WASHINGTON, D.C. 20549**

**FORM 10-K**

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT  
OF 1934**

For the fiscal year ended December 31, 2015

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE  
ACT OF 1934**

Commission file number 0-3722

**ATLANTIC AMERICAN CORPORATION**  
(Exact name of registrant as specified in its charter)

**Georgia**

(State or other jurisdiction of incorporation or  
organization)

**58-1027114**

(I.R.S. Employer Identification No.)

**4370 Peachtree Road, N.E.,  
Atlanta, Georgia**

(Address of principal executive offices)

**30319**

(Zip Code)

(Registrant's telephone number, including area code) (404) 266-5500

**Securities registered pursuant to section 12(b) of the Act:**

Title of each class	Name of exchange
Common Stock, par value \$1.00 per share	NASDAQ Global Market

**Securities registered pursuant to Section 12(g) of the Act:**

**None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes o No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

The aggregate market value of voting and nonvoting common stock held by non-affiliates of the registrant as of June 30, 2015, the last business day of the registrant's most recently completed second fiscal quarter, was \$16,176,502. For purposes hereof, beneficial ownership is determined under rules adopted pursuant to Section 13 of the Securities Exchange Act of 1934, and the foregoing excludes value ascribed to common stock that may be deemed beneficially owned by the directors and executive officers, and 10% or greater stockholders, of the registrant, some of whom may not be deemed to be affiliates upon judicial determination. On March 15, 2016 there were 20,394,007 shares of the registrant's common stock, par value \$1.00 per share, outstanding.

**DOCUMENTS INCORPORATED BY REFERENCE**

1. Portions of the registrant's Proxy Statement for the 2016 Annual Meeting of Shareholders, to be filed with the Securities and Exchange Commission within 120 days of the registrant's fiscal year end, have been incorporated by reference in Items 10, 11, 12, 13 and 14 of Part III of this Form 10-K.

TABLE OF CONTENTS

**PART I**

**Item 1. Business**

**The Company**

Atlantic American Corporation, a Georgia corporation incorporated in 1968 (the Parent or Company ), is a holding company that operates through its subsidiaries in well-defined specialty markets within the life and health and property and casualty insurance industries. The Parent's principal operating subsidiaries are American Southern Insurance Company and American Safety Insurance Company (together known as American Southern ) within the property and casualty insurance industry and Bankers Fidelity Life Insurance Company and Bankers Fidelity Assurance Company (together known as Bankers Fidelity ) within the life and health insurance industry. Each of American Southern and Bankers Fidelity is managed separately based upon the type of products it offers, and is evaluated on its individual performance. The Company's strategy is to focus on well-defined geographic, demographic and/or product niches within the insurance marketplace. Each of American Southern and Bankers Fidelity operates with relative autonomy, which structure is designed to allow for quick reaction to market opportunities.

The Parent has no significant business operations of its own and relies on fees, dividends and other distributions from its operating subsidiaries as the principal source of cash flow to meet its obligations. Additional information regarding the cash flow and liquidity needs of the Parent can be found in the Liquidity and Capital Resources section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

**Property and Casualty Operations**

American Southern comprises the Company's property and casualty operations and its primary product lines are as follows:

Business Automobile Insurance policies provide bodily injury and/or property damage liability coverage, uninsured motorist coverage and physical damage coverage for commercial accounts.

General Liability Insurance policies cover bodily injury and property damage liability for both premises and completed operations exposures for general classes of business.

Surety Bonds are contracts under which one party, the insurance company issuing the surety bond, guarantees to a third party that the primary party will fulfill an obligation in accordance with a contractual agreement. This obligation may involve meeting a contractual commitment, paying a debt or performing certain duties.

American Southern provides tailored business automobile insurance coverage, on a multi-year contract basis, to state governments, local municipalities and other large motor pools and fleets ( block accounts ) that can be specifically rated and underwritten. The size of the block accounts insured by American Southern are generally such that individual class experience can be determined, which allows for customized policy terms and rates. American Southern is licensed to do business in 32 states and the District of Columbia. While the majority of American Southern's premiums are derived from its automobile lines of business, American Southern also offers business personal property, inland marine and general liability coverages. Additionally, American Southern directly provides surety bond coverage for school bus transportation and subdivision construction, as well as performance and payment bonds.

**TABLE OF CONTENTS**

The following table summarizes, for the periods indicated, the allocation of American Southern's net earned premiums from each of its principal product lines:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
Automobile liability	\$ 24,786	\$ 26,438
Automobile physical damage	13,290	11,633
General liability	3,152	3,577
Surety	9,192	7,309
Other lines	4,088	3,697
Total	\$ 54,508	\$ 52,654

**Life and Health Operations**

Bankers Fidelity comprises the life and health operations of the Company and offers a variety of life and supplemental health products with a focus on the senior markets. Products offered by Bankers Fidelity include ordinary and term life insurance, Medicare supplement and other accident and health insurance products. Health insurance products, primarily Medicare supplement insurance, accounted for 89.2% of Bankers Fidelity's net earned premiums in 2015 while life insurance, including both whole and term life insurance policies, accounted for the balance. In terms of the number of policies written in 2015, 77.4% were health insurance policies and 22.6% were life insurance policies.

The following table summarizes, for the periods indicated, the allocation of Bankers Fidelity's net earned premiums from each of its principal product lines followed by a brief description of the principal products:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
Life insurance	\$ 10,454	\$ 10,887
Medicare supplement	81,068	85,197
Other accident and health	4,862	4,750
Total health insurance	85,930	89,947
Total	\$ 96,384	\$ 100,834

Life Insurance products include non-participating individual term and whole life insurance policies with a variety of riders and options. Policy premiums are dependent upon a number of factors, including issue age, level of coverage and selected riders or options.

Medicare Supplement Insurance includes 8 of the 11 standardized Medicare supplement policies created under the Medicare Improvements for Patients and Providers Act of 2008 ( MIPPA ), which are designed to provide insurance coverage for certain expenses not covered by the Medicare program, including copayments and deductibles.

Other Accident and Health Insurance coverages include several policies providing for the payment of standard benefits in connection with the treatment of diagnosed cancer and other critical illnesses, as well as a number of other policies providing nursing facility care, accident expense, hospital indemnity and disability coverages.

**Marketing**

**Property and Casualty Operations**

A portion of American Southern's business is marketed through a small number of specialized, experienced independent agents. American Southern's agent selection process is actively managed by internal marketing personnel with oversight from management. Senior management carefully reviews all new programs prior to acceptance. Most of American Southern's agents are paid an up-front commission with the potential for

2

## TABLE OF CONTENTS

additional commissions by participating in a profit sharing arrangement that is directly linked to the profitability of the underlying business. American Southern also solicits business from governmental entities. As an experienced writer of insurance policies for certain governmental programs, the company actively pursues this market on a direct basis. Much of this business is priced by means of competitive bid situations and there can be no assurance with respect to ultimate profitability or that the company can obtain or retain such business at the time of a specific contract renewal.

### **Life and Health Operations**

Bankers Fidelity markets its policies through three distribution channels all of which utilize commissioned, independent agents. The three channels utilized include traditional independent agents, broker-agents typically interested in a specific product of Bankers Fidelity and special market agents who promote workplace, association and/or branded products.

Bankers Fidelity has implemented an agent qualification process and had 3,447 licensed agents as of December 31, 2015. The agents generally concentrate their sales activities in both the accident and health or life insurance product lines. During 2015, approximately 872 of the licensed agents wrote policies on behalf of Bankers Fidelity.

Bankers Fidelity, in an effort to motivate all of its licensed agents to market its products, offers the following: competitive products and commission structures, efficient claims service, prompt payment of commissions that vest immediately, simplified policy issuance procedures, periodic sales incentive programs and, as described below, for traditional independent agents, protected sales territories determined based on specific counties and/or zip codes.

In the traditional independent agent arrangement, Bankers Fidelity enters into contractual arrangements with various regional sales directors and general agents responsible for marketing and other sales activities, who may also, in turn, recommend appointment of other independent agents. The standard agreements set forth the commission arrangements and are terminable without cause by either party upon notice. Regional sales directors and general agents receive an override commission on sales made by their sponsored agents. Management believes utilizing experienced agents, as well as independent general agents who recruit and train their own agents, is cost effective. All independent agents are compensated primarily on a commission basis. Using independent agents also enables Bankers Fidelity to effectively expand or contract its sales force without incurring significant expense.

With the traditional independent agents, the company utilizes a lead generation system that rewards qualified agents with leads in accordance with certain production criteria. In addition, a protected territory is established for qualified agents, which entitles them to all leads produced within that territory. The territories are zip code or county based and encompass sufficient geographic territory designed to produce an economically serviceable senior population. The Company believes that offering a lead generation system solves an agent's most important dilemma -- prospecting -- and allows Bankers Fidelity to build long-term relationships with agents who view Bankers Fidelity as their primary company. In addition, management believes that Bankers Fidelity's product line is less sensitive to competitor pricing and commissions because of the perceived value of the protected territory and the lead generation system. In protected geographical areas, production per agent has historically compared favorably to unprotected areas served by the general brokerage division.

Products of Bankers Fidelity compete directly with products offered by other insurance companies, and agents may represent multiple insurance companies. Broker-agents generally are not interested in developing relationships with any one particular insurance company but are more interested in matching a specific product with the specific needs of their clients. These agents, while a source of business, do not participate in the company's lead generation system, but can qualify for other incentives that Bankers Fidelity offers to its traditional independent agents.

Bankers Fidelity also has a number of agents, some of whom belong to marketing organizations that solicit business from various groups including employers, trade associations and/or other organizations. Depending on the group's needs, these agents may target one specific product or a group of Bankers Fidelity's products to market to a group's members. These agents also do not participate in the company's lead generation system, but can also qualify for other incentives that Bankers Fidelity offers to its traditional independent agents.

## TABLE OF CONTENTS

### **Underwriting**

#### **Property and Casualty Operations**

American Southern specializes in underwriting various risks that are sufficiently large enough to establish separate class experience, relying upon the underwriting expertise of its agents.

During the course of the policy life, extensive use is made of risk management representatives to assist commercial underwriters in identifying and correcting potential loss exposures and to physically inspect new accounts. The underwriting results from each insured are reviewed on an individual basis periodically. When results are below expectations, management takes corrective action which may include adjusting rates, revising underwriting standards, adjusting commissions paid to agents, and/or altering or declining to renew accounts at expiration.

#### **Life and Health Operations**

Bankers Fidelity issues a variety of products for both life and health insurance markets, with a focus on senior life insurance products typically with small face amounts of between \$3,000 and \$50,000, and Medicare supplement insurance. The majority of its products utilize Yes or No applications that are underwritten on a non-medical basis. Bankers Fidelity offers products to all age groups; however, its primary marketing focus is the senior market which is generally defined as individuals 65 years of age or older. For life products offered to other than the senior market, Bankers Fidelity may require medical information, such as medical examinations, subject to published age guidelines and coverage limits. Approximately 89% of the annualized premiums for both life and health insurance sold during 2015 were derived from insurance written on a non-medical basis. For the senior market, Bankers Fidelity offers life products primarily on a simplified policy issue basis with coverage amounts up to \$50,000 for preferred rates, up to \$35,000 for standard rates and up to \$20,000 for graded death benefits and modified rates. Bankers Fidelity retains a maximum coverage amount of \$100,000 with respect to any individual life policy (see Reinsurance ).

Applications for insurance are reviewed to determine the face amount, age, medical history and any other necessary information. Bankers Fidelity utilizes information obtained directly from the insured, the Medical Information Bureau ( M.I.B. ), paramedical testing, and/or medical records. Bankers Fidelity may also utilize investigative services to supplement and substantiate information. For certain limited coverages, Bankers Fidelity has adopted simplified policy issuance procedures by which an application containing a variety of health related questions is submitted. For these plans, Bankers Fidelity obtains M.I.B. and prescription drug utilization reports and conducts a telephone interview, however, will generally not request paramedical testing or medical records.

#### **Policyholder and Claims Services**

The Company believes that prompt, efficient policyholder and claims services are essential to its continued success in marketing its insurance products (see Competition ). Additionally, the Company believes that its insureds are particularly sensitive to claims processing time and to the accessibility of qualified staff to answer inquiries. Accordingly, the Company's policyholder and claims services seek to offer expeditious disposition of service requests by providing toll-free access for all customers, 24-hour claim reporting services, and direct computer links with some of its largest accounts. The Company also utilizes an automatic call distribution system to ensure that inbound calls to customer service support groups are processed efficiently. Operational data generated from this system allows management to further refine ongoing client service programs and service representative training modules.

#### **Property and Casualty Operations**

American Southern controls its claims costs by utilizing an in-house staff of claims supervisors to investigate, verify, negotiate and settle claims. Upon notification of an occurrence purportedly giving rise to a claim, a claim file is established. The claims department then conducts a preliminary investigation, determines whether an insurable event has occurred and, if so, updates the file for the findings and any required reserve adjustments. Frequently, independent adjusters and appraisers are utilized to service claims which require on-site inspections.

### **Life and Health Operations**

Insureds may obtain claim forms by calling the claims department customer service group or through Bankers Fidelity's website. To shorten claim processing time, a letter detailing all supporting documents that are

TABLE OF CONTENTS

required to complete a claim for a particular policy is sent to the customer along with the correct claim form. With respect to life policies, the claim is entered into Bankers Fidelity's claims system when the proper documentation is received. Properly documented claims are generally paid within five business days of receipt. With regard to Medicare supplement policies, the claim is either directly billed to Bankers Fidelity by the provider or sent electronically through a Medicare clearing house.

**Reserves**

The following table sets forth information concerning the Company's reserves for losses and claims and reserves for loss adjustment expenses ( LAE ) for the periods indicated:

	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
Balance at January 1	\$ 66,625	\$ 63,018
Less: Reinsurance receivable on unpaid losses	(14,302 )	(14,314 )
Net balance at January 1	52,323	48,704
Incurred related to:		
Current year	99,447	104,225
Prior years <sup>(1)</sup>	(701 )	(483 )
Total incurred	98,746	103,742
Paid related to:		
Current year	68,159	72,443
Prior years	30,781	27,680
Total paid	98,940	100,123
Net balance at December 31	52,129	52,323
Plus: Reinsurance receivable on unpaid losses	11,741	14,302
Balance at December 31	\$ 63,870	\$ 66,625

<sup>(1)</sup> Favorable loss development from life and health operations for the years ended December 31, 2015 and 2014 was \$0.7 million and \$0.3 million, respectively. See Note 3 of Notes to Consolidated Financial Statements. Reserves are set by line of business within each of the subsidiaries. At December 31, 2015, approximately 80% of the reserves related to property and casualty losses and approximately 20% related to life and health losses. The Company's property and casualty operations incur losses which may take extended periods of time to evaluate and settle. Issues with respect to legal liability, actual loss quantification, legal discovery and ultimate subrogation, among other factors, may influence the initial and subsequent estimates of loss. In the property and casualty operations, the Company's general practice is to reserve at the higher end of the determined reasonable range of loss if no other value within the range is determined to be more probable. The Company's life and health operations generally incur losses which are more readily quantified. Medical claims received are recorded in case reserves based on contractual terms using the submitted billings as a basis for determination. Life claims are recorded based on contract value at the time of notification to the Company; although policy reserves related to such contracts have been previously established. Individual case reserves are established by a claims processor on each individual claim and are periodically reviewed and adjusted as new information becomes known during the course of handling a claim. Regular internal periodic reviews are also performed by management to ensure that loss reserves are established and revised timely relative to the receipt of new or additional information. Lines of business for which loss data (e.g. paid losses and case reserves)

emerge over a long period of time are referred to as long-tail lines of business. Lines of business for which loss data emerge more quickly are referred to as short-tail lines of business. The Company's long-tail line of business generally consists of its general liability coverage while the short-tail lines of business generally consist of property and automobile coverages.

The Company's actuaries regularly review reserves for both current and prior accident years using the most current claims data. These reviews incorporate a variety of actuarial methods (discussed in Critical Accounting

TABLE OF CONTENTS

Policies) and judgments and involve a disciplined analysis. For most lines of business, certain actuarial methods and specific assumptions are deemed more appropriate based on the current circumstances affecting that line of business. These selections incorporate input from claims personnel and operating management on reported loss cost trends and other factors that could affect the reserve estimates.

For long-tail lines of business, the emergence of paid losses and case reserves is less credible in the early periods, and accordingly may not be indicative of ultimate losses. For these lines, methods which incorporate a development pattern assumption are given less weight in calculating incurred but not reported ( IBNR ) reserves for the early periods of loss emergence because such a low percentage of ultimate losses are reported in that time frame. Accordingly, for any given accident year, the rate at which losses on long-tail lines of business emerge in the early periods is generally not as reliable an indication of ultimate losses as it would be for shorter-tail lines of business. The estimation of reserves for these lines of business in the early periods of loss emergence is therefore largely influenced by statistical analyses and application of prior accident years loss ratios, after considering changes to earned pricing, loss costs, mix of business, ceded reinsurance and other factors that are expected to affect the estimated ultimate losses. For later periods of loss emergence, methods which incorporate a development pattern assumption are given more weight in estimating ultimate losses. For short-tail lines of business, the emergence of paid loss and case reserves is more credible in the early periods and is more likely to be indicative of ultimate losses. The method used to set reserves for these lines of business is based upon utilization of a historical development pattern for reported losses. IBNR reserves for the current year are set as the difference between the estimated fully developed ultimate losses for each year, less the established, related case reserves and cumulative related payments. IBNR reserves for prior accident years are similarly determined, again relying on an indicated, historical development pattern for reported losses.

Based on the results of regular reserve estimate reviews, the Company determines the appropriate reserve adjustment, if any, to record in each period. If necessary, recorded reserve estimates are changed after consideration of numerous factors, including, but not limited to, the magnitude of the difference between the actuarial indication and the recorded reserves, improvement or deterioration of actuarial indication in the period, the maturity of the accident year, trends observed over the recent past and the level of volatility within a particular line of business. In general, changes are made more quickly to recognize changes in estimates to ultimate losses in mature accident years and less volatile lines of business.

Estimating case reserves and ultimate losses involves various considerations which differ according to the line of business. In addition, changes in legislative and regulatory environments may impact loss estimates. General liability claims may have a long pattern of loss emergence. Given the broad nature of potential general liability coverages, investigative time periods may be extended and questions of coverage may exist. Such uncertainties create greater imprecision in estimating required levels of loss reserves. The property and automobile lines of business generally have less variable reserve estimates than other lines. This is largely due to the coverages having relatively shorter periods of loss emergence. Estimates, however, can still vary due to a number of factors, including interpretations of frequency and severity trends. Severity trends can be impacted by changes in internal claim handling and reserving practices in addition to changes in the external environment. These changes in claim practices increase the uncertainty in the interpretation of case reserve data, which increases the uncertainty in recorded reserve levels.

Components of the Company's reserves for losses and claims by product line at December 31, 2015 were as follows:

	<b>Case</b>	<b>IBNR</b>	<b>Total</b>
		<b>(In thousands)</b>	
Business automobile	\$ 18,801	\$ 13,934	\$ 32,735
Personal automobile/physical damage	1,546	215	1,761
General & other liability	1,533	7,793	9,326

Edgar Filing: ATLANTIC AMERICAN CORP - Form 10-K

Other lines (including life)	3,847	4,520	8,367
Medicare supplement	149	9,543	9,692
Unallocated loss adjustment reserves	—	1,989	1,989
Total reserves for losses and claims	\$ 25,876	\$ 37,994	\$ 63,870

6

TABLE OF CONTENTS

The Company's policy is to record reserves for losses and claims in amounts which approximate actuarial best estimates of ultimate values. Actuarial best estimates do not necessarily represent the midpoint value determined using the various actuarial methods; however, such estimates will fall between the estimated low and high end reserve values. The range of estimates developed in connection with the December 31, 2015 actuarial review indicated that reserves could be as much as 13.8% lower or as much as 6.0% higher. In the opinion of management, recorded reserves represent the best estimate of outstanding losses, although significant judgments are made in the derivation of reserve estimates and revisions to such estimates are expected to be made in future periods. Any such revisions could be material, and may materially adversely affect the Company's financial condition and results of operations in any future period.

**Property and Casualty Operations**

American Southern maintains loss reserves representing estimates of amounts necessary for payment of losses and LAE, and which are not discounted. IBNR reserves are also maintained for future development. These loss reserves are estimates, based on known facts and circumstances at a given date, of amounts the Company expects to pay on incurred claims. All balances are reviewed periodically by the Company's independent consulting actuary. Reserves for LAE are intended to cover the ultimate costs of settling claims, including investigation and defense of any lawsuits resulting from such claims. Loss reserves for reported claims are based on a case-by-case evaluation of the type of claim involved, the circumstances surrounding the claim, and the policy provisions relating to the type of loss along with anticipated future development. The LAE for claims reported and claims not reported is based on historical statistical data and anticipated future development. Inflation and other factors which may affect claim payments are implicitly reflected in the reserving process through analysis and consideration of cost trends and reviews of historical reserve results.

American Southern establishes reserves for claims based upon: (a) management's estimate of ultimate liability and claims adjusters' evaluations of unpaid claims reported prior to the close of the accounting period, (b) estimates of IBNR claims based on past experience, and (c) estimates of LAE. If no value is determined to be more probable in estimating a loss after considering all factors, the Company's general practice is to reserve at the higher end of the determined reasonable range of loss. The estimated liability is periodically reviewed and updated, and changes to the estimated liability are recorded in the statement of operations in the period in which such changes become known.

The following table sets forth the development of reserves for unpaid losses and claims determined using generally accepted accounting principles of American Southern's insurance lines from 2005 through 2015. Specifically excluded from the table are the life and health division's claims reserves, which are included in the consolidated loss and claims reserves. The top line of the table represents the estimated cumulative amount of losses and LAE for claims arising in all prior years that were unpaid at the balance sheet date for each of the indicated periods, including an estimate of IBNR losses at the applicable date. The amounts represent initial reserve estimates at the respective balance sheet dates for the current and all prior years. The next portion of the table shows the cumulative amounts paid with respect to claims in each succeeding year. The lower portion of the table shows the re-estimated amounts of previously recorded reserves based on experience as of the end of each succeeding year.

The reserve estimates are modified as more information becomes known about the frequency and severity of claims for individual years. The cumulative redundancy for each year represents the aggregate change in such year's estimates through the end of 2015. Furthermore, the amount of the redundancy for any year represents the cumulative amount of the changes from initial reserve estimates for such year. Operations for any year may be affected, favorably or unfavorably, by the amount of the change in the estimate for such years; however, because such analysis is based on the reserves for unpaid losses and claims, before consideration of reinsurance, the total indicated redundancies may not ultimately be reflected in the Company's net income. Further, conditions and

**TABLE OF CONTENTS**

trends that have affected development of reserves in the past may not necessarily occur in the future and there could be future events or actions that impact future development which have not existed in the past. Accordingly, the accurate prediction of future redundancies based on the data in the following table is not possible.

	<b>Year Ended December 31,</b>

Note: This analysis is based on reserves for unpaid losses and claims, before consideration of reinsurance; therefore the total indicated redundancies may not ultimately be reflected in the Company's net income.

### Life and Health Operations

Bankers Fidelity establishes liabilities for future policy benefits to meet projected future obligations under outstanding policies. These reserves are calculated to satisfy policy and contract obligations as they mature. The amount of reserves for insurance policies is calculated using assumptions for interest rates, mortality and morbidity rates, expenses, and withdrawals. Reserves are adjusted periodically based on published actuarial tables with modifications to reflect actual experience. The use of significantly different assumptions, or actual results that differ significantly from our estimates, could materially adversely affect our liquidity, results of operations or financial condition. See Note 3 of Notes to Consolidated Financial Statements.

### Reinsurance

The Company's insurance subsidiaries from time to time purchase reinsurance from unaffiliated insurers and reinsurers to reduce their potential liability on individual risks and to protect against catastrophic losses. In a reinsurance transaction, an insurance company transfers, or cedes, a portion or all of its exposure on insurance policies to a reinsurer. The reinsurer assumes the exposure in return for a portion of the premiums. The ceding of insurance does not legally discharge the insurer from primary liability for the full amount of the policies written by it, and the ceding company will incur a loss if the reinsurer fails to meet its obligations under the reinsurance agreement.

## TABLE OF CONTENTS

### **Property and Casualty Operations**

American Southern's basic reinsurance treaties generally cover all claims in excess of specified per occurrence limitations. Limits per occurrence within the reinsurance treaties are as follows: Fire - \$125,000 excess of \$50,000 retention; Inland marine and commercial automobile physical damage - \$125,000 excess of \$75,000 retention; and automobile liability and general liability - excess coverage of \$2.0 million less retentions that may vary from \$100,000 to \$150,000 depending on the account. American Southern maintains a property catastrophe treaty with a \$5.7 million limit excess of \$300,000 retention. American Southern also issues individual surety bonds with face amounts generally up to \$1.5 million, and limited to \$5.0 million in aggregate per account, that are not reinsured.

### **Life and Health Operations**

Bankers Fidelity has entered into reinsurance contracts ceding the excess of its retention to several primary reinsurers. Maximum retention by Bankers Fidelity on any one individual in the case of life insurance policies is \$100,000. At December 31, 2015, \$16.8 million of the \$267.2 million of life insurance in force at Bankers Fidelity was reinsured under a mix of coinsurance and yearly renewable term agreements. Certain prior year reinsurance agreements also remain in force although they no longer provide reinsurance for new business.

### **Competition**

Competition for insurance products is based on many factors including premiums charged, terms and conditions of coverage, service provided, financial ratings assigned by independent rating agencies, claims services, reputation, perceived financial strength and the experience of the organization in the line of business being written.

### **Property and Casualty Operations**

The businesses in which American Southern engages are highly competitive. The principal areas of competition are pricing and service. Many competing property and casualty companies, which have been in business longer than American Southern, offer more diversified lines of insurance and have substantially greater financial resources. Management believes, however, that the policies it sells are competitive with those providing similar benefits offered by other insurers doing business in the states in which American Southern operates. American Southern attempts to develop strong relationships with its agents and, consequently, believes it is better positioned for new opportunities and programs with those agents.

### **Life and Health Operations**

The life and health insurance business also remains highly competitive and includes a large number of insurance companies, many of which have substantially greater financial resources than Bankers Fidelity or the Company. Bankers Fidelity offers life insurance products, Medicare supplement and other accident and health insurance products with a focus on the senior market. Bankers Fidelity believes that its primary competitors are Americo Life, GTL, Lincoln Heritage, Medico, Monumental, Mutual of Omaha, New Era, Standard Life, Transamerica and United Healthcare. Bankers Fidelity competes with these as well as other insurers on the basis of premium rates, policy benefits and service to policyholders. Bankers Fidelity also competes with other insurers to attract and retain the allegiance of its independent agents through commission and sales incentive arrangements, accessibility and marketing assistance, lead programs, reputation, and market expertise. In order to better compete, Bankers Fidelity actively seeks opportunities in niche markets, developing long-term relationships with a select number of independent marketing organizations promoting worksite marketing and selective association endorsements. Bankers Fidelity has a track record of successfully competing in its chosen markets by establishing relationships with independent agents and providing proprietary marketing initiatives as well as providing outstanding service to policyholders. Bankers Fidelity

believes that it competes effectively on the bases of policy benefits, services and market segmentation.

**Ratings**

Ratings of insurance companies are not designed for investors and do not constitute recommendations to buy, sell, or hold any security. Ratings are important measures within the insurance industry, and higher ratings should have a favorable impact on the ability of a company to compete in the marketplace.

## TABLE OF CONTENTS

Each year A.M. Best Company, Inc. ( A.M. Best ) publishes Best's Insurance Reports, which includes assessments and ratings of all insurance companies. A.M. Best's ratings, which may be revised quarterly, fall into fifteen categories ranging from A++ (Superior) to F (in liquidation). A.M. Best's ratings are based on a detailed analysis of the statutory financial condition and operations of an insurance company compared to the industry in general.

**American Southern.** American Southern Insurance Company and its wholly-owned subsidiary, American Safety Insurance Company, are each, as of the date of this report, rated A (Excellent) by A.M. Best.

**Bankers Fidelity.** Bankers Fidelity Life Insurance Company and its wholly-owned subsidiary, Bankers Fidelity Assurance Company, are each, as of the date of this report, rated A- (Excellent) by A.M. Best.

### **Regulation**

In common with all domestic insurance companies, the Company's insurance subsidiaries are subject to regulation and supervision in the jurisdictions in which they do business. Statutes typically delegate regulatory, supervisory, and administrative powers to state insurance commissioners. The method of such regulation varies, but regulation relates generally to the licensing of insurers and their agents, the nature of and limitations on investments, approval of policy forms, reserve requirements, the standards of solvency to be met and maintained, deposits of securities for the benefit of policyholders, and periodic examinations of insurers and trade practices, among other things. The Company's products generally are subject to rate regulation by state insurance commissions, which require that certain minimum loss ratios be maintained. Certain states also have insurance holding company laws which require registration and periodic reporting by insurance companies controlled by other corporations licensed to transact business within their respective jurisdictions. The Company's insurance subsidiaries are subject to such legislation and are registered as controlled insurers in those jurisdictions in which such registration is required. Such laws vary from state to state, but typically require periodic disclosure concerning the corporation which controls the registered insurers and all subsidiaries of such corporations, as well as prior notice to, or approval by, the state insurance commissioners of intercorporate transfers of assets (including payments of dividends by the insurance subsidiaries in excess of specified amounts) within the holding company system.

Most states require that rate schedules and other information be filed with the state's insurance regulatory authority, either directly or through a ratings organization with which the insurer is affiliated. The regulatory authority may disapprove a rate filing if it determines that the rates are inadequate, excessive, or discriminatory. The Company has historically experienced no significant regulatory resistance to its applications for rate adjustments; however, the Company cannot provide any assurance that it will not receive any objections to any applications in the future.

A state may require that acceptable securities be deposited for the protection either of policyholders located in those states or of all policyholders. As of December 31, 2015, securities with an amortized cost of \$11.3 million were on deposit either directly with various state authorities or with third parties pursuant to various custodial agreements on behalf of the Company's insurance subsidiaries.

Virtually all of the states in which the Company's insurance subsidiaries are licensed to transact business require participation in their respective guaranty funds designed to cover claims against insolvent insurers. Insurers authorized to transact business in these jurisdictions are generally subject to assessments of up to 4% of annual direct premiums written in that jurisdiction to pay such claims, if any. The likelihood and amount of any future assessments cannot be estimated until an insolvency has occurred.

### **NAIC Ratios**

The National Association of Insurance Commissioners (the NAIC ) was established to, among other things, provide guidelines to assess the financial strength of insurance companies for state regulatory purposes. The NAIC conducts annual reviews of the financial data of insurance companies primarily through the application of 13 financial ratios prepared on a statutory basis. The annual statements are submitted to state insurance departments to assist them in monitoring insurance companies in their state and to set forth a desirable range in which companies should fall in each such ratio.

The NAIC suggests that insurance companies which fall outside of the usual range in four or more financial ratios are those most likely to require analysis by state regulators. However, according to the NAIC, it may not be unusual for a financially sound company to have several ratios outside the usual range.

TABLE OF CONTENTS

For the year ended December 31, 2015, American Southern and Bankers Fidelity Life Insurance Company were both individually within the NAIC usual range for all 13 financial ratios.

**Risk-Based Capital**

Risk-based capital ( RBC ) is a metric used by ratings agencies and regulators as an early warning tool to identify weakly capitalized companies for the purpose of initiating further regulatory action. The RBC calculation determines the amount of adjusted capital needed by a company to avoid regulatory action. Authorized Control Level Risk-Based Capital ( ACL ) is calculated, and if a company s adjusted capital is 200% or lower than ACL, it is subject to regulatory action. At December 31, 2015, the Company s insurance subsidiaries exceeded the RBC regulatory levels.

**Investments**

Investment income represents a significant portion of the Company s operating and total income. Insurance company investments are subject to state insurance laws and regulations which limit the concentration and types of investments. The following table provides information on the Company s investments as of the dates indicated.

	<b>December 31,</b>			
	<b>2015</b>		<b>2014</b>	
	<b>Amount</b>	<b>Percent</b>	<b>Amount</b>	<b>Percent</b>
	<b>(Dollars in thousands)</b>			
Fixed maturities:				
U.S. Treasury securities and obligations of U.S. Government agencies and authorities	\$ 22,234	9.4 %	\$ 33,898	14.1 %
States, municipalities and political subdivisions	25,479	10.7	11,459	4.8
Public utilities	8,602	3.6	8,101	3.4
All other corporate bonds	148,563	62.3	160,630	66.8
Redeemable preferred stock	446	0.2	800	0.3
Total fixed maturities <sup>(1)</sup>	205,324	86.2	214,888	89.4
Common and non-redeemable preferred stocks <sup>(2)</sup>	23,131	9.7	18,924	7.9
Policy loans <sup>(3)</sup>	2,200	0.9	2,202	0.9
Other invested assets <sup>(4)</sup>	6,454	2.7	2,995	1.3
Real estate	38	0.0	38	0.0
Investments in unconsolidated trusts	1,238	0.5	1,238	0.5
Total investments	\$ 238,385	100.0 %	\$ 240,285	100.0 %

(1) Fixed maturities are carried on the balance sheet at estimated fair value. Certain fixed maturities do not have publicly quoted prices, and are carried at estimated fair value as determined by management. Total adjusted cost of fixed maturities was \$210.5 million as of December 31, 2015 and \$207.6 million as of December 31, 2014.

(2) Equity securities are carried on the balance sheet at estimated fair value. Total adjusted cost of equity securities was \$11.0 million as of December 31, 2015 and \$12.0 million as of December 31, 2014.

(3) Policy loans are valued at historical cost.

(4) Other invested assets are accounted for using the equity method. Total adjusted cost of other invested assets was \$6.5 million as of December 31, 2015 and \$3.0 million as of December 31, 2014.

Estimated fair values are determined as discussed in Note 1 of Notes to Consolidated Financial Statements.

**TABLE OF CONTENTS**

Results of the Company's investment portfolio for periods shown were as follows:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(Dollars in thousands)</b>	
Average investments <sup>(1)</sup>	\$ 244,316	\$ 246,508
Net investment income	9,533	9,831
Average yield on investments	3.9 %	4.0 %
Realized investment gains, net	4,857	1,571

(1) Calculated as the average of cash and investment balances (at amortized cost) at the beginning of the year and at the end of each of the succeeding four quarters.

Management's recent investment strategy has been a continued focus on quality, diversification and higher yielding corporate bonds and preferred stocks; but at the same time shortening up on maturities to give recognition to the rise and potential future increases in longer-term interest rates.

**Employees**

The Company and its subsidiaries employed 147 people at December 31, 2015. Of the 147 people employed at December 31, 2015, 142 were full-time.

**Financial Information by Industry Segment**

Each of American Southern and Bankers Fidelity operate with relative autonomy and each company is evaluated on its individual performance. American Southern operates in the property and casualty insurance market, while Bankers Fidelity operates in the life and health insurance market. Each segment derives revenue from the collection of premiums, as well as from investment income. Substantially all revenue other than that in the corporate and other segment is from external sources. See Note 13 of Notes to Consolidated Financial Statements.

**Available Information**

The Company files annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, amendments to those reports and other information with the Securities and Exchange Commission (the "SEC"). The public can read and obtain copies of those materials by visiting the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains reports, proxy and information statements and other information regarding issuers like the Company that file electronically with the SEC. The address of the SEC's web site is [www.sec.gov](http://www.sec.gov). In addition, as soon as reasonably practicable after such materials are filed with or furnished to the SEC by the Company, the Company makes copies available to the public, free of charge, on or through its web site at [www.atlam.com](http://www.atlam.com). Neither the Company's website, nor the information appearing on the website, is included, incorporated into, or a part of, this report.

**Executive Officers of the Registrant**

The table below and the information following the table set forth, for each executive officer of the Company as of December 31, 2015, his name, age, positions with the Company and business experience for the past five years, as well as any prior service to the Company.

<b>Name</b>	<b>Age</b>	<b>Positions with the Company</b>	<b>Director or Officer Since</b>
Hilton H. Howell, Jr.	53	Chairman of the Board, President & CEO	1992
John G. Sample, Jr.	59	Senior Vice President, CFO and Secretary	2002

Officers are elected annually and serve at the discretion of the board of directors.

**Mr. Howell** has been President and Chief Executive Officer of the Company since May 1995, and prior thereto served as Executive Vice President of the Company from October 1992 to May 1995. He has been a Director of the Company since October 1992 and effective February 24, 2009, began serving as Chairman of the board of directors. He is also a director, and serves as chief executive officer, of Gray Television, Inc.

## TABLE OF CONTENTS

**Mr. Sample** has served as Senior Vice President and Chief Financial Officer of the Company since July 2002 and Secretary since May 2010. Prior to joining the Company in July 2002, he had been a partner of Arthur Andersen LLP since 1990. Mr. Sample is also a director of 1st Franklin Financial Corporation and Capital City Bank Group, Inc.

### **Forward-Looking Statements**

Certain of the statements contained herein are forward-looking statements within the meaning of the federal securities laws. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Exchange Act of 1933, and Section 21E of the Securities Exchange Act of 1934, and include estimates and assumptions related to, among other things, general economic, competitive, operational and legislative developments. The forward-looking statements are subject to changes and uncertainties which are, in many instances, beyond the Company's control and have been made based upon management's current expectations and beliefs concerning future developments and their potential effect upon the Company. There can be no assurance that future developments will be in accordance with management's expectations or that the effect of future developments on the Company will be those anticipated by management. Actual results could differ materially from those expected by the Company, depending on the occurrence or outcome of various factors. These factors include, among others: significant changes in general economic conditions; disruption to the financial markets; unanticipated increases in the rate, number and amounts of claims outstanding; the possible occurrence of terrorist attacks; the level of performance of reinsurance companies under reinsurance contracts and the availability, pricing and adequacy of reinsurance to protect the Company against losses; changes in the stock markets, interest rates or other financial markets, including the potential effect on the Company's statutory capital levels; the uncertain effect on the Company of regulatory and market-driven changes in practices relating to the payment of incentive compensation to brokers, agents and other producers; the incidence and severity of catastrophes, both natural and man-made; stronger than anticipated competitive activity; unfavorable judicial or legislative developments; the potential effect of regulatory developments, including those which could increase the Company's business costs and required capital levels; the Company's ability to distribute its products through distribution channels, both current and future; the uncertain effect of emerging claim and coverage issues; the effect of assessments and other surcharges for guaranty funds and other mandatory pooling arrangements; and risks related to cybersecurity matters, such as breaches of our computer network or the loss of unauthorized access to the data we maintain. Many of such factors are beyond the Company's ability to control or predict. As a result, the Company's actual financial condition and results of operations could differ materially from those expressed in any forward-looking statements made by the Company. Undue reliance should not be placed upon forward-looking statements contained herein. The Company does not intend to publicly update any forward-looking statements that may be made from time to time by, or on behalf of, the Company.

#### **Item 1A. Risk Factors**

As a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and in Item 10(f)(1) of Regulation S-K (a smaller reporting company), we have elected to comply with certain scaled disclosure reporting obligations, and therefore do not have to provide the information required by this Item.

#### **Item 1B. Unresolved Staff Comments**

Not applicable.

#### **Item 2. Properties**

**Leased Properties.** The Company leases space for its principal offices and for some of its insurance operations in an office building located in Atlanta, Georgia, from Delta Life Insurance Company under a lease which continues until either party provides written notice of cancellation at least twelve months in advance of the actual termination date. The lease, which commenced on November 1, 2007, provides for rent adjustments on every fifth anniversary of the commencement date. Under the current terms of the lease, the Company occupies approximately 49,586 square feet of

office space. Delta Life Insurance Company, the owner of the building, is controlled by an affiliate of the Company. The terms of the lease are believed by Company management to be comparable to terms which could be obtained by the Company from unrelated parties for comparable rental property.

TABLE OF CONTENTS

American Southern leases space for its office in a building located in Atlanta, Georgia. The lease term expires May 31, 2019. Under the terms of the lease, American Southern occupies approximately 17,014 square feet.

The Company believes that its current properties are in good condition, and are sufficient for the operations of its business.

**Item 3. Legal Proceedings**

From time to time, the Company and its subsidiaries are, and expect to continue to be, involved in various claims and lawsuits arising in the ordinary course of business, both as a liability insurer defending third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The Company accounts for such exposures through the establishment of loss and loss adjustment expense reserves. We do not expect that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for probable losses and costs of defense, will be material to the Company's consolidated financial condition, although the results of such litigation could be material to the consolidated results of operations for any given period.

**Item 4. Mine Safety Disclosures**

Not applicable.

TABLE OF CONTENTS**PART II****Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities**

The Company's common stock is quoted on the Nasdaq Global Market (Symbol: AAME). As of March 15, 2016, there were 3,083 shareholders of record. The following table sets forth, for the periods indicated, the high and low sales prices of the Company's common stock as reported on the Nasdaq Global Market.

<b>Year Ended December 31,</b>	<b>High</b>	<b>Low</b>
2015		
1 <sup>st</sup> quarter	\$ 4.08	\$ 3.75
2 <sup>nd</sup> quarter	4.00	3.09
3 <sup>rd</sup> quarter	4.05	3.30
4 <sup>th</sup> quarter	5.00	3.76
2014		
1 <sup>st</sup> quarter	\$ 4.13	\$ 3.50
2 <sup>nd</sup> quarter	4.02	3.23
3 <sup>rd</sup> quarter	4.38	3.63
4 <sup>th</sup> quarter	4.05	3.50

During 2015, the Company paid an annual cash dividend of \$0.02 per share. In addition, on March 1, 2016, the Company's board of directors declared an annual cash dividend of \$0.02 per share that is payable to shareholders of record as of the close of business on April 11, 2016. Payment of dividends in the future will be at the discretion of the Company's board of directors and will depend upon the financial condition, capital requirements, earnings of the Company, any restrictions contained in any agreements by which the Company is bound, as well as other factors as the board of directors may deem relevant. The Company's primary recurring source of cash for the payment of dividends is dividends from its subsidiaries; although as of December 31, 2015, the Parent held unrestricted cash and investment balances of approximately \$23.5 million. Under the insurance code of the state in which each insurance subsidiary is domiciled, dividend payments to the Company by its insurance subsidiaries are subject to certain limitations without the prior approval of the applicable state's Insurance Commissioner. In 2016, dividend payments to the Parent by the insurance subsidiaries in excess of \$6.1 million would require prior approval.

**Issuer Purchases of Equity Securities**

On May 6, 2014, the board of directors of the Company approved a plan that allows for the repurchase of up to 750,000 shares of the Company's common stock (the "Repurchase Plan") on the open market or in privately negotiated transactions, as determined by an authorized officer of the Company. Any such repurchases can be made from time to time in accordance with applicable securities laws and other requirements.

The table below sets forth information regarding repurchases by the Company of shares of its common stock on a monthly basis during the three month period ended December 31, 2015.

<b>Period</b>	<b>Total Number of Shares Purchased</b>	<b>Average Price Paid per Share</b>	<b>Total Number of Shares Purchased as Part of</b>	<b>Maximum Number of Shares that May Yet be Purchased</b>
---------------	---	---	--	---

				<b>Publicly Announced Plans or Programs</b>	<b>Under the Plans or Programs</b>
October 1 – October 31, 2015	14,900	\$	4.35	14,900	326,493
November 1 – November 30, 2015	110,837		4.54	110,837	215,656
December 1 – December 31, 2015	14,373		4.84	14,373	201,283
<b>Total</b>	140,110	\$	4.55	140,110	

Other than pursuant to the Repurchase Plan, no purchases of common stock of the Company were made by or on behalf of the Company during the periods described above.

## TABLE OF CONTENTS

### **Stock Performance Graph**

As a smaller reporting company, we have elected to comply with certain scaled disclosure reporting obligations, and therefore do not have to provide the information required by this Item.

### **Item 6. Selected Financial Data**

As a smaller reporting company, we have elected to comply with certain scaled disclosure reporting obligations, and therefore do not have to provide the information required by this Item.

### **Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following is management's discussion and analysis of the financial condition and results of operations of Atlantic American Corporation (Atlantic American or the Parent) and its subsidiaries (collectively with the Parent, the Company) for the years ended December 31, 2015 and 2014. This discussion should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere herein.

Atlantic American is an insurance holding company whose operations are conducted primarily through its insurance subsidiaries: American Southern Insurance Company and American Safety Insurance Company (together known as American Southern) in the property and casualty insurance industry, and Bankers Fidelity Life Insurance Company and Bankers Fidelity Assurance Company (together known as Bankers Fidelity) in the life and health insurance industry. Each operating company is managed separately, offers different products and is evaluated on its individual performance.

### **Critical Accounting Policies**

The accounting and reporting policies of the Company are in accordance with accounting principles generally accepted in the United States of America (GAAP) and, in management's belief, conform to general practices within the insurance industry. The following is an explanation of the Company's accounting policies and the resultant estimates considered most significant by management. These accounting policies inherently require significant judgment and assumptions and actual operating results could differ significantly from management's estimates determined using these policies. Atlantic American does not expect that changes in the estimates determined using these policies will have a material effect on the Company's financial condition or liquidity, although changes could have a material effect on its consolidated results of operations.

*Unpaid loss and loss adjustment expenses* comprised 30% of the Company's total liabilities at December 31, 2015. This liability includes estimates for: 1) unpaid losses on claims reported prior to December 31, 2015, 2) future development on those reported claims, 3) unpaid ultimate losses on claims incurred prior to December 31, 2015 but not yet reported and 4) unpaid loss adjustment expenses for reported and unreported claims incurred prior to December 31, 2015. Quantification of loss estimates for each of these components involves a significant degree of judgment and estimates may vary, materially, from period to period. Estimated unpaid losses on reported claims are developed based on historical experience with similar claims by the Company. Development on reported claims, estimates of unpaid ultimate losses on claims incurred prior to December 31, 2015 but not yet reported, and estimates of unpaid loss adjustment expenses are developed based on the Company's historical experience, using actuarial methods to assist in the analysis. The Company's actuaries develop ranges of estimated development on reported and unreported claims as well as loss adjustment expenses using various methods, including the paid-loss development method, the reported-loss development method, the paid Bornhuetter-Ferguson method and the reported Bornhuetter-Ferguson method. Any single method used to estimate ultimate losses has inherent advantages and disadvantages due to the trends and changes affecting the business environment and the Company's administrative policies. Further, external factors, such as legislative changes, medical cost inflation, and others may directly or indirectly impact the relative adequacy of liabilities for unpaid losses and loss adjustment expenses. The Company's

approach is to select an estimate of ultimate losses based on comparing results of a variety of reserving methods, as opposed to total reliance on any single method. Unpaid loss and loss adjustment expenses are reviewed periodically for significant lines of business, and when current results differ from the original assumptions used to develop such estimates, the amount of the Company's recorded liability for unpaid loss and loss adjustment expenses is adjusted. In the event the Company's actual reported losses in any period are materially in excess of the previously estimated amounts, such losses, to the extent reinsurance coverage does not exist, could have a material adverse effect on the Company's results of operations.

TABLE OF CONTENTS

*Future policy benefits* comprised 34% of the Company's total liabilities at December 31, 2015. These liabilities relate primarily to life insurance products and are based upon assumed future investment yields, mortality rates, and withdrawal rates after giving effect to possible risks of adverse deviation. The assumed mortality and withdrawal rates are based upon the Company's experience. If actual results differ from the initial assumptions, the amount of the Company's recorded liability could require adjustment.

*Deferred acquisition costs* comprised 9% of the Company's total assets at December 31, 2015. Deferred acquisition costs are commissions, premium taxes, and other costs that vary with and are primarily related to the acquisition of new and renewal business and are generally deferred and amortized. The deferred amounts are recorded as an asset on the balance sheet and amortized to expense in a systematic manner. Traditional life insurance and long-duration health insurance deferred policy acquisition costs are amortized over the estimated premium-paying period of the related policies using assumptions consistent with those used in computing the related liability for policy benefit reserves. Deferred acquisition costs for property and casualty insurance and short-duration health insurance are amortized over the effective period of the related insurance policies. Deferred policy acquisition costs are expensed when such costs are deemed not to be recoverable from future premiums (for traditional life and long-duration health insurance) and from the related unearned premiums and investment income (for property and casualty and short-duration health insurance). Assessments of recoverability for property and casualty and short-duration health insurance are extremely sensitive to the estimates of a subsequent year's projected losses related to the unearned premiums. Projected loss estimates for a current block of business for which unearned premiums remain to be earned may vary significantly from the indicated losses incurred in any previous calendar year.

*Receivables* are amounts due from reinsurers, insureds and agents, and any sales of investment securities not yet settled, and comprised 8% of the Company's total assets at December 31, 2015. Insured and agent balances are evaluated periodically for collectibility. Annually, the Company performs an analysis of the creditworthiness of the reinsurers with whom the Company contracts using various data sources. Failure of reinsurers to meet their obligations due to insolvencies, disputes or otherwise could result in uncollectible amounts and losses to the Company. Allowances for uncollectible amounts are established, as and when a loss has been determined probable, against the related receivable. Losses are recognized by the Company when determined on a specific account basis and a general provision for loss is made based on the Company's historical experience.

*Cash and investments* comprised 81% of the Company's total assets at December 31, 2015. Substantially all of the Company's investments are in bonds and common and preferred stocks, the values of which are subject to significant market fluctuations. The Company carries all fixed maturities, which includes bonds and redeemable preferred stocks, and equity securities, which includes common and non-redeemable preferred stocks, as available for sale and, accordingly, at their estimated fair values. The Company owns certain fixed maturities that do not have publicly quoted values, but had an estimated fair value as determined by management of \$2.2 million at December 31, 2015. Such values inherently involve a greater degree of judgment and uncertainty and therefore ultimately greater price volatility than the value of securities with publicly quoted market values. On occasion, the value of an investment may decline to a value below its amortized purchase price and remain at such value for an extended period of time. When an investment's indicated fair value has declined below its cost basis for a period of time, the Company evaluates such investment for an other than temporary impairment. The evaluation for an other than temporary impairment is a quantitative and qualitative process, which is subject to risks and uncertainties in the determination of whether declines in the fair value of investments are other than temporary. Potential risks and uncertainties include, among other things, changes in general economic conditions, an issuer's financial condition or near term recovery prospects and the effects of changes in interest rates. In evaluating a potential impairment, the Company considers, among other factors, management's intent and ability to hold the securities until price recovery, the nature of the investment and the expectation of prospects for the issuer and its industry, the status of an issuer's continued satisfaction of its obligations in accordance with their contractual terms, and management's expectation as to the issuer's ability and intent to continue to do so, as well as ratings actions that may affect the issuer's credit status. If an other than temporary

impairment is deemed to exist, then the Company will write down the amortized cost basis of the investment to its estimated fair value. While any such write down does not impact the reported value of the investment in the Company's balance sheet, it is reflected as a realized investment loss in the Company's consolidated statements of operations in the period incurred.

TABLE OF CONTENTS

The Company determines the fair values of certain financial instruments based on the fair value hierarchy established in Accounting Standards Codification ( ASC ) 820-10-20, *Fair Value Measurements and Disclosures* ( ASC 820-10-20 ). The fair values of fixed maturities and equity securities are largely determined by either independent methods prescribed by the National Association of Insurance Commissioners, which do not differ materially from nationally quoted market prices, when available, or independent broker quotations. See Note 2 and Note 14 of the accompanying notes to consolidated financial statements with respect to assets and liabilities carried at fair value and information about the inputs used to value those financial instruments, by hierarchy level, in accordance with ASC 820-10-20.

*Deferred income taxes* reflect the effect of temporary differences between assets and liabilities that are recognized for financial reporting purposes and the amounts that are recognized for tax purposes. These deferred income taxes are measured by applying currently enacted tax laws and rates. Valuation allowances are recognized to reduce the deferred tax asset to the amount that is deemed more likely than not to be realized. In assessing the likelihood of realization, management considers estimates of future taxable income and tax planning strategies.

Refer to Note 1 of Notes to Consolidated Financial Statements for details regarding the Company's significant accounting policies.

**Overall Corporate Results**

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
<b>Revenue</b>		
Property and Casualty:		
American Southern	\$ 59,497	\$ 57,636
Life and Health:		
Bankers Fidelity	105,869	107,046
Corporate and Other	571	1,639
Total revenue	\$ 165,937	\$ 166,321
<b>Income (loss) before income taxes</b>		
Property and Casualty:		
American Southern	\$ 6,642	\$ 5,012
Life and Health:		
Bankers Fidelity	6,746	5,153
Corporate and Other	(7,680 )	(5,261 )
<b>Income before income taxes</b>	<b>\$ 5,708</b>	<b>\$ 4,904</b>
<b>Net income</b>	<b>\$ 4,388</b>	<b>\$ 4,430</b>

Management also considers and evaluates performance by analyzing the non-GAAP measure operating income, and believes it is a useful metric for investors, potential investors, securities analysts and others because it isolates the core operating results of the Company before considering certain items that are either beyond the control of management (such as taxes, which are subject to timing, regulatory and rate changes depending on the timing of the associated revenues and expenses) or are not expected to regularly impact the Company's operational results (such as any realized investment and other gains, which are not a part of the Company's primary operations and are, to an extent, subject to discretion in terms of timing of realization).

TABLE OF CONTENTS

A reconciliation of net income to operating income is as follows:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
<b>Reconciliation of Net Income to non-GAAP Measurement</b>		
Net income	\$ 4,388	\$ 4,430
Income tax expense	1,320	474
Realized investment gains, net	(4,857 )	(1,571 )
Gain on purchase of debt securities <sup>(1)</sup>	—	(750 )
Operating income	\$ 851	\$ 2,583

<sup>(1)</sup> Gain from the purchase of \$7.5 million of the Company's junior subordinated deferrable interest debentures ( Junior Subordinated Debentures ). See Note 6 of Notes to Consolidated Financial Statements.

On a consolidated basis, the Company had net income of \$4.4 million, or \$0.19 per diluted share, in each of 2015 and 2014. Operating income was \$0.9 million in 2015 compared to \$2.6 million in 2014. The decrease in operating income during 2015 was primarily attributable to less favorable loss experience and a decrease in premium revenue in the life and health operations coupled with a decline in investment income from lower average yields on the Company's investments in fixed maturities. Also contributing to the decrease in operating income was an increase in other expense of \$1.4 million due to increased legal and consulting fees. Partially offsetting the decrease in operating income during 2015 was the reduction in interest expense from the decrease in the outstanding balance of the Company's Junior Subordinated Debentures as well as increased profitability in the property and casualty operations.

Total revenue was \$165.9 million in 2015 as compared to \$166.3 million in 2014. Premium revenue decreased to \$150.9 million in 2015 from \$153.5 million in 2014. The decrease in premium revenue was primarily attributable to a decrease in Medicare supplement business in the life and health operations resulting from a decline in both first year and renewal premiums. Also included in total revenue were net realized investment gains of \$4.9 million in 2015 compared to net realized investment gains of \$1.6 million in 2014. The magnitude of realized investment gains and losses in any year is a function of the timing of trades of investments relative to the markets themselves as well as the recognition of any other than temporary impairments on investments.

Total expenses were \$160.2 million in 2015 as compared to \$161.4 million in 2014. As a percentage of premiums, insurance benefits and losses incurred and commissions and underwriting expenses were 95.8% in both 2015 and 2014.

A more detailed analysis of the operating companies and other corporate activities follows.

TABLE OF CONTENTS**UNDERWRITING RESULTS****American Southern**

The following table summarizes, for the periods indicated, American Southern's premiums, losses, expenses and underwriting ratios:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(Dollars in thousands)</b>	
Gross written premiums	\$ 60,562	\$ 56,165
Ceded premiums	(4,951 )	(5,847 )
Net written premiums	\$ 55,611	\$ 50,318
Net earned premiums	\$ 54,508	\$ 52,654
Net losses and loss adjustment expenses	35,046	38,179
Underwriting expenses	17,809	14,445
Underwriting income	\$ 1,653	\$ 30
Loss ratio	64.3 %	72.5 %
Expense ratio	32.7	27.4
Combined ratio	97.0 %	99.9 %

Gross written premiums at American Southern increased \$4.4 million, or 7.8%, during 2015 as compared to 2014. The increase in gross written premiums was primarily attributable to an increase of \$2.3 million in automobile physical damage written premiums resulting from two programs as well as an increase in surety business of \$2.5 million from an existing agency. Also contributing to the increase in gross written premiums was a \$0.7 million increase from a new private passenger automobile liability program which began in 2015. Offsetting the increases in gross written premiums in 2015 was a decrease of \$1.0 million in the commercial automobile liability line of business due primarily to the cancellation of an agency in 2014. In 2015, American Southern's five principal states in terms of written premiums were Alabama, Florida, Georgia, South Carolina, and Tennessee, which accounted for approximately 72% of total written premiums for 2015. American Southern's five principal states in terms of written premiums in 2014 were Alabama, Florida, Georgia, South Carolina, and Texas, which then accounted for approximately 70% of the total written premiums.

Ceded premiums decreased \$0.9 million, or 15.3%, during 2015 as compared to 2014. American Southern's ceded premiums are determined as a percentage of earned premiums and generally increase or decrease as earned premiums increase or decrease. However, the change in ceded premiums was disproportionate to the increase in earned premiums due primarily to a decrease in earned premiums from certain commercial automobile liability accounts cancelled in 2014, which had been subject to reinsurance. Commercial automobile liability business, when reinsured, generally has higher contractual reinsurance cession rates than other lines of business and therefore changes in earned premiums in this line of business, when reinsured and significant, may impact the overall ratio of premiums ceded to premiums earned as in the 2014 period.

The following table summarizes, for the periods indicated, American Southern's net earned premiums by line of business:

**Year Ended December 31,**

	<b>2015</b>	<b>2014</b>
	<b>(In thousands)</b>	
Automobile liability	\$ 24,786	\$ 26,438
Automobile physical damage	13,290	11,633
General liability	3,152	3,577
Surety	9,192	7,309
Other lines	4,088	3,697
Total	\$ 54,508	\$ 52,654

## TABLE OF CONTENTS

Net earned premiums increased \$1.9 million, or 3.5%, during 2015 as compared to 2014. The increase in net earned premiums was primarily attributable to increases in automobile physical damage and surety earned premiums from both new and existing programs. Partially offsetting the increase in net earned premiums was the decrease in commercial automobile liability earned premiums due primarily to an agency cancellation. Premiums are earned ratably over their respective policy terms, and therefore premiums earned in the current year are related to policies written during both the current year and immediately preceding year.

The performance of an insurance company is often measured by its combined ratio. The combined ratio represents the percentage of losses, loss adjustment expenses and other expenses that are incurred for each dollar of premium earned by the company. A combined ratio of under 100% represents an underwriting profit while a combined ratio of over 100% indicates an underwriting loss. The combined ratio is divided into two components, the loss ratio (the ratio of losses and loss adjustment expenses incurred to premiums earned) and the expense ratio (the ratio of expenses incurred to premiums earned).

Net losses and loss adjustment expenses at American Southern decreased \$3.1 million, or 8.2%, during 2015 as compared to 2014. As a percentage of premiums, net losses and loss adjustment expenses were 64.3% in 2015 compared to 72.5% in 2014. The decrease in the loss ratio was due to more favorable loss experience in the automobile and surety lines of business and was primarily attributable to actions taken in prior years to better rationalize American Southern's book of business and to strengthen guidelines with respect to new and renewal business.

Underwriting expenses increased \$3.4 million, or 23.3%, during 2015 as compared to 2014. As a percentage of premiums, underwriting expenses were 32.7% in 2015 compared to 27.4% in 2014. The increase in the expense ratio was primarily due to American Southern's variable commission structure, which compensates the company's agents in relation to the loss ratios of the business they write. During periods in which the loss ratio decreases, commissions and underwriting expenses will generally increase, and conversely, during periods in which the loss ratio increases, commissions and underwriting expenses will generally decrease. In 2015, these commission accruals at American Southern increased \$2.7 million as compared to 2014 due to more favorable loss experience.

In establishing reserves, American Southern initially reserves for losses at the higher end of the reasonable range if no other value within the range is determined to be more probable. Selection of such an initial loss estimate is an attempt by management to give recognition that initial claims information received generally is not conclusive with respect to legal liability, is generally not comprehensive with respect to magnitude of loss and generally, based on historical experience, will develop more adversely as time passes and more information becomes available. However, as a result, American Southern generally experiences reserve redundancies when analyzing the development of prior year losses in a current period. At December 31, 2015, the range of estimates developed in connection with the loss reserves for American Southern indicated that reserves could be as much as 16.0% lower or as much as 6.3% higher. Development from prior years' reserves has historically reduced the current year loss ratio; however, such reduction in the current year loss ratio is generally offset by the reserves established in the current year for current period losses. American Southern's estimated net reserve redundancies for the years ended December 31, 2015 and 2014 were less than \$0.1 million and \$0.2 million, respectively. To the extent reserve redundancies vary between years, there is an incremental impact on the results of operations of American Southern and the Company. The indicated redundancy in 2015 was \$0.1 million less than that in 2014. After considering the impact on contingent commissions and other related accruals, the \$0.1 million decrease in the redundancy resulted in a decrease in income from operations before tax of approximately \$0.1 million in 2015 as compared to 2014. Management believes that such differences will continue in future periods but is unable to determine if or when incremental redundancies will increase or decrease, until the underlying losses are ultimately settled.

Contingent commissions, if contractually applicable, are ultimately payable to agents based on the underlying profitability of a particular insurance contract or a group of insurance contracts, and are periodically evaluated and accrued as earned. Approximately 60% of American Southern's earned premium provides for contractual commission arrangements which compensate the company's agents in relation to the loss ratios of the business they write. By structuring its business in this manner, American Southern provides its agents with an economic incentive to place profitable business with American Southern. In periods in which loss reserves reflect

TABLE OF CONTENTS

favorable development from prior years reserves, there is generally a highly correlated increase in commission expense also related to the prior year business. Accordingly, favorable loss development from prior years, while anticipated to continue in future periods, is not an indicator of significant additional profitability in the current year.

**Bankers Fidelity**

The following summarizes, for the periods indicated, Bankers Fidelity's premiums, losses and expenses:

	<b>Year Ended December 31,</b>	
	<b>2015</b>	<b>2014</b>
	<b>(Dollars in thousands)</b>	
Medicare supplement	\$ 81,068	\$ 85,197
Other health products	4,862	4,750
Life insurance	10,454	10,887
Total earned premiums	96,384	100,834
Insurance benefits and losses	66,318	68,016
Underwriting expenses	32,805	33,877
Total expenses	99,123	101,893
Underwriting loss	\$ (2,739 )	\$ (1,059 )
Loss ratio	68.8 %	67.5 %
Expense ratio	34.0	33.6
Combined ratio	102.8 %	101.1 %

Premium revenue at Bankers Fidelity decreased \$4.5 million, or 4.4%, during 2015 as compared to 2014. Premiums from the Medicare supplement line of business decreased \$4.1 million, or 4.8%, in 2015 as compared to 2014, due primarily to a decline in both first year and renewal premiums. Other health product premiums increased \$0.1 million, or 2.4%, during 2015 as compared to 2014, primarily as a result of new sales of the company's group health products. Premiums from the life insurance line of business decreased \$0.4 million, or 4.0%, in 2015 from 2014 due to the redemption and settlement of existing policy obligations exceeding the level of new sales activity. In both 2015 and 2014, the company's five principal states in terms of premium revenue were Georgia, Indiana, Ohio, Pennsylvania, and Tennessee, which accounted for approximately 43% and 44% of total premiums for 2015 and 2014, respectively.

Benefits and losses decreased \$1.7 million, or 2.5%, during 2015 as compared to 2014. As a percentage of premiums, benefits and losses were 68.8% in 2015 compared to 67.5% in 2014. The increase in the loss ratio was primarily attributable to the company's initiative to moderate price increases in Medicare supplement product offerings in certain competitive markets.

Underwriting expenses decreased \$1.1 million, or 3.2%, during 2015 as compared to 2014. As a percentage of earned premiums, these expenses were 34.0% in 2015 compared to 33.6% in 2014. The slight increase in the expense ratio was primarily due to earned premiums decreasing at a higher rate than the decrease in underwriting expenses.

**Investment Income and Realized Gains**

Investment income decreased \$0.3 million, or 2.7%, in 2015 as compared to 2014. The decrease in investment income was primarily attributable to a decrease in the average yield on the Company's investments in fixed maturities.

The Company had net realized investment gains of \$4.9 million in 2015 compared to net realized investment gains of \$1.6 million in 2014. The net realized investment gains in 2015 were primarily attributable to a \$3.2 million gain from the sale of property held within two of the Company's real estate partnership investments as well as gains from the sale of a number of the Company's investments in fixed maturities. The net realized investment gains in 2014 resulted from the disposition of several of the Company's investments in

## TABLE OF CONTENTS

fixed maturities. During 2014, the Company recorded investment impairments due to other than temporary declines in values of \$0.2 million on certain of its investments in non-redeemable preferred stocks. While the impairments did not impact the carrying value of the investments, they resulted in realized losses which reduced reported realized investment gains. There were no impairments recorded in 2015. Management continually evaluates the Company's investment portfolio and, as may be determined to be appropriate, makes adjustments for impairments and/or will divest investments. See Note 2 of Notes to Consolidated Financial Statements.

### **Interest Expense**

Interest expense decreased \$0.2 million, or 11.1%, in 2015 as compared to 2014 due to a decrease in the outstanding amount of Junior Subordinated Debentures. On August 4, 2014, the Company acquired \$7.5 million of its then outstanding Junior Subordinated Debentures, which decreased the outstanding balance to \$33.7 million and resulted in lower prospective interest expense.

### **Other Expenses**

Other expenses (commissions, underwriting expenses, and other expenses) increased \$3.8 million, or 7.1%, in 2015 as compared to 2014. The increase in other expenses was primarily attributable to an increase of \$2.7 million in commission accruals at American Southern due to more favorable loss experience. The majority of American Southern's business is structured in a way that agents are compensated based upon the loss ratios of the business they place with the company. During periods in which the loss ratio decreases, commissions and underwriting expenses will generally increase, and conversely, during periods in which the loss ratio increases, commissions and underwriting expenses will generally decrease. Also contributing to the increase in other expense during 2015 was an increase in legal and consulting fees of \$1.4 million. Further, agent lead expense in the life and health operations increased \$1.1 million resulting from increased lead investment. Partially offsetting the increases in other expenses was a decrease in general advertising and other agency related expenses as well as a decrease in actuarial consulting fees in the life and health operations. As a percentage of earned premiums, other expenses were 38.1% in 2015 as compared with 34.9% in 2014. The increase in the expense ratio was primarily due to the increase in commission accruals at American Southern as well as the increased legal and consulting fees both discussed previously.

### **Income Taxes**

The primary differences between the effective tax rate and the federal statutory income tax rate for 2015 resulted from the dividends-received deduction ( DRD ) and the small life insurance company deduction ( SLD ). The current estimated DRD is adjusted as underlying factors change and can vary from estimates based on, but not limited to, actual distributions from investments as well as the amount of the Company's taxable income. The SLD varies in amount and is determined at a rate of 60 percent of the tentative life insurance company taxable income ( LICTI ). The SLD for any taxable year is reduced (but not below zero) by 15 percent of the tentative LICTI for such taxable year as it exceeds \$3.0 million and is ultimately phased out at \$15.0 million.

The primary differences between the effective tax rate and the federal statutory income tax rate for 2014 resulted from the DRD, the SLD and the change in deferred tax asset valuation allowance. The change in deferred tax asset valuation allowance was due to the utilization of certain capital loss carryforward benefits that had been previously reduced to zero through an existing valuation allowance reserve. All unused capital loss carryforwards expired at the end of 2014.

### **Liquidity and Capital Resources**

The primary cash needs of the Company are for the payment of claims and operating expenses, maintaining adequate statutory capital and surplus levels, and meeting debt service requirements. Current and expected patterns of claim frequency and severity may change from period to period but generally are expected to continue within historical ranges. The Company's primary sources of cash are written premiums, investment income and proceeds from the sale and maturity of its invested assets. The Company believes that, within each operating company, total invested assets will be sufficient to satisfy all policy liabilities and that cash inflows from investment earnings, future premium receipts and reinsurance collections will be adequate to fund the payment of claims and expenses as needed.

## TABLE OF CONTENTS

Cash flows at the Parent are derived from dividends, management fees, and tax-sharing payments, as described below, from the subsidiaries. The cash needs of the Parent are for the payment of operating expenses, the acquisition of capital assets and debt service requirements, as well as the repurchase of shares and payments of any dividends as may be authorized and approved by the Company's board of directors from time to time. At December 31, 2015, the Parent had approximately \$23.5 million of unrestricted cash and investments.

Dividend payments to a parent corporation by its wholly owned insurance subsidiaries are subject to annual limitations and are restricted to 10% of statutory surplus or statutory earnings before recognizing realized investment gains of the individual insurance subsidiaries. At December 31, 2015, the Parent's insurance subsidiaries had an aggregate statutory surplus of \$73.6 million. Dividends were paid to Atlantic American by its subsidiaries totaling \$6.8 million and \$6.5 million in 2015 and 2014, respectively.

The Parent provides certain administrative, purchasing and other services to each of its subsidiaries. The amounts charged to and paid by the subsidiaries for these services were \$7.4 million and \$7.5 million in 2015 and 2014, respectively. In addition, the Parent has a formal tax-sharing agreement with each of its insurance subsidiaries. A net total of \$2.4 million and \$4.7 million were paid to the Parent under the tax sharing agreement in 2015 and 2014, respectively. As a result of the Parent's tax loss, it is anticipated that the tax-sharing agreement will continue to provide the Parent with additional funds from profitable subsidiaries to assist in meeting its cash flow obligations.

The Company has two statutory trusts which exist for the exclusive purpose of issuing trust preferred securities representing undivided beneficial interests in the assets of the trusts and investing the gross proceeds of the trust preferred securities in Junior Subordinated Debentures. The outstanding \$18.0 million and \$15.7 million of Junior Subordinated Debentures mature on December 4, 2032 and May 15, 2033, respectively, are callable quarterly, in whole or in part, only at the option of the Company, and have an interest rate of three-month LIBOR plus an applicable margin. The margin ranges from 4.00% to 4.10%. At December 31, 2015, the effective interest rate was 4.45%. The obligations of the Company with respect to the issuances of the trust preferred securities represent a full and unconditional guarantee by the Parent of each trust's obligations with respect to the trust preferred securities. Subject to certain exceptions and limitations, the Company may elect from time to time to defer Junior Subordinated Debenture interest payments, which would result in a deferral of distribution payments on the related trust preferred securities. The Company has not made such an election.

The Company intends to pay its obligations under the Junior Subordinated Debentures using existing cash balances, dividend and tax-sharing payments from the operating subsidiaries, or from potential future financing arrangements.

At December 31, 2015, the Company had 55,000 shares of Series D preferred stock ( Series D Preferred Stock ) outstanding. All of the shares of Series D Preferred Stock are held by an affiliate of the Company's controlling shareholder. The outstanding shares of Series D Preferred Stock have a stated value of \$100 per share; accrue annual dividends at a rate of \$7.25 per share (payable in cash or shares of the Company's common stock at the option of the board of directors of the Company) and are cumulative. In certain circumstances, the shares of the Series D Preferred Stock may be convertible into an aggregate of approximately 1,378,000 shares of the Company's common stock, subject to certain adjustments and provided that such adjustments do not result in the Company issuing more than approximately 2,703,000 shares of common stock without obtaining prior shareholder approval; and are redeemable solely at the Company's option. The Series D Preferred Stock is not currently convertible. The Company had accrued, but unpaid, dividends, on the Series D Preferred Stock of \$17,722 at December 31, 2015 and 2014. During 2015 and 2014, the Company paid Series D Preferred Stock dividends of \$0.4 million and \$0.5 million, respectively.

Cash and cash equivalents decreased from \$16.4 million at December 31, 2014 to \$15.6 million at December 31, 2015. The decrease in cash and cash equivalents during 2015 was primarily attributable to an increased level of investing exceeding normal sales and maturities, additions to property and equipment of \$0.3 million, dividends paid

on the Company's common stock and Series D Preferred Stock of \$0.8 million, and the purchase of shares for treasury for \$1.0 million. Partially offsetting the decrease was the net cash provided by operations of \$2.2 million during 2015.

The Company believes that existing cash balances as well as the dividends, fees, and tax-sharing payments it expects to receive from its subsidiaries and, if needed, additional borrowings from financial institutions, will

## TABLE OF CONTENTS

enable the Company to meet its liquidity requirements for the foreseeable future. Management is not aware of any current recommendations by regulatory authorities, which, if implemented, would have a material adverse effect on the Company's liquidity, capital resources or operations.

### **New Accounting Pronouncements**

See "Recently Issued Accounting Standards" in Note 1 of Notes to Consolidated Financial Statements.

### **Impact of Inflation**

Insurance premiums are established before the amount of losses and loss adjustment expenses, or the extent to which inflation may affect such losses and expenses, are known. Consequently, the Company attempts, in establishing its premiums, to anticipate the potential impact of inflation. If, for competitive reasons, premiums cannot be increased to anticipate inflation, this cost would be absorbed by the Company. Inflation also affects the rate of investment return on the Company's investment portfolio with a corresponding effect on investment income. To date, inflation has not had a material effect on the Company's results of operations in any of the periods presented.

### **Off-Balance Sheet Arrangements**

In the normal course of business, the Company has structured borrowings that, in accordance with accounting principles generally accepted in the United States of America, are recorded on the Company's balance sheet at an amount that differs from the ultimate contractual obligation. See Note 6 of Notes to Consolidated Financial Statements.

### **Contractual Obligations**

As a smaller reporting company, we have elected to comply with certain scaled disclosure reporting obligations, and therefore do not have to provide the table of contractual obligations required by this Item.

### **Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

As a smaller reporting company, we have elected to comply with certain scaled disclosure reporting obligations, and therefore do not have to provide the information required by this Item.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Shareholders  
Atlantic American Corporation  
Atlanta, Georgia

We have audited the accompanying consolidated balance sheets of Atlantic American Corporation as of December 31, 2015 and 2014 and the related consolidated statements of operations, comprehensive income (loss), shareholders equity, and cash flows for the years then ended. In connection with our audits of the financial statements, we have also audited financial statement Schedules II, III, IV and VI. These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Atlantic American Corporation at December 31, 2015 and 2014, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Also, in our opinion, the financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

BDO USA, LLP

TABLE OF CONTENTS**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Dollars in thousands, except per share amounts)****Note 1. Summary of Significant Accounting Policies*****Principles of Consolidation***

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ( GAAP ) which, for insurance companies, differ in some respects from the statutory accounting practices prescribed or permitted by regulatory authorities. These financial statements include the accounts of Atlantic American Corporation ( Atlantic American or the Parent ) and its subsidiaries (collectively with the Parent, the Company ). All significant intercompany accounts and transactions have been eliminated in consolidation. Operating results achieved in any historical period are not necessarily indicative of results to be expected in any future period.

At December 31, 2015, the Parent owned four insurance subsidiaries, Bankers Fidelity Life Insurance Company and its wholly-owned subsidiary, Bankers Fidelity Assurance Company (together known as Bankers Fidelity ), and American Southern Insurance Company and its wholly-owned subsidiary, American Safety Insurance Company (together known as American Southern ), in addition to one non-insurance subsidiary, xCalibre Risk Services, Inc. The Parent has issued a guarantee of all liabilities of Bankers Fidelity.

***Premium Revenue and Cost Recognition***

Life insurance premiums are recognized as revenue when due; accident and health insurance premiums are recognized as revenue over the premium paying period and property and casualty insurance premiums are recognized as revenue over the period of the contract in proportion to the amount of insurance protection provided. Benefits and expenses are accrued as incurred and are associated with premiums as they are earned so as to result in recognition of profits over the lives of the contracts. For traditional life insurance and long-duration health insurance, this association is accomplished by the provision of a future policy benefits reserve and the deferral and subsequent amortization of the costs of acquiring business, deferred policy acquisition costs (principally commissions, premium taxes, and other incremental direct costs of issuing policies). Deferred policy acquisition costs are amortized over the estimated premium-paying period of the related policies using assumptions consistent with those used in computing the policy benefits reserve. The Company provides for insurance benefits and losses on accident, health, and property-casualty claims based upon estimates of projected ultimate losses. Deferred policy acquisition costs for property and casualty insurance and short-duration health insurance are amortized over the effective period of the related insurance policies. Contingent commissions, if contractually applicable, are ultimately payable to agents based on the underlying profitability of a particular insurance contract or a group of insurance contracts, and are periodically evaluated and accrued as earned. In periods in which revisions are made to the estimated loss reserves related to the particular insurance contract or group of insurance contracts subject to such commissions, corresponding adjustments are also made to the related accruals. Deferred policy acquisition costs are expensed when such costs are deemed not to be recoverable from future premiums (for traditional life and long-duration health insurance) and from the related unearned premiums and investment income (for property and casualty and short-duration health insurance).

***Intangibles***

Intangibles consist of goodwill and other indefinite-lived intangibles. Goodwill represents the excess of cost over the fair value of net assets acquired and is not amortized. Other indefinite-lived intangibles represent the value of licenses and are not amortized. The Company periodically reviews its goodwill and other indefinite-lived intangibles to determine if any adverse conditions exist that could indicate impairment. Conditions that could trigger impairment

include, but are not limited to, a significant change in business climate that could affect the value of the related asset, an adverse action, or an assessment by a regulator. No impairment of the Company's recorded intangibles was identified during the periods presented.

***Investments***

The Company's investments in both fixed maturities, which include bonds and redeemable preferred stocks, and equity securities, which include common and non-redeemable preferred stocks, are classified as available-for-sale and, accordingly, are carried at fair value with the after-tax difference from amortized cost,

**TABLE OF CONTENTS**

as adjusted if applicable, reflected in shareholders' equity as a component of accumulated other comprehensive income or loss. The fair values for fixed maturities and equity securities are largely determined by either independent methods prescribed by the National Association of Insurance Commissioners (NAIC), which do not differ materially from publicly quoted market prices, when available, or independent broker quotations. The Company owns certain fixed maturities that do not have publicly quoted market values, but had an estimated fair value as determined by management of \$2,237 at December 31, 2015. Such values inherently involve a greater degree of judgment and uncertainty and therefore ultimately greater price volatility than the value of securities with publicly quoted market values. Policy loans and real estate are carried at historical cost. Other invested assets are comprised of investments in limited partnerships, limited liability companies, and real estate joint ventures, and are accounted for using the equity method. If the value of a common stock, preferred stock, other invested asset, or publicly traded bond declines below its cost or amortized cost, if applicable, and the decline is considered to be other than temporary, a realized loss is recorded to reduce the carrying value of the investment to its estimated fair value, which becomes the new cost basis. The evaluation for an other than temporary impairment is a quantitative and qualitative process, which is subject to risks and uncertainties in the determination of whether declines in the fair value of investments are other than temporary. Potential risks and uncertainties include, among other things, changes in general economic conditions, an issuer's financial condition or near term recovery prospects and the effects of changes in interest rates. In evaluating a potential impairment, the Company considers, among other factors, management's intent and ability to hold the securities until price recovery, the nature of the investment and the expectation of prospects for the issuer and its industry, the status of an issuer's continued satisfaction of its obligations in accordance with their contractual terms, and management's expectation as to the issuer's ability and intent to continue to do so, as well as ratings actions that may affect the issuer's credit status. Premiums and discounts related to investments are amortized or accreted over the life of the related investment as an adjustment to yield using the effective interest method. Dividends and interest income are recognized when earned or declared. The cost of securities sold is based on specific identification. Unrealized gains (losses) in the value of invested assets are accounted for as a direct increase (decrease) in accumulated other comprehensive income in shareholders' equity, net of deferred tax and, accordingly, have no effect on net income.

***Income Taxes***

Deferred income taxes represent the expected future tax consequences when the reported amounts of assets and liabilities are recovered or paid. They arise from differences between the financial reporting and tax basis of assets and liabilities and are adjusted for changes in tax laws and tax rates as those changes are enacted. The provision for income taxes represents the total amount of income taxes due related to the current year, plus the change in deferred income taxes during the year. A valuation allowance is recognized if, based on management's assessment of the relevant facts, it is more likely than not that some portion of a deferred tax asset will not be realized.

***Earnings Per Common Share***

Basic earnings per common share are based on the weighted average number of common and participating shares outstanding during the relevant period. Diluted earnings per common share are based on the weighted average number of common and participating shares outstanding during the relevant period, plus options outstanding, if applicable, using the treasury stock method and the assumed conversion of the Series D preferred stock, if dilutive. Unless otherwise indicated, earnings per common share amounts are presented on a diluted basis.

***Cash and Cash Equivalents***

Cash and cash equivalents consist of cash on hand and investments in short-term, highly liquid securities with original maturities of three months or less from date of purchase.

***Recently Issued Accounting Standards***

In February 2016, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) No. 2016-02, *Leases (Topic 842)* ( ASU 2016-02 ). Under this guidance, an entity is required to recognize right-of-use assets and lease liabilities on its balance sheet and disclose key information about leasing arrangements. ASU 2016-02 offers specific accounting guidance for a lessee, a lessor and sale and

## TABLE OF CONTENTS

leaseback transactions. Lessees and lessors are required to disclose qualitative and quantitative information about leasing arrangements to enable a user of the financial statements to assess the amount, timing and uncertainty of cash flows arising from leases. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018 and requires a modified retrospective adoption, with early adoption permitted. The Company is currently evaluating the impact on our consolidated financial statements upon the adoption of this guidance.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Instruments – Overall (Subtopic 825-10)* ( ASU 2016-01 ). ASU 2016-01 provides updated guidance for the recognition and measurement of financial instruments. The new guidance will require investments in equity securities to be measured at fair value with changes in fair value reported in net income except for those equity securities that result in consolidation or are accounted for under the equity method of accounting. Under existing guidance, the Company measures investments in equity securities, available-for-sale, at fair value with changes in fair value reported in accumulated other comprehensive income. The Company is required to adopt the guidance effective January 1, 2018 through a cumulative effect adjustment to retained earnings. Early adoption is not allowed. The impact on the Company's consolidated financial statements will depend on the composition of the Company's investment portfolio on the date of adoption. As of December 31, 2015, equity securities available-for-sale totaled \$23,131, with unrealized gains of \$12,178 in accumulated other comprehensive income that would have been classified in retained earnings.

In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*. This amendment defers the effective date of the previously issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* ( ASU 2014-09 ), until the interim and annual reporting periods beginning after December 15, 2017. Earlier adoption is permitted for interim and annual reporting periods beginning after December 15, 2016. ASU 2014-09 provides updated guidance for recognizing revenue. The guidance excludes insurance contracts and financial instruments. Revenue is to be recognized when, or as, goods or services are transferred to customers in an amount that reflects the consideration that an entity is expected to be entitled in exchange for those goods or services. The Company is currently evaluating the impact on our consolidated financial statements upon the adoption of this guidance.

In May 2015, the FASB issued ASU No. 2015-09, *Financial Services – Insurance (Topic 944): Disclosures about Short-Duration Contracts* ( ASU 2015-09 ). The main objective of ASU 2015-09 is to enhance disclosures about the liability for unpaid claims and claim adjustment expenses, specifically the development of claims, the frequency and severity of claims, and expanded disclosures about reserves that are discounted. ASU 2015-09 will also require insurance entities to disclose information about significant changes in methodologies and assumptions used to calculate the liability for unpaid claims and claim adjustment expenses, including reasons for the change and effects on the financial statements. The amendments in ASU 2015-09 are effective for annual reporting periods beginning after December 15, 2015, and interim reporting periods within annual reporting periods beginning after December 15, 2016. Since ASU 2015-09 is a disclosure only update, the Company does not expect its adoption to have an impact on the Company's financial condition or results of operations.

### ***Use of Estimates in the Preparation of Financial Statements***

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Significant estimates and assumptions are used in developing and evaluating deferred income taxes, deferred acquisition costs, insurance reserves, investments, and receivables, among others, and actual results could differ materially from management's estimates.

TABLE OF CONTENTS**Note 2. Investments**

The following tables set forth the carrying value, gross unrealized gains, gross unrealized losses and amortized cost of the Company's investments, aggregated by type and industry, as of December 31, 2015 and December 31, 2014.

Investments were comprised of the following:

		2015		
	Carrying Value	Gross Unrealized Gains	Gross Unrealized Losses	Amortized Cost

Edgar Filing: ATLANTIC AMERICAN CORP - Form 10-K

Corporate securities	43,996	1,604	9,293	1,361	53,289	2,965
Total temporarily impaired securities	\$ 47,691	\$ 1,611	\$ 11,985	\$ 1,384	\$ 59,676	\$ 2,995

The evaluation for an other than temporary impairment is a quantitative and qualitative process, which is subject to risks and uncertainties in the determination of whether declines in the fair value of investments are other than temporary. Potential risks and uncertainties include, among other things, changes in general economic conditions, an issuer's financial condition or near term recovery prospects and the effects of changes in interest rates. In evaluating a potential impairment, the Company considers, among other factors, management's intent and ability to hold the securities until price recovery, the nature of the investment and the expectation of prospects for the issuer and its industry, the status of an issuer's continued satisfaction of its obligations in accordance with their contractual terms, and management's expectation as to the issuer's ability and intent to continue to do so, as well as ratings actions that may affect the issuer's credit status.

TABLE OF CONTENTS

During the years ended December 31, 2015 and 2014, the Company recorded other than temporary impairments related to the following investments.

	<b>2015</b>	<b>2014</b>
Common and non-redeemable preferred stocks	\$ —	\$ 196

As of December 31, 2015, there were ninety-seven securities in an unrealized loss position which primarily included certain of the Company's investments in fixed maturities within the other diversified business, other diversified consumer, utilities and telecom and financial services sectors. Securities in an unrealized loss position reported in the other diversified business sector included gross unrealized losses of \$4,250 related to investments in fixed maturities of thirteen different issuers, all related to the oil and gas industry. The oil and gas investee companies represent a diversified group of businesses which include, among others, refiners, pipeline owners and operators, deep water offshore rig owners and operators, all of which are in continuing stages of rationalizing their current investments, future capital expenditures and assessing capital and liquidity requirements. The companies are continuing to assess and revise short-term, intermediate and long-term business plans in response to the current trends in oil and gas markets. While these companies have generally experienced credit downgrades or may be currently under review, the Company believes that many of the downgrades are in response to external market forces and not necessarily specific credit events of any obligor which would currently indicate that an other than temporary impairment need be recorded. All of the investees have continued to make regular interest payments on their debt when and as due and the Company continues to perform in-depth analysis of the financial disclosures of each of the investees on a regular basis. The Company does not currently intend to sell nor does it expect to be required to sell any of the securities in an unrealized loss position. Based upon the Company's expected continuation of receipt of contractually required principal and interest payments and its intent and ability to retain the securities until price recovery, as well as the Company's evaluation of other relevant factors, including those described above, the Company has deemed these securities to be temporarily impaired as of December 31, 2015.

The following describes the fair value hierarchy and provides information as to the extent to which the Company uses fair value to measure the value of its financial instruments and information about the inputs used to value those financial instruments. The fair value hierarchy prioritizes the inputs in the valuation techniques used to measure fair value into three broad levels.

Level 1	Observable inputs that reflect quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date. The Company's financial instruments valued using Level 1 criteria include cash equivalents and exchange traded common stocks.
Level 2	Observable inputs, other than quoted prices included in Level 1, for an asset or liability or prices for similar assets or liabilities. The Company's financial instruments valued using Level 2 criteria include significantly all of its fixed maturities, which consist of U.S. Treasury securities and U.S. Government securities, obligations of states and political subdivisions, and certain corporate fixed maturities, as well as its non-redeemable preferred stocks. In determining fair value measurements using Level 2 criteria, the Company utilizes data from outside sources, including nationally recognized pricing services and broker/dealers, in establishing the fair value of its fixed maturities and non-redeemable preferred stocks. Prices for the majority of the Company's Level 2 fixed maturities and non-redeemable preferred stocks were determined using unadjusted prices received from pricing services that utilize a matrix pricing concept, which is a mathematical technique used widely in the industry to value debt securities based on various relationships to other benchmark quoted prices.
Level 3	Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Fair value is based on criteria that use assumptions or other data that are not readily observable from objective sources. The Company's financial instruments

valued using Level 3 criteria consist of a limited number of fixed maturities. As of December 31, 2015 and 2014, the value of the Company's fixed maturities valued using Level 3 criteria was \$2,237 and \$2,214, respectively. The use of different criteria or assumptions regarding data may have yielded materially different valuations.

TABLE OF CONTENTS

As of December 31, 2015, financial instruments carried at fair value were measured on a recurring basis as summarized below:

<b>Assets:</b>	<b>Quoted Prices in Active Markets for Identical Assets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>	<b>Significant Unobservable Inputs (Level 3)</b>	<b>Total</b>
Fixed maturities	\$ —	\$ 203,087	\$ 2,237 <sup>(1)</sup>	\$ 205,324
Equity securities	18,245	4,886 <sup>(1)</sup>	—	23,131
Cash equivalents	13,772	—	—	13,772
Total	\$ 32,017	\$ 207,973	\$ 2,237	\$ 242,227

<sup>(1)</sup> All underlying securities are financial service industry related.

As of December 31, 2014, financial instruments carried at fair value were measured on a recurring basis as summarized below:

<b>Assets:</b>	<b>Quoted Prices in Active Markets for Identical Assets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>	<b>Significant Unobservable Inputs (Level 3)</b>	<b>Total</b>
Fixed maturities	\$ —	\$ 212,674	\$ 2,214 <sup>(1)</sup>	\$ 214,888
Equity securities	13,148	5,776 <sup>(1)</sup>	—	18,924
Cash equivalents	15,009	—	—	15,009
Total	\$ 28,157	\$ 218,450	\$ 2,214	\$ 248,821

<sup>(1)</sup> All underlying securities are financial service industry related.

The following is a roll-forward of the Company's financial instruments measured at fair value on a recurring basis using significant unobservable inputs (Level 3) from January 1, 2014 to December 31, 2015.

	<b>Fixed Maturities</b>
Balance, January 1, 2014	\$ 1,991
Total unrealized gains included in other comprehensive income	223
Balance, December 31, 2014	2,214
Total unrealized gains included in other comprehensive loss	23
Balance, December 31, 2015	\$ 2,237

The Company's fixed maturities valued using Level 3 inputs consist solely of issuances of pooled debt obligations of multiple, smaller financial services companies. They are not actively traded and valuation techniques used to measure fair value are based on future estimated cash flows (based on current cash flows) discounted at reasonable estimated rates of interest. There are no assumed prepayments and/or default probability assumptions as a majority of these instruments contain certain U.S. government agency strips to support repayment of the principal. Other qualitative and

quantitative information received from the original underwriter of the pooled offerings is also considered, as applicable.

40

TABLE OF CONTENTS

The amortized cost and carrying value of fixed maturities at December 31, 2015 and 2014 by contractual maturity were as follows. Actual maturities may differ from contractual maturities because issuers may call or prepay obligations with or without call or prepayment penalties.

	2015		2014	
	Carrying Value	Amortized Cost	Carrying Value	Amortized Cost
Due in one year or less	\$ 4,143	\$ 4,113	\$ 1,000	\$ 1,000
Due after one year through five years	20,557	20,591	16,523	15,891
Due after five years through ten years	99,614	103,066	114,620
