | 1,339,268 | — |
| 3 month Treasury bill | Daily | 771,030 | — |
| 3 month LIBOR (a) (b) | Quarterly | — | 14,741,895 |

The Company has certain basis swaps outstanding in which the Company receives three-month LIBOR and pays one-month LIBOR plus or minus a spread as defined in the agreements (the "1:3 Basis Swaps"). The Company (a) entered into these derivative instruments to better match the interest rate characteristics on its student loan assets and the debt funding such assets. The following table summarizes the 1:3 Basis Swaps outstanding as of June 30, 2016.

| Maturity | Notional amount |
|----------|-----------------|
| 2016 | \$2,000,000 |

2028 125,000

The weighted average rate paid by the Company on the 1:3 Basis Swaps as of June 30, 2016 was one-month LIBOR plus 9.3 basis points.

The Company has Euro-denominated notes that reprice on the EURIBOR index. The Company has entered into a (b) cross-currency interest rate swap that converts the EURIBOR index to three-month LIBOR. As a result, these notes are reflected in the three-month LIBOR category in the above table. See "Foreign Currency Exchange Risk" below.

The interest rates on certain of the Company's asset-backed securities are set and periodically reset via a "dutch auction" ("Auction Rate Securities"). As of June 30, 2016, the Company was sponsor for \$1.2 billion of Auction Rate (c) Securities. Since February 2008, problems in the auction rate securities market as a whole have led to failures of the auctions pursuant to which the Company's Auction Rate Securities' interest rates are set. As a result, the Auction Rate

Securities generally pay interest to the holder at a maximum rate as defined by the indenture. While these rates will vary, they will generally be based on a spread to LIBOR or Treasury Securities, or the Net Loan Rate as defined in the financing documents.

(d) The interest rates on certain of the Company's warehouse facilities are indexed to asset-backed commercial paper rates.

Assets include accrued interest receivable and restricted cash and investments. Funding represents (e) overcollateralization (equity) included in FFELP asset-backed securitizations and warehouse facilities and other liabilities funding student loans and related assets.

Sensitivity Analysis

The following tables summarize the effect on the Company's earnings, based upon a sensitivity analysis performed by the Company assuming hypothetical increases in interest rates of 100 basis points and 300 basis points while funding spreads remain constant. In addition, a sensitivity analysis was performed assuming the funding index increases 10 basis points and 30 basis points while holding the asset index constant, if the funding index is different than the asset index. The sensitivity analysis was performed on the Company's variable rate assets (including loans earning fixed rate floor income) and liabilities. The analysis includes the effects of the Company's interest rate and basis swaps in existence during these periods.

Foreign Currency Exchange Risk

The Company has issued €352.7 million of student loan asset-backed Euro Notes (the "Euro Notes") with an interest rate based on a spread to the EURIBOR index. As a result, the Company is exposed to market risk related to fluctuations in foreign currency exchange rates between the U.S. dollar and Euro. The Company has entered into a cross-currency interest rate swap in connection with the issuance of the Euro Notes. See note 4 of the notes to consolidated financial statements included under Part I, Item 1 of this report for additional information, including a summary of the terms of the cross-currency interest rate swap associated with the Euro Notes and the related financial statement impact.

Financial Statement Impact – Derivatives and Foreign Currency Transaction Adjustments

For a table summarizing the effect of derivative instruments in the consolidated statements of income, including the components of "derivative market value and foreign currency adjustments and derivative settlements, net" included in the consolidated statements of income, see note 4 of the notes to consolidated financial statements included under Part I, Item 1 of this report.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Under supervision and with the participation of certain members of the Company's management, including the chief executive and chief financial officers, the Company completed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in SEC Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on this evaluation, the Company's principal executive and principal financial officers concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report to provide reasonable assurance that information required to be disclosed in reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms, and is accumulated and communicated to the Company's management, including the chief executive and chief financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There have been no material changes from the information set forth in the Legal Proceedings section of the Company's Annual Report on Form 10-K for the year ended December 31, 2015 under Item 3 of Part I of such Form 10-K.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors described in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 in response to Item 1A of Part I of such Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Stock Repurchases

The following table summarizes the repurchases of Class A common stock during the second quarter of 2016 by the Company or any “affiliated purchaser” of the Company, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934. Certain share repurchases included in the table below were made pursuant to a trading plan adopted by the Company in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934.

| Period | Total number of shares purchased (a) | Average price paid per share | Total number of shares purchased as part of publicly announced plans or programs (b) | Maximum number of shares that may yet be purchased under the plans or programs (b) |
|--------------------------|--------------------------------------|------------------------------|--|--|
| April 1 - April 30, 2016 | 1,131 | \$ 38.40 | — | 1,664,223 |
| May 1 - May 31, 2016 | — | — | — | 5,000,000 |
| June 1 - June 30, 2016 | 10,811 | 32.93 | 7,640 | 4,992,360 |
| Total | 11,942 | \$ 33.45 | 7,640 | |

The total number of shares includes: (i) shares repurchased pursuant to the stock repurchase program discussed in footnote (b) below; and (ii) shares owned and tendered by employees to satisfy tax withholding obligations upon the vesting of restricted shares. Shares of Class A common stock tendered by employees to satisfy tax withholding obligations included 1,131 shares, 0 shares, and 3,171 shares in April, May, and June 2016, respectively. Unless otherwise indicated, shares owned and tendered by employees to satisfy tax withholding obligations were purchased at the closing price of the Company’s shares on the date of vesting.

On May 7, 2015, the Company announced that its Board of Directors had authorized a stock repurchase program to repurchase up to a total of five million shares of the Company's Class A common stock during the three-year period ending May 24, 2018. On August 4, 2016, the Company announced that its Board of Directors authorized a new stock repurchase program in May 2016 to repurchase up to a total of five million shares of the Company's Class A common stock during the three-year period ending May 25, 2019. The five million shares authorized under the new program include the remaining 1,644,223 un-repurchased shares from the prior program, which the new program replaced.

Working capital and dividend restrictions/limitations

The Company’s credit facilities, including its revolving line of credit which is available through October 30, 2020, impose restrictions with respect to the Company’s minimum consolidated net worth, the ratio of the Company’s adjusted EBITDA to corporate debt interest, the amount of recourse indebtedness, and the amount of private education loans held by the Company. In addition, trust indentures and other financing agreements governing debt issued by the Company's education lending subsidiaries may have general limitations on the amounts of funds that can be transferred to the Company by its subsidiaries through cash dividends.

The supplemental indenture for the Company’s Hybrid Securities issued in September 2006 provides that so long as any Hybrid Securities remain outstanding, if the Company gives notice of its election to defer interest payments but

the related deferral period has not yet commenced or a deferral period is continuing, then the Company will not, and will not permit any of its subsidiaries to:

• declare or pay any dividends or distributions on, or redeem, purchase, acquire or make a liquidation payment regarding, any of the Company's capital stock.

• except as required in connection with the repayment of principal, and except for any partial payments of deferred interest that may be made through the alternative payment mechanism described in the Hybrid Securities indenture, make any payment of principal of, or interest or premium, if any, on, or repay, repurchase, or redeem any of the Company's debt securities that rank pari passu with or junior to the Hybrid Securities.

• make any guarantee payments regarding any guarantee by the Company of the subordinated debt securities of any of the Company's subsidiaries if the guarantee ranks pari passu with or junior in interest to the Hybrid Securities.

In addition, if any deferral period lasts longer than one year, the limitation on the Company's ability to redeem or repurchase any of its securities that rank pari passu with or junior in interest to the Hybrid Securities will continue until the first anniversary of the date on which all deferred interest has been paid or canceled.

If the Company is involved in a business combination where immediately after its consummation more than 50% of the surviving entity's voting stock is owned by the shareholders of the other party to the business combination, then the immediately preceding sentence will not apply to any deferral period that is terminated on the next interest payment date following the date of consummation of the business combination.

However, at any time, including during a deferral period, the Company will be permitted to:

pay dividends or distributions in additional shares of the Company's capital stock.

declare or pay a dividend in connection with the implementation of a shareholders' rights plan, or issue stock under such a plan, or redeem or repurchase any rights distributed pursuant to such a plan.

purchase common stock for issuance pursuant to any employee benefit plans.
