Form 10-K
March 18, 2019

U.S.
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K
(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-07120

HARTE HANKS, INC.
(Exact name of registrant as specified in its charter)

Delaware 74-1677284
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

9601 McAllister Freeway, Suite 610, San Antonio, Texas 78216
(Address of principal executive offices, including zipcode)

(210) 829-9000
(Registrant's telephone number including area code)

Securities registered pursuant to Section 12(b) of the Act:
Title of each class Name of each exchange on which registered
Common Stock New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: HARTE HANKS INC - Form 10-K

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the closing price (\$11.10) as of the last business day of the registrant's most recently completed second fiscal quarter (June 30, 2018), was approximately \$54,415,142.

The number of shares outstanding of each of the registrant's classes of common stock as of January 31, 2019 was 6,266,130 shares of common stock, all of one class.

Documents incorporated by reference:

Portions of the Proxy Statement to be filed for the company's 2018 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K.

THIS ANNUAL REPORT ON FORM 10-K IS BEING DISTRIBUTED TO STOCKHOLDERS IN LIEU OF A SEPARATE ANNUAL REPORT PURSUANT TO RULE 14a-3(b) OF THE ACT AND SECTION 203.01 OF THE NEW YORK STOCK EXCHANGE LISTED COMPANY MANUAL.

PART I

ITEM 1. BUSINESS

INTRODUCTION

Harte Hanks, Inc. ("Harte Hanks," "we," "our," or "us") is a purveyor of data-driven, omni-channel marketing and customer relationship solutions and logistics. The Company has robust capabilities that offer clients the strategic guidance they need across the customer data landscape as well as the executional know-how in database build and management, data analytics, digital media, direct mail, customer contact, client fulfillment and marketing and product logistics. Harte Hanks solves marketing, commerce and logistical challenges for some of the world's leading brands in North America, Asia-Pacific and Europe.

We are the successor to a newspaper business started by Houston Harte and Bernard Hanks in Texas in the early 1920s. We were incorporated in Delaware on October 1, 1970. In 1972, Harte Hanks went public and was listed on the New York Stock Exchange ("NYSE"). We became a private company in a leveraged buyout in 1984, and in 1993 we again went public and listed our common stock on the NYSE.

We provide public access to all reports filed with the Securities and Exchange Commission ("SEC") under the Securities Exchange Act of 1934, as amended (the "1934 Act"). These documents may be accessed free of charge on our website at www.hartehanks.com. There is not any information from this website incorporated by reference herein. These documents are provided as soon as practical after they are filed with the SEC and may also be found at the SEC's website at www.sec.gov. Additionally, we have adopted and posted on our website a code of ethics that applies to our principal executive officer, principal financial officer, and principal accounting officer. Our website also includes our corporate governance guidelines and the charters for each of our audit, compensation, and nominating and corporate governance committees, and we will provide a printed copy of any of these documents to any requesting stockholder.

OUR BUSINESS

We offer a wide variety of integrated, omni-channel, data-driven solutions for top brands around the globe. We help our clients gain insight into their customers' behaviors from their data and use that insight to create innovative multi-channel marketing programs that deliver greater return on marketing investment. We believe our clients' success is determined not only by how good their tools are, but how well we help them use these tools to gain insight and analyze their consumers. This results in a strong and enduring relationship between our clients and their customers which is key to being leaders in customer interaction. We offer a full complement of capabilities and resources to provide a broad range of marketing services, in media from direct mail to email, including:

Agency: We offer full-service, customer engagement solutions specializing in direct and digital communications for both consumer and business-to-business markets. With strategy, creative, and implementation services, we help marketers within targeted industries understand, identify, and engage prospects and customers in their channel of choice.

Digital Solutions: Our digital solutions integrate online services within the marketing mix and include: search engine management, display, digital analytics, website development and design, digital strategy, social media, email, e-commerce, and interactive relationship management and a host of other services that support our core businesses.

Database Marketing Solutions: We have successfully delivered marketing database solutions across various industries. Our solutions are built around centralized marketing databases with three core offerings: insight and

analytics; customer data integration; and marketing communications tools. Our solutions enable organizations to build and manage customer communication strategies that drive customer acquisition and retention and maximize the value of existing customer relationships. Through insight and analytics, we help clients identify models of their most profitable customer relationships and then apply these models to increase the value of existing customers while also winning profitable new customers. Through customer data integration, data from multiple sources is brought together to provide a single customer view of client prospects and customers. We then help clients apply their data and insights to the entire customer life cycle, which helps clients sustain and grow their business, gain deeper customer insights, and continuously refine their customer resource management strategies and tactics.

Direct Mail: As a full-service direct marketing provider and a substantial mailing partner of the U.S. Postal Service ("USPS"), our operational mandate is to ensure creativity and quality, provide an understanding of the options available in technologies and segmentation strategies and capitalize on economies of scale with our variety of execution options.

Mail and Product Fulfillment: We offer mail and product fulfillment solutions where we provide print on demand, manage product recalls, and distribute literature and other products. Harte Hanks has temperature-controlled, FDA-approved and geographically convenient warehouses to support print and product, all controlled by our proprietary nexTOUCH platform.

Logistics: Harte Hanks is one of the leading providers of third-party logistics and freight optimization in the United States. We complete millions of shipments of time-sensitive materials annually and have access to a certified fleet of over 15,000 trucks and a proprietary logistical system called Allink®360 that is designed to get customers' products delivered on-time and on-budget.

Contact Centers: We offer an intelligently responsive contact center approach, which uses real-time data and predictive insights to interact with each customer in the most effective way. Our on-shore and off-shore customer support representatives deftly handle incoming calls in multiple languages, email, chat, video and social media requests 24/7 to improve customer experiences. At the same time, our advanced analytics can alert customers to trending product or service issues. Our team skillfully configures Oracle CRM or Salesforce to create great customer interactions by seamlessly linking continually-improving content between agent or AI-driven interfaces and web-based self-help tools or community forums. Our lead specialists engage qualified buyers and influencers with just the right message at just the right moment. Additionally, when combined with our Fulfillment and Logistics offerings, we provide a full suite of services for customers' warranty, returns and recall issues.

Many of our client relationships start with an offering from the list above on an individual solution basis or a combination of our offerings from across our service offerings.

In 2018 and 2017, Harte Hanks had revenues of \$284.6 million and \$383.9 million, respectively.

Management Changes

Effective January 4, 2019, Bant Breen was appointed as our Chief Executive Officer. He joined Harte Hanks' Board in June 2018. Before joining Harte Hanks, Bant led numerous award-winning agencies within the WPP, IPG and Publicis groups and was inducted into the American Advertising Federation's Hall of Achievement in 2010. Most recently, Bant founded Qnary, the leading technology platform for executive reputation management. Qnary was recognized in 2018 by both Inc. and Entrepreneur magazines as one of the most innovative and fastest growing companies in America. In connection with Bant's appointment, the Office of the CEO that was formed upon the resignation of Karen A. Puckett was dissolved.

Effective January 4, 2019, Andrew Harrison was promoted to President and Chief Operating Officer. Andrew has been with Harte Hanks for more than 20 years and brings a wealth of company and industry knowledge to the leadership team.

On January 16, 2019, Mark Del Priore was appointed as Chief Financial Officer to succeed Jon Biro who chose to leave the Company. Mark has more than 15 years of media experience, most recently as CFO for the publicly traded advertising company, SITO Mobile. Mark began working with Harte Hanks as an advisor in October 2018.

On Feb 1, 2019, Martin Reidy took the helm of our marketing services division which covers our agency, digital solutions and database marketing solutions. Martin was a Harte Hanks board member and has significant experience in direct marketing, digital advertising, predictive marketing and data-driven results marketing. Most recently, Martin served as the President and CEO of Ansira Partners, a data and digital marketing agency. Prior to that he was CEO and President of Meredith Xcelerated Marketing (a marketing services division within Meredith Publishing Inc.), Publicis Modem and R/GA (leading digital advertising and relationship marketing services firms).

Restructuring Activities

On September 21, 2018, our Board of Directors approved a reduction in our workforce for certain employees performing sales and corporate marketing functions. In Q4 2018, we identified additional reduction opportunities which resulted in an additional reduction of our workforce in other functions. The workforce reductions resulted in a restructuring charge of approximately \$0.9 million for employee severance and related costs and we anticipate that this action will result in annualized cost savings of approximately \$7.5 million. In addition, beginning in 2019 we expect to reduce certain non-labor discretionary expenses, with the aim of reducing expenses by an additional approximately \$2.0 million per year.

Customers

Our services are marketed to specific industries or markets with services and software products tailored to each industry or market. We tailor our services and software products depending on the industry or market we are targeting. We believe that we are generally able to provide services to new industries and markets by modifying our existing services and applications. We currently provide services primarily to the retail, B2B, financial services, consumer, and healthcare vertical markets, in addition to a range of other select markets. Our largest client (measured in revenue) comprised 8% of total revenues in 2018. Our largest 25 clients in terms of revenue comprised 64% of total revenues in 2018.

Sales and Marketing

We rely on our enterprise and solution sellers to primarily sell our products and services to new clients and task our employees supporting existing clients to expand our client relationship through additional solutions and products. Our marketing services sales force sells a variety of solutions and services to address client's targeted marketing needs. We maintain solution-specific sales forces and sales groups to sell our individual products and solutions.

Facilities

Our services are provided at the following facilities, all of which are leased:

Domestic Offices

Austin, Texas	Lenexa, Kansas
Chelmsford, Massachusetts	Maitland, Florida
Deerfield Beach, Florida	New York, New York
Denver, Colorado	Raleigh, North Carolina
East Bridgewater, Massachusetts	San Antonio, Texas
Fullerton, California	Shawnee, Kansas
Grand Prairie, Texas	Trevose, Pennsylvania
Jacksonville, Florida	Texarkana, Texas
Langhorne, Pennsylvania	Wilkes-Barre, Pennsylvania

International Offices

Hasselt, Belgium	Manila, Philippines
Iasi, Romania	Uxbridge, United Kingdom

Competition

Our competition comes from local, national, and international marketing and advertising companies, and internal client resources, against whom we compete for individual projects, entire client relationships, and marketing expenditures. Competitive factors in our industry include the quality and scope of services, technical and strategic expertise, the perceived value of the services provided, reputation, and brand recognition. We also compete against social, mobile, web-based, email, print, broadcast, and other forms of advertising for marketing and advertising dollars in general.

Seasonality

Our revenues tend to be higher in the fourth quarter than in other quarters during a given year. This increased revenue is a result of overall increased marketing activity prior to and during the holiday season, primarily related to our retail

vertical.

GOVERNMENT REGULATION

As a company conducting varied business activities for clients across diverse industries around the world, we are subject to a variety of domestic and international legal and regulatory requirements that impact our business, including, for example, regulations governing consumer protection, and unfair business practices, contracts, e-commerce, intellectual property, labor, and employment (especially wage and hour laws), securities, tax, and other laws that are generally applicable to commercial activities.

We are also subject to, or affected by, numerous local, national, and international laws, regulations, and industry standards that regulate direct marketing activities, including those that address privacy, data security, and unsolicited marketing

5

communications. Examples of some of these laws and regulations that may be applied to, or affect, our business or the businesses of our clients include the following:

The Federal Trade Commission's positions regarding the processing of personal information and protecting consumers as expressed through its Protecting Consumer Privacy in an Era of Rapid Change, Data Brokers, Big Data and Cross-Device Tracking reports (each of which seek to address consumer privacy, data protection, and technological advancements related to the collection or use of personal information for marketing purposes).

Data protection laws in the European Union ("EU"), including the General Data Protection Regulation (EU Regulation 679/2016) which imposes a number of obligations with respect to the processing of personal data and prohibitions related to the transfer of personal information from the EU to other countries, including the U.S., that do not provide data subjects with an "adequate" level of privacy or security.

The Financial Services Modernization Act of 1999, or Gramm-Leach-Bliley Act ("GLB"), which, among other things, regulates the use for marketing purposes of non-public personal financial information of consumers that is held by financial institutions. Although Harte Hanks is not considered a financial institution, many of our clients are subject to the GLB. The GLB also includes rules relating to the physical, administrative, and technological protection of non-public personal financial information.

The Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), which regulates the use of protected health information for marketing purposes and requires reasonable safeguards designed to prevent intentional or unintentional use or disclosure of protected health information.

The Fair and Accurate Credit Transactions Act of 2003 ("FACT Act"), which amended the FCRA and requires, among other things, consumer credit report notice requirements for creditors that use consumer credit report information in connection with risk-based credit pricing actions and also prohibits a business that receives consumer information from an affiliate from using that information for marketing purposes unless the consumer is first provided a notice and an opportunity to direct the business not to use the information for such marketing purposes, subject to certain exceptions.

The Fair Credit Reporting Act ("FCRA"), which governs, among other things, the sharing of consumer report information, access to credit scores, and requirements for users of consumer report information.

Federal and state laws governing the use of email for marketing purposes, including the U.S. Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003 ("CAN-SPAM"), Canada's Anti-Spam Legislation ("CASL") and similar e-Privacy laws in Europe (in support of Directive 2002/58/EC).

Federal and state laws governing the use of telephones for unsolicited marketing purposes, including the Federal Trade Commission's Telemarketing Sales Rule ("TSR"), the Federal Communications Commission's Telephone Consumer Protection Act ("TCPA"), various U.S. state do-not-call laws, Canada's National Do Not Call laws and rules ("Telecommunications Act") and similar e-Privacy laws in Europe (in support of Directive 2002/58/EC).

Federal and state laws governing the collection and use of personal data online and via mobile devices, including but not limited to the Federal Trade Commission Act and the Children's Online Privacy Protection Act, which seek to address consumer privacy and protection.

- Federal and state laws in the U.S., Canada, and Europe specific to data security and breach notification, which include required standards for data security and generally require timely notifications to affected persons in the event of data security breaches or other unauthorized access to certain types of protected personal data.

There are additional consumer protection, privacy, and data security regulations in locations where we or our clients do business. These laws regulate the collection, use, disclosure, and retention of personal data and may require consent from consumers and grant consumers other rights, such as the ability to access their personal data and to correct information in the possession of data controllers. For example, as discussed in the Company's Risk Factors in Item 1A, the new European General Data Protection Regulation (GDPR) that took effect in May 2018 applies to all of our products and services in Europe. The GDPR includes operational requirements for companies that receive or process personal data of residents of the EU that are different than those currently in place in the EU. We and many of our clients also belong to trade associations that impose guidelines that regulate direct marketing activities, such as the

Direct Marketing Association's Commitment to Consumer Choice.

As a result of increasing public awareness and interest in individual privacy rights, data protection, information security, and environmental and other concerns regarding marketing communications, federal, state, and foreign governmental and industry organizations continue to consider new legislative and regulatory proposals that would impose additional restrictions on direct marketing services and products. Examples include data encryption standards, data breach notification requirements, consumer choice and consent restrictions, and increased penalties against offending parties, among others.

In addition, our business may be affected by the impact of these restrictions on our clients and their marketing activities. These additional regulations could increase compliance requirements and restrict or prevent the collection, management, aggregation, transfer, use, or dissemination of information or data that is currently legally available. Additional regulations may also restrict or prevent current practices regarding unsolicited marketing communications. For example, many states have considered implementing "do-not-mail" legislation that could impact our business and the businesses of our clients and customers. In addition, continued public interest in individual privacy rights and data security may result in the adoption of further voluntary industry guidelines that could impact our direct marketing activities and business practices.

We cannot predict the scope of any new legislation, regulations, or industry guidelines or how courts may interpret existing and new laws. Additionally, enforcement priorities by governmental authorities may change and also impact our business either directly or through requiring our customers to alter their practices. Compliance with regulations is costly and time-consuming for us and our clients, and we may encounter difficulties, delays, or significant expenses in connection with our compliance. We may also be exposed to significant penalties, liabilities, reputational harm, and loss of business in the event that we fail to comply with applicable regulations. There could be a material adverse impact on our business due to the enactment or enforcement of legislation or industry regulations, the issuance of judicial or governmental interpretations, enforcement priorities of governmental agencies, or a change in customs arising from public concern over consumer privacy and data security issues.

INTELLECTUAL PROPERTY RIGHTS

Our intellectual property assets include trademarks and service marks that identify our company and our services, know-how, software, and other technology that we develop for our internal use and for license to clients and data and intellectual property licensed from third parties, such as commercial software and data providers. We generally seek to protect our intellectual property through a combination of license agreements and trademark, service mark, copyright, patent and trade secret laws as well as through domain name registrations and enforcement procedures. We also enter into confidentiality agreements with many of our employees, vendors, and clients and seek to limit access to and distribution of intellectual property and other proprietary information. We pursue the protection of our trademarks and other intellectual property in the U.S. and internationally. Although we from time to time evaluate inventions for patentability, we do not own any patents, and patents are not core to our intellectual property strategy (other than as may be incidental to commercially available technology or software we license).

EMPLOYEES

As of December 31, 2018, Harte Hanks employed 2,816 full-time employees and 167 part-time employees, of which approximately 1,308 are based outside of the U.S., primarily in the Philippines. A portion of our workforce is provided to us through staffing companies. None of our workforce is represented by labor unions. We consider our relations with our employees to be good.

AVAILABLE INFORMATION

Our website is <http://www.hartehanks.com>. We make available free of charge, on or through our website, our annual, quarterly and current reports, and any amendments to those reports, as soon as reasonably practicable after electronically filing such reports with, or furnishing them to, the SEC. The SEC's website, www.sec.gov, contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. These website addresses are intended to be for inactive textual references only. None of the information on, or accessible through, these websites are part of this Form 10-K or is incorporated by reference herein.

ITEM 1A. RISK FACTORS

Cautionary Note Regarding Forward-Looking Statements

This report, including the Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), contains "forward-looking statements" within the meaning of the federal securities laws. All such statements are qualified by this cautionary note, which is provided pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933 (the "1933 Act") and Section 21E of the 1934 Act. Forward-looking statements may also be included in our other public filings, press releases, our website, and oral and written presentations by management. Statements other than historical facts are forward-looking and may be identified by words such as "may," "will," "expects," "believes," "anticipates," "plans," "estimates," "seeks," "could," "intends," or words of similar meaning. Examples include statements regarding (1) our strategies and initiatives, (2) adjustments to our cost structure and other actions designed to respond to market conditions and improve our performance, and the anticipated effectiveness and expenses associated with these actions, (3) our financial outlook for revenues, earnings per share, operating income, expense related to equity-based compensation, capital resources and other financial items, (4) expectations for our businesses and for the industries in which we operate, including the impact of economic conditions of the markets we serve on the marketing expenditures and activities of our clients and prospects, (5) competitive factors, (6) acquisition and development plans, (7) our stock repurchase program, (8) expectations regarding legal proceedings and other contingent liabilities, and (9) other statements regarding future events, conditions, or outcomes.

These forward-looking statements are based on current information, expectations, and estimates and involve risks, uncertainties, assumptions, and other factors that are difficult to predict and that could cause actual results to vary materially from what is expressed in or indicated by the forward-looking statements. In that event, our business, financial condition, results of operations, or liquidity could be materially adversely affected, and investors in our securities could lose part or all of their investments. Some of these risks, uncertainties, assumptions, and other factors can be found in our filings with the SEC, including the factors discussed below in this Item 1A, "Risk Factors", and any updates thereto in our Forms 10-Q and 8-K. The forward-looking statements included in this report and those included in our other public filings, press releases, our website, and oral and written presentations by management are made only as of the respective dates thereof, and we undertake no obligation to update publicly any forward-looking statement in this report or in other documents, our website, or oral statements for any reason, even if new information becomes available or other events occur in the future, except as required by law.

In addition to the information set forth elsewhere in this report, including in the MD&A section, the factors described below should be considered carefully in making any investment decisions with respect to our securities.

Most of our client engagements are cancelable on short notice.

The marketing services we offer, and in particular for direct mail and contact center services, are generally terminable upon short notice by our clients, even if the term of the agreement (and the expected duration of services) is several or many years. Many of our customer agreements do not have minimum volume or revenue requirements, so clients may (and do) vary their actual orders from us over time based on their own business needs, their satisfaction with the quality and pricing of our services, and a variety of other competitive factors. In addition, the timing of particular jobs or types of jobs at particular times of year (such as mail programs supporting the holiday shopping season or contact center programs supporting a specific event) may cause significant fluctuations in the operating results of our operations in any given quarter. We depend to some extent on sales to certain industries, such as the consumer retail industries, technology, and financial services. To the extent these industries experience downturns, our clients may re-evaluate their marketing spend, which could adversely affect the results of our operations.

A large portion of our revenue is generated from a limited number of clients, with concentration in the consumer retail industry. The loss of a client or significant work from one or more of our clients could adversely affect our business.

Our ten largest clients collectively represented 44% of our revenues for 2018. Furthermore, traditional consumer retail (which is an industry experiencing significant business model and financial challenges) represented 23% of our 2018 revenues. While we typically have multiple projects with our largest customers which would not all terminate at the same time, the loss of one or more of our larger clients or the projects or contracts with one of our largest clients could adversely affect our business, results of operations, and financial condition if the lost revenues were not replaced with profitable revenues from that client or other clients.

We rely on business partners for some services and technology, and we depend on one business partner in particular, which is also a significant equity holder, for a large number of critical services.

We have determined that for some services, and most technology, we are best served by partnering with other companies, engaging them as vendors either on a standing or as-needed basis. We believe this approach reduces the investment needed to access these services and technologies for our clients and provides greater flexibility in how we structure solutions for clients and adapt to market changes. However, because we do not own or control the service or technology partners, we are subject to the potential failure of those partners financially or commercially and must maintain good relations with them to ensure continued service. We may not be able to anticipate any such problems, and failure or weakness of one or more of our key business partners or our relationships with any such provider, could have a material effect on our ability to deliver services to our clients, and in turn harm our financial performance. Furthermore, our business partners may have different or conflicting interests, and although we seek to negotiate appropriate commercial terms, we may be unable to secure or enforce those terms in order to protect our client and employee relationships. Should our partners undermine our client or employee relations, our financial performance will be harmed.

Further, once we engage with a partner it may be difficult to switch to a different vendor even if we are not happy with their performance.

In particular, Wipro, LLC (“Wipro”) and its subsidiaries provide a wide array of services for us and for our clients, including database and software development, database support and analytics, IT infrastructure support and digital campaign management. Because of the nature of these services, it would be difficult and disruptive to our business to replace Wipro on short notice if doing so was necessary or desirable. Wipro also is our largest equity holder, having invested \$9.9 million in us in 2018 through the purchase of our Series A Convertible Preferred Stock, which is convertible into 16.0% of our common stock. Subject to certain conditions, Wipro is entitled to appoint a non-voting board observer or a board member to our board of directors. As of December 31, 2018, Wipro has designated an observer to the Board of Directors.

Our indebtedness may adversely impact our ability to react to changes in our business or changes in general economic conditions.

On April 17, 2017, we entered into a credit agreement with Texas Capital Bank, N.A. The agreement consists of a two-year \$20.0 million revolving credit facility, which we amended on January 9, 2018 to increase the availability under the revolving credit facility to \$22.0 million and extended the term of the credit facility by one year to April 17, 2020. The agreement limits our ability to incur funded debt while any obligation or letter of credit issued thereunder is outstanding, subject to customary exceptions. See Note C, Long-Term Debt, in the Notes to Consolidated Financial Statements for further discussion.

We may incur additional indebtedness in the future and the terms of future arrangements may be less favorable to the company than our previous or current facilities. Our ability to incur indebtedness is also impacted by the terms of our Series A Convertible Preferred Stock, which limits our ability to incur indebtedness without the holders' consent to the greater of \$40.0 million or four times our trailing 12-month EBITDA (measured at the time such indebtedness is incurred). Any failure or inability to obtain new financing arrangements when needed on favorable terms could have a material adverse impact on our liquidity position.

The amount of our indebtedness and the terms under which we borrow money under any future credit facilities or other agreements could have significant consequences for our business. Borrowings may include covenants requiring that we maintain certain financial measures and ratios. Covenant and ratio requirements may limit the manner in which we can conduct our business, and we may be unable to engage in favorable business activities or finance future operations and capital needs. A failure to comply with these restrictions or to maintain the financial measures and

ratios contained in the debt agreements could lead to an event of default that could result in an acceleration of indebtedness. In addition, the amount and terms of any future indebtedness could:

limit our flexibility in planning for, or reacting to, changes in our business and the industries in which we operate, including limiting our ability to invest in our strategic initiatives, and consequently, place us at a competitive disadvantage;

- reduce the availability of our cash flows that would otherwise be available to fund working capital, capital expenditures, acquisitions, and other general corporate purposes; and
- result in higher interest expense in the event of increases in interest rates, as discussed below under the Risk Factor “Interest rate increases could affect our results of operations, cash flows, and financial position.”

Risks related to our pension benefit plans may adversely impact our results of operations and cash flows.

Pension benefits represent significant financial obligations. Because of the uncertainties involved in estimating the timing and amount of future payments and asset returns, significant estimates are required to calculate pension expense and liabilities related to our plans. We utilize the services of independent actuaries, whose models are used to facilitate these calculations. Several key assumptions are used in the actuarial models to calculate pension expense and liability amounts recorded in the

consolidated financial statements. In particular, significant changes in actual investment returns on pension assets, discount rates, or legislative or regulatory changes could impact future results of operations and required pension contributions. Differences between actual pension expenses and liability amounts from these estimated expense and liabilities may adversely impact our results of operations and cash flows.

We may need to obtain additional funding to continue as a going concern; if we are unable to meet our needs for additional funding in the future, we will be required to limit, scale back, or cease operations.

Our consolidated financial statements for the year ended December 31, 2018 have been prepared assuming we will continue to operate as a going concern. Because we continue to experience net operating losses, our ability to continue as a going concern is subject to our ability to obtain profitability or successfully raise sufficient additional capital as needed, through future financings or other strategic arrangements. Additional funds may not be available when needed, or if available, we may not be able to obtain such funds on terms acceptable to us. If adequate funds are unavailable when needed, we may not be able to continue as a going concern. We may be required to scale down or sell certain businesses or cease operations.

We face significant competition for individual projects, entire client relationships and advertising dollars in general.

Our business faces significant competition within each of our vertical markets and for all of our offerings. We offer our marketing services within a dynamic business environment characterized by rapid technological change, high turnover of client personnel who make buying decisions, client consolidations, changing client needs and preferences, continual development of competing products and services, and an evolving competitive landscape. This competition comes from numerous local, national, and international direct marketing and advertising companies, and client internal resources, against whom we compete for individual projects, entire client relationships, and marketing expenditures by clients and prospective clients. We also compete against internet (social, mobile, web-based, and email), print, broadcast, and other forms of advertising for marketing and advertising dollars in general. In addition, our ability to attract new clients and to retain existing clients may, in some cases, be limited by clients' policies on or perceptions of conflicts of interest which may prevent us from performing similar services for competitors. Some of our clients have also sought to reduce the number of marketing vendors or use third-party procurement organizations, all of which increases pricing pressure, and may disadvantage us relative to our competitors. Our failure to improve our current processes or to develop new products and services could result in the loss of our clients to current or future competitors. In addition, failure to gain market acceptance of new products and services could adversely affect our growth and financial condition.

Current and future competitors may have significantly greater financial and other resources than we do, and they may sell competing services at lower prices or at lower profit margins, resulting in pressures on our prices and margins.

The sizes of our competitors vary widely across vertical markets and service lines. Therefore, some of our competitors may have significantly greater financial, technical, marketing, or other resources than we do in any one or more of our market segments, or overall. As a result, our competitors may be in a position to respond more quickly than we can to new or emerging technologies, methodologies, and changes in customer requirements, or may devote greater resources than we can to the development, promotion, sale, and support of products and services. Moreover, new competitors or alliances among our competitors may emerge and potentially reduce our market share, revenue, or margins. Some of our competitors also may choose to sell products or services that competes with ours at lower prices by accepting lower margins and profitability or may be able to sell products or services that competes with ours at lower prices given proprietary ownership of data, technical superiority, a broader or deeper product or experience set, or economies of scale. Price reductions or pricing pressure by our competitors could negatively impact our margins and results of operations and could also harm our ability to obtain new customers on favorable terms. Competitive pricing pressures tend to increase in difficult or uncertain economic environments, due to reduced marketing

expenditures of many of our clients and prospects, and the resulting impact on the competitive business environment for marketing service providers such as our company.

We must maintain technological competitiveness, continually improve our processes, and develop and introduce new services in a timely and cost-effective manner.

We believe that our success depends on, among other things, maintaining technological competitiveness in our products, processing functionality, and software systems and services. Technology changes rapidly as makers of computer hardware, network systems, programming tools, computer and data architectures, operating systems, database technology, and mobile devices continually improve their offerings. Advances in information technology may result in changing client preferences for products and product delivery channels in our industry. The increasingly sophisticated requirements of our clients require us to continually improve our processes and provide new products and services in a timely and cost-effective manner (whether through development, license, or acquisition). Our direct mail operations are increasingly pressured by larger-scale competitors who have adopted technologies allowing them to more effectively and efficiently customize mailed marketing materials. We may be unable to successfully identify, develop, and bring new and enhanced services and products to market in a timely and cost-effective manner, such services and

products may not be commercially successful, and services, products, and technologies developed by others may render our services and products noncompetitive or obsolete.

Our success depends on our ability to consistently and effectively deliver our services to our clients.

Our success depends on our ability to effectively and consistently staff and execute client engagements within the agreed upon time frame and budget. Depending on the needs of our clients, our engagements may require customization, integration, and coordination of a number of complex product and service offerings and execution across many facilities. Moreover, in some of our engagements, we rely on subcontractors and other third parties to provide some of the services to our clients, and we cannot guarantee that these third parties will effectively deliver their services, that we will be able to easily suspend work with contractors that are not performing adequately, or that we will have adequate recourse against these third parties in the event they fail to effectively deliver their services. Other contingencies and events outside of our control may also impact our ability to provide our products and services. Our failure to effectively and timely staff, coordinate, and execute our client engagements may adversely impact existing client relationships, the amount or timing of payments from our clients, our reputation in the marketplace and ability to secure additional business and our resulting financial performance. In addition, our contractual arrangements with our clients and other customers may not provide us with sufficient protections against claims for lost profits or other claims for damages.

We have recently experienced, and may experience in the future, reduced demand for our products and services due to the financial condition and marketing budgets of our clients and other factors that may impact the industry verticals that we serve.

Marketing budgets are largely discretionary in nature, and as a consequence are easier to reduce in the short-term than other expenses. Our customers have in the past, and may in the future, responded to their own financial constraints (whether caused by weak economic conditions, weak industry performance or client-specific issues) by reducing their marketing spending. Customers may also be slow to restore their marketing budgets to prior levels during a recovery and may respond similarly to adverse economic conditions in the future. Our revenues are dependent on national, regional, and international economies and business conditions. A lasting economic recession or anemic recovery in the markets in which we operate could have material adverse effects on our business, financial position, or operating results. Similarly, industry or company-specific factors may negatively impact our clients and prospective clients, and in turn result in reduced demand for our products and services, client insolvencies, collection difficulties or bankruptcy preference actions related to payments received from our clients. We may also experience reduced demand as a result of consolidation of clients and prospective clients in the industry verticals that we serve.

We must effectively manage our costs to be successful. If we do not achieve our cost management objectives, our financial results could be adversely affected.

Our business plan and expectations for the future require that we effectively manage our cost structure, including our operating expenses and capital expenditures across our operations. To the extent that we do not accurately anticipate and effectively manage our costs as our business evolves, our financial results may be adversely affected.

Our financial performance has harmed our commercial reputation and relationship with customers, vendors, and other commercial parties, and may impair our ability to attract, retain and motivate employees.

Our declining financial performance has caused customers and vendors to increase scrutiny on payment and performance terms in our agreements, which may impose additional costs (or result in reduced profitability) in our operations. Clients, vendors, and partners and recent performance, as well as prospective clients, vendors, and partners) may also decline to do business with us due to their concerns regarding our financial condition. Additionally,

due to our liquidity constraints, we may be unable to aggressively price our services to win work in competitive bid situations. These impediments to working with clients, vendors and partners may reduce both our overall revenues and profitability, and consequently the value of our common stock.

Likewise, our declining financial performance has negatively affected employee morale and compensation. Due to financial constraints, we may have difficulty providing compensation that is sufficient to attract, retain and motivate employees, especially skilled professionals for whom sizable bonus payouts are a key element of market-driven cash compensation. Furthermore, the decline in the price of our common stock has eroded the value of our equity-based incentive programs. If we are unable to attract, retain and motivate employees despite our financial performance and within the resource constraints, it will impair our ability to effectively serve our clients, which in turn is likely to reduce both our overall revenues and profitability, and consequently the value of our common stock.

Our inability to comply with the listing requirements of the New York Stock Exchange could result in our common stock being delisted, which could affect our common stock's market price and liquidity and reduce our ability to raise capital.

During 2017, we received several notices from the NYSE indicating that the average closing price of our common stock had fallen below \$1.00 per share over a period of 30 consecutive trading days, which is the minimum average share price for continued listing on the NYSE under Rule 802.01C of the NYSE Listed Company Manual. This compelled us to effect a 1-for-10 reverse stock split on January 31, 2018.

Although the NYSE has notified us that we have cured the average closing price requirement, additional NYSE continued listing requirements include that we maintain an average market capitalization of over \$50 million (measured over a consecutive 30 trading-day periods) when our stockholders' equity is less than \$50 million, as it recently has been (the "Market Capitalization Listing Requirement").

On October 31, 2018, we disclosed that we received a notice from the NYSE that we were not in compliance with the "Market Capitalization Listing Requirement".

The NYSE accepted our plan of definitive action to bring us into compliance with the Market Capitalization Listing Requirement in January 2019, thereby delaying any decision to delist us for up to 18 months. The NYSE will closely monitor our attempt to implement our plan over the next 18 months and our failure to achieve the initiatives and goals included in the plan will result in our being subject to a NYSE trading suspension at the time any initiative or goal is not met. In order to regain compliance with the Market Capitalization Listing Requirement, we will have to maintain the required \$50 million global market capitalization. Our failure to do so will result in a suspension by the NYSE of trading in our common stock and the initiation of procedures to delist our common stock.

In addition, if our average global market capitalization over a consecutive 30 trading-day period is less than \$15 million, the NYSE will promptly initiate suspension and delisting procedures and, under the NYSE's continued listing standards, we will not have any opportunity to regain compliance and our common stock will be delisted.

Our common stock could be delisted if we are not in compliance with this (or any other such) requirement and are unable to regain compliance during any applicable cure or grace period. A delisting of our common stock could negatively impact us by, among other things, reducing the liquidity and market price of our common stock and reducing the number of investors willing to hold or acquire our common stock. A suspension or delisting could also adversely affect our relationships with our business partners and suppliers and customers' and potential customers' decisions to purchase our products and services, and would have a material, adverse impact on our business, operating results and financial condition. In addition, a suspension or delisting would impair our ability to raise additional capital through equity or debt financing and our ability to attract and retain employees by means of equity compensation.

In the event of a delisting, our common stock could be traded on the over-the-counter bulletin board, or in the so-called "pink sheets." In the event of such trading, it is highly likely that there would be: significantly less liquidity in the trading of our common stock; decreases in institutional and other investor demand for our common stock, coverage by securities analysts, market making activity and information available concerning trading prices and volume; and fewer broker-dealers willing to execute trades in our common stock. The occurrence of any of these events could result in a further decline in the market price of our common stock. The occurrence of any of these events could impair our ability to retain and attract employees and members of management.

Privacy, information security and other regulatory requirements may prevent or impair our ability to offer our products and services.

We are subject to and affected by numerous laws, regulations, and industry standards that regulate direct marketing activities, including those that address privacy, data protection, information security, and marketing communications. Please refer to the section above entitled "Item 1. Business - Government Regulation" for additional

information regarding some of these regulations.

As a result of increasing public awareness and interest in privacy rights, data protection and access, information security, environmental protection, and other concerns, national and local governments and industry organizations regularly consider and adopt new laws, rules, regulations, and guidelines that restrict or regulate marketing communications, services, and products. Examples include data encryption standards, data breach notification requirements, registration/licensing requirements (often with fees), consumer choice, notice, and consent restrictions and penalties for infractions, among others. In addition, the new European General Data Protection Regulation (GDPR) took effect in May 2018 and applied to all of our products and services that provide service in Europe. The GDPR includes operational requirements for companies that receive or process personal data of residents of the EU that are different than those currently in place in the EU. For example, we may be required to implement measures to change or limit (by age, use or geography) our service offerings. We may also be required to obtain consent and/or offer new controls to existing and new users in Europe before processing data for certain aspects of our services. In addition, the GDPR will include significant penalties for non-compliance. We anticipate that additional restrictions and regulations will continue to be proposed and adopted in the future. The Philippines has also adopted the Data Privacy Act of 2012 (Republic Act 10173)

12

which mirrors most important aspects of the GDPR and is likely to have a similar effect on our operations in and involving the Philippines.

Our business may also be affected by the impact of these restrictions and regulations on our clients and their marketing activities. In addition, as we acquire new capabilities and deploy new technologies to execute our strategy, we may be exposed to additional types or layers of regulation. Current and future restrictions and regulations could increase compliance requirements and costs, and restrict or prevent the collection, management, aggregation, transfer, use or dissemination of information (especially with respect to personal information), or change the requirements therefore so as to require other changes to our business or that of our clients. Additional restrictions and regulations may limit or prohibit current practices regarding marketing communications and information quality solutions. For example, many states and countries have considered implementing "do not contact" legislation that could impact our business and the businesses of our clients and customers. In addition, continued public interest in privacy rights, data protection and access, and information security may result in the adoption of further industry guidelines that could impact our direct marketing activities and business practices.

We cannot predict the scope of any new laws, rules, regulations, or industry guidelines or how courts or agencies may interpret current ones. Additionally, enforcement priorities by governmental authorities will change over time, which may impact our business. Understanding the laws, rules, regulations, and guidelines applicable to specific client multichannel engagements and across many jurisdictions poses a significant challenge, as such laws, rules, regulations, and guidelines are often inconsistent or conflicting, and are sometimes at odds with client objectives. Our failure to properly comply with these regulatory requirements and client needs may materially and adversely affect our business. General compliance with privacy, data protection, and information security obligations is costly and time-consuming, and we may encounter difficulties, delays, or significant expenses in connection with our compliance, or because of our clients' need to comply. We may be exposed to significant penalties, liabilities, reputational harm, and loss of business in the event that we fail to comply. We could suffer a material adverse impact on our business due to the enactment or enforcement of legislation or industry regulations affecting us and/or our clients, the issuance of judicial or governmental interpretations, changed enforcement priorities of governmental agencies, or a change in behavior arising from public concern over privacy, data protection, and information security issues.

Consumer perceptions regarding the privacy and security of their data may prevent or impair our ability to offer our products and services.

Various local, national, and international regulations, as well as industry standards, give consumers varying degrees of control as to how certain data regarding them is collected, used, and shared for marketing purposes. If, due to privacy, security, or other concerns, consumers exercise their ability to prevent or limit such data collection, use, or sharing, it may impair our ability to provide marketing to those consumers and limit our clients' demand for our services. Additionally, privacy and security concerns may limit consumers' willingness to voluntarily provide data to our customers or marketing companies. Some of our services depend on voluntarily provided data and therefore may be impaired without such data.

If we do not prevent security breaches and other interruptions to our infrastructure, we may be exposed to lawsuits, lose customers, suffer harm to our reputation, and incur additional costs.

The services we offer involve the transmission of large amounts of sensitive and proprietary information over public communications networks, as well as the processing and storage of confidential customer information. Unauthorized access, remnant data exposure, computer viruses, denial of service attacks, accidents, employee error or malfeasance, "social engineering" and "phishing" attacks, intentional misconduct by computer "hackers" and other disruptions can occur, and infrastructure gaps, hardware and software vulnerabilities, inadequate or missing security controls, and exposed or

unprotected customer data can exist that (i) interfere with the delivery of services to our customers, (ii) impede our customers' ability to do business, or (iii) compromise the security of systems and data, which exposes information to unauthorized third parties. We are a target of cyber-attacks of varying degrees on a regular basis. Although we maintain insurance which may respond to cover some types of damages incurred by damage to, breaches of, or problems with, our information and telecommunications systems, such insurance is limited and expensive, and may not respond or be sufficient to offset the costs of such damages, and therefore such damages may materially harm our business.

Our reputation and business results may be adversely impacted if we, or subcontractors upon whom we rely, do not effectively protect sensitive personal information of our clients and our clients' customers.

Current privacy and data security laws and industry standards impact the manner in which we capture, handle, analyze, and disseminate customer and prospect data as part of our client engagements. In many instances, our client contracts also mandate privacy and security practices. If we fail to effectively protect and control information, especially sensitive personal information (such as personal health information, social security numbers, or credit card numbers) of our clients and their customers or prospects in accordance with these requirements, we may incur significant expense, suffer reputational harm, and loss of business, and, in certain cases, be subjected to regulatory or governmental sanctions or litigation. These risks may be increased due to our reliance on subcontractors and other third parties in providing a portion of our overall services in certain engagements. We cannot guarantee that these third parties will effectively protect and handle sensitive personal information or other confidential information, or that we will have adequate recourse against these third parties in that event.

If our facilities are damaged, or if we are unable to access and use our facilities, our business and results of operations will be adversely affected.

Our operations rely on the ability of our employees to work at specially-equipped facilities to perform services for our clients. Although we have some excess capacity and redundancy, we do not have sufficient excess capacity or redundancy (in equipment, facilities, or personnel) to maintain service and operational levels for extended periods if we are unable to use one of our major facilities. Should we lose access to a facility for any reason, our service levels are likely to decline or be suspended, clients would go without service or secure replacement services from a competitor. As consequence of such an event, we would suffer a reduction in revenues and harm to (and loss of) client relationships.

Significant system disruptions, loss of data center capacity or interruption of telecommunication links could adversely affect our business and results of operations.

Our business is heavily dependent upon data centers and telecommunications infrastructures, which are essential to both our call center services and our database services (which require that we efficiently and effectively create, access, manipulate, and maintain large and complex databases). In addition to the third-party data centers we use, we also operate several data centers to support both our own and our clients' needs in this regard, as well as those of some of our clients. Our ability to protect our operations against damage or interruption from fire, flood, tornadoes, power loss, telecommunications or equipment failure, or other disasters and events beyond our control is critical to our continued success. Likewise, as we increase our use of third-party data centers, it is critical that the vendors providing that service adequately protect their data centers from the same risks. Our services are very dependent on links to telecommunication providers. We believe we have taken reasonable precautions to protect our data centers and telecommunication links from events that could interrupt our operations. Any damage to the data centers we use or any failure of our telecommunications links could materially adversely affect our ability to continue services to our clients, which could result in loss of revenues, profitability and client confidence, and may adversely impact our ability to attract new clients and force us to expend significant company resources to repair the damage.

If our new leaders are unsuccessful, or if we continue to lose key management and are unable to attract and retain the talent required for our business, our operating results could suffer.

Over the past three years we have replaced many of our leaders (including our Chief Executive Officer, Chief Marketing Officer, and Chief Financial Officer) and we have eliminated or consolidated several leadership positions (including Chief Technology Officer, and Executive Vice President of Sales), resulting in a much smaller leadership team. If our new leaders fail in their new and additional roles and responsibilities (and more generally if we are unable

to attract additional leaders with the necessary skills to manage our business) our business and its operating results may suffer. Further, our prospects depend in large part upon our ability to attract, train, and retain experienced technical, client services, sales, consulting, marketing, and management personnel. While the demand for personnel is dependent on employment levels, competitive factors, and general economic conditions, our recent business performance may diminish our attractiveness as an employer. The loss or prolonged absence of the services of these individuals could have a material adverse effect on our business, financial position, or operating results.

We could fail to adequately protect our intellectual property rights and may face claims for intellectual property infringement.

Our ability to compete effectively depends in part on the protection of our technology, products, services, and brands through intellectual property right protections, including copyrights, database rights, trade secrets, trademarks, as well as through domain name registrations, and enforcement procedures. The extent to which such rights can be protected and enforced varies by jurisdiction, and capabilities we procure through acquisitions may have less protection than would be desirable for the use or scale we intend or need. Litigation involving patents and other intellectual property rights has become far more common and expensive in recent years, and we face the risk of additional litigation relating to our use or future use of intellectual property rights of third parties.

Despite our efforts to protect our intellectual property, unauthorized parties may attempt to copy or otherwise obtain and use our proprietary information and technology. Monitoring unauthorized use of our intellectual property is difficult, and unauthorized use of our intellectual property may occur. We cannot be certain that trademark registrations will be issued, nor can we be certain that any issued trademark registrations will give us adequate protection from competing products. For example, others may develop competing technologies or databases on their own. Moreover, there is no assurance that our confidentiality agreements with our employees or third parties will be sufficient to protect our intellectual property and proprietary information.

Third-party infringement claims and any related litigation against us could subject us to liability for damages, significantly increase our costs, restrict us from using and providing our technologies, products or services or operating our business generally, or require changes to be made to our technologies, products, and services. We may also be subject to such infringement claims against us by third parties and may incur substantial costs and devote significant management resources in responding to such claims, as we have in the recent past. We have been, and continue to be, obligated under some agreements to indemnify our clients as a result of claims that we infringe on the proprietary rights of third parties. These costs and distractions could cause our business to suffer. In addition, if any party asserts an infringement claim, we may need to obtain licenses to the disputed intellectual property. We cannot assure you, however, that we will be able to obtain these licenses on commercially reasonable terms or that we will be able to obtain any licenses at all. The failure to obtain necessary licenses or other rights may have an adverse effect on our ability to provide our products and services.

Breaches of security, or the perception that e-commerce is not secure, could severely harm our business and reputation.

Business-to-business and business-to-consumer electronic commerce requires the secure transmission of confidential information over public networks. Some of our products and services are accessed through or are otherwise dependent on the internet. Security breaches in connection with the delivery of our products and services, or well-publicized security breaches that may affect us or our industry (such as database intrusion) could be severely detrimental to our business, operating results, and financial condition. We cannot be certain that advances in criminal capabilities, cryptography, or other fields will not compromise or breach the technology protecting the information systems that deliver our products, services, and proprietary database information.

Data suppliers could withdraw data that we rely on for our products and services.

We purchase or license much of the data we use for ourselves and for our clients. There could be a material adverse impact on our business if owners of the data we use were to curtail access to the data or materially restrict the authorized uses of their data. Data providers could withdraw their data if there is a competitive reason to do so, if there is pressure from the consumer community or if additional regulations are adopted restricting the use of the data. We also rely upon data from other external sources to maintain our proprietary and non-proprietary databases, including

data received from customers and various government and public record sources. If a substantial number of data providers or other key data sources were to withdraw or restrict their data, if we were to lose access to data due to government regulation, or if the collection of data becomes uneconomical, our ability to provide products and services to our clients could be materially and adversely affected, which could result in decreased revenues, net income, and earnings per share.

We may be unable to make dispositions of assets on favorable terms, or at all.

In 2018, we sold our 3Q Digital business (which we purchased in 2015 for \$30 million in cash plus an earn-out of up to \$35 million) for \$5 million in cash and assignment of the earn-out obligation. In the future, we may determine to divest certain assets or businesses consistent with our corporate strategy. The price we obtain for such assets or businesses will be driven by performance of those businesses and the current market demand for such assets, and we may not be able to realize a profit upon sale. If we are unable to make dispositions in a timely manner or at profitable price, our business, net income, and earnings per share could be materially and adversely affected.

We are vulnerable to increases in postal rates and disruptions in postal services.

Our services depend on the USPS and other commercial delivery services to deliver products. Standard postage rates have increased in recent years (most recently in January 2019) and may continue to do so at frequent and unpredictable intervals. Postage rates influence the demand for our services even though the cost of mailings is typically borne by our clients (and is not directly reflected in our revenues or expenses) because clients tend to reduce other elements of marketing spending to offset increased postage costs. Accordingly, future postal increases or disruptions in the operations of the USPS may have an adverse impact on us.

In addition, the USPS has had significant financial and operational challenges recently. In reaction, the USPS has proposed many changes in its services, such as delivery frequency and facility access. These changes, together with others that may be adopted, individually or in combination with other market factors, could materially and negatively affect our costs and ability to meet our clients' expectations.

We are vulnerable to increases in paper prices.

Price of print materials are subject to fluctuations. Increased paper costs could cause our customers to reduce spending on other marketing programs, or to shift to formats, sizes, or media which may be less profitable for us, in each case potentially materially affecting our revenues and profits.

We are unlikely to declare cash dividends or repurchase our shares.

Although our board of directors has in the past authorized the payment of quarterly cash dividends on our common stock, we announced in 2016 that we did not plan to declare any further dividends. In addition, although our board has authorized stock purchase programs (and we repurchased shares as recently as 2015), we are unlikely to make any repurchases in the near term. Decisions to pay dividends on our common stock or to repurchase our common stock will be based upon periodic determinations by our board that such dividends or repurchases are both in compliance with all applicable laws and agreements and in the best interest of our stockholders after considering our financial condition and results of operations, the price of our common stock, credit conditions, and such other factors as are deemed relevant by our board. The failure to pay a cash dividend or repurchase stock could adversely affect the market price of our common stock.

Interest rate increases could affect our results of operations, cash flows and financial position.

Interest rate fluctuations in Europe and the U.S. can affect the amount of interest we pay related to our debt and the amount we earn on cash equivalents. Borrowings under our Texas Capital Bank credit facility bear interest at variable rates based upon the prime rate or LIBOR. Our results of operations, cash flows, and financial position could be materially or adversely affected by significant increases in interest rates. We also have exposure to interest rate fluctuations in the U.S., specifically money market, commercial paper, and overnight time deposit rates, as these affect our earnings on excess cash. Even with the offsetting increase in earnings on excess cash in the event of an interest rate increase, we cannot be assured that future interest rate increases will not have a material adverse impact on our business, financial position, or operating results.

We are subject to risks associated with operations outside the U.S.

Harte Hanks conducts business outside of the U.S. During 2018, approximately 14.5% of our revenues were derived from operations outside the U.S., primarily Europe and Asia. We may expand our international operations in the future as part of our growth strategy. Accordingly, our future operating results could be negatively affected by a variety of factors, some of which are beyond our control, including:

- changes in local, national, and international legal requirements or policies resulting in burdensome government controls, tariffs, restrictions, embargoes, or export license requirements;
- higher rates of inflation;
- the potential for nationalization of enterprises;
- less favorable labor laws that may increase employment costs and decrease workforce flexibility;
- potentially adverse tax treatment;
- less favorable foreign intellectual property laws that would make it more difficult to protect our intellectual property from misappropriation;
- more onerous or differing data privacy and security requirements or other marketing regulations;

longer payment cycles;
social, economic, and political instability;
the differing costs and difficulties of managing international operations;
modifications to international trade policy, including changes to or repeal of the North American Free Trade Agreement or the imposition of increased or new tariffs, quotas or trade barriers on key commodities; and
geopolitical risk and adverse market conditions caused by changes in national or regional economic or political conditions (which may impact relative interest rates and the availability, cost, and terms of mortgage funds), including with regard to Brexit.

In addition, exchange rate fluctuations may have an impact on our future costs or on future cash flows from foreign investments. We have not entered into any foreign currency forward exchange contracts or other derivative instruments to hedge the effects of adverse fluctuations in foreign currency exchange rates. The various risks that are inherent in doing business in the U.S. are also generally applicable to doing business anywhere else and may be exacerbated by the difficulty of doing business in numerous sovereign jurisdictions due to differences in culture, laws, and regulations.

We have identified material weaknesses in our internal control over financial reporting that could, if not remediated, result in material misstatements in our financial statements. In addition, current and potential stockholders could lose confidence in our financial reporting, which could cause our stock price to decline.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the company's annual or interim consolidated financial statements will not be prevented or detected on a timely basis. We identified control deficiencies in our financial reporting process that constitute material weaknesses; as of December 31, 2018, two of those material weaknesses were not yet remediated.

As discussed in Part II, Item 9A, material weaknesses in the following areas existed as of December 31, 2018; (i) two of five components of internal control as defined by COSO (control activities and information and communication), and (ii) the effectiveness of internal controls over the completeness and accuracy of data used to recognize and record revenue and related accounts such as accounts receivable, accrued revenue and deferred revenue, and the precision of management's review of controls over revenue. As a result of these material weaknesses management has determined that both our disclosure controls and procedures and internal control over financial reporting were not effective as of December 31, 2018.

In light of the material weaknesses identified, we performed additional analysis and procedures to ensure that our consolidated financial statements were prepared in accordance with GAAP and fairly reflected our financial position and results of operations as of and for the year ended December 31, 2018. Prior to our December 31, 2016 fiscal year end, we began taking a number of actions in order to remediate the material weaknesses described above, including developing a plan to redesign processes and controls, and in 2017 we engaged specialists to assist in the comprehensive review, design, and implementation of new internal controls. Improvements in the design and operating effectiveness of internal controls over financial reporting that we have affected to date have led to the successful remediation of several previously disclosed material weaknesses including contingent consideration, recoverability of deferred tax assets, financial close and reporting, and three of the five components of internal control as defined by COSO (control environment, risk assessment and monitoring). Our remediation efforts will continue into the fiscal year ending December 31, 2019. We expect to incur additional costs remediating these material weaknesses.

Although we believe we are taking appropriate actions to remediate the control deficiencies identified and to strengthen our internal control over financial reporting, we may need to take additional measures to fully mitigate the material weaknesses discussed above. Measures to improve our internal controls may not be sufficient to ensure that our internal controls are effective or that the identified material weaknesses will not result in a material misstatement of our annual or interim consolidated financial statements. In addition, other material weaknesses or deficiencies may be identified in the future. If we are unable to correct material weaknesses in internal controls in a timely manner, our

ability to record, process, summarize, and report financial information accurately and within the time periods specified in the rules and forms of the SEC will be adversely affected. This failure could negatively affect the market price and trading liquidity of our common stock, cause investors to lose confidence in our reported financial information, subject us to civil and criminal investigations and penalties, and adversely impact our business and financial condition.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. Over time, controls may become inadequate because changes in conditions or deterioration in the degree of compliance with policies or procedures may occur. Implementation of new technology related to the control system may result

in misstatements due to errors that are not detected and corrected during testing. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Fluctuation in our revenue and operating results and other factors may impact the volatility of our stock price.

The price at which our common stock has traded in recent years has fluctuated greatly and has declined significantly. Our common stock price may continue to be volatile due to a number of factors including the following (some of which are beyond our control):

- variations in our operating results from period to period and variations between our actual operating results and the expectations of securities analysts, investors, and the financial community;
- unanticipated developments with client engagements or client demand, such as variations in the size, budget, or progress toward the completion of engagements, variability in the market demand for our services, client consolidations, and the unanticipated termination of several major client engagements;
- announcements of developments affecting our businesses;
- competition and the operating results of our competitors;
- the overall strength of the economies of the markets we serve and general market volatility; and
- other factors discussed elsewhere in this Item 1A, “Risk Factors.”

Because of these and other factors, investors in our common stock may not be able to resell their shares at or above their original purchase price.

Our certificate of incorporation and bylaws contain anti-takeover protections that may discourage or prevent strategic transactions, including a takeover of our company, even if such a transaction would be beneficial to our stockholders

Provisions contained in our certificate of incorporation and bylaws, in conjunction with provisions of the Delaware General Corporation Law, could delay or prevent a third party from entering into a strategic transaction with us, even if such a transaction would benefit our stockholders. For example, our certificate of incorporation and bylaws provide for a staggered board of directors, do not allow written consents by stockholders, and have strict advance notice and disclosure requirements for nominees and stockholder proposals.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our business is conducted in facilities worldwide containing aggregate space of approximately 1.3 million square feet. All facilities are held under leases, which expire at dates through 2025. See “Item 1 - Business - Facilities”.

ITEM 3. LEGAL PROCEEDINGS

Information regarding legal proceedings is set forth in Note I, Commitments and Contingencies, of the “Notes to Consolidated Financial Statements” and is incorporated herein by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock

Our common stock is listed on the NYSE under the symbol HHS. As of January 31, 2019, there are approximately 1617 common stockholders of record. The last reported share price of our common stock on March 15, 2019 was \$3.95.

Issuer Purchases of Equity Securities

The following table contains information about our purchases of equity securities during the fourth quarter of 2018:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan (2)	Maximum Dollar Amount that May Yet Be Spent Under the Plan
October 1 - 31, 2018	—	\$	—	\$ 11,437,544
November 1 - 30, 2018	—	\$	—	\$ 11,437,544
December 1 - 31, 2018	—	\$	—	\$ 11,437,544
Total	—	\$	—	

(1) Total number of shares purchased includes shares, if any, (i) purchased as part of our publicly announced stock repurchase program, and (ii) pursuant to our 2013 Omnibus Incentive Plan and applicable inducement award agreements with certain executives, withheld to pay withholding taxes upon the vesting of shares.

(2) During the fourth quarter of 2018, we did not purchase any shares of our common stock through our stock repurchase program that was publicly announced in August 2014. Under this program, from which shares can be purchased in the open market, our Board has authorized us to spend up to \$20.0 million to repurchase shares of our outstanding common stock. As of December 31, 2018, we have repurchased 150,667 shares and spent \$8.6 million under this authorization. Through December 31, 2018, we had repurchased a total of 6,788,798 shares at an average price of \$181.02 per share under this program and previously announced programs.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth our selected historical financial information for the periods ended and as of the dates indicated. You should read the following historical financial information along with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contained in this Form 10-K.

In thousands, except per share amounts	2018	2017
Statement of Comprehensive Income (loss) data		
Revenues	\$284,628	\$383,906
Operating income (loss) from continuing operations	(26,034)	(40,865)
Income (loss) from continuing operations	\$17,550	\$(41,860)
Earnings (loss) from continuing operations per common share—diluted	\$2.38	\$(6.76)
Weighted-average common and common equivalent shares outstanding—diluted	6,270	6,192
Cash dividends per share	\$—	\$—
Balance sheet data (at end of period)		
Cash and cash equivalents	\$20,882	\$8,397
Total assets	125,175	130,812
Total debt	14,200	—
Total stockholders’ equity (deficit)	(19,184)	(34,635)

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Note About Forward-Looking Statements

This report, including this Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”), contains “forward-looking statements” within the meaning of the federal securities laws. All such statements are qualified by the cautionary note included under Item 1A above, which is provided pursuant to the safe harbor provisions of Section 27A of the 1933 Act and Section 21E of the 1934 Act. Actual results may vary materially from what is expressed in or indicated by the forward-looking statements.

Overview

The following MD&A section is intended to help the reader understand the results of operations and financial condition of Harte Hanks. This section is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and the accompanying notes to the consolidated financial statements.

Harte Hanks partners with clients to deliver relevant, connected, and quality customer interactions. Our approach starts with discovery and learning, which leads to customer journey mapping, creative and content development, analytics, and data management, and ends with execution and support in a variety of digital and traditional channels. We do something powerful: we produce engaging and memorable customer interactions to drive business results for our clients, which is why Harte Hanks is known for developing better customer relationships and experiences and defining interaction-led marketing.

Our services offer a wide variety of integrated, multi-channel, data-driven solutions for top brands around the globe. We help our clients gain insight into their customers’ behaviors from their data and use that insight to create

innovative multi-channel marketing programs to deliver a return on marketing investment. We believe our clients' success is determined not only by how good their tools are, but how well we help them use the tools to gain insight and analyze their consumers. This results in a strong and enduring relationship between our clients and their customers. We offer a full complement of capabilities and resources to provide a broad range of marketing services, in media from direct mail to social media, including:

- agency and digital services;
- database marketing solutions and business-to-business lead generation;
- direct mail, logistics, and fulfillment; and

contact centers.

We are affected by the general, national, and international economic and business conditions in the markets where we and our customers operate. Marketing budgets are largely discretionary in nature, and as a consequence are easier for our clients to reduce in the short-term than other expenses. Further, our contracts with our clients generally don't require them to purchase a specified amount of services from us and could be cancelled on relatively short notice. Our revenues are also affected by the economic fundamentals of each industry that we serve, various market factors, including the demand for services by our clients, and the financial condition of and budgets available to specific clients, among other factors. We remain committed to making the investments necessary to execute our multichannel strategy while also continuing to adjust our cost structure to reduce costs in the parts of the business that are not growing as fast.

We continued to face a challenging competitive environment in 2018. The sale of 3Q Digital in 2018, and our recent preferred stock financing from Wipro, together with our restructuring efforts that are meant to decrease recurring expenses, are all parts of our efforts to prioritize our investments and focus on our core business of optimizing our clients' customer journey across an omni-channel delivery platform. We expect these actions will enhance our liquidity and financial flexibility. For additional information see Liquidity and Capital Resources. We have taken actions to return the business to profitability and improve our cash, liquidity, and financial position. This includes workforce restructuring, making investments targeted at improving product offerings, and implementing expense reductions.

Results of Operations

Operating results from operations were as follows:

In thousands, except per share amounts	Year Ended December 31,			
	2018		% Change	2017
Revenues	\$284,628	-25.9	%	\$383,906
Operating expenses	310,662	-26.9	%	424,771
Operating loss	\$(26,034)	36.3	%	\$(40,865)
Operating margin	(9.1)%	-14.2	%	(10.6)%
Other (income) and expenses	(25,472)	-333.9	%	10,889
Income tax benefit	(18,112)	83.1	%	(9,894)
Net Income (loss)	\$17,550	141.9	%	\$(41,860)
Diluted EPS from operations	\$2.38	135.2	%	\$(6.76)

Year ended December 31, 2018 vs. Year ended December 31, 2017

Revenues

Revenues were \$284.6 million in the year ended December 31, 2018, compared to \$383.9 million in the year ended December 31, 2017. These results reflected the impact of declines in all of our industry verticals. Our consumer brand, retail, B2B, transportation, financial services and healthcare verticals declined by \$29.9 million, or 33.8%, \$28.9 million, or 30.3%, \$19.2 million, or 23.1%, \$11.8 million, or 35.0%, \$6.3 million, or 10.4% and \$3.2 million, or 13.8%, respectively. These declines were partially due to the sale of 3Q Digital at the end of February 2018, which led to \$29.2 million of the revenue reduction from 2017 to 2018 and primarily impacted our B2B and Consumer verticals. Other causes of the decrease included lost clients and lower volumes from existing clients.

Among other factors, our revenue performance will depend on general economic conditions in the markets we serve and how successful we are at maintaining and growing business with existing clients, acquiring new clients, and meeting our clients' demands. We believe that, in the long-term, an increasing portion of overall marketing and advertising expenditures will be moved from other advertising media to targeted media, and that our business will benefit as a result. Targeted media advertising results can be more effectively tracked, enabling measurement of the return on marketing investment.

Operating Expenses

Operating expenses were \$310.7 million in the year ended December 31, 2018, compared to \$424.8 million in 2017. This \$114.1 million year-over-year decline was partially caused by the sale of 3Q Digital (\$26.8 million of total operating expense reduction). Labor costs decreased by \$66.4 million, or 28.8%, primarily due to lower payroll expense as a result of our expense reduction efforts and the sale of 3Q Digital (\$21.3 million). Production and distribution expenses declined \$8.8 million, or 8.1%, primarily due to the lower transportation expenses and the sale of 3Q Digital (\$2.1 million expense reduction compared to 2017). Advertising, Selling and General expenses declined \$6.2 million primarily due to a reduction in employee-related expenses and the sale of 3Q Digital (\$3.2 million expense reduction compared to 2017). Impairment of assets was \$4.9 million in 2018 compared to \$34.5 million goodwill impairment recorded in 2017. Depreciation, software and intangible asset amortization expense declined \$3.1 million from 2017 primarily due to lower capital expenditure and the elimination of the intangible assets upon the sale of 3Q Digital.

Our largest cost components are labor, outsourced costs, and mail transportation expenses. Each of these costs is somewhat variable and tends to fluctuate with revenues and the demand for our services. Mail transportation rates have increased over the last few years due to demand and supply fluctuations within the transportation industry. Future changes in mail transportation expenses will continue to impact our total production costs and total operating expenses and may have an impact on future demand for our supply chain management services.

Postage costs of mailings are borne by our clients and are not directly reflected in our revenues or expenses.

Operating Loss

Operating loss from operations was \$26.0 million in the year ended December 31, 2018, compared to \$40.9 million in the year ended December 31, 2017. The \$14.8 million decrease in operating loss reflected the impact of a decrease in revenue of \$99.3 million, offset by a larger \$114.1 million decrease in operating expenses.

Other (Income) Expense

Year ended December 31, 2018 vs. Year ended December 31, 2017

Total other income was \$25.5 million in the year ended December 31, 2018, compared to other expense of \$10.9 million in 2017. This \$36.4 million increase in other income was primarily attributable to the sale of 3Q Digital resulting in a gain of \$31 million.

Income Taxes

Year ended December 31, 2018 vs. Year ended December 31, 2017

Our 2018 income tax benefit is \$18.1 million. Favorably impacting our benefit was deductible basis on the sale of 3Q Digital (\$11.9 million), loss from deemed liquidation of foreign subsidiary (\$4.2 million), rate benefit from carryback of capital loss to 35% tax rate year (\$6.5 million) and return to provision differences (\$1.8 million). Unfavorably impacting our benefit was change in valuation allowance due to realization of deferred tax assets for current year operations and dividend inclusions from foreign subsidiaries related to current period Global Intangible Low Tax Income (GILTI) expense, the impact of which were \$3.4 million and \$2.8 million, respectively.

This compares to our 2017 income tax benefit of \$9.9 million. Unfavorably impacting our benefit was nondeductible goodwill associated with our impairment loss and the change in valuation allowance due to realization of deferred tax assets for current year operations, the impact of which were \$6.0 million and \$2.3 million, respectively. Favorably impacting our benefit was the enactment of the U.S. Tax Cuts and Jobs Act (the "Tax Reform Act"), the impact of which was a \$3.4 million credit. This was the result of remeasurement of our deferred tax balances for the reduction in the corporate tax rate from 35% to 21%, and remeasurement of the valuation allowance for application of provisions in the Tax Reform Act.

Net Income (loss)

Year ended December 31, 2018 vs. Year ended December 31, 2017

We recorded income of \$17.6 million and net loss from operations of \$41.9 million in 2018 and 2017, respectively. The increase in income from operations is the result of the \$31.0 million pre-tax gain recognized for the sale of 3Q Digital in February 2018, and the income tax benefit related to the items noted above, which was partially offset by the loss from operations.

Liquidity and Capital Resources

Sources and Uses of Cash

Our cash and cash equivalent balances were \$20.9 million and \$8.4 million as of December 31, 2018 and 2017. Our principal sources of liquidity are cash on hand, cash provided by operating activities, and borrowings. Our cash is primarily used for general corporate purposes, working capital requirements and capital expenditures.

At this time, we believe that we will be able to continue to meet our liquidity requirements and fund our fixed obligations (such as debt services, operating leases and unfunded pension plan benefit payments) and other cash needs for our operations for at least the next twelve months through a combination of cash on hand, cash flow from operations, a significant tax refund receivable and borrowings under the Texas Capital Credit Facility. Although the Company believes that it will be able to meet its cash needs for the foreseeable future, if unforeseen circumstances arise the company may need to seek alternative sources of liquidity.

Operating Activities

Net cash used in operating activities was \$9.2 million for the year ended December 31, 2018. This compared to cash used in operating activities of \$30.8 million for the year ending December 31, 2017. The \$21.6 million year-over-year decrease was primarily the result of change from net loss in 2017 to net income in 2018, a change in accrued liabilities, which included the impact of 2017 federal income tax payment due to the sale of our Trillium Software business in 2016, the impact of an increase in accounts payable during 2018, as compared to a decrease in 2017.

Investing Activities

Net cash used in investing activities was \$0.1 million for the year ended December 31, 2018. This compared to cash used in investing activities of \$5.7 million for the year ending December 31, 2017. The \$5.6 million decrease was due to the sale of 3Q Digital in late February 2018 and reduced capital expenditure in 2018.

Financing Activities

Net cash provided by financing activities was \$22.7 million for the year ended December 31, 2018 and net cash used in financing activities was \$1.5 million for the year ended December 31, 2017. The \$24.2 million increase in cash inflows in 2018 compared to 2017 was driven by the \$14.2 million borrowing under our revolver line and the issuance of \$9.7 million Series A Preferred Stock in 2018.

Foreign Holdings of Cash

Consolidated foreign holdings of cash as of December 31, 2018 and 2017 were \$2.6 million and \$2.6 million.

Credit Facilities

On April 17, 2017, we entered into a secured credit facility with Texas Capital Bank, N.A., that provides that we may borrow up to \$20 million from time to time (the "Texas Capital Credit Facility"). The Texas Capital Credit Facility is being used for general corporate purposes and to provide collateral for up to \$5.0 million of letters of credit issued by Texas Capital Bank. The Texas Capital Credit Facility is secured by substantially all of the company's assets and is guaranteed by HHS Guaranty, LLC, an entity formed to provide credit support for Harte Hanks by certain members of the Shelton family (descendants of one of our founders) that is otherwise not related to our company.

On January 9, 2018, we entered an amendment (the "First Amendment") to the Texas Capital Credit Facility. The First Amendment (i) increased the availability under the revolving credit facility from \$20 million to \$22 million and (ii) extended the term of the Texas

Capital Credit Facility one year to April 17, 2020. The Credit Facility remains secured by substantially all of our assets. At December 31, 2018, we had \$14.2 million outstanding borrowing under the Texas Capital facility. As of December 31, 2018, we had the ability to borrow up to an additional \$5 million under the facility.

Our fee for the collateral provided by HHS Guaranty, LLC was also changed from an annual fee of \$0.5 million to 2.0% of collateral actually pledged. For the year ended December 31, 2018, this fee amounted to \$0.5 million. See Note C, Long-Term Debt, in the Notes to Consolidated Financial Statements for further discussion.

At December 31, 2018 and 2017, we had letters of credit in the amount of \$2.8 million outstanding. No amounts were drawn against these letters of credit at December 31, 2018 and 2017. These letters of credit exist to support insurance programs relating to workers' compensation, automobile, and general liability. We had no other off-balance sheet arrangements at December 31, 2018 and 2017.

Contractual Obligations

Contractual obligations at December 31, 2018 are as follows:

In thousands	Total	2019	2020	2021	2022	2023	Thereafter
Debt	\$14,200	\$—	\$14,200	\$—	\$—	\$—	\$—
Interest on debt ⁽¹⁾	825	634	191	—	—	—	—
Operating lease obligations	35,018	9,645	8,815	7,425	5,456	2,349	1,328
Capital lease obligations	1,423	748	307	131	133	104	—
Purchase obligations and others	9,104	3,167	3,087	2,632	218	—	—
Unfunded pension plan benefit payments	17,680	1,684	1,714	1,742	1,786	1,836	8,918
Total contractual cash obligations	\$78,250	\$15,878	\$28,314	\$11,930	\$7,593	\$4,289	\$10,246

Dividends

We did not pay any dividends in 2018 and 2017. We currently intend to retain any future earnings and do not expect to pay dividends on our common stock. Any future dividend declaration can be made only upon, and subject to, approval of our Board, based on its business judgment.

Share Repurchase

During 2018 and 2017, we did not repurchase any shares of our common stock under our current stock repurchase program that was publicly announced in August 2014. Under our current program we are authorized to spend up to \$20.0 million to repurchase shares of our outstanding common stock. At December 31, 2018, we had authorization of \$11.4 million under this program. From 1997 through December 31, 2018, we repurchased 6.8 million shares for an aggregate of \$1.2 billion.

Outlook

We consider such factors as total cash and cash equivalents, current assets, current liabilities, total debt, revenues, operating income, cash flows from operations, investing activities, and financing activities when assessing our liquidity. Our management of cash is designed to optimize returns on cash balances and to ensure that it is readily available to meet our operating, investing, and financing requirements as they arise.

We believe that there are not any conditions or events, considered in the aggregate, that raise substantial doubt about our ability to continue as a going concern for the 12 months following the issuance of the financial statements.

Critical Accounting Policies

Critical accounting policies are defined as those that, in our judgment, are most important to the portrayal of our company's financial condition and results of operations and which require complex or subjective judgments or estimates. The areas that we believe involve the most significant management estimates and assumptions are detailed below. Actual results could differ materially from those estimates under different assumptions and conditions.

Our Significant Accounting policies are described in Note A, Significant Accounting Policies, in the Notes to Consolidated Financial Statement.

Revenue Recognition

Application of various accounting principles in U.S. GAAP related to measurement and recognition of revenue requires us to make significant judgments and estimates. Specifically, complex arrangements with non-standard terms and conditions may require significant contract interpretation to determine appropriate accounting.

We recognize revenue upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to be entitled to receive in exchange for those products or services. We apply the following five-step revenue recognition model:

- 1. Identification of the contract, or contracts, with a customer
- 2. Identification of the performance obligations in the contract
- 3. Determination of the transaction price
- 4. Allocation of the transaction price to the performance obligations in the contract
- 5. Recognition of revenue when (or as) we satisfy the performance obligation

Certain client programs provide for adjustments to billings based upon whether we achieve certain performance criteria. In these circumstances, revenue is recognized when the foregoing conditions are met. We record revenue net of any taxes collected from customers and subsequently remitted to governmental authorities. Any payments received in advance of the performance of services or delivery of the product are recorded as deferred revenue until such time as the services are performed or the product is delivered. Costs incurred for search engine marketing solutions and postage costs of mailings are billed to our clients and are not directly reflected in our revenue.

Income Taxes

We are subject to income taxes in the United States and numerous other jurisdictions. Significant judgment is required in determining our provision for income taxes and income tax assets and liabilities, including evaluating uncertainties in the application of accounting principles and complex tax laws.

We record a provision for income taxes for the anticipated tax consequences of the reported results of operations using the asset and liability method. Under this method, we recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities, as well as for operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using the tax rates that are expected to apply to taxable income for the years in which those tax assets and liabilities are expected to be realized or settled. We record a valuation allowance to reduce our deferred tax assets to the net amount that we believe is more likely than not to be realized. For additional information on the valuation allowance see Note D, Income Taxes, in the Notes to Consolidated Financial Statements.

We recognize tax benefits from uncertain tax positions only if we believe that it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. Although we believe that we have adequately reserved for our uncertain tax positions, we can provide no assurance that the final tax outcome of these matters will not be materially different. We adjust these reserves when facts and circumstances change, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made and could have a material impact on our financial condition and operating results. The provision for income taxes includes the effects of any reserves that we believe are

appropriate, as well as the related net interest and penalties.

Recent Accounting Pronouncements

See Note A, Significant Accounting Policies, in the Notes to Consolidated Financial Statements for a discussion of certain accounting standards that we have recently adopted and certain accounting standards that we have not yet been required to adopt and may be applicable to our future financial condition and results of operations.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk includes the risk of loss arising from adverse changes in market rates and prices. We face market risks related to interest rate variations and to foreign exchange rate variations. From time to time, we may utilize derivative financial instruments to manage our exposure to such risks.

25

The interest rate on the Texas Capital Credit Facility is variable based upon the prime rate or LIBOR and, therefore, is affected by changes in market interest rates. We estimate that a 100-basis point increase in market interest rates on the actual borrowings in 2018 would have an immaterial impact on our interest expense. At December 31, 2018, the company had \$14.2M of debt outstanding under the Texas Capital Credit Facility. The nature and amount of our borrowings can be expected to fluctuate as a result of business requirements, market conditions, and other factors. Due to our overall debt level and cash balance at December 31, 2018, anticipated cash flows from operations, and the various financial alternatives available to us, we do not believe that we currently have significant exposure to market risks associated with an adverse change in interest rates. At this time, we have not entered into any interest rate swap or other derivative instruments to hedge the effects of adverse fluctuations in interest rates.

Our earnings are also affected by fluctuations in foreign currency exchange rates as a result of our operations in foreign countries. Our primary exchange rate exposure is to the Euro, British Pound Sterling, and Philippine Peso. We monitor these risks throughout the normal course of business. The majority of the transactions of our U.S. and foreign operations are denominated in the respective local currencies. Changes in exchange rates related to these types of transactions are reflected in the applicable line items making up operating income in our Consolidated Statements of Comprehensive Income (Loss). Due to the current level of operations conducted in foreign currencies, we do not believe that the impact of fluctuations in foreign currency exchange rates on these types of transactions is significant to our overall annual earnings. A smaller portion of our transactions are denominated in currencies other than the respective local currencies. For example, intercompany transactions that are expected to be settled in the near-term are denominated in U.S. Dollars. Since the accounting records of our foreign operations are kept in the respective local currency, any transactions denominated in other currencies are accounted for in the respective local currency at the time of the transaction. Any foreign currency gain or loss from these transactions, whether realized or unrealized, results in an adjustment to income, which is recorded in "Other, net" in our Consolidated Statements of Comprehensive Income (Loss). Transactions such as these amounted to \$0.5 million pre-tax currency transaction gain in 2018 and \$0.4 million in pre-tax currency transaction loss in 2017. At this time, we are not party to any foreign currency forward exchange contracts or other derivative instruments to hedge the effects of adverse fluctuations in foreign currency exchange rates.

We do not enter into derivative instruments for any purpose. We do not speculate using derivative instruments.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The Financial Statements required to be presented under Item 8 are presented in the Consolidated Financial Statements and the notes thereto beginning at page 38 of this Form 10-K (Financial Statements).

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and

communicated to management, including our CEO, CFO, and Corporate Controller as appropriate to allow timely decisions regarding required disclosure.

Our management, including our CEO, CFO, and Corporate Controller evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Exchange Act as of December 31, 2018, the end of the period covered by this Annual Report on form 10-K. Based upon such evaluation, our CEO, CFO, and Corporate Controller concluded that our disclosure controls and procedures were not effective solely due to the material weaknesses in our internal controls over financial reporting that are described below.

Notwithstanding the material weaknesses described below, based on the additional analysis and other post-closing procedures performed, we believe the consolidated financial statements included in this Annual Report on Form 10-K are fairly presented in all material respects, in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”).

Management’s Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)). Our internal control over financial reporting is a process designed by, or under the supervision of our CEO and CFO to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with U.S. GAAP.

Management evaluated, under the supervision of our CEO, CFO, and Corporate Controller, the design and effectiveness of the Company's internal control over financial reporting based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organization of the Treadway Commission ("COSO"). Based on this assessment, management concluded that internal control over financial reporting was not effective because material weaknesses existed at December 31, 2018 as described below.

A material weakness, as defined in the Exchange Act Rule 12b-2, is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. We identified material weaknesses in each of the following areas.

Control Activities and Information and Communication

We identified deficiencies in aggregate that constitute material weaknesses in two of the five components of internal control as defined by COSO (control environment, risk assessment, control activities, information and communication and monitoring). In particular, controls related to the following were not effectively designed and implemented:

Information and Communication

We did not design and maintain effective controls to obtain, generate and communicate relevant and accurate information to support the function of internal control over financial reporting.

We did not use an adequate level of precision in our review of information used in certain controls.

These deficiencies create a reasonable possibility that a material misstatement of the annual or interim financial statements would not have been prevented or detected on a timely basis. Further, the above material weakness contributed to the following additional material weakness at the control-activity level:

Revenue Recognition

Management did not design and maintain effective controls over the completeness and accuracy of data used to recognize and record revenue and related accounts such as accounts receivable, accrued revenue, contract assets, deferred revenue and related disclosures. We did not use an adequate level of precision in performance of controls over revenue.

Deloitte & Touche LLP, our independent registered public accounting firm, has issued an audit report on the effectiveness of the company's internal control over financial reporting as of December 31, 2018.

Changes in Internal Control over Financial Reporting

Improvements in the design and operating effectiveness of internal controls over financial reporting that we have affected to date have led to the successful remediation of several previously disclosed material weaknesses including monitoring, control environment and risk assessment. Other than the material weaknesses discussed above, and the successful remediation of previously disclosed material weaknesses related to monitoring, control environment and

risk assessment, there have been no changes in our internal controls over financial reporting during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Remediation Plan for Material Weaknesses in Internal Control over Financial Reporting

Management has been actively engaged in remediation efforts to address the material weaknesses throughout fiscal year 2018 and these efforts will continue into fiscal year 2019. We have made progress towards addressing the weakness in information and communication by preparing a comprehensive listing of applications and assessing each to determine its impact on financial reporting. We have identified and documented all the systems utilized as we redesigned processes and controls. We have documented which reports are used in the execution of controls.

Significant progress has been made towards addressing the weakness in revenue recognition. Walkthroughs have been performed for all significant revenue streams and flow charts have been completed to document these processes. Current key controls have been assessed and mapped to risks within the process. Additional key controls have been identified and designed. We have begun implementing new controls and enhancing the reviews and documentation of currently implemented controls.

We continue to work with the third-party specialists we engaged to review, document, and (as needed) supplement our controls, with the goal of designing and implementing controls that not only better address both the accuracy and precision of management's review, but also enhance our ability to manage our business as it has evolved. In 2018, significant progress was made in relation to the design and implementation of controls, however, there is still additional work to be done to completely remediate the material weakness. While we have made improvements to many of our control activities, management may determine that additional steps may be necessary to remediate the material weaknesses.

While we intend to resolve all the material control deficiencies discussed above, we cannot provide any assurance that these remediation efforts will be successful, will be completed quickly, or that our internal control over financial reporting will be effective as a result of these efforts by any particular date.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and Board of Directors of Harte Hanks, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Harte Hanks, Inc. and subsidiaries (the “Company”) as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, because of the effect of the material weaknesses identified below on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2018, of the Company and our report dated March 18, 2019 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company’s adoption of a new accounting standard.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Material Weaknesses

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial statements will not be prevented or detected on a timely basis. Management identified material weaknesses, which

affected the information and communication and control activities components of internal control as defined by COSO. Management also identified material weaknesses over the accounting for revenue as management did not design and maintain effective controls over the completeness and accuracy of data used to recognize and record revenue and related accounts such as accounts receivable, accrued revenue, contract assets, deferred revenue, and controls related to revenue disclosures and the precision of management's revenue review controls.

These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements as of and for the year ended December 31, 2018, of the Company, and this report does not affect our report on such financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Harte Hanks, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Harte Hanks, Inc. and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of comprehensive income (loss), changes in equity, and cash flows for the years then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on the criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 18, 2019 expressed an adverse opinion on the Company's internal control over financial reporting because of material weaknesses.

Change in Accounting Principle

As discussed in Note B to the financial statements, the Company changed its method of accounting for revenue from contracts with customers in 2018 due to adoption of the new revenue standard. The Company adopted the new revenue standard using a modified retrospective approach.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Harte Hanks, Inc. and Subsidiaries Notes to Consolidated Financial Statements

Note A — Overview and significant Accounting Policies

Background

Harte Hanks, Inc. ("Harte Hanks," "we," "our," or "us") is a purveyor of data-driven, omni-channel marketing and customer relationship solutions and logistics. The Company has robust capabilities that offer clients the strategic guidance they need across the customer data landscape as well as the executional know-how in database build and management, data analytics, digital media, direct mail, customer contact, client fulfillment and marketing and product logistics. Harte Hanks solves marketing, commerce and logistical challenges for some of the world's leading brands in North America, Asia-Pacific and Europe.

The Company operates as one reportable segment. Our Chief Executive Officer is considered to be our chief operating decision maker. He reviews our operating results on an aggregate basis for purposes of allocating resources and evaluating financial performance.

Reverse Stock Split

On January 31, 2018, we executed a 1-for-10 reverse stock split (the "Reverse Stock Split"). Pursuant to the Reverse Stock Split, every 10 pre-split shares were exchanged for one post-split share of the Company's Common Stock. No fractional shares were issued in connection with the Reverse Stock Split. Stockholders who would otherwise have held a fractional share of the Common Stock received a cash payment in lieu thereof. In addition, our authorized Common Stock was reduced from 250 million to 25 million shares. The number of authorized shares of preferred stock remains unchanged at one million shares.

Geographic Concentrations

Depending on the needs of our clients, our services are provided through an integrated approach through 23 facilities worldwide, of which 4 are located outside of the U.S.

Information about the operations in different geographic areas:

	Year Ended		December 31,	
In thousands	2018	2017	2018	2017
Revenue (1)				
United States	\$243,298	\$330,944		
Other countries	41,330	52,962		
Total revenue	\$284,628	\$383,906		
			December 31,	
In thousands			2018	2017
Property, plant and equipment (2)				
United States			\$11,647	\$18,789
Other countries			1,945	2,998
Total property, plant and equipment			\$13,592	\$21,787

(1) Geographic revenues are based on the location of the service being performed.

(2) Property, plant and equipment are based on physical location.

Consolidation

The consolidated financial statements and accompanying notes are prepared in conformity with accounting principles generally accepted in United States ("U.S. GAAP").

The accompanying consolidated financial statements present the financial position and the results of operations and cash flows of Harte Hanks, Inc., and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

As used in this report, the terms "Harte Hanks," "we," "us," or "our" may refer to Harte Hanks, Inc., one or more of our consolidated subsidiaries, or all of them taken as a whole.

Use of Estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results and outcomes could differ from those estimates and assumptions. Such estimates include, but are not limited to, estimates related to pension accounting; fair value for purposes of assessing goodwill, long-lived assets, and intangible assets for impairment; income taxes; and contingencies. On an ongoing basis, management reviews its estimates based on currently available information. Changes in facts and circumstances could result in revised estimates and assumptions.

Operating Expense Presentation in Consolidated Statements of Comprehensive Income (Loss)

The “Labor” line in the Consolidated Statements of Comprehensive Income (Loss) includes all employee payroll and benefits, including stock-based compensation, along with temporary labor costs. The “Production and distribution” and “Advertising, selling, general and administrative” lines do not include labor, depreciation, or amortization.

Revenue Recognition

We recognize revenue upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to be entitled to receive in exchange for those products or services. We apply the following five-step revenue recognition model:

- 1 Identification of the contract, or contracts, with a customer
- 2 Identification of the performance obligations in the contract
- 3 Determination of the transaction price
- 4 Allocation of the transaction price to the performance obligations in the contract
- 5 Recognition of revenue when (or as) we satisfy the performance obligation

Certain client programs provide for adjustments to billings based upon whether we achieve certain performance criteria. In these circumstances, revenue is recognized when the foregoing conditions are met. We record revenue net of any taxes collected from customers and subsequently remitted to governmental authorities. Any payments received in advance of the performance of services or delivery of the product are recorded as deferred revenue until such time as the services are performed or the product is delivered. Costs incurred for search engine marketing solutions and postage costs of mailings are billed to our clients and are not directly reflected in our revenue.

Revenue from agency and digital services, direct mail, and contact center is recognized as the work is performed. Fees for these services are determined by the terms set forth in the contact with the client. These are typically set at a fixed price or rate by transaction occurrence, service provided, time spent, or product delivered.

For arrangements requiring design and build of a database, revenue is not recognized until client acceptance occurs. Up-front fees billed during the setup phase for these arrangements are deferred and direct build costs are capitalized. Pricing for these types of arrangements are typically based on a fixed price determined in the contract. Revenue from other database marketing solutions is recognized ratably over the contractual service period. Pricing for these services are typically based on a fixed price per month or per contract.

Fair Value of Financial Instruments

FASB ASC 820, Fair Value Measurements and Disclosures, ("ASC 820") defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a fair value hierarchy that prioritizes the inputs used in valuation methodologies into three levels:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Because of their maturities and/or variable interest rates, certain financial instruments have fair values approximating their carrying values. These instruments include cash and cash equivalents, accounts receivable, and trade payables. The fair value of the assets in our funded pension plan is disclosed in Note F, Employee Benefit Plans. Tradename and non-compete agreement intangible assets are disclosed in Note E, Goodwill and Other Intangible Assets. The summary of our acquisition related contingent consideration accounted for at fair value on a recurring basis is disclosed in Note M, Disposition.

Cash Equivalents

All highly liquid investments with an original maturity of 90 days or less at the time of purchase are considered to be cash equivalents. Cash equivalents are carried at cost, which approximates fair value.

Allowance for Doubtful Accounts

We maintain our allowance for doubtful accounts adequate to reduce accounts receivable to the amount of cash expected to be collected. The methodology used to determine the minimum allowance is based on our prior collection experience and is generally related to the accounts receivable balance in various aging categories. The balance is also influenced by specific clients' financial strength and circumstance. Accounts that are determined to be uncollectible are written off in the period in which they are determined to be uncollectible. Periodic changes to the allowance balance are recorded as increases or decreases to bad debt expense, which is included in the "Advertising, selling, general, and administrative" line of our Consolidated Statements of Comprehensive Income (Loss). The changes in the allowance for doubtful accounts consisted of the following:

In thousands	Year Ended	
	December 31,	
	2018	2017
Balance at beginning of year	\$697	\$1,028
Net charges to expense	131	192
Amounts recovered against the allowance	(398)	(523)
Balance at end of year	\$430	\$697

Inventory

Inventory, consisting primarily of print materials and operating supplies, is stated at the lower of cost (first-in, first-out method) or net realizable value.

Property, Plant and Equipment

Property, plant and equipment are stated on the basis of cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The general ranges of estimated useful lives are:

Buildings and improvements	3 to 40 years
Software	2 to 10 years
Equipment and furniture	3 to 20 years

Long-lived assets such as property, plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset group is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset group. We recorded a \$3.8 million impairment of long-lived assets in 2018 and did not record an impairment of long-lived assets in 2017.

Capital lease assets are included in property, plant and equipment. Capital lease assets consisted of:

	December 31,	
In thousands	2018	2017
Equipment and furniture	\$2,658	\$1,774
Less accumulated depreciation	(920)	(687)
Net book value	\$1,738	\$1,087

Goodwill and Other Intangible Assets

Goodwill is recorded to the extent that the purchase price of an acquisition exceeds the fair value of the identifiable net assets acquired and is tested for impairment on an annual basis. We have established November 30 as the date for our annual test for impairment of goodwill. Interim testing is performed more frequently if events or circumstances indicate that it is “more likely than not” that goodwill might be impaired. Such events could include changes in the business climate in which we operate, attrition of key personnel, the current volatility in the capital markets, the company’s market capitalization compared to our book value, our recent operating performance, and financial projections.

Goodwill is tested for impairment by assessing qualitative factors to determine whether the existence of events or circumstances leads to a determination that is more likely than not that the fair value of the reporting unit is less than its carrying amount. If after assessing the totality of events or circumstances, or based on management’s judgment, we determine it is more likely than not that the fair value is less than its carrying amount, an impairment test is performed using a one-step approach. The fair value of the reporting unit, using the discounted cash flow method, is compared to its carrying amount. If the carrying amount is greater than the fair value, an impairment loss is recognized in an amount equal to the excess.

Our acquired intangible assets are amortized on a straight-line basis over their estimated useful lives, which generally range from two to 10 years. Our acquired intangible assets do not have indefinite lives. Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of the intangible asset may not be recoverable. The carrying amount of an intangible asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If it is determined that an impairment loss has occurred, the loss is measured as the amount by which the carrying amount of the intangible asset exceeds its fair value.

Income Taxes

Income tax expense includes U.S. and international income taxes accounted for under the asset and liability method. Certain income and expenses are not reported in tax returns and financial statements in the same year. Such temporary differences are reported as deferred tax. Deferred tax assets are reported net of valuation allowances where we have assessed that it is more likely than not that a tax benefit will not be realized.

Earnings (Loss) Per Share

Basic earnings (loss) per common share are based upon the weighted-average number of common shares outstanding during the period. Diluted earnings (loss) per common share are based upon the weighted-average number of common shares and dilutive common stock equivalents outstanding during the period. Dilutive common stock equivalents are calculated based on the assumed exercise of stock options and vesting of unvested shares using the treasury stock method.

Stock-Based Compensation

All share-based awards are recognized as operating expense in the “Labor” line of the Consolidated Statements of Comprehensive Income (Loss). Calculated expense is based on the fair values of the awards on the date of grant and is recognized over the requisite service period or performance period of the awards.

Reserve for Healthcare, Workers’ Compensation, Automobile, and General Liability

We are self-insured for the majority of our healthcare insurance. We pay actual medical claims up to a stop loss limit of \$0.3 million. In the fourth quarter of 2016, we moved to a guaranteed cost program for our workers' compensation and automobile programs. Prior to the change, our deductible for workers' compensation was \$0.5 million. Our deductible for general liability is \$0.3 million.

The reserve is estimated using current claims activity, historical experience, and claims incurred but not reported. We use loss development factors that consider both industry norms and company specific information. Our liability is recorded at the estimate of the ultimate cost of claims at the balance sheet date. At December 31, 2018 and 2017, our reserve for healthcare, workers' compensation, net, automobile, and general liability was \$2.7 million and \$3.5 million, respectively. Periodic changes to the reserve for workers' compensation, automobile and general liability are recorded as increases or decreases to insurance expense, which is included in the "Advertising, selling, general and administrative" line of our Consolidated Statements of Comprehensive Income (Loss). Periodic changes to the reserve for healthcare are recorded as increases or decreases to employee benefits expense, which is included in the "Labor" line of our Consolidated Statements of Comprehensive Income (Loss).

Foreign Currencies

In most instances the functional currencies of our foreign operations are the local currencies. Assets and liabilities recorded in foreign currencies are translated in U.S. dollars at the exchange rate on the balance sheet date. Revenue and expenses are translated at average rates of exchange prevailing during a given month. Adjustments resulting from this translation are charged or credited to other comprehensive loss.

Recent Accounting Pronouncements

Recently issued accounting pronouncements not yet adopted

In August 2018, the FASB issued ASU 2018-14, Compensation—Retirement Benefits—Defined Benefit Plans—General (Topic 715-20): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plans (ASU 2018-14), which modifies the disclosure requirements for defined benefit pension plans and other postretirement plans. ASU 2018-14 is effective for fiscal years ending after December 15, 2020, and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2018-14 on our consolidated financial statements.

In June 2018, the FASB issued ASU 2018-07, Compensation-Stock Compensation (Topic 718): Improvements to nonemployee share-based payment accounting, which supersedes ASC 505-50, Accounting for Distributions to Shareholders with Components of Stock and Cash and expands the scope of ASC 718 to include all share-based payment arrangements related to the acquisition of goods and services from both nonemployees and employees. As a result, most of the guidance in ASC 718 associated with employee share-based payments, including most of its requirements related to classification and measurement, applies to nonemployee share-based payment arrangements. The ASU is effective for annual periods beginning after December 15, 2018, and the interim periods within those fiscal years with early adoption permitted after the entity has adopted ASU 2014-09 and its related amendments (collectively known as “ASC 606”). We are evaluating the effect that this will have on our consolidated financial statements and related disclosures.

In February 2018, the FASB issued ASU 2018-02, Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. This ASU allows for reclassification of stranded tax effects on items resulting from the change in the corporate tax rate as a result of H.R. 1, originally known as the Tax Cuts and Jobs Act of 2017, from accumulated other comprehensive income to retained earnings. Tax effects unrelated to H.R. 1 are permitted to be released from accumulated other comprehensive income using either the specific identification approach or the portfolio approach, based on the nature of the underlying item. ASU 2018-02 is effective for interim and annual reporting periods beginning after December 15, 2018, with early adoption permitted. We are evaluating the effect that this will have on our consolidated financial statements and related disclosures.

Leases

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) and subsequent amendment ASU 2018-11, which requires all operating leases to be recorded on the balance sheet. The lessee will record a liability for its lease obligations (initially measured at the present value of the future lease payments not yet paid over the lease term, and an asset for its right to use the underlying asset equal to the lease liability, adjusted for lease payments made at or before lease commencement). This ASU is effective for interim and annual periods beginning after December 15, 2018, with early adoption permitted. This change was required to be applied using a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. Full retrospective application is prohibited. In July 2018, the FASB approved an optional transition

method to initially account for the impact of the adoption with a cumulative-effect adjustment to the retained earnings to the January 1, 2019, rather than the January 1, 2017, financial statements. This will eliminate the need to restate amounts presented prior to January 1, 2019. We will adopt the standard effective January 1, 2019, and we expect to elect this optional transition method, as well as certain practical expedients permitted under the transition guidance within the standard. We have selected a lease accounting system and have started the system implementation during the fourth quarter of 2018. We will recognize right-of-use assets and operating lease liabilities on our consolidated balance sheets upon adoption, which will increase our total assets and liabilities. We expect that the impact on our total assets and liabilities to be material.

Recently adopted accounting pronouncements

Income taxes

In March 2018, the FASB issued ASU 2018-05, Income Taxes (Topic 740)—Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118 ("SAB 118"). This ASU amends certain Securities and Exchange Commission (SEC) material in Topic 740 for the income tax accounting implications of the recently issued Tax Reform. This guidance clarifies the application of

Topic 740 in situations where a registrant does not have the necessary information available, prepared, or analyzed in reasonable detail to complete the accounting under Topic 740 for certain income tax effects of Tax Reform for the reporting period in which Tax Reform was enacted. See Note D, Income Taxes, for a discussion of the impacts of SAB 118 and this ASU.

Stock-based Compensation

In May 2017, the FASB issued ASU 2017-09, Compensation—Stock Compensation (Topic 718): Scope of Modification Accounting, which provides clarified guidance on applying modification accounting to changes in the terms or conditions of a share-based payment award. This ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. This change is required to be applied prospectively to an award modified on or after the adoption date. This standard was adopted as of January 1, 2018 and did not have a material impact on our consolidated financial statements and related disclosures.

Statement of Cash Flows

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments, which provides clarified guidance on the classification of certain cash receipts and payments in the statement of cash flows. This ASU is effective for annual periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. This change is required to be applied using a retrospective transition method to each period presented. Early adoption is permitted. This standard was adopted as of January 1, 2018 and did not have a material impact on our consolidated financial statements and related disclosures.

Revenue Recognition

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). We adopted ASC 606 effective on January 1, 2018 using the modified retrospective method. Please see Note B, Revenue from Contracts with Customers, for the required disclosures related to the impact of adopting this standard and a discussion of our updated policies related to revenue recognition and accounting for costs to obtain and fulfill a customer contract.

Note B - Revenue from Contracts with Customers

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, related to revenue recognition. Under ASC 606, an entity recognizes revenue when its customer obtains control of promised goods or services, in an amount that reflects the consideration the entity expects to receive in exchange for those goods or services. To determine revenue recognition for arrangements that are within the scope of the new standard, the entity performs the following five steps: (i) identify the contract(s) with a customer; (ii) identify the performance obligations in the contract; (iii) determine the transaction price; (iv) allocate the transaction price to the performance obligations in the contract; and (v) recognize revenue when (or as) the entity satisfies a performance obligation. The new standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The new standard also includes criteria for the capitalization and amortization of certain contract acquisition and fulfillment costs.

Effective January 1, 2018, we adopted ASC 606, Revenue from Contracts with Customers, using the modified retrospective method of adoption and have elected to apply the new standard only to contracts not completed at January 1, 2018. For contracts that were modified before the effective date, we applied the practical expedient method, which did not have a material effect on our adjustment to opening retained earnings. The reported results for 2018 reflect the application of ASC 606 guidance while the reported results for 2017 were prepared under the guidance of

ASC 605, which is also referred to herein as “legacy GAAP.”

Under ASC 606, revenue is recognized when control of the promised goods or services is transferred to the customer, in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Our contracts with customers state the terms of sale, including the description, quantity, and price of the product or service purchased. Payment terms can vary by contract, but the period between invoicing and when payment is due is not significant. At December 31, 2018 and January 1, 2018, our contracts do not include any significant financing components.

Consistent with legacy GAAP, we present taxes assessed on revenue-producing transactions on a net basis.

Disaggregation of Revenue

We disaggregate revenue by vertical market and key revenue stream. The following table summarizes revenue from contracts with customers for the twelve months ended December 31, 2018 by our key vertical markets:

46

	For the	
	Twelve	
	Months	
In thousands	Ended	
	December	
	31, 2018	
B2B	\$64,026	
Consumer Brands	58,382	
Financial Services	53,919	
Healthcare	19,931	
Retail	66,545	
Transportation	21,825	
Total Revenues	\$ 284,628	

The nature of the services offered by each key revenue stream are different. The following tables summarize revenue from contracts with customers for the twelve months ended December 31, 2018 by our four major revenue streams and the pattern of revenue recognition:

	For the Twelve Months Ended		
	December 31, 2018		
	Revenue	Revenue for	Total
	for	performance	
	performance	obligations	
In thousands	obligations	recognized at	
	recognized	a point in	
	over	time	
	time		
Agency & Digital Services	\$34,621	\$1,138	\$35,759
Database Marketing Solutions	31,684	3,526	35,210
Direct Mail, Logistics, and Fulfillment	128,372	6,989	135,361
Contact Centers	78,298	—	78,298
Total Revenues	\$272,975	\$11,653	\$284,628

Our contracts with customers may consist of multiple performance obligations. If the contract contains a single performance obligation, the entire transaction price is allocated to the single performance obligation. Contracts that contain multiple performance obligations require an allocation of the transaction price to each performance obligation based on a relative standalone selling price (SSP) basis unless the transaction price is variable and meets the criteria to be allocated entirely to a performance obligation or to a distinct good or service that forms part of a single performance obligation. For most performance obligations, we determine standalone selling price based on the price at which the performance obligation is sold separately. Although uncommon, if the standalone selling price is not observable through past transactions, we estimate the standalone selling price taking into account available information such as market conditions and internally approved pricing guidelines related to the performance obligations. Further discussion of other performance obligations in each of our major revenue streams follows:

Agency & Digital Services

Our agency services are full-service, customer engagement agencies specializing in direct and digital communications for both consumer and business-to-business markets. Our digital solutions integrate online services within the marketing mix and include: search engine management, display, digital analytics, website development and design, digital strategy, social media, email, e-commerce, and interactive relationship management. Our contracts may include

a promise to purchase media or acquire search engine marketing solutions on behalf of our clients; in such cases, we have determined we are an agent, rather than principal and therefore recognize the net consideration as revenue (consistent with legacy GAAP).

Agency and digital services performance obligations are satisfied over time and often offered on a project basis. We have concluded that the best approach of measuring the progress toward completion of the project-based performance obligations is the input method based on costs or labor hours incurred to date dependent upon whether costs or labor hours more accurately depict the transfer of value to the customer.

The variable consideration in these contracts primarily relates to time and material-based services and reimbursable out-of-pocket travel costs, both of which are estimated using the expected value method. For time and material-based contracts, we use the “as invoiced” practical expedient.

Database Marketing Solutions

Our solutions are built around centralized marketing databases with services rendered to build custom database, database hosting services, customer or target marketing lists and data processing services.

These performance obligations, including services rendered to build a custom database, database hosting services, professional services, customer or target marketing lists and data processing services, may be satisfied over time or at a point in time. We provide software as a service ("SaaS") solutions to host data for customers and have concluded that they are stand-ready obligations to be recognized over time on a monthly basis. Our promise to provide certain data related services meets the over-time recognition criteria because our services do not create an asset with an alternative use and we have an enforceable right to payment. For performance obligations recognized over time, we choose either the input (i.e. labor hour) or output method (i.e. number of customer records) to measure the progress toward completion depending on the nature of the services provided. Some of our other data-related services do not meet the over-time criteria and are therefore, recognized at a point-in-time, typically upon the delivery of a specific deliverable.

We charge our customers for certain data-related services at a fixed transaction-based rate, e.g., per thousand customer records processed. Because the quantity of transactions is unknown at the onset of a contract, our transaction price is variable, and we use the expected value method to estimate the transaction price. The uncertainty associated with the variable consideration generally resolves within a short period of time since the duration of these contracts is generally less than two months.

Direct Mail, Logistics, and Fulfillment

Our services include: digital printing, print on demand, advanced mail optimization, logistics and transportation optimization, tracking, commingling, shrink wrapping, and specialized mailings. We also maintain fulfillment centers where we provide custom kitting services, print on demand, product recalls, and freight optimization allowing our customers to distribute literature and other marketing materials.

The majority of performance obligations offered within this revenue stream are satisfied over time and utilize the input or output method, depending on the nature of the service, to measure progress toward satisfying the performance obligation. For performance obligations where we charge customers a transaction-based fee, we utilize the output method based on the quantities fulfilled. Services provided through our fulfillment centers are typically priced at a per transaction basis and our contracts provide us the right to invoice for services provided and reflects the value to the customer of the services transferred to date. In most cases, we use the “as invoiced” practical expedient to recognize revenue associated with these performance obligations unless significant discounts are offered in a contract and prices for services do not represent their standalone selling prices. For our direct mail revenue stream, our contracts may include a promise to purchase postage on behalf of our clients; in such cases, we have determined we are an agent, rather than principal and therefore recognize net consideration as revenue (consistent with legacy GAAP).

The variable consideration in our contracts results primarily from the transaction-based fee structure of some performance obligations with their total transaction quantities to be provided unknown at the onset of a contract, which is estimated using the expected value method.

Contact Centers

We operate tele-service workstations in the U.S., Asia and Europe to provide advanced contact center solutions such as: speech, voice and video chat, integrated voice response, analytics, social cloud monitoring, and web self-service. Performance obligations are stand-ready obligations and satisfied over time. With regard to account management and SaaS, we use a time-elapsed output method. For performance obligations where we charge customers a transaction-based fee, we use the output method based on transaction quantities. In most cases, our contracts provide us the right to invoice for services provided, therefore, we generally use the “as invoiced” practical expedient to recognize revenue associated with these performance obligations unless significant discounts are offered in a contract and prices for services do not represent their standalone selling prices.

The variable consideration in our contracts results primarily from the transaction-based fee structure of some performance obligations with their total transaction quantities to be provided unknown at the onset of a contract, which is estimated using the expected value method.

Upfront Non-Refundable Fees

We may receive non-refundable upfront fees from customers for implementation of our SaaS database solutions products or for providing training in connection with our contact center solutions. These activities are not deemed to transfer a separate promised service and therefore, represent advanced payments. Where customers have an option to renew a contract, the customer is not required to pay similar upfront fees upon renewal. As a result, we have determined that these renewal options provide for the purchase of future services at a reduced rate and therefore, provide a material right. These upfront non-refundable fees are recognized over the estimated benefit period. The upfront non-refundable fees collected from customers were immaterial as of December 31, 2018.

Transaction Price Allocated to Future Performance Obligations

We have elected to apply certain optional exemptions that limit the disclosure requirements over remaining performance obligations at period end to exclude: performance obligations that have an original expected duration of one year or less, transactions using the “as invoiced” practical expedient, or when a performance obligation is a series and we have allocated the variable consideration directly to the services performed. After considering the above exemptions, the transaction prices allocated to unsatisfied or partially satisfied performance obligations as of December 31, 2018 totaled \$0.7 million, which is expected to be recognized over the following 2 years as follows: \$0.6 million in 2019 and \$0.1 million in 2020.

Contract Balances

We record a receivable when revenue is recognized prior to invoicing when we have an unconditional right to consideration (only the passage of time is required before payment of that consideration is due) and a contract asset when the right to payment is conditional upon our future performance such as delivery of an additional good or service (e.g. customer contract requires customer's final acceptance of custom database solution or delivery of final marketing strategy delivery presentation before customer payment is required). If invoicing occurs prior to revenue recognition, the unearned revenue is presented on our Condensed Consolidated Balance Sheet as a contract liability, referred to as deferred revenue. The following table summarizes our contract balances as of January 1, 2018 and December 31, 2018:

In thousands	December 31, 2018	January 1, 2018
Contract assets	\$ 2,362	\$ 4,720
Deferred revenue and customer advances	6,034	5,906
Deferred revenue included in other long-term liabilities	578	341

Revenue recognized during the twelve months ended December 31, 2018 from amounts included in deferred revenue at the beginning of the period was approximately \$4.0 million. We recognized no revenues during the twelve months ended December 31, 2018, from performance obligations satisfied or partially satisfied in previous periods. During the twelve months ended December 31, 2018, we reclassified \$4.7 million of contract assets to receivables as a result of the right to the transaction consideration becoming unconditional.

Costs to Obtain and Fulfill a Contract

We recognize an asset for the direct costs incurred to obtain and fulfill our contracts with customers to the extent that we expect to recover these costs. These costs are amortized to expense over the expected period of benefit in a manner that is consistent with the transfer of the related goods or services to which the asset relates. The remaining unamortized contract costs were \$3.8 million as of December 31, 2018. For the periods presented, \$0.1 million impairment was recognized in Q4 2018.

Financial Statement Impact of Adopting ASC 606

Upon the adoption of ASC 606 on January 1, 2018, we recorded a cumulative adjustment of \$0.6 million, a net increase to opening retained earnings as of January 1, 2018. The following table shows the cumulative effect of the changes made to the accounts on the Consolidated Balance Sheet as of January 1, 2018 (in thousands):

	As Reported		Adjusted
	December 31, 2017	Cumulative Adjustments	January 1, 2018
ASSETS			
Accounts receivable, net	81,397	(4,310)	77,087
Contract assets	—	4,720	4,720
Other current assets	3,900	373	4,273
Other assets	3,230	1,018	4,248
LIABILITIES			
Deferred revenue and related expenses	5,342	564	5,906
Deferred income taxes	773	119	892
Other current liabilities	3,732	245	3,977
Other long-term liabilities	4,201	302	4,503
STOCKHOLDERS' EQUITY			
Retained earnings	794,583	571	795,154

The cumulative effect adjustments to the opening retained earnings relate to a few key differences between legacy GAAP and ASC 606 which include capitalizing costs to obtain and fulfill a contract (increase to retained earnings), changes in the timing of revenue recognition for non-refundable upfront fees (decrease to retained earnings), and changes in the timing of revenue recognition for Database Marketing Solutions and Logistics services (increase to retained earnings).

Impact of New Revenue Guidance on Financial Statement Line Items

We identified the financial statement line items impacted by ASC 606 as compared to the pro-forma amounts had the legacy GAAP been in effect, as of and for the twelve months ended December 31, 2018, and these are summarized as follows:

Balance Sheet Financial Statement Line Items

The adoption of ASC 606 had the following impact on the Consolidated Balance Sheet as of December 31, 2018: an increase of \$1.8 million and \$1.3 million to reported total assets and reported retained earnings, respectively, and an increase in total reported liabilities of \$0.5 million as compared to the pro-forma balance sheet which assumes legacy GAAP remained in effect as of December 31, 2018. The reported total assets increase was largely due to capitalized costs to obtain and fulfill contracts and contract assets recognized for performance obligations in our Database Marketing Solutions and Logistics businesses, of which revenues are recognized over time. The reported total liabilities increase was largely due to deferred revenue recognized for upfront non-refundable fee and accrued expenses associated with performance obligations in our Database Marketing Solutions and Logistics businesses.

Income Statement Financial Statement Line Items (Year Ended December 31, 2018)

The adoption of ASC 606 did not have a significant impact on our Consolidated Statements of Comprehensive Income/(Loss) for the twelve months ended December 31, 2018.

The adoption of ASC 606 had no significant impact on our cash flows from operations for the year ended December 31, 2018. The aforementioned impacts resulted in offsetting shifts in cash flows throughout net income and various changes in working capital balances.

Note C — Long-Term Debt

As of December 31, 2018, we had \$14.2 million borrowing incurred under Texas Capital Facility. We had no debt outstanding at December 31, 2017.

Credit Facilities

On April 17, 2017, we entered into a secured credit facility with Texas Capital Bank, N.A., that provides a \$20 million revolving credit facility (the "Texas Capital Credit Facility"). The Texas Capital Credit Facility is being used for general corporate purposes and to provide collateral for up to \$5.0 million of letters of credit issued by Texas Capital Bank. The Texas Capital Credit Facility is secured by substantially all of the company's assets and is guaranteed by HHS Guaranty, LLC, an entity formed to provide credit support for Harte Hanks by certain members of the Shelton family (descendants of one of our founders).

On January 9, 2018, we entered into an amendment (the "First Amendment") to the Texas Capital Credit Facility. The First Amendment (i) increases the availability under the revolving credit facility from \$20 million to \$22 million and (ii) extends the Texas Capital Credit Facility one year to April 17, 2020. The Credit Facility remains collateralized by substantially all of our assets. Our fee for the collateral balance provided by HHS Guaranty, LLC also changed from an annual fee of \$0.5 million to 2.0% of collateral actually pledged.

Pursuant to the First Amendment, the Texas Capital Credit Facility expires on April 17, 2020 at which point all outstanding principal amounts will be due. Harte Hanks can elect to accrue interest on outstanding principal balances at either LIBOR plus 1.95% or prime plus 0.75%. Unused credit balances will accrue interest at 0.50%.

The Texas Capital Credit Facility is subject to customary covenants requiring insurance, legal compliance, payment of taxes, prohibition of second liens, and secondary indebtedness, as well as the filing of quarterly and annual financial statements. We were in compliance with all of the covenants of our credit facility at December 31, 2018.

Cash payments for interest were \$0.2 million and \$0.3 million for the years ended December 31, 2018 and 2017, respectively.

Note D — Income Taxes

The components of income tax expense (benefit) are as follows:

In thousands	Year Ended	
	December 31,	
	2018	2017
Current		
Federal	\$(18,194)	\$348
State and local	314	245
Foreign	1,413	472
Total current	\$(16,467)	\$1,065
Deferred		
Federal	\$(470)	\$(9,886)
State and local	(181)	(747)
Foreign	(994)	(326)
Total deferred	\$(1,645)	\$(10,959)

Total income tax benefit \$(18,112) \$(9,894)

The U.S. and foreign components of income (loss) before income taxes were as follows:

In thousands	Year Ended	
	December 31,	
	2018	2017
United States	\$(4,873)	\$(49,731)
Foreign	4,311	(2,023)
Total loss from operations before income taxes	\$(562)	\$(51,754)

The differences between total income tax expense (benefit) and the amount computed by applying the statutory federal income tax rate of 21% for 2018 and 35% for 2017 to income (loss) before income taxes were as follows:

In thousands	Year Ended	
	December 31,	
	2018	2017
Computed expected income tax benefit	\$(118)	\$(18,114)
Goodwill impairment basis difference	—	6,000
Basis difference on sale of 3Q Digital	(11,937)	—
Net effect of state income taxes	(388)	(559)
Foreign subsidiary dividend inclusions	2,781	440
Foreign tax rate differential	189	187
Change in valuation allowance due to tax reform	—	(13,821)
Change in valuation allowance	3,383	2,265
Non-deductible interest	—	1,280
Loss from deemed liquidation of foreign subsidiary	(4,242)	—
Rate Benefit from Carryback of Capital Loss	(6,452)	—
Stock-based compensation shortfalls	437	1,373
Change in U.S. tax rate due to tax reform	—	10,391
Return to Provision	(1,835)	—
Other, net	70	664
Income tax benefit for the period	\$(18,112)	\$(9,894)

Total income tax benefit was allocated as follows:

In thousands	Year Ended	
	December 31,	
	2018	2017
Operations	\$(18,112)	\$(9,894)
Stockholders' equity	—	755
Total	\$(18,112)	\$(9,139)

The U.S. Tax Cuts and Jobs Act (the "Tax Reform Act") was enacted on December 22, 2017. The legislation significantly changed U.S. tax law by, among other things, lowering the corporate income tax rate from 35% to 21%, implementing a territorial tax system and imposing a one-time repatriation tax on deemed repatriated earnings of foreign subsidiaries. The main impact of the Tax Reform Act on our financial statement is related to the re-measurement of deferred tax balances. We recognized the tax effects of the Tax Reform Act in the year ended December 31, 2017 and recorded a deferred tax benefit of \$3.4 million due to the re-measurement of deferred tax balances to the new 21% corporate tax rate. We applied the guidance in the SAB 118 when accounting for the enactment-date effects of the Tax Reform Act in 2017 and throughout 2018. At December 31, 2018, we have now completed our accounting for all the enactment-date income tax effects of the Tax Reform Act. We did not record any adjustments to our provisional amounts in the year ended December 31, 2018.

The Tax Reform Act subjects a U.S. shareholder to tax on Global Intangible Low Tax Income (GILTI) earned by certain foreign subsidiaries. The FASB Staff Q&A Topic 740, No. 5 "Accounting for Global Intangible Low-Taxed Income," states that an entity can make an accounting policy election to either recognize deferred taxes for temporary basis differences expected to reverse as GILTI in future years or to provide for the tax expense related to GILTI in the year the tax is incurred as a period expense only. We have elected to account for GILTI as a current period expense when incurred.

The tax effects of temporary differences that gave rise to significant portions of the deferred tax assets and deferred tax liabilities were as follows:

In thousands	Year Ended	
	2018	2017
Deferred tax assets		
Deferred compensation and retirement plan	\$16,179	\$15,017
Accrued expenses not deductible until paid	1,584	1,619
Employee stock-based compensation	780	1,757
Accrued payroll not deductible until paid	428	1,111
Accounts receivable, net	100	179
Investment in Foreign Subsidiaries, Outside Basis Difference	1,322	—
Goodwill	710	700
Other, net	142	290
Foreign net operating loss carryforwards	3,042	2,887
State net operating loss carryforwards	3,776	3,978
Foreign tax credit carryforwards	3,653	3,653
Federal net operating loss carryforwards	2,507	—
Total gross deferred tax assets	34,223	31,191
Less valuation allowances	(31,170)	(28,350)
Net deferred tax assets	\$3,053	\$2,841
Deferred tax liabilities		
Property, plant and equipment	\$(1,689)	\$(1,941)
Goodwill and other intangibles	—	(701)
Prepaid Expenses	(331)	—
Other, net	(281)	(972)
Total gross deferred tax liabilities	(2,301)	(3,614)
Net deferred tax assets (liabilities)	\$752	\$(773)

A reconciliation of the beginning and ending balance of deferred tax valuation allowance is as follows:

In thousands	
Balance at December 31, 2016	\$40,148
Deferred Income Tax Expense	(1,227)
Return to Provision Impact	3,250
Impact of Tax Reform Act	(13,821)
Balance at December 31, 2017	\$28,350
Deferred Income Tax Expense	3,383
Return to Provision Impact	(854)
Other comprehensive income	291
Balance at December 31, 2018	\$31,170

In assessing the realizability of deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The valuation allowance for deferred tax assets was \$31.2 million and \$28.4 million at December 31, 2018 and 2017, respectively. The amount of the deferred tax asset considered realizable could be adjusted if estimates of future taxable income during the carryforward period are increased, or if

objective negative evidence in the form of cumulative losses is no longer present, and additional weight may be given to subjective evidence such as changes in our growth projections.

We or one of our subsidiaries file income tax returns in the U.S. federal, U.S. state, and foreign jurisdictions. For U.S. state returns, we are no longer subject to tax examinations for years prior to 2013. For U.S. federal and foreign returns, we are no longer subject to tax examinations for years prior to 2015.

A reconciliation of the beginning and ending amount of unrecognized tax benefit is as follows:

In thousands

Balance at December 31, 2016	\$967
Settlements	(761)
Balance at December 31, 2017	\$206
Settlements	(206)
Balance at December 31, 2018	\$—

There is no balance of unrecognized tax benefits as of December 31, 2018. Any adjustments to this liability as a result of the finalization of audits or potential settlements would not be material.

We have elected to classify any interest and penalties related to income taxes within income tax expense in our Consolidated Statements of Comprehensive Income (Loss). We did not recognize any tax benefits for the reduction of accrued interest and penalties associated with the reduction of the liability for unrecognized tax benefits during the years ended December 31, 2018 and 2017. We did not have any interest and penalties accrued at December 31, 2018 or 2017.

As of December 31, 2018, we had federal net operating loss carryforwards that are allowed to be carried forward indefinitely and available to reduce 80% of future taxable income in any given year.

Deferred income taxes have not been provided on the undistributed earnings of our foreign subsidiaries as these earnings have been, and under current plans will continue to be, permanently reinvested in these subsidiaries. It is not practicable to estimate the amount of additional taxes which may be payable upon the distribution of these earnings. However, because of the provisions in the Tax Reform Act, the tax cost of repatriation is immaterial and limited to foreign withholding taxes, currency translation and state taxes.

Note E — Goodwill and Other Intangible Assets

As discussed in Note A, Significant Accounting Policies, goodwill is not amortized, but is tested for impairment on an annual basis or when circumstances exist that indicate goodwill may be impaired.

During our annual impairment test in 2017, we performed a Step One analysis using a business enterprise value approach to determine the fair value of the business. The fair value of the reporting unit was estimated for the purpose of deriving an excess or deficit between the fair value and the carrying amount of the business enterprise. The fair value calculated using the discounted cash flow method was a component of the analysis. Estimated future cash flows were discounted at a rate of 14.0%. The results of the Step One analysis, in accordance with ASU 2017-04, indicated that the carrying value exceeded the fair value and the full carrying value of goodwill should be written-off, resulting in an impairment charge of \$34.5 million. Our fair value estimates relied on management assumptions including market rates, revenue growth rates, operating margins, and discount rates.

Our accumulated goodwill impairment was \$283.1 million and \$283.1 million at December 31, 2018 and 2017, respectively.

The changes in the carrying amount of goodwill are as follows:

In thousands

Balance at December 31, 2016	\$34,510
Purchase consideration	—
Impairment	(34,510)
Balance at December 31, 2017	\$—
Impairment	—
Balance at December 31, 2018	\$—

Other intangibles with definite useful lives relate to contact databases, client relationships, and non-compete agreements. They are amortized on a straight-line basis over their respective estimated useful lives, typically a period of 2 to 10 years, and reviewed for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The changes in the carrying amount of other intangibles with definite lives are as follows:

In thousands

Balance at December 31, 2016	\$3,302
Amortization	(713)
Balance at December 31, 2017	\$2,589
Amortization	(113)
Disposition	\$(2,476)
Balance at December 31, 2018	\$—

Amortization expense related to other intangibles with definite useful lives was \$0.1 million and \$0.7 million for the years ended December 31, 2018 and 2017, respectively. The intangible asset was fully amortized as of December 31, 2018.

Note F — Employee Benefit Plans

Prior to January 1, 1999, we provided a defined benefit pension plan in which most of our employees were eligible to participate (the "Qualified Pension Plan"). In conjunction with significant enhancements to our 401(k) plan, we elected to freeze benefits under the Qualified Pension Plan as of December 31, 1998.

In 1994, we adopted a non-qualified, unfunded, supplemental pension plan (the "Restoration Pension Plan") covering certain employees, which provides for incremental pension payments so that total pension payments equal those amounts that would have been payable from the principal pension plan were it not for limitations imposed by income tax regulation. The benefits under the Restoration Pension Plan were intended to provide benefits equivalent to our Qualified Pension Plan as if such plan had not been frozen. We elected to freeze benefits under the Restoration Pension Plan as of April 1, 2014.

The overfunded or underfunded status of our defined benefit post-retirement plans is recorded as an asset or liability on our balance sheet. The funded status is measured as the difference between the fair value of plan assets and the projected benefit obligation. Periodic changes in the funded status are recognized through other comprehensive income. We currently measure the funded status of our defined benefit plans as of December 31, the date of our year-end consolidated balance sheets.

The status of the defined benefit pension plans at year-end was as follows:

In thousands	Year Ended December 31,	
	2018	2017
Change in benefit obligation		
Benefit obligation at beginning of year	\$ 187,036	\$ 179,247
Interest cost	6,740	7,347
Actuarial (gain) loss	(12,021)	10,121
Benefits paid	(9,994)	(9,679)
Benefit obligation at end of year	\$ 171,761	\$ 187,036
Change in plan assets		
Fair value of plan assets at beginning of year	126,013	116,725

Edgar Filing: HARTE HANKS INC - Form 10-K

Actual return on plan assets	(9,847)	17,292
Contributions	1,690	1,675
Benefits paid	(9,994)	(9,679)
Fair value of plan assets at end of year	\$ 107,862	\$ 126,013
Funded status at end of year	\$ (63,899)	\$ (61,023)

The following amounts have been recognized in the Consolidated Balance Sheets at December 31:

In thousands	2018	2017
Other current liabilities	\$ 1,685	\$ 1,685
Pensions	62,214	59,338
Total	\$63,899	\$61,023

The following amounts have been recognized in accumulated other comprehensive loss, net of tax, at December 31:

In thousands	2018	2017
Net loss	\$46,584	\$45,418

Based on current estimates, we will be required to make \$2.2 million contributions to our Qualified Pension Plan in 2019.

We are not required to make and do not intend to make any contributions to our Restoration Pension Plan in 2019 other than to the extent needed to cover benefit payments. We expect benefit payments under this supplemental pension plan to total approximately \$1.7 million in 2019.

The following information is presented for pension plans with an accumulated benefit obligation in excess of plan assets:

In thousands	2018	2017
Projected benefit obligation	\$ 171,761	\$ 187,036
Accumulated benefit obligation	\$ 171,761	\$ 187,036
Fair value of plan assets	\$ 107,862	\$ 126,013

The Restoration Pension Plan had an accumulated benefit obligation of \$25.3 million and \$27.6 million at December 31, 2018 and 2017, respectively.

The following table presents the components of net periodic benefit cost and other amounts recognized in other comprehensive income (loss) for both plans:

In thousands	Year Ended December 31,	
	2018	2017
Net Periodic Benefit Cost (Pre-Tax)		
Interest cost	\$ 6,740	\$ 7,347
Expected return on plan assets	(6,094)	(7,328)
Recognized actuarial loss	2,754	2,754
Net periodic benefit cost	3,400	2,773
Amounts Recognized in Other Comprehensive Income (Loss) (Pre-Tax)		
Net (gain) loss	1,166	(2,597)
Net cost recognized in net periodic benefit cost and other comprehensive (income) loss	\$ 4,566	\$ 176

The estimated net loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive loss into net periodic benefit cost in 2019 is \$2.9 million. The period over which the net loss from the Qualified Pension Plan is amortized into net periodic benefit cost was the average future lifetime of all participants (approximately 23 years). The Qualified Pension Plan is frozen and almost all of the plan's participants are not active employees.

The weighted-average assumptions used for measurement of the defined pension plans were as follows:

	Year Ended December 31,			
	2018		2017	
Weighted-average assumptions used to determine net periodic benefit cost				
Discount rate	3.67	%	4.21	%
Expected return on plan assets	5.00	%	6.50	%
December 31,				
2018 2017				
Weighted-average assumptions used to determine benefit obligations				
Discount rate	4.35%		3.67%	

The discount rate assumptions are based on current yields of investment-grade corporate long-term bonds. The expected long-term return on plan assets is based on the expected future average annual return for each major asset class within the plan's portfolio (which is principally comprised of equity investments) over a long-term horizon. In determining the expected long-term rate of return on plan assets, we evaluated input from our investment consultants, actuaries, and investment management firms, including their review of asset class return expectations, as well as long-term historical asset class returns. Projected returns by such consultants and economists are based on broad equity and bond indices. Additionally, we considered our historical 15-year compounded returns, which have been in excess of the forward-looking return expectations.

The funded pension plan assets as of December 31, 2018 and 2017, by asset category, are as follows:

In thousands	2018	%	2017	%
Equity securities	\$71,384	66 %	\$80,191	64 %
Debt securities	22,134	21 %	20,481	16 %
Other	14,344	13 %	25,341	20 %
Total plan assets	\$107,862	100%	\$126,013	100%

The fair values presented have been prepared using values and information available as of December 31, 2018 and 2017.

The following tables present the fair value measurements of the assets in our funded pension plan:

In thousands	December 31, 2018	Quoted	Significant	Significant
		Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Equity securities	\$71,384	\$ 71,384	\$ —	\$ —
Debt securities	22,134	22,134	—	—
Total investments, excluding investments valued at NAV	93,518	93,518	—	—
Investments valued at NAV ⁽¹⁾	14,344	—	—	—
Total plan assets	\$107,862	\$ 93,518	\$ —	\$ —
In thousands	December 31, 2017	Quoted	Significant	Significant
		Prices in Active Markets for Identical Assets	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)

Edgar Filing: HARTE HANKS INC - Form 10-K

	(Level 1)				
Equity securities	\$ 80,191	\$ 80,191	\$	—\$	—
Debt securities	20,481	20,481	—	—	—
Total investments, excluding investments valued at NAV	100,672	100,672	—	—	—
Investments valued at NAV ⁽¹⁾	25,341	—	—	—	—
Total plan assets	\$ 126,013	\$ 100,672	\$	—\$	—

(1) Investment valued at NAV are comprised of cash, cash equivalents, and short-term investments used to provide liquidity for the payment of benefits and other purposes. The commingled funds are valued at NAV based on the market value of the underlying investments, which are primarily government issued securities.

The investment policy for the Qualified Pension Plan focuses on the preservation and enhancement of the corpus of the plan's assets through prudent asset allocation, quarterly monitoring and evaluation of investment results, and periodic meetings with investment managers.

The investment policy's goals and objectives are to meet or exceed the representative indices over a full market cycle (3-5 years). The policy establishes the following investment mix, which is intended to subject the principal to an acceptable level of volatility while still meeting the desired return objectives:

	Target	Acceptable Range	Benchmark Index
Domestic Equities	50.0 %	35 % - 75%	S&P 500
Large Cap Growth	22.5 %	15 % - 30%	Russell 1000 Growth
Large Cap Value	22.5 %	15 % - 30%	Russell 1000 Value
Mid Cap Value	5.0 %	5 % - 15%	Russell Mid Cap Value
Mid Cap Growth	0.0 %	0 % - 10%	Russell Mid Cap Growth
Domestic Fixed Income	35.0 %	15 % - 50%	LB Aggregate
International Equities	15.0 %	10 % - 25%	MSCI EAFE

The funded pension plan provides for investment in various investment types. Investments, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risk. Due to the level of risk associated with investments, it is reasonably possible that changes in the value of investments will occur in the near term and may impact the funded status of the plan. To address the issue of risk, the investment policy places high priority on the preservation of the value of capital (in real terms) over a market cycle. Investments are made in companies with a minimum five-year operating history and sufficient trading volume to facilitate, under most market conditions, prompt sale without severe market effect. Investments are diversified across numerous market sectors and individual companies. Reasonable concentration in any one issue, issuer, industry, or geographic area is allowed if the potential reward is worth the risk.

Investment managers are evaluated by the performance of the representative indices over a full market cycle for each class of assets. The Pension Plan Committee reviews, on a quarterly basis, the investment portfolio of each manager, which includes rates of return, performance comparisons with the most appropriate indices, and comparisons of each manager's performance with a universe of other portfolio managers that employ the same investment style.

The expected future benefit payments for both pension plans over the next ten years as of December 31, 2018 are as follows:

In thousands	
2019	\$10,133
2020	10,365
2021	10,606
2022	10,962
2023	11,251
2024-2028	57,856
Total	\$111,173

We also sponsored a 401(k) - retirement plan in which we matched a portion of employees' voluntary before-tax contributions prior to 2018. Under this plan, both employee and matching contributions vest immediately. We stopped

this 401(k) match program in 2018. Total 401(k) expense for these matching payments recognized was \$0.4 million and \$3.0 million for years ending December 31, 2018 and 2017.

Note G — Stockholders' Equity

Dividends

We did not pay any dividends in 2018 and 2017.

Share Repurchase

Under the stock repurchase program publicly announced in August of 2014, our Board provided authorization to spend up to \$20.0 million to repurchase shares of our outstanding common stock. During 2018 and 2017, no shares of our common stock were

58

purchased. We had \$11.4 million remaining under the current authorization as of December 31, 2018. From 1997 through December 2018, we have paid more than \$1.2 billion to repurchase 6.8 million shares under this program and previously announced programs.

Awardees of stock-based compensation may elect to have shares of common stock withheld from vested awards to meet tax obligations. These shares are returned to our treasury stock at the time of vesting. During 2018, we received 3,541 shares of our common stock, with an estimated market value of \$0.03 million, from such arrangements.

Series A Convertible Preferred Stock

Harte Hanks is authorized to issue one million shares of preferred stock with a par value of \$1.00. In January 2018, our board of directors designated a total of 9,926 shares of our preferred stock as our Series A Convertible Preferred Stock (the "Series A Preferred Stock"). Each share of our Series A Preferred stock is convertible at any time at the option of the holder into the number of shares of common stock at the initial conversion price. Dividends on the Series A Preferred Stock are accrued at a rate of 5.0% per year or the rate that cash dividends were paid in respect to shares of common stock if such rate is greater than 5.0%. If Series A Preferred Stock is converted into the common stock, the accumulated dividends accrued is no longer payable. Holders of Series A Preferred Stock do not have voting rights, subject to certain exceptions.

On January 23, 2018, we issued 9,926 shares of our Series A Preferred Stock to Wipro, LLC for gross proceeds of \$9.9 million. Shares are convertible into 16.0% of our outstanding common stock on a pre-closing basis, priced at \$9.91 per share of common stock. For so long as Wipro owns at least a majority of the preferred shares originally purchased or is the beneficial owner of at least 5% of the company's common stock, Wipro has the right to appoint one individual as a non-voting observer to the Board and under certain circumstances Wipro may appoint a board member to the board of directors. As of December 31, 2018, Wipro, LLC has designated an observer to the Board of Directors.

Note H — Stock-Based Compensation

Compensation expense for stock-based awards is based on the fair values of the awards on the date of grant and is recognized on a straight-line basis over the vesting period of the entire award in the "Labor" line of the Consolidated Statements of Comprehensive Income (Loss). For the years ended December 31, 2018 and 2017, we recorded total stock-based compensation expense from operations of \$(0.6) million and \$2.7 million, respectively.

We granted equity awards to our Chief Executive Officer, Chief Financial Officer and Chief Operations Officer in 2019, 2018 and 2017, as a material inducement for acceptance of such positions. These option, restricted stock, and performance unit awards were not submitted for stockholder approval and were separately listed with the NYSE.

In May 2013, our stockholders approved the 2013 Omnibus Incentive Plan ("2013 Plan"), pursuant to which we may issue up to 500,000 shares of stock-based awards to directors, employees, and consultants, as adjusted for the reverse stock split. The 2013 Plan replaced the stockholder-approved 2005 Omnibus Incentive Plan ("2005 Plan"), pursuant to which we issued equity securities to directors, officers, and key employees. No additional stock-based awards will be granted under the 2005 Plan, but awards previously granted under the 2005 Plan will remain outstanding in accordance with their respective terms. As of December 31, 2018 and 2017, there were 0.2 million and 0.1 million shares available for grant under the 2013 Plan.

Stock Options

Options granted under the 2013 Plan or as inducement awards have an exercise price equal to the market value of the common stock on the grant date. These options become exercisable in 25% increments on the first four anniversaries of their date of grant and expire on the tenth anniversary of their date of grant. Options to purchase 34 thousand shares granted as inducement awards were outstanding at December 31, 2018, with exercise prices ranging from \$7.40 to \$60.40 per share. Options to purchase 42 thousand shares granted under 2013 Plan awards were outstanding at December 31, 2018, with exercise prices ranging from \$7.40 to \$119.00 per share.

Options under the 2005 Plan were granted at exercise prices equal to the market value of the common stock on the grant date. All such awards have met their respective vesting dates. Options to purchase 95 thousand shares were outstanding under the 2005 Plan as of December 31, 2018, with exercise prices ranging from \$7.40 to \$123.10 per share.

Options issued through March 2015 vest in full (to the extent not previously vested) upon a change in control, as defined in the applicable equity plan. Options granted to officers after April 2015 vest in full upon a change in control if such options are not assumed or replaced by a publicly-traded successor with an equivalent award (as defined in such officers' change in control severance agreements). Additionally, 25% of the inducement options granted to the former Chief Executive Officer will vest (if not previously vested) in the event her employment is terminated without cause, or if she terminates her employment for good reason

(as such terms are defined in her employment agreement). However, following the August 2018 resignation of our former CEO, her unvested stock option was forfeited according to her separation agreement with the Company and resulted in \$0.1 million credit to stock compensation expense.

The following summarizes all stock option activity during the years ended December 31, 2018 and 2017:

In thousands	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (Thousands)
Options outstanding at December 31, 2016	370,547	\$ 77.23		
Granted in 2017	33,855	10.00		
Exercised in 2017	—	—		—
Unvested options forfeited in 2017	(9,872)	73.31		
Vested options expired in 2017	(85,563)	110.44		
Options outstanding at December 31, 2017	308,967	\$ 60.80		
Granted in 2018	14,821	7.40		
Exercised in 2018	—	—		—
Unvested options forfeited in 2018	(61,286)	37.13		
Vested options expired in 2018	(91,133)	68.28		
Options outstanding at December 31, 2018	171,369	\$ 60.66	4.56	—
Vested and expected to vest at December 31, 2018	171,369	\$ 60.66	4.56	—
Exercisable at December 31, 2018	128,105	\$ 76.48	3.13	—

The aggregate intrinsic value at year end in the table above represents the total pre-tax intrinsic value that would have been received by the option holders if all of the in-the-money options were exercised on December 31, 2018. The pre-tax intrinsic value is the difference between the closing price of our common stock on December 31, 2018 and the exercise price for each in-the-money option. This value fluctuates with the changes in the price of our common stock.

The following table summarizes information about stock options outstanding at December 31, 2018:

Range of Exercise Prices	Number Outstanding	Weighted-Average Exercise Price	Weighted-Average Remaining Life (Years)	Number Exercisable	Weighted-Average Exercise Price
\$7.40 -60.40	84,502	\$ 30.91	5.31	44,289	\$ 50.77
\$72.50 -119.00	84,467	88.65	3.88	81,416	89.10
\$123.10 -123.10	2,400	123.10	2.10	2,400	123.10
	171,369	\$ 60.66	4.56	128,105	\$ 76.48

The fair value of each option grant is estimated on the date of grant using the Black-Scholes Option-Pricing Model based on the following weighted-average assumptions used for grants during 2018 and 2017:

	Year Ended	
	December 31, 2018	2017
Expected term (in years)	5.23	6.25
Expected stock price volatility	55.07%	53.70%
Risk-free interest rate	2.96 %	2.16 %

Expected term is estimated using the simplified method, which takes into account vesting and contractual term. The simplified method is being used to calculate expected term instead of historical experience due to a lack of relevant historical data resulting from changes in option vesting schedules and changes in the pool of employees receiving option grants. Expected stock price volatility is based on the historical volatility from traded shares of our stock over the expected term. The risk-free interest rate is based on the rate of a zero-coupon U.S. Treasury instrument with a remaining term approximately equal to the expected term.

The weighted-average fair value of options granted during 2018 and 2017 was \$3.55 and \$5.32, respectively. As of December 31, 2018, there was \$0.2 million of total unrecognized compensation cost related to unvested stock options. This cost is expected to be recognized over a weighted average period of approximately 2.85 years.

Cash Stock Appreciation Rights

In 2016 and 2017 the Board approved grants of cash settling stock appreciation rights under the 2013 Plan. Cash stock appreciation rights vest in 25% increments on the first four anniversaries of the date of grant and expire after 10 years. Cash stock appreciation rights settle solely in cash and are treated as a liability.

The following summarizes all cash stock appreciation rights during the year ended December 31, 2018:

	Number of Units	Weighted- Average Grant Price	Weighted-Average Remaining Contractual Term (Years)
Cash stock appreciation rights outstanding at December 31, 2016	—	\$ —	
Granted in 2017	86,618	9.70	
Exercised in 2017	—	—	
Forfeited in 2017	—	—	
December 31, 2017	86,618	\$ 9.70	9.48
Granted in 2018	—	—	
Exercised in 2018	—	—	
Expired in 2018	(11,090)	9.70	
Forfeited in 2018	(62,852)	9.70	
Cash stock appreciation rights outstanding at December 31, 2018	12,676	\$ 9.70	8.48
Vested balance at December 31, 2018	3,169	\$ 9.70	8.48

The fair value of each cash stock appreciation right is estimated on the date of grant using the Black-Scholes Option-Pricing Model and is revalued at the end of each period. Changes in fair value are recorded to the income statement as changes to expense. As of December 31, 2018, there was \$0.0 million of total unrecognized compensation cost related to unvested cash stock appreciation right grants.

Restricted Stock Units

Restricted stock units granted as inducement awards or under the 2013 Plan vest in three equal increments on the first three anniversaries of their date of grant. Restricted stock units settle solely in common stock and are treated as equity. Outstanding restricted stock units granted to officers as inducement awards or under the 2013 Plan vest in full (to the extent not previously vested) upon a change in control if such unvested shares are not assumed or replaced by a publicly-traded successor with an equivalent award (as such terms are defined in such officers' change-in-control severance agreements).

The following summarizes all restricted stock units' activity during 2018 and 2017:

	Number of Shares	Weighted- Average Grant Date Fair Value
Unvested shares outstanding at December 31, 2016	94,543	\$ 37.59
Granted in 2017	160,962	9.81
Vested in 2017	(40,979)	41.39
Forfeited in 2017	(13,304)	27.84
Unvested shares outstanding at December 31, 2017	201,222	\$ 15.23
Granted in 2018	72,549	9.51
Vested in 2018	(56,219)	19.28
Forfeited in 2018	(110,137)	14.54
Unvested shares outstanding at December 31, 2018	107,415	\$ 9.98

The fair value of each restricted stock unit is estimated on the date of grant as the closing market price of our common stock on the date of grant. As of December 31, 2018, there was \$0.9 million of total unrecognized compensation cost related to restricted stock units. This cost is expected to be recognized over a weighted average period of approximately 2.24 years.

Phantom Stock Units

In 2016 and 2017, the Board approved grants of phantom stock units under the 2013 Plan. Phantom stock units vest in 25% increments on the first four anniversaries of the date of grant. Phantom stock units settle solely in cash and are treated as a liability. Grants of phantom stock units made to officers under the 2013 Plan vest in full (to the extent not previously vested) upon a change in control if they are not assumed or replaced by a publicly-traded successor with an equivalent award (as such terms are defined in such officers' change-in-control severance agreements).

The following summarizes all phantom stock unit activity during 2018 and 2017:

	Number of Units	Weighted- Average Grant Date Fair Value
Phantom stock units outstanding at December 31, 2016	53,164	\$ 26.90
Granted in 2017	56,000	9.70
Vested in 2017	(12,483)	26.90
Forfeited in 2017	(14,644)	22.63
Phantom stock units outstanding at December 31, 2017	82,037	\$ 15.92
Granted in 2018	—	—
Vested in 2018	(19,992)	17.85
Forfeited in 2018	(29,234)	16.32
Phantom stock units outstanding at December 31, 2018	32,811	\$ 14.39

The fair value of each phantom stock unit is estimated on the date of grant as the closing market price of our common stock on the date of grant. Changes in our stock price will result in adjustments to compensation expense and the corresponding liability over the applicable service period. As of December 31, 2018, there was \$0.1 million of total unrecognized compensation cost related to phantom stock units. This cost is expected to be recognized over a

weighted average period of approximately 2.15 years.

Performance Stock Units

Under the 2013 Plan and grants of inducement awards, performance stock units are a form of share-based award similar to unvested shares, except that the number of shares ultimately issued is based on our performance against specific performance goals over a roughly three-year period. At the end of the performance period, the number of shares of stock issued will be determined in accordance with the specified performance target(s) in a range between 0% and 100%. Performance stock units vest solely in common stock and are treated as equity. Upon a change in control, performance stock units granted to officers vest on a pro-rated basis (based on time elapsed from the grant) to the extent not previously settled if they are not assumed or replaced by a publicly-traded successor with an equivalent award (as such terms are defined in such officers' change-in-control severance agreements).

The following summarizes all performance stock unit activity during 2018 and 2017:

	Number of Units	Weighted- Average Grant-Date Fair Value
Performance stock units outstanding at December 31, 2016	84,430	\$ 25.56
Granted in 2017	89,124	9.95
Settled in 2017	—	—
Forfeited in 2017	(10,494)	47.90
Performance stock units outstanding at December 31, 2017	163,060	\$ 15.59
Granted in 2018	11,904	8.40
Settled in 2018	—	—
Forfeited in 2018	(136,435)	16.40
Performance stock units outstanding at December 31, 2018	38,529	\$ 10.50

The fair value of each performance stock unit is estimated on the date of grant as the closing market price of our common stock on the date of grant, minus the present value of anticipated dividend payments. Periodic compensation expense is based on the current estimate of future performance against specific performance goals over a three-year period and is adjusted up or down based on those estimates. As of December 31, 2018, there was \$0.2 million of total unrecognized compensation cost related to performance stock units. This cost is expected to be recognized over a weighted average period of approximately 1 year.

Cash Performance Stock Units

In 2016 and 2017, the Board of Directors approved grants of cash performance stock units under the 2013 Plan. Cash performance stock units are a form of share-based award similar to phantom stock units, except that the number of units ultimately issued is based on our performance against specific performance goals measured after a three-year period. At the end of the performance period, the number of units vesting will be determined in accordance with specified performance target(s) in a range between 0% and 100%. Cash performance stock units settle solely in cash and are treated as a liability. Upon a change in control, cash performance stock units granted to officers vest on a pro-rated basis (based on time elapsed from the grant) to the extent not previously settled if they are not assumed or replaced by a publicly-traded successor with an equivalent award (as such terms are defined in such officers' change-in-control severance agreements).

The following summarizes all performance stock unit activity during 2018 and 2017:

	Number of Shares	Weighted-Average Grant-Date Fair Value
Cash performance stock units outstanding at December 31, 2016	44,397	\$ 26.90
Granted in 2017	109,887	10.10
Settled in 2017	—	—
Forfeited in 2017	(3,778)	26.90
Cash performance stock units outstanding at December 31, 2017	150,506	\$ 14.63
Granted in 2018	—	—
Settled in 2018	—	—
Forfeited in 2018	(146,728)	14.32
Cash performance stock units outstanding at December 31, 2018	3,778	\$ 26.90

The fair value of each cash performance stock unit is estimated on the date of grant as the closing market price of our common stock on the date of grant, minus the present value of anticipated dividend payments. Periodic compensation expense is based on the current estimate of future performance against specific performance goals over a three-year period and is adjusted up or down based on those estimates. As of December 31, 2018, there was \$0.0 million of total unrecognized compensation cost related to performance stock units.

Note I — Commitments and Contingencies

At December 31, 2018, we had letters of credit in the amount of \$2.8 million backed by cash collateral. No amounts were drawn against these letters of credit at December 31, 2018. These letters of credit exist to support insurance programs relating to workers' compensation, automobile, and general liability.

In the normal course of our business, we are obligated under some agreements to indemnify our clients as a result of claims that we infringe on the proprietary rights of third parties. The terms and duration of these commitments vary and, in some cases, may be indefinite, and certain of these commitments do not limit the maximum amount of future payments we could become obligated to make there under; accordingly, our actual aggregate maximum exposure related to these types of commitments cannot be reasonably estimated. Historically, we have not been obligated to make significant payments for obligations of this nature, and no liabilities have been recorded for these obligations in our financial statements.

We are also currently subject to various legal proceedings in the course of conducting our businesses and, from time to time, we may become involved in additional claims and lawsuits incidental to our businesses. In the opinion of management, after consultation with counsel, none of these matters is currently considered to be reasonably possible of resulting in a material adverse effect on our consolidated financial position or results of operations. Nevertheless, we cannot predict the impact of future developments affecting our pending or future claims and lawsuits and any resolution of a claim or lawsuit within a particular fiscal quarter may adversely impact our results of operations for that quarter. We expense legal costs as incurred, and all recorded legal liabilities are adjusted as required as better information becomes available to us. The factors we consider when recording an accrual for contingencies include, among others: (i) the opinions and views of our legal counsel, (ii) our previous experience, and (iii) the decision of our management as to how we intend to respond to the complaints.

Note J — Leases

We lease real estate and certain equipment under numerous lease agreements, most of which contain some renewal options. The total rent expense applicable to operating leases was \$11.6 million and \$13.1 million for the years ended December 31, 2018 and 2017.

Step rent provisions and escalation clauses, normal tenant improvements, rent holidays, and other lease concessions are taken into account in computing minimum lease payments. We recognize the minimum lease payments on a straight-line basis over the minimum lease term.

The future minimum rental commitments for all non-cancelable operating leases with terms in excess of one year as of December 31, 2018 are as follows:

In thousands

2019	\$9,645
2020	8,815
2021	7,425
2022	5,456
2023	2,349
Thereafter	1,328
Total	\$35,018

We also lease certain equipment and software under capital leases. Our capital lease obligations at year-end were as follows:

In thousands	2018	2017
Current portion of capital leases	\$748	\$506
Long-term portion of capital leases	676	486
Total capital lease obligation	\$1,424	\$992

The future minimum lease payments for all capital leases operating as of December 31, 2018 are as follows:

In thousands

2019	\$748
2020	307
2021	131
2022	133
2023	104
Thereafter	—
Total	\$1,423

Note K — Earnings (Loss) Per Share

In periods in which the company has net income, the company is required to calculate earnings (loss) per share ("EPS") using the two-class method. The two-class method is required because the company's preferred stock is considered a participating security with objectively determinable and non-discretionary dividend participation rights. Preferred stockholders have the right to participate in dividends above their five percent dividend rate should the company declare dividends on its Common Stock at a dividend rate higher than the five percent (on an as-converted basis). Under the two-class method, undistributed and distributed earnings are allocated on a pro-rata basis to the common and the preferred stockholders. The weighted-average number of common and preferred stock outstanding during the period is then used to calculate EPS for each class of shares.

In periods in which the company has a net loss, basic loss per share is calculated using the treasury stock method. The treasury stock method is calculated by dividing the net loss by the weighted-average number of common shares outstanding during the period. The two-class method is not used, because the two-class calculation is anti-dilutive.

Reconciliations of basic and diluted EPS are as follows:

In thousands, except per share amounts	Year Ended	
	December 31, 2018	2017
Numerator:		
Net income (loss)	\$17,550	\$(41,860)
Less: Preferred stock dividend	457	—
Less: Earnings attributable to participating securities	2,202	—
Numerator for basic EPS: income/(loss) attributable to common stockholders	14,891	\$(41,860)
Effect of dilutive securities:		
Add back: Allocation of earnings to participating securities	2,202	—
Less: Re-allocation of earnings to participating securities considering potentially dilutive securities	(2,191)	—
Numerator for diluted EPS	\$14,902	\$(41,860)
Denominator:		
Basic EPS denominator: weighted-average common shares outstanding	6,237	6,192
Effect of dilutive securities:		
Unvested shares	33	—
Diluted EPS denominator	6,270	6,192
Basic earnings (loss) per common share	\$2.39	\$(6.76)
Diluted earnings (loss) per common share	\$2.38	\$(6.76)

For the purpose of calculating the shares used in the diluted EPS calculations, 0.2 million and 0.3 million anti-dilutive options have been excluded from the EPS calculations for the years ended December 31, 2018 and 2017. 0.1 million and 0.1 million anti-dilutive unvested shares were excluded from the calculation of shares used in the diluted EPS calculation for the years ended December 31, 2018 and 2017, respectively.

Note L — Comprehensive Income (Loss)

Comprehensive income (loss) for a period encompasses net income (loss) and all other changes in equity other than from transactions with our stockholders. Our comprehensive income (loss) was as follows:

In thousands	Year Ended	
	December 31, 2018	2017
Net income (loss)	\$17,550	\$(41,860)
Other comprehensive income (loss):		
Adjustment to pension liability	(1,166)	2,597
Tax (expense) benefit	—	(1,038)
Adjustment to pension liability, net of tax	(1,166)	1,559
Foreign currency translation adjustment	(1,014)	316
Total other comprehensive income (loss)	\$(2,180)	\$1,875

Total comprehensive income (loss)	\$15,370	\$(39,985)
-----------------------------------	----------	------------

Changes in accumulated other comprehensive income (loss) by component are as follows:

In thousands	Defined Benefit Pension Items	Foreign Currency Items	Total
Balance at December 31, 2016	\$ (46,977)	\$ 799	\$(46,178)
Other comprehensive loss, net of tax, before reclassifications	—	316	316
Amounts reclassified from accumulated other comprehensive income (loss), net of tax	1,559	—	1,559
Net current period other comprehensive income (loss), net of tax	1,559	316	1,875
Balance at December 31, 2017	\$ (45,418)	\$ 1,115	\$(44,303)
Other comprehensive loss, net of tax, before reclassifications	—	(1,014)	(1,014)
Amounts reclassified from accumulated other comprehensive income (loss), net of tax	(1,166)	—	(1,166)
Net current period other comprehensive income (loss), net of tax	(1,166)	(1,014)	(2,180)
Balance at December 31, 2018	\$ (46,584)	\$ 101	\$(46,483)

Reclassification amounts related to the defined pension plans are included in the computation of net period pension benefit cost (see Note F, Employee Benefit Plans).

Note M — Disposition

On February 28, 2018, we completed the sale of 3Q Digital to an entity owned by certain former owners of the 3Q Digital business. Consideration for the sale included \$5.0 million in cash proceeds, subject to certain working capital adjustments, and up to \$5.0 million in additional consideration if the 3Q Digital business is sold again (provided certain value thresholds are met). The \$35 million contingent consideration obligation that was related to our acquisition of 3Q Digital in 2015 was assigned to the buyer, therefore relieving us of the obligation. In addition, the identified intangible assets with definite lives for client relationships and non-compete agreements were written-off as a component of the gain on sale.

The 3Q Digital business represented less than 10% of our total 2017 revenues. As a result of the sale, the company recognized a pre-tax gain of \$31.0 million in the first quarter of 2018. The assets of 3Q Digital included net intangible assets and the liabilities (including contingent consideration) were removed from our balance sheet as a result of the disposition.

The purchase agreement and subsequent amendment to the purchase agreement for the 2015 acquisition of 3Q Digital included a contingent consideration arrangement that would have required us to pay the former owners of 3Q Digital an additional cash payment depending on achievement of certain revenue growth goals. The potential undiscounted amount of all future payments that would have been required to be paid under the contingent consideration arrangement was \$35.0 million in cash payable in 2019.

A reconciliation of accrued balances of the contingent consideration using significant unobservable inputs (Level 3) is as follows:

(in thousands)	Fair Value
Accrued contingent consideration liability as of December 31, 2017	\$33,887
Accretion of interest	742
Disposition	\$(34,629)
Accrued earnout liability as of December 31, 2018	\$—

Note N — Certain Relationships and Related Party Transactions

Since 2016, we have conducted (and we continue to conduct) business with Wipro, LLC (“Wipro”), whereby Wipro provides us with a variety of technology-related services, including database and software development, database support and analytics, IT infrastructure support, leased facilities and digital campaign management. Additionally, we also provide Wipro with agency services and consulting services.

Effective January 30, 2018, Wipro became a related party when it purchased 9,926 shares of our Series A Preferred Stock (which are convertible at Wipro's option into 1,001,614 shares, or 16% of our Common Stock), for aggregate consideration of \$9.9 million. For information pertaining to the Company’s preferred stock, See Note E, Convertible Preferred Stock.

During 2018, we recorded an immaterial amount of revenue for services we provided to Wipro.

During the twelve months ended December 31, 2018 and 2017, we recorded \$12.3 million and \$5.6 million of expense, respectively, in technology-related services and lease expense for a facility Wipro provided to us.

During the twelve months ended December 31, 2018, we capitalized \$2.3 million of costs (\$2.1 million of which was included in the asset impairment charge for the year ended December 31, 2018), for internally developed software services received from Wipro. These remaining capitalized costs are included in Other Assets on the Consolidated Balance Sheet as of December 31, 2018.

As of December 31, 2018 and 2017, we had a trade payable due to Wipro of \$5.0 million and \$2.2 million, respectively. As of December 31, 2018, we had an immaterial amount in trade receivables due from Wipro for services provided in 2017 but invoiced in 2018 and no trade receivables due from Wipro as of December 31, 2017.

As described in "Note C- Long-Term Debt", the Company's Texas Capital Credit Facility is secured by HHS Guaranty, LLC, an entity formed to provide credit support for the Company by certain members of the Shelton family (descendants of one of our founders). Pursuant to the Amended and Restated Fee, Reimbursement and Indemnity Agreement, dated January 9, 2018, between HHS Guarantee, LLC and the Company, HHS Guarantee, LLC has the right to appoint one representative director to the Board of Directors. Currently, David L. Copeland serves as the HHS Guarantee, LLC representative on the Board of Directors.

Note O — Selected Quarterly Data (Unaudited)

In thousands, except per share amounts	First Quarter		Second Quarter		Third Quarter		Fourth Quarter	
	2018	2017	2018	2017	2018	2017	2018	2017
Revenues	\$81,198	\$94,894	\$69,633	\$94,722	\$63,588	\$94,424	\$70,209	\$99,866
Operating income (loss)	(5,035)	(6,342)	(6,308)	(1,791)	(10,353)	950	(4,338)	(33,682)
Income (loss) before income taxes	23,849	(8,862)	(7,318)	(4,852)	(11,421)	(2,098)	(5,673)	(35,942)
Net income (loss)	\$32,629	\$(7,386)	\$(6,734)	\$(2,653)	\$(9,984)	\$(2,480)	\$1,639	\$(29,341)
Basic earnings (loss) per common share	\$5.24	\$(1.20)	\$(1.10)	\$(0.43)	\$(1.62)	\$(0.40)	\$0.21	\$(4.73)
Diluted earnings (loss) per common share	\$4.67	\$(1.20)	\$(1.10)	\$(0.43)	\$(1.62)	\$(0.40)	\$0.21	\$(4.73)

Earnings per common share amounts are computed independently for each of the quarters presented. Therefore, the sum of the quarterly earnings per share amounts may not equal the quarterly earnings per share amounts or the annual earnings per share amounts due to rounding.

INDEX TO EXHIBITS

We are incorporating certain exhibits listed below by reference to other Harte Hanks filings with the Securities and Exchange Commission, which we have identified in parentheses after each applicable exhibit.
