Noncurrent	419	419	968,980	591,937

Deferred taxes have been recorded based on the assumption of their future realization, as follows:

- a) Tax loss carryforwards, principally of the subsidiary TC, will be offset up to a limit of 30% per year of taxable income for the next years. The subsidiary, based on projections of future results, estimates that its tax loss carryforwards will be fully compensated in two years.
- b) The merged tax credit - consists of the net balance of goodwill and the reserve for maintenance of integrity of shareholders' equity (Note 29) and is realized proportionally to the amortization of the goodwill in "TC" and in "TCO" and its subsidiaries, which will occur in 10 and 5 years, respectively a ten-year period. Outside consultants' studies used in the corporate restructuring process originally supported the tax credit recovery in these periods.
- c) Temporary differences will be realized upon payment of the accruals, effective losses on bad debts and realization of inventories.

Technical feasibility studies, approved by the Board of Directors, indicate full recovery of the deferred taxes recognized as determined by CVM Resolution No. 371. Realization of the tax credits is estimated as follows:

-------	------------	------------------

CVM Resolution No. 371 determines that periodic studies must be carried out to support the maintenance of the amounts recorded. The Company and its subsidiaries GT and TCO IP did not recognize deferred income and social contribution taxes on tax losses and temporary differences, due to the lack of projections of taxable income to be generated in the short term.

On May 31, 2004, the tax benefit related to goodwill paid in TCO's acquisition was transferred to TCO and its subsidiaries. Accordingly, the total amount of R\$511,061 was transferred to advances for future capital increase account, since the new shares will be issued in favor of TCP when this tax credit is realized by TCO and its subsidiaries. The total remaining goodwill in the total amount of R\$992,059 was based on expectation of future profitability and will be amortized in 5 years.

On March 30, 2004, TCP increased its investment in TCO using part of the advance for future capital increase. The participation of minority shareholders' in this capital increase resulted in a reimbursement of R\$1,132 for TCP.

27. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Risk considerations

TCP is the controlling shareholder of TC, GT and TCO, which wholly owns Telegoiás Celular S.A., Telemat Celular S.A., Telems Celular S.A., Teleron Celular S.A., Teleacre Celular S.A. and Norte Brasil Telecom S.A. All these operators provide mobile telephone services in accordance with the terms of concessions granted by the Federal Government and are also engaged in the purchase and sale of handsets through their own sales networks as well as distribution channels, thus fostering their essential activities.

The major market risks to which TCP, TC, GT and TCO are exposed include:

- Credit risk - arising from any difficulty in collecting telecommunication services provided to customers and revenues from the sale of handsets by the distribution network.
- Interest rate risk - resulting from debt and premiums on derivative instruments contracted at floating rates and involving the risk of interest expenses increasing as a result of an unfavorable upward trend in interest rates (primarily LIBOR, EURIBOR, TJLP and CDI).
- Currency risk: - related to debt and premiums on derivative instruments contracted in foreign currency and associated with potential losses resulting from adverse exchange rate movements.

Since they were formed, TC, GT and TCO have been actively managing and mitigating risks inherent in their operations by means of comprehensive operating procedures, policies and initiatives.

Credit risk

Credit risk from providing telecommunication services is minimized by strictly monitoring the customer portfolio and actively addressing delinquent receivables by means of clear policies relating to the concession of postpaid services.

Of TC's customers, 81.9% use prepaid services that require pre-loading, thus not representing a credit risk. GT has 87.2% of its customers base on a prepaid mode. TCO and subsidiaries have 80.7% of its customers base on a prepaid mode.

Credit risk from the sale of handsets is managed by following a conservative credit granting policy which encompasses the use of advanced risk management methods that include applying credit scoring techniques, analyzing the potential customer's balance sheet, and making inquiries of credit protection agencies' databases. In addition, an automatic control has been implemented in the sales module for releasing products which is integrated with the distribution module of TC's ERP system for consistent transactions.

Interest rate risk

The Company is exposed to interest rate risk, especially associated with the cost of CDI rates, due to its exchange rate derivative transactions and short-term borrowings in Brazilian reais. As of June 30, 2004, these operations amounted to R\$3,747,776.

The Company entered into swap operations to convert the floating interest risk related to CDI into fixed interest rates in the total notional amount of R\$1,510 million.

The Company is also exposed to fluctuations in the TJLP (local index) on financing from BNDES. As of June 30, 2004, these operations amounted to R\$534,533. The Company has not entered into derivative operations to hedge against these risks.

Foreign currency-denominated loans are also exposed to interest rate risk associated with foreign loans. As of June 30, 2004, these operations amounted to US\$155,161,000 and €416,050,000.

### Currency risk

TC, GT and TCO utilize derivative instruments to protect against the currency risk on foreign currency-denominated loans. Such instruments usually include swap, option and forward contracts.

The Company's net exposure to currency risk as of June 30, 2004 is shown in the table below:

	<u>In thousands</u>		
	<u>US\$</u>	<u>¥</u>	<u>€</u>
Loans and financing	998,811	13,401,269	416,050
Hedge instruments	(1,068,418)	(13,401,269)	(427,476)
Trade accounts payable and corporate management fee	=	=	<u>13,420</u>
Net exposure	<u>(69,607)</u>	=	<u>1,994</u>

During the first semester of 2004, the Company and its subsidiaries contracted derivative instruments to hedge other foreign-currency commitments against exchange variations (such as the BNDES basket of currencies, leasing, long-term hedging inefficiency, and suppliers).

### b) Derivative instruments

The Company and its subsidiaries record derivative gains and losses as a component of net financial expenses.

Book and market values of loans and financing and derivative instruments are estimated as follows:

	<u>Book value</u>	<u>Market value</u>	<u>Unrealized gains (losses)</u>
Loans and financing	(6,355,321)	(6,515,528)	(160,207)
Derivative instruments	<u>774,007</u>	<u>662,850</u>	(111,157)
Total	<u>(5,581,314)</u>	<u>(5,852,678)</u>	<u>(271,364)</u>

### c) Market value of financial instruments

The market values of loans and financing, swaps and forward contracts were determined based on the discounted cash flows, utilizing projected available interest rate information.

Estimated market values of the Company's financial assets and liabilities have been determined using available market information and appropriate valuation methodologies. Accordingly, the estimates presented above are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated market values.

## 28. POST-RETIREMENT BENEFIT PLANS

TCP and its subsidiaries TC and TCO, together with other companies of the former Telebrás System, sponsor private pension plans and health care plan for retired employees, managed by Fundação Sistel de Seguridade Social - Sistel , as follows:

- a) PBS A - Is a multi-employer defined benefit plan provided to retired participants which were in such position on January 31, 2000.
- b) PBS Telesp Celular and TCO - Defined benefit plan sponsored individually by the companies.
- c) PAMA - Multi-employer health care plan provided to retired employees and their dependents, at shared costs.

Contributions to the PBS - Telesp Celular and PBS-TCO plans are determined based on actuarial valuations prepared by independent actuaries, in accordance with the rules in force in Brazil. Costing is determined using the capitalization method and the contribution due by the sponsor is equivalent to 13.5% of the payroll for employees covered by the plan, of which 12% is allocated to fund the PBS - Telesp Celular and PBS-TCO plans and 1.5% for the PAMA plan.

- d) TCP Prev and TCO Prev - This defined contribution plan was established by SISTEL in August 2000. The Company's contributions to the TCP Prev and TCO Prev are equivalent to those made by the participants, varying from 1% to 8% of the contribution salary, according to the percentage selected by the participant.

During the first semester of 2004, TCP and its subsidiaries TC and TCO contributed the amounts of R\$2 and R\$2 to the PBS - Telesp Celular and PBS-TCO plans, respectively, and the amounts of R\$3,817 and R\$3,551 to the TCP Prev and TCO Prev plans, respectively.

In the first semester of 2004, "TCP" and its subsidiaries "TC" and "TCO" proportionally recognized the estimated actuarial cost for 2004, charging R\$25 to administrative expense.

## 29. CORPORATE RESTRUCTURING

On January 14, 2000, the 1<sup>st</sup> corporate restructuring plan was concluded, in which the goodwill paid on the privatization process of the Company was transferred to TC.

The accounting records maintained for corporate and tax purposes include the Companies' specific accounts related to merged goodwill and the related reserve, and the respective amortization, reversal and tax credit. As of June 30, 2004 and March 31, 2004, balances are as follows:

	Balances on	Telesp

Reversal of reserve			105,360	106,957
Tax credit			54,277	52,680
Effect on net loss			=	=

On May 13, 2004, the Board of Director of TCP and TCO approved a corporate restructuring to transfer the goodwill paid on the acquisition of TCO and its subsidiaries by TCP, in the amount of R\$1,503,121.

A reserve for maintenance of integrity of shareholders' equity, in the amount of R\$992,060, was recorded before the goodwill was merged in TCO. Thus, the merged net asset was R\$511,061 representing the tax benefit resulting from the tax deduction of the amortization of the goodwill merged into TCO and its subsidiaries.

The merged net asset will be amortize in the estimated period of 5 years and is being reported as a capital reserve, which will be transferred to capital when the related tax benefit is realized. All of TCO's shareholders have preemptive rights to subscribe the additional shares in which case the proceeds from such subscription will be paid to TCP

On June 30, 2004 was approved the transfer of a portion of the net merged goodwill to TCO's subsidiaries, based on appraisal reports prepared by independent specialist, as follows:

<u>Subsidiary</u>	<u>Goodwill</u>	<u>Reserve for Maintenance of Integrity of Shareholders' equity</u>	<u>Net asset</u>
Telemat	248,558	164,048	84,510
Telegoiás	352,025	232,336	119,689
Telems	144,078	95,092	48,986
Teleron	68,775	45,392	23,383
Teleacre	29,353	19,373	9,980
Total spin-off	842,789	556,241	286,548
TCO remaining balance	660,332	435,819	224,513
Total	1,503,121	992,060	511,061

At the transfer of this portion of the net goodwill was also approved the incorporation of minority shareholders into TCO, which will receive Company's, shares in exchange for their interest in the subsidiaries. The exchange ratios were established by appraisal reports prepared by independent specialists.

This acquisition of minority interest resulted in a capital increase of TCO in the amount of R\$28,554.

The detailed Company's accounting records for corporate and tax purposes include specific accounts related to merged goodwill and the related reserve, and respective amortization, reversals and tax credits. The detailed balances as of June 30, 2004, are as follow:

	<u>Consolidated</u>	
	<u>06/30/04</u>	<u>03/31/04</u>
Balance sheet:		
Merged goodwill	1,510,337	48,403
Merged reserve	<u>(996,823)</u>	<u>(31,946)</u>
Merged tax credit	<u>513,514</u>	<u>16,457</u>

	<u>06/30/04</u>	<u>06/30/03</u>
Statement of loss:		
Goodwill amortization	(57,321)	(32,269)
Reversal of the reserve	37,832	21,298
Tax credit	<u>19,489</u>	<u>10,971</u>
Effect on net loss	=	=

As shown above, the amortization of goodwill, net of the reversal of the reserve and of the corresponding tax credit, results in a zero effect on income and, consequently, on the basis for calculating the minimum mandatory dividend. For a better presentation the financial position of the Companies in the financial statements, the net amount which, in essence, represents the tax credit from the partial spin-off, was classified in the balance sheet as deferred taxes (Note 7).
