John A. Hill and George Putnam, III

Dear Fellow Shareholder:

Looking back on the past six months in financial markets, stocks and bonds had generally steady and satisfying results for most of the period. Markets were lifted by the resurgence of the economy, prompted in part by the 2003 tax cuts and the Federal Reserve Board's low interest-rate policy. Corporate earnings rose to their most impressive levels in years and many states even experienced a minor improvement in tax revenues. However, since March 2004, uncertainty and volatility have returned to the markets. Bonds in particular experienced broad setbacks in April because of concerns that inflation could be sparked by vigorous job creation and rising energy prices. Markets continue to show vulnerability to these concerns and to the situation in Iraq.

As observers of financial markets for many years, we have gained the perspective that periods of uncertainty and transition like the one we are witnessing today usually reflect an effort by investors to incorporate new facts into their thinking, a process that takes time. The resulting volatility is uncomfortable, but over time, it allows investors to set more realistic expectations for future investment performance. Uncertainty on its own is no reason to alter a well-planned investment strategy.

Putnam's portfolio management teams have vigilantly monitored these conditions. While the retreat in financial markets has been broad, the teams have relied on their research and analysis to manage risks and identify opportunities. During the period ended April 30, 2004, your fund's managers have maintained a strategy of keeping the fund well diversified in a wide array of sectors and holdings, while taking advantage of those parts of the market that have outperformed, such as corporate high— yield bonds. As a result, your fund outperformed both its benchmark index and its Lipper average based on results at net asset value. In the following report, your fund's management teams discuss

their approach to the market environment that prevailed during the period, as well as their outlook for the remainder of 2004.

Respectfully yours,

/S/ JOHN A. HILL /S/ GEORGE PUTNAM, III

John A. Hill George Putnam, III
Chairman of the Trustees President of the Funds

June 16, 2004

Report from Fund Management

#### Fund highlights

- \* For the semiannual period ended April 30, 2004, Putnam Master Income Trust had a total return at net asset value (NAV) of 5.26%. The fund's return at market price was 0.41%.
- \* Due to its emphasis on high-yield bonds, investments in emerging-market securities, and a beneficial currency strategy, the fund's results at NAV outperformed the 1.17% return of its primary benchmark, the Lehman Government/Credit Bond Index.
- \* The fund's return at NAV outperformed the 4.09% average return of the Lipper Flexible Income Funds (closed end) category -- also as a result of its emphasis on higher-yielding securities. This Lipper category is relatively small, however, so comparisons can be difficult and may change quickly.
- \* In January 2004, the fund's dividend for class A shares was reduced to \$0.037 per share. Please see page 5 for details.
- \* See the Performance Summary beginning on page 7 for complete fund performance, comparative performance, and Lipper data.

#### Performance commentary

In the first half of its fiscal year, Putnam Master Income Trust generally benefited from a variety of positive factors. The U.S. economy continued to show solid growth, which was especially helpful for corporate high-yield bonds, the largest portion of your fund's portfolio. In February 2004, bonds rallied on weak jobs data; however, stronger-than-expected job growth in March and April renewed inflation fears and caused bond prices to decline. In fact, management believes that the fund's lower return at market price may have been a reflection of investors' concerns about a Federal Reserve interest rate hike in June, which dampened enthusiasm for bonds. Overseas, emerging markets performed well until the latter part of the period, while slower growth in Europe generally helped bond performance in that region. Amid these changing conditions, the fund's focus on a variety of fixed-income sources proved beneficial for both its absolute and relative performance.

#### FUND PROFILE

Putnam Master Income Trust seeks high current income, consistent with preservation of capital, by investing in a portfolio that consists of U.S. investment-grade, corporate high-yield, and international

fixed-income securities. The fund may be appropriate for investors seeking high current income, asset class diversification, or both.

#### Market overview

For most of the period, global bond markets generally benefited from a downward trend in interest rates brought on by a change in the outlook for economic growth. During the first two months of the period, interest rates were volatile, rising and falling within a broad range with each bit of news that either challenged or supported the possibility of a sustained economic recovery. As the new calendar year began, low inflation, an accommodative Federal Reserve monetary policy, and weak jobs data in February 2004 all helped bond yields to continue trending downward. In the final month of the period, however, there was strong evidence that the U.S. recovery was steaming along and that the lackluster jobs market was finally springing to life. Strong employment gains in the U.S. caused a sharp sell-off in bonds in April, as investors factored in a 100% chance of a Federal Reserve rate hike in June, with others to follow in subsequent months.

In Europe, low inflation reduced the likelihood of a rate increase by the European Central Bank, and European government bonds and securities produced solid returns that were similarly enhanced by a flight to quality. When the U.S. bond market declined in April, however, European bond markets generally followed suit.

High-yield corporate bonds in both the United States and Europe continued to benefit from declining default rates, an attractive yield advantage over Treasuries, and improved credit quality. High-yield bond prices declined in April, though to a lesser extent than Treasuries. Emerging-market bonds initially benefited from increased commodity exports but sold off sharply in the second half of the period.

\_\_\_\_\_\_ MARKET SECTOR PERFORMANCE 6 MONTHS ENDED 4/30/04 \_\_\_\_\_\_ Bonds Lehman Government/Credit Bond Index (U.S. Treasury and agency securities) Lehman Aggregate Bond Index (broad bond market) Citigroup Non-U.S. World Government Bond Index (international government bonds) JP Morgan Chase Global High Yield Index (global high-yield corporate bonds) \_\_\_\_\_\_ S&P 500 Index (broad stock market) S&P/Citigroup World Ex-U.S. Primary Markets Growth Index (international growth stocks) Russell 2000 Index (stocks of small and midsize companies) \_\_\_\_\_\_ These indexes provide an overview of performance in different market sectors for the six months ended 4/30/04.

### Strategy overview

During the past six months, we continued to seek out a diverse variety of sectors and securities in our efforts to enhance the fund's performance while managing its risk exposure. High-yield corporate bonds continued to provide strong performance for most of the semiannual period and remained the fund's largest weighting. However, after one of the best periods ever for this sector, which began in October 2002, well before the start of this period, and continued through December 2003, we felt that returns going forward would probably not be as strong and reduced the weighting. Similarly, we sharply reduced the fund's emerging-market holdings in January 2004, near the peak of their performance. Traditional mortgage-backed securities experienced greater volatility later in the period because, with home mortgage rates at such low levels, prepayments increased as borrowers refinanced their mortgages. Fortunately, we were able to find alternative securities within this sector that performed well. The fund's holdings of U.S. Treasuries benefited from a rally in the second half of the period, while European government agency securities benefited from their attractive risk/reward characteristics amid a forecast for slower growth in Europe in 2004.

We continued to use currency strategies to enhance returns. We maintained the fund's exposure to the yen in the second half, which helped performance because the yen continued to appreciate throughout the period. We also emphasized the euro, which generally appreciated during the period.

[GRAPHIC OMITTED: horizontal bar chart TOP SECTOR WEIGHTINGS COMPARED]

#### TOP SECTOR WEIGHTINGS COMPARED

	as of 10/31/03	as of 4/30/04
High yield	48.7%	45.8%
U.S. investment grade	25.6%	36.5%
International	25.7%	17.7%

#### Footnote reads:

This chart shows how the fund's weightings have changed over the last six months. Weightings are shown as a percentage of total investment portfolio. Holdings will vary over time.

 $\hbox{How fund holdings affected performance}\\$ 

While the mortgage-backed securities (MBS) sector generally underperformed due to prepayment concerns associated with low mortgage rates, we found two types of securities within this sector that performed well — home equity loans and manufactured housing bonds. Unlike mortgages, home equity loans are not as susceptible to prepayments when interest rates decline, which helps boost the performance of securities that are backed by these loans. Similarly, holdings backed by manufactured housing companies benefited from a significant turnaround in this industry over the past few years accompanied by an increase in demand for low-income housing.

From a geographic standpoint, the fund continued to invest in Colombia,

Mexico, and Russia, which performed well because of higher prices of oil and other commodities, although we reduced these weightings near the end of the period. We also invested in Australia and Canada (some Canadian holdings were sold near the end of the period, as we took advantage of strong performance to reduce the position). As demand for oil and basic materials has increased from high-growth regions such as China, these countries have seen significant increases in exports of oil, metals, and other commodities used for building infrastructure. We reduced the fund's holdings in Brazil, which tended to be much more volatile and performed poorly near the end of the period when emerging-market securities sold off.

#### Footnote reads:

These holdings represent 13.4% of the fund's net assets as of 4/30/04. The fund's holdings will change over time.

The fund's corporate high-yield bond holdings, which were reduced during the period, remained the largest weighting and performed well, with nearly every holding contributing positively to returns. Among the fund's larger positions, bonds issued by cable television company Charter Communications were key contributors. While the firm faced

competitive and financial pressures, the company met expectations and management's moves to refinance debt eased investor concerns about the company's liquidity. In addition, bonds issued by finance company Finova Group provided solid returns. The company encountered significant difficulties a few years ago, particularly in its airplane-leasing business. The firm has worked to liquidate assets and manage its sizeable portfolio of loans and was helped by a significant loan in 2001 from noted investor Warren Buffett through a joint venture. The company repaid the loan earlier this year, ahead of schedule, and prospects for the airline sector have improved more than expected.

The fund's sizeable stake in the chemicals sector also boosted returns, including investments in Huntsman International, a major producer of basic chemicals and petrochemicals like ethylene and propylene, and Millennium America (a subsidiary of Millennium Chemicals), which owns three specialty chemical businesses. Although energy prices were high, leading to skepticism about the sector's prospects, this cyclical sector benefited from the improving economy. Among the few detractors to performance during the period were high-yield bonds issued by Solutia, a diversified specialty chemical company. The firm made news when it settled a high-profile PCB contamination lawsuit in Alabama and appeared to be on its way to working out balance sheet problems. However, the company surprised the market by filing for bankruptcy. We eliminated the bonds from the portfolio, although we still hold a small warrant position, which gives the fund's management the option to purchase the company's stock in the future.

Please note that all holdings discussed in this report are subject to review in accordance with the fund's investment strategy and may vary in the future.

#### OF SPECIAL INTEREST

Approximately half of your fund's portfolio is invested in corporate high-yield securities, which have seen dramatic yield declines, as well as significant narrowing in the spread, or difference, over Treasury yields. Since the beginning of the high-yield market's rebound in October 2002, the spread over Treasuries has narrowed by more than 600 basis points, or six percentage points. As a result, in January 2004, your fund's distribution rate was reduced to \$0.037 per share from \$0.042 per share.

The fund's management team

The fund is managed by the Putnam Core Fixed-Income Team. The members of the team are D. William Kohli (Portfolio Leader), David Waldman (Portfolio Member), Carl Bell, Rob Bloemker, Andrea Burke, Kevin Cronin, Steve Horner, Michael Salm, and John Van Tassel.

The outlook for your fund

The following commentary reflects anticipated developments that could affect your fund over the next six months, as well as your management team's plans for responding to them.

The fund's returns over this six-month period continued to be higher than the historical average for global fixed-income securities because of the optimal conditions that existed until the final month of the period. In the United States, there has been tremendous stimulus in the form of tax cuts, a weaker dollar, increased government spending, and interest rates that have been at historically low levels for some time.

The greater willingness among investors to accept risk has helped boost the capital markets, which has also provided economic stimulus. Abroad, moderate growth and low inflation in Europe has kept rates low and government bonds have had solid performance, while high-yield bonds have seen strong returns similar to their U.S. counterparts.

The strengthening global economy and, in particular, evidence of strong job growth in the United States, have changed the equation. Historically, a tighter job market causes concerns that companies may raise wages and pass along these higher labor costs to consumers in the form of higher prices, leading to higher inflation. Inflation is bad for bond investors because interest payments are fixed and lose purchasing power when prices rise. As a result, higher inflation typically leads to higher interest rates, and in the bond market, when rates rise, bond prices decline.

While we cannot predict the future, the prospect of a tighter monetary policy for the remainder of 2004 has caused our management team to seek ways to mitigate the effects that rising rates can have on the fund's performance. These strategies include keeping the portfolio well diversified across a variety of geographic regions, sectors, and holdings and reducing its interest-rate sensitivity. As always, we will continue seeking opportunities for positive returns, while monitoring economic and market developments and making necessary adjustments as we see fit.

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice. International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk.

#### Performance summary

This section shows your fund's performance during the first half of its fiscal year, which ended April 30, 2004. In accordance with regulatory requirements, we also include performance for the most current calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. Data represent past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate and you may have a gain or a loss when you sell your shares.

#### Terms and definitions

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the American Stock Exchange and the New York Stock Exchange.

#### Comparative indexes

Citigroup Non-U.S. World Government Bond Index is an unmanaged index of government bonds from  $10\ \text{countries}$ .

JP Morgan Chase Global High Yield Index is an unmanaged index used to mirror the investable universe of the U.S. dollar global high-yield corporate debt market of both developed and emerging markets.

Lehman Aggregate Bond Index is an unmanaged index used as a general measure of U.S. fixed-income securities.

Lehman Government/Credit Bond Index is an unmanaged index of U.S. Treasury and agency securities and corporate bonds.

Russell 2000 Index is an unmanaged index of common stocks that generally measure performance of small to midsize companies within the Russell  $3000\ \text{Index}$ .

S&P/Citigroup World Ex-U.S. Primary Markets Growth Index is an unmanaged index of mostly large- and some small-capitalization stocks from developed countries excluding the United States chosen for their growth orientation.

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry ranking entity that ranks funds (without sales charges) with similar current investment styles or objectives as determined by Lipper. Lipper category averages reflect performance trends for funds within a category and are based on results at net asset value.

A note about duplicate mailings

In response to investors' requests, the SEC has modified mailing regulations for proxy statements, semiannual and annual reports, and prospectuses. Putnam is now able to send a single copy of these materials to customers who share the same address. This change will automatically apply to all shareholders except those who notify us. If you would prefer to receive your own copy, please call Putnam at 1-800-225-1581.

- (a) Percentages indicated are based on net assets of \$382,023,697.
- (NON) Non-income-producing security.
- (STP) The interest or dividend rate and date shown parenthetically represent the new interest or dividend rate to be paid and the date the fund will begin accruing interest or dividend income at this rate.
- (RES) Restricted, excluding 144A securities, as to public resale. The total market value of restricted securities held at April 30, 2004 was \$10,039,127 or 2.6% of net assets.
- (PIK) Income may be received in cash or additional securities at the discretion of the issuer.
- (SEG) This security was pledged and segregated with the custodian to cover margin requirements for futures contracts at April 30, 2004.
  - (R) Real Estate Investment Trust.
  - (d) See Note 1 to the financial statements.

144A after the name of a security represents those exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

TBA after the name of a security represents to be announced securities (Note 1).

The rates shown on Floating Rate Bonds (FRB) and Floating Rate Notes (FRN) are the current interest rates shown at April 30, 2004.

Notes to financial statements

April 30, 2004 (Unaudited)

Note 1 Significant accounting policies

Putnam Master Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The investment objective of the fund is to seek high current income consistent with the preservation of capital. The fund intends to diversify its investments among the following three sectors of the fixed-income securities market: a U.S. investment-grade sector, consisting of debt obligations of the U.S. government and investment-grade U.S. corporate bonds, a high-yield sector, consisting of high yielding, lower-rated U.S. corporate fixed income securities and an international sector, consisting of obligations of foreign governments, their agencies and instrumentalities and other fixed-income securities denominated in foreign currencies.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are valued at the last reported sales price on their principal exchange, or official closing price for certain markets. If no sales are reported -- as in the case of some securities traded over-the-counter -- a security is valued at its last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are valued at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities. Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign securities taking into account multiple factors, including movements in the U.S. securities markets. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value. Other investments, including restricted securities, are valued at fair value following procedures approved by the Trustees. Such valuations and procedures are reviewed periodically by the Trustees.

B) Joint trading account The fund may transfer uninvested cash balances, including cash collateral received under security lending arrange ments, into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an

indirect wholly-owned subsidiary of Putnam, LLC. These balances may be invested in issuers of high-grade short-term investments having maturities of up to 397 days for collateral received under security lending arrangements and up to 90 days for other cash investments.

- C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be an amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.
- D) Security transactions and related investment income Security transactions are recorded on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis. Interest income is recorded on the accrual basis. Dividend income, net of applicable withholding taxes, is recognized on the ex-dividend date except that certain dividends from foreign securities are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. All premiums/discounts are amortized/ accreted on a yield-to-maturity basis.
- E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.
- F) Forward currency contracts The fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates

supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio.

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. Risks may exceed amounts recognized on the statement of assets and liabilities. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Futures and written option contracts outstanding at period end, if any, are listed after the fund's portfolio.

- H) Interest rate swap contracts The fund may enter into interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage the fund's exposure to interest rates. Interest rate swap contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made are recorded as realized gains or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. Risks may exceed amounts recognized on the statement of assets and liabilities. Interest rate swap contracts outstanding at period end, if any, are listed after the fund's portfolio.
- I) Credit default contracts The fund may enter into credit default contracts where one party, the protection buyer, makes an upfront payment to a counter party, the protection seller, in exchange for the right to receive a contingent payment. The maximum amount of the payment may equal the notional amount, at par, of the underlying index or security as a result of a related credit event. An upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. An upfront payment made by the fund, as

the protection buyer, is recorded as an asset on the fund's books. The credit default contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses. In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index, the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased comparable publicly traded securities or that the counterparty may default on its obligation to perform. The risk of loss may exceed the fair value of these contracts recognized on the statement of assets and liabilities. Credit default contracts outstanding at period end, if any, are listed after the fund's portfolio.

J) TBA purchase commitments The fund may enter into "TBA" (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at fair value of the underlying securities, according to the procedures described under "Security valuation" above. The contract is "marked-to-market" daily and the change in market value is recorded by the fund as an unrealized gain or loss.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

K) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986 (the "Code"), as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At October 31, 2003, the fund had a capital loss carryover of \$88,941,607 available to the extent allowed by tax law to offset future net capital gain, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expirati	on	
\$3,536,796	October	31,	2006
23,414,014	October	31,	2007

11,528,221	October	31,	2008
15,951,444	October	31,	2009
34,511,132	October	31,	2010

The aggregate identified cost on a tax basis is \$390,208,259, resulting in gross unrealized appreciation and depreciation of \$18,589,423 and \$21,680,636, respectively, or net unrealized depreciation of \$3,091,213.

L) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2 Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company ("PFTC"), a subsidiary of Putnam, LLC. Putnam Investor Services, a division of PFTC, provides investor servicing agent functions to the fund. During the six months ended April 30, 2004, the fund paid PFTC \$261,923 for these services.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the six months ended April 30, 2004, the fund's expenses were reduced by \$10,774 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$820, as a quarterly retainer, has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Trustee compensation and expenses in the

statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the statement of assets and liabilities.

Note 3
Purchases and sales of securities

During the six months ended April 30, 2004, cost of purchases and proceeds from sales of investment securities other than U.S. government securities and short-term investments aggregated \$129,046,034 and \$191,570,860, respectively. Purchases and sales of U.S. government securities aggregated \$32,692,197 and \$6,067,575, respectively.

Note 4 Regulatory matters and litigation

On April 8, 2004, Putnam Management entered into agreements with the Securities and Exchange Commission and the Massachusetts Securities Division representing a final settlement of all charges brought against Putnam Management by those agencies on October 28, 2003 in connection with excessive short-term trading by Putnam employees and, in the case of the charges brought by the Massachusetts Securities Division, by participants in some Putnam-administered 401(k) plans. The settlement with the SEC requires Putnam Management to pay \$5\$ million in disgorgement plus a civil monetary penalty of \$50 million, and the settlement with the Massachusetts Securities Division requires Putnam Management to pay \$5 million in restitution and an administrative fine of \$50 million. The settlements also leave intact the process established under an earlier partial settlement with the SEC under which Putnam Management agreed to pay the amount of restitution determined by an independent consultant, which may exceed the disgorgement and restitution amounts specified above, pursuant to a plan to be developed by the independent consultant.

Putnam Management, and not the investors in any Putnam fund, will bear all costs, including restitution, civil penalties and associated legal fees stemming from both of these proceedings. The SEC's and Massachusetts Securities Division's allegations and related matters also serve as the general basis for numerous lawsuits, including purported class action lawsuits filed against Putnam Management and certain related parties, including certain Putnam funds. Putnam Management has agreed to bear any costs incurred by Putnam funds in connection with these lawsuits. Based on currently available information, Putnam Management believes that the likelihood that the pending private lawsuits and purported class action lawsuits will have a material adverse financial impact on the fund is remote, and the pending actions are not likely to materially affect its ability to provide investment management services to its clients, including the Putnam funds.

Review of these matters by counsel for Putnam Management and by separate independent counsel for the Putnam funds and their independent Trustees is continuing.

Fund information

About Putnam Investments

One of the largest mutual fund families in the United States, Putnam Investments has a heritage of investment leadership dating back to Judge

Samuel Putnam, whose Prudent Man Rule has defined fiduciary tradition and practice since 1830. Founded over 65 years ago, Putnam Investments was built around the concept that a balance between risk and reward is the hallmark of a well-rounded financial program. We presently manage over 100 mutual funds in growth, value, blend, fixed income, and international.

Item 10. Controls and Procedures:

\_\_\_\_\_

(a) The registrant's principal executive officer and principal financial officer have concluded, based on their evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report on Form N-CSR, that the design and operation of such procedures are generally effective to provide reasonable assurance that information required to be disclosed by the investment company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Although such officers reached the conclusion expressed in the preceding paragraph, they are aware of matters that raise concerns with respect to controls, each of which arose in connection with the administration of 401(k) plans by Putnam Fiduciary Trust Company. The first matter, which occurred in early 2001, involved the willful circumvention of controls by certain Putnam employees in connection with the correction of operational errors with respect to a 401(k)client's investment in certain Putnam Funds, which led to losses in five Putnam Funds (not including the registrant). Such officers became aware of this matter in February 2004. The second matter, which occurred in 2002, involved the willful circumvention by certain Putnam employees of policies and procedures in connection with the payment of Putnam corporate expenses. Such officers did not learn that this matter involved a Putnam Fund until January 2004. Putnam has made restitution to the affected Funds, implemented a number of personnel changes, including senior personnel, begun to implement changes in procedures to address these items and informed the SEC, the Funds' Trustees and independent auditors. An internal investigation and review of procedures and controls are currently ongoing.

In reaching the conclusion expressed herein, the registrant's principal executive officer and principal financial officer considered a number of factors, including the nature of the matters described above, when the matters occurred, the individuals

involved, personnel changes that have occurred since these matters occurred, the results to date of the current ongoing investigation and the overall quality of controls at Putnam at this time.

(b) Changes in internal control over financial reporting: Not applicable

Item 11. Exhibits:

- (a) Not applicable
- (b) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2 under the Investment Company Act of 1940, as amended, and the officer certifications as required by Section 906 of the Sarbanes-Oxley Act of 2002 are filed herewith.

#### SIGNATURES
