Yes No

Petrobras makes a new oil discovery in the Espírito Santo Basin

Rio de Janeiro, July 14 2008 PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, informed the National Petroleum Agency (ANP) today that it has made a discovery of good quality oil (27° API) in the Espírito Santo Basin.

The new discovery (4-GLF-23-ESS) is located in the area of the Golfinho field, 60 kilometers away from the city of Vitória, at a water depth of 1,374 meters. The first estimates indicate a potential of 150 million barrels of recoverable oil.

The discovery, located in a concession that belongs 100% to Petrobras, opens new exploratory perspectives for the area and has the advantage of being located near infrastructure that is already installed in the Golfinho field. As a result, the volumes that were discovered will be incorporated to the Company's reserves and may go into production in a short period of time.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
