will also benefit from the parent company's financial support, which will facilitate future capacity and business expansions. ASE Material's substrate revenues in the third quarter of this year totaled NT\$1.2 billion, more than double the revenues of the same period in 2002. ASE will continue to invest in substrate design and manufacturing in order to adapt to industry changes brought by the evolution of technology.

The purpose for merging the two subsidiaries located in Taiwan is to further consolidate the resources within the ASE Group to achieve a flatter organizational structure, in order to achieve greater economies of scale, efficiency, and financial transparency for investors. The entire workforce in both ASE (Chung-Li) and ASE Material will be retained.

The completion of the merger is subject to approval of the shareholders of the companies and is expected to take effect on July 1, 2004.
