None

Securities Registered Pursuant to Section 12(g) of the Act:

Common Stock, Par Value \$0.01 per Share

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting Company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 30, 2007, the aggregate market value of the registrant's stock held by non-affiliates was approximately \$119,175,698 (computed by reference to the closing sales price of the registrant's common stock as of June 29, 2007 as

reported on the Nasdaq National Market). For this computation, the registrant has excluded the market value of all shares of common stock reported as beneficially owned by executive officers and directors of the registrant; such exclusion shall not be deemed to constitute an admission that any such person is an affiliate of the registrant. As of February 29, 2008, there were 26,014,918 shares of the registrant's common stock issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's definitive Proxy Statement to be filed for its 2008 Annual Meeting of Stockholders are incorporated by reference into Part III of this Report.

As used in this report, Company , Us , We , Our and similar terms means Origen Financial, Inc., a Delaware corporation, and, as the context requires, one or more of its subsidiaries.

PART I

ITEM 1. BUSINESS

General

Origen Financial, Inc. is an internally-managed and internally-advised Delaware corporation that is taxed as a real estate investment trust, or REIT. We are a national consumer manufactured housing lender and servicer. During the year ended December 31, 2007, we originated loans in 45 states and we serviced loans in 47 states. We and our predecessors have originated more than \$2.9 billion of manufactured housing loans from 1996 through December 31, 2007, including \$344.6 million in 2007. We additionally processed \$111.6 million in loans originated under third-party origination agreements in 2007. As of December 31, 2007, our loan servicing portfolio of over 40,800 loans totaled approximately \$1.8 billion in loan principal outstanding.

Origen Financial, Inc. was incorporated on July 31, 2003. On October 8, 2003, we began operations when we acquired all of the equity interests of Origen Financial L.L.C. and its subsidiaries. In the second quarter of 2004, we completed the initial public offering of our common stock. Currently, most of our operations are conducted through Origen Financial L.L.C., our wholly-owned subsidiary. We conduct the rest of our business operations through our other wholly-owned subsidiaries, including taxable REIT subsidiaries, to take advantage of certain business opportunities and ensure that we comply with the federal income tax rules applicable to REITs.

Our executive office is located at 27777 Franklin Road, Suite 1700, Southfield, Michigan 48034 and our telephone number is (248) 746-7000. We maintain our servicing operations in Ft. Worth, Texas and have a regional office located in Glen Allen, Virginia. As of December 31, 2007, we employed 257 people.

Our website address is www.origenfinancial.com and we make available, free of charge, as soon as reasonably practicable after we file such reports with the Securities and Exchange Commission, on or through our website all of our periodic reports, including our annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Recent Developments

Developments Based on Current Adverse Market Conditions

Recent and current conditions in the credit markets have adversely impacted our business and financial condition. During 2007, the credit markets that we depend on for warehouse lending for originations and for securitization of our originated loans, as well as the whole loan market for acquisition of loans we originate, deteriorated. This situation began with problems in the sub-prime loan market and subsequently has had the same effect on lenders and investors in asset classes other than sub-prime mortgages, such as our manufactured housing loans.

Despite actions by the Federal Reserve Bank to lower interest rates and increase liquidity, uncertainty among lenders and investors has continued to reduce liquidity, drive up the cost of lending and drive down the value of assets in these markets. The specific effects are that banks and other lenders have reported large losses, have demanded that borrowers reduce the credit exposure to these assets resulting in margin calls or reductions in borrowing availability, and have caused massive sales of underlying assets that collateralize the loans. The consequence of these sales has been further downward pressure on market values of the underlying assets, such as our manufactured housing loans, despite the continued high intrinsic quality of our loans in terms of borrower creditworthiness and low rates of delinquencies, defaults and repossessions.

Our business model depends on the availability of credit, both for the funding of newly originated loans and for the periodic securitization of pools of loans that have been originated and funded by short-term borrowings from warehouse lenders. The securitization process permits us to sell bonds secured by the loans we have originated. The

Table of Contents

proceeds from the bond sales are used to pay off the warehouse lenders and recharge the availability of funding for newly originated loans.

If warehouse funding is not available, or is available only on terms that do not permit us to profit from loan origination, our origination of loans for our own account only can be continued at a loss. If there is no market for securitization at rates of interest and leverage levels acceptable to us, our only alternative for satisfying our obligations under our warehouse line is to sell the manufactured housing loans to a purchaser. If purchasers are unwilling to pay at least the full amount advanced to borrowers plus all related fees and costs, sales of loans are not profitable for us.

As a result of these conditions:

Because of the unavailability of a profitable financing in the securitization market, on March 14, 2008, we sold our portfolio of approximately \$174.6 million in aggregate principal balance of unsecuritized loans with a carrying value of \$175.7 million for approximately \$155.0 million.

We used the proceeds of the loan sale primarily to pay off the outstanding loan balance of approximately \$146.4 million on our warehouse credit facility, which expired on March 14, 2008.

Because of the absence of a profitable exit in the securitization market and reduced pricing in the whole loan market, we suspended originating loans for our own account until these markets recover. We will, however, continue to provide loan origination services for third-parties.

Our stock price has steadily declined to a point where it is well below its tangible net book value. As a consequence, we recorded a non-cash impairment charge, writing off our entire goodwill of \$32.3 million in December 2007.

In February 2008, to satisfy our lender, we sold an asset-backed bond for \$22.5 million, in order to fully pay off \$19.6 million of repurchase agreements secured by this bond and three others that we continue to hold. Sale of this bond resulted in our recording an asset impairment charge of \$9.2 million in 2007.

Our lender under our supplemental advance credit facility secured by a pledge of our residual interests in our securitizations has agreed to extend the due date of the facility until June 13, 2008. This facility otherwise would have expired on March 14, 2008 and we would have been obligated to repay approximately \$50 million outstanding under the facility.

On March 13, 2008, we decreased our work force by 16% to reduce costs that were associated with originating loans for our own account.

We believe that these actions were necessitated by and are a result of the market conditions described above. We do not believe that the actions reflect on the quality of our continuing business operations or the credit performance or long-term realizable value of our securitized loan portfolio, which in our opinion continues to remain very high.

Although we have determined to suspend loan originations for our own account, we currently continue to operate our third-party loan origination business and management of our securitized loan portfolio.

2007 A Securitization

We completed a securitization of approximately \$200.4 million in principal balance of manufactured housing loans on May 2, 2007. The securitization was accounted for as a financing. As part of the securitization we, through a special purpose entity, issued \$184.4 million in notes payable. Additional credit enhancement was provided by a guaranty from Ambac Assurance Corporation. The notes are stratified into two different classes. The Class A-1 notes pay interest at one month LIBOR plus 19 basis points and have a contractual maturity date of April 2037. The Class A-2 notes pay interest based on a rate established by the auction agent at each rate determination date and

Table of Contents

have a contractual maturity date of April 2037. Approximately \$182.4 million of the proceeds was used to reduce the aggregate balance of notes outstanding under our warehouse facility with Citigroup Global Markets Realty Corp. (Citigroup).

Bridge Financing

On September 11, 2007, we, through our primary operating subsidiary, Origen Financial L.L.C., entered into a \$15 million secured financing arrangement with the William M. Davidson Trust u/a/d 12/13/04 (the Lender), an affiliate of one of our principal stockholders (the Bridge Financing). The Lender is a grantor revocable trust established by William M. Davidson as the grantor. Mr. Davidson is the sole member of Woodward Holding, LLC, which owns approximately 6.8% of our common stock. The Bridge Financing includes a senior secured promissory note (the Note) and a senior secured convertible promissory note (the Convertible Note). The Note and the Convertible Note are each one-year secured notes bearing interest at 8% per year and are secured by a portion of the our rights to receive servicing fees on our loan servicing portfolio. The Note, which has an original principal amount of \$10 million, and the Convertible Note, which has an original principal amount of \$5 million, are each due on September 11, 2008. The term of the Note and the Convertible Note may be extended up to 120 days with the payment of additional fees. The Convertible Note may be converted at the option of the Lender into shares of our common stock at a conversion price of \$6.237 per share. In connection with the Bridge Financing, we issued a stock purchase warrant to the Lender. The stock purchase warrant is a five-year warrant to purchase 500,000 shares of our common stock at an exercise price of \$6.16 per share.

2007 B Securitization

We completed a securitization of approximately \$140.0 million in principal balance of manufactured housing loans on October 16, 2007. The securitization was accounted for as a financing. As part of the securitization we through a special purpose entity, issued \$126.7 million of a single AAA rated floating rate class of asset-backed notes to a single qualified institutional buyer pursuant to Rule 144A under the Securities Act of 1933. Additional credit enhancement was provided by a guaranty from Ambac Assurance Corporation. The notes pay interest at one month LIBOR plus 120 basis points. Approximately \$122.4 million of the proceeds was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse facility.

Loan Origination, Acquisition and Underwriting

General

We and our predecessors have originated more than \$2.9 billion of manufactured housing loans from 1996 through December 31, 2007, including \$344.6 million in 2007. We additionally processed \$111.6 million in loans originated under third-party origination agreements in 2007. As discussed above in Recent Developments, we have ceased originating new manufactured housing loans other than under third-party origination agreements.

Although we have ceased originating new manufactured housing loans for our own account, we intend to maintain our origination platform, including our primary underwriting tool, TNG , an internally-developed, externally-validated proprietary statistical scoring system that ranks the risk of default for manufactured home-only loans, and our proprietary web-based delivery system known as Origen Focus . By retaining our origination platform, we intend to continue to provide comprehensive loan origination services to third parties, as described below, and to retain the ability to resume our loan origination business for our own account.

Third-Party Originations

We currently provide comprehensive loan origination services for several companies, including Affordable Residential Communities, Sun Communities, Inc., Hometown America and YES Communities, each of which is a nationwide owner-operator of manufactured housing communities. Under these arrangements, we commit to use our origination platform to originate manufactured housing loans for these third parties, which own the loans. In addition, we have the right to receive a servicing fee with respect to many of these third party loans, although currently we do not retain servicing rights for the Hometown America loans. In the future we may provide origination services to other third parties under similar arrangements. We enter into these types of third-party

Table of Contents

arrangements primarily to strengthen our relationships within the manufactured housing industry with the goal of creating additional sources of revenue, notably servicing revenue. In addition, the increased loan origination volume provided by these arrangements provides valuable information that we use in our internal credit modeling.

Underwriting

We underwrite home-only loans, using our internally-developed proprietary credit scoring system, TNG. We developed and continue to enhance TNG to predict defaults using empirical modeling techniques. TNG takes into account information about each applicant's credit history, debt and income, demographics, and the terms of the loan. The TNG model is fully integrated into our origination system and is based on our historical lending experience. We have used TNG to back-test all of our home-only loans originated since 1996 by Origen Financial L.L.C., its predecessors and us. Following internal testing and validation, Experian Information Solutions, Inc., a leading consumer credit reporting and risk modeling company, independently validated the TNG model.

All home-only applications are scored by TNG and then reviewed by an underwriter. TNG provides the underwriter a recommendation of pass, fail or review. The recommendations are based upon the underlying TNG score as well as other factors that may arise from the application. TNG alerts underwriters to particular attention areas and provides review recommendations. It also provides a reason for declination on fail recommendations. TNG is used to rescore the application throughout the origination and underwriting process as the initial application information is verified and/or terms and conditions of the loan change. In specially approved markets a comparable appraisal is used to determine chattel manufactured housing values.

We also underwrite mortgage loans, often called land-home loans, collateralized by both the manufactured houses and the underlying real estate. Because the land-home and home-only business lines have different characteristics, predictive modeling has only been possible for the home-only applications. We use our Internal Credit Rating grid and a full property appraisal to underwrite land-home loans. The grid is a traditional underwriting method that primarily takes into account the applicant's credit history, debt capacity and underlying collateral value.

In addition to using our proprietary TNG scoring model, we underwrite loans based upon our review of credit applications to ensure loans will comply with applicable lender guidelines. Our approach to underwriting focuses primarily on the borrower's creditworthiness and the borrower's ability and willingness to repay the debt, which is evaluated through TNG. Each contract originated is individually underwritten and approved or rejected based on the TNG result and an underwriter's evaluation of the terms of the purchase agreement, a detailed credit application completed by the prospective borrower and the borrower's credit report, which includes the applicant's credit history as well as litigation, judgment and bankruptcy information. Once all the applicable employment, credit and property-related information is received, the application is evaluated to determine whether the applicant has sufficient monthly income to meet the anticipated loan payment and other obligations.

Servicing

We service the manufactured housing loan contracts that we have originated or purchased as well as manufactured housing loan contracts owned by third parties. As of December 31, 2007, our loan servicing portfolio of over 40,800 loans totaled approximately \$1.8 billion in loan principal outstanding. Our annual servicing fees range from 50 to 150 basis points of the outstanding balance on manufactured housing loans serviced. The majority of loans we service are included in securitized loan pools.

Servicing activities include processing payments received, recording and tracking all relevant information regarding the loan and the underlying collateral, collecting delinquent accounts, remitting funds to investors, repossessing houses upon loan default and reselling repossessed houses. Our loan servicing activities are centralized at our national loan servicing center in Ft. Worth, Texas.

Although we strive to continuously reduce delinquency, our primary servicing objectives are to maintain a stream of borrower payments, limit loan defaults, and maximize recoveries on defaulted loans. Accordingly, we perform loss mitigation activities on delinquent loans whereby we maintain the borrower's delinquent status during the payment plan or other loan workout situation. The industry has typically reported borrowers in loss mitigation as current. In our efforts to maximize recoveries on defaulted loans, we may hold repossessed collateral longer to

Table of Contents

achieve a retail sale to a consumer for a higher price rather than a quicker sale to a reseller at a lower price. This business strategy may cause us to report higher delinquencies, but usually leads to improved default and recovery performance.

Securitizations and Management of Securitization Residuals

We have historically securitized a substantial portion of our owned manufactured housing loans. In the past, after accumulating manufactured housing loans, we used transactions known as asset-backed securitizations to pay off short term debt, replenish funds for future loan originations, limit credit risk, and lock in the spread between interest rates on borrowings with the interest rates on our manufactured housing loans. In our securitizations, the manufactured housing loans were transferred to a bankruptcy remote trust that then issued bonds collateralized by those manufactured housing loans. By securitizing loans in this way, we eliminated the credit risk on our manufactured housing loans up to the amount of bonds sold to investors. Likewise, the form of securitization was designed to insulate the securitized loans from our creditors if we file for bankruptcy so that the loans supporting the bonds issued by the trust will not be encumbered. This process enabled us to fund our business at competitive rates without asset-backed bond investors relying on our corporate credit-worthiness. The most recent securitization we have completed was October 2007. As described earlier, under Recent Developments, we do not believe that current market conditions are favorable to profitable securitizations of our loans.

In May 2007, we completed our 2007-A securitization of approximately \$200.4 million in principal balance of manufactured housing loans.

In October 2007, we completed our 2007-B securitization of approximately \$140.0 million in principal balance of manufactured housing loans.

In March 2008, as a result of the unfavorable securitization markets, we sold approximately \$174.6 million in principal balance of manufactured housing loans in a whole loan sale to a third party.

We actively manage our residual interests in our securitized loan portfolio by monitoring and analyzing cash flow, delinquencies and recoveries.

Insurance

As a complement to our origination and servicing business, we offer property and casualty insurance at the point of sale for manufactured housing loans we have originated or service. Additionally, we have historically placed property and casualty insurance for lapsed policies, primarily for manufactured housing loans we have originated or service. The closing of many of the manufactured housing loans we originate is delayed because the borrower has not obtained insurance or the insurance policy obtained by the borrower does not meet lender guidelines. Although we have ceased originating new loans for our own account, we intend to continue to offer property and casualty insurance in connection with our third-party loan origination services.

Competition

The manufactured housing finance industry is very fragmented. The market is served by both traditional and non-traditional consumer finance sources. Several of these financing sources are larger than us and have greater financial resources. In addition, some of the manufactured housing industry's larger manufacturers maintain their own finance subsidiaries to provide financing for purchasers of their manufactured houses. Historically, our largest competitors in the industry have included Clayton Homes, Inc., through its subsidiaries 21st Mortgage Corporation and Vanderbilt Mortgage and Finance, Inc., U.S. Bank, and San Antonio Federal Credit Union. However, as we have ceased originating new loans for our own account, these companies may no longer be our direct competitors. Traditional financing sources such as commercial banks, savings and loans, credit unions and other consumer lenders, many of which have significantly greater resources than us and may be able to offer more attractive terms to potential customers, also provide competition in our market. Competition among industry participants can take many forms, including, customer service, marketing/distribution channels, interest rates and credit-related factors.

Table of Contents

Corporate Governance

We have implemented the following corporate governance initiatives to address certain legal requirements promulgated under the Sarbanes-Oxley Act of 2002, as well as Nasdaq corporate governance listing standards:

Our Board of Directors determined that at least one member of the Audit Committee of our Board of Directors qualifies as an audit committee financial expert as such term is defined under Item 401 of Regulation S-K. Each Audit Committee member is independent as that term is defined under applicable SEC and Nasdaq rules.

Our Board of Directors adopted a Financial Code of Ethics for Senior Financial Officers, which governs the conduct of our senior financial officers. A copy of this code is available on our website at www.origenfinancial.com under the heading Investors and subheading Corporate Governance and is also available in print to any stockholder upon written request to Origen Financial, Inc., 27777 Franklin Road, Suite 1700, Southfield, Michigan 48034.

Our Board of Directors established and adopted charters for each of its Audit, Compensation and Nominating and Governance Committees. Each committee is comprised of independent directors. A copy of each of these charters is available on our website at www.origenfinancial.com under the heading Investors and subheading Corporate Governance and is also available in print to any stockholder upon written request to Origen Financial, Inc., 27777 Franklin Road, Suite 1700, Southfield, Michigan 48034.

Our Board of Directors adopted a Code of Business Conduct and Ethics, which governs business decisions made and actions taken by our directors, officers and employees. A copy of this code is available on our website at www.origenfinancial.com under the heading Investors and subheading Corporate Governance and is also available in print to any stockholder upon written request to Origen Financial, Inc., 27777 Franklin Road, Suite 1700, Southfield, Michigan 48034. Additionally, we maintain a Confidential and Anonymous Ethics Complaint Hotline maintained with an independent third party so that employees may confidentially report infractions against our Code of Business Conduct and Ethics to the Compliance Committee. Through this arrangement, each Compliance Committee member has access to two-way anonymous communications with the reporting employee. There are three submission methods (voicemail, email and web form). There is a message management system that provides the member an up-to-date snapshot of all incoming and outgoing communications. The ethics hotline is accessible through our intranet system.

The Sarbanes Oxley Act of 2002 requires the establishment of procedures whereby each member of the Audit Committee of our Board of Directors is able to receive confidential, anonymous communications regarding concerns in the areas of accounting, internal controls or auditing matters. We have established a Confidential and Anonymous Financial Complaint Hotline, or whistleblower hotline, maintained with an independent third party. Through this arrangement, each Audit Committee member has access to two-way anonymous communications with the whistleblower. There are three submission methods (voicemail, e-mail and web form). There is a message management system that provides the member an up-to-date snapshot of all incoming and outgoing communications. The Whistleblower Hotline is accessible through our website at www.origenfinancial.com under the heading Investors.

ITEM 1A. RISK FACTORS

Our prospects are subject to certain uncertainties and risks. Our future results could differ materially from current results, and our actual results could differ materially from those projected in forward-looking statements as a result of certain risk factors. These risk factors include, but are not limited to, those set forth below, other one-time events, and important factors disclosed previously and from time to time in our other filings with the Securities and Exchange Commission. This report contains certain forward-looking statements.

Table of Contents

Risks Related to Our Business

Continuing adverse market conditions might lead us to experience further liquidity problems.

As of March 14, 2008, we owed approximately \$46 million under a supplemental advance credit facility with Citigroup. The credit facility is collateralized by our residual or retained ownership interests in several of our securitized loan pools. Due to recent adverse conditions in the credit markets, uncertainty among lenders and investors has continued to reduce liquidity, drive up the cost of lending and drive down the value of assets in these markets. Further downward market value adjustments on the collateral securing our supplemental advance credit facility might cause Citigroup to require us to provide additional capital upon relatively short notice. If this capital is unavailable, or if it is not available upon terms acceptable to us, then Citigroup may seize the collateral securing this credit facility and pursue all of its other remedies under the credit facility.

We may not have access to adequate capital to meet our existing debt obligations.

On March 14, 2008, our supplemental advance credit facility with Citigroup was extended to June 13, 2008. As of March 14, 2008, the amount due under the facility was approximately \$46 million. Given the current adverse conditions in the credit markets, we have been unable to secure financing under favorable terms to continue originating loans for our own account and for other purposes. There can be no assurance that we will be able to renew, refinance or pay off the credit facility when it expires. Even if such funding is available, we might not be able to obtain it on favorable terms. If we are unable to satisfy our obligations when the credit facility expires, Citigroup may foreclose on the pledged residual interests, and the proceeds of that sale may be less than we would receive if we sold the interests ourselves. As a result, we may not receive any proceeds from such foreclosure sale, and we may be liable to repay any remaining balance on the credit facility.

Our auditors have expressed substantial doubt about our ability to continue as a going concern.

Our audited financial statements for the fiscal year ended December 31, 2007, were prepared under the assumption that we will continue our operations as a going concern. Our registered independent accountants in their audit report have expressed substantial doubt about our ability to continue as a going concern. Continued operations depend on our ability to meet our existing debt obligations and the financing or other capital required to do so may not be available or may not be available on reasonable terms. Our financial statements do not include any adjustments that may result from the outcome of this uncertainty. If we cannot continue as a viable entity, our stockholders may lose some or all of their investment in the company.

Cessation of loan originations for our own account may affect our continuing lines of business.

Originating manufactured home loans has historically been the foundation of our business and has provided a continuing stream of servicing revenue. While our business also includes servicing, third-party originations, insurance and residual asset management, because we have currently determined to cease originating manufactured home loans for our own account, our other business lines may be adversely affected as the revenues associated with these business lines were in large part generated as a result of new loans originated for our own account. As a result, our third-party origination and servicing business lines may fail to grow, and perhaps may decline, if third parties perceive that we do not have the capacity to provide a full range of services.

Our business may not be profitable in the future.

We had net losses of \$31.8 million during the twelve months ended December 31, 2007. While we had net income of approximately \$7.0 million during the twelve months ended December 31, 2006, we incurred net losses of approximately \$2.7 million and \$3.0 million during the twelve months ended December 31, 2005 and 2004, respectively. Origen Financial L.L.C., our predecessor company, which we acquired in October 2003, experienced net losses in each year of its existence while growing its loan origination platform and business, including net losses of approximately \$23.9 million for the period from January 1, 2003 through October 7, 2003 and \$29.2 million for fiscal year 2002. We will need to generate significant revenues to maintain profitability. If we are unable to achieve and maintain sufficient revenue growth, we may not be profitable in the future.

We depend on key personnel, the loss of whom could threaten our ability to operate our business successfully.

Our future success depends, to a significant extent, upon the continued services of our senior management team. In general, we have entered into employment agreements with these individuals. There is no guarantee that these individuals will renew their employment agreements prior to the termination of the employment agreements, some of

which are scheduled to expire in 2008, or that they otherwise will remain employed with us. The market for skilled personnel, especially those with the technical abilities we require, notably in servicing, is currently very competitive, and we must compete with much larger companies with significantly greater resources to attract and retain such personnel. The loss of services of one or more key employees may harm our business and our prospects.

Table of Contents

Some of our investments are illiquid and their value may decrease.

Some of our assets are and will continue to be relatively illiquid. In addition, certain of the asset-backed securities that we hold may include interests that have not been registered under the relevant securities laws, resulting in a prohibition against transfer, sale, pledge or other disposition of those securities except in a transaction that is exempt from the registration requirements of, or otherwise in accordance with, those laws. Our ability to vary our portfolio in response to changes in economic and other conditions, including current market conditions, is currently limited and may become even more constrained. No assurances can be given that the fair market value of any of our assets will not further decrease in the future.

Certain securitization structures may cause us to recognize income for accounting and tax purposes without concurrently receiving the associated cash flow.

Certain securitizations are structured to build overcollateralization over time with respect to the loans that are the subject of the securitization or to accelerate the payment on senior securities to enhance the credit ratings of such securities. Accordingly, these structures may cause us to recognize income without concurrently receiving the associated cash flow. We have used such securitization structures in the past. These securitization structures and the possible resulting mismatch between income recognition and receipt of cash flow may cause us to require capital to meet our REIT distribution requirements, which capital may not be available to us on acceptable terms, if at all.

We may pay distributions that result in a return of capital to stockholders, which may cause stockholders to realize lower overall returns.

We may pay quarterly distributions that result in a return of capital to our stockholders. Any such return of capital to our stockholders will reduce the amount of capital available to us, which may result in lower returns to our stockholders. None of the distributions in 2007 represented a return of capital. Return of capital amounted to 5.5% of distributions in 2006.

We may not generate sufficient revenue to make or sustain distributions to stockholders.

We intend to distribute to our stockholders substantially all of our REIT net taxable income each year so as to avoid paying corporate income tax on our earnings and to qualify for the tax benefits accorded to a REIT under the Internal Revenue Code. Distributions will be made at the discretion of our Board of Directors. Our ability to make and sustain cash distributions is based on many factors, including the performance of our manufactured housing loans, our ability to borrow at favorable rates and terms, interest rate levels and changes in the yield curve and our ability to use hedging strategies to insulate our exposure to changing interest rates. Some of these factors are beyond our control and a change in any such factor could affect our ability to pay future distributions. We cannot assure our stockholders that we will be able to pay or maintain distributions in the future. We also cannot assure stockholders that the level of distributions will increase over time and that our loans will perform as expected or that the growth of our loan acquisition and servicing business will be sufficient to increase our actual cash available for distribution to stockholders.

We may engage in hedging transactions, which can limit gains and increase exposure to losses.

Periodically, we have entered into interest rate swap agreements in an effort to manage interest rate risk. An interest rate swap is considered to be a hedging transaction designed to protect us from the effect of interest rate fluctuations on our floating rate debt and also to protect our portfolio of assets from interest rate and prepayment rate fluctuations. We may use hedging transactions, including interest rate swaps, in the future. The nature and timing of interest rate risk management strategies may impact their effectiveness. Poorly designed strategies may increase rather than mitigate risk. For example, if we enter into hedging instruments that have higher interest rates embedded in them as a result of the forward yield curve, and at the end of the term of these hedging instruments the spot market interest rates for the liabilities that we hedged are actually lower, then we will have locked in higher interest rates for our liabilities than would be available in the spot market at the time and this could result in a narrowing of our net interest rate margin or result in losses. In some situations, we may sell assets or hedging instruments at a loss in order to maintain adequate liquidity. There can be no assurance that our hedging activities will have the desired beneficial impact on our financial condition or results of operations. Moreover, no hedging activity can completely insulate us from the risks associated with changes in interest rates and prepayment rates.

Table of Contents

We may experience capacity constraints or system failures that could damage our business.

If our systems or third-party systems cannot be expanded to support increased third-party loan originations or additional servicing opportunities, or if such systems fail to perform effectively, we could experience:

disruptions in servicing loans;

delays in the introduction of new third-party loan services; or

vulnerability to internet hacker raids,

any of which could impair our reputation, damage the Origen brand, or otherwise have a material adverse effect on our business, operating results and financial condition.

Our ability to provide high-quality service also depends on the efficient and uninterrupted operation of our technology infrastructure. Even though we have developed a redundant infrastructure to protect our systems and operations, our systems are vulnerable to damage or interruption from human error, natural disasters, telecommunication failures, break-ins, sabotage, failure to adequately document the operation of software and hardware systems and procedures, computer viruses, intentional acts of vandalism and similar events. If any of these events were to occur, our business could be materially and adversely affected. Although we maintain business interruption insurance to compensate for losses that could occur for any of these risks, such insurance may not be sufficient to cover a significant loss.

If the prepayment rates for our manufactured housing loans are higher than expected, our results of operations may be significantly harmed.

Prepayments of our manufactured housing loans, whether due to refinancing, repayments, repossessions or foreclosures, in excess of management's estimates could adversely affect our future cash flow as a result of the resulting loss of any servicing fee revenue and net interest income on such prepaid loans. Prepayments can result from a variety of factors, many of which are beyond our control, including changes in interest rates and general economic conditions.

We may not realize the expected recovery rate on the resale of a manufactured house upon its repossession or foreclosure.

Most states impose requirements and restrictions relating to resales of repossessed manufactured houses and foreclosed manufactured houses and land, and obtaining deficiency judgments following such sales. In addition to these requirements and restrictions, our ability to realize the expected recovery rate upon such sales may be affected by depreciation or loss of or damage to the manufactured house. Federal bankruptcy laws and related state laws also may impair our ability to realize upon collateral or enforce a deficiency judgment. For example, in a Chapter 13 proceeding under federal bankruptcy law, a court may prevent us from repossessing a manufactured house or foreclosing on a manufactured house and land. As part of the debt repayment plan, a bankruptcy court may reduce the amount of our secured debt to the market value of the manufactured house at the time of the bankruptcy, leaving us as a general unsecured creditor for the remainder of the debt. A Chapter 7 bankruptcy debtor, under certain circumstances, may retain possession of his or her house, while enforcement of our loan may be limited to the value of our collateral.

Data security breaches may subject us to liability or tarnish our reputation.

In the ordinary course of our business, we acquire and maintain confidential customer information. While we take great care in protecting customer information, we may incur liability if it is accessed by third parties and our customers suffer negative consequences, such as identity theft. We have taken precautions to guarantee the safety of all of our customers' confidential information. We also periodically review all of our data security policies and procedures in an effort to avoid data breaches. However, there can be no guarantee that we will not be subject to future claims arising from data breaches.

Table of Contents

Our profitability may be affected if we are unable to effectively manage interest rate risk and leverage.

We derive our income in part from the difference, or spread, between the interest earned on loans and interest paid on borrowings. In general, the wider the spread, the more we earn. In addition, at any point in time there is an optimal amount of leverage to employ in the business in order to generate the highest rate of return to our stockholders. When market rates of interest change, the interest we receive on our assets and the interest we pay on our liabilities will fluctuate. In addition, interest rate changes affect the optimal amount of leverage to employ. This can cause increases or decreases in our spread and can affect our income, require us to modify our leverage strategy and affect returns to our stockholders. Factors such as inflation, recession, unemployment, money supply, international disorders, instability in domestic and foreign financial markets and other factors beyond our control may affect interest rates.

Risks Related to the Manufactured Housing Industry

Manufactured housing loan borrowers may be relatively high credit risks.

Manufactured housing loans make up substantially our entire loan portfolio. Typical manufactured housing loan borrowers may be relatively higher credit risks due to various factors. Moreover, especially during periods of economic slowdown or recession, decreased real estate values may reduce the incentives that borrowers have to meet their payment obligations. Consequently, the manufactured housing loans we have originated, securitized and in which we have a residual or retained ownership interest bear a higher rate of interest, have a higher probability of default and may involve higher delinquency rates and greater servicing costs relative to loans to more creditworthy borrowers. We bear the risk of delinquency and default on securitized loans in which we have a residual or retained ownership interest. We also reacquire the risks of delinquency and default for loans that we are obligated to repurchase. Repurchase obligations are typically triggered in sales or securitizations if the loan materially violates our representations or warranties. If we experience higher-than-expected levels of delinquency or default in pools of loans that we service, resulting in higher-than-anticipated losses, our servicing rights may be terminated, which would result in a loss of future servicing income and damage to our reputation as a loan servicer.

Depreciation in the value of manufactured houses may decrease sales of new manufactured houses and lead to increased defaults and delinquencies.

The value of manufactured houses has tended to depreciate over time. This depreciation makes pre-owned houses, even relatively new ones, significantly less expensive than new manufactured houses, thereby decreasing the demand for new manufactured houses, which negatively affects the manufactured housing lending industry. Additionally, rapid depreciation may cause the fair market value of borrowers' manufactured houses to be less than the outstanding balance of their loans. In cases where borrowers have negative equity in their houses, they may not be able to resell their manufactured houses for enough money to repay their loans and may have less incentive to continue to repay their loans, which may lead to increased delinquencies and defaults.

Our business may be significantly harmed by a slowdown in the economy of California where we conduct a significant amount of business.

We have no geographic concentration limits on our ability to originate, purchase or service loans. For the year ended December 31, 2007, approximately 55% by principal balance and 39% by number of loans of the loans we originated were in California. As of December 31, 2007, approximately 41% of our loans receivable by principal balance was in California. Further decline in the economy or the residential real estate market in California or in any other state in which we have a high concentration of loans could further decrease the value of manufactured houses and increase the risk of delinquency. This, in turn, would increase the risk of default, repossession or foreclosure on manufactured housing loans that have been securitized and in which we hold a residual or retained ownership interest, loans that we have sold to others, or loans that we service.

Tax Risks of Our Business and Structure

Distribution requirements imposed by law limit our flexibility in executing our business plan, and we cannot assure stockholders that we will have sufficient funds to meet our distribution obligations.

Table of Contents

To maintain our status as a REIT for federal income tax purposes, we generally are required to distribute to our stockholders at least 90% of our REIT taxable net income each year. REIT taxable net income is determined without regard to the deduction for dividends paid and by excluding net capital gains. We are also required to pay federal income tax at regular corporate rates to the extent that we distribute less than 100% of our net taxable income (including net capital gains) each year. In addition, to the extent such income is not subject to corporate tax, we are required to pay a 4% nondeductible excise tax on the amount, if any, by which certain distributions we pay with respect to any calendar year are less than the sum of 85% of our ordinary income for that calendar year, 95% of our capital gain net income for the calendar year and any amount of our income that was not distributed in prior years.

We intend to distribute to our stockholders at least 90% of our REIT taxable net income each year in order to comply with the distribution requirements of the Internal Revenue Code and to avoid federal income tax and the nondeductible excise tax. Differences in timing between the receipt of income and the payment of expenses in arriving at REIT taxable net income and the effect of required debt amortization payments could require us to borrow funds on a short-term basis, access the capital markets or liquidate investments to meet the distribution requirements that are necessary to achieve the federal income tax benefits associated with qualifying as a REIT even if our management believes that it is not in our best interest to do so. We cannot assure our stockholders that any such borrowing or capital market financing will be available to us or, if available to us, will be on terms that are favorable to us. Borrowings incurred to pay distributions will reduce the amount of cash available for operations. Any inability to borrow such funds or access the capital markets, if necessary, could jeopardize our REIT status and have a material adverse effect on our financial condition.

We may suffer adverse tax consequences and be unable to attract capital if we fail to qualify as a REIT.

Since our taxable period ended December 31, 2003, we have been organized and operated, and intend to continue to operate, so as to qualify for taxation as a REIT under the Internal Revenue Code. Although we believe that we have been and will continue to be organized and have operated and will continue to operate so as to qualify for taxation as a REIT, we cannot assure stockholders that we have been or will continue to be organized or operated in a manner to so qualify or remain so qualified. Qualification as a REIT involves the satisfaction of numerous requirements (some on an annual and quarterly basis) established under highly technical and complex Internal Revenue Code provisions for which there are only limited judicial or administrative interpretations, and involves the determination of various factual matters and circumstances not entirely within our control. In addition, frequent changes may occur in the area of REIT taxation, which require us to continually monitor our tax status.

If we fail to qualify as a REIT in any taxable year, we would be subject to federal income tax (including any applicable alternative minimum tax) on our taxable net income at regular corporate rates. Moreover, unless entitled to relief under certain statutory provisions, (generally requiring reasonable cause for any REIT testing violations), we also would be disqualified from treatment as a REIT for the four taxable years following the year during which qualification was lost. This treatment would reduce our net earnings available for investment or distribution to stockholders because of the additional tax liability to us for the years involved. In addition, distributions to stockholders would no longer be required to be made. Even if we qualify for and maintain our REIT status, we will be subject to certain federal, state and local taxes on our property and certain of our operations.

Our use of taxable REIT subsidiaries will cause income from our servicing and insurance activities to be subject to corporate level tax and may cause us to restrict our business activities.

To preserve our qualification as a REIT, we conduct all of our servicing and insurance activities through one or more taxable REIT subsidiaries. A taxable REIT subsidiary is subject to federal income tax, and state and local income tax where applicable, as a regular C corporation. Accordingly, net income from activities conducted by our taxable REIT subsidiaries is subject to corporate level tax. In addition, under the Internal Revenue Code, no more than 20% of the total value of the assets of a REIT may be represented by securities of one or more taxable REIT subsidiaries. This limitation may cause us to limit the growth of our taxable REIT subsidiaries with the potential for decreased revenue.

Our ability to originate loans for third parties may be limited due to various federal income tax rules applicable to REITs.

Table of Contents

Under the Internal Revenue Code, a REIT is subject to a 100% tax on its net income derived from prohibited transactions. The phrase prohibited transactions refers to the sales of inventory or assets held primarily for sale to customers in the ordinary course of a taxpayer's business. A taxpayer who engages in such sales is typically referred to as a dealer. If the Internal Revenue Service does not respect the legal structure of certain of our third party loan origination programs (see Business Loan Origination, Acquisition and Underwriting Third-Party Originations), we may be subject to the prohibited transactions tax on any net income derived from these origination programs. *A portion of our income from assets held directly by or through a qualified REIT subsidiary that is classified as a taxable mortgage pool may represent phantom taxable income.*

A portion of our income from a qualified REIT subsidiary that would otherwise be classified as a taxable mortgage pool may be treated as excess inclusion income, which would be subject to the distribution requirements that apply to us and could therefore adversely affect our liquidity. Generally, a stockholder's share of excess inclusion income would not be allowed to be offset by any operating losses otherwise available to the stockholder. Tax exempt entities that own shares in a REIT must treat their allocable share of excess inclusion income as unrelated business taxable income. A REIT must also pay federal tax, at the highest corporate marginal tax rate, on any excess inclusion income allocated to disqualified organizations (e.g., governmental agencies and tax exempt organizations not subject to the tax on unrelated business income). Any portion of a REIT dividend paid to foreign stockholders that is allocable to excess inclusion income will not be eligible for exemption from the 30% withholding tax (or reduced treaty rate) on dividend income.

We may pay distributions that are in excess of our current and accumulated earnings and profits, which may cause our stockholders to incur future adverse federal income tax consequences.

We may pay quarterly distributions to our stockholders in excess of 100% of our estimated REIT taxable net income. Distributions in excess of our current and accumulated earnings and profits are not treated as a dividend and generally will not be taxable to a taxable U.S. stockholder under current U.S. federal income tax law to the extent those distributions do not exceed the stockholder's adjusted tax basis in his or her common stock. Instead, any such distribution generally will constitute a return of capital, which will reduce the stockholder's adjusted basis and could result in the recognition of increased gain or decreased loss to the stockholder upon a sale of the stockholder's stock.

Other Risks

We operate in a highly regulated industry and failure to comply with applicable laws and regulations at the federal, state or local level could negatively affect our business.

We conduct loan origination activities for third parties and conduct servicing operations in many states. Most states where we operate require that we comply with a complex set of laws and regulations. These laws, which include installment sales laws, consumer lending laws, mortgage lending laws and mortgage servicing laws, differ from state to state, making uniform operations difficult. Most states periodically conduct examinations of our contracts and loans for compliance with state laws. In addition to state laws regulating our business, consumer-lending and servicing activities are subject to numerous federal laws and the rules and regulations promulgated there-under.

These federal and state laws and regulations and other laws and regulations affecting our business, including zoning, density and development requirements and building and environmental rules and regulations, create a complex framework in which we originate and service manufactured housing loans. Moreover, because these laws and regulations are constantly changing, it is difficult to comprehensively identify, accurately interpret, properly program our technology systems and effectively train our personnel with respect to all of these laws and regulations, thereby potentially increasing our exposure to the risks of noncompliance with these laws and regulations. As a result, we have not always been, and may not always be, in compliance with these requirements, including licensing requirements.

Our failure to comply with these laws and regulations can lead to:

Table of Contents

defaults under contracts we have with third parties, which could cause those contracts to be terminated or renegotiated on less favorable terms;

civil fines and penalties and criminal liability;

loss of licenses, exemptions or other approved status, which could in turn require us temporarily or permanently to cease our affected operations;

demands for indemnification, loan repurchases or modification of our loans;

class action lawsuits; and

administrative enforcement actions.

The increasing number of federal, state and local "anti-predatory lending" laws may restrict our ability to originate loans on behalf of third parties or increase our risk of liability with respect to certain manufactured housing loans and could increase our cost of doing business.

In recent years, several federal, state and local laws, rules and regulations have been adopted, or are under consideration, that are intended to eliminate so-called "predatory" lending practices. These laws, rules and regulations impose certain restrictions on loans on which certain points and fees or the annual percentage rate, or APR, exceeds specified thresholds. Some of these restrictions expose a lender to risks of litigation and regulatory sanction no matter how carefully a loan is underwritten. In addition, an increasing number of these laws, rules and regulations seek to impose liability for violations on purchasers of loans, regardless of whether a purchaser knew of or participated in the violation. It is against our policy to engage in predatory lending practices and we have generally avoided originating loans that exceed the APR or "points and fees" thresholds of these laws, rules and regulations. These laws, rules and regulations may prevent us from making certain loans and may cause us to reduce the APR or the points and fees on loans that we do make. In addition, the difficulty of managing the risks presented by these laws, rules and regulations may decrease the availability of warehouse financing and the overall demand for our loans in the secondary market, making it difficult to fund, sell or securitize our loans. If nothing else, the growing number of these laws, rules and regulations will increase our cost of doing business as we are required to develop systems and procedures to ensure that we do not violate any aspect of these new requirements.

The market price of our common stock has significantly declined and may continue to do so.

We have been affected by the current volatility in the stock market. The market price of our common stock may be further affected by our announcement regarding the cessation of our loan origination activities for our own account. We cannot predict the effect, if any, of future sales of shares of our common stock (including outstanding stock purchase warrants and shares of common stock issuable upon the exercise of currently outstanding options, and non-vested shares issued under our 2003 Equity Incentive Plan), or the availability of shares for future sales, or the market price of our common stock. We also may issue from time to time additional shares of common stock and we may grant registration rights in connection with these issuances. Sales of substantial amounts of shares of common stock or the perception that these sales could occur may adversely affect the prevailing market price for our common stock. In addition, the sale of these shares could impair our ability to raise capital through a sale of additional equity securities.

Our rights and the rights of our stockholders to take action against our directors are limited, which could limit stockholders' recourse in the event of certain actions.

Our certificate of incorporation limits the liability of our directors for money damages for breach of a fiduciary duty as a director, except under limited circumstances. As a result, we and our stockholders may have more limited rights against our directors than might otherwise exist. Our bylaws require us to indemnify each director or officer who has been successful, on the merits or otherwise, in the defense of any proceeding to which he or she is made a party by reason of his or her service to us. In addition, we may be obligated to fund the defense costs incurred by our directors and officers.

Our board of directors may change our investment and operational policies and practices without a vote of our stockholders, which limits stockholder control of our policies and practices.

Table of Contents

Our major policies, including our policies and practices with respect to our operations, investments, financing, growth, debt capitalization, REIT qualifications and distributions, are determined by our Board of Directors. Our Board of Directors may amend or revise these and other policies from time to time without a vote of our stockholders. Accordingly, our stockholders will have limited control over changes in our policies.

Certain provisions of Delaware law and our governing documents may make it difficult for a third-party to acquire us.

9.25% Ownership Limit. In order to qualify and maintain our qualification as a REIT, not more than 50% of the outstanding shares of our capital stock may be owned, directly or indirectly, by five or fewer individuals. Thus, ownership of more than 9.25% of our outstanding shares of common stock by any single stockholder has been restricted, with certain exceptions, for the purpose of maintaining our qualification as a REIT under the Internal Revenue Code.

The 9.25% ownership limit, as well as our ability to issue additional shares of common stock or shares of other stock (which may have rights and preferences over the common stock), may discourage a change of control of the Company and may also: (1) deter tender offers for the common stock, which offers may be advantageous to stockholders; and (2) limit the opportunity for stockholders to receive a premium for their common stock that might otherwise exist if an investor were attempting to assemble a block of common stock in excess of 9.25% of the outstanding shares of the Company or otherwise effect a change of control of the Company.

Preferred Stock. Our charter authorizes the Board of Directors to issue up to 10,000,000 shares of preferred stock and to establish the preferences and rights (including the right to vote and the right to convert into shares of common stock) of any shares issued. The power to issue preferred stock could have the effect of delaying or preventing a change in control of the Company even if a change in control were in the stockholders' interest.

Section 203. Section 203 of the Delaware General Corporation Law is applicable to certain types of corporate takeovers. Subject to specified exceptions listed in this statute, Section 203 of the Delaware General Corporation Law provides that a corporation may not engage in any business combination with any interested stockholder for a three-year period following the date that the stockholder becomes an interested stockholder. Although these provisions do not apply in certain circumstances, the provisions of this section could discourage offers from third parties to acquire us and increase the difficulty of successfully completing this type of offer.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Our executive offices are located in approximately 25,000 square feet of leased space at 27777 Franklin Road, Suite 1700 and Suite 1640, Southfield, Michigan 48034. The lease, which terminates on August 31, 2011, provides for monthly rent of approximately \$47,000. Certain of our officers and directors own interests in the company from which we lease our executive offices.

We also lease office space for our offices in other locations. We currently have a lease expiring in July 2009 for approximately 3,800 square feet of office space in Glen Allen, Virginia with a current monthly rent of approximately \$6,000; and a lease expiring in June 2012 for approximately 42,000 square feet of office space in Fort Worth, Texas with a current monthly rent of approximately \$33,000.

ITEM 3. LEGAL PROCEEDINGS

We are involved in various legal proceedings arising in the ordinary course of business. All such proceedings, taken together, are not expected to have a material adverse impact on our results of operations or financial condition.

and paid on
April 2, 2007.

In order to qualify for the tax benefits accorded to REITs under the Internal Revenue Code, we must, and we intend to, make distributions to our stockholders each year in an amount at least equal to (i) 90% of our REIT taxable net income (before the deduction for dividends paid and not including any net capital gain), plus (ii) 90% of the excess of our net income from foreclosure property over the tax imposed on such income by the Internal Revenue Code, minus (iii) any excess non-cash income. Differences in timing between the receipt of income and the payment of expenses and the effect of required debt amortization payments could require us to borrow funds on a short-term basis, access the capital markets or liquidate investments to meet this distribution requirement.

The actual amount and timing of distributions will be at the discretion of our Board of Directors and will depend upon our actual results of operations. To the extent not inconsistent with maintaining our REIT status, we may

Table of Contents

maintain accumulated earnings of our taxable REIT subsidiaries in those subsidiaries.

In the future, our Board of Directors may elect to adopt a dividend reinvestment plan.

Equity Compensation Plan Information

The following table reflects information about the securities authorized for issuance under our equity compensation plans as of December 31, 2007.

	(a)	(b)	(c)
Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by shareholders	202,000	\$ 10.00	217,676
Equity compensation plans not approved by shareholders	N/A	N/A	N/A
Total	202,000	\$ 10.00	217,676

Table of Contents**Stockholder Return Performance Presentation**

Set forth below is a line graph comparing the yearly percentage change in the cumulative total stockholder return on our common stock against the cumulative total return of a broad market index composed of all issuers listed on the Nasdaq National Market (NASDAQ) and the SNL Finance REITs Index for the period beginning on May 5, 2004 (the date of our initial public offering) and ending on December 31, 2007. This line graph assumes a \$100 investment on May 5, 2004, a reinvestment of dividends and actual decrease of the market value of our common stock relative to an initial investment of \$100. The comparisons in this table are required by the applicable SEC regulations and are not intended to forecast or be indicative of possible future performance of our common stock.

(1) Origen Financial, Inc. began operations on October 8, 2003 as a REIT with Origen Financial L.L.C. as a wholly-owned subsidiary.

(2) As a REIT, Origen

Financial, Inc. is not required to pay federal corporate income taxes on its net income that is currently distributed to its stockholders. As a limited liability company, Origen Financial L.L.C. does not incur income taxes.

- (3) As a limited liability company, Origen Financial L.L.C. did not report earnings per share.
- (4) Origen Financial L.L.C. is our predecessor for accounting purposes. However, we believe that its business, financial statements and results of operations are quantitatively different from ours. Its results of operations reflect capital constraints and corporate and business strategies, including commercial mortgage loan

origination and servicing, which are different than ours. We also have elected to be taxed as a REIT. Accordingly, we believe the historical financial results of Origen Financial L.L.C. are not indicative of our future performance.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the consolidated financial condition and results of operations should be read in conjunction with the consolidated financial statements and the notes thereto.

Management's discussion and analysis of financial condition and results of operations and liquidity and capital resources contained within this Form 10-K is more clearly understood when read in conjunction with our historical financial statements and the related notes. The notes to the financial statements provide information about us, as well as the basis for presentation used in this Form 10-K.

Overview

In October 2003, we began operations upon the acquisition of all of the equity interests of Origen Financial L.L.C. We also took steps to qualify Origen Financial, Inc. as a REIT. In the second quarter of 2004, we completed the initial public offering of our common stock. Currently, most of our operations are conducted through Origen Financial L.L.C., our wholly-owned subsidiary. We conduct the rest of our business operations through our other wholly-owned subsidiaries, including taxable REIT subsidiaries, to take advantage of certain business opportunities and ensure that we comply with the federal income tax rules applicable to REITs.

In May 2007, we completed a securitization of approximately \$200.4 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization we, through a special purpose entity, issued \$184.4 million in notes payable. Additional credit enhancement was provided by a guaranty from Ambac Assurance Corporation. The notes are stratified into two different classes. The Class A-1 notes pay interest at one month LIBOR plus 19 basis points and have a contractual maturity date of April 2037. The Class A-2 notes pay interest based on a rate established by the auction agent at each rate determination date and have a contractual maturity date of April 2037. Approximately \$182.4 million of the proceeds was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse facility.

In September 2007, we, through our primary operating subsidiary, Origen Financial L.L.C., entered into a \$15 million secured financing arrangement with the William M. Davidson Trust u/a/d 12/13/04 (the Lender), an affiliate of one of our principal stockholders (the Bridge Financing). The Lender is a grantor revocable trust established by William M. Davidson as the grantor. Mr. Davidson is the sole member of Woodward Holding, LLC, which owns approximately 6.8% of our common stock. The Bridge Financing includes a senior secured promissory note (the Note) and a senior secured convertible promissory note (the Convertible Note). The Note and the Convertible Note are each one-year secured notes bearing interest at 8% per year and are secured by a portion of our rights to receive servicing fees on our loan servicing portfolio. The Note, which has an original principal amount of \$10 million, and the Convertible Note, which has an original principal amount of \$5 million, are each due on September 11, 2008. The term of the Note and the Convertible Note may be extended up to 120 days with the payment of additional fees. The Convertible Note may be converted at the option of the Lender into shares of our common stock at a conversion price of \$6.237 per share. In connection with the Bridge Financing, we issued a stock purchase warrant to the Lender. The stock purchase warrant is a five-year warrant to purchase 500,000 shares of our common stock at an exercise price of \$6.16 per share.

In October 2007, we completed a securitization of approximately \$140.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization we through a special purpose entity, issued \$126.7 million of a single AAA rated floating rate class of asset-backed notes to a single qualified institutional buyer pursuant to Rule 144A under the Securities Act of 1933. Additional credit enhancement was provided by a guaranty from Ambac Assurance Corporation. The notes pay interest at one month LIBOR plus 120 basis points. Approximately \$122.4 million of the proceeds was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse facility.

Table of Contents

Developments Based on Current Adverse Market Conditions

Recent and current conditions in the credit markets have adversely impacted our business and financial condition. During 2007, the credit markets that we depend on for warehouse lending for originations and for securitization of our originated loans, as well as the whole loan market for acquisition of loans we originate, deteriorated. This situation began with problems in the sub-prime loan market and subsequently has had the same effect on lenders and investors in asset classes other than sub-prime mortgages, such as our manufactured housing loans.

Despite actions by the Federal Reserve Bank to lower interest rates and increase liquidity, uncertainty among lenders and investors has continued to reduce liquidity, drive up the cost of lending and drive down the value of assets in these markets. The specific effects are that banks and other lenders have reported large losses, have demanded that borrowers reduce the credit exposure to these assets resulting in margin calls or reductions in borrowing availability, and have caused massive sales of underlying assets that collateralize the loans. The consequence of these sales has been further downward pressure on market values of the underlying assets, such as our manufactured housing loans, despite the continued high intrinsic quality of our loans in terms of borrower creditworthiness and low rates of delinquencies, defaults and repossessions.

Our business model depends on the availability of credit, both for the funding of newly originated loans and for the periodic securitization of pools of loans that have been originated and funded by short-term borrowings from warehouse lenders. The securitization process permits us to sell bonds secured by the loans we have originated. The proceeds from the bond sales are used to pay off the warehouse lenders and recharge the availability of funding for newly originated loans.

If warehouse funding is not available, or is available only on terms that do not permit us to profit from loan origination, our origination of loans for our own account only can be continued at a loss. If there is no market for securitization at rates of interest and leverage levels acceptable to us, our only alternative for satisfying our obligations under our warehouse line is to sell the manufactured housing loans. If purchasers are unwilling to pay at least the full amount advanced to borrowers plus all related fees and costs, sales of loans are not profitable for us.

As a result of these conditions:

Because of the unavailability of a profitable financing in the securitization market, on March 14, 2008, we sold our portfolio of approximately \$174.6 million in aggregate principal balance of unsecuritized loans with a carrying value of \$175.7 million for approximately \$155.0 million.

We used the proceeds of the loan sale primarily to pay off the outstanding loan balance of approximately \$146.4 million on our warehouse credit facility, which expired on March 14, 2008.

Because of the absence of a profitable exit in the securitization market and reduced pricing in the whole loan market, we suspended originating loans for our own account until these markets recover. We will, however, continue to provide loan origination services for third-parties.

Our stock price has steadily declined to a point where it is well below its tangible net book value. As a consequence, we recorded a non-cash impairment charge, writing off our entire goodwill of \$32.3 million in December 2007.

In February 2008, to satisfy our warehouse lender, we sold an asset-backed bond for \$22.5 million, in order to fully pay off \$19.6 million of repurchase agreements secured by this bond and three others that we continue to hold. Sale of this bond resulted in our recording an asset impairment charge of \$9.2 million in 2007.

Our lender under our supplemental advance credit facility secured by a pledge of our residual interests in our securitizations has agreed to extend the due date of the facility until June 13, 2008. This facility otherwise would have expired on March 14, 2008 and we would have been obligated to repay approximately \$50 million outstanding under the facility.

Table of Contents

On March 13, 2008, we decreased our work force by 16% to reduce costs that were associated with originating loans for our own account.

We believe that these actions were necessitated by and are a result of the market conditions described above. We do not believe that the actions reflect on the quality of our continuing business operations or the credit performance or long-term realizable value of our loan portfolio, which in our opinion continues to remain very high.

Going Concern

Our audited financial statements for the fiscal year ended December 31, 2007, were prepared under the assumption that we will continue our operations as a going concern. Our registered independent accountants in their audit report have expressed substantial doubt about our ability to continue as a going concern. Continued operations depend on our ability to meet our existing debt obligations. Based on the intrinsic value of our assets and discussions we have had with third parties about possible strategic alternatives, we believe we will be able to raise the additional funds we need on a timely basis, but such funds may not be available or may not be available on reasonable terms.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosures. On an on-going basis, we evaluate these estimates, including those related to reserves for credit losses, recourse liabilities, servicing rights and retained interests in loans sold and securitized. Estimates are based on historical experience, information received from third parties and on various other assumptions that are believed to be reasonable under the circumstances, which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under conditions different from our assumptions. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Securitizations Structured as Financings

We engage in securitizations of our manufactured housing loan receivables. We have structured all loan securitizations occurring since 2003 as financings for accounting purposes under Statement of Financial Accounting Standards No. 140 (SFAS 140), Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities a replacement of FASB Statement No. 125. In the future, we intend to account for our securitizations as financings. When a loan securitization is structured as a financing, the financed asset remains on our books along with the recorded liability that evidences the financing, typically bonds. Income from both the loan interest spread and the servicing fees received on the securitized loans are recorded into income as earned. An appropriate allowance for credit losses is maintained on the loans. Deferred debt issuance costs and discount related to the bonds are amortized on a level yield basis over the estimated life of the bonds.

Investments

Except for debt securities acquired with evidence of deterioration of credit quality since origination, which are accounted for as described below, we follow the provisions of Statement of Financial Accounting Standards No. 115 (SFAS 115), Accounting For Certain Investments in Debt and Equity Securities, in reporting our investments. The investments are classified as either available-for-sale or held-to-maturity. Investments classified as available-for sale are carried at fair value. Unrealized gains and losses related to these investments are included in accumulated other comprehensive income. Investments classified as held-to-maturity are carried on our balance sheet at amortized cost. All investments are regularly measured for impairment. Management uses its judgment to determine whether an investment has sustained an other-than-temporary decline in value. If management determines that an investment has sustained an other-than-temporary decline in its value, the investment is written down to its fair value by a charge to earnings, and we establish a new cost basis for the investment. If a security that is available for sale sustains an other-than-temporary impairment, the identified impairment is reclassified from accumulated other comprehensive income to earnings, thereby establishing a new cost basis. Our evaluation of an other-than-temporary decline is dependent on the specific facts and circumstances. Factors that we consider in determining whether an other-than-temporary decline in value has occurred include: the estimated fair value of the investment in relation to its

cost basis; the financial condition of the related entity; and the intent and ability to retain the investment for a sufficient period of time to allow for recovery in the fair value of the investment.

Table of Contents*Loans Receivable*

Loans receivable consist of manufactured housing loans under contracts collateralized by the borrowers manufactured houses and in some instances, related land. Generally, loans receivable are classified as held for investment and are carried at amortized cost, except for loans purchased with evidence of deterioration of credit quality since origination, which are described below. Periodically, we identify loans we expect to sell prior to maturity. When loans are identified to be sold, they are reclassified as held for sale and reported at the lower of cost or market. Included in a loan's cost are unearned deferred fees and cost and the allowance for loan losses relating to the loans held for sale. The fair value of loans classified as held for sale is based on market prices. If market prices are not readily available, fair value is based on discounted cash flow models, which considers expected prepayment factors and the degree of credit risk associated with the loans and the estimated effects of changes in market interest rates relative to the loans interest rates. We do not amortize basis adjustments, including deferred loan origination costs, fees and discounts and premiums on loans held for sale. Interest on loans is credited to income when earned. Loans held for investment include accrued interest and are presented net of deferred loan origination fees and costs and an allowance for estimated loan losses. All of our loans receivable were classified as held for investment at December 31, 2007 and 2006.

Allowance for Loan Losses

Determining an appropriate allowance for loan losses involves a significant degree of estimation and judgment. The process of estimating the allowance for loan losses may result in either a specific amount representing the impairment estimate or a range of possible amounts. Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, provides guidance on accounting for loan losses associated with pools of loans and requires the accrual of a loss when it is probable that an asset has been impaired and the amount of the loss can be reasonably estimated. Our loan portfolio is comprised of manufactured housing loans with an average loan balance of approximately \$49,000 at December 31, 2007. The allowance for loan losses is developed at the portfolio level and the amount of the allowance is determined by establishing a calculated range of probable losses. A lower range of probable losses is calculated by applying historical loss rate factors to the loan portfolio on a stratified basis using current portfolio performance and delinquency levels (0-30 days, 31-60 days, 61-90 days and greater than 90 days delinquent). An upper range of probable losses is calculated by the extrapolation of probable loan impairment based on the correlation of historical losses by vintage year of origination. Financial Accounting Standards Board Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* an interpretation of FASB Statement No. 5, states that a creditor should recognize the amount that is the best estimate within the estimated range of loan losses. Accordingly, the determination of an amount within the calculated range of losses is in recognition of the fact that historical charge-off experience, without adjustment, may not be representative of current impairment of the current portfolio of loans because of changed circumstances. Such changes may relate to changes in the age of loans in the portfolio, changes in the creditor's underwriting standards, changes in economic conditions affecting borrowers in a geographic region, or changes in the business climate in a particular industry.

Loan Pools and Debt Securities Acquired with Evidence of Deterioration of Credit Quality

We account for loan pools and debt securities acquired with evidence of deterioration of credit quality at the time of acquisition in accordance with the provisions of the American Institute of Certified Public Accountants (AICPA) Statement of Position 03-3 (SOP 03-3), *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*. The carrying values of such purchased loan pools and debt securities were approximately \$25.6 million and \$3.5 million, respectively, at December 31, 2007 and \$29.6 million and \$3.6 million, respectively, at December 31, 2006, and are included in loans receivable and investments held to maturity, respectively, in the consolidated balance sheet.

We adopted the provisions of SOP 03-3 in January 2005 and apply those provisions to loan pools and debt securities acquired after December 31, 2004. Under the provisions of SOP 03-3, each static pool of loans and debt securities is statistically modeled to determine its projected cash flows. We consider historical cash collections for loan pools and debt securities with similar characteristics as well as expected prepayments and estimate the amount and timing of undiscounted expected principal, interest and other cash flows for each pool of loans and debt security. An internal rate of return is calculated for each static pool of receivables based on the projected cash flows and applied to the balance of the static pool. The resulting revenue recognized is based on the internal rate of return applied to the

remaining balance of each static pool of accounts. Each static pool is analyzed at least quarterly to assess the actual performance compared to the expected performance. To the extent there are differences in actual

Table of Contents

performance versus expected performance, the internal rate of return is adjusted prospectively to reflect the revised estimate of cash flows over the remaining life of the static pool. Beginning January 2005, if revised cash flow estimates are less than the original estimates, SOP 03-3 requires that the internal rate of return remain unchanged and an immediate impairment be recognized. For loans acquired with evidence of deterioration of credit quality, if cash flow estimates increase subsequent to recording an impairment, SOP 03-3 requires reversal of the previously recognized impairment before any increases to the internal rate of return are made. For any remaining increases in estimated future cash flows for loan pools or debt securities acquired with evidence of deterioration of credit quality, we adjust the amount of accretable yield recognized on a prospective basis over the remaining life of the loan pool or debt security.

Application of the interest method of accounting requires the use of estimates to calculate a projected internal rate of return for each pool. These estimates are based on historical cash collections. If future cash collections are materially different in amount or timing than projected cash collections, earnings could be affected, either positively or negatively. Higher collection amounts or cash collections that occur sooner than projected cash collections will have a favorable impact on yields and revenues. Lower collection amounts or cash collections that occur later than projected cash collections will have an unfavorable impact and result in an immediate impairment being recognized.

Derivative Financial Instruments

We have periodically used derivative instruments, primarily interest rate swaps, in order to mitigate interest rate risk or the variability of cash flows to be paid, related to our loans receivable and anticipated securitizations. We follow the provisions of Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Instruments and Hedging Activities (as amended by Statement of Financial Accounting Standards No. 149). All derivatives are recorded on the balance sheet at fair value. On the date a derivative contract is entered into, we designate the derivative as a hedge of either a forecasted transaction or the variability of cash flow to be paid (cash flow hedge). Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in other comprehensive income until earnings are affected by the forecasted transaction or the variability of cash flow and are then reported in current earnings. Any ineffectiveness is recorded in current earnings.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objectives and strategy for undertaking the hedge transaction. This process includes linking cash flow hedges to specific forecasted transactions or variability of cash flow.

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flow of hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, we discontinue hedge accounting prospectively, in accordance with SFAS 133.

Derivative financial instruments that do not qualify for hedge accounting are carried at fair value and changes in fair value are recognized currently in earnings.

Share-Based Compensation

In connection with our formation, we adopted an equity incentive plan. We follow the provisions of Statement of Financial Accounting Standards No. 123 revised (SFAS 123(R)), Share-Based Payment, which we adopted on January 1, 2006, using the modified-prospective transition method, in order to account for our equity incentive plan. In connection with the adoption of SFAS 123(R), we recorded a cumulative effect of a change in accounting principle in the amount of \$46,000 to reflect the change in accounting for forfeitures. Results for prior periods have not been restated. SFAS 123(R) addresses the accounting for share-based payment transactions in which an enterprise receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. Under this pronouncement, all forms of share-based payments to employees, including employee stock options, are treated the same as other forms of compensation by recognizing the related cost in the income statement. The expense of the award would generally be measured at fair value at the grant date. The fair value of

Table of Contents

each option granted would be determined using a binomial option-pricing model based on assumptions related to annualized dividend yield, stock price volatility, risk free rate of return and expected average term. Prior to January 1, 2006, as permitted under the provisions of SFAS No. 123, Accounting for Stock-Based Compensation, as amended, we chose to recognize compensation expense using the intrinsic value-based method of valuing stock options prescribed in APB No. 25, Accounting for Stock Issued to Employees and related interpretations. Under the intrinsic value-based method, compensation cost is measured as the amount by which the quoted market price of our common stock at the date of grant exceeds the stock option exercise price. All options we granted prior to the adoption of SFAS 123(R) were granted at a fixed price not less than the market value of the underlying common stock on the date of grant and, therefore, were not included in compensation expense, prior to the adoption of SFAS 123(R).

Goodwill Impairment

As a result of the acquisition of Origen Financial L.L.C., our predecessor company, on October 8, 2003, which was accounted for as a purchase, we recorded the net assets acquired at fair value, which resulted in recording goodwill of \$32.3 million.

In accordance with SFAS 142, Goodwill and Other Intangible Assets, we test goodwill for impairment on an annual basis in the fourth quarter, or more frequently if we believe indicators of impairment exist. For purposes of testing goodwill impairment, we have determined that with respect to our recorded goodwill, we are a single reporting unit. The performance of the impairment test involves a two-step process. The first step of the impairment test involves comparing our fair value with our aggregate carrying value, including goodwill. The initial and ongoing estimate of our fair value is based on assumptions and projections prepared by us. If our carrying amount exceeds our fair value, we perform the second step of the goodwill impairment test in order to determine the amount of impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the goodwill with the carrying value of that goodwill.

We performed our annual impairment test of goodwill on December 31, 2007, based on conditions as of December 31, 2007, in accordance with SFAS 142, and determined that our recorded goodwill was fully impaired. The impairment was due to current market and economic conditions which have resulted in a further and extended decline in the quoted market price of our equity securities below tangible book value. As a result, we recorded a non-cash goodwill impairment charge of \$32.3 million during the year ended December 31, 2007. No impairment was recorded during the years ended December 31, 2006 or 2005.

Income Taxes

We have elected to be taxed as a REIT as defined under Section 856(c)(1) of the Internal Revenue Code of 1986, as amended (the Code). In order for us to qualify as a REIT, at least ninety-five percent (95%) of our gross income in any year must be derived from qualifying sources. In addition, a REIT must distribute at least ninety percent (90%) of its REIT taxable net income to its stockholders.

Qualification as a REIT involves the satisfaction of numerous requirements (some on an annual and quarterly basis) established under highly technical and complex Code provisions for which there are only limited judicial or administrative interpretations, and involves the determination of various factual matters and circumstances not entirely within our control. In addition, frequent changes occur in the area of REIT taxation, which requires us to continually monitor our tax status.

We continuously monitor our compliance with the requirements for qualification as a REIT, and we believe that we met such requirements for the taxable year ended December, 31, 2007. However, there is no assurance that the Internal Revenue Service will not decide differently.

As a REIT, we generally will not be subject to U.S. federal income taxes at the corporate level on the ordinary taxable income we distribute to our stockholders as dividends. If we fail to qualify as a REIT in any taxable year, our taxable income will be subject to U.S. federal income tax at regular corporate rates (including any applicable alternative minimum tax). Even if we qualify as a REIT, we may be subject to certain state and local income taxes

Table of Contents

and to U.S. federal income and excise taxes on our undistributed taxable income. In addition, taxable income from non-REIT activities managed through taxable REIT subsidiaries, if any, is subject to federal and state income taxes. An income tax allocation is required to be estimated on our taxable income generated by our taxable REIT subsidiaries. Deferred tax components arise based upon temporary differences between the book and tax basis of items such as the allowance for loan losses, accumulated depreciation, share-based compensation and goodwill.

Financial Condition**December 31, 2007 Compared to December 31, 2006**

At December 31, 2007 and 2006 we held loans representing approximately \$1,196.0 million and \$956.6 million of principal balances, respectively. Net loans outstanding constituted approximately 93% and 88% of our total assets at December 31, 2007 and 2006, respectively. Approximately \$325.5 million of the loans on our balance sheet at December 31, 2007 were included in either our May 2007 or our October 2007 securitization, and will continue to be carried on our balance sheet as the securitization transactions were structured as financings.

In May 2007 we completed our 2007-A securitization of approximately \$200.4 million in principal balance of manufactured housing loans.

In October 2007 we completed our 2007-B securitization of approximately \$140.0 million in principal balance of manufactured housing loans.

New loan originations for the year ended December 31, 2007 increased 21.9% to \$344.6 million compared to \$282.7 million for the year ended December 31, 2006. We additionally processed \$111.6 million and \$49.6 million in loans originated under third-party origination agreements for the years ended December 31, 2007 and 2006, respectively.

The carrying amount of loans receivable consisted of the following at December 31 (in thousands):

	2007	2006
Manufactured housing loans held for investment, securitized	\$ 1,051,015	\$ 825,811
Manufactured housing loans held for investment, unsecuritized	144,926	130,828
Accrued interest receivable	5,608	4,840
Deferred loan origination costs	5,612	1,271
Discount on purchased loans	(4,450)	(3,155)
Allowance for purchased loans	(913)	(913)
Allowance for loan losses	(7,882)	(8,456)
	\$ 1,193,916	\$ 950,226

The following table sets forth the average individual loan balance, weighted average loan yield, and weighted average initial term at December 31 (dollars in thousands):

	2007	2006
Number of loans receivable	24,416	20,300
Average loan balance	\$ 49	\$ 47
Weighted average loan coupon (1)	9.45%	9.50%
Weighted average initial term	20 years	20 years

(1) The weighted average loan coupon includes an imbedded servicing fee rate resulting from

securitization or
sale of the loan,
but accounted
for as a
financing.

Table of Contents

Delinquency statistics for the loan receivable portfolio at December 31 are as follows (dollars in thousands):

Days delinquent	2007			2006		
	No. of Loans	Principal Balance	% of Portfolio	No. of Loans	Principal Balance	% of Portfolio
31 60	268	\$9,451	0.8%	248	\$9,354	1.0%
61 90	84	3,496	0.3%	86	3,159	0.3%
Greater than 90	170	7,484	0.6%	131	5,416	0.6%

We define non-performing loans as those loans that are 90 or more days delinquent in contractual principal payments. The average balance of non-performing loans was \$5.8 million for the year ended December 31, 2007 compared to \$5.7 million for the year ended December 31, 2006. Non-performing loans as a percentage of average outstanding principal balance were 0.7% for the year ended December 31, 2007 compared to 0.6% for the year ended December 31, 2006.

At December 31, 2007 we held 202 repossessed houses owned by us compared to 145 houses at December 31, 2006, an increase of 57 houses, or 39.3%. The book value of these houses, including repossession expenses, based on the lower of cost or market value, was approximately \$5.0 million at December 31, 2007 compared to \$3.0 million at December 31, 2006, an increase of \$2.0 million, or 66.7%. This increase is the result of a change from selling the repossessed houses in the retail market as opposed to the wholesale market. As a result, we expect to realize increased recovery rates and longer sale periods.

The allowance for loan losses decreased \$0.6 million to \$7.9 million at December 31, 2007 from \$8.5 million at December 31, 2006. Despite the 26.7% increase in the gross loans receivable balance, net of loans accounted for under SOP 03-3 the allowance for loan losses decreased 7.1% due to consistently lower delinquency and net charge-off rates. The allowance for loan losses as a percentage of gross loans receivable, net of loans accounted for under SOP 03-3, was approximately 0.7% at December 31, 2007 compared to approximately 0.9% at December 31, 2006. Net charge-offs were \$9.3 million, or 0.9% of the average outstanding loans receivable balance, and \$8.6 million, or 1.0% of the average outstanding loans receivable balance, for the years ended December 31, 2007 and 2006, respectively.

Changes to our underwriting practices and processes, credit scoring models, systems and servicing techniques beginning in 2002 have resulted in demonstrably superior performance by loans originated in and subsequent to 2002 as compared to loans originated by our predecessors prior to 2002. The pre-2002 loans, despite representing a diminishing percentage of our owned loan portfolio, have had a disproportionate negative impact on our financial performance.

Table of Contents

The following tables indicate the impact of such legacy loans:

Dollars defaulted	\$ 8,752	\$12,272
Net losses	\$ 6,707	\$ 5,312

(1) Includes owned portfolio, repossessed inventory and loans sold with recourse.

While representing approximately 3% of the owned loan portfolio at December 31, 2007, the pre-2002 loans accounted for approximately 20% of the defaults and 28% of the losses during 2007. Additionally, recovery rates were substantially lower for the pre-2002 loans leading to higher losses as compared to loans from 2002 and later. Management believes that as these loans become a smaller percentage of the owned loan portfolio, the negative impact on earnings will diminish.

Through our wholly-owned subsidiary, Origen Servicing, Inc., we provide loan servicing for manufactured housing loans that we and our predecessors have originated or purchased, and for loans originated by third parties. As of December 31, 2007, we serviced approximately \$1.8 billion of loans, including approximately \$599.1 million of loans serviced for others, as compared to approximately \$1.6 billion of loans, including approximately \$647.2 million of loans serviced for others, as of December 31, 2006. Included in the loans serviced for others were \$113.6 million and \$127.9 million of loans as of December 31, 2007, and 2006, respectively, which we or our predecessors originated and subsequently sold in two pre-2003 securitization transactions. As part of our contractual services, certain of our servicing contracts require us to advance uncollected principal and interest payments at a prescribed cut-off date each month to an appointed trustee on behalf of the investors in the loans. We are reimbursed by the trust in the event such delinquent principal and interest payments remain uncollected during the next reporting period. Also, as part of the

servicing function, in order to protect the value of the housing asset underlying the loan, we are required to advance certain expenses such as taxes, insurance costs and costs related to the foreclosure or repossession process as necessary. Such expenditures are reported to the appropriate trustee for reimbursement. At December 31, 2007, we had servicing advances outstanding of approximately \$6.3 million compared to \$7.7 million at December 31, 2006, a decrease of 18.2%.

As a result of the acquisition of Origen Financial L.L.C., our predecessor company, on October 8, 2003, which was accounted for as a purchase, we recorded the net assets acquired at fair value, which resulted in recording goodwill of \$32.3 million. We performed our annual impairment test of goodwill on December 31, 2007, based on conditions as of December 31, 2007, in accordance with SFAS 142, and determined that our recorded goodwill was fully impaired. The impairment was due to current market and economic conditions which have resulted in a further and extended decline in the quoted market price of the Company's equity securities below tangible book value. As a result, we recorded a non-cash goodwill impairment charge of \$32.3 million during the year ended December 31, 2007.

Table of Contents

Bonds outstanding, relating to securitized financings utilizing asset-backed structures, totaled \$884.7 million and \$685.0 million at December 31, 2007 and 2006, respectively. These bonds relate to seven securitized transactions: Origen 2004-A, issued in February 2004, Origen 2004-B, issued in September 2004, Origen 2005-A, issued in May 2005, Origen 2005-B, issued in December 2005, Origen 2006-A, issued in August 2006, Origen 2007-A, issued in May 2007 and Origen 2007-B, issued in October 2007. Bonds outstanding for each securitized transaction were as follows at December 31 (in thousands):

	Original Issuance	2007	2006
Origen 2004 A	\$ 200,000	\$ 95,753	\$ 113,408
Origen 2004 B	169,000	96,290	114,443
Origen 2005 A	165,300	108,318	128,668
Origen 2005 B	156,187	118,464	137,454
Origen 2006 A	200,646	169,398	191,040
Origen 2007 A	184,389	171,588	
Origen 2007 B	126,700	124,839	
	\$ 1,202,222	\$ 884,650	\$ 685,013

At December 31, 2007 our total borrowings under our warehouse financing facility with Citigroup were \$173.1 million compared to \$131.5 million at December 31, 2006. We used the Citigroup facility to fund loans we originated or purchased until such time as they could be included in one of our securitization transactions. We used the proceeds of our May 2007 and October 2007 securitizations to reduce borrowings outstanding on the Citigroup facility.

We previously had a revolving credit facility with JPMorgan Chase Bank, N.A. Under the terms of the facility, which was terminated by us in September 2007, we could borrow up to \$4.0 million for the purpose of funding required principal and interest advances on manufactured housing loans that are serviced for outside investors. Borrowings under the facility were repaid upon our collection of monthly payments made by borrowers on such manufactured housing loans. All liens were released as of the termination of the facility. The outstanding balance on the facility was approximately \$2.2 million at December 31, 2006.

Stockholders' equity was \$148.4 million and \$204.5 million at December 31, 2007 and 2006, respectively. We had net losses of \$31.8 million, including a non-cash goodwill impairment charge of \$32.3 million and an investment impairment charge of \$9.2 million, other comprehensive losses of \$19.4 million and declared and paid distributions of \$7.0 million during the year ended December 31, 2007.

Results of Operations for the Years Ended December 31, 2007 and December 31, 2006

Loan originations increased \$61.9 million, or 21.9% to \$344.6 million from \$282.7 million for the years ended December 31, 2007 and 2006, respectively. We additionally processed \$111.6 million and \$49.6 million in loans originated under third party origination agreements during the years ended December 31, 2007 and 2006, respectively. Chattel loans comprised approximately 87% and 91% of loans originated during the years ended December 31, 2007 and 2006, respectively. The other loans originated, in each year, were land-home loans, which represent manufactured housing loans that are additionally collateralized by real estate.

Interest income on loans increased \$17.4 million, from \$69.7 million to \$87.1 million, or 25.0%. This increase in interest income resulted primarily from an increase in the average outstanding balance of manufactured housing loan receivables of \$226.4 million from \$851.8 million to \$1,078.2 million, or 26.6%. The increase in the average receivable balance was partially offset by a decrease in the average yield on the portfolio from 8.2% to 8.1%. The decrease in the yield on the portfolio was due to competitive conditions resulting in lower interest rates on new originations and a continuing positive change in the credit quality of the loan portfolio. Generally, higher credit quality loans will carry a lower interest rate.

Interest income on other interest earning assets increased from \$4.6 million to \$5.0 million. The increase was primarily the result of an increase in the average balance of interest earning assets other than manufactured housing loans and investment securities from \$16.6 million to \$22.2 million.

Table of Contents

Interest expense increased \$16.3 million, or 37.5%, to \$59.8 million from \$43.5 million. The majority of our interest expense relates to interest on our loan funding facilities. Average debt outstanding increased \$228.8 million to \$981.2 million compared to \$752.4 million, or 30.4%. The average interest rate on total debt outstanding increased from 5.8% to 6.1%.

The following table presents information relative to the average balances and interest rates of our interest earning assets and interest bearing liabilities for the years ended December 31 (dollars in thousands):

	2007			2006		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate
Interest earning assets:						
Manufactured housing loans						
(1)	\$ 1,078,174	\$ 87,114	8.08%	\$ 851,758	\$ 69,702	8.18%

(1) Net of loan servicing fees.

(2) Includes facility fees.

(3) Includes non-use fees and the amortization of the fair value of the related stock purchase warrant.

(4)

Amount is calculated as net interest income divided by total average interest earning assets.

The following table sets forth the changes in the components of net interest income for the year ended December 31, 2007 compared to the year ended December 31, 2006 (in thousands). The changes in net interest income between periods have been reflected as attributable to either volume or rate changes. For the purposes of this table, changes that are not solely due to volume or rate changes are allocated to rate.

	Volume	Rate	Total
Interest earning assets:			
Manufactured housing loans	\$ 18,528	\$ (1,116)	\$ 17,412
Investment securities	(6)	60	54
Other interest earning assets	284	82	366
Total interest income	\$ 18,806	\$ (974)	\$ 17,832
Interest bearing liabilities:			
Loan funding facilities	\$ 13,136	\$ 2,705	\$ 15,841
Repurchase agreements	(164)	36	(128)
Other interest bearing liabilities	387	160	547
Total interest expense	\$ 13,359	\$ 2,901	\$ 16,260
Increase in net interest income			\$ 1,572

Monthly provisions are made to the allowance for general loan losses in order to maintain a level that is adequate to absorb inherent losses in the manufactured housing loan portfolio. The level of the allowance is based principally on the outstanding balance of the contracts held on our balance sheet, current loan delinquencies and historical trends. The provision for loan losses increased 22.5% to \$8.7 million from \$7.1 million. The provision for loan losses for the year ended December 31, 2006 was reduced by approximately \$1.6 million as a result of a reduction in the portion of the allowance for loan losses initially established for estimated losses related to the effects of Hurricane Katrina and Hurricane Rita. No such reduction was recorded during the year ended December 31, 2007. Net charge-offs were \$9.3 million, or 0.9% of the average outstanding loans receivable balance, and \$8.6 million, or 1.0% of the average outstanding loans receivable balance, for the years ended December 31, 2007 and 2006, respectively.

An impairment of \$0.5 million in the carrying value of a previously purchased loan pool was recognized during

Table of Contents

the year ended December 31, 2006, as a result of changes in projected cash flows. No such impairment was recorded during the year ended December 31, 2007.

Non-interest income for the year ended December 31, 2007 totaled \$22.0 million as compared to \$17.8 million for 2006, an increase of \$4.2 million, or 23.6%. The primary components of non-interest income are fees and other income from loan servicing and insurance operations. The increase in non-interest income is primarily due to the increase in the average serviced loan portfolio on which servicing fees are collected from \$1.6 billion to \$1.7 billion, as well as an increase of \$0.6 million in third-party origination income and an increase of \$0.2 million in insurance commissions.

Total non-interest expense for the year ended December 31, 2007, including a non-cash goodwill impairment charge of \$32.3 million and an investment impairment charge of \$9.2 million, was \$77.4 million as compared to \$34.1 million for 2006. Following is a discussion of the increase of \$43.3 million, or 127.0%.

Personnel expenses increased approximately \$0.6 million, or 2.5%, to \$24.4 million compared to \$23.8 million. The increase is primarily the result of a \$0.6 million increase in salaries and bonuses.

Loan origination and servicing expenses increased approximately \$0.4 million, or 25.0%, to \$2.0 million compared to \$1.6 million. The increase is primarily attributable to increases in repossession expenses.

As a result of the acquisition of Origen Financial L.L.C., our predecessor company, on October 8, 2003, which was accounted for as a purchase, we recorded the net assets acquired at fair value, which resulted in recording goodwill of \$32.3 million. We performed our annual impairment test of goodwill on December 31, 2007, based on conditions as of December 31, 2007, in accordance with SFAS 142, and determined that our recorded goodwill was fully impaired. The impairment was due to current market and economic conditions which have resulted in a further and extended decline in the quoted market price of the Company's equity securities below tangible book value. As a result, we recorded a non-cash goodwill impairment charge of \$32.3 million during the year ended December 31, 2007. No impairment was recorded during the year ended December 31, 2006.

In December 2007, we transferred an investment with a \$31.8 million carrying value from investments held-to-maturity to investments available-for-sale. At the time of this transfer we recognized an other-than-temporary impairment of \$9.2 million in order to record the investment at fair value upon completion of the transfer (See Note 3

Investments, Note 11 Debt and Note 21 Subsequent Events under Item 8 Financial Statements and Supplemental Data for further discussion).

As a national loan originator and servicer of manufactured housing loans, we are required to be licensed in all states in which we conduct business. Accordingly, we are subject to taxation by the states in which we conduct business. Depending on the individual state, taxes may be based on proportioned revenue, net income, capital base or asset base. During both of the years ended December 31, 2007 and 2006, we incurred state taxes of \$0.3 million.

Other operating expenses, which consist of occupancy and equipment, professional fees, travel and entertainment and miscellaneous expenses increased \$0.9 million, or 10.8%, from \$8.3 million to \$9.2 million. Professional fees increased by \$0.4 million, or 25.0% from \$1.6 million to \$2.0 million. Occupancy and equipment, office expense and telephone expense was \$5.0 million during both 2007 and 2006. Travel and entertainment expense increased \$0.5 million, or 35.7%, from \$1.4 million to \$1.9 million. Miscellaneous expenses were \$0.3 million during both of the years ended December 31, 2007 and 2006.

Income tax expenses for the years ended December 31, 2007 and 2006 were approximately \$60,000 and \$24,000, respectively.

Results of Operations for the Years Ended December 31, 2006 and December 31, 2005

Loan originations increased \$14.7 million, or 5.5% to \$282.7 million from \$268.0 million for the years ended December 31, 2006 and 2005, respectively. We additionally processed \$49.6 million and \$32.0 million in loans originated under third party origination agreements during the years ended December 31, 2006 and 2005, respectively. Chattel loans comprised approximately 91% and 97% of loans originated during the years ended

Table of Contents

December 31, 2006 and 2005, respectively. The other loans originated, in each year, were land-home loans, which represent manufactured housing loans that are additionally collateralized by real estate.

Interest income on loans increased \$14.5 million, from \$55.2 million to \$69.7 million, or 26.3%. This increase in interest income resulted primarily from an increase in the average outstanding balance of manufactured housing loan receivables of \$184.7 million from \$667.1 million to \$851.8 million, or 27.7%. The increase in the average receivable balance was partially offset by a decrease in the average yield on the portfolio from 8.3% to 8.2%. The decrease in the yield on the portfolio was due to competitive conditions resulting in lower interest rates on new originations and a continuing positive change in the credit quality of the loan portfolio. Generally, higher credit quality loans will carry a lower interest rate.

Interest income on other interest earning assets increased from \$4.2 million to \$4.6 million. The increase was primarily the result of an increase in the average yield on interest earning assets other than manufactured housing loans and investment securities from 2.9% to 5.1%.

Interest expense increased \$15.0 million, or 52.6%, to \$43.5 million from \$28.5 million. The majority of our interest expense relates to interest on our loan funding facilities. Average debt outstanding increased \$184.9 million to \$752.4 million compared to \$567.5 million, or 32.6%. The average interest rate on total debt outstanding increased from 5.0% to 5.8%. The higher average interest rate for the year ended December 31, 2006 was primarily due to increases in the base LIBOR rate.

The following table presents information relative to the average balances and interest rates of our interest earning assets and interest bearing liabilities for the years ended December 31 (dollars in thousands):

	2006			2005		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate
Interest earning assets:

Other interest bearing liabilities	(20)	9	(11)
Total interest expense	\$ 9,319	\$ 5,711	\$ 15,030
Decrease in net interest income			\$ (126)

Monthly provisions are made to the allowance for general loan losses in order to maintain a level that is adequate to absorb inherent losses in the manufactured housing loan portfolio. The provision for loan losses decreased 44.1% to \$7.1 million from \$12.7 million. The provision for the year ended December 31, 2005 included approximately \$3.5 million related to the effects of Hurricane Katrina and Hurricane Rita and approximately \$0.8 million of losses related to the charge-off of loans repurchased from Vanderbilt Mortgage and Finance, Inc. (Vanderbilt) under a previous repurchase agreement. Net charge-offs were \$8.6 million for the year ended December 31, 2006 compared to \$10.0 million for the year ended December 31, 2005. As a percentage of average outstanding principal balance total net charge-offs decreased to 1.0% compared to 1.5%.

An impairment of \$0.5 million and \$0.4 million in the carrying value of a previously purchased loan pool was recognized during the years ended December 31, 2006 and 2005, respectively, as a result of changes in projected cash flows.

Non-interest income for the year ended December 31, 2006 totaled \$17.8 million as compared to \$14.7 million for 2005, an increase of 21.1%. The primary components of non-interest income are fees and other income from loan servicing and insurance operations. The increase in non-interest income is primarily due to the increase in the average serviced loan portfolio on which servicing fees are collected from \$1,441.5 million to \$1,555.0 million.

Total non-interest expense for the year ended December 31, 2006 was \$34.1 million as compared to \$35.1 million for 2005. Following is a discussion of the decrease of \$1.0 million, or 2.8%.

Personnel expenses increased approximately \$1.2 million, or 5.3%, to \$23.8 million compared to \$22.6 million. The increase is primarily the result of a \$0.9 million increase in salaries and temporary office staffing expenses, a \$0.9 million increase in annual performance bonuses and incentives and a \$0.2 million increase in health insurance expenses, offset by a decrease of \$0.8 million in share-based compensation expenses.

Loan origination and servicing expenses amounted to approximately \$1.6 million for both the year ended December 31, 2006 and 2005.

Write-down of residual interest decreased from \$0.7 million to zero. Securitized loan transactions completed during years 2002 and 2001 were structured as loan sales for accounting purposes. As a result, our predecessor companies recorded an asset representing their residual interests in the loans at the time of sale, based on the discounted values of the projected cash flows over the expected life of the loans sold. During the year ended

December 31, 2005, we wrote-off our remaining \$0.7 million residual interest in the 2002-A securitization as a result of the effects of Hurricane Katrina and Hurricane Rita. Since 2002, neither we nor our predecessor has structured a securitization transaction as a sale for accounting purposes, nor is it our intention to do so in the future. There were no write-downs of residual interests during the year ended December 31, 2006. As of December 31, 2006 and 2005 we had no retained interests in loan securitizations remaining on our consolidated balance sheet.

Table of Contents

During the year ended December 31, 2005 we incurred a loss of \$0.8 million as a result of our buy-out of our recourse obligation with Vanderbilt.

As a national loan originator and servicer of manufactured housing loans, we are required to be licensed in all states in which we conduct business. Accordingly, we are subject to taxation by the states in which we conduct business. Depending on the individual state, taxes may be based on proportioned revenue, net income, capital base or asset base. During the year ended December 31, 2006 we incurred state taxes of \$0.3 million as compared to \$0.4 million during the year ended December 31, 2005.

Other operating expenses, which consist of occupancy and equipment, professional fees, travel and entertainment and miscellaneous expenses decreased \$0.6 million, or 6.7%, from \$8.9 million to \$8.3 million. Professional fees decreased by \$0.3 million, or 15.8% from \$1.9 million to \$1.6 million. Occupancy and equipment, office expense and telephone expense increased a total of \$0.5 million, or 11.1%, from \$4.5 million to \$5.0 million. Travel and entertainment expense was \$1.4 million during both 2006 and 2005. Miscellaneous expenses were \$0.3 million and \$1.1 million during the years ended December 31, 2006 and 2005, respectively.

Income tax expenses for the year ended December 31, 2006 were approximately \$24,000. There were no income tax expenses for the year ended December 31, 2005.

Liquidity and Capital Resources

During the third and fourth quarters of 2007 the capital markets encountered unprecedented disruption as a result of difficulties in the sub-prime mortgage market. While we are not participants in that market, we nonetheless were negatively affected by the unsettled market conditions. Spreads widened across all spectrums of the asset-backed securities market and providers of warehouse lending facilities and other forms of operating capital severely tightened conditions and applied significantly more conservative market value determinations on the collateral underlying existing loan programs. The issuance of \$15 million of senior secured promissory notes during the third quarter, as described more fully below and elsewhere in this Form 10-K, temporarily enhanced our liquidity position. However, as described above under Developments Based on Current Adverse Market Conditions, market conditions have had a severe adverse effect on our liquidity and capital resources. Accordingly, among other actions, we have suspended originating loans for our own account until these markets recover, we sold our portfolio of unsecuritized loans at a loss and our warehouse credit facility has expired.

We require capital to meet our existing debt obligations, and to fund our loan servicing and other operations. At December 31, 2007 we had approximately \$10.8 million in available cash and cash equivalents. As a REIT, we are required to distribute at least 90% of our REIT taxable income (as defined in the Internal Revenue Code) to our stockholders on an annual basis. Therefore, as a general matter, it is unlikely we will have any substantial cash balances that could be used to meet our liquidity needs. Instead, these needs must be met from cash provided from operations and external sources of capital. Historically, we have satisfied our liquidity needs through cash generated from operations, sales of our common and preferred stock, borrowings on our credit facilities and securitizations. Given that we have ceased originating loans for our own account, our business has become less capital intensive, and we believe that cash provided from operations will be sufficient to fund our ongoing business.

Cash provided by operating activities during the year ended December 31, 2007, totaled \$23.1 million versus \$16.3 million for the year ended December 31, 2006. Cash used in investing activities was \$254.0 million for the year ended December 31, 2007 versus \$193.3 million for the year ended December 31, 2006. Cash used to originate and purchase loans increased 27.7%, or \$79.9 million, to \$368.3 million for the year ended December 31, 2007 compared to \$288.4 million for the year ended December 31, 2006. Principal collections on loans totaled \$104.2 million for the year ended December 31, 2007 as compared to \$86.6 million for the year ended December 31, 2006, an increase of \$17.6 million, or 20.3%. The increase in collections is primarily related to the increase in the average outstanding loan portfolio balance, which was \$1,078.2 million for the year ended December 31, 2007 compared to \$851.8 million for the year ended December 31, 2006, in addition to improved credit quality and decreased delinquency as a percentage of the outstanding loan receivable balances.

The primary sources of cash during the year ended December 31, 2007 were our 2007-A and 2007-B securitized financing transactions completed in May 2007 and October 2007, respectively. In our 2007-A securitization we

Table of Contents

securitized approximately \$200.4 million in principal balance of manufactured housing loans, which was funded by issuing bonds of approximately \$184.4 million. Approximately \$182.4 million of proceeds was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse financing facility. In our 2007-B securitization we securitized approximately \$140.0 million in principal balance of manufactured housing loans, which was funded by issuing bonds of approximately \$126.7 million. Approximately \$122.4 million of proceeds was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse financing facility.

Access to the securitization market has historically been important to our business. We used the proceeds from successful securitization transactions to pay down our other short-term credit facilities giving us renewed borrowing capacity to fund new loan originations. Despite the fact that securities issued by us since 2002 have continued to perform well, due to current market conditions, we have not utilized the securitization market since October 2007. In addition, our credit facility used to originate loans for our own account expired and was not renewed by our lender, we were unable to secure replacement financing on acceptable terms, and so we have ceased originating loans for our own account. As we do not currently intend to originate new loans for our own account, we do not anticipate additional securitization transactions. During March 2008, due to our inability to access the securitization market on favorable terms, we sold our unsecuritized whole loan portfolio, for an amount below par value, in order to meet our obligations to Citigroup under our warehouse financing which had matured.

Our short-term securitization facility used for warehouse financing with Citigroup matured in March 2008. Under the terms of the agreement, originally entered into in March 2003 and amended periodically, most recently in August 2007, we pledged loans as collateral and in turn were advanced funds. The facility had a maximum advance amount of \$200 million at an annual interest rate equal to LIBOR plus a spread. The outstanding balance on the facility was approximately \$173.1 million and \$131.5 million at December 31, 2007 and 2006, respectively. Additionally, the facility includes a \$55 million supplemental advance amount collateralized by our residual interests in our 2004-A, 2004-B, 2005-A, 2005-B, 2006-A, 2007-A and 2007-B securitizations. The supplemental advance facility expired in March 2008 and has been extended until June 13, 2008. As of March 14, 2008, we had \$46 million outstanding under our supplemental advance facility. We are seeking alternative means to satisfy our obligations under this facility, which may include cash from operations, asset sales, re-financing arrangements, and issuances of convertible debt or equity.

On September 11, 2007, we, through our primary operating subsidiary, Origen Financial L.L.C., entered into the Bridge Financing (see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Overview). The Bridge Financing had an aggregate outstanding balance of \$14.6 million at December 31, 2007. Proceeds from the Bridge Financing were used for general corporate purposes and to provide working capital. The Bridge Financing is due on September 11, 2008. We are seeking alternative means to satisfy our obligations under the Bridge Financing, which may include cash from operations, asset sales, re-financing arrangements, and issuances of convertible debt or equity.

Our audited financial statements for the fiscal year ended December 31, 2007, were prepared under the assumption that we will continue our operations as a going concern. Our registered independent accountants in their audit report have expressed substantial doubt about our ability to continue as a going concern. Continued operations are dependent on our ability to meet our existing debt obligations and the financing or other capital required to do so may not be available or may not be available on reasonable terms. Our financial statements do not include any adjustments that may result from the outcome of this uncertainty. If we cannot continue as a viable entity, our stockholders may lose some or all of their investment in the company.

In September 2005, the Securities and Exchange Commission declared effective our shelf registration statement on Form S-3 for the proposed offering, from time to time, of up to \$200 million of our common stock, preferred stock and debt securities. In addition to such debt securities, preferred stock and other common stock we may sell under the registration statement from time to time, we have registered for sale 1,540,000 shares of our common stock pursuant to a sales agreement that we have entered into with Brinson Patrick Securities Corporation. Sales under the agreement commenced on June 5, 2007. We sold 50,063 shares of common stock under the sales agreement with Brinson Patrick Securities Corporation during the year ended December 31, 2007, at the price of our common stock prevailing at the time of each sale. We received proceeds, net of commissions, of \$296,000 during the year ended December 31, 2007,

as a result of these sales.

Table of Contents

In addition to borrowings under our credit facilities and issuances of securitized notes, we have fixed contractual obligations under various lease agreements. Our contractual obligations were comprised of the following as of December 31, 2007 (in thousands):

		Total	Less than 1 year	1 - 3 years	4 - 5 years	Thereafter
Notes payable	Citigroup (1)	\$ 173,072	\$ 129,804	\$ 43,268	\$	\$
Notes payable	2004-A securitization (2)	95,753	13,737	21,953	16,671	43,392
Notes payable	2004-B securitization (3)	96,290	16,434	23,345	16,716	39,795
Notes payable	2005-A securitization (4)	108,318	21,382	24,847	17,962	44,127
Notes payable	2005-B securitization (5)	118,464	19,719	29,429	19,772	49,544
Notes payable	2006-A securitization (6)	169,398	26,536	43,580	27,785	71,497
Notes payable	2007-A securitization (7)	171,588	21,118	40,451	32,972	77,047

Davidson Trust
u/a/d 12/13/04.

We need cash to pay interest expense on our securitized bonds and credit facilities. We expect the total interest expense to be in excess of \$47.6 million during the twelve months ending December 31, 2008.

Our long-term liquidity and capital requirements consist primarily of funds necessary to continue our loan servicing and other operations. We expect to meet our long-term liquidity requirements through cash generated from operations, but we may require external sources of capital, which may include sales of assets, sales of shares of our common stock, preferred stock, debt securities, convertible debt securities (either pursuant to our shelf registration statement on Form S-3 or otherwise) or third-party borrowings. Our ability to meet our long-term liquidity needs depends on numerous factors, many of which are outside of our control. These factors include general capital market and economic conditions, general market interest rate levels, the shape of the yield curve and spreads between rates on U.S. Treasury obligations and securitized bonds, the access to reliable sources of credit enhancement, such as financial guarantees, all of which affect investors' demand for equity and debt securities, including securitized debt securities. As has recently been demonstrated, general market conditions can change rapidly, and accordingly the level of access to liquidity and the cost of such liquidity can be negatively impacted in ways disproportionate to the credit performance of an entity's underlying asset portfolio or the quality of its operations.

The risks associated with the manufactured housing business become more acute in any economic slowdown or recession. Periods of economic slowdown or recession may be accompanied by decreased demand for consumer credit and declining asset values. In the manufactured housing business, any material decline in collateral values increases the loan-to-value ratios of loans previously made, thereby weakening collateral coverage and increasing the size of losses in the event of default. Delinquencies, repossessions, foreclosures and losses generally increase during economic slowdowns or recessions. For our finance customers, loss of employment, increases in cost-of-

Table of Contents

living or other adverse economic conditions would impair their ability to meet their payment obligations. Higher industry inventory levels of repossessed manufactured houses may affect recovery rates and result in future impairment charges and provision for losses. In addition, in an economic slowdown or recession, servicing and litigation costs generally increase. Any sustained period of increased delinquencies, repossessions, foreclosures, losses or increased costs would adversely affect our financial condition, results of operations and liquidity. We bear the risk of delinquency and default on securitized loans in which we have a residual or retained ownership interest. We also reacquire the risks of delinquency and default for loans that we are obligated to repurchase. Repurchase obligations are typically triggered in sales or securitizations if the loan materially violates our representations or warranties. If we experience higher-than-expected levels of delinquency or default in pools of loans that we service, resulting in higher-than-anticipated losses, our servicing rights may be terminated, which would result in a loss of future servicing income.

Forward-Looking Statements

This Annual Report on Form 10-K contains various forward-looking statements within the meaning of the Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and we intend that such forward-looking statements will be subject to the safe harbors created thereby. For this purpose, any statements contained in this Form 10-K that relate to prospective events or developments are deemed to be forward-looking statements. Words such as believes, forecasts, anticipates, intends, plans, expects, similar expressions are intended to identify forward-looking statements. These forward-looking statements reflect our current views with respect to future events and financial performance, but involve known and unknown risks and uncertainties, both general and specific to the matters discussed in this Form 10-K. These risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by such forward-looking statements. Such risks and uncertainties include:

- the risk that the inability to raise additional capital to meet our existing debt obligations could threaten our ability to continue as a going concern;

- the performance of our manufactured housing loans;

- our ability to borrow at favorable rates and terms;

- conditions in the asset-backed securities market generally and the manufactured housing asset-backed securities market specifically, including rating agencies' views on the manufactured housing industry;

- the supply of manufactured housing loans;

- interest rate levels and changes in the yield curve (which is the curve formed by the differing Treasury rates paid on one, two, three, five, ten and thirty-year term debt);

- our ability to use hedging strategies to insulate our exposure to changing interest rates;

- changes in, and the costs associated with complying with, federal, state and local regulations, including consumer finance and housing regulations;

- applicable laws, including federal income tax laws;

- general economic conditions in the markets in which we operate;

and those referenced in Item 1A, under the headings entitled Risk Factors contained in this Form 10-K and our other filings with the Securities and Exchange Commission. All forward-looking statements included in this document are based on information available to us on the date of this Form 10-K. We do not intend to update or revise any forward-looking statements that we make in this document or other documents, reports, filings or press releases,

whether as a result of new information, future events or otherwise.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in market prices and interest rates. Our market risk arises from interest rate risk inherent in our financial instruments. We are not currently subject to foreign currency exchange rate risk or commodity price risk.

Table of Contents

The outstanding balance of our variable rate debt, under which we paid interest at various LIBOR rates plus a spread, totaled \$656.5 million and \$348.3 million at December 31, 2007 and 2006, respectively. If LIBOR increased or decreased by 1.0% during the years ended December 31, 2007 and 2006, we believe our interest expense would have increased or decreased by approximately \$5.2 million and \$2.1 million, respectively, based on the \$518.0 million and \$213.8 million average balance outstanding under our variable rate debt facilities for the years ended December 31, 2007 and 2006, respectively. As a result of our hedging activity, the increase or decrease in interest expense would have been offset by \$3.3 million and \$0.7 million during the years ended December 31, 2007 and 2006, respectively. We had no variable rate interest earning assets outstanding during the years ended December 31, 2007 or 2006.

The following table shows the contractual maturity dates of our assets and liabilities at December 31, 2007. For each maturity category in the table the difference between interest-earning assets and interest-bearing liabilities reflects an imbalance between re-pricing opportunities for the two sides of the balance sheet. The consequences of a negative cumulative gap at the end of one year suggests that, if interest rates were to rise, liability costs would increase more quickly than asset yields, placing negative pressure on earnings (dollars in thousands).

	Expected Maturity				Total
	0 to 3 months	4 to 12 months	1 to 5 years	Over 5 years

Cumulative interest sensitivity gap to total assets	(1.77)%	(8.96)%	(2.75)%		

We believe the negative effect of a rise in interest rates is reduced by the anticipated securitization of our loans receivable, which in conjunction with our hedging strategies, fixes our cost of funds associated with the loans over the lives of such loans.

Our hedging strategies use derivative financial instruments, such as interest rate swap contracts, to mitigate interest rate risk and variability in cash flows on our securitizations and anticipated securitizations. It is not our policy to use derivatives to speculate on interest rates. These derivative instruments are intended to provide income

Table of Contents

and cash flow to offset potential increased interest expense and potential variability in cash flows under certain interest rate environments.

We held eight separate open derivative positions at December 31, 2007. All eight of these positions were interest rate swaps.

Three of the positions are interest rate swaps related to our 2006-A, 2007-A and 2007-B securitizations. These interest rate swaps lock in the base LIBOR interest rate on the outstanding balances of the 2006-A, 2007-A and 2007-B variable rate notes at 5.48%, 5.12% and 5.23%, respectively, for the life of the notes. At December 31, 2007, the outstanding notional balances on these interest rate swaps was \$171.3 million, \$172.6 million and \$125.3 million on the 2006-A, 2007-A and 2007-B interest rate swaps, respectively.

We held two interest rate swaps for the purpose of locking in the base LIBOR interest rate on a portion of our anticipated 2008-A securitization transaction. The agreements fix the interest rate on notional amounts of \$35 million and \$15 million at 5.07% and 4.77%, respectively. (See Note 21, Subsequent Events, under Item 8, Financial Statements and Supplementary Data, for further discussion) .

At December 31, 2007 we held three interest rate swaps which were not accounted for as hedges. Under the agreements, at December 31, 2007, we paid one month LIBOR and received fixed rates of 5.48%, 5.12% and 5.23% on outstanding notional balances of \$1.1 million, \$0.3 million and \$0.6 million, respectively.

Table of Contents

The following table shows our financial instruments that are sensitive to changes in interest rates and are categorized by contractual maturity at December 31, 2007 (dollars in thousands):

	Interest Rate Sensitivity						Total
	2008	2009	2010	2011	2012	There-after

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Origen Financial, Inc.

We have audited the accompanying consolidated balance sheets of Origen Financial, Inc. (a Delaware corporation) and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Origen Financial, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 13 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standard No. 123 (R), Share Based Payments, effective January 1, 2006.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Notes 11 and 21 to the consolidated financial statements, the deteriorating credit and mortgage securitization markets and the expiration of the supplemental advance facility on June 13, 2008 raise substantial doubt about the Company's ability to continue as a going concern. Management's plans concerning these matters are described in Note 16. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Origen Financial Inc. and subsidiaries' internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 17, 2008 expressed an unqualified opinion.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Origen Financial, Inc.

We have audited Origen Financial, Inc. (a Delaware corporation) and subsidiaries (the Company) internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on Origen Financial, Inc. s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Origen Financial, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Origen Financial, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, comprehensive income, changes in stockholders equity and cash flows for each of the three years in the period ended December 31, 2007, and our report dated March 17, 2008, expressed an unqualified opinion on those consolidated financial statements which included an explanatory paragraph regarding the Company s ability to continue as a going concern.

Origen Financial, Inc.

Notes to Consolidated Financial Statements

Note 1 Organization and Summary of Significant Accounting Policies

Company Formation and Nature of Operations

Origen Financial, Inc., a Delaware corporation (the Company), was incorporated on July 31, 2003. On October 8, 2003, the Company completed a private placement of \$150 million of its common stock to certain institutional and accredited investors. In connection with and as a condition to the October 2003 private placement, the Company acquired all of the equity interests of Origen Financial L.L.C. in a transaction accounted for as a purchase. As part of these transactions the Company took steps to qualify Origen Financial, Inc. as a real estate investment trust (REIT) commencing with its taxable year ended December 31, 2003. The Company's business is to originate, purchase and service manufactured housing loans. The Company's manufactured housing loans are generally conventionally amortizing loans that generally range in amounts from \$10,000 to \$250,000 and have terms of seven to thirty years and are located throughout the United States. The Company generally securitizes or places the manufactured housing loans it originates with institutional investors and retains the rights to service the loans on behalf of those investors. Currently, most of the Company's activities are conducted through Origen Financial L.L.C., which is a wholly owned subsidiary. The Company conducts the rest of its business operations through one or more other subsidiaries, including taxable REIT subsidiaries, to take advantage of certain business opportunities and ensure that the Company complies with the federal income tax rules applicable to REITs.

Basis of Financial Statement Presentation

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The accompanying consolidated financial statements include the financial position, results of operations and cash flows of the Company, its wholly-owned qualified REIT and taxable REIT subsidiaries. All intercompany amounts have been eliminated.

These consolidated financial statements were prepared under the assumption that the Company will continue its operations as a going concern. The Company's independent registered accountants in their audit report have expressed substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of the Company's ability to continue as a going concern.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period, including significant estimates regarding the allowance for loan losses, valuation of servicing rights, deferral of certain direct loan origination costs, amortization of yield adjustments to net interest income and the valuation of goodwill. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents represent short-term highly liquid investments with original maturities of three months or less and include cash and interest bearing deposits at banks. The Company has restricted cash related to loans serviced for others that is held in trust.

Table of Contents

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Investments

Except for debt securities acquired with evidence of deterioration of credit quality since origination, which are accounted for as described below, the Company follows the provisions of Statement of Financial Accounting Standards No. 115 (SFAS 115), Accounting For Certain Investments in Debt and Equity Securities, in reporting its investments. The investments are classified as either available-for-sale or held-to-maturity. Investments classified as available-for sale are carried at fair value. Unrealized gains and losses related to these investments are included in accumulated other comprehensive income. Investments classified as held-to-maturity are carried on the Company's balance sheet at amortized cost. All investments are regularly measured for impairment. Management uses its judgment to determine whether an investment has sustained an other-than-temporary decline in value. If management determines that an investment has sustained an other-than-temporary decline in its value, the investment is written down to its fair value by a charge to earnings, and we establish a new cost basis for the investment. If a security that is available for sale sustains an other-than-temporary impairment, the identified impairment is reclassified from accumulated other comprehensive income to earnings, thereby establishing a new cost basis. Our evaluation of an other-than-temporary decline is dependent on the specific facts and circumstances. Factors that we consider in determining whether an other-than-temporary decline in value has occurred include: the estimated fair value of the investment in relation to its cost basis; the financial condition of the related entity; and the intent and ability to retain the investment for a sufficient period of time to allow for recovery in the fair value of the investment.

Loan Pools and Debt Securities Acquired with Evidence of Deterioration of Credit Quality

The Company accounts for loan pools and debt securities acquired with evidence of deterioration of credit quality at the time of acquisition in accordance with the provisions of the American Institute of Certified Public Accountants (AICPA) Statement of Position 03-3 (SOP 03-3), Accounting for Certain Loans or Debt Securities Acquired in a Transfer . The carrying values of such purchased loan pools and debt securities were approximately \$25.6 million and \$3.5 million, respectively, at December 31, 2007 and \$29.6 million and \$3.6 million, respectively, at December 31, 2006, and are included in loans receivable and investments held to maturity, respectively, in the consolidated balance sheet.

Under the provisions of SOP 03-3, each static pool of loans and debt securities is statistically modeled to determine its projected cash flows. The Company considers historical cash collections for loan pools and debt securities with similar characteristics as well as expected prepayments and estimates the amount and timing of undiscounted expected principal, interest and other cash flows for each pool of loans and debt security. An internal rate of return is calculated for each static pool of receivables based on the projected cash flows and applied to the balance of the static pool. The resulting revenue recognized is based on the internal rate of return applied to the remaining balance of each static pool of accounts. Each static pool is analyzed at least quarterly to assess the actual performance compared to the expected performance. To the extent there are differences in actual performance versus expected performance, the internal rate of return is adjusted prospectively to reflect the revised estimate of cash flows over the remaining life of the static pool. Beginning January 2005, if revised cash flow estimates are less than the original estimates, SOP 03-3 requires that the internal rate of return remain unchanged and an immediate impairment be recognized. For loans acquired with evidence of deterioration of credit quality, if cash flow estimates increase subsequent to recording an impairment, SOP 03-3 requires reversal of the previously recognized impairment before any increases to the internal rate of return are made. For any remaining increases in estimated future cash flows for loan pools or debt securities acquired with evidence of deterioration of credit quality, the Company adjusts the amount of accretable yield recognized on a prospective basis over the remaining life of the loan pool or debt security.

Application of the interest method of accounting requires the use of estimates to calculate a projected internal rate of return for each pool. These estimates are based on historical cash collections. If future cash collections are materially different in amount or timing than projected cash collections, earnings could be affected, either positively or negatively. Higher collection amounts or cash collections that occur sooner than projected cash collections will have a favorable impact on yields and revenues. Lower collection amounts or cash collections that occur later than projected cash collections will have an unfavorable impact and result in an immediate impairment being recognized.

Table of Contents

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Loans Receivable

Loans receivable consist of manufactured housing loans under contracts collateralized by the borrowers manufactured houses and in some instances, related land. Generally, loans receivable are classified as held for investment and are carried at amortized cost, except for loans purchased with evidence of deterioration of credit quality since origination, which are accounted for as described above, under Loan Pools and Debt Securities Acquired with Evidence of Deterioration of Credit Quality. Periodically, the Company identifies loans that it expects to sell prior to maturity. When loans are identified to be sold, they are reclassified as held for sale and reported at the lower of cost or market. Included in a loan's cost are unearned deferred fees and cost and the allowance for loan losses relating to the loans held for sale. The fair value of loans classified as held for sale is based on market prices. If market prices are not readily available, fair value is based on discounted cash flow models, which considers expected prepayment factors and the degree of credit risk associated with the loans and the estimated effects of changes in market interest rates relative to the loans interest rates. The Company does not amortize basis adjustments, including deferred loan origination costs, fees and discounts and premiums on loans held for sale. Interest on loans is credited to income when earned. Loans held for investment include accrued interest and are presented net of deferred loan origination fees and costs and an allowance for estimated loan losses. All of the Company's loans receivable were classified as held for investment at December 31, 2007 and 2006.

Allowance for Loan Losses

The allowance for possible loan losses is maintained at a level believed adequate by management to absorb losses on loans in the Company's loan portfolio. In accordance with Statement of Financial Accounting Standards No. 5, Accounting for Contingencies, the Company provides an accrual for loan losses when it is probable that a loan asset has been impaired and the amount of such loss can be reasonably estimated. The Company's loan portfolio is comprised of homogenous manufactured housing loans with average loan balances of approximately \$49,000 at December 31, 2007. The allowance for loan losses is developed at a portfolio level and the amount of the allowance is determined by establishing a calculated range of probable losses. A range of probable losses is calculated by applying historical loss rate factors to the loan portfolio on a stratified basis using the Company's current portfolio performance and delinquency levels (0-30 days, 31-60 days, 61-90 days and more than 90 days delinquent) and by the extrapolation of probable loan impairment based on the correlation of historical losses by vintage year of origination. Based on Financial Accounting Standards Board Interpretation No. 14, Reasonable Estimation of the Amount of a Loss an interpretation of FASB Statement No. 5, the Company then makes a determination of the best estimate within the calculated range of loan losses. Such determination may include, in addition to historical charge-off experience, the impact of changed circumstances on current impairment of the loan portfolio. The accrual of interest is discontinued when a loan becomes more than 90 days past due. Cash receipts on impaired loans are applied first to accrued interest and then to principal. Impaired loans, or portions thereof, are charged off when deemed uncollectible. The allowance for loan losses represents an unallocated allowance. There are no elements of the allowance allocated to specific individual loans or to impaired loans.

Servicing Rights

The Company adopted the provisions of SFAS 156, Accounting for Servicing of Financial Assets - An Amendment of FASB Statement No. 140, on January 1, 2007. As a result of the adoption of SFAS 156, the Company characterized servicing rights relating to all existing manufactured housing loans as a single class of servicing rights and did not elect to apply fair value accounting to these servicing rights. The Company recognizes the fair value of loan servicing rights purchased or on loans originated and sold, by recognizing a separate servicing asset or liability. Management is required to make complex judgments when establishing the assumptions used in determining fair values of servicing assets. The fair value of servicing assets is determined by calculating the present value of estimated future net servicing cash flows, using assumptions of prepayments, defaults, servicing costs and discount rates that the Company believes market participants would use for similar assets. These assumptions are reviewed on a monthly basis and changed based on actual and expected performance.

The Company stratifies its servicing assets based on the predominant risk characteristics of the underlying loans, which are loan type, interest rate and loan size. Servicing assets are amortized in proportion to and over the expected servicing period.

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

The carrying amount of loan servicing rights is assessed for impairment by comparison to fair value and a valuation allowance is established through a charge to earnings in the event the carrying amount exceeds the fair value. Fair value is estimated based on the present value of expected future cash flows.

Furniture, Fixtures and Equipment

Furniture, fixtures and equipment are stated at cost less accumulated depreciation. Depreciation is recognized on a straight-line basis over the estimated useful lives of the assets as follows:

Furniture and fixtures	7 years
Computers	5 years
Software	3 years
Leasehold improvements	Shorter of useful life or lease term

Repossessed Houses

Manufactured houses acquired through foreclosure or similar proceedings are recorded at the lesser of the related loan balance or the estimated fair value of the house.

Goodwill

As a result of the acquisition of Origen Financial L.L.C., our predecessor company, on October 8, 2003, which was accounted for as a purchase, the Company recorded the net assets acquired at fair value, which resulted in recording goodwill of \$32.3 million.

In accordance with SFAS 142, Goodwill and Other Intangible Assets, the Company tests goodwill for impairment on an annual basis in the fourth quarter, or more frequently if the Company believes indicators of impairment exist. For purposes of testing goodwill impairment, the Company has determined that with respect to its recorded goodwill, the Company is a single reporting unit. The performance of the impairment test involves a two-step process. The first step of the impairment test involves comparing the fair value of the Company with its aggregate carrying value, including goodwill. The initial and ongoing estimate of the fair value of the Company is based on assumptions and projections prepared by the Company. If the carrying amount of the Company exceeds its fair value, the Company performs the second step of the goodwill impairment test in order to determine the amount of impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the goodwill with the carrying value of that goodwill.

The Company performed its annual impairment test of goodwill on December 31, 2007, based on conditions as of December 31, 2007, in accordance with SFAS 142, and determined that the Company's recorded goodwill was fully impaired. The impairment was due to current market and economic conditions which have resulted in a further and extended decline in the quoted market price of the Company's equity securities below tangible book value. As a result, the Company recorded a non-cash goodwill impairment charge of \$32.3 million during the year ended December 31, 2007. No impairment was recorded during the years ended December 31, 2006 or 2005.

Other Assets

Other assets are comprised of prepaid expenses, deferred financing costs and other miscellaneous receivables. Prepaid expenses are amortized over the expected service period. Deferred financing costs are capitalized and amortized over the life of the corresponding obligation.

Derivative Financial Instruments

The Company has periodically used derivative instruments, primarily interest rate swaps, in order to mitigate interest rate risk or the variability of cash flows to be paid, related to the Company's loans receivable and anticipated securitizations. The Company follows the provisions of Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Investments and Hedging Activities (as amended by Statement of

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

Financial Accounting Standards No. 149). All derivatives are recorded on the balance sheet at fair value. On the date a derivative contract is entered into, the Company designates the derivative as a hedge of either a forecasted transaction or the variability of cash flow to be paid (cash flow hedge). Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in other comprehensive income until earnings are affected by the forecasted transaction or the variability of cash flow and are then reported in current earnings. Any ineffectiveness is recorded in current earnings.

The Company has formally documented all relationships between hedging instruments and hedged items, as well as the risk-management objectives and strategy for undertaking the hedge transaction. This process includes linking cash flow hedges to specific forecasted transactions or variability of cash flow.

The Company also formally assesses, both at the hedge s inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flow of hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, we discontinue hedge accounting prospectively, in accordance with SFAS 133.

Derivative financial instruments that do not qualify for hedge accounting are carried at fair value and changes in fair value are recognized currently in earnings.

Securitizations Structured as Financings

The Company engages in securitizations of its manufactured housing loan receivables. The Company has structured all loan securitizations occurring since 2003 as financings for accounting purposes under Statement of Financial Accounting Standards No. 140 (SFAS 140), Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities a replacement of FASB Statement No. 125. When a loan securitization is structured as a financing, the financed asset remains on the Company s books along with the recorded liability that evidences the financing, typically bonds. Income from both the loan interest spread and the servicing fees received on the securitized loans are recorded into income as earned. An appropriate allowance for credit losses is maintained on the loans. Deferred debt issuance costs and discount related to the bonds are amortized on a level yield basis over the estimated life of the bonds.

Servicing Income Revenue Recognition

Loans serviced require regular monthly payments from borrowers. Income on loan servicing is generally recorded as payments are collected and is based on a percentage of the principal balance of the respective loans. Loan servicing expenses are charged to operations when incurred. The contractual servicing fee is recorded as a component of interest income on the consolidated statements of operation for loans owned by the Company, and it is recorded as servicing fee income on the consolidated statements of operations for loans serviced for others.

Share-Based Compensation

In connection with the formation of the Company, the Company adopted an equity incentive plan. The Company follows the provisions of Statement of Financial Accounting Standards No. 123 revised (SFAS 123(R)), Share-Based Payment, which the Company adopted on January 1, 2006, using the modified-prospective transition method, in order to account for our equity incentive plan and stock option plan. Prior to January 1, 2006, as permitted under the provisions of SFAS No. 123 (SFAS 123), Accounting for Stock-Based Compensation, as amended, the Company had chosen to recognize compensation expense using the intrinsic value-based method of valuing stock options prescribed in APB No. 25 (APB 25), Accounting for Stock Issued to Employees and related interpretations. Under the intrinsic value-based method, compensation cost is measured as the amount by which the quoted market price of the Company s stock at the date of grant exceeds the stock option exercise price. All options granted by the Company prior to the adoption of SFAS 123(R) were granted at a fixed price not less than the market value of the underlying common stock on the date of grant and, therefore, were not included in compensation expense, prior to the adoption of SFAS No. 123(R).

Table of Contents

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Advertising Expense

Advertising costs are expensed as incurred. Advertising expenses were approximately \$130,000, \$189,000 and \$270,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Income Taxes

The Company has elected to be taxed as a REIT as defined under Section 856(c)(1) of the Internal Revenue Code of 1986, as amended (the Code). In order for the Company to qualify as a REIT, at least ninety-five percent (95%) of the Company's gross income in any year must be derived from qualifying sources. In addition, a REIT must distribute at least ninety percent (90%) of its REIT taxable net income to its stockholders.

Qualification as a REIT involves the satisfaction of numerous requirements (some on an annual and quarterly basis) established under highly technical and complex Code provisions for which there are only limited judicial or administrative interpretations, and involves the determination of various factual matters and circumstances not entirely within the Company's control. In addition, frequent changes occur in the area of REIT taxation, which requires the Company continually to monitor its tax status.

As a REIT, the Company generally will not be subject to U.S. federal income taxes at the corporate level on the ordinary taxable income it distributes to its stockholders as dividends. If the Company fails to qualify as a REIT in any taxable year, its taxable income will be subject to U.S. federal income tax at regular corporate rates (including any applicable alternative minimum tax). Even if the Company qualifies as a REIT, it may be subject to certain state and local income taxes and to U.S. federal income and excise taxes on its undistributed taxable income. In addition, taxable income from non-REIT activities managed through taxable REIT subsidiaries, if any, is subject to federal and state income taxes. An income tax allocation is required to be estimated on the Company's taxable income generated by its taxable REIT subsidiaries. Deferred tax components arise based upon temporary differences between the book and tax basis of items such as the allowance for loan losses, accumulated depreciation, share-based compensation and goodwill.

Uncertainty in Income Taxes

The Company adopted the provisions of FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes—An Interpretation of FASB Statement No. 109, on January 1, 2007. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, and in various state and local jurisdictions. With few exceptions, the Company and its subsidiaries are no longer subject to U.S. federal or state and local income tax examinations by tax authorities for years before 2004. It is the Company's policy to include any accrued interest or penalties related to unrecognized tax benefits in income tax expense. No liability for unrecognized tax benefits as of January 1, 2007 was recorded as a result of the implementation of FIN 48. Additionally, the Company did not record any accrued interest or penalties relating to unrecognized tax benefits as of January 1, 2007. There was no liability for unrecognized tax benefits at December 31, 2007 and no interest or penalties were recorded during the year ended December 31, 2007. As of December 31, 2007, there are no positions for which the Company believes that the total amounts of unrecognized tax benefits will significantly increase or decrease during 2008.

Recent Accounting Pronouncements

Accounting for Certain Hybrid Instruments

In February 2006, the FASB issued SFAS 155, Accounting for Certain Hybrid Instruments, which allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) if the holder elects to account for the whole instrument on a fair value basis. SFAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The adoption of SFAS 155 on January 1, 2007 did not have a material impact on the Company's financial position or results of operations.

Table of Contents

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Fair Value Measurements

In September 2006, the FASB issued SFAS 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in US GAAP, and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this statement does not require any new fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. At this time, the Company does not expect the adoption of SFAS 157 to have a material impact on its financial position or results of operations.

Fair Value Option

On February 15, 2007, the FASB issued SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities. Under SFAS 159, the Company may elect to report financial instruments and certain other items at fair value on a contract-by-contract basis with changes in value reported in earnings. This election is irrevocable. SFAS 159 provides an opportunity to mitigate volatility in reported earnings that is caused by measuring hedged assets and liabilities that were previously required to use a different accounting method than the related hedging contracts when the complex provisions of SFAS 133 hedge accounting are not met. SFAS 159 is effective for years beginning after November 15, 2007. Early adoption within 120 days of the beginning of the Company's 2007 fiscal year is permissible, provided the Company has not yet issued interim financial statements for 2007 and has adopted SFAS 157. At this time, the Company does not expect the adoption of SFAS 159 to have a material impact on its financial position or results of operations.

Reclassifications

Certain amounts for prior periods have been reclassified to conform with current financial statement presentation.

Note 2 Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share incorporates the potential dilutive effect of common stock equivalents outstanding on an average basis during the period. Potential dilutive common shares primarily consist of employee stock options, non-vested common stock awards, stock purchase warrants and convertible notes. The following table presents a reconciliation of basic and diluted earnings per share for the years ended December 31, 2007, 2006 and 2005 (in thousands, except share and per share data):

	2007	2006	2005
Numerator:			
Net income (loss)	\$ (31,767)	\$ 6,971	\$ (2,659)
Preferred stock dividends	(16)	(16)	(16)
Income (loss) available to common shareholders, basic	\$ (31,783)	\$ 6,955	\$ (2,675)
Income (loss) available to common shareholders, diluted	\$ (31,783)	\$ 6,955	\$ (2,675)
Denominator:			
Weighted average basic common shares outstanding	25,316,278	25,125,472	24,878,116
Effect of dilutive securities:			
Incremental shares non-vested stock awards		56,182	
Weighted average diluted common shares outstanding	25,316,278	25,181,654	24,878,116

Edgar Filing: ORIGEN FINANCIAL INC - Form 10-K

Basic earnings (loss) per share	\$	(1.26)	\$	0.28	\$	(0.11)
Diluted earnings (loss) per share	\$	(1.26)	\$	0.28	\$	(0.11)

Had the Company recognized net income for the years ended December 31, 2007 and 2005, incremental shares attributable to non-vested common stock awards would have increased diluted shares by 63,941 and 104,755,

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

respectively, and incremental shares attributable to stock purchase warrants would have been 5,879 for the year ended December 31, 2007. There were no stock purchase warrants outstanding during the years ended December 31, 2006 and 2005.

Antidilutive outstanding common stock options that were excluded from the computation of diluted earnings per share for the year ended December 31, 2007, 2006 and 2005, were 228,294, 249,492 and 255,500, respectively. The common stock options are considered antidilutive if assumed proceeds per share exceed the average market price of the Company's common stock during the relevant periods. Assumed proceeds include proceeds from the exercise of the common stock options, as well as unearned compensation related to the common stock options.

Antidilutive outstanding convertible debt shares that were excluded from the computation of diluted earnings per share for the year ended December 31, 2007 was 245,991. There was no convertible debt outstanding during the years ended December 31, 2006 and 2005. The convertible debt shares are considered antidilutive for any period where interest expense per common share obtainable on conversion exceeds basic earnings per share.

Note 3 Investments

The Company follows the provisions of SFAS 115 and SOP 03-3 in reporting its investments. The investments are carried on the Company's balance sheet at \$32.4 million and \$41.5 million at December 31, 2007 and 2006, respectively. The fair value of these investments was approximately \$33.1 million and \$41.5 million at December 31, 2007 and 2006, respectively.

At December 31, 2006 the Company's investments accounted for under the provisions of SFAS 115 and classified as held-to-maturity were carried on the Company's balance sheet at an amortized cost of \$37.9 million. These investments consisted of two asset backed securities with principal amounts of \$32.0 and \$6.8 million. The investments were collateralized by manufactured housing loans and had contractual maturity dates of July 28, 2033 and December 28, 2033, respectively. During the years ended December 31, 2007 and 2006, the Company financed these two asset backed securities through 30 day repurchase agreements with Citigroup (See Note 11- Debt for further discussion).

In February 2008 these repurchase agreements were not renewed and, to satisfy Citigroup, the Company sold \$32.0 million in principal balance asset-backed security mentioned above (See Note 21 Subsequent Events for further discussion). As a result, the Company reevaluated its classification of that asset-backed security at December 31, 2007 and determined that it no longer qualified as held-to-maturity. The Company transferred the security, which had a carrying value of \$31.8 million at December 31, 2007 from held-to-maturity to available-for-sale as of December 31, 2007. In connection with this transfer, the Company realized an other-than-temporary impairment of \$9.2 million in order to record this investment at fair value as of December 31, 2007. As there is no available quoted market price for the investment, the Company based the December 31, 2007 fair value on the subsequent sale price of the investment. The carrying value of investments classified as available-for-sale as of December 31, 2007 was \$22.6 million. There were no investments classified as available-for-sale as of December 31, 2006. Additionally, there were no unrealized gains or losses related to investments classified as available-for-sale as of either December 31, 2007 or 2006. No other-than-temporary impairment was recognized related to investments classified as available-for-sale during the year ended December 31, 2006.

At December 31, 2007 the Company's investments accounted for under the provisions of SFAS 115 and classified as held-to-maturity were carried on the Company's balance sheet at an amortized cost of \$6.3 million. This investment consisted of one asset backed security with a principal amount of \$6.8 million. The investment is collateralized by manufactured housing loans and has a contractual maturity date of December 28, 2033. As prescribed by the provisions of SFAS 115, as of December 31, 2007 the Company had both the intent and ability to hold the investment to maturity. The investment will not be sold in response to changing market conditions, changing fund sources or terms, changing availability and yields on alternative investments or other asset liability management reasons. The investment is regularly measured for impairment through the use of a discounted cash flow analysis based on the historical performance of the underlying loans that collateralize the investment. If it is determined that there has been a decline in fair value below amortized cost and the decline is other-than-temporary,

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

the cost basis of the investment is written down to fair value as a new cost basis and the amount of the write-down is included in earnings. No impairment was recorded relating to investments classified as held-to-maturity during the years ended December 31, 2007 or 2006.

Debt securities acquired with evidence of deterioration of credit quality since origination are accounted for under the provisions of SOP 03-3. The carrying value of the debt securities accounted for under the provisions of SOP 03-3 was approximately \$3.5 million and \$3.6 million at December 31, 2007 and 2006, respectively. See Note 5 Loans and Debt Securities Acquired with Evidence of Deterioration of Credit Quality for further discussion related to the Company's debt securities accounted for under the provisions of SOP 03-3.

Note 4 Loans Receivable

The carrying amounts and fair value of loans receivable consisted of the following at December 31 (in thousands):

	2007	2006
Manufactured housing loans securitized	\$ 1,051,015	\$ 825,811
Manufactured housing loans unsecuritized	144,926	130,828
Accrued interest receivable	5,608	4,840
Deferred loan origination costs	5,612	1,271
Discount on purchased loans	(4,450)	(3,155)
Allowance for purchased loans	(913)	(913)
Allowance for loan losses	(7,882)	(8,456)
	\$ 1,193,916	\$ 950,226

The following table sets forth the average per loan balance, weighted average loan yield, and weighted average initial term at December 31 (dollars in thousands):

	2007	2006
Number of loans receivable	24,416	20,300
Average loan balance	\$ 49	\$ 47
Weighted average loan yield	9.45%	9.50%
Weighted average initial term	20 years	20 years

The following table sets forth the concentration by state of the manufactured housing loan portfolio at December 31 (dollars in thousands):

	2007		2006	
	Principal	Percent	Principal	Percent
California	\$ 493,862	41.3%	\$ 341,510	35.7%
Texas	92,665	7.7%	89,229	9.3%
New York	56,376	4.7%	53,396	5.6%
Florida	41,749	3.5%	31,519	3.3%
Michigan	39,498	3.3%	39,404	4.1%
Arizona	33,804	2.8%	24,419	2.6%
Alabama	32,538	2.7%	30,920	3.2%
Other	405,449	34.0%	346,242	36.2%
Total	\$ 1,195,941	100.0%	\$ 956,639	100.0%

The following table sets forth the number and value of loans for various original terms for the manufactured housing loan portfolio at December 31 (dollars in thousands):

Original Term In Years	2007		2006	
	Number of Loans	Principal Balance	Number of Loans	Principal Balance
5 or less	28	\$ 637	22	\$ 197
6-10	1,972	36,993	1,675	32,270
11-12	231	5,624	199	4,836
13-15	6,260	187,623	5,223	154,824
16-20	12,826	750,423	10,494	594,596
21-25	1,275	70,526	1,098	52,122
26-30	1,824	144,115	1,589	117,794
Total	24,416	\$ 1,195,941	20,300	\$ 956,639

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

Delinquency statistics for the manufactured housing loan portfolio are as follows at December 31 (dollars in thousands):

Days Delinquent	No. of Loans	2007		No. of Loans	2006	
		Principal Balance	% of Portfolio		Principal Balance	% of Portfolio
31-60	268	\$9,451	0.8%	248	\$9,354	1.0%
61-90	84	3,496	0.3%	86	3,159	0.3%
Greater than 90	170	7,484	0.6%	131	5,416	0.6%

The Company defines non-performing loans as those loans that are greater than 90 days delinquent in contractual principal payments. The average balance of non-performing loans was \$5.8 million and \$5.7 million for the years ended December 31, 2007 and 2006, respectively.

Note 5 Loan Pools and Debt Securities Acquired with Evidence of Deterioration of Credit Quality

The Company has loan pools and debt securities that were acquired, for which there was at acquisition, evidence of deterioration of credit quality, and for which it was probable, at acquisition, that all contractually required payments would not be collected. These loan pools and debt securities are accounted for under the provisions of SOP 03-3.

Loan Pools Acquired with Evidence of Deterioration of Credit Quality

The carrying amount of loan pools acquired with evidence of deterioration of credit quality was as follows at December 31 (in thousands):

	2007	2006
Outstanding balance	\$29,383	\$33,935
Carrying amount, net of allowance of \$913 and \$913, respectively	25,563	29,585

Accretable yield represents the excess of expected future cash flows over the remaining carrying value of the purchased portfolio, which is recognized as interest income on a level-yield basis over the life of the loan portfolio. Nonaccretable difference represents the difference between the remaining expected cash flows and the total contractual obligation outstanding of the purchased receivables. Changes in accretable yield for the years ended December 31 were as follows (in thousands):

	2007	2006
Beginning balance	\$ 16,731	\$ 16,144
Accretion	(2,343)	(2,767)
Additions due to purchases during the period		
Reclassifications from non-accretable yield	239	3,354
Disposals		
Ending balance	\$ 14,627	\$ 16,731

During the years ended December 31, 2007, 2006 and 2005, the Company increased the allowance by charges to the income statement of approximately \$0, \$485,000 and \$428,000, respectively. No allowances were reversed during the years ended December 31, 2007, 2006 or 2005.

During the years ended December 31, 2007 and 2006, there were no loans acquired for which it was probable at acquisition that all contractually required payments would not be collected.

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements***Debt Securities Acquired with Evidence of Deterioration of Credit Quality*

The carrying amount of debt securities acquired with evidence of deterioration of credit quality was as follows at December 31 (in thousands):

	2007	2006
Outstanding balance	\$8,616	\$8,616
Carrying amount, net	3,524	3,632

Accretable yield represents the excess of expected future cash flows over the remaining carrying value of the debt securities, which is recognized as interest income on a level-yield basis over the life of the debt securities.

Nonaccretable difference represents the difference between the remaining expected cash flows and the total contractual obligation outstanding of the debt securities. Changes in accretable yield for the years ended December 31 were as follows (in thousands):

	2006	2006
Beginning balance	\$ 9,500	\$ 10,329
Accretion	(638)	(678)
Additions due to purchases during the period		
Reclassifications from non-accretable yield	17	(151)
Disposals		
Ending balance	\$ 8,879	\$ 9,500

During the year ended December 31, 2007 the Company did not recognize an other-than-temporary impairment. During the year ended December 31, 2006, the Company recognized an other-than-temporary impairment of \$114,000. The Company did not recognize an other-than-temporary impairment during the year ended December 31, 2005.

During the years ended December 31, 2007 and 2006, there were no debt securities acquired for which it was probable at acquisition that all contractually required payments would not be collected.

Note 6 Allowance for Loan Losses

The allowance for loan losses and related additions and deductions to the allowance for the years ended December 31 were as follows (in thousands):

	2007	2006	2005
Balance at beginning of period	\$ 8,456	\$ 10,017	\$ 5,315
Provision for loan losses	8,739	7,069	12,691
Transfers from recourse liability			2,036
Gross charge-offs	(21,093)	(17,685)	(20,769)
Recoveries	11,780	9,055	10,744
Balance at end of period	\$ 7,882	\$ 8,456	\$ 10,017

Note 7 Servicing Rights

Changes in servicing rights for the years ended December 31 were as follows (in thousands):

	2007	2006	2005
Beginning balance of servicing rights	\$ 2,508	\$ 3,103	\$ 4,097
Servicing rights retained upon sale of loans		14	

Loan portfolio repurchased		(108)	
Impairment		(69)	
Amortization	(362)	(432)	(994)
Balance of servicing rights at end of period	\$ 2,146	\$ 2,508	\$ 3,103

The Company services the manufactured housing loans it originates and holds in its loan portfolio as well as

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

manufactured housing loans it originated and securitized or sold with the servicing rights retained. The principal balances of manufactured housing loans serviced for others totaled approximately \$0.6 billion, \$0.6 billion and \$0.7 billion at December 31, 2007, 2006 and 2005, respectively. The valuation allowance was approximately \$69,000 as of both December 31, 2007 and 2006. There was no valuation allowance as of December 31, 2005.

At December 31, 2007, the total projected amortization of the remaining servicing rights is approximately as follows: 2008 \$0.3 million; 2009 \$0.3 million; 2010 \$0.2 million; 2011 - \$0.2 million; 2012 \$0.2 million and \$0.9 million thereafter.

Note 8 Furniture, Fixtures and Equipment

Furniture, fixtures and equipment are summarized as follows at December 31 (in thousands):

	2007	2006
Furniture and fixtures	\$ 2,273	\$ 2,239
Leasehold improvements	903	900
Computer equipment	1,490	1,350
Capitalized software	1,890	1,623
	6,556	6,112
Accumulated depreciation	(3,582)	(2,599)
	\$ 2,974	\$ 3,513

Depreciation expense was approximately \$1,149,000, \$1,032,000 and \$864,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Note 9 Derivatives

In connection with the Company's strategy to mitigate interest rate risk and variability in cash flows on its securitizations and anticipated securitizations the Company uses derivative financial instruments such as interest rate swap contracts. It is not the Company's policy to use derivatives to speculate on interest rates. These derivative instruments are intended to provide income and cash flow to offset potential increased interest expense and potential variability in cash flows under certain interest rate environments. In accordance with SFAS 133 the derivative financial instruments are reported on the consolidated balance sheet at their fair value.

The Company documents the relationships between hedging instruments and hedged items, as well as its risk management objectives and strategies for undertaking various hedge transactions, at the inception of the hedging transaction. This process includes linking derivatives to specific liabilities on the consolidated balance sheet. The Company also assesses, both at the inception of the hedge and on an ongoing basis, whether the derivatives used in hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, the Company discontinues hedge accounting.

When hedge accounting is discontinued because the Company determines that the derivative no longer qualifies as a hedge, the derivative will continue to be recorded on the consolidated balance sheet at its fair value. Any change in the fair value of a derivative no longer qualifying as a hedge is recognized in current period earnings. For terminated cash flow hedges or cash flow hedges that no longer qualify as highly effective, the effective position previously recorded in accumulated other comprehensive income is recorded in earnings when the hedged item affects earnings.

Cash Flow Hedge Instruments

The Company evaluates the effectiveness of derivative financial instruments designated as cash flow hedge instruments against the interest payments related to securitizations or anticipated securitization in order to ensure that there remains a high correlation in the hedge relationship and that the hedge relationship remains highly effective. To hedge the effect of interest rate changes on cash flows or the overall variability in cash flows, which

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

affect the interest payments related to its securitization financing being hedged, the Company uses derivatives designated as cash flow hedges under SFAS 133. Once the hedge relationship is established, for those derivative instruments designated as qualifying cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income during the current period, and reclassified into earnings as part of interest expense in the periods during which the hedged transaction affects earnings pursuant to SFAS 133. The ineffective portion of the derivative instrument is recognized in earnings in the current period and is included in interest expense for derivatives hedging future interest payments related to recognized liabilities and other non-interest income for derivatives hedging future interest payments related to forecasted liabilities. No component of the derivative instrument's gain or loss has been excluded from the assessment of hedge effectiveness. During the years ended December 31, 2007, 2006 and 2005 the Company recognized no net ineffectiveness in interest expense and a net loss of \$15,000, \$1,000 and \$0, respectively, in other non-interest income due to the ineffective portion of these hedges.

For the years ended December 31, 2007, 2006 and 2005, the Company reclassified net gains of approximately \$315,000 and net losses of approximately \$55,000 and \$375,000, respectively, attributable to previously terminated cash flow hedges, which have been recorded as a decrease or increase in interest expense. Net unrealized losses of approximately \$20.0 million and \$625,000 related to cash flow hedges were included in accumulated other comprehensive income as of December 31, 2007 and 2006, respectively. The Company expects to reclassify net gains of approximately \$38,000 from accumulated other comprehensive income into earnings during the next twelve months. The remaining amounts in accumulated other comprehensive income are expected to be reclassified into earnings by April 2018. As of December 31, 2007 and 2006 the fair value of the Company's derivatives accounted for as cash flow hedges approximated an asset of \$0 and \$121,000, respectively, and is included in other assets in the consolidated balance sheet and a liability of \$20.4 million and \$3.1 million, respectively, and is included in other liabilities in the consolidated balance sheet.

Derivatives Not Designated as Hedge Instruments

As of December 31, 2007, the Company had three open interest rate swap contracts which were not designated as hedges. These interest rate swap contracts were entered into in connection with other interest rate swap contracts which are accounted for as cash flow hedges for the purpose of hedging the variability in expected cash flows from the variable-rate debt related to the Company's 2006-A, 2007-A and 2007-B securitizations. Change in the fair values of the interest rate swap contracts not designated and documented as hedges are recorded through earnings each period and are included in other non-interest income. During the years ended December 31, 2007 and 2006, the Company recognized net gains of approximately \$65,000 and \$24,000, respectively, related to changes in the fair values of these contracts. The fair value of these contracts at December 31, 2007 and 2006 was approximately \$89,000 and \$24,000, respectively, and is included in other assets in the consolidated balance sheet. The Company did not have any derivatives which were not designated as hedge instruments during the year ended December 31, 2005.

Note 10 Loan Securitizations

Periodically the Company securitizes manufactured housing loans. The Company records each transaction based on its legal structure. Under the current legal structure of the securitization program, the Company exchanges manufactured housing loans it originates and purchases with a trust for cash. The trust then issues ownership interests to investors in asset-backed bonds secured by the loans.

The Company has structured all loan securitizations occurring since 2003 as financings for accounting purposes under SFAS 140. When securitizations are structured as financings no gain or loss is recognized, nor is any allocation made to residual interests or servicing rights. Rather, the loans securitized continue to be carried by the Company as assets, and the asset-backed bonds secured by the loans are carried as a liability. The Company records interest income on securitized loans and interest expense on the bonds issued in the securitizations over the life of the securitizations. Deferred debt issuance costs and discount related to the bonds are amortized on a level yield basis over the estimated life of the bonds.

On May 2, 2007, the Company completed a securitized financing transaction of approximately \$200.4 million in

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

principal balance of manufactured housing loans, which was funded by issuing bonds of approximately \$184.4 million. Approximately \$182.4 million of the proceeds was used to reduce the aggregate balances of notes outstanding under the Company's short-term securitization facility.

On October 16, 2007, the Company completed a securitized financing transaction of approximately \$140.0 million in principal balance of manufactured housing loans, which was funded by issuing bonds of approximately \$126.7 million. Approximately \$122.4 million of the proceeds was used to reduce the aggregate balances of notes outstanding under the Company's short-term securitization facility.

On August 25, 2006, the Company completed a securitized financing transaction of approximately \$224.2 million in principal balance of manufactured housing loans, which was funded by issuing bonds of approximately \$200.6 million. Approximately \$199.2 million of the proceeds was used to reduce the aggregate balances of notes outstanding under the Company's short-term securitization facility.

The total principal balance of loans serviced by the Company and which the Company has previously securitized and accounted for as a sale was approximately \$113.6 million and \$127.9 million at December 31, 2007 and 2006, respectively. Delinquency statistics (including repossessed inventory) on those loans are as follows at December 31 (dollars in thousands):

	2007			2006		
	No. of Loans	Principal Balance	% of Portfolio	No. of Loans	Principal Balance	% of Portfolio
Days delinquent						
31-60	103	\$3,937	3.5%	123	\$4,659	3.6%
61-90	37	1,242	1.1%	42	1,705	1.3%
Greater than 90	82	3,373	3.0%	81	3,293	2.6%

Note 11 Debt

Total debt outstanding was as follows at December 31 (in thousands):

	2007	2006
Warehouse financing	\$ 173,072	\$ 131,520
Securitization financing	884,650	685,013
Repurchase agreements	17,653	23,582
Notes payable - related party	14,593	
Notes payable - servicing advances		2,185
	\$ 1,089,968	\$ 842,300

Warehouse Financing - Citigroup

The Company, through its operating subsidiary Origen Financial L.L.C., previously had a short term securitization facility used for warehouse financing with Citigroup Global Markets Realty Corporation (Citigroup). Under the terms of the agreement, originally entered into in March 2003 and amended periodically, most recently in August 2007, the Company pledged loans as collateral and in turn was advanced funds. The facility had a maximum advance amount of \$200 million at an annual interest rate equal to LIBOR plus a spread. Additionally, the facility included a \$55 million supplemental advance amount collateralized by the Company's residual interests in its 2004-A, 2004-B, 2005-A, 2005-B, 2006-A, 2007-A and 2007-B securitizations. The outstanding balance on the facility was approximately \$173.1 million and \$131.5 million at December 31, 2007 and 2006, respectively. At December 31, 2007 all financial covenants were met. The warehouse facility matured in March 2008 and was paid off in full. The expiration of the supplemental advance facility has been extended through June 13, 2008. (See Note 21 - Subsequent Events for further discussion.)

Securitization Financing - 2004-A Securitization

On February 11, 2004, the Company completed a securitization of approximately \$238.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$200.0 million in notes payable. The notes are

61

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

stratified into six different classes and pay interest at a duration-weighted average rate of approximately 5.12%. The notes have a contractual maturity date of October 2013 with respect to the Class A-1 notes; August 2017, with respect to the Class A-2 notes; December 2020, with respect to the Class A-3 notes; and January 2035, with respect to the Class A-4, Class M-1 and Class M-2 notes. The outstanding balance on the 2004-A securitization notes was approximately \$95.8 million and \$113.4 million at December 31, 2007 and 2006, respectively.

Securitization Financing 2004-B Securitization

On September 29, 2004, the Company completed a securitization of approximately \$200.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$169.0 million in notes payable. The notes are stratified into seven different classes and pay interest at a duration-weighted average rate of approximately 5.27%. The notes have a contractual maturity date of June 2013 with respect to the Class A-1 notes; December 2017, with respect to the Class A-2 notes; August 2021, with respect to the Class A-3 notes; and November 2035, with respect to the Class A-4, Class M-1, Class M-2 and Class B-1 notes. The outstanding balance on the 2004-B securitization notes was approximately \$96.3 million and \$114.4 million at December 31, 2007 and 2006, respectively.

Securitization Financing 2005-A Securitization

On May 12, 2005, the Company completed a securitization of approximately \$190.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$165.3 million in notes payable. The notes are stratified into seven different classes and pay interest at a duration-weighted average rate of approximately 5.30%. The notes have a contractual maturity date of July 2013 with respect to the Class A-1 notes; May 2018, with respect to the Class A-2 notes; October 2021, with respect to the Class A-3 notes; and June 2036, with respect to the Class A-4, Class M-1, Class M-2 and Class B notes. The outstanding balance on the 2005-A securitization notes was approximately \$108.3 million and \$128.7 million at December 31, 2007 and 2006, respectively.

Securitization Financing 2005-B Securitization

On December 15, 2005, the Company completed a securitization of approximately \$175.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$156.2 million in notes payable. The notes are stratified into eight different classes and pay interest at a duration-weighted average rate of approximately 6.15%. The notes have a contractual maturity date of February 2014 with respect to the Class A-1 notes; December 2018, with respect to the Class A-2 notes; May 2022, with respect to the Class A-3 notes; and January 2037, with respect to the Class A-4, Class M-1, Class M-2, Class B-1 and B-2 notes. The outstanding balance on the 2005-B securitization notes was approximately \$118.5 million and \$137.5 million at December 31, 2007 and 2006, respectively.

Securitization Financing 2006-A Securitization

On August 25, 2006, the Company completed a securitization of approximately \$224.2 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$200.6 million in notes payable. The notes are stratified into two different classes. The Class A-1 notes pay interest at one month LIBOR plus 15 basis points and have a contractual maturity date of November 15, 2018. The Class A-2 notes pay interest based on a rate established by the auction agent at each rate determination date and have a contractual maturity date of October 2037. Additional credit enhancement was provided through the issuance of a financial guaranty insurance policy by Ambac Assurance Corporation. The outstanding balance on the 2006-A securitization notes was approximately \$169.4 million and \$191.0 million at December 31, 2007 and 2006, respectively.

Securitization Financing 2007-A Securitization

On May 2, 2007, the Company completed a securitization of approximately \$200.4 million in principal balance

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$184.4 million in notes payable. The notes are stratified into two different classes. The Class A-1 notes pay interest at one month LIBOR plus 19 basis points and have a contractual maturity date of April 2037. The Class A-2 notes pay interest based on a rate established by the auction agent at each rate determination date and have a contractual maturity date of April 2037. Additional credit enhancement was provided through the issuance of a financial guaranty insurance policy by Ambac Assurance Corporation. The outstanding balance on the 2007-A securitization notes was approximately \$171.6 million and \$0 at December 31, 2007 and 2006, respectively.

Securitization Financing 2007-B Securitization

On October 16, 2007, the Company completed a securitization of approximately \$140.0 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization the Company, through a special purpose entity, issued \$126.7 million of a single AAA rated floating rate class of asset-backed notes to a single qualified institutional buyer pursuant to Rule 144A under the Securities Act of 1933. The notes pay interest at one month LIBOR plus 120 basis points and have a contractual maturity date of September 2037. Additional credit enhancement was provided by a guaranty from Ambac Assurance Corporation. The outstanding balance on the 2007-B securitization notes was approximately \$124.8 million and \$0 at December 31, 2007 and 2006, respectively.

Repurchase Agreements Citigroup

The Company had entered into four repurchase agreements with Citigroup. Three of the repurchase agreements are for the purpose of financing the purchase of investments in three asset backed securities with principal balances of \$32.0 million, \$3.1 million and \$3.7 million respectively. The fourth repurchase agreement is for the purpose of financing a portion of the Company's residual interest in the 2004-B securitization with a principal balance of \$4.0 million. Under the terms of the agreements, the Company sells its interest in the securities with an agreement to repurchase them at a predetermined future date at the principal amount sold plus an interest component. Prior to June 30, 2007, the securities were financed at an amount equal to 75% of their value as determined by Citigroup. As of December 31, 2007, the securities were financed at an amount equal to 65%-75% of their value as determined by Citigroup. Typically the repurchase agreements are rolled over for 30 day periods when they expire. The annual interest rates on the agreements are equal to LIBOR plus a spread. The repurchase agreements had outstanding principal balances of approximately \$12.7 million, \$1.5 million, \$1.7 million and \$1.8 million, respectively, at December 31, 2007 and \$16.8 million, \$1.7 million, \$2.1 million and \$3.0 million, respectively, at December 31, 2006. In February 2008 these repurchase agreements were not renewed (See Note 3 Investments and Note 21 Subsequent Events for further discussion).

Notes Payable Related Party

The Company, through its primary operating subsidiary Origen Financial L.L.C., currently has a \$15 million secured financing arrangement with the William M. Davidson Trust u/a/d 12/13/04 (the Lender), an affiliate of one of the Company's principal stockholders (the Bridge Financing). The Lender is a grantor revocable trust established by William M. Davidson as the grantor. Mr. Davidson is the sole member of Woodward Holding, LLC, which owns approximately 6.8% of the Company's common stock. The sole manager of Woodward Holding, LLC is the Chairman of the Origen Board of Directors. The Bridge Financing includes a senior secured promissory note (the Note) and a senior secured convertible promissory note (the Convertible Note). The Note and the Convertible Note are each one-year secured notes bearing interest at 8% per year and are secured by a portion of the Company's rights to receive servicing fees on its loan servicing portfolio. The Note, which has an original principal amount of \$10 million, and the Convertible Note, which has an original principal amount of \$5 million, are each due on September 11, 2008. The term of the Note and the Convertible Note may be extended up to 120 days with the payment of additional fees. The Convertible Note may be converted at the option of the Lender into shares of the Company's common stock at a conversion price of \$6.237 per share. In connection with the Bridge Financing, the Company issued a stock purchase warrant to the Lender. The stock purchase warrant is a five-year warrant to purchase 500,000 shares of the Company's

common stock at an exercise price of \$6.16 per share. The Note and the Convertible Note had an aggregate outstanding balance of \$14.6 million at December 31, 2007, net of the unamortized discount related to the fair value of the warrants. There was no outstanding balance at December 31, 2006.

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Notes Payable Servicing Advances

The Company previously had a revolving credit facility with JPMorgan Chase Bank, N.A. Under the terms of the facility, which was terminated by the Company in September 2007, the Company could borrow up to \$4.0 million for the purpose of funding required principal and interest advances on manufactured housing loans that were serviced for outside investors. Borrowings under the facility were repaid upon the collection by the Company of monthly payments made by borrowers under such manufactured housing loans. The bank's prime interest rate was payable on the outstanding balance. To secure the loan, the Company had granted JPMorgan Chase a security interest in substantially all its assets excluding securitized assets. All liens were released as of the termination of the facility. The outstanding balance on the facility at December 31, 2006 was \$2.2 million.

The average balance and average interest rate of outstanding debt was as follows at December 31 (dollars in thousands):

		2007		2006	
		Average Balance	Average Rate	Average Balance	Average Rate
Warehouse financing	Citigroup (1)	\$ 170,002	7.2%	\$ 120,649	7.0%
Securitization financing	2004-A securitization	104,871	5.7%	126,655	5.4%
Securitization financing	2004-B securitization	106,089	5.7%	125,849	5.5%
Securitization financing	2005-A securitization	118,918	5.4%	139,842	5.2%
Securitization financing	2005-B securitization	128,903	5.8%	146,178	5.7%
Securitization financing	2006-A securitization	181,267	6.0%	69,158	6.0%
Securitization financing	2007-A securitization	119,196	5.9%		
Securitization financing	2007-B securitization	26,561	6.9%		
Repurchase agreements	Citigroup	20,811	6.1%	23,582	5.9%
Notes payable	related party (2)	4,433	12.9%		
Notes payable	servicing advances (3)	129	14.0%	447	9.4%

(1) Included facility fees.

(2) Includes the amortization of the fair value of the related stock purchase warrants.

(3) Includes non-use fees.

At December 31, 2007, the total of maturities and amortization of debt during the next five years and thereafter are approximately as follows: 2008 \$294.8 million; 2009 \$158.6 million; 2010 \$97.3 million; 2011 \$83.2 million; 2012 \$71.0 million and \$385.1 million thereafter.

Note 12 Employee Benefits

The Company maintains a 401(k) plan covering substantially all employees who meet certain minimum requirements. Participating employees can make salary contributions to the plan up to Internal Revenue Code limits. The Company matches \$1.00 for each dollar contributed by each eligible participant in the plan up to the first 1% of each eligible participant's annual compensation and \$0.50 for each dollar contributed by each eligible participant in the

plan up to the next 5% of each eligible participant's annual compensation. The Company's related expense was approximately \$350,000, \$333,000 and \$151,000, respectively for the years ended December 31, 2007, 2006 and 2005.

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements****Note 13 Share-Based Compensation Plan**

The Company's equity incentive plan has approximately 1.8 million shares of common stock reserved for issuance as either stock options or non-vested stock grants. As of December 31, 2007, approximately 218,000 shares of common stock remained available for issuance, as either stock options or non-vested stock grants, under the plan. The compensation cost that has been charged against income for those plans was \$1.6 million, \$1.7 million and \$2.5 million for the years ended December 31, 2007, 2006 and 2005, respectively.

Stock Options

Under the plan, the exercise price of the options will not be less than the fair market value of the common stock on the date of grant. The date on which the options are first exercisable is determined by the Compensation Committee of the Board of Directors as the administrator of the Company's equity incentive plan, and options that have been issued to date generally vested over a two-year period, have 10-year contractual terms and a 5-year expected option term. The Company does not pay dividends or make distributions on unexercised options. As of December 31, 2007 there was \$14,000 of total unrecognized compensation cost related to stock options granted under the equity incentive plan. That cost is expected to be recognized over a weighted-average period of 1.0 year.

There were no stock options granted during the years ended December 31, 2007, 2006 or 2005. No stock options were exercised during the years ended December 31, 2007, 2006 or 2005. The following table summarizes the activity relating to the Company's stock options for the year ended December 31, 2007:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term
Options outstanding at January 1, 2007	243,500	\$ 10.00	7.0
Granted			
Exercised			
Forfeited	(41,500)	\$ 10.00	6.5
Options outstanding at December 31, 2007	202,000	\$ 10.00	5.9
Options exercisable at December 31, 2007	202,000	\$ 10.00	5.9

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS 123 to options granted under the Company's equity incentive plan for the year ended December 31, 2005. Note that the pro forma disclosures are provided for 2005 because employee stock options were not accounted for using the fair-value method during those periods. Disclosures for 2007 and 2006 are not presented below because share-based payments have been accounted for under SFAS 123(R)'s fair-value method. For purposes of this pro forma disclosure, the value of the options is estimated using a binomial option-pricing model.

	Year Ended December 31, 2005
Net loss available to common shareholders	\$ (2,675)
Stock option compensation cost	\$ (21)
Pro forma net loss available to common shareholders	\$ (2,696)

Basic loss per share as reported	\$	(0.11)
Pro forma basic loss per share	\$	(0.11)
Diluted loss per share as reported	\$	(0.11)
Pro forma diluted loss per share	\$	(0.11)

Origen Financial, Inc.
Notes to Consolidated Financial Statements

Non-Vested Stock Awards

The Company grants non-vested stock awards to certain directors, officers and employees under the equity incentive plan. The grantees of the non-vested stock awards are entitled to receive all dividends and other distributions paid with respect to the common shares of the Company underlying such non-vested stock awards at the time such dividends or distributions are paid to holders of common shares.

The Company recognizes compensation expense for outstanding non-vested stock awards over their vesting periods for an amount equal to the fair value of the non-vested stock awards at grant date. As of December 31, 2007 there was \$3.0 million of total unrecognized compensation cost related to non-vested stock awards granted under the equity incentive plan. That cost is expected to be recognized over a weighted-average period of 2.8 years

The following table summarizes the activity relating to the Company's non-vested stock awards for the twelve months ended December 31, 2007:

	Number of Non-Vested Stock Awards	Weighted Average Grant Date Fair Value
Non-vested at January 1, 2007	661,843	\$ 6.48
Granted	157,000	6.60
Vested	(207,359)	6.68
Forfeited	(5,567)	6.66
Non-vested at December 31, 2007	605,917	\$ 6.45

Note 14 Stockholders Equity

Effective January 1, 2004, the Company sold 125 shares of its Series A Cumulative Redeemable Preferred Stock directly to 125 investors at a per share price of \$1,000. The transaction resulted in net proceeds to the Company of \$95,000. These shares pay dividends quarterly at an annual rate of 12.5%.

On October 8, 2003, the Company completed a private placement of \$150.0 million of our common stock to certain institutional and accredited investors.

On February 4, 2004, the Company completed a private placement of 1,000,000 shares of its common stock to one institutional investor. The offering provided net proceeds to the Company of approximately \$9.4 million.

On May 6, 2004, the Company completed an initial public offering of 8.0 million shares of its common stock. In June 2004 the underwriters of the initial public offering purchased an additional 625,900 shares of the Company's common stock pursuant to an underwriter's over-allotment option. Net proceeds from these transactions were \$72.2 million after discount and expenses.

In September 2005, the Securities and Exchange Commission declared effective the Company's shelf registration statement on Form S-3 for the proposed offering, from time to time, of up to \$200 million of our common stock, preferred stock and debt securities. In addition to such debt securities, preferred stock and other common stock the Company may sell under the registration statement from time to time, the Company has registered for sale 1,540,000 shares of our common stock pursuant to a sales agreement that we have entered into with Brinson Patrick Securities Corporation. Sales under the agreement commenced on June 5, 2007. The Company sold 50,063 shares of common stock under the sales agreement with Brinson Patrick Securities Corporation during the year ended December 31, 2007, at the price of the Company's common stock prevailing at the time of each sale. The Company received proceeds, net of commissions, of \$296,000 during the year ended December 31, 2007, as a result of these sales. There were no sales under this agreement during the years ended December 31, 2006 or 2005.

In conjunction with the Bridge Financing (See Note 11) the Company issued a stock purchase warrant to the Lender (as defined in Note 11). The stock purchase warrant is a five-year warrant to purchase 500,000 shares of the

66

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

Company's common stock at an exercise price of \$6.16 per share. The warrant expires on September 11, 2012. As of September 11, 2007, the warrants are valued at \$587,000 using a Cox, Ross and Rubinstein lattice based pricing model. This amount has been recorded as an increase in additional paid-in-capital and as a discount on notes payable in the Company's consolidated balance sheet. The amortization of the discount will be recorded as an increase in interest expense over the life of the notes payable. Interest expense of \$180,000 was recorded during the year ended December 31, 2007 as a result of the amortization of the fair value of the stock purchase warrant.

Data pertaining to the Company's grants of non-vested shares awarded to certain directors, officers and employees under the Company's equity incentive plan for the years ended December 31, 2007, 2006 and 2005 are as follows:

Grant Date	Shares Granted	Grant Date Fair Value per share
May 8, 2007	46,500	\$ 7.06
August 29, 2007	110,500	\$ 6.41
June 15, 2006	215,000	\$ 6.15
July 14, 2006	175,000	\$ 6.16
December 28, 2006	80,000	\$ 6.31
May 8, 2005	299,000	\$ 7.21
October 26, 2005	5,000	\$ 7.06

There were stock award share forfeitures of 5,567, 8,501 and 8,334 during the years ended December 31, 2007, 2006 and 2005, respectively. There were 207,359, 222,669 and 254,160 stock award shares vested during the years ended December 31, 2007, 2006 and 2005, respectively. Compensation expense related to these stock awards is being recognized over their estimated service period. Compensation cost recognized for the non-vested stock awards was approximately \$1.6 million, \$1.7 million and \$2.5 million for the years ended December 31, 2007, 2006 and 2005, respectively. Compensation expense to be recognized related to these awards over the next twelve months is expected to be approximately \$1.2 million.

Data pertaining to the Company's distributions declared and paid to common stockholders during the years ended December 31, 2007, 2006 and 2005 are as follows:

Declaration Date	Record Date	Date Paid	Distribution per Share	Total Distribution (thousands)
March 1, 2007	March 26, 2007	April 2, 2007	\$0.04	\$1,035
May 3, 2007	May 18, 2007	May 31, 2007	\$0.06	\$1,552
July 31, 2007	August 16, 2007	August 31, 2007	\$0.08	\$2,070
October 22, 2007	November 19, 2007	November 31, 2007	\$0.09	\$2,341
April 27, 2006	May 19, 2006	May 31, 2006	\$0.03	\$761
August 7, 2006	August 18, 2006	August 31, 2006	\$0.03	\$773
November 2, 2006	November 13, 2006	November 30, 2006	\$0.03	\$773
March 14, 2005	March 24, 2005	March 31, 2005	\$0.04	\$1,008
April 27, 2005	May 25, 2005	May 31, 2005	\$0.06	\$1,528
July 18, 2005	August 22, 2005	August 31, 2005	\$0.06	\$1,528
October 26, 2005	November 21, 2005	November 30, 2005	\$0.06	\$1,528

Note 15 Income Taxes

The Company's provision for income taxes was \$60,000 and \$24,000 for the years ended December 31, 2007 and 2006, and related to current income taxes. The Company had no provision for income taxes during the year ended December 31, 2005.

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31 are as follows (in thousands):

	2007	2006
Deferred tax assets:		
Amortization of intangibles	\$ 3,788	\$ 751
Net operating loss carryforwards	1,370	1,000
Other	461	300
Gross deferred tax assets	5,619	2,051
Less: valuation allowance	(5,245)	(419)
	374	1,632
Deferred tax liabilities		
Amortization of intangibles	371	1,354
Other	3	278
	374	1,632
Net deferred tax asset	\$	\$

The Company recognizes all of its deferred tax assets if it believes that it is more likely than not, given all available evidence, that all of the benefits of the net operating loss carryforwards and other deferred tax assets will be realized. The Company recorded a valuation allowance of \$5.2 million and \$0.4 million as December 31, 2007 and 2006, respectively, associated with the amortization of intangibles and net operating loss carryforwards for which management believes, based on the available evidence, is more likely than not that the Company will not realize the benefit. Management believes that, based on the available evidence, it is more likely than not that the Company will realize the benefit from its remaining deferred tax assets. As of December 31, 2007 the Company's total net operating loss carryforwards were approximately \$4.0 million and are scheduled to expire in 2023 through 2026.

For income tax purposes, distributions paid to common stockholders consist of ordinary income and return of capital. Distributions paid were taxable as follows for the years ended December 31 (dollars in thousands):

	2007		2006		2005	
	Amount	Percentage	Amount	Percentage	Amount	Percentage
Ordinary income	\$ 6,997	100.0%	\$ 2,182	94.5%	\$ 1,242	22.2%
Return of capital		0.0%	127	5.5%	4,350	77.8%
	\$ 6,997	100.0%	\$ 2,309	100.0%	\$ 5,592	100.0%

A portion of the Company's income from a qualified REIT subsidiary that would otherwise be classified as a taxable mortgage pool, may be treated as excess inclusion income, which would be subject to the distribution requirements that apply to the Company and could therefore adversely affect its liquidity. Generally, a stockholder's share of excess inclusion income would not be allowed to be offset by any operating losses otherwise available to the stockholder. Tax exempt entities that own shares in a REIT must treat their allocable share of excess inclusion income as unrelated business taxable income. Any portion of a REIT dividend paid to foreign stockholders that is allocable to excess inclusion income will not be eligible for exemption from the 30% withholding tax (or reduced treaty rate) on

dividend income. For the year ended December 31, 2007, approximately 3.5% of distributions paid represented excess inclusion income.

Note 16 Liquidity Risks and Uncertainties

The risks associated with the Company's business become more acute in any economic slowdown or recession. Periods of economic slowdown or recession may be accompanied by decreased demand for consumer credit and declining asset values. In the manufactured housing business, any material decline in collateral values increases the loan-to-value ratios of loans previously made, thereby weakening collateral coverage and increasing the size of losses in the event of default. Delinquencies, repossessions, foreclosures and losses generally increase during economic slowdowns or recessions. For the Company's finance customers, loss of employment, increases in cost-of-living or other adverse economic conditions would impair their ability to meet their payment obligations. Higher industry inventory levels of repossessed manufactured houses may affect recovery rates and result in future

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

impairment charges and provision for losses. In addition, in an economic slowdown or recession, servicing and litigation costs generally increase. Any sustained period of increased delinquencies, repossessions, foreclosures, losses or increased costs would adversely affect the Company's financial condition, results of operations and liquidity. We bear the risk of delinquency and default on securitized loans in which we have a residual or retained ownership interest. We also reacquire the risks of delinquency and default for loans that we are obligated to repurchase. Repurchase obligations are typically triggered in sales or securitizations if the loan materially violates our representations or warranties. If we experience higher-than-expected levels of delinquency or default in pools of loans that we service, resulting in higher-than-anticipated losses, our servicing rights may be terminated, which would result in a loss of future servicing income.

The availability of sufficient sources of capital to allow the Company to continue its operations is dependent on numerous factors, many of which are outside its control. Relatively small amounts of capital are required for the Company's ongoing operations and cash generated from operations should be adequate to fund the continued operations.

The Company's ability to obtain funding from operations may be adversely impacted by, among other things, market and economic conditions in the manufactured housing financing markets generally, including decreased sales of manufactured houses. The ability to obtain funding from sales of securities or debt financing arrangements may be adversely impacted by, among other things, market and economic conditions in the manufactured housing financing markets generally and the Company's financial condition and prospects.

The Company's supplemental advance facility expired in March 2008 and has been extended until June 13, 2008. As of March 14, 2008, \$46 million was outstanding under the supplemental advance facility. As of March 14, 2008, \$15 million was outstanding under the Bridge Financing described under Item 1 Business Recent Developments Bridge Financing). The Company is seeking alternative means to satisfy its obligations under these facilities, which may include cash from operations, asset sales, re-financing arrangements, and issuances of convertible debt or equity.

The Company's audited financial statements for the fiscal year ended December 31, 2007, were prepared under the assumption that the Company will continue its operations as a going concern. The Company's registered independent accountants in their audit report have expressed substantial doubt about the Company's ability to continue as a going concern. Continued operations depend on the Company's ability to meet its existing debt obligations. Based on the intrinsic value of the Company's assets and discussions the Company has had with third parties about possible strategic alternatives, the Company believes it will be able to raise the additional funds it needs on a timely basis, but such funds may not be available or may not be available on reasonable terms.

Note 17 Lease Commitments

The Company leases office facilities and equipment under leasing agreements that expire at various dates. These leases generally contain scheduled rent increases or escalation clauses and/or renewal options. Future minimum rental payments under agreements classified as operating leases with non-cancellable terms at December 31, 2007 were as follows (in thousands):

2008	\$ 1,126
2009	1,124
2010	1,027
2011	796
2012	197
Thereafter	
Total	\$ 4,270

For the years ended December 31, 2007, 2006 and 2005, rental and operating lease expense amounted to approximately \$1.4 million, \$1.3 million and \$1.1 million, respectively. The Company did not pay any contingent

rental expense and received \$0.1 million in sublease income during the year ended December 31, 2007. The Company did not pay any contingent rental expense nor receive any sublease income during the years ended December 31, 2006 and 2005.

Note 18 Fair Value of Financial Instruments

Statement of Financial Accounting Standards 107 Disclosures about Fair Value of Financial Instruments, requires disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate such value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques.

The following table shows the carrying amount and estimated fair values of the Company's financial instruments

Table of Contents

Origen Financial, Inc.
Notes to Consolidated Financial Statements

at December 31 (in thousands):

	2007		2006	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Assets				
Cash and cash equivalents (1)	\$ 10,791	\$ 10,791	\$ 2,566	\$ 2,566
Restricted cash (1)	16,290	16,290	15,412	15,412
Investments (2)	32,393	33,148	41,538	41,538
Loans receivable (3)	1,193,916	1,144,039	950,226	990,237
Servicing rights (4)	2,146	2,846	2,508	2,508
Liabilities				
Warehouse financing (5)	173,072	173,072	131,520	131,520
Securitization financing (6)	884,650	874,107	685,013	675,483
Repurchase agreements (5)	17,653	17,653	23,582	23,582
Note payables related party (5)	14,593	14,593		
Note payables servicing advances (5)			2,185	2,185
Accounts payable and accrued expenses (7)	45,843	45,843	26,303	26,303

(1) The carrying amounts for cash and cash equivalents and restricted cash are reasonable estimates of their fair value.

(2) The fair value of the Company's investments is based on market prices for investments classified as available-for-sale. The fair value of investments classified as held-to-maturity and investments accounted for under the provisions of SOP 03-3 is based on the discounted

value of the remaining principal and interest cash flows.

- (3) The fair value of the Company's loans receivable is based on the discounted value of the remaining principal and interest cash flows.
- (4) The fair value of the Company's servicing rights is based on internal evaluation based on the discounted value of remaining servicing rights cash flows.
- (5) The fair value of the Company's debt, other than securitization financing, is based on its carrying amount.
- (6) The fair value of the Company's securitization financing is estimated using quoted market prices for the exact or similar securities.
- (7) Due to their short maturity, accounts payable and accrued expense carrying values approximate fair value.

Note 19 Related Party Transactions

Gary A. Shiffman, one of the Company's directors, is the Chairman of the Board, President and Chief Executive Officer of Sun Communities, Inc. (Sun Communities). Sun Communities owns approximately 19% of the Company's outstanding common stock. Mr. Shiffman beneficially owns approximately 19% of the Company's outstanding stock, which amount includes his deemed beneficial ownership of the stock owned by Sun Communities. Mr. Shiffman and his affiliates beneficially own approximately 11% of the outstanding common stock of Sun Communities. He is the President of Sun Home Services, Inc. (Sun Home), of which Sun Communities is the sole beneficial owner.

Origen Servicing, Inc., a wholly owned subsidiary of Origen Financial L.L.C., serviced approximately \$30.6 million and \$20.7 million in manufactured housing loans for Sun Home as of December 31, 2007 and 2006, respectively. Servicing fees paid by Sun Home to Origen Servicing, Inc. were approximately \$0.4 million, \$0.3 million and \$0.3 million during the years ended December 31, 2007, 2006 and 2005, respectively.

The Company has agreed to fund loans that meet Sun Home's underwriting guidelines and then transfer those loans to Sun Home pursuant to a commitment fee arrangement. The Company recognizes no gain or loss on the transfer of these loans. The Company funded approximately \$13.2 million, \$8.0 million and \$7.2 million in loans and transferred approximately \$13.3 million, \$7.9 million and \$7.2 million in loans under this agreement during the three years ended December 31, 2007, 2006 and 2005, respectively. The Company recognized fee income under this agreement of approximately \$182,000, \$160,000 and \$94,000 for the years ended December 31, 2007, 2006 and 2005.

Sun Home has purchased certain repossessed houses owned by the Company and located in manufactured housing communities owned by Sun Communities, subject to Sun Home's prior approval. Under this agreement, the Company sold to Sun Home approximately \$1.1 million, \$1.2 million and \$2.1 million of repossessed houses during years ended December 31, 2007, 2006 and 2005, respectively. This program allows the Company to further enhance recoveries on repossessed houses and allows Sun Home to retain houses for resale in its communities.

Table of Contents**Origen Financial, Inc.****Notes to Consolidated Financial Statements**

During the year ended December 31, 2006, Origen Financial L.L.C. repurchased approximately \$4.2 million in loans from Sun Homes. The purchase price, which included a premium of approximately \$20,000, approximated fair value. The Company did not purchase any loans from Sun Communities or its affiliates during the years ended December 31, 2007 and 2005.

The Company leases its executive offices in Southfield, Michigan from an entity in which Mr. Shiffman and certain of his affiliates beneficially own approximately a 21% interest. Ronald A. Klein, a director and the Chief Executive Officer of the Company, owns less than a 1% interest in the landlord entity. William M. Davidson, the sole member of Woodward Holding, LLC, which owns approximately 7% of the Company's common stock, beneficially owns an approximate 14% interest in the landlord entity. The Company recorded rental expense for these offices of approximately \$567,000, \$465,000 and \$408,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

The Company, through its primary operating subsidiary Origen Financial L.L.C., currently has a \$15 million secured financing arrangement with the William M. Davidson Trust u/a/d 12/13/04, an affiliate of William M. Davidson, one of the Company's principal stockholders. See Note 11 Debt under the subheading Notes Payable Related Party for further discussion of this arrangement.

Note 20 Selected Quarterly Financial Data (UNAUDITED)

Selected unaudited quarterly financial data for 2007 is as follows (in thousands, except share data):

	Quarter Ended			
	December 31	September 30	June 30	March 31
Net interest income before loan losses	\$ 7,943	\$ 8,028	\$8,494	\$7,904

Net income before cumulative effect of change in accounting principle	2,033	1,754	2,004	1,134
Cumulative effect of change in accounting principle				46

Net income	2,033	1,754	2,004	1,180
Earnings per common share before cumulative effect of change in accounting principle basic and diluted (1)	\$ 0.08	\$ 0.07	\$ 0.08	\$ 0.05
Earnings per common share basic and diluted (1)	\$ 0.08	\$ 0.07	\$ 0.08	\$ 0.05

(1) Quarterly and year-to-date computations of per share amounts are made independently; therefore, the sum of per share amounts for the quarters may not equal per share amounts for the year.

Note 21 Subsequent Events

In February 2008 the Company's four outstanding repurchase agreements with Citigroup were not renewed (See Note 11 Debt). To satisfy the obligations due Citigroup under these agreements, the Company sold one of its asset backed securities which was financed through one of the repurchase agreements. The asset backed security that was sold had a carrying value of \$22.5 million as of the February 2008 sale date. Proceeds of \$22.5 million were primarily used to repay \$19.6 million outstanding under the repurchase agreements.

Table of Contents

Origen Financial, Inc.

Notes to Consolidated Financial Statements

On March 14, 2008, the Company's warehouse financing facility with Citigroup matured. The Company completed a sale of its unsecuritized manufactured whole loan portfolio, the proceeds of which were used primarily to pay off the warehouse financing facility. The Company recorded a loss, net of related allowance for loan losses, of approximately \$20.7 million as a result of this loan sale. Additionally, as a result of the loan sale, the Company no longer expects to complete its anticipated 2008-A securitization and has discontinued hedge accounting for the two interest rate swaps accounted for as hedges of the anticipated 2008-A transaction. The interest rate swap agreements were terminated on March 14, 2008 and a loss of \$4.2 million was recorded in the Company's first quarter 2008 earnings.

Because of the absence of a profitable exit in the securitization market and reduced pricing in the whole loan market, in March 2008 the Company suspended originating loans for its own account until these markets recover.

On March 14, 2008, the Company's supplemental advance credit facility secured by a pledge of the Company's residual interests in its securitizations was extended until June 13, 2008. As of March 14, 2008, the amount outstanding under such facility was \$46 million.

On March 13, 2008, the Company decreased its work force by 16% to reduce costs that were associated with originating loans for its own account.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosures Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, has determined that during the quarter ended December 31, 2007, there were no changes in our internal controls over financial reporting that materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting. It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there is only reasonable assurance that our controls will succeed in achieving their goals under all potential future conditions.

Our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of our disclosure controls and procedures are effective as of December 31, 2007. This conclusion is based on an evaluation conducted under the supervision and with the participation of management. Disclosure controls and procedures are those controls and procedures which ensure that information required to be disclosed in our filings is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and regulations, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, in order to allow timely decisions regarding required disclosures.

Management's Report on Internal Controls Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on this assessment, management believes that, as of December 31, 2007, our internal control over financial reporting is effective.

Our independent registered public accounting firm has issued an attestation report on our internal control over financial reporting. This report is included in this annual report on Form 10-K.

ITEM 9B. OTHER INFORMATION

None.

PART III

The information required by Items 10-14 will be included in our proxy statement for our 2008 Annual Meeting of Shareholders, and is incorporated by reference herein.
