

HECLA MINING CO/DE/  
Form 10-Q  
May 06, 2014

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014

Commission file  
number 1-8491

**HECLA MINING COMPANY**

(Exact name of registrant as specified in its charter)

Delaware 77-0664171  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

6500 Mineral Drive, Suite 200  
Coeur d'Alene, Idaho 83815-9408  
(Address of principal executive offices) (Zip Code)

208-769-4100  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes XX . No \_\_ .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes XX . No \_\_ .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one):

Large Accelerated Filer XX.

Accelerated Filer \_\_ .

Non-Accelerated Filer \_\_ .

Smaller reporting company \_ .

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes \_\_ . No XX.

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Shares Outstanding May 2, 2014
Common stock, par value	343,128,915
\$0.25 per share	

Hecla Mining Company and Subsidiaries

Form 10-Q

For the Quarter Ended March 31, 2014

investing and  
financing activities:

Addition of capital lease obligations	\$	2,194	\$	6,725
Increase to asset retirement obligations	\$	8,210	\$	—
Payment of accrued compensation in restricted stock units	\$	4,600	\$	—

The accompanying notes are an integral part of the interim condensed consolidated financial statements.

## **Note 1. Basis of Preparation of Financial Statements**

In the opinion of management, the accompanying unaudited interim condensed consolidated financial statements and notes to the interim condensed consolidated financial statements contain all adjustments, consisting of normal recurring items, necessary to present fairly, in all material respects, the financial position of Hecla Mining Company and its consolidated subsidiaries (“we” or “our” or “us”). These unaudited interim condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and related footnotes as set forth in our annual report filed on Form 10-K for the year ended December 31, 2013, as it may be amended from time to time.

The results of operations for the periods presented may not be indicative of those which may be expected for a full year. The unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in audited financial statements prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) have been condensed or omitted pursuant to those rules and regulations, although we believe that the disclosures are adequate for the information not to be misleading.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, the reported amounts of revenues and expenses during the reporting period and the disclosures of contingent liabilities. Accordingly, ultimate results could differ materially from those estimates.

On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd. ("Aurizon"), giving us 100% ownership of the Casa Berardi mine and various other interests in Quebec, Canada. The unaudited interim condensed consolidated financial statements included herein reflect our ownership of the assets previously held by Aurizon as of the June 1, 2013 acquisition date. We have determined that the functional currency for our Canadian operations acquired from Aurizon is the U.S. dollar.

## **Note 2. Investments and Restricted Cash**

### *Investments*

At March 31, 2014 and December 31, 2013, the fair value of our non-current investments was \$8.7 million and \$7.0 million, respectively. Our non-current investments consist of marketable equity securities, which are carried at fair value as they are classified as “available-for-sale.” The cost basis of our non-current investments was approximately \$9.5 million and \$10.0 million at March 31, 2014 and December 31, 2013, respectively.

At March 31, 2014, total unrealized loss positions of \$1.7 million, net of unrealized gains of \$0.9 million, for our non-current investments were included in accumulated other comprehensive loss on our condensed consolidated balance sheet.

Our non-current investments balance as of March 31, 2014 includes our ownership of approximately 29.4% of the outstanding common shares of Typhoon Exploration Inc. having a cost basis of \$0.7 million and fair value of \$1.7 million. We elected to apply the fair value option accounting method to the investment upon it meeting the criteria for equity method accounting during the second quarter of 2013. Since the acquisition, we have unrealized gains of \$0.9 million that are included in unrealized gain (loss) on investments on our condensed consolidated statement of operations and comprehensive income. We evaluate the accounting treatment of our individual investments based on whether we believe our ownership percentage and other factors indicate that we have the ability to exercise significant influence in the financial and/or operational decisions of the investee. As of March 31, 2014, we have determined that no other investments held by us qualify for equity method accounting.

#### *Restricted Cash and Investments*

Various laws, permits, and covenants require that financial assurances be in place for certain environmental and reclamation obligations and other potential liabilities. These restricted investments are used primarily for reclamation funding or for funding surety bonds, and were \$7.7 million and \$5.2 million at March 31, 2014 and December 31, 2013, respectively. Restricted investments primarily represent investments in money market funds and certificates of deposit.

**Note 3. Income Taxes**

Major components of our income tax provision for the three months ended March 31, 2014 and 2013 are as follows (in thousands):

	Three Months Ended March 31,	
	2014	2013
Current:		
Domestic	\$6,499	\$3,137
Foreign	156	115
Total current income tax provision	6,655	3,252
Deferred:		
Domestic	(3,130)	4,163
Foreign	258	—
Total deferred income tax provision	(2,872)	4,163
Total income tax provision	\$3,783	\$7,415

As of March 31, 2014, we have a net deferred tax asset in the U.S. of \$117.6 million and a net deferred tax liability in Canada of \$160.8 million for a consolidated worldwide net deferred tax liability of \$43.2 million. Our ability to utilize our deferred tax assets depends on future taxable income generated from operations. For the three months ended March 31, 2014, there were no circumstances that caused us to change our assessment of the ability to generate sufficient future taxable income to realize the currently recognized U.S. deferred tax assets. At March 31, 2014 and December 31, 2013, the balances of the valuation allowances on our deferred tax assets were \$28 million and \$27 million, respectively, primarily for foreign net operating loss carryforwards. The amount of the deferred tax asset considered recoverable, however, could be reduced in the near term if estimates of future taxable income are reduced.

The current income tax provisions for the three months ended March 31, 2014 and 2013 vary from the amounts that would have resulted from applying the statutory income tax rate to pre-tax income primarily due to the effects of percentage depletion for all periods presented and the impact of taxation in foreign jurisdictions.

**Note 4. Commitments, Contingencies and Obligations**

*General*

We follow the FASB Accounting Standards Codification guidance in determining our accruals and disclosures with respect to loss contingencies, and evaluate such accruals and contingencies for each reporting period. Accordingly, estimated losses from loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

*Rio Grande Silver Guaranty*

Our wholly-owned subsidiary, Rio Grande Silver Inc. (“Rio”), is party to a joint venture with Emerald Mining & Leasing, LLC (“EML”) and certain other parties with respect to a land package in the Creede Mining District of Colorado that is adjacent to other land held by Rio. Rio holds a 70% interest in the joint venture. In connection with the joint venture, we are required to guarantee certain environmental remediation-related obligations of EML to a third party up to a maximum liability to us of \$2.5 million. As of March 31, 2014, we have not been required to make any payments pursuant to the guaranty. We may be required to make payments in the future, limited to the \$2.5 million maximum liability, should EML fail to meet its obligations to the third party. However, to the extent that any payments are made by us under the guaranty, EML, in addition to other parties, have jointly and severally agreed to reimburse and indemnify us for any such payments. We have not recorded a liability relating to the guaranty as of March 31, 2014.

*Lucky Friday Water Permit Matters*

Over the last several years, the Lucky Friday unit has experienced several regulatory issues relating to its water discharge permits and water management more generally.

In late 2008 and during 2009, Hecla Limited experienced a number of alleged permit exceedances for water discharges at the Lucky Friday unit. These alleged violations resulted in Hecla Limited entering into a Consent Agreement and Final Order (“CAFO”) and a Compliance Order with the EPA in April 2009, which included an extended compliance time line. In connection with the CAFO, Hecla Limited agreed to pay the maximum administrative penalty to the EPA of \$177,500 to settle any liability for such alleged exceedances.

In 2009, additional alleged permit exceedances for water discharges at the Lucky Friday unit occurred. In 2010, alleged unpermitted discharges of pollutants occurred at the Lucky Friday unit. These alleged permit exceedances and certain alleged unpermitted discharges were the subject of a December 2010 Notice of Violation (“2010 NOV”) from the EPA informing Hecla Limited that the EPA was prepared to seek civil penalties for these alleged violations. In the 2010 NOV, the EPA invited Hecla Limited to discuss these matters with them prior to filing a complaint. Hecla Limited disputes many of EPA's assertions, but initiated negotiations with the EPA in an attempt to resolve the matter. There has not been any resolution of the 2010 NOV.

In 2012, the Lucky Friday unit had two weekly water samples, one of which in October exceeded the permit concentration limit for lead (but not the associated load limit), and one of which in November exceeded permit limits for zinc. Also in October and November, heavy rains resulted in alleged impacted storm water being discharged to a nearby river. After these incidents, in February 2013, the EPA issued a notice of violation and request for information to Hecla Limited alleging that the October and November 2012 storm water incidents were each a violation of Hecla Limited's storm water permit. In March 2014, the Lucky Friday unit had a weekly water sample which exceeded the maximum daily permitted limit for zinc.

The EPA referred the two alleged 2012 permit exceedances, along with the alleged violations in the 2010 NOV and some additional alleged unpermitted discharges from 2010 that were not included in the 2010 NOV, to the U.S. Department of Justice to possibly file a civil complaint by the United States against Hecla Limited. In addition, it is possible that the United States may include other alleged unpermitted discharges (including the 2012 storm water incidents) or permit violations in any complaint. There is the potential for larger civil penalties in the context of a United States complaint than in an administrative action by the EPA such as the 2009 CAFO.

In December 2013, the EPA issued to Hecla Limited a Notice of Violation (“2013 NOV”) alleging certain storm water reporting violations under Lucky Friday’s Clean Water Act Multi-Sector General Stormwater Permit for Industrial Activities. The 2013 NOV also contains a request for information under Section 308 of the Clean Water Act directing Hecla Limited to undertake a comprehensive groundwater investigation of Lucky Friday’s tailings pond No. 3 to evaluate whether the pond is causing the discharge of pollutants via seepage to groundwater that is discharging to

surface water. We cannot ascertain what impacts, if any, the 2013 NOV and request for information will have on the matters that were already pending with the United States, including the 2010 NOV.

Hecla Limited strives to maintain its water discharges and water management in general at the Lucky Friday unit in full compliance with its permits and applicable laws; however, we cannot provide assurances that it will be able to fully comply with the permit limits and other regulatory requirements regarding water management in the future.

We believe that it is reasonably possible that Hecla Limited faces some liability for the above water issues; however, we cannot with reasonable certainty estimate the amount of any such liability because, for among other reasons, we have not completed the report called for by the request for information contained in the 2013 NPOV, and we do not know what will be the impact of that report.

*Johnny M Mine Area near San Mateo, McKinley County, New Mexico*

In May 2011, the EPA made a formal request to Hecla Mining Company for information regarding the Johnny M Mine Area near San Mateo, McKinley County, New Mexico, and asserted that Hecla Mining Company may be responsible under CERCLA for environmental remediation and past costs the EPA has incurred at the site. Mining at the Johnny M was conducted for a limited period of time by a predecessor of our subsidiary, Hecla Limited. In August 2012, Hecla Limited and the EPA entered into a Settlement Agreement and Administrative Order on Consent for Removal Action (“Consent Decree”), pursuant to which Hecla Limited agreed to pay (i) \$1.1 million to the EPA for its past response costs at the site and (ii) any future response costs at the site, in exchange for a covenant not to sue by the EPA. The Consent Decree also describes additional work at the site to be conducted by Hecla Limited. Hecla Limited paid the \$1.1 million to the EPA for its past response costs in the fourth quarter of 2012, and our consolidated financial statements as of March 31, 2014 include an accrual balance by Hecla Limited of \$0.3 million for investigation and planning costs. Hecla Limited cannot reasonably estimate the amount of any additional liability it may face at the site until, at a minimum, the amount and type of remediation required have been determined or if EPA seeks reimbursement for additional past costs.

*Carpenter Snow Creek Site, Cascade County, Montana*

In July 2010, the EPA made a formal request to Hecla Mining Company for information regarding the Carpenter Snow Creek Superfund Site located in Cascade County, Montana. The Carpenter Snow Creek Site is located in a historic mining district, and in the early 1980s Hecla Limited leased 6 mining claims and performed limited exploration activities at the site. Hecla Limited terminated the mining lease in 1988.

In June 2011, the EPA informed Hecla Limited that it believes Hecla Limited, among several other viable companies, may be liable for cleanup of the site or for costs incurred by the EPA in cleaning up the site. The EPA stated in the June 2011 letter that it has incurred approximately \$4.5 million in response costs and estimated that total remediation costs may exceed \$100 million. Because Hecla Limited had very limited activity at the site, we do not believe that the outcome of the claim will have a material adverse effect on our results of operations or financial position. Hecla Limited cannot with reasonable certainty estimate the ultimate liability, if any, relating to this matter.

*States of South Dakota and Colorado Superfund Sites Related to CoCa Mines, Inc.*

In 1991, Hecla Limited acquired all of the outstanding common stock of CoCa Mines, Inc. (“CoCa”). CoCa is alleged to have engaged in exploration at the Gilt Edge Mine in South Dakota as well as in the area adjacent to the Nelson Tunnel property in Creede, Colorado.

Gilt Edge Mine Superfund Site

In August 2008, the EPA made a formal request to CoCa for information regarding the Gilt Edge Mine Site located in Lawrence County, South Dakota, and asserted that CoCa may be liable for environmental cleanup at the site. The Gilt Edge Mine Site was explored and/or mined beginning in the 1890s. In the early 1980s, CoCa was involved in a joint venture that conducted a limited program of exploration work at the site. This joint venture terminated in 1984, and by 1985 CoCa had divested itself of any interest in the property.

In July 2010 the United States informed CoCa that it intends to pursue CoCa and several other potentially responsible parties on a joint and several basis for liability for past and future response costs at Gilt Edge under CERCLA. Currently, the United States alleges that CoCa is liable based on participation in the joint venture, and that CoCa has succeeded to the liabilities of its predecessor, Congdon & Carey, which may have held certain property interests at the site.

As of mid-2013, the United States has alleged that estimated total costs associated with the site may exceed \$191 million, including both past and future response costs. Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its involvement with the Gilt Edge site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any cleanup at the Gilt Edge site. We believe that it is reasonably possible that CoCa faces some liability for the site; however, we cannot with reasonable certainty estimate the ultimate amount of any such liability. Furthermore, in the event CoCa incurs a liability at this site, it has limited assets with which to satisfy any such liability. Because of CoCa's limited assets, we believe that it is possible that the United States will seek to recover some of the alleged \$191 million in costs associated with the site from Hecla Limited, as the parent corporation of CoCa. We believe Hecla Limited would have strong defenses to such a claim and would vigorously defend against any such claims. Settlement negotiations with the United States commenced in 2010 and are ongoing, but there can be no assurance such negotiations will be successful, or that Hecla Limited will not incur a material liability with respect to this site.

Nelson Tunnel/Commodore Waste Rock Pile Superfund Site

In August 2009, the EPA made a formal request to CoCa for information regarding the Nelson Tunnel/Commodore Waste Rock Pile Superfund Site in Creede, Colorado. A timely response was provided and the EPA later arranged to copy additional documents. CoCa was involved in exploration and mining activities in Creede during the 1970s and the 1980s. In September 2013, the EPA made a formal claim against CoCa for past response costs under CERCLA as an owner/operator of the site, and against Hecla Limited as a corporate successor to CoCa. The EPA is seeking a total of approximately \$5 million for past response costs, plus an undetermined amount of interest from CoCa, Hecla Limited, and other potentially responsible parties. The EPA stated that it is continuing its remedial investigation/feasibility study at the site, and once that is complete, it will begin remedial design and remedial action for the site. Presumably, the EPA will also seek reimbursement of at least some of those costs from viable potentially responsible parties. In April 2014, CoCa received notice from another potentially responsible party alleging that CoCa is required to indemnify it in connection with any liability it may have with respect to the Nelson/Commodore site. Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its historical activities in the vicinity of the site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any cleanup, has strong defenses, and we will vigorously defend against the claim. If CoCa is ultimately found to be liable, it has limited assets with which to satisfy any such liability. We cannot with reasonable certainty estimate the ultimate liability, if any, relating to this matter, and therefore we have not recorded a liability relating to the site as of March 31, 2014.

*Senior Notes*

On January 6, 2014, we completed the offer to exchange up to \$500,000,000 aggregate principal amount of our new 6.875% Senior Notes due 2021 for a like principal amount of our previously outstanding 6.875% Senior Notes due 2021, which were issued on April 12, 2013 ("Notes"), as further discussed in *Note 9*. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. The net proceeds from the offering of the Notes were used to partially fund the acquisition of Aurizon Mines Ltd. ("Aurizon") and for general corporate purposes, including expenses related to the Aurizon acquisition.

*Other Commitments*

Our contractual obligations as of March 31, 2014 included approximately \$5.9 million for various non-capital costs. In addition, our open purchase orders at March 31, 2014 included approximately \$0.8 million, \$0.3 million, and \$1.4 million, respectively, for various capital items at the Casa Berardi, Greens Creek, and Lucky Friday units, and approximately \$1.3 million, \$0.4 million, and \$0.5 million, respectively, for various non-capital costs at such units. We also have total commitments of approximately \$23.6 million relating to scheduled payments on capital leases, including interest, primarily for equipment at our Greens Creek and Lucky Friday units (see *Note 9* for more information). In addition, in 2011, we settled Hecla Limited's Coeur d'Alene Basin environmental litigation and

related claims pursuant to a Consent Decree entered by the Court on September 8, 2011. Hecla Limited remains obligated under the Consent Decree to make payments totaling \$55.4 million by August 2014, which would be funded by proceeds from our outstanding warrants, if exercised (see *Note 8* for more information). Under the terms of the Consent Decree, the proceeds from the exercise of our outstanding warrants will be paid to the United States and the Coeur d'Alene Indian Tribe within 30 days after the end of the quarter when exercised. If the warrants are not exercised, the company is responsible for its final payment under the Consent Decree.

We had letters of credit for approximately \$1.3 million outstanding as of March 31, 2014 for workers' compensation insurance bonding.

#### *Other Contingencies*

Hecla was named as a nominal defendant in a stockholder derivative lawsuit in federal court which named as defendants certain Hecla executives and members of Hecla's Board of Directors. The case was *In Re Hecla Mining Company Derivative Shareholder Litigation*, Case No. 2:12-cv-00097 (D. Idaho). In general terms, this lawsuit alleged breaches of fiduciary duties by the individual defendants relating to past operational issues at the Lucky Friday mine and sought damages, purportedly on behalf of Hecla. The lawsuit was dismissed on February 20, 2014, and the Court gave the plaintiffs until April 21, 2014 to file an amended complaint. No amended complaint was filed, and on April 21, 2014, the Court issued a final order dismissing the case with prejudice.

In March 2012, Hecla Limited received notice of a complaint filed against it by the United Steel Workers, Local 5114, with the Federal Mine Safety and Health Review Commission for compensation for bargaining unit workers at the Lucky Friday mine idled as a result of the temporary suspension of production at the mine. The complaint alleges the bargaining unit workers are entitled to compensation under Section 111 of the Federal Mine Safety and Health Act of 1977 from November 16, 2011 - the date an order was issued by the Mine Safety Health Administration ("MSHA") to Hecla Limited - until such time as the order is terminated. We submitted a motion for summary decision to the administrative law judge within the Federal Mine Safety and Health Review Commission, which was denied in December 2012. Currently we are awaiting further proceedings. We believe the claim is without merit, and that all wages due under Section 111, which was an immaterial amount, have already been paid. Therefore, we have not recorded a liability relating to the claim as of March 31, 2014. The value of the union's claim is estimated to be in the range of \$0 to \$10 million.

We are subject to other legal proceedings and claims which arise from time to time. These can include, but are not limited to, legal proceedings and/or claims pertaining to environmental or safety matters. For example, in April 2011, a fatal accident occurred at the Lucky Friday mine which was investigated by MSHA. In November 2011, an accident occurred as part of the construction of #4 Shaft which resulted in the fatality of one contractor employee. In an unrelated incident, in December 2011, a rock burst occurred in a primary access way at the Lucky Friday mine and injured seven employees, none fatally. At the end of 2011, MSHA began a special impact investigation at the Lucky Friday mine which resulted in an order to remove built-up cementitious material from the Silver Shaft, the primary access way from the surface at the Lucky Friday mine. As a result of MSHA's investigations related to these events, Hecla Limited has been issued monetary penalties (none of which are material, individually or in the aggregate), and may face additional enforcement actions, including additional monetary penalties from MSHA or other governmental agencies. Although there can be no assurance as to the ultimate disposition of these other matters, we believe they will not have a material adverse effect on our results of operations or financial position.

On April 12, 2013, the family of Larry Marek, an employee of Hecla Limited who was fatally injured in the April 2011 accident, filed a lawsuit against us and certain of our officers and employees seeking damages for, among other claims, wrongful death and infliction of emotional distress. No dollar amount of damages is specified in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and intend to vigorously defend this lawsuit.

On December 11, 2013, four employees of Hecla Limited who were injured in the December 2011 rock burst filed a lawsuit against us and certain of our employees seeking damages for, among other claims, intentional and willful injury and infliction of emotional distress. The plaintiffs seek damages in excess of \$1,000,000, as claimed in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and intend to vigorously defend this lawsuit.

#### **Note 5. Earnings Per Common Share**

We are authorized to issue 500,000,000 shares of common stock, \$0.25 par value per share. At March 31, 2014, there were 343,772,939 shares of our common stock issued and 932,811 shares issued and held in treasury, for a net of 342,840,128 shares outstanding.

The following table reconciles weighted average common shares used in the computations of basic and diluted earnings per share for the three-month periods ended March 31, 2014 and 2013 (thousands, except per-share amounts):

	Three Months Ended	
	March 31, 2014	2013
<b>Numerator</b>		
Net income	\$ 11,641	\$ 11,094
Preferred stock dividends	(138 )	(138 )
Net income applicable to common shares for basic and diluted earnings per share	\$ 11,503	\$ 10,956
<b>Denominator</b>		
Basic weighted average common shares	342,666	285,171
Dilutive stock options and restricted stock	7,352	11,993
Diluted weighted average common shares	350,018	297,164
<b>Basic earnings per common share</b>		
Net income applicable to common shares	\$ 0.03	\$ 0.04
<b>Diluted earnings per common share</b>		
Net income applicable to common shares	\$ 0.03	\$ 0.04

Diluted income per share for the three months ended March 31, 2014 and 2013 excludes the potential effects of outstanding shares of our convertible preferred stock, as their conversion and exercise would have no effect on the calculation of dilutive shares.

Options to purchase 612,745 shares of our common stock were excluded from the computation of diluted earnings per share for the three-month period ended March 31, 2014. For the three-month period ended March 31, 2013, options to purchase 537,005 shares of our common stock were excluded from the computation of diluted earnings per share. In each case, the exercise price of the options not included in the computations of diluted earnings per share exceeded the average price of our stock during those periods and therefore would not affect the calculation of earnings per share.

## Note 6. Business Segments

We are currently organized and managed in three reporting segments: the Greens Creek unit, the Lucky Friday unit and the Casa Berardi unit. On June 1, 2013 we completed the acquisition of Aurizon, giving us 100% ownership of the Casa Berardi mine in Quebec, Canada. As a result, we added a new reporting segment for the Casa Berardi unit.

General corporate activities not associated with operating units and their various exploration activities, as well as discontinued operations and idle properties, are presented as “other.” Interest expense, interest income and income taxes are considered general corporate items, and are not allocated to our segments.

The following tables present information about reportable segments for the three months ended March 31, 2014 and 2013 (in thousands):

	Three Months Ended	
	March 31, 2014	2013
Net sales to unaffiliated customers:		
Greens Creek	\$63,596	\$72,649
Lucky Friday	20,096	3,801
Casa Berardi	42,095	—
	\$125,787	\$76,450
Income (loss) from operations:		
Greens Creek	\$11,046	\$27,189
Lucky Friday	4,700	(3,847 )
Casa Berardi	3,441	—
Other	(11,276 )	(25,555)
	\$7,911	\$(2,213 )

The following table presents identifiable assets by reportable segment as of March 31, 2014 and December 31, 2013 (in thousands):

	March 31, 2014	December 31, 2013
Identifiable assets:		
Greens Creek	\$746,357	\$744,027
Lucky Friday	325,927	313,793
Casa Berardi	805,166	821,058
Other	372,831	353,241
	\$2,250,281	\$2,232,119

#### Note 7. Employee Benefit Plans

We sponsor defined benefit pension plans covering substantially all U.S. employees. Net periodic pension cost for the plans consisted of the following for the three months ended March 31, 2014 and 2013 (in thousands):

	Three Months Ended	
	March 31,	
	2014	2013
Service cost	\$ 1,020	\$ 1,057
Interest cost	1,186	970
Expected return on plan assets	(1,249)	(1,204)
Amortization of prior service cost (benefit)	(84 )	97
Amortization of net loss	756	776
Net periodic benefit cost	\$ 1,629	\$ 1,696

In April 2014, we contributed \$2.0 million, par value, of our Senior Notes to our funded pension plan, and expect to contribute a total of \$7.5 million, par value, over the course of 2014 (see *Note 9* for more information). We anticipate that the Notes contributed will be sold by the plan. We expect to contribute approximately \$0.3 million to our unfunded supplemental executive retirement plan in 2014.

## **Note 8. Stockholders' Equity**

### *Share-based Compensation Plans*

We periodically grant restricted stock unit awards and/or shares of common stock to our employees and directors. Grants to individual executives upon hiring or retention vest over a defined service period, with cost amortized over that period. We measure compensation cost for restricted stock units and stock grants at the closing price of our stock at the time of grant. Restricted stock unit grants vest after a specified period with compensation cost amortized over that period. Previously, we also granted stock options, but currently do not. Although we have no current plans to issue stock options, we may do so in the future.

On March 3, 2014, the Board of Directors granted 1,345,072 restricted stock units to employees for payment of annual and long-term incentive compensation for the period ended December 31, 2013. The restricted stock units will be distributed in August 2014, and the \$4.6 million in expense related to the unit awards has been recognized as of March 31, 2014.

Stock-based compensation expense for restricted stock unit grants to employees and shares issued to nonemployee directors recorded in the first three months of 2014 totaled \$1.1 million, compared to \$0.8 million in the same period last year.

In connection with the vesting of restricted stock units, employees have in the past, at their election and when permitted by us, chosen to satisfy their minimum tax withholding obligations through net share settlement, pursuant to which the Company withholds the number of shares necessary to satisfy such withholding obligations. As a result, in the first quarter of 2014 we repurchased 11,090 shares for approximately \$40,000, or approximately \$3.57 per share.

### *Common Stock Dividends*

In September 2011 and February 2012, our Board of Directors adopted a common stock dividend policy that has two components: (1) a dividend that links the amount of dividends on our common stock to our average quarterly realized silver price in the preceding quarter, and (2) a minimum annual dividend of \$0.01 per share of common stock, in each case, payable quarterly, when and if declared by the Board. For illustrative purposes only, the table below summarizes potential per share dividend amounts at different quarterly average realized price levels according to the first component of the policy:

Quarterly average realized silver price per ounce	Quarterly dividend per share	Annualized dividend per share
\$30	\$ 0.01	\$ 0.04
\$35	\$ 0.02	\$ 0.08
\$40	\$ 0.03	\$ 0.12
\$45	\$ 0.04	\$ 0.16
\$50	\$ 0.05	\$ 0.20
\$55	\$ 0.06	\$ 0.24
\$60	\$ 0.07	\$ 0.28

On May 5, 2014, our Board of Directors declared a dividend on common stock, pursuant to the minimum annual dividend component of the policy described above, of \$0.0025 per share, for a total dividend of \$0.9 million payable in June 2014. Because the average realized silver price for the first quarter of 2014 was \$20.04 per ounce, below the minimum threshold of \$30 according to the policy, no silver-price-linked component was declared or paid. The declaration and payment of common stock dividends is at the sole discretion of our Board of Directors.

#### *Status of Warrants*

The following table summarizes certain information about our stock purchase warrants at March 31, 2014:

Warrants Outstanding	Warrants	Exercise Price	Expiration Date
Series 1 warrants	5,200,519	\$ 2.40	June 2014
Series 1 warrants	460,976	2.51	June 2014
Series 3 warrants	16,646,128	2.45	August 2014
<b>Total warrants outstanding</b>	<b>22,307,623</b>		

No warrants were exercised during the first three months of 2014. Under the financial terms of the Consent Decree settling the Coeur d'Alene Basin litigation, the proceeds from the exercise of our outstanding warrants will be paid to the United States and the Coeur d'Alene Indian Tribe within 30 days after the end of the quarter when exercised. To the extent warrants are not exercised, we are responsible for the final payment under the Consent Decree.

#### *Common Stock Repurchase Program*

On May 8, 2012, we announced that our Board of Directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions, depending on prevailing market conditions and other factors. The repurchase program may be modified, suspended or discontinued by us at any time. Whether or not to engage in repurchases from time to time may depend on a variety of factors, including not only price and cash resources, but customary black-out restrictions, whether we have any material inside information, limitations on share repurchases or cash usage that may be imposed by our credit agreement or in connection with issuances of securities, alternative uses for cash, applicable law, and other investment opportunities from time to time. As of March 31, 2014, 400,300 shares have been purchased at an average price of \$5.56 per share, leaving 19.6 million shares that may yet be purchased under the program. The closing price of our common stock at May 2, 2014, was \$3.11 per share.

#### **Note 9. Senior Notes, Credit Facilities and Capital Leases**

##### *Senior Notes*

On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 (the "Notes") in a private placement conducted pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended. The Notes are governed by the Indenture, dated as of April 12, 2013 (the "Indenture"), among us and certain of our subsidiaries and The Bank of New York Mellon Trust Company, N.A., as trustee.

The Notes are recorded net of a 2% initial purchaser discount totaling \$10 million at the time of issuance and having an unamortized balance of \$9.0 million as of March 31, 2014. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. During the first quarter of 2014, interest expense related to the notes and amortization of the initial purchaser discount and fees related to the issuance of the notes, net of \$2.7 million in capitalized interest, totaled \$6.3 million.

The Notes are guaranteed on a senior unsecured basis by certain of our subsidiaries (the "Guarantors"). The Notes and the guarantees will be, respectively, our and the Guarantors' general senior unsecured obligations and will be subordinated to all of our and the Guarantors' existing and future secured debt to the extent of the assets securing that secured debt. In addition, the Notes will be effectively subordinated to all of the liabilities of our subsidiaries that are not guaranteeing the Notes, to the extent of the assets of those subsidiaries.

The net proceeds from the offering of the Notes (\$490 million) were used to partially fund the acquisition of Aurizon and for general corporate purposes, including expenses related to the Aurizon acquisition.

The Notes will be redeemable in whole or in part, at any time and from time to time on or after May 1, 2016, on the redemption dates and at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to the date of redemption. Prior to May 1, 2016, we may redeem some or all of the Notes at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, to the redemption date, plus a "make whole" premium. We may redeem up to 35% of the Notes before May 1, 2016 with the net cash proceeds from certain equity offerings.

Upon the occurrence of a change of control (as defined in the Indenture), each holder of Notes will have the right to require us to purchase all or a portion of such holder's Notes pursuant to a change of control offer (as defined in the Indenture), at a purchase price equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the date of purchase, subject to the rights of holders of the Notes on the relevant record date to receive interest due on the relevant interest payment date.

In connection with the sale of the Notes, we entered into a Registration Rights Agreement, dated as of April 12, 2013, pursuant to which we and the Guarantors agreed to exchange the Notes for a new issue of debt securities registered under the Securities Act, with terms substantially identical to those of the Notes (except with respect to certain transfer restrictions and certain obligations to pay special interest as described in the Notes). The exchange offer was completed in January 2014 with 99.99% of the Notes tendered for exchange.

On April 14, 2014, we entered into an agreement with the Hecla Mining Company Retirement Plan Trust pursuant to which we agreed to contribute to the trust over the course of 2014 approximately \$7.5 million in aggregate principal amount of the Notes, including \$2.0 million in aggregate principal amount of the Notes which were contributed on April 14, in order to satisfy the funding requirement for our funded pension plan for 2014. On the same day we filed a registration statement with the SEC for resale of the Notes that we agreed to contribute to the trust.

### *Credit Facilities*

In February 2014, we entered into a \$100 million senior secured revolving credit facility having a maturity date of August 1, 2016. The credit facility is collateralized by the shares of common stock held in our material domestic subsidiaries and by our joint venture interests in the Greens Creek mine, all of our rights and interests in the joint venture agreement, and all of our rights and interests in the assets of the joint venture. This credit facility replaced our previous \$100 million credit facility which had the same terms of collateral as described above. Below is information on the interest rates, standby fee, and financial covenant terms under our previous and current credit facilities:

	<b>Previous Facility</b>	<b>Current Facility</b>
Interest rates:		
Spread over the London Interbank Offer Rate	3.00 -4.50%	2.25 - 3.25%
Spread over alternative base rate	2.00 -3.50%	1.25 - 2.25%
Standby fee per annum on undrawn amounts	0.825-1.05%	0.50%
Covenant financial ratios:		
Senior leverage ratio (debt secured by liens/EBITDA)	not more than 2.50:1	
Leverage ratio (total debt less unencumbered cash/EBITDA)	not more than 4.00:1	
Interest coverage ratio (EBITDA/interest expense)	not less than 3.00:1	

We were in compliance with all covenants under the credit agreement and no amounts were outstanding as of March 31, 2014. We have not drawn funds on the current revolving credit facility as of the filing date of this Form 10-Q.

*Capital Leases*

We have entered into various lease agreements, primarily for equipment at our Greens Creek and Lucky Friday units, which we have determined to be capital leases. At March 31, 2014, the total liability balance associated with capital leases, including certain purchase option amounts, was \$22.6 million, with \$8.5 million of the liability classified as current and the remaining \$14.1 million classified as non-current. At December 31, 2013, the total liability balance associated with capital leases was \$22.8 million, with \$8.5 million of the liability classified as current and \$14.3 million classified as non-current. The total obligation for future minimum lease payments was \$23.6 million at March 31, 2014, with \$1.1 million attributed to interest.

At March 31, 2014, the annual maturities of capital lease commitments, including interest, are (in thousands):

Twelve-month period ending March 31,	
2015	\$8,903
2016	8,162
2017	4,918
2018	1,601
Total	23,584
Less: imputed interest	(1,054 )
Net capital lease obligation	\$22,530

#### **Note 10. Developments in Accounting Pronouncements**

In July 2013, the FASB issued ASU No. 2013-11, which requires entities to present unrecognized tax benefits as a decrease in a net operating loss, similar tax loss, or tax credit carryforward if certain criteria are met. The guidance will eliminate the diversity in practice in the presentation of unrecognized tax benefits but will not alter the way in which entities assess deferred tax assets for realizability. ASU No. 2013-11 is effective for annual and interim reporting periods beginning after December 15, 2013. Adoption of this guidance has not had a material impact on our consolidated financial statements.

#### **Note 11. Derivative Instruments**

At times, we use commodity forward sales commitments, commodity swap contracts and commodity put and call option contracts to manage our exposure to fluctuation in the prices of certain metals which we produce. Contract positions are designed to ensure that we will receive a defined minimum price for certain quantities of our production, thereby partially offsetting our exposure to fluctuations in the market. These instruments do, however, expose us to (i) credit risk in the event of non-performance by counterparties for contracts in which the contract price exceeds the spot price of a commodity and (ii) price risk to the extent that the spot price exceeds the contract price for quantities of our production contained under contract positions.

We use financially-settled forward contracts to manage the exposure to changes in metal prices of silver, gold, zinc and lead contained in our doré and concentrate shipments between the time of sale and final settlement. These contracts do not qualify for hedge accounting and are marked-to-market through earnings each period. At March 31, 2014, we recorded a current asset of \$0.9 million, net of approximately \$0.4 million of contracts in a liability position, which is included in other current assets, for the fair value of the contracts. We recognized a \$19 thousand net gain on the contracts during the first three months of 2014, which is included in sales of products. The net gain recognized on the contracts offsets price adjustments on our provisional concentrate sales related to changes to lead and zinc prices between the time of sale and final settlement.

In addition, we use financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead (but not silver and gold) contained in our forecasted future concentrate shipments. These contracts also do not qualify for hedge accounting and are marked-to-market through earnings each period. At March 31, 2014, we recorded a current asset of \$5.0 million, which is included in other current assets, and a non-current asset of \$7.4 million, which is included in other non-current assets, for the fair value of the contracts. The non-current asset balance is net of approximately \$0.2 million for contracts that were in a fair value liability position at March 31, 2014. We recognized a \$9.5 million net gain on the contracts, which includes \$2.0 million in gains realized on settled contracts, during the first three months of 2014. The net gain on these contracts is included as a separate line item under other income (expense), as they relate to forecasted future shipments, as opposed to sales that have already taken place but are subject to final pricing. The gains recognized during the first three months of 2014 are the result of decreasing lead and zinc prices during the quarter and contracts with settlement prices that are higher than spot prices. This program is designed and intended to mitigate the impact of potential future declines in lead and zinc prices from the price levels established in the contracts (see average price information below).

The following tables summarize the quantities of base metals committed under forward sales contracts at March 31, 2014 and December 31, 2013:

March 31, 2014	Ounces/pounds under contract (in 000's)				Average price per ounce/pound			
	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)
<b>Contracts on provisional sales</b>								
2014 settlements	1,590	7	29,817	9,755	\$20.15	\$ 1,304	\$ 0.91	\$ 0.95
<b>Contracts on forecasted sales</b>								
2014 settlements	—	—	29,652	21,054	N/A	N/A	\$ 0.99	\$ 1.05
2015 settlements	—	—	45,635	40,179	N/A	N/A	\$ 0.96	\$ 1.07
2016 settlements	—	—	9,094	31,030	N/A	N/A	\$ 0.94	\$ 1.03

	Ounces/pounds under contract (in 000's)				Average price per ounce/pound			
	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)	Silver (ounces)	Gold (ounces)	Zinc (pounds)	Lead (pounds)
<b>Contracts on provisional sales</b>								
2014 settlements	673	3	11,188	3,472	\$19.50	\$ 1,205	\$ 0.89	\$ 1.00
<b>Contracts on forecasted sales</b>								
2014 settlements	—	—	31,967	34,282	N/A	N/A	\$ 1.00	\$ 1.04
2015 settlements	—	—	39,683	36,982	N/A	N/A	\$ 0.96	\$ 1.07
2016 settlements	—	—	3,803	30,589	N/A	N/A	\$ 0.96	\$ 1.03

Our concentrate sales are based on a provisional sales price containing an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the concentrates at the forward price at the time of the sale. The embedded derivative, which does not qualify for hedge accounting, is adjusted to market through earnings each period prior to final settlement.

**Note 12. Fair Value Measurement**

The table below sets forth our assets and liabilities that were accounted for at fair value on a recurring basis and the fair value calculation input hierarchy level that we have determined applies to each asset and liability category (in thousands).

Description	Balance at March 31, 2014	Balance at December 31, 2013	Input Hierarchy Level
Assets:			
Cash and cash equivalents:			
Money market funds and other bank deposits	\$ 207,642	\$ 212,175	Level 1
Available for sale securities:			
Equity securities – mining industry	8,730	7,019	Level 1
Trade accounts receivable:			
Receivables from provisional concentrate sales	26,159	17,672	Level 2
Restricted cash balances:			
Certificates of deposit and other bank deposits	7,702	5,217	Level 1
Derivative contracts:			
Metal forward contracts	13,308	4,461	Level 2
Total assets	\$ 263,541	\$ 246,544	

Cash and cash equivalents consist primarily of money market funds and are valued at cost, which approximates fair value.

Current and non-current restricted cash balances consist primarily of certificates of deposit and U.S. Treasury securities and are valued at cost, which approximates fair value.

Our current and non-current investments consist of marketable equity securities which are valued using quoted market prices for each security.

Trade accounts receivable include amounts due to us for shipments of concentrates and doré sold to smelters and refiners. Revenues and the corresponding accounts receivable for sales of concentrates and doré are recorded when title and risk of loss transfer to the customer (generally at the time of loading on truck or ship). Sales of concentrates are recorded using estimated forward prices for the anticipated month of settlement applied to our estimate of payable metal quantities contained in each shipment. Sales are recorded net of estimated treatment and refining charges,

which are also impacted by changes in metals prices and quantities of contained metals. We estimate the prices at which sales of our concentrates will be settled due to the time elapsed between shipment and final settlement with the smelter. Receivables for previously recorded concentrate sales are adjusted to reflect estimated forward metals prices at the end of each period until final settlement by the smelter. We obtain the forward metals prices used each period from a pricing service. Changes in metal prices between shipment and final settlement result in changes to revenues previously recorded upon shipment. The embedded derivative contained in our concentrate sales is adjusted to fair market value through earnings each period prior to final settlement.

We utilize financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead contained in our concentrate shipments that have not reached final settlement. We also utilize financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead contained in our forecasted future concentrate shipments. In the third quarter of 2013, we began to also utilize financially-settled forward contracts to manage the exposure to changes in prices of silver and gold in our concentrate shipments (see *Note 11* for more information). These contracts do not qualify for hedge accounting, and are marked-to-market through earnings each period. The fair value of each contract represents the difference between the forward metal price for the contract settlement period as of the measurement date and the contract settlement metal price, multiplied by the quantity of metal involved in the contract.

Our Senior Notes issued in April 2013, which were recorded at their carrying value of \$491.0 million, net of unamortized initial purchaser discount at March 31, 2014, had a fair value of \$488.8 million at March 31, 2014. Quoted market prices, which we consider to be Level 1 inputs, are utilized to estimate fair values of the Notes. In January 2014, we completed an exchange offer to register the Notes under the Securities Act, with 99.99% of the Notes tendered for exchange. Prior to completion of the exchange offer, the fair value of the Notes was estimated using third-party quotes which we considered to be Level 2 inputs. See *Note 9* for more information.

**Note 13. Asset Retirement Obligations**

Below is a reconciliation as of March 31, 2014 and December 31, 2013 (in thousands) of the asset retirement obligations ("ARO") relating to our operating properties. These ARO balances are included in our total accrued reclamation and closure costs of \$114.0 million and \$105.2 million as of March 31, 2014 and December 31, 2013, respectively. Our accrued reclamation and closure cost balances include AROs and estimated liabilities for settlement obligations and contingencies for environmental matters and reclamation costs at idle properties. Our ARO balances represent the present value of estimated future costs of reclamation and closure activities at our operating properties. The estimated reclamation and closure costs were discounted using credit adjusted, risk-free interest rates ranging from 4% to 7% from the time we incurred the obligation to the time we expect to pay the retirement obligation.

	2014	2013
Balance, January 1	\$43,244	\$34,325
Changes in obligations due to changes in reclamation plans	8,210	—
Addition due to acquisition of the Casa Berardi unit	—	7,998
Accretion expense	682	1,958
Payment of reclamation obligations	(28 )	(1,037 )
Balance, end of period	\$52,108	\$43,244

In the fourth quarter of 2012, we updated our ARO at Greens Creek to reflect a preliminary revised reclamation and closure plan having estimated undiscounted costs of approximately \$73.9 million, an increase from the \$53.4 million in the previous plan. A Record of Decision was completed in late 2013 for proposed expansion of tailings capacity. In addition, in early 2014 we were engaged in negotiations with the U.S. Forest Service and state agencies on their proposed revisions to our previously-submitted reclamation and closure plan. In the first quarter of 2014, we updated our ARO at Greens Creek to reflect a revised reclamation and closure plan having estimated undiscounted costs of approximately \$102.7 million, an increase from the \$73.9 million in the previous plan, resulting in an increase to the ARO asset and liability of \$8.0 million after discounting the estimated costs to present value. As part of the revised closure plan, we will be required to increase our \$30 million reclamation bond and are currently evaluating bonding options. The increase in required bonding will be a material amount, and there can be no assurance that this bonding capacity will be available to us.

**Note 14. Guarantor Subsidiaries**

Presented below are Hecla Mining Company's condensed consolidating financial statements as required by Rule 3-10 of Regulation S-X of the Securities Exchange Act of 1934, as amended, resulting from the guarantees by certain of our subsidiaries (the "Guarantors") of the Notes (see *Note 9* for more information). The Guarantors consist of the following of our 100%-owned subsidiaries: Hecla Limited; Silver Hunter Mining Company; Rio Grande Silver, Inc.; RHL Holdings, Inc.; Hecla MC Subsidiary, LLC; Hecla Silver Valley, Inc.; Burke Trading, Inc.; Hecla Alaska LLC; Hecla Greens Creek Mining Company; Hecla Admiralty Company; and Hecla Juneau Mining Company. We completed the offering of the Notes on April 12, 2013, and a related exchange offer for virtually identical notes registered with the SEC on January 3, 2014.

The unaudited interim condensed consolidating financial statements below have been prepared from our financial information on the same basis of accounting as the unaudited interim consolidated financial statements. Investments in the subsidiaries are accounted for under the equity method. Accordingly, the entries necessary to consolidate Hecla Mining Company and the Guarantors are reflected in the intercompany eliminations column. In the course of preparing consolidated financial statements, we eliminate the effects of various transactions conducted between our subsidiaries. While valid at an individual subsidiary level, such activities are eliminated in consolidation because, when taken as a whole, they do not represent business activity with third-party customers, vendors, and other parties. Examples of such eliminations include the following:

***Investments in subsidiaries.*** The acquisition of a company results in an investment on the records of the parent company and a contribution of capital on the records of the subsidiary. Such investments and capital contributions are eliminated in consolidation.

***Capital contributions.*** Other of our subsidiaries do not generate cash flow, and their cash requirements are routinely met with inter-company advances from their parent companies. On an annual basis, the boards of directors of such parent companies declare contributions of capital to their subsidiary companies, which increase the parent's investment and the subsidiaries' additional paid-in capital. In consolidation, investments in subsidiaries and related additional paid-in capital are eliminated.

**Deferred taxes.** Our ability to realize deferred tax assets and liabilities is considered on a consolidated basis for subsidiaries within the United States, with all subsidiaries' estimated future taxable income contributing to the ability to realize all such assets and liabilities. However, when our subsidiaries are viewed independently, we use the *separate return method* to assess the realizability of each subsidiary's deferred tax assets and whether a valuation allowance is required against such deferred tax assets. In some instances, a parent company or subsidiary may possess deferred tax assets whose realization depends on the future taxable incomes of other subsidiaries on a consolidated-return basis, but would not be considered realizable if such parent or subsidiary filed on a separate stand-alone basis. In such a situation, a valuation allowance is assessed on that subsidiary's deferred tax assets, with the resulting adjustment reported in the *eliminations* column of the guarantor and parent's financial statements, as is the case in the financial statements set forth below. The *separate return method* can result in significant eliminations of deferred tax assets and liabilities and related income tax provisions and benefits. Non-current deferred tax asset balances are included in other non-current assets on the condensed consolidating balance sheets and make up a large portion of that item, particularly for the guarantor balances.

Separate financial statements of the subsidiary guarantors are not presented because the guarantees by the guarantors are joint and several and full and unconditional, except for certain customary release provisions. These release provisions include: (1) the sale or disposal of all or substantially all of the assets of the guarantor; (2) the sale or other disposition of the capital stock of the guarantor; (3) the guarantor is designated as an unrestricted entity in accordance with the applicable provisions of the indenture; (4) the company ceases to be a borrower as defined in the indenture; and (5) upon legal or covenant defeasance or satisfaction and discharge of the indenture.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

*Certain statements contained in this Form 10-Q, including in Management's Discussion and Analysis of Financial Condition and Results of Operations and Quantitative and Qualitative Disclosure About Market Risk, are intended to be covered by the safe harbor provided for under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Our forward-looking statements include our current expectations and projections about future results, performance, results of litigation, prospects and opportunities, including reserves and other mineralization. We have tried to identify these forward-looking statements by using words such as "may," "will," "expect," "anticipate," "believe," "intend," "feel," "plan," "estimate," "project," "forecast" and similar expressions. These forward-looking statements are based on information currently available to us and are expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to a number of risks, uncertainties and other factors that could cause our actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements.*

*These risks, uncertainties and other factors include, but are not limited to, those set forth under Part I, Item 1A – Business – Risk Factors in our annual report filed on Form 10-K for the year ended December 31, 2013. Given these risks and uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements. All subsequent written and oral forward-looking statements attributable to Hecla Mining Company or to persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Except as required by federal securities laws, we do not intend to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.*

## Overview

Hecla Mining Company and its subsidiaries have provided precious and base metals to the U.S. and worldwide since 1891. We discover, acquire, develop, and produce silver, gold, lead and zinc.

We produce lead, zinc and bulk concentrates, which we sell to custom smelters, and unrefined bullion bars (doré) containing gold and silver, which are further refined before sale to precious metals traders. We are organized and managed into three segments that encompass our operating units: the Greens Creek, Lucky Friday, and Casa Berardi. The map below shows the locations of our operating units and our exploration and pre-development projects, as well as our corporate offices located in Coeur d'Alene, Idaho and Vancouver, British Columbia.

Our current business strategy is to focus our financial and human resources in the following areas:

- operating our properties safely, in an environmentally responsible manner, and cost-effectively;
- optimizing and improving operations at our Casa Berardi unit, which, along with other mineral interests, was obtained as a result of the acquisition of Aurizon Mines Ltd. ("Aurizon") as discussed further below;
- expanding our reserves and production capacity at our operating properties;
- maintaining and investing in exploration and pre-development projects in the vicinities of five mining districts we believe to be under-explored and under-invested: North Idaho's Silver Valley in the historic Coeur d'Alene Mining District; our Greens Creek unit on Alaska's Admiralty Island located near Juneau; the silver-producing district near Durango, Mexico; the Abitibi region of north-western Quebec, Canada; and the Creede district of Southwestern Colorado; and
- continuing to seek opportunities to acquire and invest in mining properties and companies. Examples include our acquisition of Aurizon and the Monte Cristo property in Nevada and investments in Dolly Varden Silver Corporation, Canamex Resources Corp., Brixton Metals Corporation, and Typhoon Exploration Inc. in 2012 and 2013.

A number of key factors may impact the execution of our strategy, including regulatory issues and metals prices. Metals prices can be very volatile. As discussed in the *Critical Accounting Estimates* section below, metals prices are influenced by a number of factors beyond our control. Average market prices of silver, gold, and lead in the first three months of 2014 were lower than their levels from the comparable period last year, while average zinc prices were substantially the same compared to the first quarter of 2013, as illustrated by the table in *Results of Operations* below. We believe current global economic and industrial trends could result in demand growth for the metals we produce. However, prices have been volatile over the last five years and there can be no assurance that current prices will continue.

On June 1, 2013, we completed the acquisition of all of the issued and outstanding common shares of Aurizon for total consideration of CAD\$740.8 million (US\$714.5 million). The acquisition gave us 100% ownership of the producing Casa Berardi gold mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada. The acquisition has significantly increased our gold production and gives us ownership of an operating gold mine with significant gold reserves, and provides access to a large land package with known mineralization. Nonetheless, we are faced with the challenge of continuing the integration of, and the operating responsibility for, Casa Berardi and other Aurizon projects. In addition, as further discussed in *Item 3. Quantitative and Qualitative Disclosures About Market Risk*, the acquisition has increased our exposure to risks associated with exchange fluctuations between the U.S. dollar and Canadian dollar. The acquisition was partially funded by \$490 million in net proceeds from our issuance of Senior Notes in April 2013 (see *Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)*). As discussed in the *Financial Liquidity and Capital Resources* section below, we believe that we will be able to meet the obligations associated with the acquisition of Aurizon and additional debt; however, a number of factors could impact our ability to meet the debt obligations and fund our other projects.

As further discussed in the *Lucky Friday Segment* section below, we are in the process of constructing an internal shaft at the Lucky Friday mine (“#4 Shaft”), which, we believe, will significantly increase production and extend the life of the mine. The #4 Shaft project will involve significant additional capital costs during the periods leading up to its expected completion date in 2016. Although we believe that our current capital resources will allow us to complete the #4 Shaft project, there are a number of factors that could affect its completion.

We strive to achieve excellent mine safety and health performance. We seek to implement this goal by: training employees in safe work practices; establishing, following and improving safety standards; investigating accidents, incidents and losses to avoid recurrence; involving employees in the establishment of safety standards; and participating in the National Mining Association's *CORESafety* program. We attempt to implement reasonable best practices with respect to mine safety and emergency preparedness. See *Part I, Item 1A. Risk Factors* of our annual report filed on Form 10-K for the year ended December 31, 2013 and the *Lucky Friday Segment* section below for information on accidents and other events that impacted operations at our Lucky Friday unit. We work with the Mine Safety and Health Administration (“MSHA”) to address issues outlined in the investigations of these incidents and continue to evaluate our safety practices.

Another challenge is the risk associated with environmental litigation and ongoing reclamation activities. As described in *Part I, Item 1A. Risk Factors* of our annual report filed on Form 10-K for the year ended December 31, 2013 and *Note 4 of Notes to Condensed Consolidated Financial Statements (Unaudited)*, it is possible that our estimate of these liabilities (and our ability to estimate liabilities in general) may change in the future, affecting our strategic plans. We are involved in various environmental legal matters with no assurance that the estimate of our environmental liabilities, liquidity needs, or strategic plans will not be significantly impacted as a result of these matters or new matters that may arise. We strive to ensure that our activities are conducted in compliance with applicable laws and regulations and attempt to resolve environmental litigation on as favorable terms as possible.

**Results of Operations**

Sales of products by metal for the three-month periods ended March 31, 2014 and 2013 were as follows:

(in thousands)	Three Months Ended March 31,	
	2014	2013
Silver	\$43,883	\$45,995
Gold	57,085	16,186
Lead	14,858	9,303
Zinc	24,277	14,965
Less: Smelter and refining charges	(14,316 )	(9,999 )
Sales of products	\$125,787	\$76,450

For the first quarter of 2014, we recorded income applicable to common stockholders of \$11.5 million (\$0.03 per basic common share), compared to \$11.0 million (\$0.04 per basic common share) during the first quarter of 2013. The following factors led to the results for the first three months of 2014 compared to the same period in 2013:

- Decreased average silver, gold, and lead prices for the first quarter of 2014 compared to the same period in 2013. Average zinc prices were substantially the same compared to the same period in the prior year.

	Three months ended March 31,	
	2014	2013
Silver – London PM Fix (\$/ounce)	\$20.49	\$30.08
Realized price per ounce	\$20.04	\$28.86
Gold – London PM Fix (\$/ounce)	\$1,294	\$1,630
Realized price per ounce	\$1,298	\$1,620
Lead – LME Final Cash Buyer (\$/pound)	\$0.95	\$1.04
Realized price per pound	\$0.98	\$1.07
Zinc – LME Final Cash Buyer (\$/pound)	\$0.92	\$0.92
Realized price per pound	\$0.90	\$0.93

Average realized prices differ from average market prices primarily because concentrate sales are generally recorded as revenues at the time of shipment at forward prices for the estimated month of settlement, which differ from average market prices. Due to the time elapsed between shipment of concentrates and final settlement with the smelters, we must estimate the prices at which sales of our metals will be settled. Previously recorded sales are adjusted to estimated settlement metal prices each period through final settlement. For the first quarter of 2014, we recorded net negative price adjustments to provisional settlements of \$0.7 million compared to net negative price adjustments to provisional settlements of \$2.7 million in the first quarter of 2013. The price adjustments related to zinc and lead contained in our concentrate shipments were largely offset by gains and losses on forward contracts for those metals for each period. For the first quarter of 2014, the price adjustments related to silver and gold contained in our concentrate shipments were also partially offset by gains and losses on forward contracts for those metals, as we began utilization of forward contracts for those metals in July 2013 (see *Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information). The gains and losses on these contracts are included in revenues and impact the realized prices for silver, gold, lead and zinc. Realized prices are calculated by dividing gross revenues for each metal (which include the price adjustments and gains and losses on the forward contracts discussed above) by the payable quantities of each metal included in concentrate and doré shipped during the period.

Decreased gross profit at our Greens Creek unit in the first quarter of 2014 by \$16.1 million compared to the first quarter of 2013. This was partially offset by increased gross profit at our Lucky Friday unit by \$7.0 million and gross profit of \$5.7 million in the first quarter of 2014 at our Casa Berardi unit acquired in June 2013. See *The Greens Creek Segment, The Lucky Friday Segment, The Casa Berardi Segment* sections below.

- A net gain on base metal derivative contracts of \$9.5 million in the first quarter of 2014 compared to a gain of \$21.5 million in the same period of 2013.
- Interest expense, net of amount capitalized, of \$6.8 million in the first quarter of 2014 compared to \$0.7 million in the first quarter of 2013. The increase is due to the issuance of Senior Notes in April 2013, with the net proceeds used to partially fund the acquisition of Aurizon (see *Notes 9 of Notes to Condensed Consolidated Financial*

*Statements (Unaudited).*

Other significant variances affecting the comparison of our income applicable to common stockholders for the first quarter of 2014 to the same period in 2013 were as follows:

Exploration and pre-development expense decreased to \$4.6 million in the first quarter of 2014 from \$11.3 million in the same period in 2013 as part of a plan to scale down discretionary expenditures to address the recent reduction in metals prices. "Pre-development expense" is defined as costs incurred in the exploration stage that may ultimately benefit production, such as underground ramp development, which are expensed due to the lack of proven and probable reserves.

\$5.3 million in costs in the first quarter of 2013 related to the acquisition of Aurizon, which was completed on June 1, 2013.

A net foreign exchange gain in the first quarter of 2014 of \$4.1 million versus a net loss of \$0.1 million in the same period of 2013, as the acquisition of Aurizon has resulted in increased exposure to exchange fluctuations between the U.S. dollar and Canadian dollar.

An income tax provision of \$3.8 million in the first quarter of 2014 compared to an income tax provision of \$7.4 million in the first quarter of 2013, with the variance due to a reduction in the effective tax rate to 25% in the first quarter of 2014 from 40% in the same period of 2013. See the *Corporate Matters* section below for more information.

\$1.5 million in suspension-related costs at our Lucky Friday unit, including \$0.6 million in depreciation, depletion, and amortization, in the first quarter of 2013. The suspension-related costs for the first quarter of 2013 are net of a \$1.5 million credit recognized in that period for business interruption insurance proceeds received in April 2013. As discussed further in *The Lucky Friday Segment* section below, production resumed at the Lucky Friday in February 2013.

### ***The Greens Creek Segment***

	Three months ended	
	March 31,	
	2014	2013
<i>Dollars are in thousands (except per ounce and per ton amounts)</i>		
Sales	\$63,596	\$72,649
Cost of sales and other direct production costs	(36,737 )	(32,032 )
Depreciation, depletion and amortization	(15,026 )	(12,679 )
Gross profit	\$11,833	\$27,938
Tons of ore milled	202,715	197,823
Production:		
Silver (ounces)	1,787,137	1,780,524
Gold (ounces)	15,009	13,689
Zinc (tons)	15,041	14,072
Lead (tons)	4,825	4,835
Payable metal quantities sold:		
Silver (ounces)	1,545,623	1,493,297
Gold (ounces)	11,509	9,992
Zinc (tons)	12,108	7,885
Lead (tons)	3,623	3,800
Ore grades:		
Silver ounces per ton	12.44	12.74
Gold ounces per ton	0.12	0.11
Zinc percent	8.57	8.40
Lead percent	3.14	3.32
Mining cost per ton	\$66.89	\$72.14
Milling cost per ton	\$27.51	\$37.70
Cash Cost, After By-product Credits, Per Silver Ounce <sup>(1)</sup>	\$1.58	\$5.02

(1) A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found below in *Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Costs of Sales and*

*Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP).*

The \$16.1 million decrease in gross profit during the first quarter of 2014 compared to the same 2013 period was primarily the result of significantly lower average prices for silver, gold, and lead, despite the overall sales volume being higher. Lower silver and lead ore grades and higher staffing levels, partially offset by higher zinc grades also impacted gross profit. In addition, gross profit at Greens Creek was impacted by negative price adjustments to revenues of \$0.4 million for the first quarter of 2014 compared to negative price adjustments of \$2.7 million for the first quarter of 2013. Price adjustments to revenues result from changes in metals prices between transfer of title of concentrates to buyers and final settlements during the period. The price adjustments related to zinc and lead contained in concentrate shipments were largely offset by gains and losses on forward contracts for those metals for each period. The price adjustments related to silver and gold were also offset by gains and losses on forward contracts in the first quarter of 2014, as we initiated a forward contract program for those metals in July 2013 (see *Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information). The price adjustments and gains and losses on forward contracts discussed above are included in sales.

Mining and milling costs per ton decreased by 7% and 27%, respectively, in the first quarter of 2014 compared to the same period in 2013. The decrease in milling costs was primarily the result of higher availability of less expensive hydroelectric power, the result of higher precipitation levels in Southeastern Alaska. When weather conditions are favorable to maintain lake water levels, the mine relies less on more expensive diesel generated power. Both mining and milling costs were impacted by a decrease in labor costs despite higher staffing; a result of lower medical costs due to refunds related to medical claims in 2013 and lower hourly labor costs.

Depreciation, depletion and amortization expense was 19% more in the first quarter of 2014 compared to the same 2013 period, due primarily to higher production as described above, as the majority of depreciation is calculated on a units-of-production basis.

The chart below illustrates the factors contributing to the variances in Cash Cost, After By-product Credits, Per Silver Ounce for the first quarter of 2014 compared to the same period of 2013:

As set forth above, Cash Cost, After By-product Credits, per Silver Ounce in the first quarter of 2014 was \$1.58, consisting of \$26.08 of Cash Cost, Before By-product Credits, per Silver Ounce and \$24.50 per ounce of by-product credits, compared to \$5.02 in 2013, consisting of \$30.27 of Cash Cost, Before By-product Credits, per Silver Ounce and \$25.25 per ounce of by-product credits. The decrease in Cash Cost, After By-product Credits, per Silver Ounce was the result of lower mining, milling and treatment costs and slightly lower freight and other costs.

Mining and milling cost per ounce decreased in the first quarter of 2014 compared to 2013 due to a decrease in power and labor costs.

Other cash costs per ounce for the first quarter of 2014 were lower compared to 2013 due to the effect of higher silver production and lower mine license tax.

Treatment costs were lower in the first quarter of 2014 compared to 2013 as a result of lower silver prices, as treatment costs include the value of silver not payable to us through the smelting process.

By-product credits were slightly lower in the first quarter of 2014 compared to 2013 due to lower lead ore grades and lower lead prices. The difference between what we report as "production" and "payable metal quantities sold" is attributable to the difference between the quantities of metals contained in the concentrates we produce versus the portion of those metals actually payable by our smelter customers according to the terms of the smelter contracts. Differences can also arise from inventory changes incidental to shipping schedules. The increase in payable quantities sold for the first quarter of 2014 compared to the same period in 2013 is due to the timing of concentrate shipments and increased production during the 2014 period.

While revenue from zinc, lead and gold by-products is significant, we believe that identification of silver as the primary product of the Greens Creek unit is appropriate because:

- silver has historically accounted for a higher proportion of revenue than any other metal and is expected to do so in the future;

- we have historically presented Greens Creek as a producer primarily of silver, based on the original analysis that justified putting the project into production, and believe that consistency in disclosure is important to our investors regardless of the relationships of metals prices and production from year to year;

- metallurgical treatment maximizes silver recovery;

- the Greens Creek deposit is a massive sulfide deposit containing an unusually high proportion of silver; and

- in most of its working areas, Greens Creek utilizes selective mining methods in which silver is the metal targeted for highest recovery.

Likewise, we believe the identification of gold, lead and zinc as by-product credits is appropriate because of their lower economic value compared to silver and due to the fact that silver is the primary product we intend to produce. In addition, we do not receive revenue from any single by-product metal to warrant classification of such as a co-product.

We periodically review our revenues to ensure that reporting of primary products and by-products is appropriate. Because we consider zinc, lead and gold to be by-products of our silver production, the values of these metals offset operating costs within our calculations of Cash Cost, After By-product Credits, per Silver Ounce.

In the fourth quarter of 2012, we updated our asset retirement obligation ("ARO") at Greens Creek to reflect a preliminary revised reclamation and closure plan having estimated undiscounted costs of approximately \$73.9 million, an increase from the \$53.4 million in the previous plan. A Record of Decision was completed in late 2013 for proposed expansion of tailings capacity. In addition, in early 2014 we were engaged in negotiations with the U.S. Forest Service and state agencies on their proposed revisions to our previously-submitted reclamation and closure

plan. In the first quarter of 2014, we updated our ARO at Greens Creek to reflect a revised reclamation and closure plan having estimated undiscounted costs of approximately \$102.7 million, an increase from the \$73.9 million in the previous plan, resulting in an increase to the ARO asset and liability of \$8.0 million after discounting the estimated costs to present value. As part of the revised closure plan, we will be required to increase our \$30 million reclamation bond and are currently evaluating bonding options. The increase in required bonding will be a material amount, and there can be no assurance that this bonding capacity will be available to us.

***The Lucky Friday Segment***

<i>Dollars are in thousands (except per ounce and per ton amounts)</i>	Three Months Ended	
	March 31,	
	2014	2013
Sales	\$20,096	\$3,801
Cost of sales and other direct production costs	(13,196 )	(4,794 )
Depreciation, depletion and amortization	(2,196 )	(1,328 )
Gross profit (loss)	\$4,704	\$(2,321 )
Tons of ore milled	79,089	13,926
Production:		
Silver (ounces)	699,605	120,492
Lead (tons)	4,810	706
Zinc (tons)	2,050	200
Payable metal quantities sold:

Lead percent	6.49	5.71
Zinc percent	3.00	2.19
Mining cost per ton	\$80.99	122.49
Milling cost per ton	\$20.59	58.76
Cash Cost, After By-product Credits, Per Silver Ounce (1)	\$9.60	\$36.55

A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found below in *Reconciliation of Cash (1) Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Costs of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)*.

Following a special impact inspection by MSHA at the end of 2011, production at Lucky Friday was suspended through all of 2012, with limited production recommencing in February 2013. The special impact inspection resulted in an order to remove built-up cementitious material from the Silver Shaft, a one-mile deep, concrete-lined shaft from the surface that provides the primary access to underground workings. During the suspension, we also removed unused utilities, constructed a water ring to prevent ice from forming in the winter, installed a new power cable, and installed a metal brattice designed to better partition the compartments in the shaft. Upon completion of work on the Silver Shaft in the first quarter of 2013, we constructed a haulage way bypass around an area impacted by a rock burst in 2011. Completion of the Silver Shaft project also enabled work to resume on the #4 shaft project (discussed below). Care and maintenance costs incurred in the first quarter of 2013 during the suspension of production totaled \$1.5 million, which is net of a \$1.5 million credit for business interruption insurance proceeds. These costs are included in a separate line item under *Other operating expenses* on the *Condensed Consolidated Statement of Operations and Comprehensive Income (Unaudited)*. A full historical production level was attained in the third quarter of 2013, and was sustained through the first quarter of 2014.

The chart below illustrates the factors contributing to the variances in Cash Cost, After By-product Credits, Per Silver Ounce for the first quarter of 2014 compared to the same period of 2013:

As set forth above, Cash Cost, After By-product Credits, per Silver Ounce in the first quarter of 2014 was \$9.60, consisting of \$25.62 of Cash Cost, Before By-product Credits, per Silver Ounce and \$16.02 per ounce of by-product credits, compared to \$36.55 in 2013, consisting of \$49.92 of Cash Cost, Before By-product Credits, per Silver Ounce and \$13.37 per ounce of by-product credits. The decrease in Cash Cost, After By-product Credits, per Silver Ounce was the result of increased production in the first quarter of 2014, as we ramped-up production during 2013 following the suspension period discussed above.

In its second quarter of full production since the suspension described above, Lucky Friday operations in the first quarter of 2014 have returned to levels of production and cost performance more consistent with operating history than during restart of operations in the first quarter of 2013. While we believe that the mine will continue to operate at a throughput rate comparable to that of the first quarter of 2014 through the balance of the year, there can be no assurance that economic, operational, or regulatory issues will not intervene and result in adverse effects on operations.

Cash Cost, After By-product Credits, per Silver Ounce, as well as mining and milling costs per ton for the first quarter of 2013 were higher than levels realized during historical periods of operating at full production. The higher per-unit costs were primarily due to lower production, as mine output was limited until all production areas came on line in the third quarter of 2013. The suspension-related costs discussed above are excluded from the calculations of Cash Cost, After By-product Credits, per Silver Ounce and mining and milling costs per ton.

Similar to the Greens Creek segment, the difference between what we report as “production” and “payable metal quantities sold” is due essentially to the difference between the quantities of metals contained in the concentrates we produce versus the portion of those metals actually payable by our smelter customers according to the terms of the smelter contracts.

While value from lead and zinc is significant, we believe that identification of silver as the primary product of the Lucky Friday unit is appropriate because:

silver has historically accounted for a higher proportion of revenue than any other metal and is expected to do so in the future;

the Lucky Friday unit is situated in a mining district long associated with silver production; and

the Lucky Friday unit generally utilizes selective mining methods to target silver production.

Likewise, we believe the identification of lead and zinc as by-product credits is appropriate because of their lower economic value compared to silver and due to the fact that silver is the primary product we intend to produce. In addition, we do not receive revenue from any single by-product metal to warrant classification of such as a co-product.

We periodically review our revenues to ensure that reporting of primary products and by-products is appropriate. Because we consider zinc and lead to be by-products of our silver production, the values of these metals offset operating costs within our calculations of Cash Cost, After By-product Credits, per Silver Ounce.

The #4 Shaft project, an internal shaft at the Lucky Friday mine, is expected, upon its completion, to provide deeper access in order to extend the mine's operational life. We commenced engineering and construction activities on the #4 Shaft in late 2008, and our Board of Directors gave its final approval of the project in August 2011. Construction of the #4 Shaft as currently designed is expected to cost approximately \$215 million, including approximately \$138 million already spent as of March 31, 2014, with completion expected in 2016. As discussed above, the #4 Shaft sinking activities were temporarily suspended until cleanup work in the Silver Shaft was completed in early 2013. We believe that our current capital resources will allow us to complete the project. However, there are a number of factors that could affect completion of the project, including: (i) a significant decline in metals prices, (ii) a reduction in available cash or credit, whether arising from decreased cash flow or other uses of available cash, (iii) increased regulatory burden, or (iv) a significant increase in operating or capital costs.

Many of the employees at our Lucky Friday unit are represented by a union. The collective bargaining agreement with the union expires on April 30, 2016.

In March 2012, Hecla Limited received notice of a complaint filed against it by the United Steel Workers, Local 5114, with the Federal Mine Safety Health Review Commission for compensation for bargaining unit workers at the Lucky Friday mine who were idled as a result of the previously-announced, temporary suspension of production at the mine (see the *Other Contingencies* section of *Note 4 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information).

### ***The Casa Berardi Segment***

On June 1, 2013, we completed the acquisition of all of the issued and outstanding common shares of Aurizon Mines, Ltd. ("Aurizon") for total consideration of CDN\$740.8 million (US\$714.5 million). The acquisition gave us 100% ownership of the producing Casa Berardi mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada.

The following is information on the operating results and key production statistics of our Casa Berardi segment (dollars are in thousands, except for per ton and per ounce amounts):

	Three Months  Ended March 31,  2014
Sales	\$42,096
Cost of sales and other direct production costs	(27,808 )
Depreciation, depletion and amortization	(8,581 )
Gross profit	\$5,707
Tons of ore milled	186,143
Production:	
Gold (ounces)	31,259
Silver (ounces)	5,111
Payable metal quantities sold:	
Gold (ounces)	32,456
Silver (ounces)	5,063
Ore grades:	
Gold ounces per ton	0.19
Silver ounces per ton	0.031
Mining cost per ton	\$121.15
Milling cost per ton	\$22.78
Cash Cost, After By-product Credits, per Gold Ounce <sup>(1)</sup>	\$886

A reconciliation of this non-GAAP measure to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measure, can be found below in *Reconciliation of Cash* <sup>(1)</sup> *Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Costs of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP).*

As of March 31, 2014, work crews had approximately 35 meters remaining on a 340 meter project initiated by Aurizon to deepen the West Mine Shaft. During the first quarter of 2014, the level 1010 station was completed, and two of three benches in the loading pocket at the 1055 level were completed. Completion of the project, including shaft infrastructure, loading pockets, shaft lining, services and steel, is expected late in the third quarter of 2014, with commissioning to follow. The deepening of the shaft is expected to lower operating costs in future years as the mining horizon deepens and eventually provide a platform for deeper exploration.

Recent mine enhancements include a new paste backfill facility and a concrete plant, which, we believe, will improve operational efficiency. In addition, a new dry house facility was completed in March 2014 at the West Mine, which will provide greater flexibility and efficiency for the underground miners, as this facility is located much closer to the main mine access than the existing facility.

The chart below illustrates the factors contributing to Cash Cost, After By-product Credits, Per Gold Ounce for the first quarter of 2014:

As set forth above, Cash Cost, After By-product Credits, per Gold Ounce in the first quarter of 2014 was \$886.28, consisting of \$889.61 of Cash Cost, Before By-product Credits, per Gold Ounce and \$3.33 per ounce of by-product credits.

We believe the identification of silver as a by-product credit is appropriate at Casa Berardi because of its lower economic value compared to gold and due to the fact that gold is the primary product we intend to produce there. In addition, we do not receive sufficient revenue from silver at Casa Berardi to warrant classification of such as a co-product. Because we consider silver to be a by-product of our gold production at Casa Berardi, the value of silver offsets operating costs within our calculations of Cash Cost, After By-product Credits, per Gold Ounce.

### *Corporate Matters*

#### *Employee Benefit Plans*

Our defined benefit pension plans, while affording a significant benefit to our employees, also represent a significant liability. The liability recorded for the funded status of our plans was \$33.4 million and \$32.0 million, respectively, as of March 31, 2014 and December 31, 2013. In April 2014, we contributed approximately \$2.0 million, par value, of our Notes to our funded pension plan, and expect to contribute a total of \$7.5 million, par value, over the course of 2014 (see *Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information). While the economic variables which will determine future cash requirements are uncertain, we expect contributions to be required in future years. See *Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information.

*Income Taxes*

We continue to have a net deferred tax asset in the U.S. and a net deferred tax liability in Canada. Our U.S. net deferred tax asset at March 31, 2014, totaled \$117.6 million, or 5% of total assets, an increase of \$3.1 million from the \$114.5 million net deferred tax asset at December 31, 2013. The largest component of the deferred tax asset is net operating loss carryforwards which are available to be applied against future taxable income. The next largest component is deferred reclamation, of which the majority should be realized in the current year, assuming adequate taxable income. Each reporting period we assess our deferred tax assets utilizing long-range forecasts to provide reasonable assurance that they will be realized through future earnings. At March 31, 2014, we retained a valuation allowance on U.S. deferred tax assets of \$3.5 million primarily for foreign tax credits. A \$24.2 million valuation allowance remains on deferred tax assets in foreign jurisdictions.

Our net Canadian deferred tax liability at March 31, 2014, was \$160.8 million, a decrease of \$5.1 million from the \$165.9 million net deferred tax liability at December 31, 2013. The deferred tax liability is the result of the acquisition of Aurizon completed on June 1, 2013, and is primarily related to the excess of the fair market value of the assets acquired over the tax bases of those assets for Canadian tax reporting, with the majority of that value allocated to mineral resources and reserves.

Our effective tax rate for the three months ended March 31, 2014, was 24% compared to 40% for the three months ended March 31, 2013. The change in the effective tax rate is primarily due to the effects of the U.S. deduction for percentage depletion and the impact of taxation in foreign jurisdictions.

***Reconciliation of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) to Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP)***

The tables below present reconciliations between the non-GAAP measures of Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits to the GAAP measure of cost of sales and other direct production costs and depreciation, depletion and amortization for our operations at the Greens Creek, Lucky Friday, and Casa Berardi units for the three-month periods ended March 31, 2014 and 2013 (in thousands, except costs per ounce).

Cash Cost, After By-product Credits is an important operating statistic that we utilize to measure each mine's operating performance. It also allows us to benchmark the performance of each of our mines versus those of our

competitors. As a primary silver mining company, we also use the statistic on an aggregate basis - aggregating the Greens Creek and Lucky Friday mines - to compare our performance with that of other primary silver mining companies. With regard to Casa Berardi, we use Cash Cost, After By-product Credits to compare its performance with other gold mines. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics.

Cash Cost, Before By-product Credits include all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining expense, on-site general and administrative costs, royalties and mining production taxes. By-product credits include revenues earned from all metals other than the primary metal produced at each unit. Cash Cost, After By-product Credits, per Ounce, provides management and investors an indication of operating cash flow, after consideration of the average price, received from production. Management also uses this measurement for the comparative monitoring of performance of our mining operations period-to-period from a cash flow perspective. Cash Cost, After By-product Credits, per Ounce is a measure developed by precious metals companies (including the Silver Institute) in an effort to provide a uniform standard for comparison purposes. There can be no assurance, however, that our reporting of this non-GAAP measure is the same as that reported by other mining companies.

The Casa Berardi section below reports Cash Cost, After By-product Credits, per Gold Ounce for the production of gold, its primary product, and by-product revenues earned from silver, which is a by-product at Casa Berardi. Only costs and ounces produced relating to units with the same primary product are combined to represent Cash Cost, After By-product Credits, per Ounce. Thus, the gold produced at our Casa Berardi unit is not included as a by-product credit when calculating Cash Cost, After By-product Credits, per Silver Ounce for the total of Greens Creek and Lucky Friday, our combined silver properties.

As depicted in the Greens Creek Unit and the Lucky Friday Unit tables below, by-product credits comprise an essential element of our silver unit cost structure distinguishing our silver operations due to the polymetallic nature of their orebodies. By-product credits included in our presentation of Cash Cost, After By-product Credits, per Silver Ounce include:

	Total, Greens Creek and Lucky Friday	
	Units	
	Three months ended	
	March 31,	
	2014	2013
By-product value, all silver properties:		
Zinc	\$22,956	\$19,117
Gold	16,260	18,268
Lead	15,767	9,192
Total by-product credits	\$54,983	\$46,577
By-product credits per silver ounce, all silver properties		
Zinc	\$9.23	\$10.05
Gold	6.54	9.61
Lead	6.34	4.84
Total by-product credits	\$22.11	\$24.50

By-product credits included in our presentation of Cash Cost, After By-product Credits, per Gold Ounce for our Casa Berardi Unit include:

	Casa Berardi Unit (2) Three months ended March 31, 2014
Silver by-product value	\$ 104
Silver by-product credits per gold ounce	\$ 3.33

Cost of sales and other direct production costs and depreciation, depletion and amortization is the most comparable financial measure calculated in accordance with GAAP to Cash Cost, After By-product Credits. The sum of the cost of sales and other direct production costs and depreciation, depletion and amortization for our operating units in the tables below is presented in our Consolidated Statement of Operations and Comprehensive Income (Loss) (in thousands).

	Total, Greens Creek and Lucky Friday Units Three Months Ended	
	March 31,	
	2014	2013
Cash Cost, Before By-product Credits <sup>(1)</sup>	\$64,519	\$59,923

- (1) Includes all direct and indirect operating costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, after by-product revenues earned from all metals other than the primary metal produced at each unit.

- (2) On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd., which gave us 100% ownership of the Casa Berardi mine in Quebec, Canada. The information presented reflects our ownership of Casa Berardi commencing as of that date. The primary metal produced at Casa Berardi is gold, with a by-product credit for the value of silver production.

### *Financial Liquidity and Capital Resources*

Our liquid assets include (in millions):

	<b>March 31, 2014</b>	<b>December 31, 2013</b>
Cash and cash equivalents held in U.S. dollars	\$180.8	\$ 166.5
Cash and cash equivalents held in foreign currency	26.8	45.7
Total cash and cash equivalents	207.6	212.2
Marketable equity securities - non-current	8.7	7.0
Total cash, cash equivalents and investments	\$216.3	\$ 219.2

Cash and cash equivalents decreased by \$4.6 million in the first three months of 2014, as discussed below, while the value of non-current marketable equity securities increased by \$1.7 million (see *Note 2 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information).

On April 12, 2013, we completed an offering of Notes in the total principal amount of US\$500 million, as discussed in *Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)*. The net proceeds from the offering of the Notes of \$490 million were used to partially fund the acquisition of Aurizon and for general corporate purposes, including expenses related to the Aurizon acquisition. In addition, on April 14, 2014, we entered into an agreement with the Hecla Mining Company Retirement Plan Trust pursuant to which we agreed to contribute to the trust over the course of 2014 approximately \$7.5 million in aggregate principal amount of the Notes, including \$2.0 million in aggregate principal amount of the Notes which were contributed on April 14, in order to satisfy the funding requirement for our funded pension plan for 2014. The Notes are due May 1, 2021 and bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013.

In 2011, we settled Hecla Limited's Coeur d'Alene Basin environmental litigation and related claims pursuant to a Consent Decree entered by the Court on September 8, 2011. Payments of approximately \$168 million, \$25 million, and \$15 million (and related interest) were made in October 2011, 2012, and 2013, respectively, pursuant to the terms of the Consent Decree. Hecla Limited's remaining obligation under the Consent Decree consists of approximately \$55.4 million due by August 2014, payable in quarterly payments as proceeds from the exercise of any outstanding Series 1 and Series 3 warrants are received (if any), with the remaining balance, if any, due in August 2014.

The #4 Shaft project, which is discussed further in the *Lucky Friday Segment* section above, is expected to involve capital expenditures of approximately \$215 million through 2016, including approximately \$138 million that has been spent on the project as of March 31, 2014.

Pursuant to our common stock dividend policy described in *Note 8 of Notes to Condensed Consolidated Financial Statements (Unaudited)*, our Board of Directors declared and paid dividends on common stock totaling \$0.9 million in the first quarter of 2014 and \$3.6 million in the first quarter of 2013. On May 5, 2014, our Board of Directors declared a dividend on common stock totaling \$0.9 million payable in June 2014. Our dividend policy has a silver-price-linked component which ties the amount of declared common stock dividends to our realized silver price for the preceding quarter. Another component of our common stock dividend policy anticipates paying an annual minimum dividend. The declaration and payment of dividends on common stock is at the sole discretion of our board of directors, and there can be no assurance that we will continue to declare and pay common stock dividends in the future.

On March 3, 2014, the Board of Directors granted 1,345,072 restricted stock units to employees for payment of approximately \$4.6 million in annual and long-term incentive compensation for the period ended December 31, 2013.

On May 8, 2012, we announced that our board of directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions, depending on prevailing market conditions and other factors. The repurchase program may be modified, suspended or discontinued by us at any time. Whether or not we engage in repurchases from time to time may depend on a variety of factors, including not only price and cash resources, but customary black-out restrictions, whether we have any material inside information, limitations on share repurchases or cash usage that may be imposed by our credit agreement or in connection with issuances of securities, alternative uses for cash, applicable law, and other investment opportunities from time to time. As of March 31, 2014, 400,300 shares have been repurchased under the program, at an average price of \$5.56 per share, leaving 19.6 million shares that may yet be purchased under the program. The closing price of our common stock at May 2, 2014, was \$3.11 per share.

As discussed in *The Greens Creek Segment* section above, we anticipate that in 2014 we will complete a revised plan for reclamation and closure of the Greens Creek mine. Preliminary work on the plan has led us to believe that it will result in an increase in estimated closure costs, which will require us to increase our current \$30 million reclamation bond for Greens Creek. Although we do not know the amount of such increase, it likely will be a material amount, and there can be no assurance that this bonding capacity will be available to us at that time.

As a result of our current cash balances the performance of our current operations, current metals prices, and full availability of our \$100 million revolving credit agreement, we believe our cash, cash equivalents, investments, projected cash from operations, and availability of financing (including equity issuances) if needed will be adequate to meet our obligations during the next 12 months. These obligations include, but are not limited to: debt service obligations related to the Notes, the required environmental settlement payments previously discussed, capital outlays

for the #4 Shaft project and other capital expenditures potential repurchases of our common stock under the program described above, and payment of common stock dividends, if declared by our board of directors. We currently estimate that a total of approximately \$150 million will be spent on capital expenditures, primarily for equipment, infrastructure, and development at our mines in 2014. We also estimate that exploration and pre-development expenditures will total approximately \$18 million in 2014. However, capital, exploration, and pre-development expenditures may change based upon our financial position, metals prices, and other considerations. Our ability to fund the activities described above will depend on our operating performance, metals prices, our ability to estimate costs, sources of liquidity available to us, and other factors. However, a sustained downturn in metals prices or significant increase in operational or capital costs, other uses of cash, or other factors beyond our control could impact our plans.

**Three Months  
Ended**

**March**

**March 31,  
2013**

**2014**

**Cash provided by operating activities (in millions)    \$30.4    \$11.4**

Cash provided by operating activities in the first quarter of 2014 increased by \$19.0 million compared to the same period in 2013 primarily due to higher income, as adjusted for non-cash items. The higher income is primarily due to the addition of the Casa Berardi mine in June 2013 and increased production at the Lucky Friday mine (see the *Casa Berardi Segment* and *Lucky Friday Segment* sections above). Working capital and other operating asset and liability changes resulted in a net cash flow increase of \$6.3 million in the first three months of 2014 compared to a net decrease in cash flows of \$0.2 million in the 2013 period. The \$6.5 million variance in working capital changes is attributed to lower product inventory balances, partially offset by higher accounts receivable balances, due to the timing of shipments at Greens Creek, and higher accrued taxes due to the timing of income tax payments. These factors were partially offset by a larger reduction to accounts payable as a result of decreased capital spending at Greens Creek and Lucky Friday and lower accrued payroll and related benefits due mainly to the timing of payment of incentive compensation related to prior-year performance.

**Three Months

**March  
March 31,  
31, 2013  
2014**

**Cash used in investing activities (in millions)**    **\$(29.4)**    **\$(28.2)**

During the first quarter of 2014 we invested \$26.9 million in capital expenditures, not including \$2.2 million in non-cash capital lease additions, an increase of \$1.1 million compared to the same period in 2013 due to expenditures at the Casa Berardi unit acquired in June 2013. During the first quarter of 2014, restricted investments related to reclamation bonding at the Casa Berardi unit increased by \$2.5 million. We purchased marketable securities having a cost basis of \$2.6 million during the first quarter of 2013.

2014**

**Cash used in financing activities (in millions)**    **\$(3.9)**    **\$(5.5 )**

During the first three months of 2014 and 2013, we paid cash dividends on our common stock totaling \$0.9 million and cash dividends of \$0.1 million on our Series B Preferred Stock. We made repayments on our capital leases of \$2.4 million and \$1.5 million in the three month periods ended March 31, 2014 and 2013, respectively.

***Contractual Obligations, Contingent Liabilities and Commitments***

The table below presents our fixed, non-cancelable contractual obligations and commitments primarily related to our litigation settlement, outstanding purchase orders, certain capital expenditures, our credit facility and lease arrangements as of March 31, 2014 (in thousands):

Payments Due By Period

	Less than 1 year	1-3 years	4-5 years	More than 5 years	Total
Purchase obligations <sup>(1)</sup>	\$5,294	—	—	\$—	\$5,294
Commitment fees <sup>(2)</sup>	500	667	—	—	1,167
Contractual obligations <sup>(3)</sup>	5,870	—	—	—	5,870
Capital lease commitments <sup>(4)</sup>	8,903	13,080	1,601	—	23,584
Operating lease commitments <sup>(5)</sup>	2,848	2,631	2,321	1,994	9,794
Coeur d'Alene Basin litigation settlement <sup>(6)</sup>	55,437	—	—	—	55,437
Surety maintenance fees <sup>(6)</sup>	154	—	—	—	154
Defined benefit pension plans <sup>(7)</sup>	7,478	—	—	—	7,478
Supplemental executive retirement plan <sup>(7)</sup>	343	708	744	2,304	4,099
Notes <sup>(8)</sup>	34,375	68,750	68,750	571,615	743,490
Total contractual cash obligations	\$121,202	\$85,836	\$73,416	\$575,913	\$856,367

Consist of open purchase orders of approximately \$0.7 million at the Greens Creek unit, \$1.8 million at the Lucky Friday unit and \$2.7 million at the Casa Berardi unit. Included in these amounts are approximately \$0.3 million, <sup>(1)</sup> \$1.4 million, and \$0.8 million related to various capital projects at the Greens Creek, Lucky Friday and Casa Berardi units, respectively.

We have a \$100 million revolving credit agreement under which we are required to pay a standby fee of 0.5% per annum on undrawn amounts under the revolving credit agreement. There was no amount drawn under the <sup>(2)</sup> revolving credit agreement as of March 31, 2014, and the amounts above assume no amounts will be drawn during the agreement's term. For more information on our credit facility, see *Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)*.

(3) As of March 31, 2014, we were committed to approximately \$5.9 million for various non-capital items.

(4) Includes scheduled capital lease payments of \$20.8 million and \$2.8 million (including interest), respectively, for equipment at our Greens Creek and Lucky Friday units. These leases have fixed payment terms and contain bargain purchase options at the end of the lease periods (see *Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information).

(5) We enter into operating leases in the normal course of business. Substantially all lease agreements have fixed payment terms based on the passage of time. Some lease agreements provide us with the option to renew the lease or purchase the leased property. Our future operating lease obligations would change if we exercised these renewal options and if we entered into additional operating lease arrangements.

(6) On September 8, 2011, a Consent Decree settling the Coeur d'Alene Basin environmental litigation and related claims was entered by the U.S. District Court in Idaho. As of March 31, 2014, our remaining obligation under the terms of the settlement is approximately \$55.4 million by August 2014, as quarterly payments of the proceeds from the exercise of any outstanding Series 1 and Series 3 warrants during the quarter, with the remaining balance, if any, due in August 2014. These payments are secured by a third party surety for which Hecla Limited pays an annual maintenance fee of 0.556% of the remaining obligation balance.

(7) We sponsor defined benefit pension plans covering substantially all U.S. employees and provide certain post-retirement benefits for qualifying retired employees, along with a supplemental executive retirement plan. These amounts represent our estimate of the future funding requirements for these plans. We believe we will have funding requirements related to our defined benefit plans beyond one year; however, such obligations are not fixed in nature and are difficult to estimate, as they involve significant assumptions. On April 14, 2014, we entered into an agreement with the Hecla Mining Company Retirement Plan Trust pursuant to which we agreed to contribute to the trust over the course of 2014 approximately \$7.5 million in aggregate principal amount of the Notes, including \$2.0 million in aggregate principal amount of the Notes which were contributed on April 14, in order to satisfy the funding requirement for our funded pension plan for 2014. On the same day we filed a registration statement with the SEC for resale of the Notes that we agreed to contribute to the trust. See *Note 7 and Note 9 of Notes to Condensed Consolidated Financial Statements (Unaudited)* for more information.

(8) On April 12, 2013, we completed an offering of \$500 million in aggregate principal amount of our Senior Notes due May 1, 2021 (the "Notes"). See *Note 9 of Notes to Condensed Consolidated Financial Statements* for more information. On April 14, 2014, we issued an additional \$2 million aggregate principal of Notes. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date to which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013.

We record liabilities for costs associated with mine closure, reclamation of land and other environmental matters. At March 31, 2014, our liabilities for these matters totaled \$114.0 million, including \$55.4 for the net present value of Hecla Limited's liability relating to the Coeur d'Alene River Basin in North Idaho. On September 8, 2011 a Consent Decree settling the Coeur d'Alene Basin environmental litigation and related claims was entered by the U.S. District Court in Idaho. See the *Financial Liquidity and Capital Resources* section above for more information on the

financial terms of the settlement. Future expenditures related to closure, reclamation and environmental expenditures at our other sites are difficult to estimate, although we anticipate we will incur expenditures relating to these obligations over the next 30 years. For additional information relating to our environmental obligations, see *Note 4 of Notes to Condensed Consolidated Financial Statements (Unaudited)*.

### ***Off-Balance Sheet Arrangements***

At March 31, 2014, we had no existing off-balance sheet arrangements, as defined under SEC regulations, that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

### *Critical Accounting Estimates*

Our significant accounting policies are described in *Note 1* of *Notes to Consolidated Financial Statements* in our annual report filed on Form 10-K for the year ended December 31, 2013. As described in *Note 1*, we are required to make estimates and assumptions that affect the reported amounts and related disclosures of assets, liabilities, revenue, and expenses. Our estimates are based on our experience and our interpretation of economic, political, regulatory, and other factors that affect our business prospects. Actual results may differ significantly from our estimates.

We believe that our most critical accounting estimates are related to future metals prices; obligations for environmental, reclamation, and closure matters; mineral reserves; and accounting for business combinations, as they require us to make assumptions that were highly uncertain at the time the accounting estimates were made and changes in them are reasonably likely to occur from period to period. Management has discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors, and the Audit Committee has reviewed the disclosures presented below. In addition, there are other items within our financial statements that require estimation, but are not deemed to be critical. However, changes in estimates used in these and other items could have a material impact on our financial statements.

### *Future Metals Prices*

Metals prices are key components in estimates that determine the valuation of some of our significant assets and liabilities, including properties, plants and equipment, deferred tax assets, and certain accounts receivable. Metals prices are also an important component in the estimation of reserves. As shown under *Item 1A. — Risk Factors* in our annual report filed on Form 10-K for the year ended December 31, 2013, metals prices have historically been volatile. Silver demand arises from investment demand, particularly in Exchange-Traded Funds, and industrial and consumer demand, while demand for gold is primarily driven by investment and consumer demand. Investment demand for silver and gold has been relatively strong over the past three years and is influenced by various factors, including: the value of the U.S. Dollar and other currencies, expanding U.S. budget deficits, widening availability of exchange-traded commodity funds, interest rate levels, the health of credit markets, and inflationary expectations. Uncertain economic conditions could result in continued investment demand for precious metals. Industrial demand for silver is closely linked to world Gross Domestic Product growth. Consumer demand is driven significantly by demand for jewelry and similar retail products. We believe that global economic conditions are improving, though slowly and unevenly, and that industrial trends, including urbanization and growth of the middle class in countries such as China and India, will result in continued demand growth for silver and gold. However, there can be no assurance that these trends will continue or as to how they will impact prices of the metals we produce. We are also impacted by fluctuations in prices for zinc and lead, which are also tied to economic conditions and the amount of available supply. We have recorded impairments to our asset carrying value in the past because of low prices, and we can offer no assurance that prices will either remain at their current levels or increase.

Processes supporting valuation of our assets and liabilities that are most significantly affected by prices include analysis of asset carrying values, depreciation, reserves, and deferred income taxes. On at least an annual basis – and more frequently if circumstances warrant – we examine our depreciation rates, reserve estimates, and the valuation allowances on our deferred tax assets. We examine the carrying values of our assets as changes in facts and circumstances warrant. In our analysis of carrying values and deferred taxes, we apply several pricing views to our forecasting model, including current prices, analyst price estimates, forward-curve prices, and historical prices (see *Mineral Reserves*, below, regarding prices used for reserve estimates). Using applicable accounting guidance and our view of metals markets, we use the average of the various methods to determine whether the values of our assets are fairly stated, and to determine the level of valuation allowances, if any, on our deferred tax assets. In addition, estimates of future metals prices are used in the valuation of certain assets in the determination of the purchase price allocations for our acquisitions (see *Business Combinations* below).

Sales of all metals products sold directly to smelters are recorded as revenues when title and risk of loss transfer to the smelter (generally at the time of shipment) at estimated forward metals prices for the estimated month of settlement. Due to the time elapsed between the time of shipment to the smelter and final settlement with the smelter, we must estimate the prices at which sales of our metals will be settled. Previously recorded sales and trade accounts receivable are adjusted to estimated settlement metals prices until final settlement by the smelter. Changes in metals prices between shipment and final settlement result in changes to revenues and accounts receivable previously recorded upon shipment. As a result, our trade accounts receivable balances are subject to changes in metals prices until final settlement occurs. For more information, see part *N. Revenue Recognition* of *Note 1* of *Notes to Consolidated Financial Statements* in our annual report filed on Form 10-K for the year ended December 31, 2013.

We utilize financially-settled forward contracts to manage our exposure to changes in the prices of silver, gold, zinc and lead contained in our concentrates that have been shipped but not yet settled, and zinc and lead contained in our forecasted future concentrate shipments. See *Item 3. Quantitative and Qualitative Disclosures About Market Risk - Commodity-Price Risk Management* below for more information on our contract programs. These contracts do not qualify for hedge accounting and are therefore marked-to-market through earnings each period. Changes in silver, gold, zinc and lead prices between the dates that the contracts are entered into and their settlements will result in changes to the fair value asset or liability associated with the contracts, with a corresponding gain or loss recognized in earnings.

*Obligations for Environmental, Reclamation and Closure Matters*

Accrued reclamation and closure costs represents a significant liability on our balance sheet. Of our \$114.0 million total accrued reclamation and closure cost balance as of March 31, 2014, approximately \$55.4 million is fixed by the terms of the Coeur d'Alene Basin litigation settlement, with much of the remaining balance subject to uncertainty. We have estimated our liabilities under appropriate accounting guidance, and on at least an annual basis - and more frequently if warranted - management reviews our liabilities with our Audit Committee. However, the ranges of liability could exceed the liabilities recognized. If substantial damages were awarded, claims were settled, or remediation costs incurred in excess of our accruals, our financial results or condition could be materially adversely affected.

*Mineral Reserves*

Critical estimates are inherent in the process of determining our reserves. Our reserves are affected largely by our assessment of future metals prices, as well as by engineering and geological estimates of ore grade, accessibility and production cost. Metals prices are estimated at long-term averages, as described in *Item 2. — Property Descriptions* in our annual report on Form 10-K filed for the year ended December 31, 2013. O
