-

**Item 2.05 *Costs Associated with Exit or Disposal Activities***

On March 20, 2007, Lancaster Colony Corporation, ( the Company ) committed to a plan to close its industrial glass manufacturing operation located in Lancaster, Ohio. This decision is intended to enable the Company to focus resources in its more profitable operations as well as improve overall financial performance. It is anticipated that production at the manufacturing facility will be largely phased out by June 30, 2007 with certain sales and distribution activities continuing late into the calendar year. Accordingly, while timing of the disposal of the associated real estate is difficult to predict, it is expected that active business operations will effectively cease by the end of the calendar year.

The Company s preliminary estimate of the total pretax charges to be incurred in connection with this closure is approximately \$5 to \$7 million. Costs associated with one-time termination benefits and other employee costs, including those related to the union pension plan, are estimated to be approximately \$1 million. Costs associated with the write-down of various assets and disposal-related activities are estimated to be approximately \$4 to \$6 million. Cash expenditures are expected to be approximately \$3 million.

A copy of a press release issued by the Company announcing the commitment to the plan of closure is attached as Exhibit 99.1
